In the case of our committee, for example, one significant portion of the funds we appropriate relates to the Department of Housing and Urban Development. Those funds are authorized in the Banking Committee, and in the Banking Committee the major tradeoff between the HUD funds and other funds is with the Export-Import Bank. Our subcommittee has no jurisdiction over the Export-Import Bank. So we are making a series of tradeoffs that are different because we had jurisdiction over somewhat different agencies.

That is why the budget process has these two tracks. In the end, it will all have to be brought together, and we

are going to have to have an appropriation that, in the final budget process, fits the second budget resolution.

Mr. ERTEL. If the gentleman will continue to yield, I appreciate the difficulties that the gentleman has, and I know the difficulties we had with the reconciliation bill here. As the gentleman is well aware, when we passed Gramm-Latta II—which was the amendment—it had struck out in its entirety a reconciliation on the National Science Foundation and a lot of others which has caused some problems. It is going to continue to cause problems; but the Senate, as I understand it, in their reconciliation, put in a number, and that is all? Am I correct on that?

Mr. GREEN. I am aware of that. I understand it is below ours. Obviously, that would have to be resolved in conference.

Mr. ERTEL. The Senate number, then, is below the appropriation here. Is that what the gentleman is telling me?

Mr. GREEN. That is what I am telling the gentleman.

Mr. ERTEL. So, in other words, when we go to conference on that, we cannot come above the Senate number because we have no number.

The CHAIRMAN. The time of the gentleman from New York (Mr. GREEN) has expired.

(At the request of Mr. ERTEL and by unanimous consent, Mr. GREEN was allowed to proceed for 2 additional minutes.)

Mr. ERTEL. Mr. Chairman, will the gentleman yield?

Mr. GREEN. I yield to the gentleman from Pennsylvania.

Mr. ERTEL. That is one of the problems we have with this reconciliation.

In our committee, which was the authorizing committee, we made exactly the same tradeoffs the gentleman did. We thought that the National Science Foundation was very important; and, in fact, we came under the numbers in other areas of our jurisdiction so we could protect the research efforts of the National Science Foundation.

So what we are facing is, because of the botched-up job we did in the reconciliation, we have got ourselves into a real problem here.

I am prepared to support the Appropriations Committee, but I want it understood, so that if somebody goes back and says, "Hey, he voted for something above the reconciliation," we, in fact, had a tradeoff. We traded off other things in our committee jurisdiction on the authorization that would have allowed this higher number, and, in fact, above the Senate number, because we, in fact, made some of the same tradeoffs the gentleman is talking about.

So I just want to register this thought: This is one more problem that Gramm-Latta II made for us, and everybody here ought to realize it. It was the worst piece of legislation this House has ever passed. It was the worst-prepared and the most ill-conceived I have ever seen.

Mr. GREEN. I can only say to the Chair and to the gentleman that that problem has been resolved, at least as far as this appropriations bill is concerned, because of the rule that the Rules Committee provided us.

If I can now return to the merits of the amendment offered by the gentleman from Kansas (Mr. WINN), I think the other point that ought to be understood is that the Winn amendment is not the administration position. The Winn amendment, in fact, cuts the spending for research and related activities below the level requested by the administration. I happen to think that the research and related activities are some of the most important parts of the National Science Foundation. They are the real seed corn, I think, of future efforts to improve our productivity and our economic growth.

The CHAIRMAN. The time of the gentleman has expired.

(By unanimous consent, Mr. GREEN was allowed to proceed for 3 additional minutes.)

Mr. GREEN. Mr. Chairman, I would simply urge the Members who are concerned about the long-term productivity of this country and its ability to move forward in technological fields not to take this item in this bill below the level that the administration wants, which is what this amendment would do.

□ 1330

Mr. TRAXLER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, if the Members will look at the report accompanying this bill, in the National Science Foundation section it has this to say about the National Science Foundation functions:

> The National Science Foundation bears a unique responsibility among Federal agencies for the health and well-being of the Nation's basic scientific research activities. There can be no question that its programs serve a vital function. It is clear that the commercial vitality and military security of the United States are directly dependent upon the Nation's command of fundamental scientific knowledge.

Mr. Chairman, I oppose these further cuts in the National Science Foundation budget. Why do I say, "further cuts"? Well, this administration proposed a $320 million reduction in the recommendations that we had had in the prior administration's submissions to us. That was $320 million below the Carter recommendations. If we want economy, that was it.

This committee by and large subscribed to the Reagan recommendation. However, we did restore $70 million, which is not being attempted to be taken away, and I oppose that, because in my opinion these further cuts of $70 million would begin to erode this basic scientific base which we are going to have to maintain if this Nation is going to be one of the foremost technological nations in this world. We cannot compete with our competitors in Japan or West Germany or, for that matter, with the Russians if we do not have these kinds of basic scientific research commitments.

This subcommittee, chaired by the gentleman from Massachusetts (Mr. BOLAND), and with the gentleman from New York (Mr. GREEN) as the ranking minority member—and it is my pleasure to serve with these very distinguished gentlemen, as well as the other members of the subcommittee—held very extensive hearings. We have made cuts. We increased some areas. The bottom line on all of this is that we are within one-third of 1 percent of the President's budget recommendations for this area, that is, one-third of 1 percent overall, and we are within the congressional budget resolution for the science function.

We have made some modest shifts in the priorities based upon our best judgment at these hearings. Now, for heavens sake, if the Congress does not have that right, that fundamental right to make these kinds of determinations, based upon the public input, the agency input, and our best judgments, why are we here? No one, not even my best friends and the greatest supporters of the President on that side of the aisle, would argue that we have to take the executive branch's budget and adopt it in toto. To do that obviates the need for a Congress.

Is anybody over there suggesting that we ought to do that? Is anybody on this side asking for that? Certainly the Constitution does not propose that. We are coequal branches of government.

So we have a responsibility, and the members with whom I am delighted to serve on this subcommittee have exercised their responsibility in the finest traditions—and I am going to use this term—and the finest bipartisan traditions of this body.

Mr. Chairman, in these days of international challenges to the United States, it should be obvious how important it is to maintain our strength in all areas of basic research and development. National productivity growth and all our edge in international competition depend directly on our scientific and techological lead, a lead that has suffered gradual erosion. We cannot afford further slippage; it is that simple.

Cutting $70 million from research not only wipes out the $45 million this committee restored in critical areas,

but would further cut $25 million more in the hard sciences—an area that both administrations have worked hard to protect. Basic scientific research needs to be increased, not cut if our Nation is to maintain its lead in the next decades.

Our committee's modest increase protects the hard sciences and, additionally, helps to maintain efforts in the biological, behavioral, and social sciences, an area where OMB made drastic, ideological, and completely disproportionate cuts.

The restorations we are providing in this bill will allow us to maintain data bases and studies of our society that are critical to sound, intelligent public policymaking.

Look at the issues that this Congress will be grappling with in the coming years: rapid inflation; slow productivity growth; the changing age structure of the population; the shift in population and industry from the Snow Belt to the Sun Belt; sluggish rates of savings and capital formation; the presence of barriers to innovation, and so on.

The list is endless, and it should be clear that simplistic, idealogical solutions cannot work. The formation of public policy to deal with these problems depends upon the vitality of the social, behavioral, and economic science research programs within the NSF. Cutting these programs in the name of reducing the size of the public sector is a little like slimming down an overweight giant by removing his eyes, ears, and brain.

Mr. Chairman, our committee held extensive hearings on the budgets of the various agencies in this bill. We made some cuts, we made some increases, but the bottom line is that we are within one-third of 1 percent of the President's budget overall, and we are within the Congressional Budget Resolution for the science function. We made small, modest shifts in the priorities based upon the long run best interests of this Nation.

This committee has acted responsibly, our bill had bipartisan support in subcommitteee. it had bipartisan support in full committee, and I am glad to see that we had bipartisan support here on the floor. I oppose the amendment and urge my colleagues to vote "No."

Mr. PURSELL. Mr. Chairman, will the gentleman yield?

Mr. TRAXLER. I yield to the distinguished gentleman from Michigan.

Mr. PURSELL. Mr. Chairman, I congratulate the gentleman from Michigan (Mr. TRAXLER) for his remarks and for pointing out this was done in a spirit of bipartisanship.

I think it is important that the National Science Foundation maintain its basic research for the future of this country. It is a pretty well known fact, I think, that the universities primarily do about 80 percent of all the research in this Nation. Sometimes Congress acts on social security in a crisis vacuum without looking at that kind of needed research in labor markets and under changing conditions. I think, speaking on behalf of the Northeast area with its high unemployment, that this kind of research is critical to this Nation, and it should not be shortchanged in any respect by any administration regardless of party.

So, Mr. Chairman, I congratulate the gentleman from Michigan (Mr. TRAXLER) for his remarks, and I, too, ask that the Members oppose this amendment.

Mr. Chairman, I rise in support of the position outlined by the Chairman and Ranking Republican member of the subcommittee with respect to funding for the National Science Foundation in general and it Directorate for Biological, Behavioral, and Social Sciences in particular.

Needless to say, these are times of rapid social and economic change. The administration and Congress have embarked on a major redirection of domestic policy. In that connection, the President recently instituted a bimonthly review of relevant "social, economic, and demographic trends." Accordingly, it seems especially important that our Nation maintain a significant capacity to monitor and understand the effects of these and other changes on Americans—on their work, their income, and purchase decisions; on their attitudes, values, and expectations; on their goals and aspirations; and on their understanding of and reactions to policy changes.

There has been much criticism of the behavioral, social, and economic sciences in recent years, and no doubt some of it is justified. With the advantage of hindsight, any set of research activities can be criticized, including those in the biological and physical sciences. However, is this justification for singling out the social science activities of the Foundation for being of lower quality than other scientific research, or for having lower national priority?

A close review of the record suggests not. The quality of social science research supported by the Foundation was intensively examined some years ago by a committee of the National Academy of Science, headed by the Nobel laureate, Dr. Herbert Simon. The committee concluded that the quality of the social science research program fully met prevailing NSF standards. It also recommended that the Foundation give increased emphasis to large-scale, data-oriented research projects designed to follow the same individuals through time (longitudinal studies).

More recently, scientists in the Academy (most of who are not social or behavioral scientists) passed a resolution with virtual unanimity affirming the critical importance of social and behavioral science research.

The problems that the Congress will be discussing over the next decade are predominately those that can be illuminated by maintenance of a strong research base in the behavioral, social, and economic sciences. Among them are how to deal with the changing age structure of the population; how to assess the effects of changes in the tax structure on saving and investment flows; how to strengthen our competitiveness abroad; how to bolster our lagging productivity growth rate; et ceteria. All these are problems that require relevant data and fresh insights from the social sciences. Maintaining the research program in the behavioral, social, and economic sciences at the National Science Foundation will help greatly in achieving those objectives.

In my view, the NSF recommendations made by the committee accurately reflect the need for such research, within the bounds of fiscal responsibility. I urge my colleagues to support this bipartisan position.

Mr. TRAXLER. Mr. Chairman, I want to commend the gentleman from Michigan (Mr. PURSELL) for his fine statement. The gentleman is well known for his strong support of the programs of the National Science Foundation.

Mr. COUGHLIN. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I will not take my full 5 minutes, but I do want to associate myself with the remarks of the distinguished ranking minority member and our distinguished colleague, the gentleman from Michigan (Mr. TRAXLER), in opposition to the amendment.

The additional money that was put in here was for scientific research primarily and instrumentation. These are areas which are of very vital importance to our full science program. The bill, as has been pointed out, is within our budgetary constraints. We have just simply shifted things from one priority to another to provide a slight increase for the National Science Foundation.

Mr. FUQUA. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to the Winn amendment and in support of the Appropriation Committee's recommendations.

Mr. Chairman, I would like to say at the outset that Mr. WINN, the ranking minority member on our committee has for long years been a staunch supporter of science and technology, and, I am sure, he remains a strong supporter. As often happens in Congress we find ourselves in disagreement over

the details of this budget, but I believe Mr. WINN and I are both committed to an overall strengthening of science and technology. I look forward to further interactions with my valued colleague. That said let me indicate the problems I see in adopting the Winn amendment.

The Committee on Science and Technology, as well as the Appropriations Committee, saw major deficiencies and inadequacies in the Foundation budget request. In the budget request the Science and Engineering Education directorate was eliminated. The important cross directorate programs, including research instrumentation and women and minorities in science activities were eliminated. The programs in social sciences, economic research, and behavioral sciences were severely reduced. The same is true of important intergovernmental and international programs.

One area which has been of particular concern to me and to the Congress in the past are the Foundation's programs in innovation. Chairman MITCHELL of the Committee on Small Business joined with me in a recent "Dear Colleague" letter on those programs. As we noted, over $17 million in private follow-on funding has resulted from an investment of $5.3 million in the small business innovation program. This is only a beginning. The Foundation is further stimulating university and industry collaboration to stretch already limited research funds to address problems of immediate concern to our economic and industrial needs. These and other programs have been severely cut by the administration's request.

The appropriations bill would redress some of the imbalances we found, including those in innovation I mentioned. They have added a small amount of money to specific activities in order to maintain continuity in these important areas while maintaining a strong support for the physical sciences and engineering.

The Winn amendment is not balanced. While it does refocus administration priorities by allowing appropriations to remain for the Foundation's education programs, it does so by removing more moneys from the research directorates. The choice is clear. Either Mr. WINN will have to take an additional $25 to $45 million from programs already severely cut or they must be taken from the physical science research areas. Both this administration and the previous are in agreement that the physical science and engineering need accelerated strengthening if we are to meet the Nation's economic and strategic needs. It does not make sense to reduce those programs now when we need them most.

Mr. Chairman, though respecting my colleague's motivations in offering this amendment and while in basic agreement with his concern for science education and an austere budget, I do not think further reductions in the Foundation's research budget is the route to take. I must strongly oppose the Winn amendment.

□ 1340

Mr. HOLLENBECK. Mr. Chairman, will the gentleman yield?

Mr. FUQUA. I yield to the gentleman from New Jersey.

Mr. HOLLENBECK. I thank the gentleman for yielding.

I want to associate myself in opposition to the Winn amendment.

Mr. Chairman, I rise to express my reservations over several provisions of the Winn amendment. As I noted in the additional views I placed with the report accompanying the National Science Foundation (NSF) authorization bill, H.R. 1520, I am greatly concerned abut adequate funding for number of important NSF programs. These include science and engineering education, economics and behavioral sciences, and the international programs. These areas are extremely important to provide the necessary trained manpower for our engineering and scientific needs. In addition, they give us a better understanding of the means to utilize and bring technology into the mainstream of commerce both nationally and internationally.

While I am generally supportive of the President's overall budget levels in other areas of science, there is not sufficient flexibility in the requested NSF budget to allow enough resources to be devoted to these important areas. Maintaining the overall level will seriously undermine the Foundation's natural science programs.

The Winn amendment would reduce the overall figure back to the original requested level with one major difference. His amendment would carve an additional $25.1 million for science and engineering education activities at the expense of research and related activities. Under the administration's request even the physical science activities are held to strict limits. Over the past few years there has been only a 2-percent increase of the overall budget and I would suggest that this is not the time to cut further into the physical sciences.

Mr. BOLAND, the chairman of the HUD and Independent Agencies Appropriations Subcommittee and its ranking minority member, Mr. GREEN, are to be commended for obtaining unanimous bipartisan support for an appropriation bill with acceptable compromises. It restores some funds to those critical areas I noted while being restrained in its total figure. With a budget only 1 percent greater than that originally appropriated for fiscal year 1981 they have been able to address some severe limitations to the proposed NSF program. I wish to express my strong support for the appropriations bill as reported by the committee.

Mr. BROWN of California. Mr. Chairman, will the gentleman yield?

Mr. FUQUA. I yield to the gentleman from California.

Mr. BROWN of California. I thank the distinguished chairman for yielding.

I want to praise the gentleman for his eloquent remarks in opposition to the amendment.

The CHAIRMAN. The time of the gentleman from Florida (Mr. FUQUA) has expired.

(At the request of Mr. BROWN of California and by unanimous consent, Mr. FUQUA was allowed to proceed for 2 additional minutes.)

Mr. BROWN of California. If the gentleman will continue to yield, I also want to second the remarks that the gentleman made about our distinguished colleague, the gentleman from Kansas (Mr. WINN), who offered this amendment.

I know that the gentleman from Kansas (Mr. WINN) has, over the years, as the gentleman indicated, been a strong supporter of science and technology and the National Science Foundation.

I do not think that in past administrations he has ever been as assiduous in his pursuit of the specific recommendations made by the Office of Management and Budget as he is this year, but I do not think that that detracts from his overall services to the committee.

I think I ought to make the point that the figure that the Appropriations Committee is submitting is still substantially lower than what most observers think the National Science Foundation could productively use in maintaining the high quality of basic research in this country.

It is much lower than the figure that I personally supported in the Subcommittee on Science Research and Technology, and I think to reduce it any further, particularly in the amount of $70 million, as suggested in this amendment, would do irreparable damage to a number of very significant programs which the gentleman has commented on.

Mr. FUQUA. I want to point out to the gentleman, and I am sure he was aware, that the former administrator of NASA, Dr. James Fletcher, who was head of the Reagan transition team for the National Science Foundation, testified before the subcommittee, and was very critical of some of the reductions that had been made by OMB in this very important area.

Here is a man whose credentials are very clear, who strongly urged that we restore some of these funds that had

been erroneously or misguidedly reduced.

So I think there is strong ground by responsible scientists in this country to opposing further reductions in the NSF budget.

The CHAIRMAN. The time of the gentleman from Florida (Mr. FUQUA) has again expired.

(At the request of Mr. BROWN of California and by unanimous consent, Mr. FUQUA was allowed to proceed for 2 additional minutes.)

Mr. BROWN of California. If the gentleman will yield further, this of course reminds me that we did elicit testimony from the Director of the Foundation as to the amount of input which NSF had in making these recommendations. I recall we were told that they were given hours to respond and that that was the way in which these budget recommendations finally emerged with regard to the National Science Foundation.

I think that we have a rigorously tight figure in this bill. I hope very much that the House will uphold the Appropriations Committee and I want to compliment the distinguished chairman of the subcommittee for his continued close cooperation in these matters.

Mr. FUQUA. Mr. Chairman, I would point out in closing that since 1965, if one measures in constant dollars, the National Science Foundation budget is 25 percent below what it would have been had it been maintained at level funding during those years. Even in fiscal year 1982, in constant dollars we are not keeping up with the inflation such that we can continue to have the research program necessary and I urge the defeat of the amendment of my good friend from Kansas (Mr. WINN).

Mr. DENARDIS. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I oppose the amendment to cut $70 million from the NSF appropriations as proposed by the distinguished gentleman from Kansas (Mr. WINN).

I would like to try to pin down as best I can what the implications of this cut would be.

Reference has already been made to the negative impact on research and related activities. It goes further than that, as I see it, extending to the biological behavioral and social sciences and in particular social and economic science.

The amendment is offered for the alleged sole purpose of keeping the appropriations for NSF at the level requested by the administration. However, the entire amount of $70 million is proposed to be made in the portion of the appropriation for research and related activities.

It would reduce the amount for research and related activities to $995 million or $25,100,000 less than the administration requested, and leave intact an increase of $25,105,000 recommended in the bill above the administration budget request for science education activities.

So, as I understand it, a significant effect of the proposed amendment would be to provide funds for science education at the expense of research.

A further consequence which concerns me greatly would be the cut in research funds which is felt particularly by the biological behavioral and social sciences and most sharply by the social and economic science.

I say this based on examining the NSF's revised fiscal year 1982 budget justification as submitted in March 1981 which shows that the B.B. & S. has been severly cut. They have suffered fiscal year 1981 rescissions of $15 million, $10 million in the social and economic science alone and a cut of $47 million, $30 million in social and economic science in the fiscal year 1982 budget revision.

I believe that we must keep the amount of these rescissions and revisions in mind when reviewing this amendment.

The fiscal year 1981 appropriations for B.B. & S. was $198 million, $34 million for social and economic science.

The Carter administration's fiscal year 1982 budget for B.B. & S. was $219 million, with $40 million for social and economic science.

This would have been an increase over the fiscal year 1981 level for B.B. & S. of 10 percent, 19.3 percent for the social and economic science.

The Reagan administration budget provision for fiscal year 1982 proposed $172 million for B.B. & S., including only $10 million for social and economic science.

Thus, as we consider the 1982 NSF appropriations, I think we should recognize that funding for research in biological behavioral and social science has been reduced for fiscal year 1981 by 13 percent and funding for social and economic science has been reduced by 30 percent.

The March 1981 budget provisions reduced the fiscal year 1982 request for B.B. & S. by 13 percent overall. Within that the cut for social and economic science was 25 percent.

I have neither read nor heard any justification for the cuts of these magnitudes in the NSF support for research in B. B. & S. generally or in the social and economic science in particular.

None is provided in the basic documents prepared by the Office of Management and Budget describing the administration's program for economic recovery which I have supported.

In the first of those documents submitted to the Congress on February 19, 1981, it was indicated that the plan would, "selectively reduce or eliminate some NSF programs while maintaining ongoing support for its critical responsibilities in the advancement of science."

I regard support for the biological behavioral and social sciences, including social and economic science, a critical responsibility of the National Science Foundation.

The CHAIRMAN. The time of the gentleman from Connecticut (Mr. DENARDIS) has expired.

(By uanimous consent, Mr. DENARDIS was allowed to proceed for 2 additional minutes.)

Mr. DENARDIS. OMB's April 1981 document entitled "Additional Details on Budget Savings" indicated proposed significant reduction of support for behavioral economic and social sciences with the unexplained and unsupported assertions that support of these sciences is considered of relatively lesser importance to the economy than support for the natural sciences.

□ 1350

I disagree with that. I emphatically reject that assertion. I want to make clear that the effect of this amendment would be to strike not only at research, but at the social sciences most drastically.

I urge the Members of this body to join me in opposing the Winn amendment and to support the committee bill

Mr. BOLAND. Mr. Chairman, will the gentleman yield?

Mr. DENARDIS. I yield to the gentleman from Massachusetts.

Mr. BOLAND. Mr. Chairman, I want to compliment the gentleman from Connecticut (Mr. DENARDIS) on his statement. I think he targets precisely what that amendment would do in the biological, behavioral and social sciences. He expresses great concern for that and he is absolutely correct.

I am sure many have read the committee report with reference to this area. I think the report demonstrates the concerns this committee has in the very area in which the gentleman from Connecticut is interested and to which he has spoken so well.

On page 31, I read from the report:

> The Committee directs that the $44,900,000 shall be applied to the highest priority activities at the discretion of the Foundation within the Biological, Behavioral and Social Sciences; Scientific, Technological and International Affairs; and Cross-Directorate Programs.

I am sure with that kind of urging and that kind of direction, I am sure that the NSF would probably concern itself with the deep cuts that have been made in the very areas the gentleman has addressed. I would hope that some adjustments might be made in those particular activities and functions.

I thank the gentleman for yielding.

Mr. DENARDIS. I thank the distinguished gentleman from Massachu-

setts for underscoring that important point.

Mr. WALGREN. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I want to associate myself with the remarks previously made by the chairman of the full committee, the gentleman from Florida (Mr. FUQUA), and the former chairman of the Science and Research Subcommittee, the gentleman from California (Mr. BROWN).

It seems to me that the point is worth making that the fundamental problem with this amendment is the overall level of NSF funding.

The level of $1,033 million was selected by the Office of Management and Budget with, as far as we can determine, no consultation, no interaction, no formal notice, at least with any reasonable chance to respond, of anyone directly connected with the National Science Foundation.

Although it was said earlier that there is no indication that the National Science Foundation could not live within this amount, I think it is fair to say that the National Science Foundation was dumbfounded about where this number came from.

Testimony before our subcommittee revealed that even the person leading the Reagan transition team for NSF, James Fletcher, the former head of NASA, was not consulted before this level was presented by OMB as the administration's budget for NSF. With the opportunity to evaluate the impact of such a proposal on NSF, Dr. Fletcher clearly opposed the overall and the individual reductions necessitated by it.

The amendment would accept the overall limit allowing these funds to be divided among the various programs funded by NSF in the discretion of the Foundation. The problem with this is that, although it does not look like you are cutting any specific program, the fact is that, if you maintain the effort in science education and if you maintain the effort in engineering as the sponsor of the amendment asserts we should do, the only other place left to cut to stay within the $1,033 limit is in the basic research functions. That puts the amendment in the position of arguing on the one hand that $1,033 million is an absolute number that must be accepted by the Congress as engraved in stone, but that the other numbers submitted by the administration for our Nation's most essential research functions should not be accepted by the Congress and should not be accepted as the proper number for our effort in this area.

This amendment is not in the best national interest. The Congress has a responsibility to use its independent judgment through the budget process to make sure that our effort in science is balanced and constructive for the Nation as a whole. This bill as submitted by the Appropriations Committee is within the limits set out in the most stringent budget process adopted by the Congress and deserves the support of the House.

Mrs. HECKLER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to the Winn amendment. At the outset I wish to express my deep respect and admiration for the gentleman from Kansas (Mr. WINN), for his leadership, for his concern and for his strong sense of patriotism and conscience for the country as reflected in his leadership in the jurisdiction of the committee. It so happens that on this issue we have a philosophical difference of opinion, but this in no way diminishes my respect for his role in the committee itself. I would also like to thank the gentleman from Massachusetts (Mr. BOLAND) and the gentleman from New York (Mr. GREEN), for the long hours and hard work they have put into this bill. They have provided the Members with a worthy compromise figure deserving bipartisan support.

In addressing the National Science Foundation budget it has always been clear to the minority that the authorization budget levels presented by the majority did not reflect the President's economic recovery program. As we are all well aware, all Federal programs have had to share the fiscal hardships of budgetary reform.

This is why, in spite of the obvious importance of NSF's role in promoting science and technology, it too should share the burden of reduced Government spending. This is why the minority moved to keep NSF at the President's recommended level at both the subcommittee and full committee. As the ranking minority member on the Science, Research and Technology Subcommittee, both of these attempts at budget reform received my support. However, in both instances I succeeded in making changes that would allow for the continuation of programs targeted for women and minorities.

The President's budget level of $1.033 billion was very lean. This figure is $62 million below the current fiscal year 1981 authorization level, and $127 million below the fiscal year 1982 authorization level passed by the Science and Technology Committee. It was especially difficult for me to support the minority budget level since it reduced the funding levels for many programs vital to the continued integrity of America's science and technology base. Not only were the budget reductions deep—they were also allocated in such a fashion that particular programs were either completely eliminated, or reduced beyond functional usefulness.

These were not easy actions to take, but the NSF authorization budget, as passed by the majority at $127 million over the President's recommendation, was simply too high to accept.

The budget level for NSF offered today by the Appropriations Committee is, to me, an acceptable compromise figure. The bill was passed with unanimous bipartisan support reflecting the need to restore some flexibility to NSF allowing for the continuation of some vital programs.

Equally important is the fact the appropriations bill is under the Budget Act's section 302 allocation established by Gramm-Latta I. The fact that the Appropriations Committee was able to make savings available in other areas within its jurisdiction in order to increase funding for the National Science Foundation is gratifying. I regret that we didn't have this same flexibility on the SRT subcommittee.

In short, the appropriations bill represents a compromise unavailable to the minority on the Science and Technology Committee. It allows us to increase our support for the Foundation while still remaining within the spending boundaries established when we supported the President by voting for the Gramm-Latta resolution.

I am in opposition to the Winn amendment, Mr. Chairman, for two reasons:

First, the amendment takes the $70 million entirely from research and related activities. This leaves the appropriations level of $35 million for science education activities intact. While I am supportive of the science education programs, discussions with scientists in the administration, Federal agencies, and from our top universities, along with industry representatives, have convinced me that taking $70 million out of research and related activities would be a terrible mistake. This amendment would go well below—$25.1 million—the administration's recommendation, causing some concern that the amendment would jeopardize the basic research functions of the Foundation.

Specifically, I am concerned about the cuts in the economic biological, behavioral, and social sciences. Cuts in the biological sciences are very difficult to justify; at stake is our leadership in this field, which includes continuing advances in the medical sciences. Research in the behavioral and social sciences cannot be fully supported by the private sector and the market economy. The direct monetary returns from such research are not always immediate or predictable, and the benefits can rarely qualify as proprietary returns on corporate investment. Nevertheless, this research is of the utmost importance.

The behavioral sciences are of equal importance. It is interesting to note

that America is in the initial stages of incredible technological breakthroughs, yet little research is underway to determine how people will respond to the exponential growth of technology. Dr. Gerald Holton, of Harvard, gave the Jefferson Lecture in the Humanities earlier this year. He dedicated his lecture, the highest honor this country bestows on a professor of the humanities, to the problem of the increasing gap between technology and the average citizen. The problem at issue here is that our technological growth has occurred much more quickly than our human ability to adapt it. America has gained the innovative and productive strength to enable unlimited technological progress. However, our accomplishments in developing the means to bring the people of this country into this technological mainstream are sorely lacking. This was the issue he, as a professor of the history of science, thought most pressing in America today. I must agree. This is only one reason why the funding for behavioral sciences must be maintained.

Critical national problems of the 1980's such as productivity and energy have major social and economic elements, making economic research a vital necessity. The Japanese application of social science principles, mainly of American origin, to problems of industrial management illustrates how innovation in social organization for manufacturing and marketing can lead to increased productivity and economic gain. Important enterprises are now built around economic forecasting, cost/benefit analysis, demographic projections, survey research, management science, public relations, and consumer research.

Second, I am also against the amendment because it will leave no room for continued funding of the women and minorities initiatives carried out under the cross-directorate programs. Other programs that would likely be wiped out include: economic and social sciences, industry/university cooperative research projects, small business innovation, intergovernmental and public service programs, international programs, and research facilities and instrumentation.

All of these areas are of critical interest to me and members of the scientific community at large. I would like to point out, though, the special needs of women and minorities in science.

The United States is in a race to stay ahead of the world competition for science and technological leadership. To be the leader in science and technology is to be at the cutting edge of the world's future. The United States must win the competition, and the Congress must take whatever actions necessary to support our side.

One action that Congress took last year, and that must be continued into fiscal year 1982 and beyond, are the efforts to increase the number of women and minorities that participate in science and technology-related fields. The intellectual and productive resources that these groups embody must be expressed in a more representative number. For example, according to the Congressional Research Service, women comprise 51.3 percent of the U.S. population but only 9.7 percent of the total scientists and engineers in the Nation. If the United States is going to excel in the race for scientific and technological supremacy, then the talents of all of its citizens must be employed.

In short, Mr. Chairman, I am not supporting Mr. WINN's amendment because the Appropriations Committee has provided the NSF with enough funds to continue vital programs and has done so at almost $60 million less than the majority's authorization bill passed out of the Science and Technology Committee and has still remained within the Gramm-Latta reconciliation guidelines.

□ 1400

The CHAIRMAN. The time of the gentlewoman from Massachusetts has again expired.

(At the request of Mr. TRAXLER and by unanimous consent Mrs. HECKLER was allowed to proceed for 1 additional minute.)

Mr. TRAXLER. Mr. Chairman, will the gentlewoman yield?

Mrs. HECKLER. I yield to the gentleman from Michigan (Mr. TRAXLER).

Mr. TRAXLER. I would like to commend the gentlewoman on her statement, and most especially the fine tribute she has paid to the gentleman from Kansas (Mr. WINN). I want to join in those remarks.

Mrs. HECKLER. I appreciate that, and I think it would be the unanimous decision of the committee to express strongly our respect for our colleague from Kansas (Mr. WINN), who has given such valuable and very sensitive service to the committee.

Mr. AUCOIN. Mr. Chairman, will the gentlewoman yield?

Mrs. HECKLER. I yield to the gentleman from Oregon (Mr. AUCOIN).

Mr. AUCOIN. I want to associate myself with the gentlewoman's excellent remarks and say to her and my colleagues on that side of the aisle in particular, at this time when we are talking about reindustrialization, supply-side economics and all of the rest, we could have neither of those without advances in science and without advances in research, which is the prerequisite for all that follows. So I think the gentlewoman's comments are right to point and I would hope we would defeat the amendment.

Mr. Chairman, the cuts proposed by this amendment ignore the challenges this country faces in declining productivity, a falloff in research and development, and threats to our competitive edge in the international marketplace.

As chairman of the House Task Force on Industrial Innovation and Productivity, I am acutely aware of these problems. During the 1970's, research and development expenditure fell from nearly 3 percent of GNP to about 2.25 percent. In the same period there was a 13-percent drop in the number of engineers and scientists in the American work force, while Japan, our chief competitor for high technology markets, increased its engineers and scientists by 62 percent. In the last 12 years, productivity growth rate has been cut in half. From 1947 to 1966, the rate was about 3.2 percent a year. But from 1966 to 1977, it grew only 1.6 percent a year, with negligible increases today.

Our support for the National Science Foundation will not by itself reverse these trends. But it will help. The NSF initiates and supports fundamental and applied research in all the scientific disciplines. This research includes investigations into areas that can lead to improvements in economic growth, energy supply and use, productivity, and environmental quality. By supporting the NSF, we declare our intent to remain on the cutting edge of scientific and technological advancements in the world, and provide a focus for our national R. & D. program. I urge my colleagues to defeat this amendment.

Mr. WALGREN. Mr. Chairman, will the gentlewoman yield?

Mrs. HECKLER. I yield to the gentleman from Pennsylvania (Mr. WALGREN).

Mr. WALGREN. I simply would like to commend the gentlewoman, especially on her remarks and position on this bill. This is not a partisan area. The gentlewoman is the ranking minority member of the Subcommittee on Science, Research and Technology, and with her help, science will be strong.

Mr. McCURDY. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

I support the Appropriation Committee's 1982 appropriation for the National Science Foundation. It is within the Reagan budget and is not a "budget buster." The committee has done a great service to our Nation as well as to our scientific community by restoring these funds to research and science education activities. For without these funds certain NSF programs that may well provide the answers to some of our country's most pressing problems could be lost. For example, without the committee's restoration of funds, the social, economic, and behavioral sciences would be cut by up to 75

percent at NSF for 1982. Yet many of our future needs depend on an understanding of human behavior of the sort that comes from NSF-sponsored research.

The problem of productivity must be addressed before full economic recovery can be reached. However, for productivity to be adequately addressed we need to look not only at major capital investments, but also the human side of the problem. It is the behavioral, social, and economic sciences that will provide these solutions: Individual human motivation, personal productivity, worker satisfaction, and adjustments to economic, environmental, and social changes. These are some of the human issues behind the productivity problem. These also are the issues for which the NSF's social and economic research programs provide the basic knowledge. We must continue to build on that knowledge by investing in quality research.

Let us consider for a moment the issue of our defense capability. We have the most sophisticated military hardware in the world, but without overcoming the manpower and training issues that plague our Military Establishment, that hardware will not be used effectively. The sooner we learn about such complex human processes as how normal thought occurs, or how problems are solved, the sooner we will be able to train enough personnel to operate our new sophisticated equipment. Research on complex human processes is exactly the kind of research NSF's social and behavioral science programs sponsor.

NSF is the major source of financial support of disinterested research in economics and the collection of sound economic data bases. The current administration has been using this data, and given us economic lessons in 60-second commercials, but it has not insured the protection of this resource. If the current restructuring of our national priorities being undertaken by Congress and the new administration are to be successful, basic economic research must be continued. President Reagan tells us he wants to promote American leadership. The United States is an acknowledged world leader in this area of research. The Appropriations Committee recommendation allows us to stay a world leader.

Mr. WALKER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in strong support of the amendment offered by my colleague from Kansas (Mr. WINN). H.R. 4034 provides appropriations that are $190 million over the President's request. By offering this amendment, the gentleman from Kansas is attempting to bring Federal spending down to a realistic level and a level that is in line with the sentiments expressed by this House when we acted on budget cuts.

But let us take a look here, Mr. Chairman, and figure out that we are not really even talking about cuts in this particular case. We are really talking about an $11 million increase over fiscal year 1981 appropriations. So when we hear talk about cuts, we are hearing talk about cuts from a proposed level of spending, not cuts in real terms. We actually are talking about an $11 million increase in spending, even if the Winn amendment is adopted.

If we support the level of spending recommended for the National Science Foundation in this bill, we will be endorsing an increase of almost 8 percent over last year's appropriation.

On the other hand, if we support this amendment, we will be taking a large step toward fiscal responsibility in the Federal budget. Those of us who support this amendment are not in favor of wreaking havoc with the National Science Foundation or any of its programs. To the contrary, this amendment does not cut any science education programs, and it does not terminate any NSF programs.

Our desire is simply to begin to get the Federal fiscal house in order, and have this part of the appropriations process play a part in achieving fiscal responsibility. None of us deny the importance of the National Science Foundation to our Nation. As a matter of fact, I think it has been symbolic of the fact that the opposition does have a great deal of respect for this institution by the fact that we have not hauled out a lot of questionable products, as has been done some years past, where we bring up things like the mating habits of the Malaysian bog frog or some such thing when we are debating this topic. We have not done that sort of thing. We have a great deal of respect for the work of the National Science Foundation.

There is no doubt that the Foundation can come up with a series of programs that would cost two, three, or four times what is contained in this bill, and they would be worthwhile programs. But the simple fact of the matter is that this Congress, over the last several decades, has allowed Federal spending to get completely out of hand. This amendment is not a case of us not supporting the National Science Foundation. Rather it is an attempt to bring Federal spending in line with the hard economic facts of the times.

I certainly urge the House to support the gentleman in his amendment.

Let me make one additional point, and then I will yield. There has been a lot of talk about what the administration supports and does not support. I have in front of me here a letter directed to Congressman WINN from the Executive Office of the President, the Office of Management and Budget in which they state emphatically that they support the Winn amendment.

□ 1410

It says, and I quote in part:

> In view of the fact that the bill reported by the Appropriations Committee exceeds the administration request, we fully support your effort to bring the NSF appropriation more in line with the President's budget request.

So let there be no doubt, the administration supports the efforts that the gentleman from Kansas (Mr. WINN) is making to reduce the spending in the appropriation bill.

Mr. LUJAN. Mr. Chairman, will the gentleman yield?

Mr. WALKER. I yield to the gentleman from New Mexico.

Mr. LUJAN. I thank the gentleman for yielding.

Mr. Chairman, I just want to commend the gentleman for pointing out that this is not a cut, as most other programs in the budget have suffered. This is really an increase over the last year's funding. That is how we should look at it. I think everyone should be delighted with an $11 million increase. Any program that gets any kind of an increase in this budget-tight year should rejoice.

The point is made here that we are cutting. We are not cutting. We are cutting from a proposal, as the gentleman says, and I thank him for pointing that out. Some of us do support research but we also support the concept of a balanced budget. If every program is increased, we are never going to arrive at that point.

Mr. WALKER. I thank the gentleman for helping me emphasize that point. I think it is important to realize that when we hear talk about budget cuts here on the floor, that cannot be the case with regard to the Winn amendment and the National Science Foundation. We are talking about a budget increase of $11 million if the Winn amendment is adopted.

Mr. BOLAND. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

First of all, let me put the record straight on whether or not this particular bill is over the budget request.

As a result of action taken last Friday—that long session on last Friday—as a result of the amendment offered by the gentleman from Pennsylvania (Mr. COUGHLIN), which I accepted and which the committee accepted, this bill now is more than $500 million under the budget request.

The report which was filed with H.R. 4034 does indicate an increase of $190 million over the President's request. But the fact of the matter is that as a result of action taken last Friday, we are now under by $523 million. And we are also, incidentally,

under our section 302 allocation by more than $700 million.

The gentleman from Pennsylvania (Mr. WALKER) and the gentleman from New Mexico (Mr. LUJAN) have said that if this amendment is adopted, the total funds for the National Science Foundation will reflect an $11 million increase above the comparable amount for fiscal year 1981. The committee's recommendation would provide a total increase for the NSF of $81 million in 1982 above the 1981 amounts. That is approximately 8 percent. But I do not think anybody can call that an increase when you look at the impact of inflation.

So in a sense, the NSF has been cut, really, despite the fact that the figures show there has been an $81 million increase. When inflation is considered, the Foundation will be at or below the 1981 level.

Mr. Chairman, I want to underscore what the chairman of the Science and Technology Committee had to say and what Mr. BROWN and others had to say, who have served with Mr. WINN, with reference to his concern with basic research and science education and his support of the activities of the National Science Foundation and the National Aeronautics and Space Administration over the years. He has been a good friend and I am sure that he would be the last member of this committee to want to harm the National Science Foundation or any particular department or agency of the Government, specifically in the areas of basic research.

Let me just set the record straight so we will all understand what we are doing here. The Carter request in January for the NSF in 1982 was $1,353,500,000. The administration request is $1,033,500,000. So the reduction in the revised budget request of the Reagan administration in March of this year was $320 million below the January budget. That is about a 25-percent reduction. That is a hefty reduction.

Of that $320 million reduction, about $220 million was targeted to a reduction in basic research and related activities. And that is the rub. That is the nub of the question. The committee added back a modest sum to that amount, only $44.9 million, and directed the National Science Foundation to apply that addition in the areas to which it attaches its highest priority.

The amendment offered by the gentleman from Kansas (Mr. WINN) would reduce that item by $70 million, and he would increase the reduction in basic research and related activities to nearly $245 million below the amount requested in January.

I do not have to tell the members of this committee how important basic research is to our Government, to the Nation, to the world. Consider the efforts that our Government has made in basic research—the spinoffs, of course, have been tremendous. It is tremendous now in the areas of high technology, in the areas of computer science. I do not think that anyone can dispute that.

What this subcommittee tried to do, Mr. Chairman, was to bring some balance into the activities and functions of the NSF. I think we have done that.

We could have increased that budget by $100 million or $150 million. As a matter of fact, the authorizations committee's increase, I think, was about $127 million. So ours is a very modest increase. The amendment offered by the gentleman from Kansas specifically targets basic research and related activities. We think it is a mistake, and I hope that the members of this committee will join us in supporting this subcommittee in doing what we believe to be right for the NSF.

Mr. JOHNSTON. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, somehow or another this body just has not gotten the message from the people of this country that they want the spending of their money cut. They are sick and tired of letting some intellectual dilettante dispense money to some intellectual ineffectual who wants to maintain his sojourn in academia for another year at their expense. The grants made by the National Science Foundation for research in the social sciences do just that.

This book, "Fat City," by Donald Lambro details in specific detail or the wasteful spending of the National Science Foundation. And I would like to quote from this book a few of the projects that my tax money and the tax money of the people of this country have gone to finance. These grants should be made by the Playboy Foundation, not the National Science Foundation.

> In another sex-related study, Dr. Ellen Berscheid of the University of Minnesota believed it was important to test her theory that "psychological dependence is a key ingredient in interpersonal relations ranging from 'liking' to 'romantic love'."
>
> The National Science Foundation evidently thought so, too, because they shelled out more than $212,000 to find out if her theory held water. To this day, no one really knows for sure. For her theory, like love itself, defies any degree of certainty.

□ 1420

Another example of taxpayers' dollars that need never be spent is set out in "Fat City."

> But lest we become too caught up with NSF's preoccupation with love and passion, let us not ignore some equally remarkable examples of the agency's other research priorities, chili, for instance.
>
> This research effort was attempting to create a strong preference for chili pepper or coffee among laboratory rats, food tastes which the rodents quite understandably abhor. Cost: $50,000.
>
> NSF explained the project this way:
>
> "Humans in most cultures add a characteristic flavoring to their basic foods, and develop strong preferences for substances which they find initially unpalatable, such as coffee or chili pepper. Both the flavoring and the preference for initially unpalatable foods seem to be virtually unique to humans in the animal kingdom. This study is directed toward an understanding of these aspects of human behavior, through a search for their biological roots in another omniverous animal, the laboratory rat."

Can the Members really go back to their districts and tell their constituents that we think their money was wisely spent for this study? If we cut their funds, maybe they will only make grants to worthwhile projects.

One of my colleagues asked the National Science Foundation about the $83,839 the National Science Foundation gave to the American Bar Association—an impoverished group—to study the social structure of the legal profession and was advised:

> The study, according to NSF, sought to examine "the extent and nature of social differentiation within the profession" as well as "the social, economic, political, and legal values of the various segments of the profession."
>
> In May, 1978 NSF spent over $61,000 to "examine the practices and attitudes of librarians and individuals placing, renewing and cancelling periodical subscriptions." For this project, which involved sending out 6,400 questionnaires to subscribers, the researcher wanted $57,328. NSF increased the request by another $4,000.

Mr. Chairman, this is not the message the American people are sending up here. This is not what my constituency told me to go vote for. This is total irresponsibility.

We have asked the people of this country to sacrifice. Is it not time we asked the bureaucrats at the National Science Foundation to cut out the frivolous and costly grants that take taxpayers' dollars.

Why should almost 50 percent of the grant requests to NSF be made when in the private sector that number is one-half that percentage. Incestuous relationships between grantor and grantee abound.

Let us look out for the American taxpayer.

I yield back the balance of my time.

Mr. DELLUMS. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I would like to share with the Members what I perceive to be the potential danger of this amendment. While I would concur with my distinguished colleague on this side of the aisle who indicated that the National Science Foundation has the necessary flexibility to determine where they want to make this $70 million cut, I think that it is terribly important to relate that statement to the reality that there is a memorandum circulating in the Government at this very moment, as I understand it, origi-

nating from the Office of Management and Budget, that says it shall be the policy of this administration that we totally phase out all basic social science research within the next several months.

I held hearings on the campus of the University of California where I invited a number of nationally and in some instances internationally renowned academicians who addressed themselves to the potential problems of a nation removing the capacity to continue to engage in basic social science research. Several of them pointed out that only totalitarian governments in history have ever stopped a society from engaging in basic social science research, and they saw that as one potential danger, that is a danger to our way of life and our form of government.

Second, they pointed out that it raises a significant question of where independent critics and criticisms shall come when we deny the capacity of people in an independent fashion to engage in evaluating the policies government leaders enunciate.

For example, this administration is suggesting that they can enhance the quality of life in this country by improving employment, by cutting Federal programs. Someone has to determine whether this administration's approach to the economy will, indeed, enhance the quality of life by producing employment. If we deny the capacity of our citizens to intellectually evaluate that question, what have we done for our basic democratic form of government?

It is one thing to burlesque the various projects funded by the National Science Foundation, and I am sure we can all parade a number of horrors across the floor of this Congress; but the practical reality is that to cut $70 million is a clear statement, when we couple it with the policy that says let us phase out all basic social science research, that we are communicating to the National Science Foundation that we no longer want them to engage in basic behavioral science research that is terribly important, the relationship to women and the economy, race is still a factor in America, age is still a factor in America, cultural background, language origin, are still factors.

If one cannot do this kind of correlation research, then how can we evaluate the policies within the framework of our form of government? One cannot do it. We have struck a significant blow at our representative, democratic form of government if we impeded the capacity of a society to think. We have an obligation here on the floor of this Congress to think and to plan and to project and to analyze and to evaluate and to come up with new and exciting ideas. But we debate this amendment as if it is cutting $70 million in a vacuum. We are not cutting $70 million in a vacuum. It is terribly important that we understand the practical effects of what we are doing here. We cannot discuss all of these matters as if they are purely numbers games. I am saying to the Members that if we are going to cut $70 million from anywhere, do not cut our capacity to continue to engage in basic social science/behavioral research.

A society that is anti-science and anti-intellectual is a society destined to die.

It is terribly frustrating for this Member to hear a number of anti-intellectual comments emanating from the floor of this Congress as we parade humorous comments; but we are talking about human life. There are two children sitting here on the floor of Congress. Do we not have the responsibility to plan for their future? How can we do it without basic and fundamental research? How can we do it engaging in anti-intellectual actions?

I ask, Mr. Chairman, that the Members join me and strike down this amendment.

Mr. MILLER of Ohio. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of the amendment which would reduce the appropriation for the National Science Foundation by $70 million. This reduction would bring the Foundation down to the level requested by the President for 1982.

H.R. 4034 was reported out $190 million over the administration request. By adopting this amendment we will go a long way toward bringing this bill back down to an acceptable level. The gentleman from Kansas who has offered this amendment is the ranking minority member of the Science Committee, which authorizes NSF. I know they have spent many hours on hearings and reviewing the NSF request. Even after reducing the NSF appropriation by $70 million, the Foundation would have over $1 billion for its work in the coming fiscal year. This is still an increase over last year's level.

I think this House conveyed a message to the American people when it passed the Reconciliation Act last month that we were ready to maintain fiscal integrity in Government. This amendment is another step in that direction. I support its adoption.

□ 1430

Mr. BOLAND. Mr. Chairman, will the gentleman yield?

Mr. MILLER of Ohio. I yield to the gentleman from Massachusetts.

Mr. BOLAND. Mr. Chairman, I appreciate my friend yielding to me.

I just want to call the gentleman's attention to the fact that this bill was reported out $190 million over the budget request of the President, but as a result of action taken last Friday this bill now is $523 million under the administration's request. I do not think the gentleman was in the Chamber when I called the committee's attention to this.

Mr. MILLER of Ohio. Mr. Chairman, I thank the gentleman from Masssachusetts (Mr. BOLAND).

Mr. JOHNSTON. Mr. Chairman, will the gentleman yield?

Mr. MILLER of Ohio. I yield to the gentleman from North Carolina.

Mr. JOHNSTON. Mr. Chairman, it is a rare occasion that I will agree with the distinguished gentleman from California (Mr. DELLUMS), but I will agree that the policies and procedures of this organization ought to be evaluated.

However, I do not think we ought to pay the referees. I think the referees ought to be free and independent, not nurtured at a Government trough, and I think there is adequate funding out there in the Foundation free from the pressure of Federal funding to evaluate the social and other policies of this country.

Mr. HOYER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to the amendment offered by the gentleman from Kansas (Mr. WINN) and join with my distinguished colleague, the gentleman from California (Mr. DELLUMS), who, I thought, spoke very well with reference to not only the specific effects of the amendment that has been offered but also with respect to the message that we send as to what this society is committed to.

Mr. Chairman, I oppose this amendment and support the Appropriations Committee recommendation for $1.1 billion for the National Science Foundation in fiscal 1982. I am particularly pleased that a significant portion of the funds would be used to offset the severe cuts that have been made in social and behavioral science research.

While NSF as a whole is being required to bear far more than its share of budget cuts, the social and behavioral sciences would be decimated by the administration's proposed cuts of as much as 75 percent from some programs. The biological and physical sciences are obviously important areas of our country's scientific research effort, however, I do not think that our basic research direction should include abandoning our efforts in the social and behavioral areas. One can cite numerous examples where this basic research provided by NSF funding has been economically beneficial and has enhanced the quality of life in our country.

The demise of research programs at NSF would have an adverse impact on nearly every major university in this country. For example, in my district,

the University of Maryland in fiscal year 1980 alone received approximately 126 grants from the National Science Foundation totaling $7.05 million.

Among the research projects currently being conducted at the University of Maryland are the United States-Russia joint working group on mathematical, economic, and operations research. This project is a high-level cooperative effort between the United States and its most important political opponent, which can contribute toward the goals of cooperation and mutual understanding. In addition, there are projects concerning the assessment of risk in dangerous technologies, the explanation of the relationship between employment and prices, and the description and analysis of comparative growth rates in various national economies, a project which has received critical acclaim. Without NSF funding, these worthy projects and others will not continue.

I urge my colleagues to oppose the amendment being offered by the gentleman from Kansas. The continuation of NSF research grants is of vital importance to the research efforts of our country and the postsecondary education experience of many of our students.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Kansas (Mr. WINN).

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. WALKER. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 152, noes 264, not voting 17, as follows:

[Roll No. 146]

NOT VOTING—17

Bonker	Foglietta	McCloskey
Brown (OH)	Goldwater	Roberts (SD)
Cotter	Hansen (UT)	Rosenthal
Dymally	Hawkins	Skelton
Edgar	Mattox	Young (AK)
Evans (GA)	Mavroules	

□ 1440

The Clerk announced the following pairs:

On this vote:

Mr. Skelton for, with Mr. Mattox against.

Mr. Goldwater for, with Mr. Hawkins against.

Mr. Young of Alaska for, with Mr. McCloskey against.

Mr. Hansen of Utah for, with Mr. Mavroules against.

Ms. FERRARO and Mr. FISH changed their votes from "aye" to "no."

Mr. CHAPPELL and Mr. FAZIO changed their votes from "no" to "aye."

So the amendment was rejected.

The result of the vote was announced as above recorded.

□ 1450

PERSONAL EXPLANATION

Mr. BROWN of Ohio. Mr. Chairman, I was in the Chamber and attempted to vote at the machine and was here at the well attempting to get my vote to the Clerk when the gavel fell.

I would like the record to show that I would have voted "no" if the gavel had not fallen as I was waiting to vote.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

NEIGHBORHOOD REINVESTMENT CORPORATION

PAYMENT TO THE NEIGHBORHOOD REINVESTMENT CORPORATION

For payment to the Neighborhood Reinvestment Corporation for use in neighborhood reinvestment activities, as authorized by the Neighborhood Reinvestment Corporation Act (42 U.S.C. 8101-8107), $13,950,000.

Mr. BOLAND (during the reading). Mr. Chairman, I ask unanimous consent that the remainder of title II be considered as read and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The CHAIRMAN. Are there any points of order against that portion of the bill?

The Clerk will read.

The Clerk read as follows:

TITLE III

CORPORATIONS

Coporations and agencies of the Department of Housing and Urban Development and the Federal Home Loan Bank Board which are subject to the Government Corporation Control Act, as amended, are hereby authorized to make such expenditures, within the limits of funds and borrowing authority available to each such corporation or agency and in accord with law, and to make such contracts and commitments without regard to fiscal year limitations as provided by section 104 of the Act as may be necessary in carrying out the programs set forth in the budget for 1982 for such corporation or agency except as hereinafter provided: *Provided,* That collections of these corporations and agencies may be used for new loan or mortgage purchase commitments only to the extent expressly provided for in this Act (unless such loans are in support of other forms of assistance provided for in this or prior appropriation Acts), except that this proviso shall not apply to the mortgage insurance of guaranty operations of these corporations, or where loans or mortgage purchases are necessary to protect the financial interest of the United States Government.

Mr. BOLAND (during the reading). Mr. Chairman, I ask unanimous consent that the remainder of title III be considered as read and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The CHAIRMAN. Are there any points of order against title III?

The Clerk will read.

The Clerk read as follows:

TITLE IV

GENERAL PROVISIONS

SEC. 401. Where appropriations in titles I and II of this Act are expendable for travel expenses and no specific limitation has been placed thereon, the expenditures for such travel expenses may not exceed the amounts set forth therefor in the budget estimates submitted for the appropriations: *Provided,* That this section shall not apply to travel performed by uncompensated officials of local boards and appeal boards of the Selective Service System; to travel performed directly in connection with care and treatment of medical beneficiaries of the Veterans' Administration; to travel performed in connection with major disasters or emergencies declared or determined by the President under the provisions of the Disaster Relief Act of 1974; or to payments to interagency motor pools where separately set forth in the budget schedules.

Mr. BOLAND (during the reading). Mr. Chairman, I ask unanimous consent that the remainder of title IV be considered as read, and open to amendment at any point.

The CHAIRMAN pro tempore. (Mr. WAXMAN). Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The CHAIRMAN pro tempore. Are there any points of order against this title?

AMENDMENT OFFERED BY MR. LEVITAS

Mr. LEVITAS. Mr. Chairman, I offer an amendment

The Clerk read as follows:

Amendment offered by Mr. LEVITAS: Page 46, after line 15, insert the following:

SEC. 415. No part of any appropriation contained in this Act shall be available to implement, administer, or enforce any regulation which has been disapproved pursuant to a resolution of disapproval duly adopted in accordance with the applicable law of the United States.

Mr. LEVITAS (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Georgia?

There was no objection.

Mr. LEVITAS. Mr. Chairman, the amendment I am offering would prevent the use of any funds by the departments and agencies funded by this bill for the implementation of any regulations or actions which have been vetoed by Congress using the specific veto procedures provided by applicable law.

There are several programs and agencies funded under this bill which are subject to some sort of legislative veto. For example, regulations for implementation of such programs as neighborhood reinvestment, rental assistance and flood, crime and riot reinsurance are promulgated under the authority of the Housing and Community Development Act and are subject to a congressional veto. Congress also has the right to veto rules and regulations adopted by the Solar Energy and Energy Conservation Bank which is funded under this bill. Regulations promulgated under the Federal Insecticide, Fungicide and Rodenticide Act, which is implemented by the Environmental Protection Agency, are funded under this bill.

The basic issue, here, however transcends the question of legislative veto. Even the few members who still do not support legislative vetoes, surely must support the doctrine of following the law which legislative vetoes are enacted and then duly exercised.

I have offered this amendment because past administrations have stated their intentions not to obey the law with regard to legislative vetoes. This unfortunate circumstance became concrete under the Carter administration last year after Congress vetoed four sets of regulations proposed by the Department of Education. In response, the Carter administration, through Attorney General Benjamin Civiletti and Secretary Shirley Hufstedler, announced a decision to ignore these vetoes. In short, the Carter administration said it would not obey the law, providing for legislative veto of these regulations, as it was duly enacted by Congress and signed by the President.

The law is this case is very simple. It is very explicit. It says that where both Houses of the Congress have adopted a congressional veto, the regulations become null and void.

However, the problem was not just with the Department of Education. It was the general policy of the Carter administration. While I would hope that the Reagan administration will not be willing to disregard the law, we must be sure that the law is followed. This amendment will act as a safeguard to prevent this disregard for the law from occurring again.

The action of past administrations makes the issue one of whether we in Congress are going to allow the law to be ignored. I do not believe any Member of Congress can stand by and allow our mandates to be treated in such cavalier fashion. The Constitution of the United States requires the President of the United States to faithfully execute the laws. He is not given the authority to pick and choose those laws he wants to implement and those that he does not want to implement.

It is not for the executive branch to decide what laws will be enforced. There is a very important case that illustrated that point, Kendall against United States, decided by the Supreme Court in 1838. In that instance, the President of the United States directed the Postmaster General not to pay a certain sum required to be paid by Congress to a contractor with the Post Office, and in issuing the writ of mandamus, the Court said:

> To contend that the obligation imposed on the President to see the laws faithfully executed implies a power to forbid their execution is a novel construction of the Constitution and entirely inadmissible.

No; the President of the United States does not have the power or the right or the prerogative not to enforce the laws. Where such disputes exist the proper forum for resolving them lies within the court system and ultimately within the jurisdiction of the Supreme Court. The administration's questions about this provision of the law should be resolved in that arena, not by noncompliance.

Mr. Chairman, this is a simple proposition. Once a legislative veto has been exercised, it is a disobedience of the law by those charged with the responsibility of executing the law to disregard it, and I do not think we ought to give them money to disobey the law. The only way we can effectively enforce these provisions of the law is to provide a limitation for funding so that no funds can be used for purposes of implementing disapproved or vetoed actions.

That is the reason I have offered this amendment, Mr. Chairman. We are facing a significant challenge to our constitutional powers, and we

must rise to meet it. My amendment will do so in a simple direct fashion. I urge every member of this body to support its passage.

Mr. BOLAND. Mr. Chairman, will the gentleman yield?

Mr. LEVITAS. I would be happy to yield to my colleague.

Mr. BOLAND. Mr. Chairman, as the gentleman indicated, this is an amendment which has been offered on a number of occasions. We have reviewed the amendment and the subcommittee on this side has no objection to the amendment.

Mr. GREEN. Mr. Chairman, will the gentleman yield?

Mr. LEVITAS. I would be happy to yield.

Mr. GREEN. Mr. Chairman, we, too, have no objection to the gentleman's amendment.

Mr. GLICKMAN. Mr. Chairman, will the gentleman yield?

Mr. LEVITAS. I would be happy to yield.

Mr. GLICKMAN. Mr. Chairman, there was some earlier printing of the amendment, it may have been a mistake, that the veto was a veto just by a congressional committee. That is not the intention of the amendment?

Mr. LEVITAS. No.

Mr. GLICKMAN. It would be a full House veto or two-House veto, depending upon the nature of the circumstance?

Mr. LEVITAS. The description to which the gentleman referred appeared in one of the research group analyses or commentaries. It is not an accurate description.

The description of the amendment as I have previously given it is correct. It simply says that where under existing law any procedure is established, whether it is one-House, two-House, one-and-half-House committee, or whatever it is in the law is exercised, then that procedure, if followed, would be effective and any funding would be denied to implement the regulation or other action which had been vetoed.

Mr. GLICKMAN. I thank the gentleman. I support the amendment.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from Georgia (Mr. LEVITAS).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. ERTEL

Mr. ERTEL. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. ERTEL: Page 46, immediately after line 15 insert the following new sections:

SEC. 415. Except as otherwise provided in Section 406, none of the funds provided in this Act to any Department or Agency shall be obligated or expended to provide a personal cook, chauffeur, or other personal servants to any officer or employee of such Department or Agency.

SEC. 416. None of the funds provided in this Act to any Department or Agency shall be obligated or expended to procure passenger automobiles as defined in 15 U.S.C. 2001 with an EPA estimated miles per gallon average of less than 22 miles per gallon.

Mr. DINGELL. Mr. Chairman, I reserve a point of order on the amendment.

The CHAIRMAN. The gentleman from Michigan reserves a point of order.

Mr. ERTEL. Mr. Chairman, I yield to the gentleman from Michigan.

Mr. DINGELL. Mr. Chairman, I withdraw my point of order.

The CHAIRMAN. The gentleman from Michigan withdraws his point of order.

Mr. ERTEL. Mr. Chairman, this amendment is called the no frills amendment and the reason for this amendment is to stop the use of public money to provide extravagant personal services for Government officials.

The amendment is in two parts. I would like to explain both parts. The first part of the amendment would stop the practice of providing personal cooks, chauffeurs, and servants for public officials. This does not interfere with the execution of their duties. It just stops them from doing it in the lap of luxury.

Let me give some examples of what I am referring to. In the Department of Commerce, out of the funds appropriated generally, we provide a dining room for a Secretary at $24,000. We pay for a car for the Secretary at $6,384 a year. I would suggest that should be a gold-plated car for $6,384 a year.

We also provide a driver for that car at $8 an hour. He, in fact, the driver for that particular Secretary, can make up to $50,000 in 1 year, counting his overtime. Now, just think, a chauffeur is going to be paid almost as much as a Deputy Secretary of Commerce if he, in fact, puts in the overtime as we have provided it generally.

In the Justice Department, the Attorney General's dining room, costs $80,000, including pay for two cooks and one assistant cook.

In the Department of Transportation, we provide servants for the Secretary's private dining room and they happen to be five Coast Guardsmen. Now, we have better things to do for the Coast Guardsmen than to use them for servants for the Secretary of Transportation, but the cost, just for their services, in that private dining room is $104,000 a year.

I would suggest that these outlandish expenses ought to be stopped at a time when we are trying to have austerity in the Government. When you think that the Department of Commerce pays over $6,000 a year to lease a car, while the Department of Justice pays half of that, somebody has to ask the question, "What is going on? Why are we paying such exorbitant fees for automobiles?"

It just seems to me that I could give a whole list of additional agencies which have provided outlandish sums for chauffeurs, for cars, and for personal dining room service. It just seems to me this is a clear area of abuse.

I suggest the solution is to pool personnel and assign them to service functions. If the Secretary wants to use a car, he can call the pool, get a car and use it. That car would not be set aside for his own personal use, but obviously he is going to get priority.

What we would do by having those cars pooled, getting rid of the personal service, the personal chefs and chauffeurs, would stop the waste of Government resources.

□ 1500

I would point out that some contend I am just doing this in this administration. I did the same thing when we had a Secretary of then HEW, Joe Califano. I cut off his personal chef and personal chauffeur as well.

Mr. HYDE. Mr. Chairman, will the gentleman yield?

Mr. ERTEL. I am glad to yield to my colleague from Illinois (Mr. HYDE.).

Mr. HYDE. I thank the gentleman for yielding. I have just learned that the whip of the majority party and the whip of the minority party have been assigned official cars. I wonder if the gentleman thinks that is far enough down the hierarchy of leadership for the taxpayers to provide cars? Does the gentleman support the whips of both parties having cars?

Mr. ERTEL. I intend to offer an amendment to all appropriation bills to eliminate those cars except for constitutional officers. I think, for instance, the Chief Justice of the Supreme Court is entitled to have a car. I think he should have one.

Mr. HYDE. What about the whip of the Democratic Party and the whip of the Republican Party, does the gentleman think they should each have a car?

Mr. ERTEL. I do not.

Mr. HYDE. And the gentleman will offer an amendment at the appropriate time?

Mr. ERTEL. I intend to offer an amendment to all appropriation bills to eliminate the abuses of people who are not constitutional officers.

Mr. HYDE. What about the majority leader of the Democratic Party and of this body; does the gentleman believe that he should have a car?

Mr. ERTEL. I think those people at the very top of separate independent branch of Government, like the Chief Justice, like the President of the United States, certainly should have transportation.

Mr. HYDE. And the Speaker. I would agree with the gentleman, the Speaker.

Mr. ERTEL. I would like to reclaim my time, if I may. I am not going to eliminate a car for the President or for the Vice President. I would not eliminate the car for the Secretary of State. But I think we ought to cut back some of these abuses such as private dining rooms.

The second part of this amendment is very simple. What I would do is require all passenger cars bought under these appropriations to be required to get at least 22 miles per gallon under the EPA standards. That would stop people from buying and leasing limousines and very expensive cars. It seems to me we are asking the American public to be frugal and we are asking for a frugal Government, and we ought to have at least the same frugality from our departments and agencies.

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

(By unanimous consent, Mr. ERTEL was allowed to proceed for 2 additional minutes.)

Mr. ERTEL. I might point out that there are plenty of American-built cars that can meet the 22-mile-per-gallon standard set in this amendment.

Mr. THOMAS. Mr. Chairman, will the gentleman yield?

Mr. ERTEL. I am happy to yield.

Mr. THOMAS. I understand the miles per gallon but the gentleman said it would prohibit them from buying expensive cars. If the car meets the miles per gallon, then they could buy an expensive car?

Mr. ERTEL. I do not think I said expensive alone. I said expensive limousines that would not meet the standards. I would not think a limousine would get 22 miles per gallon.

Mr. THOMAS. But there are plenty of expensive cars that get 22 miles per gallon, so it is the miles per gallon that we are concerned with and not the expense of the vehicle?

Mr. ERTEL. I would think that we are concerned with economy and the utilization of fuels, but in addition it will cut off some of the very, very expensive automobiles such as limousines.

Last November the American people voted for a frugal Government and all I am asking is that Government officials at the very highest echelons of Government share some to the sacrifices we have been asking the American people to absorb. These mild hardships are much less severe than those being suffered by most of our citizens.

I would move adoption of the amendment.

Mr. BOLAND. Mr. Chairman, I move to strike the requisite number of words.

I have looked at both of these amendments. I am somewhat concerned about them, but I am a realist. These amendments have been offered before, not precisely in this same way with the same restrictions as the gentleman from Pennsylvania has offered, but I think they are worth trying. So far as the subcommittee on this side is concerned, we would be willing to accept the amendments.

Mr. ERTEL. Mr. Chairman, will the gentleman yield a moment?

Mr. BOLAND. I will be glad to yield.

Mr. ERTEL. I would like to point out that we did check and the Secretary of HUD, it seems to me, conforms with all of the amendments that we have proposed here generally except for the miles per gallon—his automobile. That is one of the better agencies in Government.

Mr. BOLAND. The fact of the matter is the HUD bill has carried a restriction with respect to limousines. I think perhaps it is the only Department that has carried that restriction for some number of years. So we will be glad to accept the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania (Mr. ERTEL).

The amendment was agreed to.

Mr. GREEN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, as the House nears the end of its deliberations on the 1982 HUD appropriations bill, I think it is useful to set forth where we stand under the Budget Act.

At the outset, it should be noted that section 302 of the Budget Act creates two not necessarily consistent controls on spending.

First. The Budget Committee allocates to each authorizing committee a spending limitation, with instructions to each committee, where necessary, as to the dollar amounts of savings it must achieve by legislative changes.

Second. The Budget Committee allocates to the Appropriations Committee a lump sum representing the maximum amount that may be appropriated under the first budget resolution. Under section 302, it is left to the Appropriations Committee to allocate that lump sum among its subcommittees.

These two controls may lead to inconsistent results, because the jurisdictions of the authorizing committees and the Appropriations Subcommittees often do not correspond. For example, in the case of the Banking Committee's jurisdiction, the major tradeoff under section 302 was between HUD programs and the Export-Import Bank; in the case of the HUD and Independent Agencies Appropriations Subcommittee, we do not have jurisdiction over the Export-Import Bank and our tradeoff is among HUD and a host of other agencies, most of which lie outside the jurisdiction of the Banking Committee. Thus, it is possible for Appropriations Subcommittees to live up to our section 302 responsibilities and still reach different results from the authorizing committees. Obviously, our ability to bring these differing results to the floor of the House depends on the Rules Committee; but, in view of the fact that we are all feeling our way through the changes in House procedures that the Budget and Impoundment Control Act of 1974 is causing, I hope the Rules Committee will continue to be liberal in that respect. In the end, of course, the inconsistencies will have to be dealt with in the second budget resolution and any reconciliation bill which might follow it. However, allowing the differences in tradeoffs in authorizing committees and appropriating subcommittees to continue until that time will give the House the maximum flexibility in reaching its ultimate funding decisions.

Under the section 302 process governing the Appropriations Committee, our subcommittee was assigned a budget authority ceiling of $64,405,000,000. The bill we brought to the floor of the House was $1 million under that ceiling, when reservations are made for civil defense activities and veteran compensation increases. Thanks principally to the amendment offered by the gentleman from Pennsylvania (Mr. COUGHLIN) we are now over $700 million under that ceiling.

There have been some suggestions that we have done that with mirrors. Those suggestions relate to the fact that we have declined the administration's request to appropriate $1.1 billion for conversion of public housing bonds. This appropriation was to continue the conversion of short-term public housing borrowing. This would occur with taxable bonds issued by the Federal Financing Bank rather than the traditional tax-exempt public housing borrowing.

I want to make it clear that in my case the decision to reject the administration's request was no budget gimmick, but a determination that the Treasury and OMB have simply failed to sustain their case—which I might add they made in Democratic and Republican administrations alike—that the use of tax-exempt bonds is costing the Federal Government money.

In the last Congress, the Banking Committee's Housing Subcommittee, of which I was then a member, held a hearing on whether the Government National Mortgage Association should make its facilities available to States which issued revenue bonds to finance or refinance construction of voluntary hospital buildings. The Carter administration opposed that use of GNMA, and asserted that if such bonds had to go the taxable bond route, the average tax rate on the interest would be 40 percent. However, an investment banking firm that had handled such a refi-

nancing studied what taxes were paid on the interest on the taxable bonds it had refinanced. That study showed that most of the taxable bonds were held by pension funds—which pay no income taxes—and that as a result the average income tax paid on the taxable bonds was 14 percent.

Plainly, if taxable Federal Financing Bank bond interest will be taxed at an average rate of 14 percent, moving public housing financing into the Bank will be counterproductive. In any event, I think it is legitimate, given that history, for our subcommittee to consider a shift of public housing financing to the Federal Financing Bank a lower priority than those governmental activities for which we have appropriated budget authority.

Before I conclude, let me acknowledge that our former colleague, David Stockman, Director of the Office of Management and Budget, has expressed to some Members of the Republican leadership and the Republican members of the Appropriations Committee concern that our subcommittee, though we stayed within our budget authority limit, has generated excessive outlays for the forthcoming fiscal year.

In that respect our subcommittee faces a dilemma in one of its largest programs, the section 8 housing program, which has four subdivisions; new construction, substantial rehabilitation, moderate rehabilitation and existing housing. Each unit of existing housing that we bring into the section 8 program costs half as much each year as the units we finance under the new construction and substantial rehabilitation programs. While the moderate rehabilitation program is new and thus does not have much of a track record, by statute it may not cost more than 130 percent of the existing housing program and therefore would cost annually no more than 65 percent of the cost of new construction or substantial rehabilitation. Moreover, the Federal commitment for the section 8 existing housing program and the moderate rehabilitation program is limited to 15 years, as opposed to the longer commitments under the new construction and substantial rehabilitation programs.

So, in terms of budget authority, there are major savings by shifting toward the existing housing and moderate rehabilitation routes, and this our subcommittee has done, although we fully recognize that by their very natures the existing housing and moderate rehabilitation programs will put families in subsidized housing sooner and thus accelerate Federal outlays.

Nonetheless, it is plain that this shift in the section 8 mix need not cause any fiscal year 1982 outlay problems for OMB. Without any request to the Congress for rescission or deferral of the section 8 moderate rehabilitation or existing housing budget authority, OMB can cause that budget authority to be obligated sufficiently late in the fiscal year so that there will not be a penny of fiscal year 1982 outlay resulting from the section 8 budget authority we are appropriating. Since in fact we are allowing for about $65 million in outlays from the section 8 budget authority we are appropriating, through this item and elsewhere OMB plainly has enough flexibility in releasing the funds we are appropriating to hold outlays in fiscal year 1982 resulting from the appropriations in this bill to the levels contemplated by the first budget resolution.

In short, I believe this appropriation bill fully meets our responsibilities under section 302 of the Budget Act, and should create no problems for OMB in terms of management of fiscal year 1982 outlays.

Mr. BOLAND. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, before the committee rises, I would like to point out what this bill does specifically in reference to spending. The HUD-independent agencies appropriation bill, as has been described by my distinguished friend from New York, Mr. GREEN, the ranking Republican member, is under the section 302 allocation and the President's budget request. This bill is under the section 302 allocation by more than $700 million. This bill is under the President's budget request by $523 million.

In short, Mr. Chairman, this bill is under the congressional budget target and under the President's budget request. This is a bill I think all Members can vote for.

AMENDMENT OFFERED BY MR. NELLIGAN

Mr. NELLIGAN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. NELLIGAN: Page 46, after line 15, insert the following new section:

SEC. 415. None of the funds appropriated by this Act may be used to increase any premium rates prescribed by the Director of the Federal Emergency Management Agency, or by the Secretary of Housing and Urban Development, under the National Flood Insurance Act of 1968 (42 U.S.C. 4001 et seq.).

Mr. NELLIGAN. Mr. Chairman, I offer this amendment to the HUD appropriations bill today to prohibit increases in Federal flood insurance rates for 1 year. My amendment results from a June 1 proposal by the Federal Emergency Management Administration, FEMA, to increase subsidized flood insurance rates effective October 1, 1981.

According to FEMA's own estimates, the proposed rate increase will raise flood insurance premiums from 60 to 70 percent in just 1 year. Such a huge rate increase could never be justified in the private sector.

I oppose the proposed rate increase for two reasons. In my own congressional district there are over 16,000 participants in the flood insurance program and over $700 million worth of property covered. Many participants are senior citizens and married couples with children who have enough problems trying to maintain homes without astronomical flood insurance rate increases. I fear that when the choice becomes one of flood insurance coverage or heating oil, or food on the table, many of these individuals who are now a part of the Federal flood insurance program will be forced to discontinue coverage.

Second, I fear that the huge rate of increase will discourage participation by property owners who have not elected to purchase flood insurance coverage. According to FEMA, there are still about 4 million properties in flood-prone areas which are not covered by Federal insurance compared to only 2 million insured properties.

As recently as 1972, there were only about 300,000 properties insured under the program. An administrative decision made in 1972 to reduce rates resulted in nearly a sevenfold increase in the number of flood insurance policies written.

□ 1510

I fear that rate increases will actually drive up costs of the program by discouraging wider participation among the owners of flood-prone properties who are not now covered.

Whenever major flood disasters have struck, the Federal Government has ended up expending billions of dollars aiding the victims. When Congress enacted the national flood insurance program in 1968, it recognized the need to encourage the widest possible public participation in the program to offset the cost of aiding the victims of flood disasters. That is why Congress charged the ratesetters with the responsibility of setting rates which would encourage the widest possible participation, not discourage that participation.

I believe FEMA's proposal abrogates that responsibility.

I would just like to say—and I mentioned it before—that there are 16,000 properties in my district that are insured. This may seem parochial, or perhaps you think I am the only one who is interested in this. But let me just point out a couple of States, the number of policyholders, and the value of that property.

For example, Massachusetts, over 25,000 policies issued, and $1 billion in property. That is the value.

Pennsylvania, which is my State, over 80,000 policies issued. Property value, $2.7 billion.

Should we have another Hurricane Agnes, which I went through, you can bet your boots that the taxpayer will be called upon to bail out to the tune of several hundred millions of dollars.

I would like to see more participants in the program, and you are not going to get participants in the program by raising the rates not once, but twice, and maybe three times over the next couple of years.

And just let me continue for a minute. Mississippi, 36,000 policyholders. Property value, $1.5 billion.

And I go on with North Carolina, South Carolina. Over 24,000 property owners.

And here we have Louisiana, with 220,000 property owners, and property valued at over $11 billion.

And Texas, with 315,000 property owners, and property valued at over $20 billion.

And so on and so forth.

Virtually every State in the Union has policyholders. They have flood insurance. And their premiums are going to be raised.

Today I was outside talking to some senior citizens. They own their homes in my district. They are being hit right and left. And now they are being called upon to have excruciatingly high premiums, and they do not even know they are coming. And they will not know until October 1, of this year, when they get their notices and, suddenly, an increase of 60 to 75 percent they will have to pay for those premiums.

I feel it is penny wise and pound foolish that we can expect to attract new policyholders at the same time we are raising the rates. I tell you, we are not going to attract new ones. What we are going to do is lose the ones we have and discourage the 4 million from getting these premiums and buying this insurance.

What is it, in the long run? Penny wise and pound foolish? Sure. Sure it is. Because rather than encourage people to buy more flood insurance, we are going to discourage them from doing do. We are going to continue to have floods in this country, there is no doubt about that, and the taxpayer is going to be called upon to bail them out.

Mr. SEIBERLING. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I would like just to raise some questions with the gentleman.

Does the gentleman's amendment cover insurance for people who have homes on barrier islands and beaches and cover damage against hurricanes and storms, and that sort of thing?

Mr. NELLIGAN. Yes; it does. The Federal flood insurance program does cover that kind of disaster.

Mr. SEIBERLING. Now, is not this, in effect, a Government subsidy for people who are well to do enough to afford vacation homes?

Mr. NELLIGAN. It may very well be. Also, what it really does, it hits many people who live in cities, who live next to rivers, who do not have beach homes. And I would venture to say, with the some 500,000 policyholders in Florida, that those 500,000 people do not just have beach homes, do not have recreational homes. They are people who are living in those homes, who need those homes. They are single-home owners.

Mr. SEIBERLING. Well, last spring I went down the Atlantic Coast in South Carolina and visited several different types of barrier island developments, all the way from small, older vintage homes on islands that are in the process of being wiped out by the encroaching sea, to the very exclusive, elegant, and well-done development in Kiawah Island in South Carolina, and then some in between.

We had a marine geologist with us who has spent years studying the whole barrier island problem on both coasts, and he said, "You know, the oceans are rising at the rate of a foot a century," which means that within a matter of a few decades, every single barrier island is going to be shifted or completely wiped out. Under these circumstances, it is just insane for the Federal Government to go on subsidizing people who want to build homes on barrier islands, knowing that this is going to happen. Every time there is a huge storm or a hurricane, the Federal Government is exposed to the risk of hundreds of millions of dollars of claims, either through the insurance program or through just a claim for disaster relief.

It is time, it seems to me, to face up to the fact that this is an open-ended exposure which ought to be curtailed at the earliest possible time, and certainly it should not be made available for new construction. You can go to a barrier island that is already being eroded, with houses sliding into the ocean, and yet the price of real estate continues to hold up. Why should it not? They can tell any prospective buyer that the Federal Government is going to make them whole in the event that their house is destroyed.

So it does seem to me that that is the real question here. I would hope that we would have the courage to face up to this and put an end, at least to further construction in flood plains and on barrier islands.

Mr. VENTO. Mr. Chairman, will the gentleman yield?

Mr. SEIBERLING. I yield to the gentleman from Minnesota.

Mr. VENTO. The gentleman from Ohio has made a very good statement concerning the investigation into the barrier islands issue, and I can understand the gentleman from Pennsylvania offering the amendment, vis-a-vis the problems with rivers and hurricane-type of damage, and I think we would all like to see an insurance program that covers that. But the fact of the matter is that the Federal flood insurance program has one of the second highest potential liabilities of all of the programs we have. It is only exceeded by social security, as a matter of fact, in terms of what we are underwriting.

In legislation that has been addressing this particular problem this year, we made an effort with the gentleman from Delaware, to try and deal with prospective or future types of insurance coverage and try to limit that with regard to velocity or V zones, where such heavy damage is potentially possible.

So I think that what we are really shooting for is that we would like some actuarial soundness in terms of this particular insurance program. At a time when we are talking about limited Federal dollars in expenditures, surely we ought to very carefully scrutinize the types of programs that we offer subsidies for. And that is really what this is. It is direct underwriting on the part of the Federal Government is areas for development, where development possibly never should take place.

So I think that gentleman's amendment is not a sensitive amendment, in the sense that it just freezes in the inequities, freezes in the type of development problems and freezes in the commitment of the Federal Government where we ought not to be making commitments.

I hope that this amendment is defeated. I appreciate the gentleman, the new Member from Pennsylvania, has a problem here; but I think this is not the proper place or the way to work this out.

Mr. SEIBERLING. It is even worse. We are not only encouraging development and increasing this exposure, but then the Federal Government, through HUD programs, through subsidizing roads, through subsidizing sewers, and through the Corps of Engineers with beach erosion projects building riprapping and jetties. These programs not only add to Federal expenditures but make the Federal disaster risk exposure an ever growing one.

The CHAIRMAN. The time of the gentleman from Ohio (Mr. SEIBERLING) has expired.

(By unanimous consent, Mr. SEIBERLING was allowed to proceed for 2 additional minutes.)

Mr. SEIBERLING. This geologist told us that what happens when we build jetties and riprapping on ocean beaches is to cause the beach to get narrower and steeper, and then, when finally a big storm hits, instead of a few houses going, the whole shore gets wiped out.

We asked one of the homeowners whom we talked to, whose house was

not even on the beach, it was back from the beach, back of the dunes, how much it would cost him to get private insurance against storm and flood damage. He said, he had contacted an insurance company which quoted a premium of over $800 a year, and it was a modest-size house. When asked how much he was paying the Federal Government for his Government disaster insurance, he said, "$60 a year."

That gives you some idea of the degree with which we are subsidizing development on areas that should never be developed.

Mr. NELLIGAN. Mr. Chairman, will the gentleman yield?

Mr. SEIBERLING. I yield to the gentleman from Pennsylvania.

Mr. NELLIGAN. I thank the gentleman for yielding.

I am not talking about the beach. I am talking about Wilkes-Barre, Pa., which is not beach haven, I am talking about 300,000 homes in Texas, which I am sure are not strung along the beach.

Mr. SEIBERLING. A lot of them are. They are on barrier islands.

Mr. NELLIGAN. And I do not think they should be limited to just people who live it up on beaches. I think it is essential. We are talking about people and the only home they own.

Mr. SEIBERLING. I would simply say that if the amendment or if the bill were limited to existing homes built before a certain date, when the people did not realize that they were not getting insurance coverage, that is one thing; but if you continue to apply this to new development, then it is just a tremendous open ended commitment.

I might say that I talked with Dave Stockman about this earlier this year, and he agreed with me. And now he is under all kinds of pressure from certain parts of the country where these developments go on, and I understand that as a result he has backed off.

□ 1520

Mr. NELLIGAN. Mr. Chairman, will the gentleman yield?

Mr. SEIBERLING. I yield to the gentleman from Pennsylvania.

Mr. NELLIGAN. Mr. Chairman, there are two kinds of rates we are talking about.

The CHAIRMAN. The time of the gentleman from Ohio (Mr. SEIBERLING) has expired.

(By unanimous consent, Mr. SEIBERLING was allowed to proceed for 1 additional minute.)

Mr. NELLIGAN. Mr. Chairman, will the gentleman yield?

Mr. SEIBERLING. I yield to the gentleman from Pennsylvania.

Mr. NELLIGAN. I thank the gentleman.

Mr. Chairman, we are talking about actuarial rates which took place after 1974, which are a higher rate. The rates they are talking about raising now in addition are pre-1974. These are the old homes. These are the people who have stayed there because they have nowhere to go. These are the people we are talking about: Senior citizens, people with large families. That is what I am talking about, not beach havens.

Mr. SEIBERLING. I would ask the gentleman: Does the legislation make that distinction?

Mr. NELLIGAN. There is no legislation. What we are talking about, as a matter of fact it says in the committee report, and I quote: "This would reduce the Federal subsidy required and, in the committee's view, could be accomplished without adversely affecting the program."

It does not talk about how it is going to adversely affect the people.

Mr. SEIBERLING. I think we need to address that problem.

Mr. NELLIGAN. I think we do, too. I thank the gentleman for admitting that.

Mr. BOLAND. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment offered by the gentleman from Pennsylvania (Mr. NELLIGAN).

I can understand the concern of the gentleman. Any of us who have had the problems of flooding, whether in riverine or coastal areas can understand the concern of the gentleman. This is not the way to do it. As a matter of fact, the provision as it is written is not going to be effective.

The new administration has already decided to increase certain rates under the flood insurance program on October 1, 1981. This action was taken in connection with the March budget amendments. The administration reduced the estimated borrowing authority for the flood insurance program in 1982 by nearly $100 million. It is the administration's intent to offset the reduced need for borrowing authority by increased premiums. That is exactly what is going to be done.

The national flood insurance fund has only two sources of income. The principal source is premium income. The other source is Treasury borrowings. The enabling legislation provides a $1 billion borrowing level for this program. The initial $500 million was borrowed many years ago. Due to the increased program activity, the remaining $500 million debt was incurred in September 1979. The borrowing authority is revolving in that appropriations to repay the debt allow the Agency to incur additional debt. An appropriation of $561 million was made in fiscal year 1981 to reduce the outstanding Treasury borrowings. Included in the 1982 appropriation bill is $373 million for that same purpose.

Although the gentleman's amendment is not effective as drafted, the intent of the amendment would be to reduce premium income and thereby increase demand for Treasury borrowings. This, in turn, would lead to increased appropriations in future years to repay that debt.

The Agency has already proposed and published rate increases in the Federal Register. The comment period ends July 30, 1981. The regulations will become effective October 1, 1981. The moneys in this appropriation bill do not become available until October 1. Thus, the regulations will already be effective before any moneys in this bill are available to the Agency.

So I urge the defeat of the gentleman's amendment because it will not stop the anticipated rate increase on October 1, 1981. There is no way that this amendment will stop it. But the real reason to vote against this amendment is because it could limit the Federal Emergency Management Agency from placing the flood insurance fund on a sound financial basis in the future.

In 1982, the total amount of policies in force under the program—that is the Government's contingent liability—and hold on to your hats—is estimated at $107.5 billion. From January 1978 to December 1980, the average annual loss per policy was $184. The potential future losses to the fund—and to the Government if the fund does not have adequate resources—are enormous. It must be placed on a viable footing. The Agency will not be able to place it on a viable or actuarial basis until the premiums are increased and, as I have indicated, the gentleman's amendment, in effect, does not stop the increase from going into effect.

The gentleman has stated that increases proposed for the flood insurance program could never occur in the private sector. I do not believe a private insurance operation would ever be in the position where it would have to propose increases of this nature. A private insurance company would have gone broke long ago if it subsidized rates as much as the Federal Government subsidizes rates under the flood insurance program.

Mr. NELLIGAN. Mr. Chairman, will the gentleman yield?

Mr. BOLAND. I yield to the gentleman from Pennsylvania.

Mr. NELLIGAN. The only thing I would say on the last point to my colleague is that a private insurance company would never have to resort to the taxpayer to bail out people who are victims of floods. The history of this country is when we have a national disaster such as the type we had in my hometown—which also occurs in Florida, in Mississippi, in Louisiana frequently—the taxpayer is called to bail them out and the taxpayer does indeed bail them out.

On the point that we are trying to increase the premiums so we could make the fund solvent, for the very same reason in 1972 that FEMA reduced the premiums to attract more policyholders, I think that logic is sustained today. It went from $300,000 in 1972 to $2 million when they reduced the premium. I maintain we increased this premium not once but I am informed it will be increased twice this year, and perhaps the next year.

Mr. GREEN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I would like to join the distinguished chairman of the committee in opposing this amendment and I will set forth why in my remarks shortly.

Mr. EVANS of Delaware, Mr. Chairman, will the gentleman yield?

Mr. GREEN. I yield to the gentleman from Delaware.

Mr. EVANS of Delaware. I thank the distinguished gentleman from New York for yielding.

I rise in opposition to this amendment. I am sympathetic to the fact that the state of our economy is not good and that prices are increasing just about on everything. I believe that the high cost of government is brought about because we are spending the taxpayers' dollars ineffectively and inefficiently and unwisely.

This would be a step in that unwise direction, a fairly major step. The amendment in question is no solution to our dilemma. It will never get us out of the woods from an economic standpoint by preventing a Federal agency from taking steps such as this to put its program on a sound and a fiscally responsible basis. Currently the U.S. taxpayer is paying about $3 in claims and expenses for every $1 collected in premiums in the national flood insurance program. To quote from the President's 1982 budget document:

> (The proposed rate change) supports the administration's policy of recovering clearly allocable costs from users . . . people who receive the benefits of flood insurance should pay its costs. This change will eliminate a substantial portion of the subsidy that the taxpayer now provides and further discourage uneconomic development in flood prone areas.

To give you an idea of what sad shape the national flood insurance program is in, earlier this year the Administrator of the Federal Insurance Administration testified before the Banking Committee, the authorizing committee for the flood insurance program. He stated that we may not be able to expect that the program would achieve self-sufficiency before the year 2000. In the meantime, recent data from the Administration indicates that we are losing, on average, about $140 per year per policy and that the proposed rate changes will result in savings of more than $600 million over the next 4 fiscal years.

□ 1530

Mr. Chairman, under the subsidized insurance program all taxpayers bear the risk of flood plain development. If the Government is allowed to move toward a more actuarially sound program, then those individuals living in flood plains bear the risk, and that is as it should be.

It is true that people living in flood plains will pay higher costs for their insurance under the administration's proposal. However, I agree with our President that it is clearly inequitable for the general taxpayer to bear the burden of services that provide special benefits for very specific users. The administration's proposal in this area is one component of President Reagan's comprehensive budget reform program which provides for shifting the cost of this type of Government activity to those who directly benefit.

In sum, based on the budget proposed by the administration and their communications with the Banking Committee concerning the reauthorization of the national flood insurance program, this amendment would appear to be totally inconsistent with the President's program.

Mr. Chairman, I urge defeat of the amendment, and I might add that I think it is totally inconsistent with the feelings of the vast majority of the American people who believe that we have to find creative ways to cut back on unnecessary Government expenditures.

Mr. GREEN. Mr. Chairman, I thank the gentleman from Delaware (Mr. EVANS) for his statement.

I would simply like to point out that though the amendment purports to be a limitation on spending, in fact the effect of the amendment in economic terms is just the same as if the gentleman has stood in the well and offered to increase an appropriation by $100 million. Essentially in order to cover the additional losses which would occur in the insurance fund because of the gentleman's amendment, the Treasury would have to go out and borrow close to $100 million, with all the impact that that has, added to all the other Treasury borrowings. And then ultimately, of course, those loans which flow from the Treasury to the insurance fund have to be repaid, and we would appropriate the money for it. That is the $373 million that the Members will find on page 20 of the appropriation bill.

So, Mr. Chairman, I hope that everyone will understand exactly what the budget impact of this is and what the economic impact of this is, and that if we vote for this, we are voting for a $100 million increase for the Treasury for this purpose.

Mr. ROGERS. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, I rise today in support of the amendment offered by the gentleman from Pennsylvania, and commend him for his foresight in offering this amendment and in responding effectively to the needs of many of our constituents in flood areas.

I would also like to commend the chairmen and ranking minority members of the committee and subcommittee for their leadership in formulating this legislation.

Mr. Chairman, the amendment before us would prohibit the proposed 75-percent increase in flood insurance premium rates. I oppose the proposed increase in these rates, and I would like to present some important arguments for why the Congress should prohibit them.

My district relies heavily on flood insurance. In Harlan, for example, nearly one-fifth of the households hold these policies.

The proposed increase in rates is simply not a good idea. In most communities, you cannot get a mortgage without flood insurance—that means that when the premium rates go up, there is a captive market.

And since the premium rates are based on the amount of risk, the greater the risk, the higher the rate. And since in my district, the people living in the highest risk areas are living there because they cannot afford to move to the rare higher level land, the people who are least able to afford it will pay the greatest increase.

There is a reason why the people of my district live in areas where there is flooding. The eastern portion of my district is mountainous. When rains fall, the mountain streams rise, and gathering force they come rushing into the hollows, swelling the rivers, which flood without notice.

The people of my district have a dilemma—the mountains are too steep for building homes, schools, or hospitals. The only level land is along the river banks. The people of my district have to build up their communities in the flood plains, knowing that there will be flooding and then each spring, they watch the waters rise, wondering if this will be another flood like the flood of 1977.

Four years ago, for example, the town of Barbourville was nearly obliterated by the flood waters of the upper Cumberland River. Only through the heroic efforts of some 500 volunteers who ignored warnings to evacuate the city, who stayed to pile the thousands of sandbags on top of the levees surrounding the town, was disaster averted.

Pineville, Ky., was not so lucky. The levees and floodwall were too low. The flood of 1977 was too much. The result was $25 million in damages.

But all of the towns along the upper Cumberland, from Harlan through Williamsburg, including Cumberland, Benham, Lynch, Evarts, and Cawood, as well as Pineville and Barbourville, and spanning four counties, know the constant threat of flooding. Each time a dark cloud comes into view, the citizens of the communities have good reason to worry about their very existence.

And the floods come fast—the steep slopes of the mountains cause very rapid runoffs, which only shorten the warning time of an approaching flood.

The people who live in these flood plains are not there out of choice. There is no other land available, particularly land that most of my constituents can afford. And these are the people who are least able to afford the increases in flood insurance rates.

For the people of eastern Kentucky, living in flood plain areas in not a luxury, as it may be for people who have summer homes along the ocean beaches. Those people can afford higher premiums, and my constituents should certainly not subidize their rates.

But the flood insurance program was specifically intended to protect people like my constituents, people who have to live in the flood plains and who are faced with constant flooding threats. Let us not allow the rates to go so high that they will not be able to afford the coverage which was intended for them.

And I urge you to bear in mind that if the rates go up policyholders will carry less coverage. And this will mean more Federal expense for disaster assistance in these areas when floods hit in the future.

I agree that reform of the program will be necessary to insure its financial soundness in the future. But this reform should be through such measures as the examination and possible development of a sliding scale for premium rates, so that people who are using flood insurance for a second home might pay higher rates than those who rely on it for their family's principal residence.

My constituents regularly and heroicly battle the floods of our Kentucky rivers. They have lost homes, belongings, crops, and sometimes even their lives to these floods.

Mr. Chairman, I urge the Congress not to make it harder for my constituents to pay for the flood insurance which has given one of their few protections against these ravaging floods.

I urge my colleagues to vote in favor of this amendment.

● Mr. GOLDWATER. Mr. Chairman, I rise in opposition to the amendment offered by my colleague from Pennsylvania which would prohibit increases in Federal flood insurance rates. Because of budgetary limitations and instructions limiting the Federal Emergency Management Agency's borrowing authority, FEMA proposed on June 1 to increase subsidized flood insurance rates effective October 1.

Homeowners who live in flood prone areas and who are covered under the national flood insurance program should, of course, assume an appropriate share of the cost for the flood insurance program. Of the 17,000 communities participating in the program, 11,000 are still in the emergency phase—the first step of the program which is already heavily subsidized by the Federal Government. If this $100 billion program is ever to become actuarially sound, recipients must bear an appropriate share of the economic burden.

I would, however, like to mention a deficiency of the flood insurance program I believe needs to be addressed and corrected. At a time when premiums are being increased, certain flood-related disasters are not included. Many homeowners suffer from water-induced landslide damage. What pains me is that this disaster is caused by flooding in many cases, but is not covered under the flood insurance program. Furthermore, homeowners are often unaware that this flood-related disaster is not under NFIP coverage, and yet they are required to pay NFIP premiums. I have tried to include such disaster coverage, but am advised that such coverage is too costly or that there is not enough assembled information about water-induced landslides to include such coverage under NFIP. The reason the Federal Government is involved in the first place is because the flood insurance program is expensive, but that does not mean we should not provide coverage. No other coverage is available either through public or private programs.

Mr. Chairman, I feel that water-induced landslide insurance coverage is needed, and I will continue to work toward providing that insurance.●

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania (Mr. NELLIGAN).

The amendment was rejected.

● Mr. HAMMERSCHMIDT. Mr. Chairman, I rise in support of H.R. 4034, the appropriations bill for fiscal year 1982 funding HUD and independent agencies of the executive branch. I join the very able chairman of the Veterans' Affairs Committee, the gentleman from Mississippi, in praise of the Appropriations Committee and its Subcommittee on HUD-Independent Agencies for its fine work on this bill.

The veterans of America should note that their Veterans' Administration programs have been preserved and, in some cases, strengthened by the actions of the committee. Earlier recommendations for budget cuts would have, in my opinion, seriously crippled the administration of veterans' medical care and created havoc within the VA's Department of Veterans' Benefits.

The funding levels in H.R. 4034, however, will more than offset reductions proposed in medical care staffing and continue the prosthetic research program at its present level. I am particularly gratified to find in this bill funds for activating the Ray Roberts medical scholarship program authorized by the Congress last year. This program will have a long-range influence in providing skilled nurses and physicians to treat sick veterans.

A recommendation by the administration to consolidate the 58 VA regional offices into three regional locations as a cost-saving measure was ill-advised in my opinion and adequate funds are in this bill to permit the agency to maintain the current number of offices. Apart from the hazards such a consolidation would present to administrative procedure, thousands of VA employees would have been faced with relocating or the loss of their jobs. I am grateful to the Appropriations Committee for restoring adequate funds to prevent such dislocations.

I will not retrace all the provisions of H.R. 4034, Mr. Chairman. I have minor disagreements with a few of its provisions but, by and large, it is an excellent measure, written with careful attention to the requirements of the Veterans' Administration in administering health and other benefits to the Nation's veterans, their dependents and survivors.

I support it and recommend our colleagues do likewise.●

Mr. MILLER of Ohio. Mr. Chairman, over the years, I have cited the high rent subsidy payments under section 8 of the Housing and Community Development Act of 1974. During previous consideration of this legislation I pointed out that for 1980, the Government could be required to pay as much as $1,379 a month to subsidize an apartment in New York City. For 1981, that figure has risen to $1,597 a month.

An amendment I offered to the HUD authorization bill last year, and which was accepted by the House but was negated by the Senate, would have reduced by 10 percent the Secretary of HUD's statutory authority to increase rent subsidies. Another amendment I offered to the fiscal year 1981 HUD appropriation bill cut the bill by $1 billion.

Recently OMB under its regulatory authority curtailed by 15 percent the 35 percent overall discretionary amounts which could be added to the fair market rent. Permit me to com-

mend the Office of Management and Budget for this action. This seems to curtail some of the excesses of the program, but even with this reduction, we still can experience the $1,597 a month payment in New York City.

A recent GAO report says that Government subsidized rents have "risen at rates and to levels which could in the future provoke serious challenges to the very existence of the program." The report cites recent subsidized rent increases of 121 percent in San Francisco, 95 percent in Cincinnati, and 72 percent in Atlanta. Subsidized rent increases in 17 cities sampled averaged 53 percent for the 4 years evaluated.

Under the law, a subsidy can be provided for renters whose incomes are under 80 percent of the median of the area. The taxpayer pays the landlord the difference between the tenant contribution—usually 15 to 25 percent of the renters income—and the contract rent. The only Federal criterion for participation is income. Forty percent of all U.S. households could qualify. If a family has no income, they make no tenant contribution and the taxpayer will pay the entire rent, plus a utility allowance.

The report also states that—

Although gross rents are not supposed to exceed fair market rents except in special circumstances, they were found to be higher in 68 percent of the projects GAO sampled.

Some of the apartments provide more than just adequate housing for the poor. For example, in some of the buildings cited in the reports, tenants could enjoy indoor swimming and parking, and tennis courts. GAO's observations indicated that—

HUD has a generous attitude regarding features and amenities not normally expected in subsidized housing. The housing is often so costly that moderate and even middle income unassisted households cannot afford to live it it.

The reconciliation bill made changes in the subsidized housing program. The 1982 increase in subsidized housing is limited to 162,500 units instead of 175,000 as proposed or the 260,000 requested by the past administration. Tenant contributions to the rent are to go up from 25 percent of income to 35 percent.

Admittedly, these changes are for the better, but I still find it impossible to support this legislation. In this period of fiscal restraint I think greater reductions should have been made to this measure. The bill asks the American taxpayer to pick up a bill that he can ill afford.

Mr. BOLAND. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, we have now reached the caboose of the train, and I just want to make a comment with reference to the Budget Committee's Early Warning Report.

The staff of the Budget Committee produces weekly so-called Early Warning Reports which attempt to inform Members of Congress, especially those of the Budget Committee, how a particular reported bill relates to the Budget Resolution Subcommittee targets. Thus far, the Budget Committee staff has issued two reports on appropriation bills—one for the Interior bill and one for the HUD-independent agencies bill. I will only comment on the Early Warning Report pertaining to the HUD bill. We have reviewed this report and find it to be misleading and inaccurate. I will explain some of the reasons why.

The Budget Committee has chosen this year to scorekeep appropriation bills according to the mandatory and discretionary amounts that are established in the Appropriations Committee section 302(b) report. The focus will be on the discretionary amount to determine if a bill exceeds its subcommittee target. If the conference report exceeds the discretionary target for budget authority, the bill will be subject to the delayed enrollment provision of section 305 of the first budget resolution.

While the Appropriations Committee has reservations about this process, we have very carefully examined every account within our jurisdiction in determining whether it fits within the discretionary or mandatory category. These have been translated into our subcommittee targets and the Budget Committee staff advised on how the mandatory and discretionary splits were made. Now the Budget Committee staff chooses, in their Early Warning Report, to differ with the classification of mandatory items. The case in point is general revenue sharing, which we feel strongly is a discretionary item while the Budget Committee staff considers it to be mandatory. The result is that the Budget Committee staff has chosen to display in their report an imbalanced comparison that is not only misleading but extremely confusing.

On page 3 of the report is the following sentence:

HBC Counsel has reviewed the law and concluded that GRS—general revenue sharing—is an appropriated entitlement, as it has always been classified.

HBC counsel may have his opinion, but in our opinion, general revenue-sharing is not an entitlement program. The 1972 act did not require Congress to annually appropriate for general revenue-sharing payments. The necessary funds were taken directly from the Treasury. I will admit that the program authorized by the 1972 act was an entitlement program.

The 1976 amendments changed that procedure and authorized the Congress to appropriate for general revenue-sharing payments. As such, since 1976 general revenue sharing has not been an entitlement program.

Further, I would state that the Budget Committee does not have authority to determine which programs are controllable and which are not. The Budget Act clearly gives that authority to the Appropriations Committee—section 302(b)(1)(B).

As I read the Budget Act, the Appropriations Committee is required to further subdivide its total allocation between controllable amounts and all other amounts. The act does not mention that the Budget Committee shall subdivide the allocation between controllable amounts and all other amounts. As I understand it, the Budget Committee's newly adopted practice is to divide the allocation between controllable and uncontrollable. But that subdivision is not required by law. It is within the committee's jurisdiction to subdivide the allocation.

On page 2 of the report is the following sentence:

Since the Appropriations Committee has no real power to amend existing entitlement law, it cannot effectively change the amount for mandatory programs.

That statement is not correct. Clause 2 of rule XXI provides for retrenchment of expenditures, Section 844 describes the conditions under which an entitlement program can be reduced in an appropriations bill. Entitlement programs can be reduced under the Holman rule.

In fact, we have an example of reducing an entitlement account in this bill. In the VA readjustment benefits paragraph we have denied funds for flight and correspondence training and reduced the appropriation by $32 million.

The Early Warning Report also incorrectly concludes that the bill would be under target by $20 million in budget authority for the discretionary portion instead of $146 million if a permanent appropriation for FEMA were counted. The item referred to is the national flood insurance fund borrowing authority which is permanent authority and therefore not in the HUD bill nor under the jurisdiction of the Appropriations Committee. Consequently, this error has been carried forward in the Early Warning Report.

The budget resolution and the accompanying allocations make no explicit mention as to what allowance is made for civilian pay increases. In fact, the allocation in the joint explanatory statement accompanying the budget resolution implies that no allowance is made for civilian pay while, very explicitly, $5.5 billion was allowed for military pay increases. Now, in the Early Warning Report, a judgment is made that $200 million in budget authority is assumed in the budget resolution for pay increases and therefore should be scored against the subcommittee target. Here is an example of surfacing hidden assumptions.

Furthermore, Mr. Chairman, the Budget Committee staff has chosen to publish its own assumptions as to what is allowed for future supplementals—in particular, cost-of-living adjustments for veterans' programs. Such assumptions are then used to judge whether a bill fits within the subcommittee targets. This type of analysis is arbitrary and misleading, especially when it involves guesswork as to what the magnitude of a supplemental may be. It also has the effect of prejudging congressional action.

The Early Warning Report is a perfect example of the Budget Committee's continuing to involve itself in the line item detail. This committee has constantly cautioned both the Budget Committee and the Congress for proliferating line item debate during consideration of budget resolutions. Each time, Budget Committee representatives have indicated that it was not their intent to address issues at a detail level. However, the Early Warning Report is a deliberate attempt to analyze and derive conclusions from line item level which is clearly beyond the scope of the Budget Committee's responsibility.

The report mentions that CBO outlay reestimates for mandatory programs are, in many cases, higher than the estimates used by the administration or the committee.

Mr. Chairman, the Congress and the administration have little control over outlays. That is especially true of outlays from prior year appropriations. As such, I am not sure what the Budget Committee would have us do. I do not believe there is much we can do—especially when outlays are reestimated from time to time. Furthermore, the allocation of outlays to the committee as a whole appears to be deficient when compared to the budget authority allocation. This is confirmed by the Budget Committee on page 10 of the report which mentions that outlay estimates in the first budget resolution for 1982 are inconsistent with the revised second budget resolution for 1981.

It is not known how many Members of Congress or their staff review or understand the Early Warning Reports. Certainly, this report could be improved. I hope that the Budget Committee will review its procedures in preparing the Early Warning Reports and take whatever action is appropriate. I am encouraged that this may be the case.

Mr. Chairman, I thought that the Members of the House would like to have the information concerning the Early Warning Reports, and I just thought that I would state our position in the RECORD.

● Mr. FRENZEL. Mr. Chairman, H.R. 4034, the HUD-independent agencies appropriation bill is described in a House Budget Committee early warning report for the week of July 13, as over the total budget target when mandatory items are fully funded.

H.R. 4034, is said to be under the section 302(b) target in both outlays and budget authority, now, but when amounts assumed in the budget resolution, but not yet considered, are added, and mandatory items are fully funded, the bill will be over its targets by $356 million in budget authority, and $740 million in outlays. As one who believes that the spending restraints of the budget resolution must be upheld, I do not see how I can support this bill.

I understand part of the overage relates to a classification problem on general revenue sharing. The committee believes GRS is a discretionary program while the House Budget Committee and the Congressional Budget Office believes otherwise. Further, it appears the committee has failed to leave any room for this fall's pay increases.

In addition, the bill is over the President's budget by $297 million in outlays, and it has grossly exceeded the credit budget assumptions of the budget resolution. The modest reduction by amendment on the House floor does not repair the major flaws.

While this bill seems to present the 1981 version of the old House two-step, it gives a surface appearance of conforming to the budget, but it will be followed by supplemental appropriations for mandatory budget entitlements.

I do not necessarily assume that the overspending here is intentional but, nevertheless, it is here and it should not be passed. The committee is going to have to learn that outlay targets must be met. The old ways of the House can no longer be tolerated. Either we make the budget process work or, the taxpayers will find people who can. This bill should be defeated, or vetoed.●

Mr. BOLAND. Mr. Chairman, I move that the Committee do now rise and report the bill back to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill, as amended, do pass.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker pro tempore (Mr. BARNARD) having assumed the chair, Mr. LEVITAS, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 4034) making appropriations for the Department of Housing and Urban Development, and for sundry independent agencies, boards, commissions, corporations, and offices for the fiscal year ending September 30, 1982, and for other purposes, had directed him to report the bill back to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill, as amended, do pass.

The SPEAKER pro tempore. Without objection, the previous question is ordered.

There was no objection.

The SPEAKER pro tempore. Is a separate vote demanded on any amendment? If not, the Chair will put them en gros.

The amendments were agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the bill.

Mr. SMITH of Oregon. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 362, nays 54, not voting 17, as follows:

The Clerk announced the following pairs:

Mr. Mattox with Mr. Young of Alaska.

Mr. Foglietta with Mr. McCloskey.

Mr. Evans of Georgia with Mr. Roberts of South Dakota.

Mr. Rosenthal with Mr. Dornan of California.

Mr. Mavroules with Mr. Hansen of Utah.

Mr. Hawkins with Mr. Goodling.

Mr. Dymally with Mr. Bonker.

Messrs. GREGG, MOORHEAD, HAGEDORN, WEISS and FIELDS changed their votes from "yea" to "nay."

Mr. TAYLOR changed his vote from "nay" to "yea."

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

DEPARTMENT OF THE INTERIOR AND RELATED AGENCIES APPROPRIATION, 1982

Mr. YATES. Mr. Speaker, I move that the Committee resolve itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H.R. 4035) making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 1982, and for other purposes.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Illinois (Mr. YATES.)

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. BROWN of Ohio. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 378, nays 3, answered "present" 1, not voting 51, as follows:

□ 1610

So the motion was agreed to.

The result of the vote was announced as above recorded.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill, H.R. 4035, with Mr. DANIELSON in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. When the Committee of the Whole rose on Monday, July 13, 1981, title I had been considered as having been read and open for amendment at any point. Pending was an amendment offered by the gentleman from California (Mr. DANNEMEYER), on which a recorded vote had been demanded.

Does the gentleman from California (Mr. DANNEMEYER) insist upon his demand for a recorded vote?

Mr. DANNEMEYER. Mr. Chairman, I withdraw my demand for a recorded vote.

Mr. Chairman, I ask unanimous consent to withdraw my amendment.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. DANNEMEYER. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I would like to take this opportunity to amplify for the record why I took the action I did in offering an amendment and insisting on a recorded vote thereon during the session of the House on Monday, July 13, 1981. In so offering an amendment and demanding a recorded vote on it, the Committee of the Whole House was forced to rise, pursuant to the announcement that there would be no recorded votes on Monday, July 13, 1981.

I offered the amendment for two reasons—as stated at the time on the floor. First, I wanted to protect the right of Members to offer amendments to the bill. Second, I wanted to allow time to check on sketchy information provided me on the floor to the effect that the Interior appropriations bill is $600 million over the President's budget. Throughout all of this, I was acting as the designated minority party floor representative for the day.

On the first point, it was apparently the intention of the distinguished chairman of the subcommittee (Mr. YATES) to complete the bill on Monday, July 13. Clearly this would have precluded the offering of amendments by Members either not present on Monday or not prepared to offer such amendments at that time. It is clear to me that an honest misunderstanding as to the legislative program for the week was the source of difficulty. On Monday the subcommittee chairman quoted an exchange between the majority whip and the minority leader from the CONGRESSIONAL RECORD of Friday, July 10, 1981, wherein the majority whip indicated that it was the intention of the subcommittee chairman (Mr. YATES) to proceed with the bill should time permit. Whatever the intention of the subcommittee chairman or the majority whip might have been by that statement, it is evident this message was not similarly interpreted by more than just this Member from California. In fact, the RECORD of Friday, July 10, on page D835, carried the legislative program for the week of July 13, and notes under the heading for Monday that the House would consider general debate only on H.R. 4035, this Interior appropriations bill. Furthermore, I am aware of Members on both sides of the aisle who were expecting to see the bill further considered on Wednesday, July 15, or thereafter. I make these remarks on this first point for no other reason than to outline what I believe to be a defensible justification for putting the matter over beyond the session of Monday, July 13.

The second reason for offering the amendment and postponing consideration of the bill was the information brought to my attention that the bill is $600 million over the President's budget. I clearly indicated during the debate that I was not in a position to shed light on the accuracy or details of that contention at that point on Monday. Nonetheless, I had every confidence in the source of that information and acted accordingly. Since Monday's session, I have taken it upon myself to check into this matter further and make my findings available to the House for its consideration in reaching a judgment on the pending legislation. I am in receipt of a complete documentation from the Office of Management and Budget for the claim made on Monday, July 13, about the relation between the pending bill and the President's budget. While any comparison between the bill and the budget is subject to interpretation and assumptions about budget allocations, the financing of the strategic petroleum reserve and necessary future supplemental appropriations, the document is a solid work product that merits the attention of the House.

I ask unanimous consent to insert this document in the RECORD at the conclusion of my remarks. Should Members wish to review it before final consideration of the legislation, I have made copies available here on the floor at the minority desk.

Allow me to parenthetically note by way of concluding that I hope the House will carefully scrutinize each and every appropriations bill so that we do not do anything that would detract from the implementation of President Reagan's economic recovery program as adopted by the House with Gramm-Latta I and Gramm-Latta II.

Finally, I want to publicly thank my good friends, the gentleman from Illinois (Mr. YATES) and the gentleman from Pennsylvania (Mr. MCDADE) for their patience and understanding with regard to my actions in postponing the bill's further consideration on Monday, July 13. Under the circumstances, it was necessary and proper for the House to have the opportunity both to offer amendments at a later date and check into the reasons for the administration's position on this legislation. Explanatory material is included at this point.

ADMINISTRATION POSITION ON INTERIOR AND RELATED AGENCIES APPROPRIATIONS BILL FOR FISCAL YEAR 1982

First, the Interior appropriations bill as reported by the committee increases specific program requests of the President by approximately $600 million. Following is a program breakdown of increases made by the committee:

FISCAL YEAR 1982 BUDGET AUTHORITY

[In millions of dollars]

Program	Administration request	Congressional action	Change
Energy Conservation	195	273	+78
National Park Service	708	814	+106
Bureau of Indian Affairs	1,007	1,050	+42
National Endowment for Arts	88	158	+70
National Endowment for Humanities	85	144	+59
Youth Conservation Corps (USDA)	.....	20	+20
All others	5,251	5,368	+117
Total	7,334	7,827	+493

In addition, the Congress, in passing the 1981 supplemental appropriations bill, rejected Interior-related rescissions totaling $107 million, and passed in lieu thereof deferrals of these funds to fiscal year 1982. To attain the budget levels implied by the Presi-

dent's March budget, the committee would need to have made a further $107 million reduction in fiscal year 1982 budget authority.

Second, the outlay impact of the specific program additions made by the committee beyond those recommended by the President is to add $295 million to outlays in fiscal year 1982. An additional $152 million would be added to outlays in fiscal year 1983; $34 million more would be added in fiscal years 1984-86. Following is a breakdown of the outlay effects of these program increases:

[In millions of dollars]

Program	Fiscal year outlays—		
	1982	1983	1984
Energy Conservation	+59	+19	.....
National Park Service	+53	+35	+18
Bureau of Indian Affairs	+34	+9	.....
Endowment for Arts	+34	+31	+5
National Endowment for Humanities	+31	+24	+4
Youth Conservation Corps (USDA)	+18	+2	.....
All others	+66	+32	+7
Total	+295	+152	+34

Third, the committee proposes to offset these budget authority and outlay increases by reducing the administration request for the strategic petroleum reserve by $500 million. The committee report indicates that this reflects a decision of the committee to reduce fiscal year 1982 oil purchases to 70 million barrels from the administration level of 137 million barrels. This fill rate is unacceptably low to the administration and we remain committed to the higher fill rate implied in the original budget request.

If, on the other hand, the committee reduction was intended to reflect new oil price estimates for requested purchases of 137 million barrels in fiscal year 1982, the administration still objects to the committee treatment of this $500 million windfall savings. The committee has treated these moneys as revenue to increase funds for other programs instead of holding this economic windfall in reserve in case of future price changes or other offsetting estimating errors that work against the budget.

Even if the strategic petroleum reserve (SPR) savings—outlays of $200 million in fiscal year 1982 and $300 million in fiscal year 1983—are inappropriately applied to other programs the SPR outlay savings do not offset the outlay effects of the program additions made by the committee. Fiscal year 1982 outlays would be increased by a net $95 million in fiscal year 1982 over the level implied by the administration request.

Fourth, further, the President's budget includes a general allowance for likely pay increases and the committee has apparently not established an Interior and related agencies contingency fund for this purpose. Current estimates are that the October 1 pay increase will require approximately $70 million in fiscal year 1982 budget authority. The administration recommends that the committee set aside this amount instead of committing these funds as new moneys to ongoing program activities.

□ 1620

AMENDMENT OFFERED BY MR. LUJAN

Mr. LUJAN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. LUJAN: On page 2 after line 15, insert the following new paragraph:

"PAYMENTS IN LIEU OF TAXES

"For expenses necessary to carry out the provisions of Public Law 94-565, including administrative expenses, $100,000,000, to remain available until expended.".

POINT OF ORDER

Mr. YATES. Mr. Chairman, I make a point of order before the Chair recognizes the gentleman.

The CHAIRMAN. The gentleman from Illinois will state his point of order.

Mr. YATES. The point of order I make against the amendment is that it constitutes legislation on an appropriations bill, which is prohibited by clause 2 of rule XI. The language proposed by the gentleman is "to remain available until expended." That phrase is not authorized by the basic legislation.

Section 7 of Public Law 94-565 states:

There are authorized to be appropriated for carrying out the provisions of this Act such sums as may be necessary, provided that notwithstanding any other provision of this Act, no funds may be made available except to the extent provided in advance in appropriation acts.

Therefore, the funds are not to be made available until expended. There are ample precedents in the House that support the point that inclusion of the phrase "to remain available until expended" is legislation unless the authorizing legislation permits that availability.

For that reason, I ask that the point of order be sustained.

The CHAIRMAN. Does the gentleman from New Mexico (Mr. LUJAN) wish to be recognized in opposition to the point of order?

Mr. LUJAN. Yes, I do, Mr. Chairman.

The CHAIRMAN. The gentleman is recognized.

Mr. LUJAN. Mr. Chairman, as the chairman of the subcommittee knows, the payment in lieu of taxes program is an ongoing program. There is no intent to legislate in this particular manner.

What we are trying to do is to put in the funds to carry out the payment in lieu of taxes program which is already an authorized program. There is no intent to add any kind of legislative language; simply an attempt to fund the program as it is now authorized.

The CHAIRMAN. Does the gentleman from Illinois (Mr. YATES) have anything further to argue?

Mr. YATES. Mr. Chairman, I just want to reiterate what I said, and point out the gentleman from New Mexico (Mr. LUJAN) did not address himself to the question of funds to remain available.

The CHAIRMAN (Mr. DANIELSON). The Chair has heard the arguments and is prepared to rule, and does now rule.

The point of order will be sustained.

Section 7 of the authorization law provides only that, "There are authorized to be appropriated for carrying out the provisions of this Act such sums as may be necessary." That is the end of the authorization. There is nothing relative to remaining available until expended.

The point of order is sustained.

PARLIAMENTARY INQUIRY

Mr. LUJAN. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman will state his parliamentary inquiry.

Mr. LUJAN. Mr. Chairman, it seems that the problem is with the words "until expended." Is it in order for me at this time to offer an amendment without that particular wording?

The CHAIRMAN. If and when offered, the Chair will examine that amendment.

AMENDMENT OFFERED BY MR. LUJAN

Mr. LUJAN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. LUJAN: On page 2 after line 15, insert the following new paragraph:

"PAYMENTS IN LIEU OF TAXES

"For expenses necessary to carry out the provisions of Public Law 95-565, including administrative expenses, $100,000,000."

Mr. LUJAN. Mr. Chairman, I rise today to offer this amendment on behalf of myself and the gentleman from Utah (Mr. MARRIOTT). I want to be sure that everybody understands, because Mr. MARRIOTT and I circulated "Dear Colleague" letters and it is the same amendment that we were both talking about.

Mr. Chairman, I offer this amendment on behalf of myself and Mr. MARRIOTT of Utah.

This amendment concerns the payment in lieu of taxes program commonly known as PILT. There are several points which should be made about the PILT program.

First, PILT was enacted into law in 1976 after extensive negotiations between Democrats and Republicans on the Committee on Interior and Insular Affairs. I think we came up with an exceptional program. PILT provides a means of returning tax dollars directly

to county governments without going through the usual bureaucratic maze that surrounds most of the Federal programs. The cost of administering PILT is less than 1 percent of the program's total costs. PILT is a way of compensating county governments for the loss of tax revenue they have incurred due to the ownership of Federal land within their jurisdiction. A formula is used to determine how much money is to be returned to each county government, depending on the amount of Federal land in the county, the population of the county, and so on.

In 1980, $103 million was returned to county governments all over the Nation. A breakdown of these payments by State is:

BREAKDOWN OF PAYMENTS BY STATE

[Amounts in dollars]

State	1980 payments	Lujan proposal
Alabama	116,189	112,238
Alaska	4,141,650	4,000,834
Arizona	7,729,636	7,466,828
Arkansas	1,646,593	1,590,609
California	11,651,308	11,255,163
Colorado	7,621,687	7,362,550
Connecticut	4,936	4,768
Delaware	4,919	4,752
District of Columbia	5,112	4,938
Florida	2,069,538	1,999,174
Georgia	792,044	765,114
Hawaii	38,783	37,464
Idaho	6,810,016	6,578,475
Illinois	327,008	315,890
Indiana	319,367	308,508
Iowa	128,712	124,336
Kansas	352,781	340,786
Kentucky	747,211	721,806
Louisiana	136,347	131,711
Maine	51,568	49,815
Maryland	147,020	142,021
Massachusetts	158,885	153,483
Michigan	1,633,784	1,578,235
Minnesota	1,496,104	1,445,236
Mississippi	433,291	418,559
Missouri	1,045,704	1,010,150
Montana	8,201,080	7,922,243
Nebraska	333,882	322,530
Nevada	5,279,663	5,100,154
New Hampshire	301,672	291,415
New Jersey	160,430	145,975
New Mexico	9,735,786	9,404,769
New York	127,128	122,806
North Carolina	908,117	877,241
North Dakota	580,256	560,527
Ohio	426,567	412,064
Oklahoma	796,486	769,405
Oregon	2,820,079	2,724,196
Pennsylvania	501,414	484,366
Rhode Island	1,497	1,446
South Carolina	100,339	96,927
South Dakota	1,880,429	1,816,494
Tennessee	661,116	638,638
Texas	1,321,505	1,276,574
Utah	8,270,714	7,989,510
Vermont	137,135	132,472
Virginia	1,487,820	1,437,234
Washington	1,476,732	1,426,523
West Virginia	809,549	782,024
Wisconsin	746,179	721,099
Wyoming	6,803,410	6,572,094
Puerto Rico	16,983	16,405
Virgin Islands	20,787	20,080
Guam	230	222
Total	103,517,178	100,000,000

Mr. Chairman, county governments in all 50 States receive payment-in-lieu-of-taxes payments. County governments in California receive over $12.7 million; in Florida, $2 million; in New Mexico, $9½ million; Colorado, $7½ million; Michigan, over $1.6 million; Missouri, over $1 million. Unfortunately Mr. Chairman, I do not have the time to mention every State.

President Reagan did not request that this program be terminated. County governments all over the Nation plan on these funds.

Mr. YATES. Mr. Chairman, will the gentleman yield?

Mr. LUJAN. I yield to the gentleman from Illinois.

Mr. YATES. How much money did President Reagan request in his budget for this?

Mr. LUJAN. In the original budget it was $45 million.

Mr. YATES. That is correct, and the gentleman's amendment goes twice as far as President Reagan's request, does it not?

Mr. LUJAN. That is correct. The reason for that is that we reduced funds in other programs in order to increase this particular one.

Some counties, Mr. Chairman, rely on PILT for a majority of their operating expenses, and that is why they are so important. We have one county in New Mexico, for instance, Otero County, and I am sure many all over the Nation, in which PILT represents 77 percent of the general fund operating expenses.

So a loss of PILT payments would probably mean higher local taxes.

Mr. Chairman, the argument has been made that PILT should be ended because of the increase in royalty payments to States under the Mineral Leasing Act. Mineral leasing royalty payments have not gone up as far as expected. In New Mexico—and I use my own State as an example—these payments have only gone up 8.3 percent. The increase in these payments over the last year would not equal the PILT payments New Mexico would receive. Adjustment to the PILT formula can be made to take an increase in mineral leasing royalty payments into consideration, but PILT payments should not be totally eliminated.

Mr. Chairman, I urge the adoption of this amendment. Local county governments are counting on it and we specifically included funding for it in the recently passed budget resolution.

Mr. CLINGER. Mr. Chairman, will the gentleman yield?

Mr. LUJAN. I yield to the gentleman from Pennsylvania.

Mr. CLINGER. Mr. Chairman, there are many counties, I would point out to the gentleman, where the oil, gas, and mineral rights are not owned by the Federal Government, so if the PILT is taken away, those counties would receive no makeup in terms of mineral reimbursement because the OGM rights are not owned by the Federal Government.

Mr. LUJAN. That is correct. I would say to the gentleman that part of the rationale for reducing PILT payments has been because of the additional increase that would come because of the windfall profit tax. That is correct.

Mr. OTTINGER. Mr. Chairman, will the gentleman yield?

Mr. LUJAN. I yield to the gentleman from New York.

Mr. OTTINGER. Mr. Chairman, I thank my friend, the gentleman from New Mexico (Mr. LUJAN), for yielding.

I will be glad to support the gentleman's amendment, but I would like to point out to the gentleman that in my own constituency we have communities where, because of our proximity to New York, we have large numbers of embassies and other tax-exempt properties owned by foreign governments that take a large proportion of the taxable property off the tax roles for various purposes. It is a situation that is very similar to this situation. In the city of New Rochelle, N.Y., the total assessed valuation of properties exempt from taxes because of foreign diplomatic ownership is $943,050 which represents a rather significant portion of New Rochelle's total assessed valuation of $390,404,771. If taxes were being levied on these properties, New Rochelle would receive an additional $41,216 to finance its essential services. The school district would receive an additional $66,334 and Westchester County would collect an added $18,700. Similar losses in potential tax revenue exist throughout my district—Mount Vernon—$30,900; Mamaroneck, $19,230; Pelham, $73,550.

The CHAIRMAN. The time of the gentleman from New Mexico (Mr. LUJAN) has expired.

(On request of Mr. OTTINGER, and by unanimous consent, Mr. LUJAN was allowed to proceed for 2 additional minutes.)

Mr. OTTINGER. Mr. Chairman, I would hope that in continuing this attempt to resolve the problems that the gentleman has with Federal lands the gentleman would support me, and I hope we might eventually have the support of the Committee on Appropriations in obtaining compensation for this type of Federal activity as well.

Mr. LUJAN. Mr. Chairman, I will tell the gentleman from New York (Mr. OTTINGER) that I do sympathize with him because he has the same problem. They have to offer the services, and yet there is no compensating income for it. It is on the same basis that we propose to add this money in that would be in lieu of payment from taxes.

Mr. LAGOMARSINO. Mr. Chairman, will the gentleman yield?

Mr. LUJAN. I yield to the gentleman from California.

Mr. LAGOMARSINO. Mr. Chairman. I thank the gentleman for yielding, and I want to commend him for offering this amendment.

It seems to me the rationale behind the reason this law was enacted in the first place is still here; it has not gone

away. All the reasons for it are still existing.

For example, counties still have the cost of service, the cost of the police, fire departments, and so on, relating to the lands owned by the Federal Government. I think that it makes sense that the formula be revised. However, we cannot do that in an appropriation bill; we can do that later. This can be rewritten.

But, Mr. Chairman, I think in the meantime the gentleman's amendment is one that should be adopted and one that the counties and States have been relying on. I think they are entitled to continue to rely on it, and I hope the amendment is adopted.

Mr. LUJAN. Mr. Chairman, the gentleman is correct. I would like to respond to the changing of the formula. I think that is something that will come along later on, but at the moment we do not have the opportunity to revise the formula. The only opportunity we have now is to put the money in.

Mr. VOLKMER. Mr. Chairman, will the gentleman yield?

Mr. LUJAN. I yield to my friend, the gentleman from Missouri.

Mr. VOLKMER. Mr. Chairman, I remember that we discussed this matter previously in the committee, but my concern right now is that, with the amount that is in the gentleman's amendment as against what is already in the bill and all the other programs, the bill now gets up over $90 million over the budget. Now, where do we get this $93 million or whatever it is?

The CHAIRMAN. The time of the gentleman from New Mexico (Mr. LUJAN) has expired.

(On request of Mr. VOLKMER, and by unanimous consent, Mr. LUJAN was allowed to proceed for 2 additional minutes.)

Mr. LUJAN. Mr. Chairman, it is my understanding—and we might check with the chairman of the subcommittee, and as a matter of fact, I think there was some correspondence from the chairman of the subcommittee—for example, as I researched putting in the additional $100 million, that there is a leeway of some $200 million in the overall appropriation figure.

Mr. YATES. Mr. Chairman, will the gentleman yield?

Mr. LUJAN. I yield to the chairman of the subcommittee.

Mr. YATES. Mr. Chairman, I will tell the gentleman that as I explained to the House when the bill was up originally, this bill is $7 million under the President's budget at the present time. It is approximately $3 billion over the section 302 allocations of the budget bill, but the reason that it is $3 billion over the allocation of the budget bill is because we provided approximately $3.4 billion for funding the strategic petroleum reserve.

If both the House and the Senate budget bills provided for funding of the strategic petroleum reserve but did so off budget, there is no vehicle for accepting it off budget at the present time, and because of the importance of funding the reserve, we placed it in our bill. If that strategic petroleum reserve were not funded here, the bill would be approximately $191 million below the section 302 allocations.

I think that is what the gentleman was referring to when he said that there would be ample funds. But I point out to the gentleman that even though we would be within the section 302 allocations without the strategic petroleum reserve, at the $191 million minus figure, the gentleman's amendment would raise this bill above the President's budget by approximately $93 million, and that is one of the reasons I think the House should consider whether it ought to approve the gentleman's amendment.

Mr. LUJAN. Mr. Chairman, did the gentleman not say that taking into consideration the section 302 allocation, we would then be $191 million under the budget?

Mr. YATES. Under the section 302 allocations of the Budget Act. But that is a separate instrument from the budget that was filed out of the Office of Management and Budget as the President's budget.

The CHAIRMAN. The time of the gentleman from New Mexico (Mr. LUJAN) has again expired.

(On request of Mr. YATES, and by unanimous consent, Mr. LUJAN was allowed to proceed for 1 additional minute.)

Mr. YATES. Mr. Chairman, if the gentleman will yield further, ordinarily what the Appropriations Subcommittees do with their bill is to make two references. One is to the section 302 allocations, which is the sum given to us under the congressional budget process; and also we must look to the budget that Mr. Stockman and OMB have given to the Congress. We are now $7 million below that budget in this bill.

If the gentleman's amendment is accepted, we will then be $93 million over the President's budget.

Mr. LUJAN. Mr. Chairman, perhaps the gentleman could further explain that on his own time.

The $100 million was included in reconciliation and has been the subject of consideration, except now for the Appropriations Committee, and for every other committee that has dealt with the question of payment in lieu of taxes it has always been taken into consideration that we have $100 million in there. In the committee reauthorization, in the reconciliation, in all of them, we have always had the $100 million in there for payment in lieu of taxes, and maybe the gentleman could then tell us where he put that money.

The CHAIRMAN. The time of the gentleman from New Mexico (Mr. LUJAN) has again expired.

(On request of Mr. OTTINGER, and by unanimous consent, Mr. LUJAN was allowed to proceed for 2 additional minutes.)

Mr. OTTINGER. Mr. Chairman, will the gentleman yield?

Mr. LUJAN. I yield to the gentleman from New York.

Mr. OTTINGER. Mr. Chairman, because this is important on the amendment that I will offer afterward, I would like to point out that both the House and the Senate, in the Budget Committees and in the respective Energy Committees, have taken SPRO off the budget, so that $193 million ought to be available without any serious argument.

I grant to the chairman of the Interior Subcommittee that we would be above President Reagan's submitted budget, but what we are governed by here in the House is what we passed in the House, not what was originally submitted in our budget. We ought to be all right as long as we stay within the budget reconciliation figures that have been adopted by both Houses.

Mr. LUJAN. Mr. Chairman, I thank the gentleman from New York (Mr. OTTINGER) for that explanation.

Mr. MARRIOTT. Mr. Chairman, will the gentleman yield?

Mr. LUJAN. I yield to the gentleman from Utah.

Mr. MARRIOTT. Mr. Chairman, I think that is a very valuable point.

We met today in the conference committee in the Senate on reconciliation of the budget, and all the conferees agreed that we ought to add $100 million in. So the subcommittee chairman is correct regarding the President's budget, but the House and Senate reconciliation budgets have the $100 million in them. So this is not a violation of any budget that the House has proposed.

Mr. LUJAN. There is no question about that.

The CHAIRMAN. The time of the gentleman from New Mexico (Mr. LUJAN) has again expired.

(On request of Mr. RUDD, and by unanimous consent, Mr. LUJAN was allowed to proceed for 2 additional minutes.)

Mr. RUDD. Mr. Chairman, will the gentleman yield?

Mr. LUJAN. I am glad to yield to my friend, the gentleman from Arizona.

Mr. RUDD. Mr. Chairman, I rise in support of the amendment offered by my colleague from New Mexico (Mr. LUJAN) to restore the $100 million for payment-in-lieu of taxes which was included in the budget for the coming fiscal year. This program is exemplary in that it recognizes the responsibility of the Federal Government to compensate local governments deprived of

a tax base by tax-exempt Federal lands, and returns the funds to these governments without bureaucractic redtape. Because of the direct nature of these payments, the program operates with under 1-percent overhead.

In Arizona, where more than 70 percent of the land is federally owned, county governments are very dependent on this source of revenue. The argument that counties are otherwise compensated by the development of resources on these lands does not hold water. The fact is that the development of these resources greatly increases the demand on, and the cost of county services. I urge my colleagues to support this amendment as the most equitable means of fulfilling the Federal Government's responsibility for the support of Federal lands.

Mr. SIMON. Mr. Chairman, will the gentleman yield?

Mr. LUJAN. I yield to the gentleman from Illinois.

Mr. SIMON. Mr. Chairman, I rise in support of the gentleman's amendment.

I would just point out to the committee that in my district we have the Shawnee National Forest, and Pope County has 40 percent of its landmass covered by the Shawnee National Forest. Until the gentleman and Mr. Frank Evans from Colorado and I and a great many others were able to pass the payment in lieu of taxes, this county was literally about to go bankrupt. They could not borrow money. The State authorized them to issue bonds, but nobody would buy the bonds.

Finally the county, with only 3,800 people, is now in the black.

I think that we as the Federal Government, have some responsibility there, and it seems to me that with this small amount of money, this is just the kind of thing that we ought to be doing.

So, Mr. Chairman, I am pleased to join the gentleman from New Mexico (Mr. LUJAN) in support of his amendment.

□ 1640

Mr. LUJAN. I thank the gentleman for those words, he is exactly correct. Any property that any Member of this House or in this country owns they have to pay taxes on it. It is the beginning of an equalization of the Federal Government, which does not pay taxes, to pay a little toward the furnishing of the services that must be furnished by county government because of the ownership of that land.

Mr. WEAVER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I, as the author and manager in the House of the payments in lieu of taxes legislation in my first term in the Congress, the 94th Congress, was very proud to have pushed this legislation through and seen it enacted, and it was designed primarily to compensate counties within which Federal rangelands existed, albeit we broadened the bill to include various eastern parks and other eastern lands.

The idea that we do already have payments in lieu of taxes on our forests and on our mineral resources justly compensated lands in the west primarily with those revenues.

But the rangelands virtually paid nothing to the county in which they existed and yet the county was obligated for certain police protection, for rescue services, for many other services, that involved these lands.

So we set a maximum of 75 cents an acre on any such land and we also very carefully deducted any revenues from timber sales, or minerals, mineral royalties, from the moneys paid in lieu of taxes under this bill so the county did not get a double revenue from the Federal Government.

I will say this: I support very much the amendment that will restore the funds to the bill. The counties have made a commitment now for 6 years that this money is coming in, the counties are counting on it, they have it allocated, they need it, but there are several discrepancies that should be reformed in this bill, and I note that the gentleman from New Mexico mentioned that he, too, was interested in some reform, in particular, the Utah situation where the moneys are paid through the State for the schools.

This should be remedied and there are several other areas where the bill should be reworded and I say to the gentleman from Illinois, the distinguished chairman of the committee, that I would hope to offer these amendments.

A GAO study is being completed now on what the effect of the amendments that I will propose would be and that we will probably be able to reduce the amounts of money by some $10, $20, or $30 million, and making it much more palatable I would hope to the Appropriations Committee.

But believe me, this is a commitment to the counties. It has been made now for 6 years. I was proud to be the author of this legislation, and manage it in the House and I would hope that the House would continue that commitment by putting it in the bill today.

Mr. KOGOVSEK. Mr. Chairman, will the gentleman yield?

Mr. WEAVER. I yield to the gentleman from Colorado.

Mr. KOGOVSEK. I thank the gentleman for yielding and I commend him for his remarks.

I commend the gentleman from New Mexico (Mr. LUJAN) for the motion that he is making.

As the gentleman from Oregon (Mr. WEAVER) has said, all too often we forget we have a commitment to the counties that are generally in the Western States. All too often I think we forget that it is actually the county residents through the county commissioners who are taking care of the police protection on Federal lands, and fire protection on Federal lands.

There are a lot of Federal problems at local expense and I think the payment in lieu of tax legislation made sense several years ago, it makes more sense now, especially since Congress is in the budget cutting mood that it is in we are going to find ourselves in all too many cases actually balancing the Federal budget and unbalancing every local budget.

I think that the local county commissioners at this time need the money more than ever and deserve it.

Mr. WEAVER. I thank the gentleman and conclude by saying that the person who introduced the bill into the Congress, the Member who did, was the gentleman's predecessor in his district from Colorado, Congressman Frank Evans, who was a member of the Interior Appropriations Committee at that time.

Of course, I am sure he still strongly supports the bill.

Mr. MARRIOTT. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of this legislation that I have cosponsored with my good friend from New Mexico (Mr. LUJAN). That PILT, payment in lieu of tax, in fact, is payments to counties for losses of revenue from Federal lands. This money makes up 50 to 75 percent of the general operating budget of most of these counties. It goes for roads, fire protection, ambulance services, law enforcement, jails, sheriffs, sewer improvements, hospitals, et cetera.

The average county in America gets about 22 cents an acre, and I think that the 94th Congress was right when they said the Government has an obligation to provide these funds. To terminate PILT now would cripple many of the smaller units of government. I think PILT is basically block grants in its truest form. Very little, if any, waste, and of course, all of it goes where it can do the most good.

In many cases PILT is the only money that many of these counties get.

Regarding the cost of PILT, the figure that we are restoring in the bill is $100 million. It is well within the budget, because we actually have $191 million to play with. This $100 million is the same level it was in 1979, 1980, and 1981. This $100 million for PILT has been approved by the House Senate budget reconciliation conference. It has been approved by the House Interior Committee, which really ought to have jurisdiction and

does have jurisdiction over PILT. It is favored by the chairman of the Committee on Appropriations, the gentleman from Mississippi (Mr. WHITTEN), who personally endorses the program and, of course, the entire Senate and the Senate committees will not pass any bill out that does not have PILT in it, and I believe the administration favors it even though it is a lower level.

If I could just make a comment to the chairman of the committee, because I think there is a point that needs to be at least addressed in a colloquy.

The administration is working on a new formula, but I think it is important that we see what that formula is before we start knocking PILT out of the appropriations bill.

This formula does have some serious gaps in it, serious flaws, and that is the reason that we do not have it before us now.

There are some administrative problems with PILT. There are some improprieties, I am sure, with some of this.

But I think there is a question that we might want to ask the States, and that is, Why are the States not sharing more of their mineral leasing revenues with the counties? So there is a need for review and a need for consolidation.

But we ought to be punishing the States if we are going to punish somebody, not the counties.

This PILT is the only money that many of the counties get. I think a correlation might be made between this and the welfare system. If we see a problem in food stamps, for example, we do not cut out aid to families with dependent children, we address the problem, and I think there is room to consolidate and look at all this, but I think it is totally unfair to penalize the counties, to take away their money because we think maybe the States are getting too much and are not willing to share with the counties.

Mr. YATES. Mr. Chairman, will the gentleman yield?

Mr. MARRIOTT. I yield to the gentleman from Illinois.

Mr. YATES. Mr. Chairman, why does not the gentleman turn to his State legislature and his State government in order to get payment? The Mineral Leasing Act alone has doubled the receipts paid to the State of Utah, and does the gentleman know what the State of Utah conveys to the counties under this Mineral Leasing Act? The State passes through 2 percent of the amount it receives under the Mineral Leasing Act goes to the counties.

Why does not more go to the counties?

Mr. MARRIOTT. If the gentleman will let me explain, the payments from mineral leasing to the States were in existence long before PILT came along.

Mr. YATES. If the gentleman will yield further, the intent of the Mineral Leasing Act was for the money to be paid to the counties. If the gentleman reads the basic legislation, it says that the money was to go to the counties.

Mr. MARRIOTT. It is interesting to note that only 3 States of our 50 States pay moneys back to the county. It has never been understood by the States that they had to pay this money to the county.

The CHAIRMAN. The time of the gentleman from Utah (Mr. MARRIOTT) has expired.

(By unanimous consent, Mr. MARRIOTT was allowed to proceed for 2 additional minutes.)

Mr. MARRIOTT. The facts are payment in lieu of taxes was put on top of the other payments so that money would go directly to the counties.

The point I would like to make is if we have problems with the States, and we have problems with these other mineral revenue dollars, why do we not do something about that? Why do we penalize the counties for problems that we have with the States. I think that is the point.

Mr. YATES. If the gentleman will continue to yield, why is the gentleman saying we penalize the counties? The States are the ones that are penalizing the counties. The Federal Government is making the payment to the States.

□ 1650

It is the States that should be conveying the payments to the counties, not the Federal Government. Would the gentleman rather the money went directly to the counties? Then amend the Mineral Leasing Act to do that.

Mr. MARRIOTT. But I contend that we ought to deal with the Mineral Leasing Act and not PILT. PILT is going to the counties. We know the counties are getting it. Let us go back and amend the Mineral Leasing Act and see to it that they get that.

Mr. YATES. Would the gentleman yield further? Would the gentleman favor not paying the receipts under the Mineral Leasing Act to the States then?

Mr. MARRIOTT. I would be in favor of reviewing and analyzing the entire payment situation, but not penalizing the counties because we have a problem with the States.

Mr. LUJAN. Mr. Chairman, will the gentleman yield?

Mr. MARRIOTT. I would be happy to yield.

Mr. LUJAN. The gentleman has made an interesting point in that there perhaps needs to be some revision of the formula for payment in lieu of taxes. We are going to be looking into that and I think that that formula would be revised, but I think it is premature to cut out all the money, because as a matter of fact what is coming to the States under the windfall profit tax, I know in the case of the State of New Mexico, is about a 10-percent increase. That is about the increase that is coming in. We are cutting out 100 percent of the payment in lieu of taxes.

Now, while saying that we should review the formula, and I think that we probably should, but I think we ought to put in this amount there so that it can go to conference and then it becomes a conferenceable item and then the conference can set it at a little different level than the $100 million. I am not wedded to the $100 million figure.

The CHAIRMAN. The time of the gentleman from Utah has expired.

(At the request of Mr. LUJAN, and by unanimous consent, Mr. MARRIOTT was allowed to proceed for 2 additional minutes.)

Mr. LUJAN. Mr. Chairman, if the gentleman will yield further, I do believe that it is foolish to go ahead and cut out the entire program without a good review of what the effects are going to be.

Some counties, as the gentleman from Illinois, the chairman of the subcommittee, knows, do not have any minerals under the surface and this payment in lieu of taxes pays taxes on the surface acreage. The gentleman is talking about what comes into the State under the Mineral Leasing Act, so some counties do not have the Mineral Leasing Act.

Mr. MARRIOTT. I might just make a point that if we eliminate PILT, the only people who will suffer will be the small cities, the small counties, the small people. The States are not going to turn money back to the counties. They have got that all allocated.

Why are we hurting the counties because we have a gripe with the State?

I think the chairman, the ranking Republican on our committee, makes a very good point.

Mr. CRAIG. Mr. Chairman, will the gentleman yield?

Mr. MARRIOTT. I would be happy to yield to the gentleman from Idaho.

The CHAIRMAN. The time of the gentleman from Utah (Mr. MARRIOTT) has again expired.

(At the request of Mr. CRAIG, and by unanimous consent, Mr. MARRIOTT was allowed to proceed for 2 additional minutes.)

Mr. CRAIG. Mr. Chairman, I rise in support of the amendment offered by my colleagues, the gentleman from Utah and the gentleman from New Mexico.

Mr. Chairman, certainly the point made by my colleague, the gentleman from Utah, about the ability of a county at this stage to be able to provide the ongoing services that provide

base support to the public lands within them, I think is key and critical.

I suspect that a lot of people really do not recognize the role that counties play, large public lands counties, in providing roads and some fire protection, and in almost all cases, police protection and general caretakership of large tracts of public land. This is a way of extending to these counties some limited, and as it is very limited amounts of money, to continue to offer these services.

I would have to concur. I have no problem in reexamining the formula to allow some of the revenues from the resources on those lands to be able to flow directly back to the counties; but at this time those resources are authorized. We have a commitment that I think this Congress well ought to support.

I commend the gentleman from Utah and my colleague, the gentleman from New Mexico, for offering this amendment.

Mr. Chairman, Public Law 94-565, the Payment in Lieu of Taxes Act (PILT) passed the Congress in 1976. It authorizes minimum payments to counties to partially compensate them for the tax immune burden of natural resource lands in their jurisdictions. These lands include: national forests, national parks, wilderness areas, wildlife refugees, Bureau of Land Management (BLM) lands, and Corps of Engineers and Bureau of Reclamation lands. Over 1,500 counties receive payments.

Large holdings of tax-exempt Federal lands, particularly in the West, deprive counties of a viable tax base. PILT funds partially offset this tax loss. Counties budget for and place PILT payments in their general funds. They would have to raise property taxes or reduce services to offset PILT reductions. In reality, counties cannot increase property taxes to absorb PILT losses. For example, proposition 13 severely limits increases in California, and Arizona recently imposed a 2-percent ceiling on property tax increase. In my own State of Idaho, we have a 1-percent initiative which limits property taxes to 1 percent of market value. So many counties would be forced to reduce services drastically, especially in rural areas.

PILT reductions will impede counties in the inflation battle. By State law they must have balanced budgets. They have no lower level government with whom to share the fiscal burden. If PILT payments fluctuate, especially in counties where they exceed 10 or 20 percent of the budget, there is no way to make up revenue shortfalls.

In the 11 Western States the PILT payments amounted to $77 million for fiscal year 1980. As you can see, we are not talking about a small sum. The States with a smaller population but having large Federal landholdings within their borders will be impacted greater over States who have a larger population base and larger tax base.

PILT is an extremely successful Federal program. Its overhead rate is under 1 percent, and allows for local control of funds with no bureaucratic redtape. It is not a categorical grant program, but a commitment by the Federal Government to be a good neighbor and pay its taxes like any other property owner.

Mounting frustration, like arbitrary Federal management of the public lands without consideration for those who live on and use those lands, has given rise to the "sagebrush rebellion." Cutting a program of such critical importance would be perceived as another Federal betrayal of any real partnership with or commitment to the West. Such action would generate intense political ill will not justified by the dollars saved.

Mr. Chairman, I appreciate the opportunity to come before this body and speak about the problems the West encounters from its vast Federal landholdings. Again, I would like to request that in this spirit the Congress include adequate funding for PILT in the 1982 budget.

Mr. MARRIOTT. Mr. Chairman, I thank the gentleman.

I urge all my colleagues to support this amendment. It is equitable. It is fair for the counties, and we will get around to changing the formula and solving the problems another day, but let us not do it now at the expense of the small units of government.

Mr. YATES. Mr. Chairman, I move to strike the requisite number of words. I rise in opposition to the amendment.

I must say that I find somewhat amusing the gentleman's statement that we will get around to revising that formula another day. I look forward to that day, Mr. Chairman. I do not think it will come within the near future. I think the States are too happy with the payments that are being made under PILT.

My friend, the gentleman from New Mexico (Mr. LUJAN), talked about the counties not getting any money. Apparently there are some counties that do not get any money.

I refer the gentleman from New Mexico (Mr. LUJAN) to San Juan County in his own State. San Juan County in his own State receives almost $29 million—or they would receive $29 million if the mineral receipts were passed through by the State. That one county would receive $29 million if it were passed through by the State of New Mexico.

And what does the State of New Mexico pass through to the counties? Two percent of what it receives.

The same thing is true with respect to the State of Utah. The State of Utah receives an enormous amount in mineral receipts. And what does it pass through to the counties? Three percent of what it receives it passes through to the counties.

So I say to both gentlemen, the answer is not with the Federal Government. The Federal Government is meeting its commitments. The Federal Government is making its payments under the Timber Receipts Act, under the Mineral Leasing Act, under nine other acts that were passed originally as payment in lieu of taxes legislation.

It was thought desirable that the Federal Government make these payments to the States and to the counties which are the ones that are affected by the minerals that are being taken out of the States. It was thought that they ought to receive payment, but the States, even under the payments in lieu of taxes legislation, can by appropriate changes in the law make sure the counties do not get the receipts.

So the gentleman's redress is to the State capitals, not to the Federal Government.

I must say in passing that I am surprised at the gentlemen. The Reagan administration has talked about taking the emphasis away from Federal payments and giving the responsibilities to the States. The gentlemen voted for both Gramm-Latta I and Gramm-Latta II. The purpose of those was to send the responsibility back to the States. Why do not the gentlemen look for redress in the State capitals, rather than here?

Mr. LUJAN. Mr. Chairman, will the gentleman yield?

Mr. YATES. I yield to the gentleman.

Mr. LUJAN. Mr. Chairman, I would tell the gentleman first of all in regard to Gramm-Latta I and Gramm-Latta II that the $100 million payment in lieu of taxes figure was in there. Now, the gentleman keeps referring back to the Mineral Leasing Act. Of course, the States get money from the Mineral Leasing Act, but that was there way before the payment in lieu of taxes program came in.

Mr. YATES. Of course it was, but the purpose was the same.

Mr. LUJAN. Well, it may have been at that time. I was not here in the Congress at the time.

Mr. YATES. Well, let me reclaim my time while I read the gentleman the law. Let me read to the gentleman what the Mineral Leasing Act says: I read from "Title 30—Mineral Lands and Mining," section 191:

§ 191. Disposition of moneys received

All money received from sales, bonuses, royalties, and rentals of the public lands under the provisions of this chapter and the Geothermal Steam Act of 1970 [30 U.S.C. 1001 et seq.], notwithstanding the provisions of section 20 thereof [30 U.S.C. 1019], shall be paid into the Treasury of the

United States; 50 per centum thereof shall be paid by the Secretary of the Treasury as soon as practicable after March 31 and September 30 of each year to the State other than Alaska within the boundaries of which the leased lands or deposits are or were located—

Listen to this, I say to the gentleman:

said moneys paid to any of such States on or after January 1, 1976, to be used by such State and its subdivisions, as the legislature of the State may direct giving priority to those subdivisions of the State socially or economically impacted by development of minerals leased under this chapter, for (i) planning, (ii) construction and maintenance of public facilities, and (iii) provision of public service * * *

Now, if that is not a direction to the State legislatures, which they are not complying with, I do not know what is. I do not know why the gentleman insists on turning to the Federal Government for payment.

Mr. LUJAN. Mr. Chairman, will the gentleman yield?

Mr. YATES. I am delighted to yield to my friend, the gentleman from New Mexico.

Mr. LUJAN. I am not turning to the Federal Government for help. That is a program that exists right now.

I wish the gentleman would tell me, what will the gentleman do in the case of national parks, where there is no mineral production or no timber production?

The CHAIRMAN. The time of the gentleman from Illinois (Mr. YATES) has expired.

(By unanimous consent, Mr. YATES was allowed to proceed for 5 additional minutes.)

□ 1700

Mr. LUJAN. Will the gentleman continue to yield?

Mr. YATES. Of course.

Mr. LUJAN. What does the gentleman do in the case where there is a national park, where there is no mineral or timber production, in the case of a wilderness where there can be no production?

Mr. McDADE. Mr. Chairman, will the gentleman yield?

Mr. YATES. I yield to the gentleman from Pennsylvania (Mr. McDADE).

Mr. McDADE. I thank the gentleman for yielding. My distinguished colleague from New Mexico, who argues this matter so ably, asks an important question. We ought to tell him how much is in the budget for the National Park Service for operation and maintenance, for roads, for policemen, for health and safety. There are hundreds of millions of dollars.

Mr. YATES. Hundreds of millions.

Mr. McDADE. And if we were to include the U.S. Forest Service, there is over $2 billion in those two agencies, much of which is maintenance, which we appropriate to make sure that those publicly owned properties are properly cared for.

The chairman is absolutely correct on this item, and I want to commend my colleagues from Arizona, New Mexico, indeed Utah. They have argued this very ably, as, indeed, they are quite capable of doing. But the House ought to be aware of the fact that what we are doing here, if we adopt this amendment, as the chairman has pointed out, is exceeding the budget by $55 million over what the President has sent to us. This is most important for the Members to be aware of.

Some time ago, the administration sent to the Interior Committee legislation to try to correct many of the inequities which my colleague from Illinois (Mr. YATES) has pointed out exist in this program. He talked about the 2 percent and 3 percent passback from the States. That is what the administration wants corrected. We have seen no such legislation. It has not come to this floor.

Let us not now throw good money after bad. Let us not bust this budget with the first amendment that we are going to vote on today. Let us reject this amendment and let us take this bill to conference. My chairman is absolutely correct.

Mr. YATES. Let me tell the gentlemen what Secretary of the Interior Watt has said. Secretary Watt has been criticized for many things, but in his attitude toward protecting the best interests of the people of the West and of the Western States, I am sure the gentlemen can find no fault with Secretary Watt.

I read from our hearings:

Let's talk about PILT, payments in lieu of taxes for a few minutes. As I remember, the purpose is, after considering sums paid under 11 shared revenue acts, paying at least 75 cents per acre to counties with land administered by seven specific national agencies—

And so forth—

You are recommending—

Not the gentleman's $100 million, but Secretary Watt—

You are recommending $45 million?

Secretary WATT. That is correct.

Mr. YATES. Suppose the payments that have been received by the counties and the States under the other shared programs equal or exceed the amount that they would have received, had the lands been available for taxation, would you then favor the payments?

Secretary WATT. No, if I am following your question correctly. We would be asking Congress to amend the present act to basically achieve a minimum payment which was 10 cents an acre plus the shared revenues—

Not what you are getting under the $100 million, not what the gentleman wants, but a minimum payment.

Mr. YATES. What if the shared revenues of the other acts exceed the amount that would have been available under taxation and those funds went to the States, and the States decided they would not pass them on to the county?

Secretary WATT. That is the problem with the act.

That is what the Secretary says—

Mr. YATES. My question would be, would you then favor PILT payments? Suppose the State that should have passed them on to the counties didn't do so? Why should they receive additional funds from the Federal Government?

Secretary WATT. The responsibility of ownership should go to the local government. We ought to see that that payment goes to the local government.

The gentleman is nodding his head "yes," but the answer lies in the State legislatures, not here.

We ought to write the Federal statute to see that it does, so the States can't siphon that off.

Mr. YATES. Is that a recommendation you will make to the Congress?

Secretary WATT. Yes. I did not make that clear. The appropriations request—

Listen to this, I say to the gentleman—

The appropriations request is contingent upon that amendment.

Before he pays anything under PILT.

Now I want to point out what the PILT Act itself said. This is not an entitlement program. You are not entitled to this money automatically. This is what the PILT language says:

There are authorized to be appropriated for carrying out the provisions of this chapter such sums as may be necessary, provided that notwithstanding any other provisions of this chapter no funds may be available except to the extent provided in advance by appropriations acts.

The CHAIRMAN. The time of the gentleman from Illinois has again expired.

(By unanimous consent Mr. YATES was allowed to proceed for 5 additional minutes.)

Mr. YATES. The one important thing and the one reasonable thing in the PILT legislation, in my opinion, was that last proviso, leaving the Congress the decision at the time that the appropriations bill came to the floor as to whether any money ought to be put into the act for the PILT program.

What was the financial condition of the country? What was the the financial condition of the State? What was the financial condition of the counties? Were the States acting fairly with the counties? Was the Federal Government acting fairly with the States?

I ask the gentleman, is the Federal Government acting fairly with the States? Let me point out what the States were receiving in 1976 when PILT was passed. PILT was passed because it was said the States were not receiving enough money from the Federal lands within their jurisdiction.

In 1976 when PILT was passed, the States were receiving $233 million. Do my colleagues know what they received in 1980? They received $553 mil-

lion, approximately twice what they received in 1976 when PILT was passed, and the gentleman still wants to pay PILT the amount of $100 million.

Let me continue with my dialog with Secretary Watt. He said:

Yes, I did not make that clear. The appropriations request is contingent upon that amendment. If you folks want to take the initiative on it as you have on other things, it might facilitate it.

Mr. YATES. We took the initiative of not putting funds in when we got the GAO study.

I have not referred to that yet. The GAO study said there were 6 States that were receiving—I do not have that figure at my fingertips.

Mr. McDADE. Mr. Chairman, will the gentleman yield?

Mr. YATES. I yield to the gentleman from Pennsylvania (Mr. McDADE).

Mr. McDADE. According to the GAO, as the chairman has said, six of the eight Western States received $187 million more under the PILT program than they would have received if they went out and assessed that property on a tax-equivalency basis.

Mr. YATES. That is correct.

Mr. McDADE. So the GAO reported to the Congress that there was almost a $200 million windfall to six of these eight States because of the design of this PILT program.

Mr. YATES. Utah and New Mexico are included within the six States.

Mr. LUJAN. Mr. Chairman, will the gentleman yield?

Mr. YATES. I yield to the gentleman from New Mexico.

Mr. LUJAN. I have not seen a taxpayer that does not complain that the tax is too high, and that is exactly what the gentleman from Pennsylvania (Mr. McDADE) is saying now, that the tax, that the payment in lieu of taxes that the Federal Government is paying is too high. I would challenge the gentleman from Illinois (Mr. YATES) to walk down the main street of his home district and ask any taxpayer whether or not the taxes are too high.

Mr. YATES. That has nothing to do with it. The gentleman is dragging a red herring across the argument. That has nothing to do whatsoever with this discussion.

I now continue with Secretary Watt, who is the champion of the Western States, as the gentleman acknowledged.

Mr. YATES. But we took the initiative of not putting funds in when we got the GAO study, which said the States were receiving much more than they would have received if they put the land on the tax rolls.

Obviously, you know what the PILT payments have been to the States. Do you also have records which indicate what the rate of passthrough has been from each of the States receiving PILT payments?

Mr. BETTENBERG. The Bureau of Land Management has that information.

Mr. YATES. When they come before us, will we be able to get all of that information?

We have made reference to it.

Now finally I said to Secretary Watt, let us talk about the PILT payments for a few minutes. I said, "Should these States receive it?" Secretary Watt said, "Philosophically that should be the objective. We shouldn't be initiating a Federal program to bring riches to the counties greater than what they would have gotten had the lands been on the tax roll."

The gentleman who are offering these amendments do not worry about what the payments in lieu of taxes would have been. They are not interested in what the taxes would have been had they taken the tax rates that are applied to private lands. They are just interested in getting a vast amount out of the Federal Government which has no relationship to the amount that is paid by the other counties.

Mr. MARRIOTT. Mr. Chairman, will the gentleman yield?

Mr. YATES. Surely I yield to the gentleman.

Mr. MARRIOTT. I do not think anybody is making a contention against what the Chairman says. There is no question in my mind that the States are doing rather well and probably doing better than they should be doing.

Mr. YATES. But this is supposed to be a payment in lieu of taxes.

Mr. MARRIOTT. But for many years now precedent has been established. The States have been taking the money from the mineral leasing revenues and they have not been giving it to the counties. Only three States give any of it or very little to the counties.

Mr. YATES. Then why does the gentleman blame the Federal Government for that?

Mr. MARRIOTT. The administration has never policed that.

Mr. YATES. Why does the gentleman blame the Federal Government for that?

Mr. MARRIOTT. Because they are the ones who ought to be determining where the money goes.

The CHAIRMAN. The time of the gentleman from Illinois has again expired.

(At the request of Mr. MARRIOTT and by unanimous consent Mr. YATES was allowed to proceed for 2 additional minutes.)

Mr. MARRIOTT. If the gentleman will continue to yield, the point I want to make is certainly the counties are going to suffer because of this if we knock PILT out, not the States.

Mr. YATES. Then why are the counties suffering? Why do not the States pass it through as they should?

Mr. MARRIOTT. Because we have never upheld that provision in 40 years, that is why. The States have gotten into the habit of spending that money for other programs. That is my point.

Mr. YATES. That is not the fault of the Federal Government.

Mr. MARRIOTT. My point is let us penalize the States and not the counties. that is the point we are trying to make.

Mr. YATES. But the counties are a part of the States. Why does the gentleman come to the Federal Government for help for the counties when he should go to the State capital? That is the point.

Mr. MARRIOTT. I often wonder why it was the PILT was established for the counties after mineral leasing revenues were already in effect for 20 years.

Mr. YATES. At any rate, we find that Secretary Watt has said that there are so many inequities in this law. The gentleman concedes that.

Mr. MARRIOTT. I do concede that.

Mr. YATES. Of course you do.

Mr. MARRIOTT. But the point is then why do we not correct the inequities? Why do we not write new legislation? Why do we not get on with it? Why are we punishing the counties because of a problem between the Interior Department, the Federal Government and the States?

Mr. YATES. If the gentleman will permit me to read from a letter from Charles H. Stoddard, who was the former head of the BLM, I would ask the gentleman to listen to what Charles Stoddard wrote to me. He said:

Dear Mr. Yates and Mr. McDade: Your earlier effort to recind the 1981 PILT funds for BLM was sound.

This is the former Director of the Bureau of Land Management.

It is too bad the Senate did not agree. . . . I shall urge my Senator, Mr. Proxmire, to support you.

Listen to this now, the gentleman talks about the counties being wronged. They are being wronged because of the attitude of the States, and this is what he says: "As a former BLM Director, I can attest that PILT is a give-away."

The CHAIRMAN. The time of the gentleman from Illinois has again expired.

(By unanimous consent Mr. YATES was allowed to proceed for 5 additional minutes.)

Mr. YATES. I hate to do this, but it is important. It is important we clarify this issue as to where the wrong belongs. The gentleman is trying to make the case that the Federal Government is at fault. The Federal Government has been making all of these payments. The States have been keeping the payments from the counties, and the gentleman says, yes, that is wrong, but we will change the law at

some time in the future. We cannot change it now.

□ 1710

So let us keep on giving the money to the States. Listen to what Mr. Stoddard says:

As a former BLM Director, I can attest that PILT is a giveaway. Imagine, listen to this, I say to my friend from Utah, imagine, sweetening the 50 percent of the mineral revenues given to the States. This is on top of the 50 percent of BLM grazing receipts that the States gets and 25 percent of the national forest money they also get.

Fifty percent of the grazing money goes back on the range, 40 percent of the mineral leasing money goes to reclamation, 10 percent of the forest money goes to roads, all of which benefit the receiving local areas.

Private forest and grazing lands pay a fraction of the taxes that are granted under the liberal shared revenue formula applicable to Federal lands. I know the county complains—

Which is what the gentleman is doing, he is presenting the argument of the county—

I know the county complains, but it is a lot easier to wheedle money out of Uncle Sam than to face the local rancher and the timberland owner.

The proposal by the Administration to change PILT so that all counties, whether it needs it or not, get ten percent an acre is fiscally unsound.

So I say to the gentleman, I think this is not only a giveaway, I think it is a stagecoach robbery. I think it is a stagecoach robbery comparable to those found in old west because of the fact that the States are getting the money, and they refuse to turn it over to the local jurisdiction.

Let me just read what San Juan County in the State of New Mexico would receive under the Mineral Leasing Act.

Its share is $28,971,000 under the Mineral Receipts Act. How much of that money does it pass through? How much of that money does it pass through to the counties? Two percent. Two percent of all that money from the Mineral Leasing Act the State passes through to the counties and now the gentleman comes back to the Federal Government and says we cannot allow any of this money to be passed through, this is money that the State of New Mexico wants.

In addition to that, the State of New Mexico and all the States who benefit under PILT want to receive $100 million.

I must say I am shocked by the gentleman.

Mr. LUJAN. Mr. Chairman, will the gentleman yield?

Mr. YATES. I yield to the gentleman from New Mexico.

Mr. LUJAN. The gentleman is turning it into an east-west.

Mr. YATES. I am not turning it into that.

Mr. LUJAN. Every single State in the Union gets some money out of the PILT program. Let me also correct the gentleman on one other thing. I commend him for his dedication to the President's budget. I think that is just great. I agree with him wholeheartedly. But he leaves the impression that the Secretary of Interior and the President of the United States and all of these people are against this particular amendment.

What they have said, as a matter of fact, and the gentleman very well knows, is that the payment in lieu of taxes amount should be reduced to $45 million if we were to remake the formula.

Mr. YATES. Why did not the gentleman introduce an amendment for $45 million then?

Mr. LUJAN. To give the gentleman an opportunity to go to conference on that point; the gentleman could set the figure at $45 or $89 million.

Mr. YATES. Why did not the gentleman make it $200 million then? I would have had a greater argument, would I not?

Mr. McDADE. Mr. Chairman, will the gentleman yield?

Mr. YATES. I yield to the gentleman from Pennsylvania.

Mr. McDADE. I thank the gentleman for yielding.

I think we ought to be very clear about what the administration has said to us here. We have all heard from the discussion that there are enormous inequities in this law. In fact, we are virtually bailing out certain States because they are not passing the money back to the counties.

The administration came up and said we want a reduced figure, but if and only if the law that distributes PILT funds is changed. That law has not been changed.

Now as I said before, this is the first amendment we are going to vote on on this bill and if we adopt this amendment offered by my distinguished friend from New Mexico, we are going to bust the President's budget by over $55 million.

I hope the gentleman will not do that.

Mr. YATES. That is correct.

Mr. McDADE. Especially on a program where the administration has unequivocally said there is something wrong here, we do not want any money appropriated unless and until we change the basic law.

Mr. McDADE. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to the amendment.

I think we have debated this sufficiently long to come to a vote on it. One salient fact that we must remember is the timing mechanism that is engaged in by the Federal Government as they compensate local governments under this act.

Checks are distributed to local governments. On the last day of the fiscal year, that is September 30 of this year. The checks have not even been distributed yet, and we are talking about next year.

Now there are all kinds of time for the Interior Committee or any committee of this Congress with appropriate jurisdiction, and my friend from New Mexico, has reminded us, as ranking Republican, he does have jurisdiction over this act, to clean it up and bring it to the House so that it is acceptable to the administration and acceptable to the Appropriations Committee.

Under no circumstances should we find ourselves in a position where we break the budget in order to reward States that are not complying with the intent of Congress.

Under no circumstances should we appropriate money where the GAO has reported to the Congress that in six of the eight States they surveyed there was an enormous overpayment on PILT as opposed to the normal mechanism of taxation and revenue enhancement based on the assessed value of the taxable land.

PILT was overcompensating them and I have the GAO report here. I would like to show the Members two instances. This was a county in Nevada, where there was a 7-cents-an-acre grazing fee imposed by the Federal Government. They were getting 44 cents an acre. Seven hundred percent more in PILT payments.

The same is true of a county in Wyoming where they received 9 cents an acre for grazing land, but 20 cents an acre, more than double under PILT. It is a program that needs repair desperately. For heaven's sakes, do not break the budget when they have not even disbursed funds for the current fiscal year.

Mr. YATES. Mr. Chairman, will the gentleman yield?

Mr. McDADE. I yield to the gentleman from Illinois.

Mr. YATES. The gentleman's amendment is $55 million over the President's budget, $55 million over the President's budget.

Mr. McDADE. I hope the amendment will be defeated and we can move on.

□ 1720

Mr. DAVIS. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, we have heard a lot of talk on the floor about some of the States out West that receive substantial amounts of money, but I am just going to talk about my congressional district in Michigan. I represent 42 percent of the State of Michigan. We do not receive a great deal of money in

the State of Michigan from this particular fund, but let me tell the Members, in my congressional district, of the $1.6 million that comes to the State, $1.2 million of it goes to my congressional district. Frankly, I have some counties where this Federal payment in lieu of taxes represents 25 percent of the total county budget.

I spent 12 years in the State legislature. We are a State that does participate in this program which sends money from the Feds back to the local units of government. When I went to the State legislature, we paid 20 cents per acre in lieu of taxes. When I left, we finally got it up to $1.50. If the Members want to solve the problem of States versus the Federal Government, I suggest that we consider supporting a bill that I have introduced which says that the Federal Government must pay the same amount of money in lieu of taxes that the State does. I think that is only fair, but the 75 cents of Federal payments in lieu, as an example, in my congressional district, equates out after the deductions, to about 30 cents an acre.

I just think that we have to recognize that when one has an area that depends upon its natural resources such as I have, and when the Government makes a lot of this land unavailable for development because it is either wilderness area or it is Federal parkland, we cannot use these natural resources for development. We have a responsibility to pay something in the way of the taxes that normally would be paid.

I would be pleased in my particular district if we would pay the ad valorem. Let me tell the Members the ad valorem is not only more than 75 cents an acre; it is more than $1.50 an acre; that the State in my particular area pays.

I think it only makes good sense and we would be pleased if the Federal Government would offer all this land for sale and put it back on the tax rolls so that we could use it, because the fresh products industry is probably our No. 1 industry. We find constantly that the Federal Government takes this land away from us and makes it unavailable.

Mr. VOLKMER. Mr. Chairman, will the gentleman yield?

Mr. DAVIS. I yield to the gentleman from Missouri.

Mr. VOLKMER. Mr. Chairman, I would like to discuss with the gentleman the need for revising the law in relation to the payment in lieu of taxes program. What bothers me is if the amendment of the gentleman from New Mexico (Mr. LUJAN) is agreed to by the House and we go on that way, we are not going to revise the program. One will continue to receive the amount that one approximately has been receiving in the State of Michigan and in the gentleman's district. But other places will be receiving money that they really should not, they really do not need.

If we revise it, the gentleman would probably still continue to receive the same amount of money and we could do it with a lot less Federal tax dollars.

Mr. DAVIS. Frankly, my people are not asking for more. We are just asking for what we are getting now, which is only about 30 cents an acre. If we take that money away, some of my constituents will have a tough time.

Mr. VOLKMER. If the gentleman will yield further, I am not saying we take it away. I am saying the gentleman still has his. We revise the program. The national program could be done for about half of what it is being done for now. The gentleman will still receive the same amount of money, and the same situation where the gentleman does not have the minerals and does not have the payments from the minerals. The gentleman has some from timber, but that does not amount to that great a deal. I, for one, am in the same shape as the gentleman is. I personally feel we need desperately to revise this program, in all fairness.

Mr. DAVIS. Let us not take the money out now. Let us leave the money in.

Mr. MARRIOTT. Mr. Chairman, will the gentleman yield?

Mr. DAVIS. I yield to the gentleman from Utah.

Mr. MARRIOTT. Mr. Chairman, I would like to make a comment. I think the gentleman's comments are very timely.

The gentleman from Pennsylvania (Mr. MCDADE), and the gentleman from Illinois (Mr. YATES), live in States where maybe the Federal Government owns—what?—5 percent, 10 percent of the land? In Utah, the Federal Government owns 72 percent. In Nevada I think it is 80 percent. Some places in Alaska it is even more.

The CHAIRMAN. The time of the gentleman has expired.

(At the request of Mr. MARRIOTT and by unanimous consent, Mr. DAVIS was allowed to proceed for 3 additional minutes.)

Mr. MARRIOTT. Mr. Chairman, will the gentleman yield?

Mr. DAVIS. I yield to the gentleman from Utah.

Mr. MARRIOTT. Mr. Chairman, there are a lot of uses for that land. That is not even taken into account here. I would like to make one point, in agreeing with the gentleman.

No amount of money at all can compensate for 75 percent Federal ownership. Therefore, regardless of what revenue payments are or payments in lieu of taxes, it is far short of what it ought to be for that Federal presence. That is what the Sagebrush Rebellion out West is all about. Give us back our land and we will give back the payment in lieu of taxes any day of the week.

Mr. YATES. Mr. Chairman, will the gentleman yield?

Mr. DAVIS. I yield to the gentleman from Illinois.

Mr. YATES. Mr. Chairman, it is not the gentleman's land. It is the land which belonged to the Federal Government, and some was given to the States and some was retained. The gentleman knows that as well as I do. It is not the land belonging to the States, even though it is within the boundaries of the States, and the gentleman knows that is true.

Mr. CLINGER. Mr. Chairman, will the gentleman yield?

Mr. DAVIS. I yield to the gentleman from Pennsylvania.

Mr. CLINGER. Mr. Chairman, I take this time in order to state my support for the Lujan amendment to restore funding for the payments-in-lieu-of-taxes (PILT) program to the $100 million level provided for in the budget reconciliation bill. Importantly, funding for the PILT program will not break the Interior Department's budget ceiling and the administration supports the continuation of the PILT program.

The continuation of the PILT program is vitally important to county governments which are compensated for their loss of tax revenues due to Federal ownership of land. For example, the argument has been made that the need for PILT has been minimized because States and local units of government are receiving higher payments from shared receipts for oil, gas and mineral leasing, timber sales, and grazing fees. However, for four counties in my congressional district which are within the boundaries of the Allegheny National Forest—the Federal Government owns 506,000 acres of the 750,000 acres in the Allegheny National Forest—the PILT program provides necessary compensation to these counties for their loss of tax revenue. In addition, an unique situation exists in the Allegheny National Forest where much of the subsurface oil, gas, and mineral rights are privately owned and the royalties are not shared.

For example, approximately 50 percent of Forest County is federally owned. In 1980, the county government received from Pennsylvania, in accordance with the PILT program, $62,000. Opponents of the PILT program may argue that this is a small amount of money and that revenues can be generated elsewhere, but this $62,000 amounted to approximately 10 percent of the county's budget. Without compensation from the PILT program, Forest County will not be able to meet the significant costs associated with this Federal land. Elk, McKean, and Warren Counties will also be hard

pressed to meet the services these Federal lands require if the PILT program is not funded.

For these reasons, I urge my colleagues to support this amendment to fund this needed and efficient program.

Mr. McDADE. Mr. Chairman, will the gentleman yield?

Mr. DAVIS. I yield to the gentleman from Pennsylvania.

Mr. McDADE. Mr. Chairman, I simply want to point out to my colleagues, the Mineral Leasing Act is only one of the acts that comes into play here that puts money back into States. Let me list them for you: National Forest Receipts, that is one act; second act, New Mexico and Arizona Enabling Act; three, Mineral Lands Leasing Act; four, section 17 of the Federal Power Act; five, the Taylor Grazing Act; six, the Bankhead-Jones Farm Tenant Act.

Mr. DAVIS. Mr. Chairman, none of those apply to my State and none covers the counties in the gentleman's State of Pennsylvania.

Mr. McDADE. I realize that. What we are talking about is a national program drastically in need of repair.

Mr. DAVIS. Let us not devastate some areas of the country because the gentleman is not happy with the program.

Mr. McDADE. I am sure in the gentleman's State—and the gentleman has argued it ably—it works well. I hope the gentleman was on the floor when I said to Members of the House that checks have not even been disbursed for fiscal year 1981. We have not even come to that. We are 2 months away from that, and this amendment provides funds that would not be spent until late September 1982.

The CHAIRMAN. The time of the gentleman from Michigan (Mr. DAVIS) has expired.

(At the request of Mr. YATES and by unanimous consent, Mr. DAVIS was allowed to proceed for 1 additional minute.)

Mr. YATES. Mr. Chairman, will the gentleman yield?

Mr. DAVIS. I yield to the gentleman from Illinois.

Mr. YATES. Mr. Chairman, how much does the gentleman say his State receives under this act?

Mr. DAVIS. I believe it is $1.6 million or so.

Mr. YATES. Does the gentleman know how much is paid to the States under the various acts on the books to which the gentleman from Pennsylvania (Mr. McDADE) referred?

Mr. DAVIS. No, I do not.

Mr. YATES. $553 million.

Mr. DAVIS. That does not help my State.

Mr. YATES. Of course, but all I am pointing out to the gentleman is that for the $1 million his State receives, the rest of the States under this program get $553 million and the gentleman apparently does not object to the fact that the amendment offered by the gentleman from New Mexico (Mr. LUJAN) is $55 million over the President's budget.

□ 1730

Mr. DAVIS. Except that, Mr. Chairman, right now we are only talking about approximately $100 million.

Mr. LUJAN. Mr. Chairman, will the gentleman yield?

Mr. DAVIS. I yield to the gentleman from New Mexico.

Mr. LUJAN. Mr. Chairman, again I make the point that it may be in the area of $55 million more than the President's budget, but it is the exact figure of the budget that this House passed, and that with the majority of the moneys this House voted for, the $100 million is within the figure of the reconciliation.

The CHAIRMAN. The time of the gentleman from Michigan (Mr. DAVIS) has expired.

(On request of Mr. LUJAN, and by unanimous consent, Mr. DAVIS was allowed to proceed for 1 additional minute.)

Mr. LUJAN. Mr. Chairman, if the gentleman will yield further, I would like to make one additional point.

The impression is left that this is a boondoggle to the States. Let me tell the Members what happens in my own State with the Mineral Leasing Act money. Because we do not have the tax base to support our educational system, the money from the Mineral Leasing Act goes into the permanent fund to be used strictly for the educational system in the State of New Mexico.

Now, if the Federal Government did not own this land, if it were private land, the tax base would be sufficient to support that educational system, and as it is, we have to use the moneys from the Minerals Leasing Act.

Mr. McDADE. Mr. Chairman, will the gentleman yield?

Mr. DAVIS. I yield to the gentleman from Pennsylvania.

Mr. McDADE. Mr. Chairman, I simply want to point out—since my distinguished colleague has introduced the subject of the Minerals Leasing Act, which does not affect the gentleman's State at all and does not affect my State—that we get a pittance. We get a pittance under this act.

Under the mineral receipts in the State of New Mexico in 1979—and these are just mineral receipts—the return to the State which was not passed through to the counties was $80 million, and this is a 1979 figure.

The CHAIRMAN. The time of the gentleman from Michigan (Mr. DAVIS) has again expired.

(On request of Mr. McDADE, and by unanimous consent, Mr. DAVIS was allowed to proceed for 2 additional minutes.)

Mr. McDADE. Mr. Chairman, if the gentleman will yield further, I would just point out to my friend that this is a 1979 figure.

Since that time, under the leadership of the administration, that figure has about doubled. That is one reason why our administration has come up and said, "Don't appropriate money for PILT until we get changes in the equitable distribution of the dollar."

That will affect the gentleman's State more appropriately, and that will affect my State more appropriately.

I want the House to know that my district is a beneficiary of these funds, but I believe we ought to clean up the act and then proceed to appropriate money in an administrative way that is equitable and does not represent incidents where States get amounts like $80 million and do not even pass it back to the local governments.

That is what is happening under one section of the Mineral Leasing Act in one State.

Mr. Chairman, I think we need to pay attention to this and clean it up and not break the budget over an amendment like this.

Mr. DAVIS. Mr. Chairman, I am not addressing the Mineral Leasing Act, but the Reconciliation Act contains funding authority for the PILT program.

Mr. AuCOIN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, no one is a stronger advocate of PILT than I. I have defended this program in the past and I will fight for it in the future. But this amendment before us forces us to break the President's spending recommendations by $50 million. I simply cannot do this for I have pledged to the people of Oregon that I will meet or surpass the aggregate budget cut totals sought by the President. If anything demonstrates my commitment, this vote does. However, I shall work to restore PILT in the Senate with offsetting cuts elsewhere.

Mr. SKEEN. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, I have been sitting over in my office watching the colloquy that has been going on. It is a very interesting argument, and I think it might be worthwhile to answer some of the questions that I do not think have been answered adequately. I will have to base most of my observation on what goes on in the State of New Mexico, but it is not too dissimilar to that that occurs in 11 other of the original Western States.

I know it is extremely difficult for many of the Members who are from

States east of the Mississippi or so-called Eastern States to understand how we got into this situation.

Most of the 11 original Western States, as most of the Members know, came into the Union under enabling acts with lands so vast, without any ownership attachment whatsoever, that they were unclaimed lands.

So when the Federal Government took us into the United States, they ceded two sections per township to the States for the operation of institutions and schools. That was in 1873. Later on, two more sections were ceded to these States for the operations of the same institutions and schools, the idea being that eventually, as these States became more populated, they would ceded more of the land surface of these States back to the State itself.

When we came into the Union under the enabling act, the Federal mineral leasing compromises or agreements were made, and they were made differently for each of the 11 Western States. For instance, the figure, 52 percent, on Federal leasing money is quoted for New Mexico, and that is true today, but it was not always true because it came into the Union with 38 percent of the Federal leasing money.

At the same time, Alaska came into the Union recently with 95 percent of the Federal Mineral Leasing Act money accruing to the State.

So I think that what is important to realize is that there was no tax base in that State to operate its schools, other than the four original sections that were ceded by the Federal Government.

The States have had a long history of distributing this money to the school systems of the States because they had no other source of revenue, other than sales tax, because 38 percent, for instance, of the land surface of New Mexico belong to the Federal Government.

With the initiation of the payment in lieu of tax money, these moneys were distributed directly from the Federal Government to counties. It had nothing to do with their mineral leasing base county by county.

Mr. UDALL. Mr. Chairman, will the gentleman yield?

Mr. SKEEN. I certainly will yield to the gentleman from Arizona.

Mr. UDALL. Mr. Chairman, I simply want to say that I agree with and support the amendment that has been offered and is now pending before us.

Historically, this function came out of the old Public Land Law Review Commission of 1960. I think I am one of the few survivors of that Commission, as being a congressional appointee of the Commission. This is one of the most solid and important recommendations that was made, and in 1976 we transmitted this into law. I think it is good law.

There are some problems, as have been suggested by the gentleman from Pennsylvania and by my old friend, the gentleman from Illinois, but I think we ought to agree to the amendment, and I believe the Interior Subcommittee is willing to look at all the suggestions, if anyone has any.

Mr. SKEEN. Mr. Chairman, I thank the gentleman from Arizona (Mr. UDALL) for his comments. I know that he is a distinguished authority on western land law.

I am not trying to hold school here today, but I would like to answer some of the questions the chairman asked. I think they were good questions, except that it is just two bad that possibly we do not have an arts and humanities distribution under PILT, because then we might have a great deal more sympathy from that quarter. But I appreciate his interest in that area as well.

I just want to say this. This is why the money is distributed the way it is and why the States have already committed these funds and never committed them back to a county-by-county distribution, which would have been totally inequitable, although I think the Federal Government might have felt that way or they never would have taken that action.

The CHAIRMAN. The time of the gentleman from New Mexico (Mr. SKEEN) has expired.

(By unanimous consent, Mr. SKEEN was allowed to proceed for 1 additional minute.)

Mr. SKEEN. Mr. Chairman, what I am trying to say is that we are in a predicament. Just to give the Members one example, I heard that San Juan County was used by the chairman as the prime example of a county that has great mineral wealth, but Otero County, which has 70 percent Federal land in it, has none whatever. It gets $850,000 under this distribution, under the current distribution, and if we cut it to nothing, then they have no access to funds other than to go back to the legislature, which does not meet until next year. That creates a chaotic situation.

Mr. Chairman, I thank the Members for this time, and I urge adoption of the amendment.

Mr. GOLDWATER. Mr. Chairman, I rise in support of the amendment offered by my colleague from New Mexico which would restore funding for the payments-in-lieu-of-taxes program.

The PILT program partially reimburses local government for revenues not received from lands owned by the Federal Government within these local jurisdictions. Local governments rely greatly on property tax revenues but, since Federal lands do not generate those tax revenues, localities must assume the additional cost burden.

This program also returns funds to local governments while minimizing Federal bureaucracy. In fact, PILT operates with under 1-percent overhead.

California, for example, receives over $12 million in PILT funds. I am afraid that local governments would be hard pressed indeed to replace those funds.

Mr. Chairman, I have received solid arguments from my own county of Ventura in favor of the PILT program. The current $412,000 Ventura County receives in PILT funding only partially reimburses my county for services provided to those Federal lands and taxes lost.

The Federal Government has an obligation to local governments to compensate them. I urge adoption of the amendment.

● Mr. HANSEN of Utah. Mr. Chairman, I take this opportunity to express my support for continued funding of the payments-in-lieu-of-taxes (PILT) program. Specifically, I request the support of the House for the PILT amendment to H.R. 4035 offered by Mr. MARRIOTT and Mr. LUJAN.

The PILT program is designed to compensate county governments for the loss of tax revenue resulting from Federal land ownership within their jurisdiction. In this way, local governments containing Federal tax-exempt lands are assured of receiving compensation to mitigate the fiscal impact of having these lands within their boundaries.

The PILT program is one of the few Federal programs which, at the present time, returns funds to local governments and local control to provide basic community services, while avoiding a costly Federal bureaucracy. The Reagan administration did not request a rescission of PILT fund for fiscal year 1981 and it included funding for the program in its fiscal year 1982 budget request. The House Committee on Interior and Insular Affairs supported continued funding of the payment in lieu of taxes program at a fiscal year 1982 level of $100 million, the amount appropriated under the pending amendment.

In my State of Utah, which is owned two-thirds by the Federal Government, these PILT funds are used by our rural counties to build and maintain roads, for law enforcement, and for education. The House Interior Appropriations Subcommittee wants to do away with these funds. It seems clear to me that we have in some way confused or distorted our spending priorities. For example, the committee proposes funding increases of approximately $143 million in excess of President Reagan's budget requests for the National Endowments. That money assures that the wealthy people of New York and other cosmopolitan areas may continue to attend their opera

and to have that attendance subsidized by the Federal Government at the expense of these poor counties. That money assures that such people can have their own arts and humanities playground at the expense of basic education, law enforcement, and transportation needs in Utah and other Western States. I find such funding priorities abhorrent.

It is interesting to me that many of my colleagues on the other side of the aisle who have pled the cause of the poor so loudly these last few weeks have now taken actions to hurt the truly needy western counties by transferring PILT funding to subsidies for the arts and humanities.

Again, I must emphasize that we are talking about basic and essential community needs and services. Since most counties place these payments in their general fund, any reduction in PILT funding will require either a corresponding raise in local property taxes, where possible, or a significant reduction in basic services. Many of these counties do not have other ready sources of revenue. I use as an example Grand County in my district which has only 3 percent of its land owned by private individuals and thus taxable, and the remainder owned by Federal and State governments and thus not subject to taxation. How does such a county raise the revenue it will require to fill the gap lost by this action? They do not have another lower level of government to pass on the fiscal burden of balancing the budget; and counties, by State law, must have a balanced budget.

County governments in all 50 States receive PILT funds. I urge this body to continue this efficient and equitable program of compensating local governments for the burden and impact of Federal lands within their boundaries.●

The CHAIRMAN. The question is on the amendment offered by the gentleman from New Mexico (Mr. LUJAN).

The question was taken; and on a division (demanded by Mr. LUJAN) there were—ayes 22, noes 21.

RECORDED VOTE

Mr. YATES. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 96, noes 320, not voting 17, as follows:

[Roll No. 149]

□ 1750

Messrs. WEBER of Ohio, CARNEY, COLLINS of Texas, and ROUSSELOT changed their votes from "aye" to "no."

Messrs. JOHN L. BURTON, CONYERS, and SWIFT changed their votes from "no" to "aye."

So the amendment was rejected.

The result of the vote was announced as above recorded.

● Mr. MOFFETT. The Chairman, in the dark days of the depression, when unemployment rates hit an alltime high in this country, President Franklin D. Roosevelt created one of the most successful Government employment programs of all time: The Civilian Conservation Corps.

In the mid-1970's, when youth unemployment reached the debilitating level of 15 percent, the Congress created two youth conservation programs modeled after the Civilian Conservation Corps: The Young Adult Conservation Corps (YACC) and the Youth Conservation Corps (YCC).

Like those in the Civilian Conservation Corps, YACC and YCC participants have worked hard, mostly in highly labor intensive jobs, in an effort to protect and enhance America's national parks, forests, wildlife refuges, and rangelands. YCC and YACC enrollees have also provided valuable assistance to State park and land management agencies. In fiscal year 1980, over 34,000 young people were enrolled in YCC programs alone.

What is most impressive about these modern versions of the Civilian Con-

servation Corps is that, in most cases, for each dollar invested in these programs, the taxpayer received in return over a dollar in services. In my own State of Connecticut, for example, in fiscal year 1980, YACC enrollees accomplished over $1.40 worth of services for each dollar expended.

Participants in these youth programs have contributed a great deal toward improving America's parks and natural resources. Last year those youths carried out conservation work including tree planting, trail maintenance, construction, rangeland improvement, and wildlife habitat improvement, valued at over $341 million. The cost to the Federal Treasury for these programs was substantially less, and the price for this valuable work was far lower than what outside contractors would have charged the Federal Government to do the job.

At a time of budgetcutting we must make our cuts wisely. Programs that have demonstrated their cost effectiveness, should be maintained. Unless the administration can demonstrate a more cost effective way of doing this essential job, I think it should continue these programs.

Ironically, Interior Secretary Watt recently declared that a major, $557 million program, should be undertaken to improve conditions in the national parks. Interior has asked for an additional $105 million in fiscal year 1982 for this purpose. No one is better qualified to carry out a nationwide effort to restore our parks than America's youth. Indeed, this is precisely the type of work now being done by young people under these programs. In testimony before the House Appropriations Committee, Interior Department witnesses stated that the Department would make very heavy use of outside contractors to restore the parks. This is very wasteful. Our young people can accomplish this work at a lower cost and in a shorter period of time. I think we should be expanding this program to assist the National Park Service in this task, not eliminating it.

Moreover, these programs should be retained unless the administration can offer a superior means of making rewarding work experience available to young people. Last year 90,000 young people were enrolled in these programs. A large percentage of these youngsters come from minority groups. More than half come from families with incomes of $15,000 per year or less.

Unfortunately, by calling for the total elimination of youth conservation programs the administration has made it clear that meaningful youth employment in the field of conservation is not, in its opinion, worthy of Federal support even if it returns more on the dollar than it costs.

I deeply regret that view. Few programs are as worthy of support as those which preserve the beauty of our national environment and develop the skills of our young people at the same time.

There are many people, most people in the Nation probably, who believe we are not providing enough opportunities for young people. There is considerable support for a national service plan that would provide every young American with an option of either civilian or military service. There is a crying need to introduce the young to the world of work, to impart skills to them and the confidence and self-reliance that accompanies them. Cutting this important and productive program is hardly a step in that direction.

While today we are only considering the funding of the Youth Conservation Corps, I want to compliment the Appropriations Committee on its step to continue funding of this highly successful program. Mr. YATES and Mr. DICKS deserve special thanks for their aggressive and insightful action. I think this appropriation, though much smaller than I would have liked to have seen, will allow the program to continue until the Congress has a chance to decide what should be done with our youth conservation programs as a whole.

My subcommittee has already begun to consider that question and I am hopeful that our hearings will assist the Congress in making such a determination. I personally believe that both YCC and YACC should be restructured, recreated, and directly administered by the Department of the Interior. I am hopeful that we can find a mechanism for funding a new conservation corps which will not result in an additional burden on the budget. I ask my colleagues to join me and Congressman SEIBERLING in structuring such a program and, as a first step, to support the continuing appropriation of the YCC:

SUBCOMMITTEE ON ENVIRONMENT,
ENERGY, AND NATURAL RESOURCES,
Washington, D.C., July 14, 1981.

Hon. JAMES G. WATT,
Secretary, Department of Interior, Washington, D.C.

DEAR MR. SECRETARY: As you know the Subcommittee on Environment, Energy and Natural Resources has been conducting a review of your February proposal to offer tracts in Lease Sale 53 for lease this summer. In that regard the subcommittee held two days of hearings and heard from over thirty-five witnesses. I have carefully reviewed those transcripts and the thousands of pages of documents provided the subcommittee by the Department of Interior on this matter. I am writing to provide you with my view of the record compiled to date by the subcommittee. Based on that record, I urge you not to open these areas to lease at this time.

First, with regard to the potential reserve available in the four northern basins, the subcommittee record clearly shows that the amount of recoverable oil available in these areas is minimal at best. At the subcommittee's California hearing one oil company official testified that one of the four basins was not likely to contain any oil at all and that the small amount of oil likely to be found in a second basin would not justify the cost of production. A representative of the Western Oil and Gas Association further informed the subcommittee that while nineteen exploratory wells had already been drilled in the four northern basins none of them yielded commercially producible oil. Your own Department published a study in February of this year which indicated that for the most part potential oil reserves in these basins were negligible.

Moreover, when compared to other potential lease areas in Alaska, the Gulf of Mexico, and even the Atlantic—which has shown little promise to date—the four northern basins rank dead last. A recent study conducted by the Rand Corporation concerning the discovery of significant new oil and gas fields in the United States concluded that, "Other than a few small prospects in the offshore of the Santa Maria and Salinas basins," the potential for finding significant new oil and gas in the offshore of Central and Northern California is "very limited."

Second, by consistently stating that there is little or no threat posed by exploratory, production drilling operations you have ignored the findings of a new National Academy of Sciences report which suggests that OCS activities are potentially far more dangerous than you have stated. At our April 28th hearing I noted that the NAS Committee on the Assessment of Safety of OCS Activities had found and concluded that:

From 1975 to 1978, before the drilling boom began, an estimated 57,000 barrels of oil was routinely discharged into the marine environment during OCS oil and gas operations. The long-term effects of intentional discharges which make up the bulk of this figure have not been adequately researched.

Oil spills are but a part of the story. Between 1975 and 1978 over 300,000 tons of drilling fluid constituents and almost 10 million tons of drilling cuttings have been dumped overboard.

In drilling a deep well on the OCS, 10,000 to 30,000 barrels of spent fluid of varying chemical composition may be discharged at various times. The drilling fluid is most likely to be discharged during exploratory drilling.

It is not possible to establish on the basis of current research whether today's technology is sufficient to protect the environment.

Blowouts are a major problem. There is an average of 5.5 blowouts in the OCS per year and those blowouts seriously endanger the local environment. Two-thirds of the reported blowouts occur during drilling, not production stages.

There is a significant, growing shortage of trained offshore drilling personnel which creates yet an additional environmental hazard.

At that hearing I also called to your attention considerable information raising serious questions about your basic contentions regarding the long-term safety of offshore drilling:

"Your press releases and public statements present the often-repeated statement that offshore drilling results in fewer spills than the movement of oil by tanker. They continue to downplay the environmental impacts of drilling and exploratory drilling.

You also fail to recognize that in at least three recent studies, scientists have found that long-term exposure to petroleum alone does indeed alter the population and the species density in the area as well as being a possible cause for other changes.

In the studies conducted by Donald Mallins, Director of the Environmental Conservation Division of the National Oceanic and Atmospheric Administration, it was found that the Alaskan Prudhoe Bay crude in concentration under 1 part per million caused—and I quote—'deleterious effects in the feeding habits of shrimp,' and the study also found that egg larvae were seriously damaged.

Another study of oil fields in the North Sea by J.A. Addy indicates a clear reduction in population density of marine life close to the central platform in the one area studied. A third study conducted by the world-renowned Wood Hole Oceanographic Institute showed that five years after an oil spill, significant negative impacts on marine life could still be found.

On the other hand, the findings of one of the most widely-quoted studies sponsored by Gulf University's research consortium and financed by petroleum and petroleum-related industries has recently come under very serious and increasing criticism. While the final consensus report, the only part of the study which was available until recently, concluded in a largely qualified statement that no impact could be measured, reviews of that study and statements made by some of its principle researchers in fact tell another story.

After reviewing the report's back-up data, Dr. Howard Sanders of Woods Hole Oceanographic Institute concluded that the study had serious flaws which weakened its conclusions considerably. Sanders found that data have also been changed in the 1979 sub-reports, but that those changes are not included in the summary report.

At least five of the principal investigators who worked on that report expressed serious doubts about the validity of the controls. It seems that the control group areas were probably exposed to the same pollution as the experimental areas, thereby rendering the "no effect" conclusion almost worthless.

Furthermore, the often-quoted study of the Santa Barbara spill financed by the American Petroleum Institute has not received adequate peer review. The National Academy of Sciences study of 1975 is now being completely revised because the NAS felt this revision necessary because of the large volume of additional research which has been conducted since that report was put together.

I think your public statements also show a general insensitivity to the potential danger to marine life and the environment posed by offshore drilling. I am also disturbed that you have shown particular insensitivity to the undisputed record regarding the potential dangers posed by drilling activities in the four northern California basins.

As I am sure you are aware, those basins are located in one of the most seismically active areas in North America. Major earthquakes capable of damaging oil rigs occur frequently. Wind and wave conditions in the area would render oil cleanup efforts futile from 50 to 80 percent of the time. Many of the prospective tracts within the four northern basins are in the middle of major fishing, spawning, and nursery areas for commercial and sports fish and shellfish. Local economies are highly dependent on the tourist and fishing industries, both of which could be seriously hurt by oil spills or discharges from drilling operations. There are no onshore facilities to handle any oil that might be pumped from this area and nearby harbors are already crowded. Finally, since the amount of oil expected to be found will be rather small, the oil must be tankered to shore, thereby increasing the possibility of oil spills.

Third, at the subcommittee's April 28th hearing you noted that the only new information that you have obtained on the four northern basins is Governor Brown's official response. I think it important for you to consider that two other Federal agencies which have carefully studied the situation have recommended that the four northern basins not be leased. The Environmental Protection Agency (EPA) in discharging its official responsibilities under the National Environmental Policy Act (NEPA) found not only that the final Environmental Impact Statement did not adequately respond to a number of essential water and air quality issues but that important environmental impact studies would not be completed before your scheduled decision. EPA concluded that "these studies must be completed before a full assessment of the environmental impacts can be made." EPA's position has not changed.

The National Oceanic and Atmospheric Administration (NOAA), as late as April 10th of this year, agreed with EPA's assessment that critical environmental studies could not be completed before the lease sale date. NOAA noted, "Without the results of these studies and additional information being developed from research currently under way, important management decisions will be made without the benefit of scientifically sound information."

Finally, the OCSLA clearly contemplated a major role for the affected states in the decision-making about the use of the OCS for energy exploration and development. As I pointed out to you at our April 28th hearing, the Congress specifically required that the Secretary accept the recommendations of the governor in the affected state unless those recommendations do not reflect a proper balance between the state and national interest. The state of California has struck such a balance in my opinion by moving to assist in the leasing of almost all of the Santa Maria Basin where experts agree 80 percent of the recoverable oil will probably be found. Protecting the marine resources and coastal environment of northern California is not only in the interest of the state of California but also in the national interest. That shoreline is unique. We cannot afford to risk its despoliation for what may amount to a few days of oil.

What's more, considering the united opposition of the coastal counties and cities which have the most to gain by the development of these resources, it seems reasonable that pursuing leases in the four northern basins will only lead to further wasteful and time-consuming litigation while not a drop of oil is produced. Common sense dictates that the case made by the oil companies that drilling in these offshore areas is essential does not reflect a proper balance of the public versus the private interest.

I urge you to sustain the action of your predecessor and find that these areas should not be leased at this time.

Sincerely,

TOBY MOFFETT, *Chairman.*●

● Mrs. SCHROEDER. Mr. Chairman, I rise to congratulate the chairman of the committee for a fine report accompanying the Interior appropriations bill. I have read the committee report and I think it does an excellent job in documenting the seemingly arrogant actions of the current Secretary of the Interior.

In the section of the report on Secretarial Offices, the committee shows how Secretary Watt thumbed his nose at the Appropriations Committee and at the Congress by abolishing the Heritage Conservation and Recreation Service, by reorganizing, with the intention of destroying, the Office of Surface Mining, by attacking the Office of Aircraft Services and by attacking the Office of Water Research and Technology. The Secretary thinks he can ignore Congress.

My Subcommittee on Civil Service conducted hearings in Denver on the reorganization of the Office of Surface Mining. We found that the stated justifications of heightened efficiency and effectiveness had no validity. The reorganization is going to waste huge sums of taxpayer money in fiscal years 1981, 1982, and probably in fiscal year 1983. There were no savings to be found. What we saw was an attempt to demolish the best and most respected regional office because it had done its job. Despite similar questions being raised by the Subcommittee on Interior Appropriations and the Committee on Interior and Insular Affairs, Secretary Watt lunged ahead with no regard for cost, no regard for the views of others, no regard for the views of the States the office served, defiantly claiming they were all wrong.

There is another example of Secretary Watt's contempt for the law which the subcommittee did not include in its report. This involves the well-publicized reduction in force in the Solicitor's office in April. At that time, the Secretary issued a press release saying that he had to separate some 15 employees because of gross waste and fraud in the previous administration. He claimed that the budget could not pay for the 51 employees, among whom were the law students recruited for the annual honors program of the Solicitors office. When asked about the Department's failure to include attrition projections in the budgetary analysis, the Secretary's people claimed that they had considered attrition. We asked GAO to look into it. GAO found attrition was ignored. Further, we have found out that the Solicitor's office is now hiring for six of the slots made vacant by the RIF. This is an outrageous violation of the personnel laws.

Mr. Chairman, I encourage the gentleman from Illinois, the chairman of the subcommittee, to continue his vigilent oversight of the actions of the Secretary of the Interior. We should start using the power of the purse to a

greater extent to hold errant officials accountable to the law. There should be a partnership, between the Secretary and the Congress, not a dictatorship by the Secretary to the Congress.●

Mr. YATES. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. DANIELSON, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 4035) making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 1982, and for other purposes, had come to no resolution thereon.

□ 1800

REPORT ON RESOLUTION PROVIDING FOR WAIVING CERTAIN POINTS OF ORDER AGAINST H.R. 4209, DEPARTMENT OF TRANSPORTATION AND RELATED AGENCIES APPROPRIATION, 1982

Mr. BOLLING, from the Committee on Rules, submitted a privileged report (Rept. No. 97-187) on the resolution (H. Res. 187) waiving certain points of order against the bill (H.R. 4209) making appropriations for the Department of Transportation and related agencies for the fiscal year ending September 30, 1982, and for other purposes, which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION WAIVING CERTAIN POINTS OF ORDER AGAINST H.R. 4169, DEPARTMENT OF COMMERCE, JUSTICE, AND STATE, THE JUDICIARY, AND RELATED AGENCIES, APPROPRIATIONS, 1982

Mr. BOLLING, from the Committee on Rules, submitted a privileged report (Rept. No. 97-188) on the resolution (H. Res. 188) waiving certain points of order against the bill (H.R. 4169) making appropriations for the Department of Commerce, Justice, and State, the Judiciary, and related agencies for the fiscal year ending September 30, 1982, and for other purposes, which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 3275, CIVIL RIGHTS COMMISSION AUTHORIZATION, 1982

Mr. BOLLING, from the Committee on Rules, submitted a privileged report (Rept. No. 97-189) on the resolution (H. Res. 189) providing for the consideration of the bill (H.R. 3275) to amend the Civil Rights Act of 1957 to authorize appropriations for the Civil Rights Commission, which was referred to the House Calendar and ordered to be printed.

COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER pro tempore (Mr. DYSON) laid before the House the following communication from the Clerk of the House:

WASHINGTON, D.C.,
July 20, 1981.

Hon. THOMAS P. O'NEILL, Jr.,
Speaker, House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: This is to formally notify you, pursuant to Rule 50 of the Rules of the United States House of Representatives, that on July 16, 1981 a subpoena, issued by the United States District Court for the District of Columbia, was served on an employee of the Clerk's Office, Mr. John Lawler, Chief of the Office of Finance. The subpoena is available in my office for inspection by Members.

Sincerely,

EDMUND L. HENSHAW, Jr.,
Clerk, House of Representatives.

GENERAL LEAVE

Mr. HATCHER. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and to include therein extraneous material on the subject of the special order today by the gentleman from Wisconsin (Mr. ZABLOCKI).

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Georgia?

There was no objection.

A CALL FOR ACTION ON CONFIRMATION OF DR. KOOP AS SURGEON GENERAL

(Mr. SMITH of New Jersey asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. SMITH of New Jersey. Mr. Speaker, President Reagan has indicated that he would like to nominate Dr. C. Everett Koop, the former chief of pediatric surgery at Children's Hospital in Philadelphia, for the position of Surgeon General. But because of an archaic age restriction and a legal requirement of membership in the Public Health Service, Dr. Koop's nomination has been obstructed.

Mr. Speaker, on February 24, this body first waived the age requirement. However, the waiver of membership in the Public Health Service is still bottled up in the Subcommittee on Health and the Environment.

On April 8, Mr. HYDE of Illinois introduced a measure to waive these impediments. It was referred to the subcommittee on April 9, where it has languished.

By its inaction, Mr. Speaker, I believe the subcommittee has done a great disservice to the American people, the Congress, President Reagan, and Dr. Koop himself.

On a matter as important as the nomination and confirmation of our Surgeon General, the subcommittee should have moved quickly to resolve the matter so that the other body could get on to the confirmation proceedings. Unfortunately, it has not and the American people have been denied a Surgeon General for 7 months.

Mr. Speaker, back in 1931, this body codified a method of discharging legislation that demands action when it is bottled up in committee. I agree that its use should be prudent and selective. I believe discharge No. 5 meets this criteria, and I urge my colleagues to sign it—today if possible—to expedite this matter.

Additionally, on Sunday, July 19, the Washington Post printed an excellent article entitled "Dr. Koop Is the Man for the Job." The article goes into a great deal of detail, and in the process makes the point that the title is quite appropriate. I recommend this article that follows my comments to all of my colleagues.

[From the Washington Post, July 19, 1981]

DR. KOOP IS THE MAN FOR THE JOB

(By Mary Meehan)

If Congress lets President Reagan appoint the person he wants for surgeon general of the United States, he will name Charles Everett Koop, a brilliant pediatric surgeon who currently holds the post of deputy assistant secretary for health. But Dr. Koop has the misfortune of being 64 years old—just over the age ceiling for the job of surgeon general. He has the added misfortune of having political opponents in Congress who, although on record against age discrimination, are using the age limit to delay his nomination. The usual faint whiff of fakery floats over Capitol Hill as liberal Democrats try to explain the difference between their principles and their actions, and as the 68-year-old speaker of the House helps block the appointment of a 64-year-old.

Age, of course, has nothing to do with the real issues at stake. No one suggests that Koop is over the hill or in the least bit decrepit; in fact, he appears to be healthier and more vigorous than many younger men. The main issue is abortion and Koop's articulate opposition to it. He is a special target of the proabortion lobby because, prior to joining the government this year, he served on the boards of three of the most effective right-to-life groups, spoke and wrote strongly against abortion, and helped put together the antiabortion movie, "Whatever Happened to the Human Race?" The movie, and a book with the same title that Koop coauthored, suggest that abortion, infanticide and euthanasia are connected, that one leads to the other. This is, to say the least, an unpopular view among supporters of abortion.

It was said of the great Confederate cavalry leader, Nathan Bedford Forrest, that he won his battles by always reaching the scene "fustest with the mostest."

Dr. Koop's opponents managed to do the same thing in reaching the media. His friends and family probably do not recognize him as he appears in the press. One observer suggests that Koop has been made to appear as a "barefoot fundamentalist down from the hills," and others that he has been painted as a "neanderthal" and a "jerk."

To some extent these impressions result from deeply rooted stereotypes about antiabortionists; and to some extent they result from quotes taken out of context from the doctor's speeches and given the worst possible interpretation. Newsweek, for example, lifted on vague sentence from a Koop speech to support its contention that "he has no brief for equal opportunity for women." In fact, he was training women surgeons long before this was popular. Dr. Louise Schnaufer, one of the surgeons he trained and worked with for many years, says that "he's trained a lot of women, and I think he's all for women in medicine. . . . He's very favorable."

Similarly with Koop's religion, which has been pictured as a negative force in his life, yet is clearly a constructive one.

A Presbyterian and an evangelical, he takes his religion seriously as a guide to action. He has worked with a nondenominational agency called MAP International to provide substantial medical aid to Third World countries. He and his wife took an orphan into their home and raised her with their own children, and he helped set up an adoption agency in Philadelphia to find homes for other children who needed them.

His approach to religion includes humility: He has told parents who have tried to thank him for aiding their children, "My surgical skills are a gift from God. Thank Him for them." And he is not superficial about religion: Acknowledging to one interviewer that he had prayed before a critical operation, he added, "I don't pray in the sense of trying to cast a magic spell. Praying doesn't necessarily mean asking for something, you know. There's a lot of value in just sitting still and listening."

THE CASE FOR CONFIRMING DR. KOOP

While allegations of religious fanaticism and antiwoman attitudes have been used against him, the up-front opposition to Koop is based on charges that he is unqualified for the job of surgeon general. This opposition is led by the American Public Health Association, whose executive director says that Koop's position on abortion has nothing to do with their opposition to him. Right-to-life lobbyists find this hard to believe, since APHA has long been active on the proabortion side. But its charges about lack of qualification have been widely adopted by editorial writers and others, so they are worth a careful look.

The public health professionals do not dispute Dr. Koop's international reputation as a pioneer in pediatric surgery. He helped make anesthesia safe for children, did intensive work on the treatment of children with cancer, and performed difficult surgery in the separation of Siamese twins and in other cases previously thought to be hopeless. His awards include the highest that the French government bestows, the Legion of Honor.

In addition, Koop has accumulated much administrative experience in building and leading the outstanding pediatric surgery department at the Children's Hospital of Philadelphia. (This is something the public health people do not talk about; listening to them, one might have the impression that Koop is a Lone Ranger type.) And his whole record is one of much personal interest in his patients and their families. In 1978 he made a remark that sounds rare indeed for a great surgeon: "If you told me that I could never operate again, that would not bother me. But if you told me I couldn't have a relationship with patients' families I would be upset."

Given all of this, the average layperson is likely to think that we would be lucky to have Koop as chief health officer of the country. But the public health folks say that private medicine is focused on the cure of ailments in individuals, while public health is concerned more with prevention of disease in entire populations.

Dr. William H. McBeath, executive director of the American Public Health Association, recently told a congressional committee that the "almost exclusive orientation for one-to-one, provider-patient relationships, so advantageous for the clinician, can actually be a disadvantageous distortion for the community practitioner committed to the broader target of equitable programming for a total population."

If Dr. Koop's reputation were that of a narrow-gauged, "cut and run" surgeon, McBeath might have a point. But Koop's whole career indicates the very opposite of that. And he has extensive volunteer experience with public health problems in Third World nations: working against a dysentery epidemic in the Dominican Republic; teaching young women of an isolated Indian tribe in Mexico to dispense antidysentery and antiworm medicines, vitamins and protein supplements; helping set up a medical school in Ghana. He also established a fellowship program to send medical students to rural hospitals in Third World nations, so they could obtain a realistic experience of international medicine and possibly decide on careers in it.

The public health professionals appear to be unimpressed with all of this, which leads one to believe that they are rather hard to please. There is also a hint of self-interest in their position; while they do not say it this way, one message that comes through loud and clear is: "This is our turf and we're going to keep it." The APHA leaders make a point of saying that never before in its 109-year history has their group opposed the nomination of anyone to be surgeon general. But this becomes somewhat less impressive when one discovers that the decision to oppose Koop was made by a 16-member executive board. And APHA president Larry J. Gordon, who started the public controversy last March when he wrote President Reagan in opposition to Koop, is not even a doctor. He is an evironmental health specialist.

All of which brings us back to the troublesome issues that underlie so much of the hostility to Koop: His opposition to abortion in general and to "selective abortion" in particular. Koop notes that his position "is not so outlandish," that it is shared by the president, the secretary for health and human services and the assistant secretary for health. "I'm always amazed to see how their statements arouse no ire," he remarks, "but things I said two years ago, I have to die for." The list of abortion opponents outside the political right includes Lindy Boggs, Thomas Eagleton, Mark Hatfield, Jesse Jackson, Mary Rose Oakar, Graciela Olivarez and William Proxmire. Koop has some good company.

But he reached his position on his own, and largely as a result of his 35 years of medical practice. When Koop entered his specialty in the 1940s, he was one of only six surgeons in the country to devote his practice to children alone. And, he says, he found himself "very rapidly becoming an advocate for children, particularly for children who are handicapped or abused." He has probably seen nearly every birth defect that can occur, including ones that laypeople find hard to imagine.

He has successfully treated infants with intestinal obstructions, ones born with no connection between throat and stomach, ones with severe problems of the urinary tract, ones with dangerous and disfiguring tumors, and even a boy born with his heart outside of his chest. He has corrected problems of Down's Syndrome children and babies with spina bifida (cleft spine). In short, he has successfully treated many children who today might be aborted after amniocentesis detected their problems.

Amniocentesis is the procedure of withdrawing amniotic fluid from the womb when a fetus is 14 weeks or older. Analysis of the fluid for diagnostic purposes was first done in order to help both mother and child affected by the Rh problem, and Koop favors it when done for this purpose. But increasingly over the last 10 years, aminocentesis has been used to detect genetic problems so that the parents can have affected children aborted—even though the extent of their handicaps may not be known. Koop and others of the right-to-life persuasion call the amniocentesis/abortion combination a "search-and-destroy mission." Koop is a markedly effective critic of it because he knows how much handicapped children can be helped, he admires the way "they have such a good spirit and don't feel sorry for themselves" and he has seen many of them contribute substantially to their families and communities.

This is not to say that Koop or any other doctor can correct all birth defects. No cure has been found for the devastating Tay-Sachs disease, which kills all affected infants in their early years. There is no cure for sickle cell anemia, although some researchers now believe they can find a remedy for it. Some are also hopeful about finding a way to prevent or cure the mental retardation that usually accompanies Down's Syndrome. Today, most Down's Syndrome children, with proper training, can learn to walk and run, engage in sports and do household chores. Those who work with them often describe them as happy and very affectionate children. Many eventually learn and hold jobs in sheltered workshops. Yet the medical literature indicates that more children are aborted for Down's Syndrome than for any other genetic problem.

Koop says that it was his concern about infanticide that led him into the pro-life movement, "so you could say I came in by the side door or the back door." He remarks that "I don't think we ever would have come to our current practice of infanticide in this country if it hadn't been for the fact that we were performing well over a million abortions a year. I think that does something to the medical profession's understanding of its healing ministry. And when you make exceptions for the unborn, there's very little difference between making them for that group and for the newly born."

Koop's opponents suggest that he is alarmist about infanticide, but he points to an impressive amount of evidence: a 1973 ar-

ticle in the New England Journal of Medicine in which two pediatricians reported that, over a 2½-year period at the Yale-New Haven Hospital, 43 handicapped babies died after treatment was withheld or withdrawn from them; a 1973 proposal by Nobel laureate James D. Watson that a child not be declared alive until three days after birth, so that a doctor "could allow the child to die if the parents so chose and save a lot of misery and suffering"; and cases of Down's Syndrome childern who starved to death after denial of simple operations to remove intestinal obstructions.

He also notes the recent case of Jeff and Scott Mueller, Siamese twins who were born in an Illinois hospital where one or more persons apparently felt it was all right to starve then to death rather than allow them to face life with serious handicaps. This, says Koop, shows that he "wasn't far off" in his early concern about infanticide.

There is also the case of Phillip Becker, which Dr. Koop calls a "tragic miscarriage of justice." In the Becker case, denial of treatment has been moved up into the teens and sanctioned by the courts. Phillip Becker is a 14-year-old Californian with Down's Syndrome whose parents have refused consent for heart surgery their son needs. Without the surgery, doctors say, he will suffer unnecessarily and probably die at an early age. Yet California courts upheld the parents in their refusal to give consent, and last year the U.S. Supreme Court refused to hear an appeal on the boy's behalf.

How about the Koop suggestion that euthanasia of the elderly will be the next slide down the slippery slope? The same arguments made for abortion and infanticide can easily be made—and are made—for doing in older people who have serious disabilities. Such people, Koop believes, are in danger—"particularly if they're elderly, disabled and expensive."

But the one thing old folks have that babies lack is the vote. It is conceivable that sheer voting power will protect older people from euthanasia enthusiasts. One could say that political protection is better than no protection at all. On the other hand, it is not a firm barrier against the psychological pressures that Dr. Koop and theologian Francis A. Schaeffer spoke of in their book, "Whatever Happened to the Human Race?" They suggested that consideration of euthanasia leads "to a degradation of the elderly and, ultimately, to inferior health care for the elderly—as well as encouraging the thought that those who do not want to 'shuffle off' quickly are somehow failing in their contribution to society."

Dr. Koop indicates that, if he becomes surgeon general, one of his chief goals will be to aid the handicapped and the elderly and to encourage more positive attitudes toward them. Liberal Democrats have long championed these groups; so if the Democrats can put down their brickbats long enough to listen to Koop, he may have a chance. The young, the old and the disabled will never have a finer or more compassionate advocate.

MERGERS AND THEIR EFFECT ON THE ECONOMY

(Mr. GUNDERSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. GUNDERSON. Mr. Speaker, the focus of this administration, and this Congress, has been the economy. It has been a proper focus, as we all go through the painful, but necessary steps to restore vigor and prosperity to the American way of life.

Whether it be the budget cuts of the past weeks, or the tax cuts of future weeks, one of our primary aims has been to create more capital for the private sector.

Accordingly, I have watched with some concern, the bidding war that has occurred over the past 2 weeks for the purchase of Conoco Oil. This concern is from both the perspective of large oil monopolies, to the impact of such action on our available capital.

Columnist George Will wrote a most thought-provoking article on this subject. In his column, he talks about the fact that six corporations—four interested in buying Conoco, and two preparing to defend themselves from similar ventures—have borrowed or acquired options to borrow upward of $25 billion.

Our entire budget-cutting effort will include cuts of less than twice that sum. I agree with Mr. Will, when he suggests that Congress should consider the effect of mergers on our economic policy, as well as competitiveness. And I insert his article in the RECORD for all to review.

MERGERS, GREAT AND SMALL

(By George F. Will)

Small may be beautiful (as is argued in books issuing from big publishing corporations), but economics is not a branch of aesthetics. And if Du Pont or Mobil or some other corporation can buy Conoco (the ninth largest oil company), that does not mean that antitrust law has disappeared.

It does, however, mean that the Reagan administration must say how it construes that law.

The meaning of certain law can vary with enforcement; that can vary with the ideology of the enforcement agency; and that can vary with elections. This is especially true of antitrust law. A year ago the financial community probably would have assumed that the Justice Department would disapprove a merger of Du Pont or Mobil with Conoco. Today in the financial community there is a heady belief in a vastly expanded horizon of merger possibilities under antitrust law as currently construed.

The rule of law requires a substantial minimum of predictability: persons must be reasonably able to anticipate whether a contemplated action would conform to the law. If the government approves any Conoco merger, it must say what that approval means in terms of its general antitrust principles.

In defense of a merger with Conoco, Mobil might argue that the geographical distribution of Mobil and Conoco markets produces reasonable market shares by competitive regions of the country. And if IBM, inspired by the example of somebody's successful merger with Conoco, decides to try to acquire, say, Sperry Rand, IBM might argue that it competes not only with U.S. companies but with the Japanese and French governments, so its "appropriate" size must be judged accordingly. These are not dismissible arguments.

Hypotheticals aside, what makes Conoco an attractive purchase are its proven reserves of oil, gas and coal in the ground. It is cheaper to buy Conoco than to discover new reserves.

A few months ago Conoco stock was selling for about $50. As this is written, the acquisition competition has driven the price to about $90. But some estimates of the value of Conoco's resource holding would justify a price of $150 a share, more than the depressed stock market can generate from general investors in a period of high interest rates.

But the bidding for Conoco demonstrates that expensive money need not mean tight money. Six corporations (four interested in buying Conoco and two smaller oil companies preparing to defend themselves against similar takeover attempts) have borrowed or acquired options to borrow upward of $25 billion. (The so-called "Reagan Revolution" involves budget cuts of less than twice that sum.) The size of that sum must interest the Reagan administration, which is preoccupied with increasing and directing the flow of capital.

Some of the money borrowed in connection with the Conoco maneuverings was borrowed overseas (some of it is probably OPEC money), and it adds to the nation's stock of working capital. On the other hand, some financiers say the current merger scramble (the one focusing on Conoco is merely the most spectacular) is directing too much capital into windfalls for the stockholders of the companies being pursued. Perhaps too small a portion of the borrowed money (which is, in effect, distributed to stockholders of the purchased company) will find its way into productive investment.

I haven't the foggiest idea whether the involvement of so much borrowed money is good or bad. But it can hardly be a matter of indifference to the administration. Congress may wish to consider how an administration can evaluate mergers not merely in terms of competitiveness within industries, but also in terms of how the dynamics of the merger process (such as large-scale borrowing) affect economic policy. However, the presumption must be that it is expedient to allow market forces to determine the means by which mergers are financed.

The issue of "monopolies" is as old as the Republic, and the promise of "trustbusting" has had political appeal in this century. Exploiting fear of "bigness" is a temptation for demagogues because the functioning of large economic entities is beyond the comprehension of most citizens. So someone in the administration had better begin educating the public about two points:

The large size of corporations involved in a merger presents no *prima facie* case against the merger. And there is a *prima facie* case for tolerating, and in some cases even encouraging, mergers (even if the resulting entities are large indeed) that enhance the efficiency and international competitiveness of corporations. Small may be beautiful, but bigness can be useful.

PUBLIC LAND USE

(Mr. CRAIG asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. CRAIG. Mr. Speaker, on Friday this body, through unanimous consent

and a voice vote, passed legislation that quietly moves to the other body without, I believe, due consideration. I am referring to H.R. 4083.

We are now working to determine the use of our public lands and to sustain a national timber base for the homebuilding industry and for the welfare of jobs not only in the State of California but across the Northwest, therefore I have to speak up in opposition to H.R. 4083. This legislation fails to recognize our timber needs now and for the future. H.R. 4083 will lose this Nation thousands of jobs.

Mr. Speaker, I have serious misgivings about H.R. 4083. This legislation has major national implications. Although the bill was reported by voice vote from the Interior Committee, I would not want Members of this body or of the Senate to mistakenly believe there is no controversy attached to H.R. 4083.

I am most concerned about the impact this legislation would have on home buyers during the 1980's and into the 1990's. Every reputable forecast that I have seen, including the administration's Resource Planning Act assessment, foresees burgeoning demand for new homes during the next 10 to 15 years. A significant portion of this population is in California and other Western areas where homebuilding depends upon lumber from California national forests.

The economic impacts of H.R. 4083 compared to the RARE II FEIS wilderness recommendation are substantial. Annual returns to the U.S. Treasury from the sale of timber would be $17 million less for H.R. 4083 during 1981–85 and $55.2 million during 1986–95. Jobs lost indirectly in service industries would be about double this number. H.R. 4083 would add 6.7 billion board feet of sawtimber growing stock to wilderness to almost double the volume contained in the RARE II FEIS wilderness recommendation.*

The impact of H.R. 4083 must not be looked at in isolation. It is one more in a series of cumulative impacts that together are decreasing substantially the operable land base and the programed harvest of timber from National Forest System as well as private lands. On the Klamath National Forest, for example, the cumulative effect is to reduce the annual programed timber harvest by 17 percent from 259 MMBF to 215 MMBF.

When the Department of Agriculture stated that the economic impacts of the House bill are "substantial" they were not just referring to timber losses. The impacts which would result from enactment of H.R. 4083 would add to those already felt from restrictions due to consideration of threatened and endangered species, archeological and cultural resources, fish and wildlife habitat, visual resource, unstable lands, prior wilderness recommendations, and the creation and expansion of Redwood National Park. Further, it is estimated that 2,600 jobs would be lost in Del Norte, Humboldt, Trinity, Shasta, and Siskiyou Counties over the next 5 years if H.R. 4083 became law. Returns to these counties from timber sale receipts over the next 5 years would be reduced by $35 million, and receipts to the Federal Treasury would be reduced by $140 million.

Also, the ability of the Forest Service to allow the mining or extraction of gold, silver, uranium, chromite, manganese, copper, and tungsten for which high potential exists on more than 200,000 acres would virtually be lost.

I am deeply concerned about the approach that Congress has taken in resolving the RARE II issue. National issues are at stake here which cannot be made to go away by slicing the decision package into district by district increments and State by State increments. The total impact must also be examined.

I am also concerned that the concerns and views of the Members in whose districts the particular areas lie were not fully respected and taken into consideration. Many of the additonal wilderness areas recommended in this bill have been made without the consent of the Member affected.

I am further concerned about the impact of the unique planning devices outlined in this bill. Certain lands are designated for further wilderness consideration, and the Secretary is directed to manage these lands so as to preserve their wilderness attributes until Congress decides otherwise. As far as I am concerned, that is exactly the same thing as placing them into wilderness.

In summation, Mr. Speaker, let me make these points:

This bill has a national impact and an impact on States other than California.

The result of this bill flies in the face of the already modest timber goals of the administration's RPA program.

This bill flies in the face of what Congress itself has been trying to do through the appropriations process to increase resource utilization in the national forests.

The wilderness study process set up in this bill masks how land is really being put into wilderness.

*Based on data developed on H.R. 7702 (96th Cong.) by the U.S. Forest Service.

REAGAN ADMINISTRATION IN DANGER OF OVERREACHING

(Mr. SEIBERLING asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. SEIBERLING. Mr. Speaker, Sunday's Washington Post contained an excellent editorial commenting on the first 6 months of the Reagan administration. The editorial notes that the administration has shown: First, that the President's relaxed approach to his job has strengthened his capacity to govern forcefully; and second, that the administration's vast energy, commitment, and self-confidence in its own sense of mission accounts for both its achievements and shortcomings.

The editorial quite correctly notes that some things in existing programs deserved to be overridden, but others did not—

• • • including certain values and commitments a Federal Government and a decent society should preserve. And so, as it awaits the general benefits promised by a dubious economic theory, it has put at risk—by some of its welfare, social security and other Federal domestic program cuts—the minimal well-being of persons who are already at the bottom of the economic heap.

Mr. Speaker, the Post editorial highlights the sense that many of us have of being in the presence of an overreaction, a self-certainty, and, above all, a "slavishness to doctrine" that could propel the Government from sensible actions to "reckless exercises in theoretical point-proving."

Mr. Speaker, I offer the full text of the Post editorial following these remarks:

[From the Washington Post, July 19, 1981]

THE ADMINISTRATION 6 MONTHS LATER

Today is the day they are commemorating the president's first 6 months in office, so we will join the fun. The administration thus far has shown these defining characteristics. 1) It is very much, perhaps distinctively, the creature of its leader, a president who is relaxed, a delegator: he is clearly comfortable in the job and not afraid of limiting his hourly, minutiae-bound involvement in it, and with this approach, paradoxically, he has strengthened his capacity to govern forcefully, to make things happen. 2) The administration is reacting with vast energy and commitment and self-confidence to its own sense of mission and that of its basic constituents, and this accounts for both its achievements and its shortcomings.

At the time of the president's election, there was in this country a general consensus, much larger than that reflected in the actual Reagan vote, for correcting and reversing a lot of trends associated with Democratic liberalism and establishment dogma in both domestic and foreign affairs. The question is whether the administration, in responding to this mandate, is not in certain areas being as extravagant and doctrinaire and undiscriminating itself as were the perpetrators of all those various excesses it is trying to cure.

Mr. Reagan has shown himself as skilled at the politics of making a government perform as he was at the politics of getting elected. Witness the unexpected accomplishments of his ambitious plans for federal budget cuts. The president and David Stockman and company knew they had to move very fast, concentrate all attention on this issue, grease and/or contend with Congress where and as necessary and let noth-

ing take precedence over their early assault. It worked, at least insofar as budget cuts beyond anything previously thought possible were made. One part of the downside of this strategy has been that preoccupation with the budget battle has either caused or been used as a justification for neglect of other business.

We will be frank with you: we couldn't be more pleased that some of this business has been neglected. On a variety of civil liberties, civil rights and so-called "social" issues (all political issues are social, even the ones that seem to be about geology), the administration has yet to get its act together or issue promised policy statements. We can wait. Congress and the Court are already doing plenty in this realm that strikes us as ranging from mischievous to miserable, and we do not have enormous faith in this administration as a prospective rescuer of the situation.

The general vacuum that has resulted from all the highly trained attention on the economic program has been filled or not filled as you would expect according to the caliber of the people doing other jobs. For example, although the administration's overall deregulation campaign has yet to be brought to fruition at Transportation, some practical, if difficult, decisions have been made, while at the Energy Department—and in fact in the whole field of energy policy or lack thereof—the indifference and inaction have been marked. Likewise, the president's concentration and that of his top aides on getting that economic package through must be accounted one reason that within his national security group there has been such institutional dishevelment and noisy political discord.

But the concentration on that package is not just a cause (of certain other behavior). It is also in effect, a result, the end-product of a kind of zeal that has led the administration to override everything in its way. Some things deserved to be overridden. But others didn't, including certain values and commitments a federal government and a decent society should preserve. And so, as it awaits the general benefits promised by a dubious economic theory, it has put at risk—by some of its welfare, Social Security and other federal domestic program cuts—the minimal well-being of persons who are already at the bottom of the economic heap. And when you combine this with the bias of the Reagan tax program toward the rich and the evangelical and somewhat careless way in which the overhaul of certain policies affecting blacks is being approached, it takes on an aspect of coldness and indifference probably utterly at odds with what the president intends.

This all-or-nothing attitude is evident as well, of course, in Mr. Watt's Interior Department and to some extent in the administration's attempt to reconstruct foreign and defense policy on some basis less wishy-washy and inconclusive than that it inherited. But the commitment, again, often seems without its inner discriminations—on arms transfers, and nuclear non-proliferation, to take two examples. We are among those who believe much of the administration's reaction and that of the public against prevailing national security nostrums was justified. But we often get the sense of being in the presence of an overreaction, a self-certainty and slavishness to doctrine that, whether in the human rights field or that of Third World dealings of arms control, could propel the government from sensible actions to reckless exercises in theoretical point-proving.

It will take much time to test out the validity of Mr. Reagan's foreign policy assumptions (especially concerning U.S.-Soviet relations) and also that of his economic bet. And it takes more than six months to tell how much of an administration's early conduct is here to stay for the whole four years. So everything is in doubt. And this is above all true of the big question: namely, whether this administration will be a four-year reaction—a fluke—impelling a wayward political establishment to correct its course, or whether it marks the beginning of something solid and big. But we will say two things with certainty. One is that if the administration overreaches—as it now seems inclined to—in its attempt to counter the defects of the Democratic past, it will hand Jimmy Carter his best revenge. The other is that this administration would be enormously improved by the existence of a strong and intelligent and coherent Democratic opposition. But that is nowhere to be seen, and it is one thing, even in a political culture that holds presidents accountable for everything from heavy rainfall to baseball losses, that can't be blamed on Ronald Reagan.

HARRY CHAPIN

The SPEAKER pro tempore. Under a previous order of the House the gentleman from New York (Mr. GILMAN) is recognized for 60 minutes.

Mr. GILMAN. Mr. Speaker, on July 16, 1981, Harry Chapin, singer, songwriter, humanitarian, founder of World Hunger Year, died in a tragic automobile accident. Known by so many of us in Congress for his whirlwind dynamism and tireless, unswerving commitment to ending world hunger, Harry Chapin inspired an invigorating confidence that it was possible for policies and programs to be changed; that the energies, resources, and great talents of our Nation could be mobilized to breathe a fresh new life into the great, humanitarian principles for which we want our Nation to stand.

In one of his many finely crafted, probing ballads, Harry queried:

Now if a man tried
To take his time on earth
And prove before he died
What one man's life could be worth
Well I wonder what would happen to this world.

During his short lifetime, Harry proved to so many people what his life was worth. He was vision, confidence, inspiration, unbridled energy, and selfless dedication to others. And his life mattered—he made a difference. He constantly reminded us that hundreds of millions of people suffer from hunger and malnutrition; that hunger makes every day for them a struggle whether or not their plight makes the nightly news or the morning paper.

As Harry reviewed the cold statistics of hunger, they became even more dramatic. He reminded us that hunger is most vicious when it stalks the young; that 100,000 children go blind each year because of vitamin deficiencies; that in some poorer countries almost half the children die before reaching the age of 5, mostly from nutrition-related diseases and that among the survivors, handicaps of learning, behavior, and work capacity are widespread due to inadequate diets and recurring illness.

Harry would repeat to himself and to millions of others that these conditions did not have to exist and people listened and they read, and they learned that we do have the basic technological know-how and resources to alleviate the hunger problem. It became plain to those who began to familiarize themselves with the many dimensions and facets of the hunger problem that our task is formidable indeed. But that is where Harry came in. Many of my colleagues will attest to the fact that is was difficult, if not impossible, to avoid becoming totally enveloped in Harry's electric enthusiasm. He sparked a realization that the job was not going to get any easier; that the time had come to roll up our sleeves to construct a comprehensive strategy against hunger, more finely tuning those programs with a demonstrated record of success, and terminating those programs which actually exacerbated the hunger problem.

I first met Harry during the summer of 1977. He had come to Washington seeking support for an idea he and his wife Sandy had conceived: Creating a Presidential Commission on World Hunger to find ways that our Nation could develop more effective policies to combat hunger and malnutrition. More comfortable in the jeans and casual shirts and shoes his fans recognized him in, Harry had come to town in a conservative three-piece suit. That lobbying suit, as Harry liked to call it, was to get quite a workout during the next year. In between the hundreds of concerts, he performed—more than half to benefit the hunger-fighting activities of his World Hunger Year and Food Policy Center organizations—he would return to Washington to lobby for his Hunger Commission. Singlehandedly, Harry stormed the Capitol. Along with me, Harry persuaded our former colleague, Rick Nolan, and Senators PAT LEAHY and BOB DOLE to introduce a resolution urging the President to establish the Commission. He soon generated enough interest in the Commission to attract 265 cosponsors in the House and 51 in the Senate.

The Presidential Commission on World Hunger was finally established in 1978. During the course of the next 2 years, Harry never missed a Commission meeting. Often exhausted after a night of performing at a concert and the logistical nightmare of grabbing any available means of transportation to get back to Washington for the Commission meeting the next day, Harry nevertheless injected a spirit of

infectious enthusiasm into those meetings. He was the conscience of the Commission, ever-urging us to explore the deeply rooted causes of hunger and prodding us to produce a final report which did not equivocate; did not pull any punches in detailing those actions our Nation would have to take if the hunger problem was to be resolved. Harry Chapin led our Commission's efforts to involve the public in our deliberations and to explore ways to mobilize public opinion in support of comprehensive policy initiatives against hunger. The Commission's report did not reflect unanimous support for each of its findings or conclusions with differences of opinion noted in our report. But we did provide the Chief Executive and the American public with some good, thoughtful recommendations, producing a document which has served as a vehicle to stimulate much-needed public discussion about the dimensions of and threats posed by world hunger.

The end of the Commission did not end Harry Chapin's commitment to ending hunger, it was but a new beginning. Meeting with him on a number of occasions during this past year, Harry expressed his ever-present concern that Congress and the administration commit itself to developing new hunger policies. He continued to pound upon the doors of staid indifference to the global suffering and instability that hunger breeds.

I always had to listen very carefully when Harry spoke because he could pack into 5 minutes more thoughtful, innovative ideas than anyone I have known. In a conversion, he was a master at conceptually changing gears, launching a fusillade of incisive questions, comments, and proposals on a variety of topics. It was as if he were afraid he would not have the time to discuss and to do all those things that truly mattered to him.

There is an empty space now where once there was boundless energy and unfettered, contagious enthusiasm calling for an end to world hunger. Harry once asked:

And if our future
Lies on the final line
Are we brave enough
To see the signals and the signs?

Resolving the complicated, global problem of hunger will not be an easy task. It will be that much more difficult with the absence of a prodding, insistent force such as Harry Chapin. But world hunger does place our future on the final line. Harry took the time to see the signals and the signs of an awesome menacing problem, which if left to fester, would visit an unprecedented catastrophe on us all. He bravely confronted powerful institutional impediments to change and individuals revering the status quo. He underscored the urgent need for courageous decisions if our Nation were to act against hunger while the best opportunities for success still existed.

We greatly miss Harry Chapin. Our heartfelt thoughts and prayers go out to his wife Sandy, and their five children, Jamie, Jason, Jond, Jenny, and Josh, during this grievous period. But those of us who Harry touched so deeply, who remember the hope-filled strains of his songs, who recall his unfailing commitment to others, will not let Harry's vision and dream, be forgotten.

I urge my colleagues to find in the spirit of Harry Chapin their own determination to channel the necessary resources and energies of our Nation into a long term comprehensive strategy to end world hunger.

GENERAL LEAVE

Mr. GILMAN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of my special order.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

□ 1810

Mr. DOWNEY. Mr. Speaker, will the gentleman yield?

Mr. GILMAN. I yield to the gentleman from New York.

Mr. DOWNEY. Mr. Speaker, first of all, I want to thank the gentleman for taking this special order. I know that Harry was especially fond of the gentleman from New York because of the time and effort that he gave to the Hunger Commission and also to Harry's events.

It is normal for us to make people to be greater in death than they were in life. With Harry, this is really an impossibility. He was a prolific and talented musician. He recorded some 12 record albums, he produced 160 songs for this brother's television show "Make a Wish." He wrote for film and stage. He was nominated for an academy award for a film documentary called "Legendary Champions" on professional boxers.

Harry was a man who believed in causes, and he acted on those beliefs. He, as a Long Islander, was involved in the community playhouse in Huntington. He was a trustee of the board at Hofstra University. He was on the Long Island Action Committee. There was no worthy cause in our community that Harry did not find the time to help to play a benefit concert for. He played over 200 concerts a year, and over half of them were benefits. He raised $3 billion for various causes. But the one that he felt the most deeply about, I am convinced, was the one that the gentleman from New York has highlighted, and that was the issue of world hunger. He believed that within every one of us there was the ability to shape and mold events; that changing the world was within the grasp of the single individual. Getting the Hunger Commission enacted and raising our collective conscience to the problems of hunger, not only in Bangladesh and in the Sahel, but on Long Island and in New York State, was his great ability and his great gift.

We will miss him, that is for sure. But if his death is to have any meaning, it would seem to me that those of us who were close to him and those of us who were moved by him can dedicate ourselves to the things that he felt strongly about so that his death may have some meaning.

Mr. Speaker, he was a man who believed in Bob Dylan's admonition, a man who is not busy being born, he is busy dying. And if we live our lives learning, reaching, working, as Harry did, for thousands of causes, we will make great contributions to this planet, as that great man did.

I thank the gentleman for yielding to me and I congratulate him on this timely special order.

Mr. GILMAN. Mr. Speaker, I thank the gentleman from New York for participating in this special order. I know how closely he had worked with Harry Chapin on many of the problems and projects in his own area, and I appreciate the gentleman's kind remarks.

Mr. JEFFORDS. Mr. Speaker, will the gentleman yield?

Mr. GILMAN. I yield to the gentleman from Vermont.

Mr. JEFFORDS. I thank the gentleman for yielding, and I certainly want to say how much I appreciate the gentleman's obtaining this special order. His remarks and those of the gentleman from New York (Mr. DOWNEY) have moved me.

I would like to just add, as I hope I can, some small part to this picture of a man. Harry also had a summer home or a winter home, or both, near my community in Rutland, Vt. It is located at Lake Beebe, in Hubbardton. But he did not use it as a vacation from the things that we have discussed, and that is his involvement in helping people. Even when he was there he held concerts to benefit the various things in my community which were close to him, the Sugar Maple Day Care Center, the Rutland Hospital. Also, he was an avid skier, and he helped the young people by raising money for their Pico Ski Club.

He continued those things which were important to him and really used his life wherever he went to try and benefit people.

□ 1820

I had, as the gentleman did, the experience of meeting Harry back in the summer of 1977 when he came here to get something from Congress to help with the world hunger situation. I remember very well the first day he

came into my office, because my staff just went amok. They were racing around. The girls were going especially crazy. Harry walked in and I said to Harry, "I do not know who the heck you are, Harry, but you sure have my staff racing around." He laughed as only Harry could laugh. I immediately felt a kinship to him, because he could laugh at himself. Even though he took his causes so very seriously, never did he fail to laugh when it was appropriate. He realized how to live a full life.

From that moment on, when we worked together, the gentleman from New York (Mr. GILMAN) and I, Rick Nolan and others, to get Congress to react to his wishes, we succeeded for Harry, or Harry succeeded for us. I think it was probably the latter.

I remember a lecture which I think the chairman of the House Agriculture Committee gave to Harry and those assembled when we passed the resolution to create the World Hunger Commission. He said, "It is one thing to be here, as is so often the case with stars of Hollywood or wherever, to come in with these great ideas and to support them and then to forget them, chasing other causes, getting good publicity, and the most important thing is not what we did here today, to pass this resolution, but what you and those that support it will do tomorrow to make sure that it goes into law and not only that it gets into law, but that it will result in something which is meaningful."

That was a lecture which Harry Chapin did not need; for if there was anyone who did not need any prodding to follow through, it was Harry; to see what he did, to get the White House which—as you remember—was not exactly enthusiastic about following through on that commission, to follow through with it and then to continue to raise the sums of money that he did in the cause of world hunger.

I am sure the gentleman from New York was there this past spring when Harry was out at the Capital Center with Kenny Rogers. They raised some $175,000 for Harry's causes. Harry was really gaining momentum. He was amazing, even though he had some tough times, sometimes when his songs were not at the top of the pop charts or whatever, he never was down, at least not outwardly. He never lost that enthusiasm that continued to carry him forward to really enhance those things which he was trying to do.

I just cannot leave without saying there is certainly one thing he did for me. It was a song, "Cat's in the Cradle." I cannot hear that without identifying with Harry, and taking a lesson from that song in my own life, in my own family. When I find myself getting carried away with my public life, at the expense of my kids, I think of that song. It makes me feel sad for, really, he cannot complete what he would have wanted to do to undo the things that were in that song which concerned him with his own family now, for his life has been taken away from the opportunity to fulfill those goals and desires that he had with his own children. I feel very sad about that.

The car accident which killed Harry Chapin deprived us of the man who wrote and sang such popular songs as "Taxi" and "Cat's in the Cradle," songs which told of incomplete lives but buoyed the spirit. It deprived us of a selfless man who placed the welfare of others above his own. Although his life was incomplete in a temporal sense, it was not unfulfilled.

I feel very good, though, about Harry Chapin's life, what he did for me and what he did for the causes which he supported.

I thank the gentleman again for what he has done here today to help memorialize an American we all feel very, very warm toward.

Mr. GILMAN. I thank the gentleman from Vermont (Mr. JEFFORDS) for adding these beautiful thoughts about someone we all worked so much with and thought so much about. I know how close the gentleman had been during Harry's brief career here in the Congress. I cannot help but wonder how much more would have been accomplished if Harry could have spent a few more years with all of us.

I thank the gentleman for his addition to this evening's special order.

Mr. BONIOR of Michigan. Mr. Speaker, will the gentleman yield?

Mr. GILMAN I yield to the gentleman from Michigan.

Mr. BONIOR of Michigan. I thank the gentleman from New York (Mr. GILMAN) for yielding, and also for sponsoring this special order to honor Harry Chapin.

I do not think that I could improve upon the remarks and feelings in the remarks of the gentlemen from New York (Mr. GILMAN and Mr. DOWNEY) and the gentleman from Vermont (Mr. JEFFORDS); they were certainly from the heart. As far as I can tell, they were very accurate.

I knew Mr. Chapin as an artist and as one who believed in the issues that have been discussed, the hunger issue in particular, but also the issue of the environment, and basically the values which I, his peer, grew up to appreciate and hopefully to manifest in my life.

He was, as has been indicated, a person with boundless energy. In fact, he was an exhausting person. It was difficult to be with him for more than an hour without getting physically exhausted by the energy he had, both intellectually and physically.

The gentleman from Vermont mentioned his followthrough. I guess that probably distinguished Harry more than anything from people in the entertainment industry who take upon themselves the obligation or feeling or effort to promote social causes. Oftentimes those causes are not followed through and there is a lot of—I do not know how to put it—I suspect a lot of anticipation that is never fulfilled and a lot of expectation that goes unfulfilled.

That, of course, causes problems down the road. But Harry Chapin was one who followed through on what he believed in by the mere fact that he sponsored hundreds of concerts every year for free to raise money for world hunger. I think that is an indication of his efforts in that area.

It has been mentioned he did not have a great voice. I used to follow Harry Chapin before I even knew him personally, because I kind of liked his message: "Cat's in the Cradle," "Last Dance," "The Titanic." That was one of his last albums. I grew to like them very much. When I met him and found he was using his profession as a vehicle to make the general public—and particularly people of my age—aware of the problems of the environment and particularly world hunger, I grew to like him and eventually to love him very much as a person.

He was an individual who came to my district and campaigned for me, as he did for a number of people in this body. I will remember him always as a good and a decent man who tried his best and who accomplished much more in his short 39 years than most of us accomplish in a lifetime. He was a kind, decent person that will be remembered by both Republicans and Democrats, but more importantly, by the people who really do not have a strong voice in the world community, the hungry people in the world. For that, the world has been a better place to have known Harry Chapin.

With that, I thank the gentleman for yielding to me and allowing me to express my feelings and sentiments on this great American.

Mr. GILMAN. Mr. Speaker, I thank the gentleman from Michigan for his kind contribution to this special order.

● Mr. FINDLEY. Mr. Speaker—

I wonder what would happen to this world if a man tried to take his time on Earth and prove before he died what one man's life could be worth.

Harry Chapin wrote these words as part of a ballad. And he lived by them.

I first met Harry when he came to my office several years ago to talk about the work of the Presidential Commission on World Hunger. I was deeply impressed by his humanity. At that time, I was working on the famine prevention program which seeks to utilize U.S. land grant colleges to teach farmers in developing countries how to grow more so that they can feed their own population. Harry

immediately grasped the significance of this project and volunteered to help. In the years that followed we kept in touch as we both worked to advance the day when people need no longer go to bed hungry.

On one occasion, Harry sent me tickets to a benefit performance he was giving on behalf of world hunger at Merriweather Post Pavilion. It was the first chance I had to observe this extraordinary entertainer. As a humanitarian, and entertainer, and a human being, he was hard to surpass.

Harry Chapin will be sorely missed by his family, other members of the entertainment business, as well as his countless thousands of fans. But to the hungry millions around the world who never knew him but for whom he worked unceasingly to help feed, he is irreplaceable. They will miss Harry most of all and they did not even know he could sing. It is for the rest of us inspired by his dedication to finish his work and bring an end to hunger for all mankind. Of all the tributes we could bestow on him I know that Harry would appreciate that resolve on our part most of all.●

● Mr. RICHMOND. Mr. Speaker, on June 4, 1981, Harry Chapin flew from New York to Washington, D.C., to meet with the executive board of the Congressional Arts Caucus. Following a 1-hour luncheon, Mr. Chapin met Hill staffers, then immediately flew back to New York for further meetings and concerts.

He was here because the administration asked the Congress to cut the appropriations to the National Endowment for the Arts by 50 percent and he knew that if this happened, it would sound the death knell for thousands of cultural organizations nationwide. He came to Washington, at his own expense, to state the case for continued Government support of the arts.

Harry Chapin brought one very clear and concise message to Capitol Hill that day, the same message he gave thousands of times before to his audiences and friends: We must learn to help one another and live peacefully , because there is no alternative. Mr. Chapin's passion for the arts ran as deep as his personal goal of eradicating world hunger. Here was a man who could not rest knowing that someone, somewhere was starving. Harry Chapin believed that receiving adequate nutrition should require no more effort than breathing. His timeless, endless fight to end world hunger was surely not in vain. As he helped decisionmakers understand the reality of hunger, tens of thousands of people throughout the world began receiving food.

Harry Chapin was a man who cared about people and lived with a passion. He accomplished great things in his 38 years.

He believed that everyone had the right to think for himself and create. The arts were the most expressive forum for his creating and he wanted to give that opportunity to others: To broaden their minds and expand their horizons. He knew that our schools could provide the fundamental breeding ground for creativity, but certain educators were locked into seeing things only one way—the way things ought to be seen.

But Harry Chapin knew that this was a view which could not prevail and sought to change myopic educators with one song. He sang, "There are so many colors in the rainbow and I see every one." Between the lines of that song was a challenge to us all to look for more than the obvious—a challenge to expand our horizons and create a better world.

Those few hours Harry Chapin spent with the Congressional Arts Caucus made us laugh and think. His time here, as everywhere he traveled, was well spent. The entire world has lost a great friend.●

● Mr. DORNAN of California. Mr. speaker, I wish to join my distinguished colleague from New York (Mr. GILMAN) in mourning the tragic death of a great humanitarian—Harry Chapin.

Harry Chapin achieved milestones in many areas, of which music was only one. Many people are not aware of his untiring devotion to those who were less fortunate than he, particularly the world's hungry. As the originator of the President's Commission on Hunger, Harry prevailed upon Congress and the world to recognize the importance of educating people on this vital issue. Harry knew that the solution to the world food problem was not simply in sending food to impoverished nations, but rather in its proper distribution. Harry believed that by removing hunger and despair, crime and violence would be reduced dramatically.

Harry Chapin was a man who shunned the limelight in favor of efforts to preserve the family, the environment, and world peace. It should be noted that in the last year alone, Harry gave more than half of his concerts on behalf of charitable causes. He was also responsible for contributing over $5 million to humanitarian concerns.

Harry remains a shining example to us all. He was a giver, not a taker. It is imperative that we continue with his enthusiasm in seeking to eradicate world hunger. He is an inspiration to all of us who are seeking to assist the underdeveloped nations in producing their own food supplies so that, one day, no one will suffer the depredations of hunger.●

● Mr. WALGREN. Mr. Speaker, I rise to express my sadness at the tragic and untimely death of Harry Chapin. It was a terrible loss not only for his family and his country who loved him, but also for the millions throughout the world who never heard his name or music, but who were kept alive by his unceasing efforts to fight world hunger.

As I am sure most of you know, Harry was this country's most influential and hardworking advocate of a national program to combat world hunger. He founded World Hunger Year and gave over 100 benefit concerts to help fund the organization's activities. It was also Harry, and virtually Harry alone, who got Congress and the President so concerned about the matter of hunger and malnutrition that the Commission on Hunger was created.

With Harry's death, the problem of world hunger will not go away. It can only be solved through the commitment of conscience of the "have" nations to help those who "have not."

Admittedly, we in America cannot solve the problem singlehandedly. Nonetheless, we can follow in Harry's footsteps and serve as an exmple to the rest of the world, drawing attention to the gravity of the situation. I realize that, at the moment, aid for the underdeveloped and hungry Third World countries is not politically popular ; but we are talking about humanity, not politics. We must take Harry's message of caring to heart: I fear that otherwise, our Government's conception of foreign aid could become primarily weapons sales. I have to wonder what is the sense of defending the freedom of a nation's people if they are hungry and dying.

I hope, then, that we as a body and as a nation will reaffirm our commitment to those principles in which Harry Chapin believed so firmly. If the tragedy of world hunger is finally to be eliminated, it is America who must lead the fight. Harry Chapin's work would not have been in vain.●

● Mr. AuCOIN. Mr. Speaker. I owe a large debt of gratitude to Harry Chapin. He was a wonderful friend of mine whom I will never forget. I met Harry 4 years ago when each of us was honored by the U.S. Jaycees as 1 of 10 outstanding young men of America; it was there that we first talked about his work in the field of world hunger. He intrigued me because he was a talented, successful songwriter who used his position to further humanitarian causes.

Why was he honored by the Jaycees? He made two substantial achievements in his life. While he rose to the top of his profession as a singer, he was committed to solving the problems of world hunger, working unceasingly toward that end.

Armed with the conviction that freedom from hunger is a basic human right, Harry organized World Hunger

Year. He felt that our nations contain sufficient food available to feed everyone and that world hunger can and must be eliminated. Harry wanted to secure and organize public consensus on these beliefs and to promote public and private policies to reflect it. This was not enough; he went on to start the Food Policy Center, which is the legislative arm of World Hunger Year.

Harry was also very active on the Presidential Commission on World Hunger. He helped get the Commission created and then helped develop the Commission's report as one of its best members. That report recommended that the United States make the elimination of hunger the primary focus of its relationships with developing countries, beginning in this decade.

Mr. Speaker, not only did Harry commit much of his time to solving the problems of world hunger, he was unselfish in other ways, donating much of his own income to a wide variety of charitable causes. Half of the concerts Harry gave over the last several years were benefits for these causes.

His songs illustrate his strong commitment to the importance of the individual and to the precious, yet fragile, nature of human relationships. Harry Chapin cared about relationships and devoted his efforts to making others care.

Harry's concerns for children and the quality of life led him to encourage support for education and the arts. In his recent appearance before the arts caucus he sang a powerful tale about the importance of a culturally enriched education, encouraging the creative and generous potential in children to grow. His ballad warned of restraining artistic endeavor and then he said:

> We must not let this happen. Americans are—and should always remain—people who see all the colors of the rainbow.

Harry Chapin was electric energy, and he always gave his energy to a basic idea—that the only way to lead a fulfilling personal life is to do something to help fulfill other lives, by easing pain, relieving suffering, and fighting injustice. There is no doubt he succeeded.●

● Mr. REUSS. Mr. Speaker, Harry Chapin, whose life ended tragically on July 16, was a singer and songwriter of tremendous talent and virtuosity. His most successful and memorable songs concerned the victims of broken dreams—people whose lives were suddenly stripped of self-delusion. Who can ever forget Chapin's haunting depiction of a world-weary taxi driver whose drug-induced "trips" replace the realized fantasies of his youth, of an aging disc jockey seeking refuge from pain and disappointment by mindlessly spinning records on his morning radio show, or of a lonely older man abandoned by his son, much as the growing boy had been neglected by his self-absorbed father.

In contrast with the unhappy, unfulfilled lives of those described in his songs, Harry Chapin's life was one of remarkable achievement. In addition to his musical talent, which entertained millions, Chapin directed his tireless efforts toward eradicating world hunger and malnutrition. Through thousands of benefit concerts, and through his seminal role in establishing the Presidential Commission on World Hunger, Harry Chapin made a difference. Without Harry, the fight against world hunger will be even more difficult. We are fortunate, however, to have his example to inspire us as we continue that struggle.●

● Mr. ADDABBO. Mr. Speaker, it is indeed with great saddness that I take this opportunity to join my distinguished colleagues in the House of Representatives today in paying tribute to songwriter and performer Harry Chapin, an energetic New Yorker, spirited American, and compassionate human being who died tragically last week in an automobile accident at the far too early age of 38. I am sure I speak for many present today and his countless friends and admirers across this country when I say this multitalented, selfless man will be missed and his music and ideas will never be forgotten.

Harry Chapin died on the way to giving a free concert on Long Island, very appropriate for a man who thought so much of others and of their interest and appreciation in music. He wrote for and sang to, the common man and woman of this Nation. His relaxing, amusing, and thought provoking songs were very often about people we have known in our own lives, though not necessarily by name. His descriptive lyrics enabled us to clearly picture in our minds the factory worker, child, or former lover which had once been a part, though, sometimes painful part of our lives.

Harry loved this great expanse of land of ours, particularly the small towns and cities which extend from coast to coast and border to border and he drew much of his inspiration for his songs from them. But there was much more to Harry Chapin than his music. There was a Harry Chapin who believed that the problem of hunger and starvation was everyone's problem and that we all could play a part in eradicating it. With this in mind, and through the help of such fine colleagues as BEN GILMAN and TOM DOWNEY, he helped establish the Presidential Commission on World Hunger, a body in which he played an integral role in helping spread the word about the urgency of the problem.

When Harry was not fighting to end world hunger, and when he was not busy giving free concerts, or supporting candidates, much of his time was spent on behalf of the arts of this country and he worked long hours to help such groups as the Long Island Performing Arts Foundation, the Eglevsky Ballet, the Long Island Philharmonic, and among others, the Congressional Arts Caucus.

Harry Chapin leaves behind a legacy of gold records, Tony and Academy Award nominations, and friends who loved him and his music. To his wife and family who mourn his passing, they surely must be comforted in the knowledge that he touched so many people for so many good causes.●

● Mr. DELLUMS. Mr. Speaker, I join my colleagues in taking this time to pay tribute to a special human being that has been suddenly taken from us.

We have lost three great humanitarians this year, all of whom were poets and singers. After the deaths of John Lennon and Bob Marley, the loss of Harry Chapin is especially saddening.

Harry Chapin was one of a very few. He was a particularly honest and committed activist, who lived a life that directly reflected his beliefs. While others around him were able to climb to success and fame, so did Harry Chapin. But Mr. Chapin was moved by more than the need to attain those goals. He wanted to make a greater difference in this world, and by his totally unselfish dedication to the cause of alleviating the suffering caused by hunger, both here and around the world, Harry Chapin attained this higher goal.

That such a person was in our midst, is an inspiration. That such a person delivered so much happiness and shared with us his keen insight and sense of humor, is to the benefit of all of us. That we might all learn from this selfless zeal for a cause that touches the very center of human existence, should be his legacy.

Mr. Speaker, I call on my colleagues, in the name of Harry Chapin, and especially on behalf of the millions of human beings who face and suffer starvation yearly, to renew their efforts on the urgent task of doing what this Nation can, should, and must do to alleviate this terrible global condition.●

● Mr. BARNES. Mr. Speaker, Harry Chapin was a very special person. In his music and in the way that he lived he taught us much about caring about the lives of others. As beautiful and thoughtful as his music was, however, Harry would certainly rather be remembered for what he tried to do for the hungry people of the world.

Over the years, at least half of Harry's concerts were for charity or as a benefit. I will never forget the cold, windy day at Montgomery College in Rockville last fall that Harry gave a benefit concert that I attended. The outside amphitheater was full of col-

lege students, who came to hear Harry sing, but who heard not just music but the kind of civics lecture that they would never listen to from a professor. Harry believed in all the cliches—the American way, democracy, the power vested in the vote by our political process—and he communicated it with a power and eloquence that would put any ordinary politician to shame.

But what Harry Chapin really believed in, and devoted his time, his energy and his money to, was the fight against world hunger. At every concert, in every conversation, at literally every opportunity, Harry told anyone who would listen, and, unfortunately, some that would not, that every year there was enough food produced to feed every person in the world with some left over * * * that it was a tragedy that people still starved to death * * * that it was imcomprehensible that children all over the world were going to bed hungry * * *

As Washington Post reporter Tony Kornheiser said in an eloquent tribute to Harry Chapin—

* * * he was a liberal in the very best, philosophical sense of the word. It wasn't welfare he was talking about, it was decency. He used the phrase "elightened self-interest." He said it made good sense to redistribute the food. Not because it was the noble thing to do, but because if you removed hunger and desperation you would remove a major cause of crime and violence. If there is such a thing as practical liberal, Harry Chapin was that.

In the words of one of his most beautiful and touching songs, I hope that Harry Chapin has found "A Better Place To Be." For those who remain behind, the best monument we can erect to his memory is a world free from hunger.

I would also like to insert into the CONGRESSIONAL RECORD the following statement which was issued by Mr. Jim Grant, executive director, UNICEF.

Harry Chapin was made of qualities rare in public life in any country. Few who succeed in their own right, or who enjoy the comfort and opportunties which he enjoyed, choose to give more from themselves than they keep for themselves. Harry Chapin did.

Those who had the privilege of working with him in the struggle to feed the world's hungry—and to help the hungry to feed and advance themselves—will not soon forget the energies and the talents which he devoted to bringing public attention to the causes which he embraced, nor the resources which he brought to bear—his own and those he raised—to benefit those causes.

It is terribly sad that so chance an accident would deny the world's most voiceless and powerless people the voice which Harry Chapin raised, and the power which Harry Chapin marshaled, in their behalf.

Those who worked with him will continue to work without him, but the effort will be far more difficult, and far less cheerful, without Harry Chapin singing a tale and leading the way.●

● Mr. BIAGGI. Mr. Speaker, it is with a deep sense of honor and sadness that I join my colleagues today in paying a richly deserved tribute to the late singer, songwriter, and crusader against world hunger—Harry Chapin.

Seldom is a man blessed with a talent as special as Harry Chapin—seldom are those select few as generous with that talent as Harry Chapin. As an accomplished musician, singer, and songwriter, Harry could have made millions at a very young age, content to perform at an occasional concert whenever it was convenient. Not Harry!

Instead, he performed more than 200 concerts per year, of which half were benefits—not for himself, but for those suffering from world hunger. Harry's tireless work did not stop when he put down his guitar. After a concert, Harry could often be found out in the crowd enlightening fans to his cause and helping to raise additional funds for the alleviation of world hunger. He often spend time between concerts here in Washington lobbying for such pet projects as World Hunger Year and a Presidential Commission on World Hunger, which now serve as a living testiment to Harry's dedication.

Harry died tragically in an automobile accident last Thursday in the prime of his life. Certainly, Harry would have given so much more if he had been given the time. But, as we reflect on Harry's life, we can only be thankful for the time he did have. His fans will always have his music, and those of us who will continue to help alleviate world hunger will always have Harry as our inspiration.●

Mr. HARKIN. Mr. Speaker, I wanted to take this time today to pay homage to a dear friend of ours who was untimely killed in a car wreck in New York on July 16.

Harry Chapin was, indeed, a friend to many of us who have worked in the House and in the Senate on the issue of world hunger.

Harry Chapin was a lovable guy with a very large concern for the poor and the hungry. It is a very sad day for us who knew Harry well, and we will miss the feelings that he generated in so many people. I send my sincere condolences to his family, who of course will feel his loss most vividly.

There likely would never have been a Presidential Commission on World Hunger if it had not been for Harry Chapin. He conceived the idea. He brought it to the House and to the Senate. He worked long and hard, did the legwork and the buttonholing to get Members to cosponsor it. He was here during all the time that the hearings were held in our subcommittees and committees, through the floor of the House and the Senate, and he was present at the signing of the bill by President Carter.

In establishing a Presidential Commission on World Hunger, Harry told me many times that he wanted to provide an opportunity for Americans to reflect on the issue of world hunger. He did not just want to set up a group of experts to set the guidelines. He envisioned representation from labor unions, from farmers, from food processors, and literally hundreds of people throughout the country representing all aspects of our society to be on the Commission.

Harry was never politically motivated in this vision. His concern was for the American people to reflect on and to act upon world hunger. He wanted it to be an ongoing enterprise. He had undying faith in Americans and he felt that they as a community would come up with humane conclusions about these issues.

As a member of the Presidential Commission on World Hunger, he was dedicated to the Commission's work. He attended every meeting and was always aggressively pursuing his line of analysis, which was intensely sympathetic to the plight of the poor in the developing countries.

The most striking thing about Harry Chapin, I think, was that he sacrificed himself, really heroically. Very few individuals actually follow through with such a personal commitment as Harry did with his concern for world hunger. Very few people understand the sacrifices that he gave. I understand that of the 325 most recent concerts that were given by Harry Chapin, over one-half of those concerts, the proceeds of those concerts went for charity, either directly for world hunger projects or for candidates supportive of world hunger concerns.

I might point out that Harry Chapin did concerts and raised money for political candidates, both Democrats and Republicans. Before ever doing a concert to raise money for a political candidate, he always wanted to know what that candidate's dedication and commitment was to eradicating world hunger. He was not here lobbying to get better tax relief for himself. He was not here lobbying in any way to make himself richer or to make members of his profession even richer. He only wanted to know what our commitment was to world hunger. He did not care if you were a Republican or a Democrat, what part of the country you came from, just as long as you would work on behalf of providing a forum for talking about the issues of hunger and food distribution.

In this morning's Washington Post there was an article written by Mr. Tony Kornheiser entitled "The Troubadour Who Laughed At Fame and Gave Away His Fortune."

In the body of the story there are these few sentences:

Harry Chapin could have been a millionaire.

Harry Chapin maybe should have been a millionaire.

But every year at least half of his concerts were free, either for charity or as a benefit.

He put his money where his mouth was.

All in all, Harry Chapin was a good and decent human being, a person who dedicated his life so that others may have a better life.

To close my remarks I would also read from the Washington Post this morning which ended by saying:

I remember me telling him that it was about time he stopped trying to save the world and started selling out so he could become a rock star.

And I remember exactly what he said about that. He said, "Being a rock star is pointless. It's garbage. It's the most self-indulgent thing I can think of. I've got nothing against selling out. But let me sell out for something that counts. Not so Harry Chapin can be No. 1 with a bullet, but so I can leave here thinking I mattered."

Harry Chapin left this world on July 16, and he did matter. He mattered to all of us who knew him. He mattered to countless millions of people around the world who never knew him and who will never know of him, but for whom he toiled. We must continue to strive for this goal that Harry Chapin and so many of us care deeply about.

Mr. Speaker, I include the following article:

[From the Rolling Stone, Apr. 6, 1978]

SINGING FOR THE WORLD'S SUPPER

(By Dave Marsh)

The morning of February 3rd, singer/songwriter Harry Chapin flew to Washington, D.C. from Ontario. He'd just done a concert and, having slept on the plane, arrived with barely enough time to change into what he calls his "lobbying suit," a three-piece number that's a lot calmer than he usually acts while wearing it. He left his street clothes, and his wallet, in Senator Pat Leahy's office and got into Senator Dick Clark's car to drive to their meeting with Jimmy Carter. When they got to the White House gates, Clark and Leahy were asked for their identification. Harry realized that he had none and the congressmen started to make excuses, but the guards just waved the car on. "Oh, that's Chapin," they said, "We know him."

A few minutes later, Harry Chapin found himself in the vice-president's seat in the Cabinet Room of the White House, directly across from Jimmy Carter. An ideological mélange of heavyweight congressmen flanked them, from liberal Democrats like Senator George McGovern and Leahy, to conservative Republicans like Senator Robert Dole and Representative Ben Gilman. All of them were present to hear Carter's verdict on a point congressional resolution calling for the establishment of a Presidential Commission on Domestic and International Hunger and Malnutrition.

Harry Chapin has known more glamorous and highly publicized moments since his first hit, "Taxi," in 1972. But this was probably the apex of his offstage career. The hunger commission was his project, Chapin had spent four months badgering it through Congress, where it passed both houses by overwhelming margins: unanimous in the Senate, 368–34 in the House, Chapin's lobbying campaign had been a populist dream; everyone from Carter's adviser on the hunger issue, Dr. Peter Bourne, to consumer activist Ralph Nader called it the most impressive lobbying effort by an outsider they had ever seen.

As the meeting began, Representative Rick Nolan spoke briefly of the genesis of the measure, then turned the floor over to Chapin. Always voluble, the singer was hardly intimidated by the company. A natural performer, he is at his best when speechifying: his hoarse voice rises to unseemly levels, the words come fast and abruptly, in a flow so thick there's little chance of an interruption. His catch phrase this morning was Carter's campaign slogan, "A government as good as its people," of which Chapin thought the hunger program a natural extension. He spoke for about five minutes.

"If this is the kind of energy that was brought to this resolution," Carter said when Chapin was finished, "I can understand why it's reached by desk." Remembering the gatehouse scene, Leahy added, "Yes, he's even infiltrated the White House."

"It's gotten so bad," Carter concluded, "that even Amy is asking me what I'm going to do about world hunger." And then, in a voice so low his audience couldn't be sure they'd heard him right, "I think it's a good idea."

Chapin had pulled it off.

Hunger has been Harry Chapin's prime extramusical concern since 1973. Chapin and a friend, Father Bill Ayres, a Catholic priest from Long Island who does a national rock and religion show for the ABC network, saw the hunger issue as a natural political and charitable outlet for Chapin. At the time, a major drought in the southern Saharan (Sahelian) region of North Africa was causing mass starvation, "You should do another Bangladesh to benefit Sahelian relief," Ayres had told Chapin. "I'm not exactly George Harrison," Chapin replied.

Eventually Chapin was convinced and he and Ayres approached the United Nations with the benefit idea. John Scali, the U.S. Ambassador to the U.N., agreed to cooperate if Ayres and Chapin would accept Michael Viner, who'd organized the entertainment for Nixon's second inaugural, as overseer. Even with a promise of support from Bill Graham the benefit never attracted sufficient talent to come off.

After the benefit fell through, Ayres and Chapin reassessed their view of the hunger issue as a matter for charity. Their new analysis was that the root of the world hunger problem had been misidentified. Overpopulation and scarcity of food and land weren't the causes of hunger; the solution wasn't to be found in increased charity from rich nations or more exports from poor ones. Nor was the answer greater technology on ever larger farms. The only long-range answer was self-reliance and redistribution of resources: in short, land reform, wealth reform or economic revolution, which threaten dictatorships, obligarchies and multinational corporations—all concentrations of wealth—equally.

Chapin can now explain why this analysis is correct at great length—for hours if necessary. Statistics pour out of him like some windup computer:

There are 500 million malnourished people in the world, 20 million in the U.S. alone.

Malnutrition is a significant factor in up to fifty percent of the world's mentally retarded.

A large amount of American pet food is sold to senior citizens.

Of the money allocated through the U.S. Food for Peace program in the last year of the Nixon administration, ten percent subsidized tobacco. Fifty percent went to Cambodia and South Vietnam, where no one is certain what become of it, in the Sahelian situation, as relief food was entering from African docks, most of the region's agricultural crops were being exported.

The problem is so vast, Chapin finishes with a flourish, that if he were able to raise $750 million for benefits, that would be enough to give every starving person $1.50 per year.

Chapin now says that the Sahelian benefit idea was an example of "event psychosis," the idea that a major event will mystically solve problems through good will. He is, he insists, "committed to the process. I'm in for the long run." There can be little doubt of that. Chapin has consistently been a socially conscious songwriter; his hits, "Cat's in the Cradle," "Taxi" and the rest are fables, miniature sermons ("And I'll tell you why Baby's crying,/'Cause she's dying, aren't we all?" he says in "Taxi"). Always didactic, always rigorously and righteously moral.

Through the winter of 1973–74 Ayres and Chapin studied the hunger problem and how to combat it effectively. Their conclusion was that they needed an organization; a series of meetings begun in March 1974 resulted in the formation, one year later, of World Hunger Year (WHY). (The answer to the obvious question is: every year.) WHY is a nonprofit educational group. It is funded mostly by the sixty-odd benefits Chapin does every year, which raise about $500,000. WHY uses those funds for smaller, less dramatic events than Bangladesh, but they're more effective: teach-ins at high schools and universities, small benefits (500 seats) where Chapin can rap with the audience before, during and after the show.

On Thanksgiving Day 1975, Chapin and Ayres took over New York's WNEW-FM for a twenty-four-hour, commercial-free special devoted to the hunger issue. The Hungerthon offered celebrities, politicians and experts ranging from Ralph Nader and Ramsey Clark to Joan Baez, Patti Smith and Roger McGuinn. It was sufficiently successful to earn another on Thanksgiving 1976, and other Hungerthons at rock stations in Detroit, Washington, Los Angeles, Dallas and San Francisco.

But the giant step for Chapin's hunger campaign came after a meeting last spring when his wife Sandy looked at him and said "What you guys need is a presidential commission." At first, Chapin was skeptical. Most presidential commissions have been study groups which file a report and are then forgotten. "But it finally looked like our best alternative," he said, and so he convinced Representative Tom Downey, a Long Island Democrat for whom Chapin had campaigned, to introduce him to members of the House and Senate agriculture committees.

Initially that meant Rick Nolan and Pat Leahy, both young, liberal Democrats with a history if skepticism about the way U.S. food aid programs have been run. Both men call Chapin the prime mover in organizing the congressional drive for a resolution calling for the establishment of such a commission by the president. Leahy's involvement

was especially surprising, since he is the author of a well-known study attacking the efficiency of such commissions.

Everyone agreed that a simple, study group would be effective, so the hunger commission's first year would be spent assessing all available information on what is being done, what could be done and the nature and extent of the problem. The second year, however, would be devoted to public education and assistance in implementing measures the commission recommends. It was an excellent strategy, if it could get through Congress.

Nolan and Leahy gave Chapin lists of key congressmen. He began spending several days a week in Washington, often flying in from other parts of the country after doing concerts, sleeping on the plane and rushing off to the Capitol, where he dragged congressmen out of men's rooms and committee meetings, chewing their ears off with his passion. "I wouldn't say he took Congress by storm," Nolan laughs, "but he did move Congress at a pace similar to the pace and fury of a storm."

By rule, only twenty-five congressmen may cosponsor a bill in the House. "So we introduced bill after bill," Chapin says. 'No one had ever seen so many bills." In the end, there were fifty-six sponsors of the resolution in the Senate, 268 in the House; that is to say, a majority of both. It was an impressive display of politicking, particularly for an amateur.

"I've never seen an example of an entertainer who dedicated so many hours or so much imagination to a civic cause," says Ralph Nader, summing up the feeling of many Washington insiders. "A lot of them go to soirees, a lot of them give lip service, but the duration of Harry's commitment is unprecedented. Congress has seen a lot of guys come here for certain causes, but after a few days or a few hours, they're gone. Harry's committed to this issue on a permanent basis."

Nader also point out that Chapin's effectiveness, at a time when his career is also growing (in concert revenues, if not record sales), contradicts "the usual belief that if a singer gets too involved in causes, his career will suffer." Nevertheless, Chapin is convinced that the music industry—not to mention the music press, with whom his relationship has always been less than pleasant—dislikes him. Because he tends to sermonize, this is at least partly true. But Chapin does only about fifty or sixty benefits a year, less than a third of his concert scheduled. And he lives well, though not as ostentatiously as most rock stars.

Last year Harry Chapin finally got his version of Bangladesh, with a benefit concert in Detroit that featured James Taylor, John Denver and Gordon Lightfoot. Taylor and Lightfoot had needed much persuasion. Denver had two links: he and Chapin are both managed by Jerry Weintraub's Management Three organization, and Denver is a follower of est's Werner Erhard, who proposes to solve the hunger problem with his quasi-religious cult. (Mostly, it seems, through a mixture of good vibes and charity, precisely, the solutions that have been tried and failed for centuries.)

The money from that concert, however, went not to WHY but to the Center for Action on Hunger and Food Policy, a lobbying group with a small but full-time Washington staff. Previously, Chapin's role in Washington had been hit or miss; working with the center, he feels he might be even more effective.

One of the first issues that confronts the center is the composition of the commission, which will be appointed by Carter. According to a variety of sources, three names on the administration's first list of potential nominees were John D., David and Nelson Rockefeller. Their presence—one possibly as chairman—would make a travesty of Chapin's effort, since the Rockefellers already have a considerable stake in the nation's Food for Peace, AID and Green Revolution policies, all of which have been ineffective in terms of WHY's analysis.

"If that happened," Nolan told me later, "I would probably introduce a bill calling for the commission to be disbanded. Those names have simply come to symbolize excessive multinational power to too many people. It would tarnish the commission's credibility." Carter's chief hunger adviser, Dr. Peter Bourne, later told me that all lists so far had been assembled "off the tops of people's heads," although he didn't deny that the Rockefellers were prominent among them.

No matter who becomes chairman of the commission, however, one of its members is almost certain to be Harry Chapin. In which case, it is going to be awfully difficult to sweep things under the rug.

Mr. GILMAN. Mr. Speaker, I yield back the balance of my time.

□ 1830

THE TAX BILL AND THE BUDGET PROCESS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Georgia (Mr. GINGRICH) is recognized for 60 minutes.

Mr. GINGRICH. Mr. Speaker, I wish to speak this evening and in coming evenings on the tax bill and the process by which this Congress is attempting to develop a unique game plan. I want to talk about this because I think that the many people who now watch the House of Representatives in session and the many people who read about our sessions deserve a chance to look in context at what is happening.

Things change rapidly here. With each passing headline, we have different offers, different bills, and different amendments. There are a variety of bids made for support as the liberal Democratic leadership attempts to retain control, and it is often a little difficult to determine who is doing what.

Basically, what has happened is that there has been a change of philosophy in who dominates the country and who is attempting to govern. In the most fundamental way since the New Deal, we are now in an era when the Government is in transition from a way of doing business, a way of taxing, and a way of administering—the one that was once dominant—to a new method, a new approach, and a new technique.

What happened in the 1970's was that not only did the liberal ideology run out of steam but the people running the Government collectively became so unable to make decisions and so unable to balance their behavior as it related to the country at large that the sheer cost of maintaining their system overwhelmed the public. Taxes, for example, went up 249 percent in the 1970's. At every turn, whether it was social security or income tax, the cost of being governed increased. The amount of money left in your pocket and in my pocket declined. Inflation and taxes raced each other to see which would cause the most harm to the American people. With each passing cycle of bureaucracy and redtape and waste, the need for money increased, and a system had been introduced which guaranteed that as inflation increased, your cost-of-living raise would be pushed into a higher and higher bracket so that in the end just trying to keep up with inflation became expensive. In the end, getting a cost-of-living raise meant you actually fell behind the cost of living because you ended up in a higher tax bracket, and for many Americans getting a pay raise meant getting a pay cut because the Government took out more as you entered a new bracket when you had received a raise from your employer.

What was at stake was your job, your pocketbook, and your family's hope. By 1980 working Americans found their factories less and less competitive, their jobs in danger, their incomes decaying, and their future more difficult. Working Americans looking ahead feared for their country, and for the first time in many years vast numbers of Americans told public opinion pollsters that they felt gloomy about America's future.

The results in 1980 were that your will and your vote changed the way we have been doing business. In 44 States, Ronald Reagan received the electoral votes. The Senate for the first time in a quarter century went Republican. The House had a gain in Republican seats and an increase in conservative Democratic seats, with the result that a potential conservative Democratic-Republican coalition became possible for the first time in 20 years.

The liberal Democratic leadership was in disarray after the election. It had lost the White House, it had lost the Senate, and it had only shaky control of the House. In a series of maneuvers, the leadership granted seats to the conservatives on the Budget Committee, the Ways and Means Committee, and on the Democratic Steering Committee. It zigged and zagged, it appeased, it mediated, and it calmed down the surge so that in January it retained the control of the House.

This liberal Democratic leadership realized early that it could not win strategically. It could not explain clearly what was going on, because in fact the country had repudiated it. The country did not want more red-

tape, big bureaucracy, and big taxation. Nor could it even be appealing to the grass roots because it had lost the grass roots. The working Americans wanted change; they did not want the same old thing.

The only hope left for the liberal Democratic leadership was to attempt to win tactically by rigging the game, and by fighting the fight inside the House itself by maneuvering, by stacking the calendar, and by doing everything possible so that there never would be a fair vote and never a clear choice and so that in the murk and the confusion it could wriggle its way to victory.

It began this process in the opening days by stacking the Rules Committee and the Ways and Means Committee, two of the most important committees in the House. The Rules Committee is a sort of traffic cop in this body. It decides what will come to the floor and under what conditions. That committee was stacked two to one to assure that the liberal Democrats would retain control.

The Ways and Means Committee was clearly going to be the most important policymaking committee in terms of President Reagan's economic program. The Ways and Means Committee was going to play a vital role in setting the stage for a healthy America. The Republicans had gotten 49 percent of the vote in the country in competitive races. Forty-four percent of the new House was Republican, but 33 percent of the Ways and Means Committee would be Republican. It was clearly stacked, clearly designed to break the people's will and clearly designed to hold hostage the President's economic game plan.

Yet even those efforts to rig the game failed when the first budget maneuvering in the House lost, with President Reagan's emotional appeal to the country. And we all remember well that when he came to this House, he stood in front of the Speaker and he gave an eloquent and brilliant address explaining why he needed our help to fight inflation, to create jobs, and to create a prosperous America once again.

Having lost the first budget fight, in a second desperate bid for power the liberal Democratic leadership rigged the game even tighter during the reconciliation fight. Unable to win in any kind of straightforward, clear, open fight, the Rules Committee recessed on the Wednesday of the reconciliation fight until 7 p.m., to meet after dinner to decide at the last possible minute what rules the House should use in dealing with the President's reconciliation package, and they decided to come back the next morning to vote.

Imagine the audacity, to say with a straight face, "Yes, we are going to have a reasonable process. However, we are only going to rig the rules after we have gone to dinner and most of the Members have gone home. We are not going to tell you what the rules will be until the next morning, and when you come back, we are going to draft it so you can't possibly win, and we are going to do it at the last possible minute, just before we leave for the 4th of July recess, because we want to build a liberal railroad and put a liberal train on it."

Unfortunately for the Democratic liberal leadership, that train was derailed. By the slimmest of margins, the conservative Democrats and the Republicans, in a bipartisan effort to build a prosperous America, defeated the leadership on the rule and created a rule that was more open and fair to the will of the American people. They changed that rule when we came back so there could be a clear vote between the people's will and the leadership that was fighting to preserve the liberal American way.

The result was that the very liberal leaders who had set up the rules of the game, who had done all they could to stack the committees, who had set it up for the last possible minute, and who had recessed until 7 p.m. the night before, had now lost, because the wrong train was on the tracks; there was a conservative tax-cutting and budget-cutting train coming down the track. They now claimed that it was not fair.

Not satisfied with doing that on Wednesday and Thursday morning, the liberal Democrats then intercepted the Republican reconciliation bill on Thursday evening before it got to the printer, looked it over, and further delayed the events of that Friday morning so their leaders could then complain about the bill which had been held up by the liberal Democratic Members.

Yet with all the different shenanigans, all the different efforts to rig the game, and all the different efforts to fight inside this House on the most possible confusing ground, the liberal Democratic leadership still lost eight conservative votes on procedure and substance.

For those of you who wonder how important your Congressman's vote is or how important your letter or mailgram or your telephone call is, the biggest margin was 217 to 211. Three Members changing their votes would have changed everything.

Thus with the American people, President Reagan, and the bipartisan conservative Democratic-Republican group winning temporary control over the House for a brief period, we had passed a reconciliation bill that genuinely moved toward cutting Federal spending and toward a more decentralized way of government.

□ 1840

But over the Fourth of July recess the liberal Democratic leadership had to reassess its position. They decided to go all out on the tax bill in a desperate effort to dominate the House and rebuild their majority. They decided that no cost was too great.

Originally, the tax debate had been a debate between two philosophies, two intellectual approaches to solving the problems of the American economy. One approach, the one we followed for the seventies, basically, accepted the notion that the cost-of-living increases would put you in a higher bracket, would take money out of your pocket, and that in Washington that money would be spent for you. That is traditional liberalism.

The other approach which was more popular in the late seventies and advocated by President Reagan said we ought to give you tax cuts that balanced off the tax increases. We ought to somehow leave the money in your pocket so that you spend it instead of Washington spending it.

That is a clear-cut coherent sense of two ways of solving problems.

That debate has collapsed into a tawdry game of maneuver and bargain. Just do not listen to me and believe me. Let me read you two quotes from the majority leader, the gentleman from Texas, one of the leaders of the liberal Democrats in this body.

> It is call them and raise them. It is like a poker game. It is what they did to us first and now we are trying to frankly do it to them.

Let me repeat the first two sentences:

> It is call them and raise them. It is like a poker game.

On one particular amendment to the tax bill, again I quote the majority leader, "I have never seen a deal so slippery." But he is not alone. He is not out there trying by himself.

The gentleman from Oklahoma, the leader of the Budget Committee, "There is a bidding war underway," or "This is a rather unusual way of marking up tax bills. Nothing is precluded. These are unusual times."

When citizens hear about bidding wars, poker games, slippery deals, from their national leaders, is it any wonder the Tax Code is in more and more disrespect, the people are more and more willing to cheat, that there is general belief that somehow the big boys always get theirs.

What we have seen is a debate over the economic future of America, over fighting inflation and creating jobs, degenerate into a slippery, messy, confusing, complicated, and I think in a number of ways demeaning process that resembles mud wrestling far more than legislating.

It is an effort to see how you can end up on top in the narrowest and

meanest sense. The truth is that any liberal philosophy is now dead in this tax debate, that step by step, week by week, the chairman of the Ways and Means Committee, a leading liberal Democrat from Illinois, has moved closer and closer to President Reagan's position.

At first we did not want a 2-year bill, if you were a liberal. Then you did not want a 2-year bill with anything added on. Now we will take a 3-year bill if there is a trigger. No understanding of the economic philosophy underlying President Reagan's program, no understanding of the concept of hope built into a permanent 3-year bill; no appreciation of the need for a coherent planned team work effort to solve our economic problems.

Just nibble, nibble, nibble, slowly working toward the closest possible mirror image.

The truth is, the liberal Democratic bill that will be reported out this week is a hodgepodge, a political device, a document that is filled with a goodie here, a goodie there, a commitment here, a commitment there, but it has no relationship to the long planned carefully thought out efforts that President Reagan offered this country to genuinely change the economy.

If all that was at stake was who would get to get a chauffeured limousine and who got to be called majority leader or minority leader, it would not matter, it would be a game played by politicians in a strange city that was of little import for most Americans.

However, in a free society, that is never at stake. What matters, what is at stake, is the future of this country, the way we govern ourselves, what happens to our economy, to our jobs, to our take-home pay, to our children's future.

What is at stake on the liberal Democratic side is raw power. One last desperate surge to try to find a way to knit together a coalition that can somehow keep them in charge.

What is at stake on the Republican and conservative Democratic side is a serious rough intellectually coherent effort to rebuild the American economy, to create jobs, to cut taxes, to increase take-home pay and fight inflation.

On our side, you have a bipartisan effort, Republicans and Democrats joining together to change the way we have been doing things to get us healthy then. On the other side you have desperate maneuvering to ward off the flood of popular feeling.

Your interest in the next 10 days will be vital. Your concern for what happens in this building, in this room, is critical. Your Congressman or Congresswoman may be the one vote margin of difference. Your telegram, your letter, your phone call, may make all the difference.

If you want your children to have a chance at a job, if you want better take-home pay, if you want to rebuild the American economy so we can afford to support social security, if you want to bring down high interest rates with a new game plan that will work, you need to pay attention and to stay in touch during the coming 10 days.

SEVENTH YEAR OF TURKISH OCCUPATION OF CYPRUS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania (Mr. YATRON) is recognized for 30 minutes.

GENERAL LEAVE

Mr. YATRON. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of my special order.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. YATRON. Mr. Speaker, yesterday, July 20, marked the seventh year of the Turkish occupation of Cyprus. Turkish forces invaded the island Republic in 1974 and continue to control 40 percent of the land.

The people of Cyprus, 80 percent of whom are of Greek heritage and 18 percent Turkish, are forced to endure the hardships caused by this aggression. Although the Cypriots gained independence from Great Britain in 1960, they have had little chance as an occupied nation to exercise their basic right to self-determination.

The situation posed by the Turkish occupation is both tragic and intolerable. An eighth year of foreign intervention must not be allowed to pass.

Tragedy in Cyprus lies in the denial of fundamental human rights to the native peoples. In the wake of the invasion, 200,000 Greek Cypriots were forced from their homes, their property and belongings were confiscated. they remain refugees 7 years later. Also, 2,000 Greek Cypriots have been missing since the invasion.

Both domestic and international consequences of the occupation make it intolerable. For Cyprus, economic pressures weigh heavily. Turkey now controls 70 percent of the island's former productive capacity, forcing the legitimate government of the Republic to struggle under curtailed conditions. In addition, the government must integrate the refugees displaced by Turkey into its fragile system. Extra housing, schools, and hospitals must be provided.

As deplorable as conditions are, within the sovereign Cypriot State, the significance of the problem transcends national borders. By the nature of its strategic location, Cyprus commands international attention. The tumultuous Middle Eastern countries of Iran and Iraq lie a few hundred miles to the east. Europe and Africa are close to the north and south. Nearby Turkey shares borders with the Soviet Union.

The effects of the Cyprus problem reach as far as the United States. Greece and Turkey, our NATO allies, clash over the issue of Cyprus, yet their close cooperation is absolutely essential in safeguarding the NATO alliance.

The United Nations has been unyielding in their attempts to resolve the situation and is sponsoring intercommunal talks between the Greek and Turkish Cypriots. The recent formation of a committee to trace the missing Cypriots gives hope that negotiations, though often stalemated in the past, will begin to show some progress.

Unfortunately, negotiations have progressed slowly. The problem of Cyprus is too important and far-reaching to warrant low-key approaches. Pressure should be brought on Turkey to reassess the wisdom of its costly occupation of Cyprus.

Mr. Speaker, Cyprus is one of the few places in the world where most of its inhabitants are refugees in their own homeland. The reconstruction efforts of the Cypriot Government have produced positive results but without the assistance of the United States or the United Nations High Commissioner for refugees, progress would cease.

The time to act is now. New initiatives must be sought and implemented. The United States and its allies need a truly united front on the southeastern flank of NATO and the seemingly endless suffering of the Cypriot people must come to an end.

Mr. Speaker, at this point I would like to yield to my colleague from Michigan (Mr. BROOMFIELD).

Mr. BROOMFIELD. I thank the gentleman for yielding.

Mr. Speaker, July 20, 1981, marks the 7th year of Turkish occupation of Cyprus. Despite repeated attempts to resolve the situation in a manner acceptable to all parties concerned, Turkish troops still control approximately 40 percent of Cyprus. I am sincerely disappointed that a solution to this problem has not been found. As long as this dilemma persists, the people of Cyprus are denied full self-determination. Equally important is the effect such occupation has on NATO solidarity and the protection of NATO's southern flank.

In early 1975, the United States imposed an embargo on arms sales to Turkey as a result of their military intervention in Cyprus and Turkey's continued intransigence regarding withdrawal of their troops from Cyprus. This embargo was a painful act for the United States. Not only

had Turkey been a loyal NATO member since 1952, but it had received bilateral military and economic aid from the United States since 1947. Nevertheless, it was felt that the Turkish violation of the U.S. arms sales agreement, coupled with the severity of an intra-NATO conflict, left the United States with no option but to take stern action against Turkey. In the fall of 1978 the embargo was lifted, based on expectations that such action would enhance the prospects for a settlement on Cyprus. Regrettably, progress since then has been negligible.

I believe that the United States must continue to press Turkey for removal of their troops from Cyprus as a basic first step toward settling the issues of Cypriot unification and self-determination.

Equally important is the need to reestablish NATO's superiority on its southern flank. The decade of the seventies has witnessed a dramatic growth in Soviet naval forces in the Mediterranean. This growth, if left unchecked, will pose not only a direct threat to NATO proper, but will threaten the Middle East and endanger the West's vital oil lifeline. It is, therefore, essential that NATO have the full cooperation of Greece and Turkey if we are to deter Soviet exploitation of this area.

I join my colleagues in calling for a lasting peace in Cyprus and encourage the President to place this matter high on his agenda.

Mr. YATRON. I thank the gentleman from Michigan for his insight into a very critical issue.

Mr. Speaker, I would like to yield to my colleague from Maine (Mrs. SNOWE).

Mrs. SNOWE. I thank the gentleman for yielding.

Mr. Speaker, I want to thank my distinguished colleague Mr. YATRON for taking this special order to bring this important issue to the attention of this Congress and the American people.

Today marks the 7th anniversary of the Turkish invasion of Cyprus. For the past 7 years Turkey has remained in control of 40 percent of Cyprus' territory, and has stubbornly refused to withdraw its troops despite the directives of numerous U.N. resolutions. This is an intolerable situation and cannot continue. President Reagan recently indicated that a just, fair, and lasting resolution to the problems of Cyprus will remain a priority for his administration. But he also warned that the opportunity for a just and lasting settlement will not remain indefinitely. The stalling must end and real negotiations begin.

United Nations sponsored talks, supported by all parties concerned, have been going on for some time. The U.N. resolutions and the May 19th agreement between President Kyprianou and Turkish Cypriot leader Denktash provide the framework for an agreement, yet no agreement has been reached. The Turkish side has not permitted Greek Cypriot refugees to return to the Famagusta region as they promised in 1978, and it has yet to present concrete territorial proposals. It is no wonder that progress has been so slow in the face of such Turkish intransigence. I hope that this administration will convince the Turkish side of the error of their ways so that there can finally be a just, fair, and long lasting solution to this problem.

We have to remember that the Turkish invasion of Cyprus in the summer of 1974 created humanitarian and economic chaos on a grand scale. More than one-third of the Cypriot population (200,000 people) was driven from their homes, deprived of all their possessions, and reduced to the status of refugees. More than 2,000 people, including 8 American citizens, have been missing since 1974. The invading Turks seized 40 percent of the landmass of Cyprus, representing 70 percent of the economic wealth of the country.

The major humanitarian problems continue to be housing and health needs. The 200,000 refugees represent a backlog of 50,000 households, and as of 1981 only half this need has been met. The Government is continuing its three part program of low-cost housing, self-help housing, and restoration to eliminate this shortfall. Adequate medical treatment is still a problem because two of the six public general hospitals lie in the Turkish sector. Consequently, construction began in 1980 on a 225-bed general hospital in Larnaca.

The economic dislocation of the 1974 invasion was also devastating; let me mention a few examples. The only airport on the island, Nicosia International, became inaccessible as a result of the invasion. The largest port on the island, Famagusta, was seized by the Turks. Telecommunications facilities and important road arteries were cut off. Most of the existing tourist establishments, a full 72 percent, lie in the Turkish-occupied area as well as much of the mining, quarrying, manufacturing, and agricultural capacity. A new airport was quickly built at Larnaca, and many smaller seaports have been enlarged and improved to make up for the loss of Famagusta. Overall, the Cypriots have made major strides in reactivating and revitalizing their economy, but there is still much to be done.

The United States has given generously in the form of humanitarian assistance to Cyprus, and I hope we will continue to do so. However, we need to be more generous with our powers of persuasion, to convince Turkey that the current stalemate is unacceptable and hurts all parties involved.

Mr. YATRON. I thank the gentlewoman for her comments.

Mr. Speaker, at this time, I would like to yield to the gentleman from New York (Mr. GILMAN).

Mr. GILMAN. I thank the gentleman for yielding.

Mr. Speaker, this week marks the 7th anniversary of the Turkish invasion into Cyprus and I want to thank my distinguished colleague from Pennsylvania (Mr. YATRON) for arranging this time for us to renew our commitment to seeking a peaceful solution to this conflict between our two allies, Greece and Turkey.

Despite many attempts made by the United States as well as the United Nations to resolve this dangerous situation over the past 7 years, very few substantive changes have taken place. As my colleagues are well aware, the situation in Cyprus is an extremely volitile one; one which threatens the stability of a vital portion of the NATO alliance. It remains clear that a quick and peaceful settlement of this struggle should be a major priority in American foreign policy objectives.

Events during the past year offer a glimmer of hope that a settlement to the conflict may eventually be reached. Internal changes in the Governments of both Greece and Turkey have produced an atmosphere in which both parties seem to be more inclined toward earnest negotiations than in previous years. For the first time in 7 years, talks between the two nations concerning Cyprus in recent months have taken place regularly, and a committee has been established to initiate investigations into the many cases of Greek Cypriots who have been missing since 1974.

While these signs are certainly encouraging, we must remind ourselves of the intolerable state of affairs which continues to exist today in Cyprus. Turkish forces still occupy approximately 40 percent of the island, on which they maintain between 20,000 to 30,000 troops. Also, the Government of Turkey has made a blatant attempt to alter the social and cultural fabric of the Cypriots by exporting an estimated 60,000 of its own citizens to the small island. Finally, we must not forget the more than 200,000 Greek Cypriots who were forced to leave their homes and farms, nor may we ignore the many widespread reports of torture and other atrocities suffered at the hands of Turkish soldiers.

I was a supporter of the arms embargo imposed on Turkey following the invasion by its forces into Cyprus in 1974. Over my objections, the Congress, in 1978, supported the lifting of that embargo in an attempt to produce the desired effect of inducing

Turkey into abandoning its occupation of the island. I remind my colleagues that one of the provisions included in the lifting of that embargo was the condition that the Turkish Government work toward a speedy solution to the conflict in Cyprus, a condition which our Turkish allies have not fulfilled.

In light of the recent progress made toward an eventual solution to the conflict, I feel that the time is ripe on this seventh anniversary of the invasion for our Nation to magnify our efforts to hasten the settlement. Our Nation should exert all of its influence in calling for a complete and speedy withdrawal of Turkish forces from Cyprus. By promoting a solution to the problem which is fair to Greek and Turkish Cypriots alike, we can further the cause of human rights, while at the same time we can strengthen our own position in this area of vital strategic importance.

Our Nation's deep-rooted belief in the intrinsic right of every nation to govern itself requires us to do as much as we can to encourage our allies to intensify their efforts to quickly resolve their differences in this matter.

□ 1850

Mr. YATRON. I thank my good friend, the gentleman from New York, for his contribution.

Mr. Speaker, at this time I yield to my colleague, the gentleman from California (Mr. LEWIS).

Mr. LEWIS. Mr. Speaker, on the seventh anniversary of the Turkish invasion of Cyprus, it is ironic that at this very moment the leaders of the major NATO powers are meeting in Ottowa to discuss their mutual interests and responsibilities. One of the latter, Cyprus, has however quietly become the forgotten problem.

In the 21 years since its independence from Great Britain, Cyprus has been able to chart its own destiny. A democratic form of government has developed with a freely elected president and house of representatives. As in the United States, these officials are held fully responsible to those who elected them.

Unlike most other nations in the volatile eastern Mediterranean area, Cypriots, both those of Greek and Turkish ancestry, worked hard to create a strong democratic Cyprus, a model nation which would set an example for its neighbors. The country grew, and as its infrastructure, industry and markets developed, the Cypriot people began reaping the benefits desired by all people in developing nations.

Then disaster struck amid these rising expectations. During the summer of 1974, Turkey used the short-lived coup against the legitimate Cyprus Government by the military junta then ruling Greece as a pretext to invade Cyprus.

Turkey did not stop the fighting until it had occupied 40 percent of the island, an area still under Turkish control 7 years later. Since 1974, 200,000 Cypriots have been refugees in their own land and Turkey has since exported 60,000 of its own citizens to the occupied area in an effort to change the cultural and political character of Cyprus.

This situation has become a threat, not only to the stability of the eastern Mediterranean area, but also to a strong NATO and the security of the United States. Recognizing the seriousness of the situation, the United Nations has led the move to settle the problem. There continues to be a 2,500-man peacekeeping force on Cyprus. Secretary-General Kurt Waldheim has made repeated efforts to reach a settlement.

Fortunately, the Greek and Turkish Cypriots resumed the U.N.-sponsored intercommunal talks in Nicosia last fall. In September the two sides began the substantive negotiations, with priority given to the return of Greek-Cypriot refugees to the Turkish-occupied Famagusta region. Other issues on the agenda include practical measures to improve the atmosphere between the two communities, territorial matters and the constitutional aspects of the situation.

I believe, as one who has visited and studied Cyprus, that the United States needs to actively support the efforts for a resolution of the problem, since it involves U.S. allies. President Ronald Reagan, in a letter to Speaker THOMAS P. O'NEILL, indicated:

> I am convinced that through these negotiations a foundation for a stable, enduring settlement on Cyprus is being laid. Both sides are seriously discussing steps to mitigate longstanding conflicts and, as was anticipated, progress is slow. However, the opportunity for a just and lasting settlement will not remain indefinitely. Therefore, the need for patience and persistent negotiating must be complemented by innovative and flexible approaches to the outstanding problems. After six years of effort, it is time to see a fair settlement that will benefit and serve all of the Cypriot people.
>
> In this, my first report to Congress on Cyprus, I unhesitantly reaffirm the support of the United States for the efforts of the Secretary General and his Special Representative on Cyprus. They have been vigorously and persistently seeking a just and lasting solution of the Cyprus problem. The Secretary-General and other United Nations' officials have been creative in their proposals and unflagging in their patience from the inception of the negotiations. I commend their professional conduct and offer the commitment of my Administration to assist in their endeavors to resolve the Cyprus issue.

Pressure should be exerted on Turkey to pull its troops out and to help find a peaceful solution acceptable to all Cypriots, a solution that would insure the territorial integrity of Cyprus.

● Mr. DERWINSKI. Mr. Speaker, ending the tragic situation in Cyprus and thus maintaining good relations between Greece and Turkey is a vital objective which must be achieved soon before possible political changes in both countries make this more difficult. July 20 marked the seventh anniversary of the military invasion and occupation of Cyprus by Turkish forces. After 7 years, that Mediterranean island remains partitioned, and continues to face serious political and humanitarian problems.

Turkey occupies and has partially colonized close to 40 percent of the most productive section of Cyprus. This is in direct violation of the United Nations Charter, international law existing treaties, U.N. resolutions, and the explicit provisions of the NATO Charter. Since the invasion of Cyprus in 1974, Turkey has ignored United Nations resolutions adopted in connection with Cyprus. The basic U.N. document calls for the withdrawal of foreign troops from Cyprus and for the return of the over 200,000 Greek Cypriot refugees to their homes, properties, and businesses.

In a recent letter to President Reagan, I stressed my interest in seeing that a concerted effort be made to motivate Turkey to be more forthcoming in resolving its problems with Greece. For years, Turkey's diplomatic posture vis-a-vis Greece has been dictated by domestic political considerations of minority governments struggling to survive. The current military government is not confronted with that situation; we must, therefore encourage it to act now in a manner that is in its own best interests as well as NATO's. The United States must play a positive role in maintaining the diplomatic momentum needed for the success of reconvened intercommunal talks.

Cyprus is at the heart of the tensions between Greece and Turkey. It would be a mistake for Turkey, Greece, and the West, if the political and economic crisis in Turkey became the excuse for avoiding, rather than solving, the Cyprus issue. No amount of military aid would match the strategic and political value to all NATO members of the reaffirmation of good relations between Athens and Ankara which would follow a Cyprus settlement.

Given what is at stake here, and against the backdrop of the upcoming Greek elections and the Greek suspension of the critically important base negotiations with the United States, we cannot afford to let this matter drift. In this connection, Turkey must be reminded that the very generous foreign assistance it has been receiving from the United States had been pro-

vided with the clear and legislatively stipulated understanding that Turkey would cooperate fully in efforts to bring about a lasting resolution to the Cyprus dispute.

We must continue to support the Government of Cyprus during this period of reconstruction of its society and economy. The Greek Cypriots wish to live in peace and in mutual prosperity with their Turkish Cypriot brothers. However, the practicality of such a development must include the removal of Turkish colonizers who have come to the island since the partition, and the removal of Turkish troops from Cyprus.

Ever since the Turkish invasion of Cyprus in mid-1974, Congress has repeatedly demonstrated its concern to assist the Cypriot refugees driven from the Turkish occupied areas; calling for the reinstatement of their property rights; as well as to encourage a Turkish withdrawal and a just and lasting settlement on Cyprus.

To add to the complications, the Turkish occupation of Cyprus is draining the treasury of the Turkish Government. The Government of Cyprus has made many offers to end the political impasse and reintegrate the area occupied by the Turkish military into the Cypriot economy. This would bring economic benefits to the Turkish Cypriots.

A divided Cyprus remains a problem for all governments who believe in human dignity, freedom, and justice.●

● Mr. DORNAN of California. Mr. Speaker, 7 years have now passed since the Turkish invasion of Cyprus. In these 7 long years, no agreement has been reached, no treaty signed, that might resolve the tragic upheaval on this small island. Two hundred thousand Cypriots are still refugees, encamped miles from homes to which they have centuries of ties. Two thousand Cypriots have simply disappeared, and no one knows what has happended to them. An artificial "Green Line," a United Nations patrolled cease-fire line, divides Cyprus in half.

Mr. Speaker, none of my colleagues should forget the events which gave rise to the present tragedy on Cyprus. On July 20, 1974, a Turkish invasion force landed at Kyrenia, Cyprus. The Turkish troops met with stiff, valiant resistance, and endured and inflicted many casualties, but succeeded in opening a land "corridor" from Kyrenia to the capital city of Nicosia.

Within 3 days after the invasion, a cease-fire was agreed to, and within 5 days, the foreign ministers of Greece, Turkey, and Britain were conferring at Geneva. The Turkish occupation force, however, ignored both the cease-fire and the ongoing negotiations, and expanded its land corridor to include nearly 40 percent of the territory of Cyprus.

There have been many reliable reports of human rights violations since the Turkish invasion. Cypriots have had every aspects of their lives disrupted by the occupying Turks, who have refused the most harmless of requests. They have refused to allow Greek Cypriots holding foreign passports to visit relatives in the north. They have refused to allow school holiday visits by Greek Cypriot children attending secondary school in the south to their families in the north. They have refused to grant temporary transfers of Greek Cypriots to the north.

Most alarming are the cases of 2,000 Cypriots who disappeared during the 1974 invasion, and who were known to have been in Turkish custody then, and afterwards.

Today, as we observe the beginning of the eighth year of Turkish occupation of Cyprus, I urge the Government of Turkey to account for these missing Cypriots, and to insure that no human rights violations occur. I also urge the Turkish Government to allow the people of Cyprus the freedom to determine their own system of government. There can be no settlement of the troubles on this little island until the threat of coercion from across the sea is removed.

Mr. Speaker, I would like to thank my distinguished colleague from Pennsylvania (Mr. YATRON) for holding this important special order.●

● Mr. COURTER. Mr. Speaker, yesterday marked the seventh anniversary of the Turkish occupation of Cyprus, a supposedly independent nation. The Turkish occupation, which covers approximately 40 percent of the island, has forced over 200,000 Greek Cypriots to flee their homes, relinquish most of their worldly possessions, and place many in crowded displacement camps. This situation is unjustified, inhuman, and untenable.

Mr. Speaker, both Greece and Turkey are vital NATO allies, and I strongly support needed economic and security assistance to both nations. However, the Turkish occupation is draining precious funds and forces away from Turkey and her NATO commitments. Turkey's occupation of Cyprus is not vital to its national security, and its occupation leaves Turkey open to charges of gross human rights violations.

The people of Cyprus—Greek and Turk—must make their own peace, but the Government of Turkey can make two goodwill gestures to aid the healing process. They could relinquish control of the town of Varosha, and return it to its former Greek Cypriot residents and they should begin a gradual withdrawal of their forces from Cyprus. If these two steps were taken, it would certainly create a better climate for peace talks and reconciliation to begin.

In the interim, I will continue to support the Cypriot people in their quest for a just and lasting peace, and their basic right to self-determination, as well as administration requests in assistance for that nation.

Thank you, Mr. Speaker.●

● Mr. HUGHES. Mr. Speaker, on this, the seventh anniversary of the Turkish invasion of Cyprus, I would like to again voice my profound concern over the island nation's continued occupation. The conflict which began 7 years ago, driving up to a third of the nation's population from their homes, has yet to come to a satisfactory and stable resolution. The continued military occupation of 40 percent of Cyprus remains unacceptable to Cypriots and to other members of the civilized world who believe in the principle of national sovereignty.

Negotiations between representatives of the Greek Cypriot and Turkish Cypriot communities, which at one time were sufficiently exasperating to discourage the patient Secretary-General of the United Nations, now appear to hold greater promise. The President has informed us that there now exists "a congenial negotiating atmosphere, seriously addressing points for negotiation." The time is ripe for a just settlement, including an appropriate division of rights and responsibilities, a disengagement of the troops occupying the island, and the establishment of a durable framework for peace.

This favorable climate for discussion may well be transient, however, so immediate progress is required. The shifting political winds of the parties involved in the negotiations may well endanger fragile negotiations. It is therefore imperative that the leadership of our country do all that it can to facilitate a swift resolution of the problems faced by Cyprus. As the Government of people who are champions of liberty, we can do no less.●

● Mr. ANNUNZIO. Mr. Speaker, I rise to join my colleague, Hon. GUS YATRON, in urging that our country stand firm in opposition to Turkish aggression in Cyprus. Americans, as a free people, cannot stand by silently in the face of human rights abuses, no matter where they occur, and our Government must do everything possible to promote peace and self-determination in Cyprus and condemn the Turkish Government for its shameful actions.

Seven years ago, in 1974, the armed forces of Turkey invaded the nation of Cyprus and drove over 200,000 Greek Cypriots from their homes. Some 2,100 Greek Cypriots have been missing since the invasion and the Turkish Government has not cooperated with efforts by the United Nations to locate these victims of military aggression.

The Turkish military occupation of about 40 percent of the land area of Cyprus continues, enforced by 27,000 Turkish troops, and after the brutal invasion, the Turkish Government imported over 40,000 colonists from Turkey to live on the island. The homeless Greek refugees were not allowed to return to their homes or regain their possessions, Greek Orthodox Churches have been desecrated, and freedom of worship and other human rights are being suppressed.

The Turkish aggression has been condemned by the United Nations as well as the United States and freedom-loving nations all over the world, and Turkey's continued stranglehold on Cyprus continues to be a flagrant violation of international law, the United Nations Charter, and the Charter of the North Atlantic Treaty Organization (NATO).

Mr. Speaker, the lives, freedom, and dignity of the Cypriot people must be a high priority in the actions of our own Government toward Turkey, and oppression in all its forms must be condemned. Peace and justice must be a goal to which our great Nation remains forever committed, in both words and action, and the human rights and peace of Cyprus must become a vital part of U.S. foreign policy as it affects Turkey.●

● Mr. DYMALLY. Mr. Speaker, this week marks the seventh anniversary of the invasion of Cyprus by the Turkish Army.

Tragically, the invasion has not yet ended. Thousands of Greek Cypriots have been forced to flee their land, leaving behind homes and loved ones. Those who remain still contend with an illegal occupation by Turkish troops.

While the United Nations is presently involved in talks between Greek and Turkish Cypriots, no lasting solution can be realistically anticipated so long as a Turkish military presence persists.

I urge my colleagues to join me in pressing for a foreign policy toward Greece that will expedite resolution of this conflict.

Uppermost in our considerations must be the human rights of this nation that has long been our freedom-loving ally. We can do no less for such loyal friends—and for the Greek Americans who contribute so much to our own Nation—than to champion the right of self-determination that we ourselves hold dear.●

● Mr. RUSSO. Mr. Speaker, as we mark the seventh anniversary of the Turkish invasion of Cyprus, I am disheartened that this divided country is no closer to a solution to the problems confronting it than it was last year at this time. Turkey is still forcibly holding 40 percent of Cyprus at bay. Two hundred thousand Greek Cypriots remain homeless refugees, compelled by Turkish forces to relinquish most or all of their worldly possessions.

On March 20, 1981, President Reagan stated that resolving the dispute in Cyprus would remain a priority of his administration. However, little progress has been made toward finding a fair settlement which could benefit all the people of Cyprus.

I am particularly dismayed that Turkey has not yet withdrawn their troops from Cyprus. In 1978, the United States lifted its arms embargo against Turkey with the provision that Turkey would do everything possible to adopt an acceptable solution. Instead, Turkey has continued its occupation of the island and has failed to reach a settlement with the Greek Cypriots.

The world cannot remain inactive while this international situation manifests itself to a greater degree. Turkey is a key participant in the NATO alliance and their actions are incongruent with the organization's goal to maintain peace and preserve the human rights of all people. Their actions try the unity and strength of the Atlantic Alliance.

It is my belief that the United States should remain committed in its efforts to insure that Ankara remove its troops, replacing them with peaceful cooperation. It is inconsistent with our country's philosophy to have allies who do not respect liberty and justice in their actions.

There exists a solution for Cyprus that is acceptable to both the Greek and Turkish people. It can be found through meaningful negotiations among those countries concerned, dedication from the Secretary General of the United Nations, and rational thinking on the part of the Turkish invaders.

In June 1980, I cosponsored a resolution urging the President to do all that he could to solve the Cyprus question. Today, I once again implore President Reagan, as well as the nation of Turkey, to come to a peaceful solution to the sad situation that exists in Cyprus today. Next July 20, I hope to be able to celebrate the resolution of this problem.●

● Mr. WIRTH. Mr. Speaker, today marks the 7th year of the Turkish invasion of Cyprus. This invasion displaced over one-third of the country's inhabitants, has given control of 40 percent of the island to the Turkish Government and has resulted in almost complete segregation between the two peoples of Cyprus. This invasion has wreaked economic havoc throughout much of the country's once prosperous economy, and has also weakened the NATO alliance in the Mediterranean area—an area vital to both NATO's and the U.S. interests. Most importantly, however, is the fact that 7 years after the invasion, 200,000 people still have not returned to their homes and many of these refugees continue to live in squalid conditions. This is unacceptable in a civilized society.

I believe, however, Mr. Speaker, that today also marks a period of time in which substantial progress can be made toward the settlement of the Cyprus issue. Several events have occurred in the past year which lead me to say this. The first and most important event is that the intercommunal talks between the Turkish and Greek Cypriots have been progressing well. Both sides have displayed a willingness to continue meeting and should be commended for their recent actions and efforts.

The second event that has led me to be optimistic is the establishment of an investigatory committee to address the very serious questions of human rights violations that occurred during the invasion and the years following it. This committee will be headed by an official of the Red Cross and will include both a Greek and Turkish Cypriot. This committee has the support of both communities on the island and also the backing of the United Nations. This is the correct and just way to address this very important and serious problem.

The new administration has also pledged its support to an early settlement of this issue. In the March 24, 1981 progress report to the Congress, the President stated that not only is a fair and just solution to the Cyprus problem a priority of his administration, but also that the U.N. Special Ambassador to Cyprus, Dr. Hugo Gobbi, has the full backing and support of the United States. The administration also recognized the timeliness of the potential for solving this issue and urges quick action.

The final reason that I am hopeful of a settlement to this issue is that both the Turkish and Greek Cypriots have very recently finished their elections and both elections indicate support for a negotiated settlement.

Mr. Speaker, several events have now conspired to allow the opportunity for a settlement to the Cyprus issue to present itself. To my recollection, there has not been such an opportunity since the 1974 invasion, and I urge both parties to take advantage of such a rare moment. As I see it, Turkey must now make a serious and meaningful offer to return the occupied land and to remove its troops from Cyprus. The solution to this problem does not lie in two separate states but rather in one constitutionally founded government which guarantees the rights of all its citizens. Mr. Speaker, I urge strong congressional support for a negotiated settlement to this issue and for the removal of Turkish soldiers from the island. I yield back the rest of my time.●

● Mr. HOLLENBECK. Mr. Speaker, I welcome this opportunity to rise and join my colleagues in recognizing the seventh year of Turkish occupation in Cyprus. Today, as the divided republic begins its third decade, the Cyprus problem is as far as ever from a solution that would provide political unity, peace and security for both communities. I strongly believe that U.S. foreign policy for Cyprus should reflect America's desire for a just and lasting peace—a settlement to terminate the human rights violations that are taking place on a daily basis.

For the past 7 years, the Cypriot people have been denied their right to self-determination. What is more, they were forcefully driven from their homes and were given no choice but to leave their worldly possessions behind. Given this situation, I want to praise the President of the Republic, Spyros Kyprianou, for his recent pledge that the Greek Cypriot side would continue to show all goodwill and make every possible effort to achieve an honorable solution.

I think it only appropriate that we pause at this juncture and, taking into consideration that a full year has passed with little progress toward achieving a settlement, renew our commitment to secure a resolution and thus end the ugly spectre of continuing human rights violations. I urge all negotiating parties to heed the advice of Mr. Kyprianou and show all goodwill to achieve an honorable solution. Should this negotiating attitude be adopted by all parties, I have every hope that the United Nations talks can be more fruitful than they have been in the recent past.●

● Mr. PORTER. Mr. Speaker, for 7 long years, the people of Cyprus, Greek Cypriots and Turkish Cypriots alike, have lived under the burden of a divided nation and Turkish military occupation.

The internationally recognized Cyprus Government headed by President Spyros Kyprianou, controls 57 percent of the island. The remainder is occupied by Turkish troops and in 1976 set up its own government called the Turkish Federated State of Cyprus. Greeks have been driven totally out and today, 7 years after the Turkish invasion of July 20, 1974, 200,000 Greek Cypriots remain refugees in their own land, their homes occupied by soldiers of a foreign nation, their worldly possessions expropriated, their future still in doubt.

Mr. Speaker, if ever Cyprus is to be reunited, the Turkish invaders must depart. Their presence has caused not only human suffering for Greek Cypriots, but it is the major cause of the economic stagnation suffered on their side of the "Attila Line" that divides the country. Though there is prosperity and strong economic growth on the Cyprus side, on the Turkish federation side the hotels and beaches are deserted, the air terminals and ports largely empty and hope for the future, without direct Turkish support of their economy, bleak.

But even with such support now being provided, Mr. Speaker, their outlook cannot be good. The Turk's own economy is, after all, one of the world's weakest and certainly unreliable as a foundation for a Turkish Cypriot future. Perhaps it is here that hope for reunification and a lasting peace lies, as Turkish Cypriots increasingly see that their future lies with a united Cyprus with a vibrant economy and with the rights of all individuals guaranteed by law.

I urge that our country move forward as quickly as possible to find the "just, fair and lasting solution to the problems of Cyprus" that President Reagan has proclaimed as a high priority of his administration.●

● Mr. RITTER. Mr. Speaker, I am pleased to join my colleagues and rise in recognition of the 7th anniversary of the Turkish occupation of Cyprus and express my profound concern that a satisfactory and permanent solution to this problem has not yet been found.

I echo the words of President Reagan as he has called for a just, fair and lasting resolution to the problems of Cyprus and one that will benefit and serve all of the Cypriot people. The occupation of Cyprus has caused enormous hardship and difficulty for the Cypriot people and as long as Turkish forces are present there basic human rights and freedom of self-determination will continue to be denied. The Turkish invasion of Cyprus has resulted in the eviction of over 200,000 Cypriots from their homes and the disappearance of 2,000 Greek Cypriots, still unaccounted for. After the 1974 invasion, Cyprus lost 40 percent of its land which contained 70 percent of its resources. It is almost impossible for a country to recover from such a blow. The occupation must cease.

Since last August the Greek and Turkish Cypriots have been meeting in intercommunal negotiations held under the auspices of United Nations Secretary-General Kurt Waldheim. So far, no final settlement has been reached and while some progress has been made, Turkey continues to ignore the mandates of numerous United Nations resolutions to withdraw all troops.

At the convergence of three continents—Europe, Asia, and Africa—Cyprus hold a strategic position in the political geography of the Mediterranean. Yet she remains divided and vulnerable. She is a source of contention between Greece and Turkey and therefore a threat to NATO. And NATO must remain strong.

Beyond the impact on NATO is the serious consequences for literally thousands of homeless Cypriots who have taken refuge in camps or live in temporary shacks with relatives. Latest reports indicate that about 8,000 people are still living in tents.

Cyprus has survived, since time immemorial, the domination of one conqueror after another and this reflects the tenacity and resilience of its people, as well as their indomitable determination to survive whatever the odds. The present crisis through which Cyprus is passing is perhaps the worst one in its long history. The Turkish aggression and continuing occupation has caused so much of human pain and suffering. All this has been a terrible experience, and yet any negotiating process needs good faith on both sides. I am convinced that as far as the Government of Cyprus is concerned, such good faith does exist because they realize that only through a concerted effort to discuss the Cyprus issue in a positive and good faith way, is it indeed possible to achieve satisfactory results.

The issues involved in Cyprus are far bigger than the fate and future of a small nation and its people. They are universal issues underlying world understanding and peace. Therefore, the settlement of the Cyprus problem should, not only be the concern of the Cypriots and those countries which are closely connected with Cyprus, such as Greece and Turkey, but also other countries and their governments, who believe in human dignity, freedom, justice and human rights. It is my hope that a final and satisfactory solution will be achieved soon and that the suffering of these people will be alleviated.●

●Mr. KILDEE. Mr. Speaker, each year since I was first elected to Congress, I have spoken to remind my colleagues of the continuing tragedy on the island of Cyprus. Today marks the seventh year since Turkish troops, using American weapons, invaded and occupied the northern portion of Cyprus. Over those 7 years, the familiar statistics have not changed. Turkish troops still occupy almost 40 percent of the island nation. Over 200,000 Greek and Turkish Cypriots are still displaced. Two thousand disappeared people, including eight Americans, are still not accounted for.

We would be deceiving ourselves if we were to say that any progress has been made toward a solution. The Government of Turkey has changed several times during that period. Neither the governments of Demirel or Ecevit made any movement toward a solution. Perhaps their slim pluralities made it more difficult for either to take action. With a military government in Turkey, that can no longer be used as an excuse. Despite a government which is not limited by a slim parliamentary margin, the situation

has not changed. Turkish troops still occupy a major portion of Cyprus.

In 1978, the Congress lifted the arms embargo on Turkey. At the time, the Carter administration gave assurances that such an action would lead to progress. Among the things which was mentioned at the time was the possibility that Famagusta would be returned. That action was taken 3 years ago. Only the most naive would assert that any real progress has been made. Famagusta remains under occupation.

The Government of Cyprus has presented a series of proposals, but every time a proposal has been laid on the table, Mr. Denktash has only rejected the proposal and not presented an alternative. Our own Government has also gone through the rather embarrassing charade of certifying progress in the negotiations every couple of months. It is difficult to report on progress when none is being made. At least the Reagan administration has been realistic. They did not report any progress but asked for patience.

I would point out that patience cannot be without limits. After a while, patience becomes an acceptance of the status quo. In the past, I have warned that with the passage of time, an aura of legitimacy and permanence is given to the existing situation. Such a solution is not acceptable. It is neither ethical nor just.

The time has come when we must recognize that Turkish intransigence is responsible for the continuing tragedy of Cyprus. Turkish troops are still occupying another sovereign nation 7 years after the cessation of hostilities. The Turkish Cypriots have refused to bargain in good faith hoping that others will come to accept a de facto partition of the island. I renew my annual call for an end to the occupation and for serious negotiations. Because our own Government is indirectly subsidizing an illegal action, I call on the Reagan administration to exert a maximum amount of pressure on the Turkish Government.●

● Mr. ZEFERETTI. Mr. Speaker, I join my colleagues today in marking the 7th year of the unwarranted Turkish occupation of Cyprus. This invasion resulted in the displacement of over 200,000 Greek and Turkish Cypriots from their homes and jobs. In addition, the Cypriot people have been continually subjected to acts of aggression by the Turkish military.

The Reagan administration has been in office for approximately 6 months. Yet, among all of their confusing foreign policy statements, I have not heard a word spoken about the situation on Cyprus. In my opinion, the situation on Cyprus is in danger of becoming a forgotten problem and has fallen off our foreign policy priority list.

Also, the passage of each year after the invasion has seemingly brought the occupation closer to legitimacy and permanence. The United States can neither condone nor accept the occupation of a sovereign nation by the army of another nation. We must be as concerned about the invasion of Cyprus by Turkey as we were the invasion of Afghanistan by the Soviet Union. The occupation is contrary to the moral and ethical principles upon which our Nation was founded.

It is my belief that the Reagan administration should do everything it can to bring about a just settlement of the issues on Cyprus. We must use every means at our disposal to pressure Turkey to withdraw the forces of occupation. The occupation of Cyprus contributes to the instability of the Eastern Mediterranean and is not in the interests of either the United States or Turkey. Our foreign policy in this region must be directed toward a just and lasting peace which will terminate further human rights violations and insure the Cypriot people of the basic right to self-determination.●

● Mr. TAUKE. Mr. Speaker, this week marks the seventh year of the Turkish occupation of Cyprus. Unfortunately, little progress has been made in the achievement of a permanent solution to the Cyprus question and a lasting agreement between Greece and Turkey.

Nevertheless, the Cyprus question continues to have serious humanitarian and global implications, not only for the United States, but also for the rest of the world. Thousands of people remain homeless, and human suffering still abounds on the island. The Greek-Turkish conflict over Cyprus also threatens U.S. political and strategic interests by bringing instability to the region, disrupting U.S. relationships with key allies, and providing the Soviet Union with new strategic opportunities.

What is desperately needed is movement on a problem that appears to be intractable. American foreign policy should encourage the resumption of serious talks, aimed at resolving major differences and ending the Turkish occupation. A solution will never be realized as long as there are over 20,000 Turkish forces occupying portions of Cyprus in violation of international law. The Cypriot people must be guaranteed the right to self-determination.

The reunification of Cyprus is a difficult task, particularly given the breakdown in confidence between both Greek and Turkish Cypriots. Yet, it is the only way to bring lasting peace to the island. A permanently divided country will not serve the interests of the Cypriot people.

The impetus for a lasting peace must come from the United States. The special representative of the United Nations can certainly be of assistance, but ultimately it is the United States—with a great deal to gain—that must take the lead in achieving a solution to the problem.●

● Mr. FLORIO. Mr. Speaker, I join my colleagues today in marking the seventh year of the Turkish occupation of Cyprus. I regret that on this occasion we must again report little progress in achieving a just and permanent settlement.

Seven years ago Turkish forces brutally occupied and partitioned the Cypriot Island. Today little has changed as Turkey continues to occupy 40 percent of the land mass of Cyprus, forcing 200,000 Greek Cypriots to flee their homes and businesses. With my support the Congress in 1975 halted U.S. military assistance to Turkey. This arms embargo was to encourage the Turkish Government to remove their troops from Cyprus. I regret that just 3 years later and over my opposition the congress voted to resume military assistance to Turkey. At the time that the arms embargo was repealed, Turkey promised that it would cooperate in achieving a Cypriot settlement.

Has Turkey cooperated? The record clearly shows that it has not. Turkey continues its illegal occupation of Cyprus with an estimated 27,000 troops and 40,000 mainland Turkish colonists. The Government of Turkey has created a Turkish Federated State of Cyprus, recognized only by Ankara. The policies and actions of the Turkish Government continually seek the establishment of borders between the Greek and Turkish communities in Cyprus. This is rejected by the Greek Cypriot community who rightfully insist that any political solution must be committed to a united Cypriot nation.

Since the lifting of the Turkey arms embargo, the Congress has repeatedly stressed that future aid to Turkey be based on progress in the removal of Turkish troops and the return of the Greek Cypriot refugees to their homes.

Turkey has simply refused to respond to these congressional directives. The United States has demonstrated its willingness to support all efforts to achieve a just, equitable and peaceful settlement to the Cypriot problem. However, in order to obtain these aims, Turkey must first remove its occupation forces from Cyprus. I urge my colleagues to join me in demonstrating to the Government of Turkey that the Congress is committed to a single Cypriot nation, with the freedom to determine its own national course. I urge the administration to join the Congress in sending a strong message to the Government of Turkey. This message should inform Turkey, in clear terms, that any further delay in the removal of her troops from Cyprus will result in strained relations between our two

governments and would be contrary to her own national interest.●

● Mr. MAVROULES. Mr. Speaker, I come before you today, as an American of Greek descent, outraged at our Nation's continued indifference to the plight of the Greek Cypriots. Today marks the seventh anniversary of the Turkish occupation of Cyprus. How long, I ask will we allow this transgression of human rights to continue?

In 1974, Turkish troops invaded Cyprus, displacing over half of the island's population. The conditions essentially remain the same today. There are still over 200,000 Cypriots living in tents under refugee conditions, left uprooted by the invading army of Turkish soldiers. These Cypriots have been forced to flee their homes, to live a life of misery and imprisonment, and to be denied access to the farms and businesses they labored so hard to establish. How long must these people suffer?

It is wrong for the United States to continue to supply military and economic aid to the Turkish junta. Sadly, it was American military equipment that allowed the Turks to invade 7 long years ago. Continued American assistance today only compounds the situation. By our actions we condone the Turkish invasion and continued presence.

Mr. Speaker, how can we, in good conscience, increase aid to Turkey by more than 55 percent of last year's figure of $452 million? How can we support such an increase in light of the drastic budget cuts the American people have been asked to bear? Over $1 billion have found their way into Turkish hands. When will this stop?

The concern of the American people over human rights is both genuine and enduring. I am afraid that the present administration does not fully grasp the true conditions under which the Cypriots must live. Our actions have vacillated and have been prompted by a foreign policy that often admits expedience and appeasement before it does justice.

We must, above all else, remember the homeless refugees on Cyprus, who are horded almost cattlelike by armed invaders, oppressed and denied their basic human rights, by a force of over 27,000 Turkish troops.

And the future appears just as bleak. No settlement is in the offing. Turkish military forces are still in Cyprus, as they were 7 years ago, and they have been joined by over 40,000 colonists supported by U.S. dollars.

At the root of the problem is the suffering being endured by over one-quarter of a million people. Our policy in the Aegean must begin with our commitment to these people. American foreign assistance must be more firmly linked to a closer observance and adherence to the basic right of the Cypriot people to rule by self-determination.

The United States must now take a stand. It is 7 years long overdue. The important issue at stake is that these people have suffered enough. We must decide on which side of the fence we really stand.●

● Ms. FIEDLER. Mr. Speaker, in the summer of 1974, the television sets of the world brought yet another war into our living rooms—the Turkish invasion of Cyprus. We saw Turkish C-47 transports against the brilliant blue of the Mediterranean sky, flying in tight V formations for dropping paratroopers. We saw the whole familiar horror of invasion and aggression—the clanking tanks, the frightened bewildered refugees, cities turned into battlefields, villages that had sustained families for centuries suddenly desolate except for the soldiers of the occupier. Seven years after these images first assaulted us, Cyprus is no longer newsworthy to the media. Newsworthy or not, Cyprus remains divided, much of it garrisoned by two full divisions of Turkish infantry. It thus falls to us to remember the sorrow of Cyprus, the division of Cyprus, and, hopefully, the eventual resurrection of Cyprus.

Cyprus is no stranger to warfare. The Christian and Islamic forces clashed there long before Columbus sailed out of the opposite end of the Mediterranean. Today, however, we live in a world that tries—however unsuccessfully at times—to live by the rule of law rather than that of the scimitar. I believe that the fact that the nations of the world, of whatever religion or type of government, have unanimously refused to recognize the Turkish-imposed Government in occupied Cyprus shows that there is hope that respect for law and justice will finally prevail.

I support the activities of the U.S. Government in assisting negotiations between the communities of Cyprus. The United States has also been the major financial supporter of the U.N. peacekeeping force on Cyprus, which has helped deter further attacks against the people of Cyprus. The United States has provided almost half of all the relief assistance received in Cyprus since the 1974 invasion. Our commitment to the people of Cyprus and our American heritage of peace and freedom requires that we do all in our power to help reconstruction and to help restore legitimate government to all of the island. I am pleased to see that, despite all the handicaps and hardships, the Government of Cyprus has been hard at work improving the economy of the country, and, despite the world recession, there are real and significant advances for us to here applaud. I wish only that all of Cyprus could enjoy this growth in a climate of peace, unity, and freedom.

In 1968, another small country—Czechoslovakia—was invaded by its larger neighbor. I remember from then the words of a Czech student to a Western correspondent: "Be with us in Czechoslovakia when we are no longer news". The same must be true said of Cyprus. That is why, today, we show that the American people are still with Cyprus and its battered but unbowed people, rebuilding their own future with hard work and hope.●

● Mr. BIAGGI. Mr. Speaker, today marks a very sad day in the history of the free world—the seventh anniversary of the unwarranted and illegal invasion of the island of Cyprus by Turkey. In 1974, Turkey invaded this tiny island under the pretext of quelling a Greek military coup. The Greek offense was suppressed, but the Turkish troops still remain and their continued presence divides the Cypriot nation.

Mr. Speaker, mine was one of the first voices raised in this Congress in opposition to this invasion, which was conducted with U.S. arms. As a result, I joined with many of my colleagues in imposing an arms embargo on Turkey, an embargo, which sadly, has been lifted citing "strategic considerations." I continue to oppose the lifting of this embargo as there remain 2,000 Greek Cypriots who are missing as a result of the 1974 invasion. Turkey has yet to account for them yet we continue to supply them with arms.

The Cypriot people, about 80 percent of Greek and only 18 percent of Turkish descent, led a relatively peaceful coexistence until 1974. Now the two communities struggle to bridge the gap which was created by the invasion. In the occupied area, 200,000 Greek Cypriots were forced from their homes to the Government-controlled part of Cyprus. Their belongings and property were confiscated. Since then, 60,000 Turkish immigrants have taken their places and continue to occupy this area today. The intransigence of the Turkish Government in seeking to negotiate a settlement of this ongoing occupation. should be condemned by all freedom-loving people everywhere. Human rights have been consistently violated and we should not forget that until the entire Cyprus question has been resolved.

Compounding the pain of occupation are the harsh realities of economic adjustment faced by the Greek Cypriot population. Turkey controls 40 percent of the land, but 70 percent of the preinvasion production capacity. Consequently, the legitimate Government of Cyprus must operate with severely curtailed resources, as well as intergrate the displaced persons into the system.

Many attempts have been made to persuade Turkey to withdraw from the area both nationally as well as

internationally. In addition to the arms embargo, the United Nations has passed many resolutions demanding the withdrawal of the troops. The United States continues to work for a solution to the Cypriot problem by sponsoring intercommunal talks. The most recent refusal, just last week, of the Turkish Government to negotiate the occupied territory, is but another example of Turkey's continued blatant disregard for human rights.

Talk must soon turn to action if this problem is to be resolved. Perpetuation of the staus quo encourages the eventual permanent partition of the nation. This would be tragic for all Cypriots—both Greeks and Turks—who once lived side by side as friends and coworkers and are now sadly divided.

From another perspective, a division of land along the present holdings would further exacerbate the current situation and prolong a final settlement. Turkey now controls 40 percent of the land mass, but the Turkish Cypriots only comprise 18 percent of the population. The Government of Turkey continues to encourage its people to immigrate to the occupied area in a deliberate effort to change the demographic nature of Cyprus. By continuing this pattern of human and civil rights violations, there is a clear and present danger that Greek Cypriots could be completely annexed by Turkey and lose their rights as Greek citizens.

The sympathy of the international community clearly lies with the Republic of Cyprus. The numerous U.S. resolutions calling for Turkish withdrawal from the area were all passed overwhelmingly. The Commonwealth countries and the group of nonalined nations have both made formal appeals for the withdrawal of Turkish troops and for just settlement. Turkey has been cited by the Council of Europe for numerous human rights violations.

All these instances point dramatically to the need to end this current Cyprus question which has gone virtually unchanged for the past 7 years. I call upon the new administration to demonstrate its concern for the people of Cyprus who have been made pawns in this game of international chess for too long. Our silence in this area since January is a cause of great concern to those of us who seek a bold, new initiative in this area. A peaceful, unified Cyprus as a stable democracy in the Mediterranean is vital to the stability of that area. Self-determination is a right for all Cypriots and as the leader of the free world, our Nation has the moral obligation to work for a just political settlement for the Greek Cypriots who have remained second-class citizens in their own land for too long.●

● Mr. BARNES. Mr. Speaker, I am pleased to join my distinguished colleague from Pennsylvania (Mr. YATRON) in expressing concern over the still unsettled situation on the island of Cyprus.

The Turkish invasion of Cyprus in the summer of 1974, left more than one-third of the entire population of the island refugees in their own country. The 200,000 Greek Cypriot refugees, on the seventh anniversary of the occupation, still remain deprived of housing, personal properties, and possessions.

Although the Government of Cyprus has made significant progress in meeting the immediate needs of the displaced persons, housing and health care needs remain at emergency levels. Conditions are aggravated by the inaccessibility of the airport, the largest port on the island, and two of the six public hospitals, which lie in the area under the occupation of the Turkish army.

Nearly 40 percent of the island is under occupation, which in itself has been an obstacle to any resolution of the situation. The ongoing intercommunal talks are at a stalemate, causing additional friction between Greece and Turkey.

These two nations, both allies of the United States, are extremely important figures in U.S. strategic interests. It is imperative that we play a more active role in assisting the parties to resolve this 7-year conflict.

As a world leader in the struggle for human dignity for all people, the United States must exert its influence in the international arena to bring these two nations together in negotiations which will result in the return of these refugees to their homes and villages.

United States security interests demand increased cooperation with both Greece and Turkey. As a result, it is vital that we stand as a stable and moderating influence, moving our friends together to end this longstanding and painful dispute in a positive fashion. If Israel and Egypt can make peace, surely common ground can be found between Greece and Turkey.

In the interest of human rights and freedom, I join my colleagues in marking the unfortunate seventh anniversary of this ongoing crisis, and hope that an equitable resolution will be found before the 200,000 Greek Cypriots begin yet another year as refugees.●

THE ARID LANDS RENEWABLE AGRICULTURAL RESOURCES CORPORATION ACT OF 1981

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. BROWN) is recognized for 10 minutes.

● Mr. BROWN of California. Mr. Speaker, today I am introducing legislation, along with my distinguished colleague from Texas (Mr. DE LA GARZA) to spur the agricultural production of a number of essential strategic and industrial materials. The legislation seeks to create the "Arid Lands Renewable Agricultural Resources Corporation," an entity identical to the Synthetic Fuels Corporation but directed to replacing nonfuel end uses of petroleum and in a manner better suited to the arid parts of the Western United States. This legislation is nearly identical to S. 1462, introduced by Senator DECONCINI on July 10, 1981. A full text of that bill can be found in the CONGRESSIONAL RECORD of that date beginning on page 15414.

The Corporation would use price guarantees, loan guarantees, direct loans, and joint ventures in that order of declining priority to encourage the production of critical materials from plants native to the Southwestern United States. Most of the bill details the function and organization of the Corporation, which is identical to the one that Congress approved for the Synthetic Fuels Corporation. The remaining parts of the bill detail the purpose and needs of this Corporation.

There are sections of this bill pertaining to production goals, expenses, and so forth, which have been purposely left open, to be made final after congressional deliberations. The cost of this legislation dependent upon the production goals, is likewise to be determined later.

Some of my colleagues will undoubtedly ask why we need such a Corporation. Let me provide some background.

The plants mentioned in this legislation are all native to the Southwestern United States and are drought resistant, more tolerant to salinity than other commercial crops, and all produce products in demand by industry and the armed services. They have been the subject of much research by universities and industry, and are at the threshold of commercial production.

One of the plants, guayule, is a semiarid perennial shrub which produces natural rubber and a number of commercially attractive resins. It has been used by industry in the past and, during World War II, was the subject of massive development as a part of our war effort. This country currently imports 100 percent of its natural rubber—800,000 metric tons—at a cost of nearly a billion dollars per year. The Department of Defense is currently examining its natural rubber needs with an eye toward encouraging guayule production. Our strategic stockpile goal for natural rubber of 850,000 long tons is not close to being

met, with only 120,000 long tons in storage.

In a classic example of the difficulties associated with the commercialization of a new idea or product, guayule has not been developed to meet the existing demand for natural rubber. Industry will not incorporate guayule rubber in its products until there is an assured volume of plant material. Farmers will not enter into commercial production until a market can be guaranteed. The Federal Government has been unwilling to finance the development of this crop without significant industry funding. Industry has been reluctant to make large development investments on this long-term payback undertaking without some financial assurances from the Federal Government. In the meantime, natural rubber shortages predicted to start in the mid-1980's creep closer.

Another of the plants mentioned in this bill is jojoba, again a native southwestern plant which produces a nut that yields a high quality lubricant. This lubricant has many times the life of petroleum products and is beginning to be marketed for use in the transportation industry. The oil, technically a liquid wax, is also of use as a feedstock for making plastic and fertilizers and has use in dermatological applications. Those of you who have seen advertisements for jojoba shampoo know of other commercial uses. Jojoba oil can replace petroleum and petrochemicals in many of these applications.

Euphorbia lathyris, also known as gopherweed, produces a hydrocarbon latex with a number of critical uses. This hydrocarbon can be used as a chemical feedstock as well, and has in addition produced a high-octane gasoline in laboratory tests. Much research is underway but, again, commercial development of this petroleum-replacing plant is not proceeding at a pace commensurate with the national need.

Circubita, commonly called buffalo gourd, is another arid land plant with considerable economic and industrial importance. Circubita seeds are a source of oil with many of the same applications as peanut and sunflower oil. The yields per acre are in the range of commercial production of soybeans and peanuts, but require much less water.

But given the potential for these crops to reduce our dependence upon imported oil for a number of nonenergy uses and the production of materials essential for our defense, why the need for this Corporation?

First, I consider these plant resources to be just as critical as the oil shale and sand or the plant sources of alcohol fuels which are the focus of the Synthetic Fuels Corporation. Yet the Synfuels Corporation is not set up to deal with the nonfuel petroleum demand addressed primarily in this bill.

Second, private industry cannot be expected to make the necessary development investments on its own. As with the Synthetic Fuels Corporation projects, the payback for investments made in these agricultural sources of materials is not within a length of time likely to be considered by a corporation as justification for the investment. The efforts authorized in this bill are of critical importance to the strategy and defense of the United States, and are a legitimate Federal concern.

This legislation has many advantages over the projects planned for the Western United States under the authority of the Synfuels Corporation. Those projects seek to save one limited resource—oil—but at the expense of another limited resource—water. The synfuels efforts planned for the West are entirely antithetical to our region's resource conservation needs. Water is already scarce in the arid West and many of the synfuels projects will only make that situation worse.

Also, the synfuels projects are extremely disruptive, causing rural areas to swell in numbers, with armies of outsiders coming to construct and run these facilities. This bill will use the existing farming structure and will increase the cropping options for southwestern farmers.

In summary, this legislation is designed to speed the production of essential strategic materials from domestic agricultural sources. It will leverage private investment and create an ongoing industry capable of providing these materials on a continuing basis. And the legislation accomplishes this in a manner that uses arid lands resources in an appropriate manner, with minimal disruption to the environmental and social aspects of the West that we all cherish.

I want to encourage my colleagues to join with me in this effort. And not just my southwestern colleagues, for this effort benefits all of the United States. A dependable domestic source of natural rubber benefits the rubber industry of the industrial Midwest. Dependable domestic sources of lubricants, oils, and chemical feedstocks benefit other industries, workers, and consumers across the country. If this Nation is to free itself from dependence on foreign sources of essential materials, we have to use every available resource in every part of the country. We in the Southwest are prepared to contribute as well.●

REAGAN SHOULD WITHDRAW WEAPONS SALE TO SAUDI ARABIA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. PHILLIP BURTON) is recognized for 5 minutes.

● Mr. PHILLIP BURTON. Mr. Speaker, the Reagan administration's proposed weapons sale to Saudi Arabia is in total disregard of the realities of the Middle East and severely jeopardizes the already fragile security of Israel. The sale of AWACS and F-15 equipment and weaponry has roused overwhelming opposition in Congress. Recently, the California State Legislature passed a resolution calling on President Reagan to withdraw the sale. AJR 45 was introduced by Assemblymen Levine and McCarthy and coauthored by Assemblymen Berman, Bane, Willie Brown, Robinson, Rosenthal, Alatorre, Chacon, Greene, Kapiloff, Katz, Roos, Torres, Vasconellos, and Wray; and Senators Campbell, Roberti, and Sieroty:

Whereas, it is in the best interests of the United States of America to encourage peaceful relations in the Middle East and to assist in maintaining the strength and security of the State of Israel; and

Whereas, the President has announced that he will notify Congress of his decision to sell to Saudi Arabia Airborne Warning and Command System aircraft (AWACS), aerial tankers, and additional equipment for F-15 jet fighters currently part of the Saudi arsenal, consisting of long range fuel and equipment pods and sophisticated air-to-air missiles; and

Whereas, when flown within Saudi airspace, AWACS, as highly sophisticated surveillance aircraft, could monitor and expose virtually all major military movement in Israel; and

Whereas, the fuel and equipment pods would enable the F-15 fighters to carry a heavier bomb load to distant targets and, by increasing the combat radius of the F-15 jet fighters, would enable them to hit any target in Israel; and

Whereas, the missiles feature "all aspect attack," enabling the missiles to be fired from any direction at a target aircraft with improved guidance, increased maneuverability, resistance to jamming, and a highly lethal warhead; and

Whereas, the sale of AWACS and accompanying weaponry is likely to destabilize the balance of power in the Middle East, jeopardize United States interests in the region, and impair the security of the State of Israel; and

Whereas, the Members of the Legislature of the State of California recognize the necessity for development of strategy to counter the threat of Soviet expansion in the Middle East and to defend the Persian Gulf; and

Whereas, American interests in the Persian Gulf area could best be protected by retaining sophisticated and sensitive weaponry in the control of the United States; and

Whereas, American-manned AWACS currently operating in Saudi Arabia are able to provide advance warning of any attack that may be launched against Saudi Arabia; and

Whereas, Retaining AWACS under American control would help to ensure that use of AWACS would be for defensive purposes only: Now, therefore be it

Resolved by the Assembly and Senate of the State of California, jointly, That the Legislature of the State of California respectfully memorializes the President of the

United States to reconsider and withdraw the decision to sell to Saudia Arabia AWACS, aerial tankers, long range fuel and equipment pods, and sophisticated air-to-air missiles and the Congress of the United States to disapprove any decision to complete this sale; and be it further

Resolved, That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States.●

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Washington (Mr. DICKS) is recognized for 5 minutes.

● Mr. DICKS. Mr. Speaker, unfortunately, during today's vote on House Resolution 181, a measure urging that the necessary steps be taken to insure that social security benefits are not reduced for those currently receiving them, I was unavoidably detained and unable to vote for this important measure.

At this time, I would like to express my strong support for House Resolution 181 and my sincere and deep satisfaction in seeing that a very strong majority of my colleagues on both sides of the aisle share my support for this measure.

As my colleagues so accurately indicated today, the social security system can and should be strengthened without reducing benefits for present recipients, and without reducing the promised protection for those currently contributing to the program.

I am only sorry that it was necessary to introduce this resolution—this House should have never voted to reduce these benefits in the first place. However, now that the position of the House on social security benefits has been clarified, I look forward to working with my colleagues in taking the action necessary to protect the security of millions of older Americans.●

MEDICARE BILL

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Oregon (Mr. WYDEN) is recognized for 5 minutes.

● Mr. WYDEN. Mr. Speaker, I am pleased to introduce a bill which would amend the Social Security Act to eliminate the current requirement that a medicare beneficiary spend 3 days in a hospital before he or she can be eligible for skilled nursing facility benefits.

Not only will this legislation provide more humane treatment for patients—it will also save money. The 3-day requirement serves only to encourage hospitalization and discourage appropriate, but less costly health care alternatives.

Let me illustrate. Last year, a constituent of mine who was suffering from terminal pancreatic cancer, entered Portland Adventist Medical Center complaining of uncontrollable pain.

She entered the hospital rather than a nursing home for one reason—the 3-day prior hospitalization rule. Although she needed medical supervision and observation unavailable in her own home, her physician said she could have received the necessary care at a skilled nursing facility.

The end of this story is not a pleasant one. She was hospitalized from Friday until Wednesday. On Wednesday a bed was located in a skilled nursing facility where she was transferred. Weakened by the move, she died 2 hours after admission.

Because medicare regulations require prior hospitalization, this woman suffered needless transfer trauma—the Federal Government suffered needless financial loss—the hospital and nursing home both were left with needless paperwork and accounting.

Mr. Speaker, it is time we brought an end to regulations which only serve to aggravate matters—for patients and taxpayers alike.

Let us take the cost factor. The average medicare cost of a covered day in a skilled nursing facility (SNF) is a fraction of the routine cost per day in a hospital. In Portland, Oreg., for example, it costs $200 to $400 per day to hospitalize an individual. Skilled nursing care costs between $60 to $100 per day. The amount saved from 5 unnecessary hospital days would pay for the total stay in a skilled nursing facility for most medicare patients since the average medicare stay is only 24 days.

In 1978, Blue Cross of Oregon contracted with Health Care Financing Administration in an experiment to waive the prior hospitalization requirements for medicare. Although the results of this 2-year study will not be released until this fall, preliminary reports indicate that this experiment has saved money—as well as being more humane.

Mr. Speaker, it is high time we reform those Government health services which encourage needless hospitalization and discourage less costly health care.

The bill I am introducing is a step in that direction. It will eliminate the expense and trauma of a situation such as the woman I described experienced. It would allow a patient's physician, not the Federal Government to determine the appropriate setting for patient care.

Mr. Speaker, I include the entire text of the bill to be printed in the RECORD:

H.R. 4227

A bill to amend title XVIII of the Social Security Act to remove the three-day prior hospitalization requirement for coverage of extended care services

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 1811 of the Social Security Act is amended by striking out "related post-hospital" and inserting in lieu thereof "extended care".

(b) Subsections (a)(2), (b)(2), and (e) of section 1812 of such Act are each amended by striking out "post-hospital".

(c) Section 1813(a)(3) of such Act is amended by striking out "post-hospital".

(d) Section 1814(a) of such Act is amended.

(1) by striking out "post-hospital" each place it appears in paragraphs (2)(C), (6), and (7), and (2) by striking out ", for any of the conditions" and all that follows "such inpatient hospital services" in paragraph (2)(C).

(e)(1) Subsection (e) of section 1861 of such Act is amended by striking out ", and subsection (i) of this section" in the matter before paragraph (1).

(2) Subsection (i) of such section is repealed.

(3) Paragraphs (1)(G), (2)(A), and (3) of subsection (v) of such section are each amended by striking out "post-hospital" each place it appears.

(4) Subsection (y) of such section is amended by striking out "Post-Hospital" in the heading and by striking out paragraph (4).

(f) Section 1866(d) of such Act is amended by striking out "post-hospital".

(g) Subsections (d) and (f) of section 1883 of such Act are each amended by striking out "post-hospital" each place it appears.

(h) Section 226(c) of such Act is amended by striking out "post-hospital extended care services" and inserting in lieu thereof "extended care services" and by striking out "except that" in paragraph (1) and all that follows through the second semicolon in such paragraph.

(i) Section 7(d)(1) of the Railroad Retirement Act of 1974 is amended by striking out "posthospital extended care services" and inserting in lieu thereof "extended care services".

SEC. 2. The amendments made by this Act shall be effective with respect to services provided on or after the date of the enactment of this Act.●

A MEDICINE DRIVE FOR POLAND

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Wisconsin (Mr. ZABLOCKI) is recognized for 30 minutes.

● Mr. ZABLOCKI. Mr. Speaker, on the very grounds of the U.S. Capitol Building today, the first of many shipments of medical supplies to Poland was initiated. Mr. Speaker, as a result of a major medical drive sponsored jointly by Project HOPE and the Polish American Congress, thousands of Poles, both old and young, will begin receiving the necessary medical care that they have lacked due to the economic crisis in Poland.

Mr. Speaker, I am pleased that my colleagues, Representatives EDWARD DERWINSKI, DAN ROSTENKOWSKI, JOHN FARY, and I were able to participate in the ceremony today with Dr. William B. Walsh, founder and president of Project HOPE; Mr. Al Mazewski, president of the Polish American Congress; His Excellancy Alfred L. Abramowicz, Auxilary Bishop of Chicago Archdiocese; Dr. Eugenia Zdebska, professor and director of cardiovascular surgery, American Children's Hospital in Krakow; Dr. Z. Zdebski, professor of obstetrics and gynecology, University of Krakow; and Dr. Jan Grochowski, vice rector of the University of Krakow and director of the Children's Institute of Krakow.

Mr. Speaker, since its inception in 1958, Project HOPE, founded by Dr. William B. Walsh, has aided thousands of people in many developing nations. One such nation is Poland where, in 1975, at the American Children's Hospital in Krakow, Project HOPE began a tradition of medical excellence that continues to grow today.

The latest HOPE activity in Poland involves a joint effort with the Polish American Congress, the Polish Ministry of Health, and the Solidarity Labor Union to relieve the country's drug and medical supplies shortage.

Working in conjunction with the Polish American Congress, Project HOPE is gathering much needed medicine and medical supplies which have become scarce in Poland due to the economic crisis. These supplies, which will be solicited from American pharmaceutical houses, will be distributed to the hospital patients by the Ministry of Health and the Solidarity Labor Union. While this is one of many drives that Project HOPE has been involved in, it is unique in that it has forged an alliance between Project HOPE, the Polish American Congress, the Solidarity Labor Union, and the Polish Government.

This medical relief drive is part of a continuing effort through which Project HOPE is working with the Polish people to improve the health care they are receiving. Through an exchange between American medical personnel and members of Krakow's Institute of Pediatrics, HOPE has been involved in numerous programs, including helping to establish the institute's 320-bed hospital as one of the major centers for pediatric congenital heart surgery in Eastern Europe. Project HOPE has also developed and implemented several exchange and training programs which maintain the institute at a level on par with other major European pediatric facilities.

Training programs developed by Project HOPE for Poland include:

Cardiac surgery, cardiology, intensive care medicine and nursing, endocrinology, gastroenterology, gastrointestinal surgery, general surgery, oncology, immunology, biochemistry, sanitation and housekeeping, Ob-Gyn, general pediatrics, neonatology, plastic surgery, pharmacy, hospital administration, dentistry, community health, radiology, anesthesiology, perfusion, medical maintenance, neurology, and neurosurgery.

Before Project HOPE arrived in Poland in 1975, 13 percent of all the children who underwent surgery in Krakow died shortly thereafter (twice the rate in the United States). However, due to efforts of the dedicated HOPE team of doctors, nurses, and medical technicians, the statistic has greatly improved.

Since 1975, Project HOPE has sent over a dozen teams of experts in such fields as kidney disease, leukemia, radiology, neonatology, nursing administration, and even housekeeping. These teams, along with eager Polish medical personnel, generated the strength that put Krakow's institute in the secure position it enjoys today.

One such team of 10 leading American pediatric specialists arrived in Krakow in April 1980. There they helped the institute's staff advance their skills in complex heart repair, cardiology, intensive care, and operating room nursing, anesthesiology, and circulation technology. The program also included the training of Poland's first intensive care physician.

Many personnel from American health institutions have worked hard through Project HOPE to improve health care conditions in Poland. Listed below are some of the institutions represented:

Children's Hospital of Philadelphia, Children's Hospital Medical Center of Harvard University, Primary Children's Medical Center of Salt Lake City, Utah, Duke University, Vanderbilt University, Oschner Clinic (New Orleans), University of North Dakota, University of Minnesota, Children's Hospital of Washington, D.C., University of Virginia, Henry Ford Hospital (Detroit), St. Jude's Children's Hospital, Columbus Children's Hospital, University of West Virginia, Women and Infants Hospital of Rhode Island, Children's Hospital of San Francisco, Children's Hospital of Los Angeles, City of Houston Health Department, and Children's Hospital Medical Center of Oakland.

The American Schools and Hospitals Abroad (ASHA), which is part of the United States Agency for International Development, continues to provide medical equipment and technical expertise to the Institute of Pediatrics in Krakow through Project HOPE.

While the child patient in Poland certainly has a brighter future, Project HOPE's job is far from completed. Future teaching programs in dentistry, plastic surgery, community medicine, and rehabilitation are all planned, as well as additional training in the United States for Polish physicians.

The Project HOPE legacy in Poland will now be extended even further thanks to this new effort with the Polish American Congress.

Mr. Speaker, as an American citizen of Polish ancestry, I am proud of the support the American people have shown the people of Poland during this most difficult and trying time in the history of that gallant country.

But never have I stood more proud of America's commitment to Poland than I do today. For today, from the very grounds of the U.S. Capitol Building, the first of many shipments of medical supplies will be on its way to Poland.

These medical supplies, a voluntary contribution, have been donated by American pharmaceutical manufacturers and medical suppliers to help the Polish people overcome what can only be described as a crisis in health care following the near collapse of that nation's economy.

Thousands of Poles, both old and young, will begin receiving the necessary medical care that they have lacked due to the economic crisis.

Perhaps the greatest aspect of this medical airlift to Poland is that it is entirely supported by the contributions of private citizens and corporations.

Medicines—ranging from common aspirin to complex antitoxins—and medical supplies—from syringes to tongue depressors—are being made available from the Nation's drug manufacturers and medical suppliers.

These critical supplies will be distributed to the medically needy in Poland by the Solidarity Union and Poland's Ministry of Health.

The entire program is being sponsored jointly by Project HOPE and the Polish American Congress.

Americans of Polish ancestry are playing a major role in this medical relief program. As an expression of support from the people of America to the people of Poland, an American flag, a gift from Polish Americans in the United States, will accompany the first shipment of medical supplies to Poland.

This flag is more than a gesture of international goodwill between our two countries. It represents a reaffirmation of America's commitment to help the people of Poland.●

● Mr. ROSTENKOWSKI. Mr. Speaker, I would like to take this opportunity to commend the humanitarian program of emergency medical relief Project HOPE and the Polish American Congress are undertaking for Poland.

Because of the political and economic turmoil in that country, industry is unable to produce the quantity of medicines and essential medical sup-

plies necessary to the health and well-being of its people. This program will provide thousands of the pharmaceutical and medical supplies which are currently in such critical shortage in Poland. Donated by American medical supply manufacturers and pharmaceutical houses at the request of Project HOPE and the Polish American Congress, the supplies will be shipped to that country, where they will be distributed at no cost to hospital patients by the Solidarity Labor Union and the Polish Ministry of Health.

The Polish people are facing a severe health care emergency, and I heartily applaud the concerned Americans who are responding to this call with compassionate and effective action. Their efforts of international good will and humanitarianism have helped to create an alliance between Project HOPE, the Polish American Congress, the Solidarity Labor Union, and the Polish Government.

I join my colleagues, Representatives EDWARD J. DERWINSKI and CLEMENT J. ZABLOCKI, in offering my full support to this outstanding program.●

● Mr. DERWINSKI. Mr. Speaker, I wish to join my colleagues, Representatives DANIEL ROSTENKOWSKI and CLEMENT ZABLOCKI in lending my full support and backing to the new Project HOPE and Polish American Congress emergency medical program in Poland.

This program, sponsored jointly by Project HOPE, the Polish American Congress, the Polish Ministry of Health, and the Solidarity Labor Union, will provide thousands of privately contributed medical supplies to aid the brave people of Poland in combating the grave health care and economic crises they now face on a daily basis. The supplies and medicines donated by concerned American pharmaceutical manufacturers will be distributed to Polish hospital patients by the Ministry of Health and the Solidarity Labor Union.

I commend this humanitarian program as a unique example of the power of the generosity and concern of American citizens. It has forced an alliance between Project HOPE, the Polish American Congress, the Solidarity Labor Union, and the Polish Government.

American citizens of Polish ancestry are strongly supportive of the Polish people during this critical period in their country's history. I, along with all Americans, applaud these shipments of medical supplies to Poland.●

● Mr. FARY. Mr. Speaker, with each passing day, we are reminded that Poland is no longer a sovereign nation, but is under Russian domination. Evidence of these oppressive conditions are highlighted by the contrasting victories which have been reported recently within the Polish Government through the efforts of the Solidarity movement. In Poland, no restrictions can prevent the people from remembering that they are a sovereign nation being held captive.

We must constantly remind the free nations in the west of their plight and hope that the situation will change some day. Yet, the Polish nation has not been vanquished. They remain a separate nation, not swallowed up by the Russians, though deprived of the right to rule themselves, and they look to the West where freedom is proclaimed as a right that belongs of every man.

This unyielding stamina has been manifested through the generosity of thousands of our American citizens. Today a shipment of medicine and medical supplies was sent to Poland to alleviate any rampant disease or sickness resulting from the difficult times she is experiencing. This shipment was valued in the millions of dollars, and through the assistance of Project HOPE will reach areas in Poland where shortages have approached critical levels. This outpouring of generosity and concern from our fellow countrymen for their fatherland impresses upon me the need for a continuous consciousness on all parts, and I commend their efforts.●

SOCIAL SECURITY

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from Illinois (Mrs. COLLINS) is recognized for 5 minutes.

● Mrs. COLLINS of Illinois Mr. Speaker, it galls me that the President would have Americans taken in by his rhetoric regarding the social security system. Calling upon Congress to lay aside partisan politics and then planning to "tell it all" on nationwide television would seem to further implicate those who would reduce social security disability benefits and eliminate the monthly minimum benefit—to name a few.

The President played partisan politics when he got on the phone and lobbied to defeat the previous rule, thereby allowing for only one vote on the Republican Gramma-Latta II reconciliation package as opposed to six votes on six amendments.

The President is playing partisan politics now by attempting to castigate those who he feels are exploiting the social security issue. Time and time again the administration has, in the words of Senator MOYNIHAN, "been conducting a campaign of political terrorism." Mr. Reagan has described a basically sound social security system as "on the verge of going broke" and it is not. It is totally unnecessary to hurt millions of people in terms of cutting off or reducing benefits when there is no immediate need to act now. Yes, our energies should be spent working together to come up with new or just better ways to finance social security. We must not, however, continue to distort the nature of the problem just so that the President can scare the public into meekly accepting serious cutbacks now. I contend that Mr. Reagan is only attempting to balance the budget on the backs of millions upon millions of social security recipients.

Accordingly, as a cosponsor of House Resolution 181, I call upon the President to make serious note that we in the House will do what is necessary to insure that social security benefits not be reduced for current recipients of social security.

I wonder if the president really knows how to "tell it all" and tell the truth about the real status of the social security system?

DEFENSE BUDGET INCREASE BLOCKING LOWER INTEREST RATES

(Mr. SEIBERLING asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. SEIBERLING. Mr. Speaker, Sunday's Washington Post carried a cogent article by its distinguished chief economics writer, Hobart Rowan, concerning the severe damage that high interest rates continue to inflict on our economy and pointing out that they are the direct consequence of the budgetary and tax policies being pushed by the Reagan administration.

As we all know, high interest rates threaten a national economic crisis, especially in the automobile, housing, and savings industries. It is virtually impossible for middle- or lower-income families to buy a decent home, and it is becoming prohibitive for them to buy an automobile. This in turn has a devastating impact on the industries supplying the housing and automobile industries, such as the rubber, steel, and machine tool industries.

According to Mr. Rowan, the distinguished Wall Street economist, Henry Kaufman, predicts that within a year, unless the Government curbs the big military buildup, the prime rate will top the 21.5-percent level set last year. Mr. Rowan also reports that this thesis is not challenged by Federal Reserve officials, when speaking off the record. One source is quoted as saying, "The financial markets don't believe Reagan will be able to cut the Federal deficit. If they were able to cut their proposed defense spending increase in half, you'd see an immediate reduction in interest rates."

Mr. Speaker, as the late President Eisenhower pointed out in his farewell address to the American people over 20 years ago, every plane, every tank, every gun, is paid for by lowering the living standards of the people. It has become abundantly clear that the

high interest rate policy, coupled with cuts in social and human life programs, is the device by which the Reagan administration proposed to pay for its military spending increases. They will be paid for by sacrificing the ability of millions of Americans to obtain decent housing, adequate transportation, and full employment.

Unfortunately, if the defense spending increase is to be cut in half, it is not likely to be done by the House of Representatives, which only last week voted the huge sum of $136 billion as the first installment on next year's defense budget. All efforts to make significant reductions in this astronomical spending bill were turned aside.

There is still a glimmer of hope, however. The administration itself is rumored to be having second thoughts. OMB Director Stockman has reportedly already negotiated with the Defense Department a 5-percent cut in next year's budget levels, in case the rosey predictions of the administration's economic program turn out to have been overly optimistic. A 5-percent reduction in the $226 billion defense budget for 1982 would amount to nearly $13 billion, which is almost half of President Reagan's proposed increase over the current level of defense spending programs.

If it is a fact that the Defense Department has agreed to a 5-percent reduction, that is clear proof that the administration's current defense budget is higher than necessary. That being the case, and considering the desperate urgency of bringing down interest rates, one may be entitled to ask why the administration is waiting until next year before making the proposed cuts in defense spending.

The full text of Mr. Rowan's article follows these remarks:

HIGH LOAN RATES MAY BE TOO COSTLY FOR ECONOMY

Interest rates are much too high. They threaten a national economic crisis, especially in the auto, housing and thrift industries.

Quite apart from the recent well-publicized complaints of European leaders that high U.S. interest rates are creating problems for them, the objective evidence is that a monetarist policy being pursued by the Federal Reserve Board has pushed interest rates higher than they ought to be—and higher than the Fed itself expected them to be.

Even President Reagan's economic advisers, according to one of them, are "puzzled" and "confused" about the persistence of high interest rates although they propose to stick with present policy, a decision based "more on confusion than conviction." This is the view of William Niskanen, one of the three members of the Council of Economic Advisers.

One gets the feeling that Federal Reserve policymakers are compulsively flirting with economic disaster because they are afraid to shift gears, believing that as bad as things are now, they would be even worse if policy were prematurely eased.

In part, the puzzlement cited by Niskanen arises because interest rates have continued to soar even though inflation has come down dramatically. The Consumer Price Index is running at an annual rate of 8.2 percent, compared with 13.3 percent two years ago. When measured against a 14½ percent Treasury bill rate, the "real" interest rate is more than 6 percent, well above the conventional level of 2 to 3 percent.

Even if one decides to measure inflation not by the CPI but by a higher, assumed underlying inflation rate of 9 percent or so, the "real" interest rate is at an historic peak. It's a complete reversal of the pattern two years ago when "real" interest rates were negative because a 10 percent yield was running behind the 13.3 percent inflation rate.

The consequences of a policy that keeps interest rates this high are dramatic. Domestic auto sales have collapsed to an annual rate of about 5 million, a 20-year low. Meanwhile, the savings and loan industry has been pushed to the edge of a disaster that could force the government into a bailout costing as much as $50 billion, according to economist Alan Greenspan.

Niskanen says that at a recent informal session among six government economists, including some from the Fed, "there were eight different explanations (for the peak level of real interest rates)—and we didn't have a good one."

It doesn't seem all that mysterious: In a telephone interview, Salomon Bros. money expert Henry Kaufman said the record real interest-rate level "reflects the heavy burden being placed on monetary policy. In the next 12 months, we'll have a major tax cut, increased defense spending and bigger federal deficits. In that environment, what can you expect from interest rates?" Kaufman predicts that within a year, unless the government curbs the big military build-up, the prime rate will top the 21½ percent level set last year.

Kaufman's basic theme isn't challenged at the Fed when officials speak off the record. A well-posted source uses these plain words: "We face a real dilemma: The financial markets don't believe Reagan will be able to cut the federal deficit. If they [the Reagan administration] were to cut their proposed defense spending increase in half, you'd see an immediate reduction in interest rates.

"But if we were to change monetary policy now by pumping more reserves into the market, we would lose all our credibility, and long-term rates would rise at least 2 or 3 points. It's one hell of a problem because autos, housing, and the S&Ls are in trouble. But so long as Reagan puts all of the burden on us, we've got no choice."

In effect, the Federal Reserve has consciously made a decision that the economy overall is resilient enough to take its austere policy even though the interest-sensitive sectors such as housing and the thrifts are in serious trouble. "In a way," says a Fed source, "as we continue this policy—although I hasten to say that's not why we are doing it—we're putting pressure on the Reagan administration. We're forcing them to face up to the significance of the big budget deficit."

But how long can this lethal game go on? The economy appears to be entering a general downturn or recession. Richard Pratt, head of the Federal Home Loan Bank Board, says that fully one-third of the nation's 4,700 S&Ls "are not viable" under today's conditions of high interest rates.

Greenspan reports that because there is a limit to the number of strong institutions that can absorb weak ones, many S&Ls will have to be liquidated rather than merged out of existence. Insurance will protect depositors (up to $100,000), but the government may have to put up so much cash or credit that it could "seriously threaten the success of the president's anti-inflation program," Greenspan concludes.

Thus, the wisdom of blindly following a high-interest-rate policy needs to be reexamined. The Reagan administration is beginning to worry enough about the problem to be predicting that interest rates will be coming down. But you don't get that kind of soothing assurance from the Fed. In the end, it may take a corporate bankruptcy or an international financial crisis to force a change in policy, and in the underlying monetarist dogma.

LEAVE OF ABSENCE

(By unanimous consent, leave of absence was granted to):

Mr. YOUNG of Alaska (at the request of Mr. MICHEL), for July 21 and 22, on account of official business.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. HATCHER) to revise and extend their remarks and include extraneous material:)

Mr. BINGHAM, for 5 minutes, today.
Mr. YATRON, for 30 minutes, today.
Mr. FORD of Michigan, for 5 minutes, today.
Mr. GONZALES, for 15 minutes, today.
Mr. ANNUNZIO, for 5 minutes, today.
Mr. SHAMANSKY, for 5 minutes, today.
Mr. DANIELSON, for 30 minutes, today.
Mr. BROWN of California, for 10 minutes, today.
Mr. PHILLIP BURTON, for 5 minutes, today.
Mr. DICKS, for 5 minutes, today.
Mr. WYDEN, for 5 minutes, today.
Mr. ZABLOCKI, for 30 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. MILLER of Ohio, to revise and extend his remarks prior to the vote on H.R. 4034 today.

Mr. HANSEN of Utah, to revise and extend his remarks following Mr. CRAIG.

(The following Members (at the request of Mr. SMITH of Oregon) and to include extraneous matter:)

Mr. GOODLING.
Mr. ROUSSELOT.
Mr. MARRIOTT.

SENATE BILLS REFERRED

Bills of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 863. An act to establish a uniform law on the subject of bankruptcies; to the Committee on the Judiciary; and

S. 1224. An act to amend the provisions of title 39, United States Code, relating to the use of the frank, and for other purposes; to the Committee on Post Office and Civil Service.

ADJOURNMENT

Mr. YATRON. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 6 o'clock and 59 minutes p.m.), the House adjourned until tomorrow, Wednesday, July 22, 1981, at 10 a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1842. A letter from the Secretary of the Army, transmitting a report on the proposed removal of all chemical munitions from Rocky Mountain Arsenal, Colo., to Tooele Army Depot, Utah, pursuant to section 809 of Public Law 96-418; to the Committee on Armed Services.

1843. A letter from the Director, Defense Security Assistance Agency, transmitting a report on the impact on U.S. readiness of the Navy's proposed sale of certain defense equipment and services to Japan (Transmittal No. 81-76), pursuant to section 813 of Public Law 94-106; to the Committee on Armed Services.

1844. A letter from the Chairman, Board of Governors of the Federal Reserve System, transmitting the Board's midyear monetary policy report, pursuant to section 2A of the Federal Reserve Act, as amended (92 Stat. 1897); to the Committee on Banking, Finance and Urban Affairs.

1845. A letter from the Secretary of State, transmitting a draft of proposed legislation to authorize the participation of the United States in a multinational force and observers to implement the treaty of peace between Egypt and Israel; to the Committee on Foreign Affairs.

1846. A letter from the Assistant Legal Adviser for Treaty Affairs, Department of State, transmitting copies of international agreements, other than treaties, entered into by the United States, pursuant to 1 U.S.C. 112b(a); to the Committee on Foreign Affairs.

1847. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Air Force's intention to offer to sell certain defense services to Saudi Arabia (Transmittal No. 81-74), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on Foreign Affairs.

1848. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Navy's intention to offer to sell certain defense equipment and services to Japan (Transmittal No. 81-76), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on Foreign Affairs.

1849. A letter from the Acting Comptroller General of the United States, transmitting a list of reports issued or released by the General Accounting Office during June 1981, pursuant to section 234 of the Legislative Reorganization Act of 1970; to the Committee on Government Operations.

1850. A letter from the Secretary of the Interior, transmitting financial exhibits of the Colorado River storage project and participating projects for fiscal year 1980, pursuant to section 6 of the act of April 11, 1956; to the Committee on Interior and Insular Affairs.

1851. A letter from the Acting Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting reports concerning visa petitions approved according certain beneficiaries third- and sixth-preference classification, pursuant to section 204(d) of the Immigration and Nationality Act, as amended; to the Committee on the Judiciary.

1852. A letter from the Assistant Secretary of State for Congressional Relations, transmitting a draft of proposed legislation to give effect to the Protocol Amending the Convention for the Preservation of the Halibut Fishery of the Northern Pacific Ocean and Bering Sea, signed at Washington on March 29, 1979; to the Committee on Merchant Marine and Fisheries.

1853. A letter from the Assistant Secretary of State for Congressional Relations, transmitting a determination by the Acting Secretary of State waiving the requirement that certain foreign assistance funds for Brazil, Mexico, Costa Rica, El Salvador, Ecuador, and Peru be withheld to cover the compensation from the Treasury paid to owners of fishing vessels seized by those countries during the period February 1, 1975, through July 2, 1980, pursuant to section 5(b) of the Fishermen's Protective Act of 1967, as amended, and Executive Order 11772; jointly, to the Committees on Foreign Affairs and Merchant Marine and Fisheries.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. BEILENSON: Committee on Rules. House Resolution 187. Resolution waiving certain points of order against H.R. 4209, a bill making appropriations for the Department of Transportation and related agencies for the fiscal year ending September 30, 1982, and for other purpose (Rept. No. 97-187). Referred to the House Calendar.

Mr. ZEFERETTI: Committee on Rules. H. Res. 188. Resolution waiving certain points of order against H.R. 4169, a bill making appropriations for the Department of Commerce, Justice, and State, the Judiciary, and related agencies for the fiscal year ending September 30, 1982, and for other purposes (Rept. No. 97-188). Referred to the House calendar.

Mr. BONIOR of Michigan: Committee on Rules. H. Res. 189. Resolution providing for the consideration of H.R. 3275, a bill to amend the Civil Rights Act of 1957 to authorize appropriations for the Civil Rights Commission (Rept. No. 97-189). Referred to the House calendar.

Mr. DINGELL: Committee on Energy and Commerce. H.R. 2120. A bill to facilitate the ability of product sellers to establish product liability risk retention groups, to facilitate the ability of such sellers to purchase product liability insurance on a group basis, and for other purposes with an amendment (Rept. No. 97-190). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BENNETT (for himself and Mr. MCCOLLUM):

H.R. 4212. A bill to provide that the repeal of the minimum social security benefit shall not apply to individuals who are currently receiving monthly insurance benefits under title II of the Social Security Act or who initially become entitled to such benefits prior

to 1984; to the Committee on Ways and Means.

By Mr. BROWN of California (for himself and Mr. DE LA GARZA):

H.R. 4213. A bill to establish the Arid Lands Renewable Agricultural Resources Corporation; jointly, to the Committees on Agriculture and Rules.

By Mr. BROWN of Ohio (for himself and Mr. CONABLE):

H.R. 4214. A bill to amend the Federal charter of the Boy Scouts of America with respect to its annual report to Congress; to the Committee on the Judiciary.

By Mr. COLLINS of Texas:

H.R. 4215. A bill to establish a private corporation for the purpose of owning and administering certain railroads and railroad properties currently owned or financially supported by the United States; to the Committee on Energy and Commerce.

By Mr. DONNELLY:

H.R. 4216. A bill to amend the Internal Revenue Code of 1954 to expand the dwelling units with respect to which the credit for energy conservation expenditures may be allowed to dwelling units the construction of which was substantially completed before January 1, 1980; to the Committee on Ways and Means.

By Mr. EVANS of Georgia:

H.R. 4217. A bill to designate the building known as the Veterans' Administration Medical Center in Dublin, Ga., as the "Carl Vinson Veterans' Administration Medical Center"; to the Committee on Veterans' Affairs.

By Mr. EVANS of Indiana:

H.R. 4218. A bill to amend the National Manufactured Housing Construction and Safety Standards Act of 1974; to the Committee on Banking, Finance and Urban Affairs.

By Mr. FRENZEL:

H.R. 4219. A bill regarding the tariff treatment of caffeine; to the Committee on Ways and Means.

By Mr. GUARINI:

H.R. 4220. A bill to provide for a 10-year extension of provisions providing for minimum insurance benefits under title II of the Social Security Act for individuals currently entitled to such benefits and for other individuals who are vow-of-poverty members of religious orders and a 5-year extension of such provisions for other individuals; to the Committee on Ways and Means.

By Mr. JENKINS:

H.R. 4221. A bill to amend the Tariff Schedules of the United States with respect to corduroy and velveteen; to the Committee on Ways and Means.

By Mr. LUJAN:

H.R. 4222. A bill to amend title 38, United States Code, to reestablish educational assistance benefits for veterans under chapter 34 of that title; to the Committee on Veterans' Affairs.

H.R. 4223. A bill to establish a Nuclear Fuel Management Corporation; jointly, to the Committees on Energy and Commerce, Interior and Insular Affairs, and Science and Technology.

By Mr. MARRIOTT:

H.R. 4224. A bill to amend the Internal Revenue Code of 1954 to repeal the estate and gift taxes and the tax on generation-skipping transfers; to the Committee on Ways and Means.

By Mr. WALGREN:

H.R. 4225. A bill to amend the Communications Act of 1934 to establish certain limitations relating to the ownership of cable television franchises by certain foreign entities; to the Committee on Energy and Commerce.

H.R. 4226. A bill to authorize the project for flood control on Saw Mill Run, Pa.; to the Committee on Public Works and Transportation.

By Mr. WYDEN:

H.R. 4227. A bill to amend title XVIII of the Social Security Act to remove the 3-day prior hospitalization requirement for coverage of extended care services; jointly, to the Committees on Energy and Commerce and Ways and Means.

By Mr. NATCHER:

H. J. Res. 308. Joint resolution making an urgent supplemental appropriation for the Department of Health and Human Services for the fiscal year ending September 30, 1981; to the Committee on Appropriations.

By Mrs. HECKLER:

H.J. Res. 309. Joint resolution designating November 27, 1981, as "National Lifeliner Day"; to the Committee on Post Office and Civil Service.

By Mr. LEBOUTILLIER (for himself and Mr. NELLIGAN):

H. Con. Res. 159. Concurrent resolution expressing the sense of the Congress that the United States should not participate in the Yamal natural gas pipeline project, and urging the President to secure the cooperation of the nations of Western Europe and Japan in developing alternative free world energy sources; to the Committee on Foreign Affairs.

By Mr. REUSS (for himself, Mr. ST GERMAIN and Mr. FAUNTROY):

H. Con. Res. 160. Concurrent resolution expressing the sense of the Congress with respect to monetary policy, inflation, and high interest rates; to the Committee on Banking, Finance and Urban Affairs.

By Mr. MICHEL (for himself and Mr. LOTT):

H. Res. 190. Resolution expressing the sense of the House of Representatives to save the social security system; to the Committee on Ways and Means.

By Mr. ROSE:

H. Res. 191. Resolution expressing the sense of the House of Representatives with respect to the availability of the transmissions of the House broadcasting system; to the Committee on Rules.

MEMORIALS

Under clause 4 of rule XXII,

162. The SPEAKER presented a memorial of the Senate Commonwealth of Pennsylvania, relative to commuter rail service in southeastern Pennsylvania; to the Committee on Energy and Commerce.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. FITHIAN:

H.R. 4228. A bill for the relief of Dewey J. Hassler; to the Committee on the Judiciary.

By Mr. SNYDER:

H.R. 4229. A bill for the relief of Yong K. Judd, Joanne K. Judd, Patrick K. Judd, Anne H. Judd, and Julie K. Judd; to the Committee on the Judiciary.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 52: Mr. LEBOUTILLIER, Mr. HORTON, and Mr. PATTERSON.

H.R. 215: Mr. MILLER of Ohio.

H.R. 247: Mr. BARNES, Mr. BREAUX, and Mr. STENHOLM.

H.R. 741: Mr. MCCOLLUM and Mr. COATS.

H.R. 1300: Mr. DORGAN of North Dakota.

H.R. 1353: Ms. FIEDLER.

H.R. 1465: Mr. BARNARD, Mr. BEREUTER, Mr. CONYERS, Mr. COTTER, Mr. DWYER, Mr. DYSON, Mr. EDWARDS, of Oklahoma, Mr. FORSYTHE, Mr. HATCHER, Mr. HORTON, Mr. IRELAND, Mr. LANTOS, Mr. MARRIOTT, Mr. MCDONALD, Mr. MITCHELL of Maryland, Mr. MOORHEAD, Mr. NEAL, Mr. NOWAK, Mr. PEPPER, Mr. RATCHFORD, Mr. ROE, Mr. SIMON, Mr. SUNIA, Mr. WEAVER, Mr. WILSON, Mr. WORTLEY, and Mr. YATRON.

H.R. 1596: Mr. GUARINI.

H.R. 1603: Mr. LEACH of Iowa.

H.R. 1605: Mr. WEAVER.

H.R. 1648: Mr. BENEDICT, Mr. FOGLIETTA, Mr. NELSON, Mr. ROE, Mr. SHAW, and Mr. SIMON.

H.R. 1800: Mr. TRAXLER and Mr. SMITH of Iowa.

H.R. 1949: Mr. FORD of Tennessee, Mr. RINALDO, Mr. MURPHY, Mr. RATCHFORD, and Mr. SCHUMER.

H.R. 2052: Mr. MCEWEN.

H.R. 2251: Mr. TRAXLER and Mr. SMITH of Iowa.

H.R. 2640: Mr. LOEFFLER.

H.R. 3091: Mr. STOKES, Mr. ROE, Mr. ROEMER, and Mr. SOLOMON.

H.R. 3231: Mr. WOLPE and Mr. OTTINGER.

H.R. 3236: Mr. SNYDER, Mr. HUGHES, and Mr. MARRIOTT.

H.R. 3267: Mr. SHAMANSKY.

H.R. 3298: Mr. FAZIO, Mr. FORD of Tennessee, Mr. WEAVER, Mr. BONIOR of Michigan, Mr. SCHUMER, and Mr. HYDE.

H.R. 3355: Mr. LANTOS, Mr. AKAKA, Mr. LAFALCE, Mr. HERTEL, Mr. VENTO, Mr. PETRI, Mr. GINGRICH, Mr. RODINO, Mr. DOWNEY, Mr. WYDEN, Mr. LEHMAN, Mrs. ROUKEMA, Mr. WHITEHURST, Mr. STOKES, Mr. PORTER, Mr. MITCHELL of New York, Mrs. COLLINS of Illinois, Mr. MITCHELL of Maryland, Mrs. CHISHOLM, Mr. WILLIAMS of Montana, Mr. CORCORAN, Mr. FAZIO, Mr. EDGAR, Mrs. BOUQUARD, Mr. BARNARD, Mr. DIXON, Mr. MINETA, Mr. DELLUMS, Mr. FOGLIETTA, Mr. SOLARZ, Mr. DUNN, Mr. PATTERSON, Mr. ROSENTHAL, Mrs. SCHNEIDER, Mr. CORRADA, Mr. REUSS, Mr. HOWARD, Mr. NEAL, Mr. DENARDIS, Mr. MOTTL, Mr. BEDELL, Mr. PRICE, Mr. MAVROULES, Mr. ZEFERETTI, Mr. MOLLOHAN, Mr. YOUNG of Alaska, Mr. FRENZEL, Mr. JAMES K. COYNE, Ms. FERRARO, Mr. FORSYTHE, Mr. MCKINNEY, Mr. RICHMOND, Mr. WEISS, Mr. CONTE, Mr. BONIOR of Michigan, Mr. CONYER, Mr. OBERSTAR, Mr. PRITCHARD, Mr. ADDABBO, Mr. COELHO, Mr. KILDEE, Mr. HUCKABY, Mr. TAUKE, Mr. KOGOVSEK, Mr. WON PAT, Mr. MCCLOSKEY, Mr. GEJDENSON, Mr. GOODLING, Mr. DWYER, Mr. MATSUI, Ms. OAKAR, Mr. HOYER, Mr. SMITH of New Jersey, Mr. JEFFORDS, Mr. ROBERTS of North Dakota, Mr. GUARINI, Mr. HUGHES, Mr. EVANS of Iowa, Mr. FORD of Tennessee, Mr. LELAND, and Mr. STENHOLM.

H.R. 3363: Mr. WATKINS, Mr. LENT, Mrs. BOUQUARD, Mr. COELHO, Mr. ANDREWS, Mr. KRAMER, Mr. BROOMFIELD, Mr. NAPIER, Mr. WOLPE, Mr. LEBOUTILLIER, Mr. DERWINSKI, Mr. EDWARDS of Oklahoma, Mr. CAMPBELL,

Mr. HEFNER, Mr. KOGOVSEK, and Mr. EVANS of Georgia.

H.R. 3540: Mr. PASHAYAN.

H.R. 3575: Mr. BEARD, Mr. BENEDICT, Mr. BROOMFIELD, Mr. BROWN of Colorado, Mr. CAMPBELL, Mr. COATS, Mr. FAUNTROY, Mr. GINGRICH, Mr. GREGG, Mr. GRISHAM, Mr. HATCHER, Mr. HEFTEL, Mr. HERTEL, Mr. HORTON, Mr. HOYER, Mr. HUGHES, Mr. LEBOUTILLIER, Mr. MONTGOMERY, Mr. PATTERSON, Mr. PERKINS, Mr. RAHALL, Mr. ROBINSON, Mr. SHAMANSKY, Mr. STOKES, Mr. WEAVER, Mr. WOLF, Mr. WYDEN, Mr. YATRON, and Mr. BOWEN.

H.R. 3613: Mr. WAXMAN, Mr. AKAKA, Mr. QUILLEN, Mr. LANTOS, Mr. MATSUI, and Mr. WAMPLER.

H.R. 3704: Mr. BEDELL.

H.R. 3773: Mr. SILJANDER, Mr. BONIOR of Michigan, Mr. EVANS of Georgia, Mr. MADIGAN, Mr. DUNN, Mr. WOLPE, Mr. MONTGOMERY, and Mr. GINGRICH.

H.R. 3820: Mr. NAPIER, Mr. BAFALIS, Mr. WILSON, Mr. SILJANDER, Mr. YOUNG of Alaska, Mr. GOLDWATER, Mr. SMITH of New Jersey, Mr. ERTEL, Mr. PARRIS, and Mr. KRAMER.

H.R. 3856: Mr. ATKINSON.

H.J. Res. 264: Mr. NELSON, Mr. GUNDERSON, Mr. SHUMWAY, Mr. MICA, Mr. HILER, Mr. GOODLING, and Mr. MURPHY.

H.J. Res. 267: Mr. GOODLING and Mr. MURPHY.

H.J. Res. 272: Mr. MURPHY, Mr. REUSS, Mr. GORE, Mr. LAGOMARSINO, Mr. FOGLIETTA, Mr. RICHMOND, Mr. HORTON, Mr. STOKES, Mr. BARNES, Mr. FORSYTHE, Mr. BEILENSON, Mr. KILDEE, Mr. BEVILL, Mr. HATCHER, Mr. BAILEY of Pennsylvania, Mr. JACOBS, Mr. MCEWEN, Mr. FRENZEL, Mr. WOLPE, Mrs. HOLT, Mr. NEAL, Mrs. COLLINS of Illinois, Mr. DWYER, Mr. FROST, Mr. WOLF, Mr. SHUMWAY, Mr. CROCKETT, Mr. ERDAHL, Mr. CORRADA, Mr. DIXON, Mr. GUARINI, Ms. MIKULSKI, Mr. FAZIO, Mr. SIMON, Mr. FAUNTROY, and Mr. HUTTO.

H.J. Res. 295: Mr. ADDABBO, Mr. BEVILL, Mr. CARMAN, Mr. CHAPPELL, Mr. COATS, Mr. DWYER, Mr. DYMALLY, Mr. DYSON, Mr. ENGLISH, Mr. EVANS of Georgia, Mr. FARY, Mr. FASCELL, Mr. FAUNTROY, Mr. FAZIO, Ms. FERRARO, Ms. FIEDLER, Mr. FORD of Tennessee, Mr. FRANK, Mr. GINGRICH, Mr. GRISHAM, Mr. GUARINI, Mr. HATCHER, Mr. HYDE, Mr. JEFFORDS, Mr. KILDEE, Mr. LAFALCE, Mr. LEHMAN, Mr. LOWERY of California, Mr. LUNGREN, Mr. MCDADE, Mr. MCGRATH, Ms. OAKAR, Mr. RANGEL, Mr. REGULA, Mr. ROTH, Mrs. SCHNEIDER, Mr. SHAMANSKY, Mr. SHAW, Mr. SIMON, Mr. SMITH of New Jersey, Mr. SOLARZ, Mr. STOKES, Mr. SUNIA, Mr. WALGREN, Mr. WEBER of Minnesota, Mr. WILSON, and Mr. YATRON.

H. Con. Res. 82: Mr. OBERSTAR, Mr. HAGEDORN, Mr. LEATH of Texas, Mr. FAZIO, Mr. GRAY, Mr. BROWN of Ohio, Mr. GOODLING, and Mr. DUNN.

H. Res. 158: Mr. HUGHES, Mr. CORRADA, and Mr. BARNES.

H. Res. 173: Mr. LUNDINE, Mr. COELHO, Mr. RAHALL, and Mr. HUTTO.

H. Res. 181: Mr. DE LUGO and Mr. ANNUNZIO.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

139. By the SPEAKER: Petition of the Southern New England Conference of the United Methodist Church, Pittsfield, Mass., relative to Afghanistan and El Salvador; to the Committee on Foreign Affairs.

140. Also, petition of the Southern New England Conference of the United Methodist Church, Pittsfield, Mass., relative to racism and the Ku Klux Klan; to the Committee on the Judiciary.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 4035

By Mr. LUJAN:

—On Page 2 after line 15, insert the following new paragraph:

"PAYMENTS IN LIEU OF TAXES

"For expenses necessary to carry out the provisions of Public Law 94-565, including administrative expenses, $45,000,000.".

By Mr. SIMON:

—Page 36, line 22, insert ", of which not less than $5,000,000 is to be used for the Carbondale Mining Technology Center located at Carbondale, Illinois" after "until expended".

By Mr. WEAVER:

—In section 302, page 53, line 5, after "by", strike "the purchaser" and insert in lieu thereof "any purchaser of unprocessed timber from Federal lands west of the 100th meridian in the contiguous 48 States".

H.R. 4119

By Mr. BROWN of Colorado:

—Page 7, line 5, immediately before the period, insert ": *Provided further*, That the foregoing limitation shall not apply to purchase from Colorado State University Research Foundation of approximately 160 acres within the boundaries of the Central Plains Experimental Range, Nunn, Colorado, for not to exceed $115,000".

H.R. 4121

By Mr. ADDABBO:

—On page 10, after line 2, insert the following general provisions:

SEC. 105. None of the funds made available to the Treasury Department by this Act shall be available to formulate, implement, carry out or caused to be carried by directive, order, regulation or otherwise the Customs Service project known as Pipeline No. 524 in New York City or any similar project of like purpose or nature in whole or in part.

By Mr. GLICKMAN:

—On page 10, line 14 after the period add the following: "*Provided*, That no funds appropriated herein shall be available for implementing special bulk third-class rates for 'qualified political committees' authorized by Public Law 95-593.".

By Mr. OTTINGER:

—Page 11, line 6, strike out "$13,200,000" and insert in lieu thereof "$12,200,000".

—Page 11, line 21, strike out "$22,278,000" and insert in lieu thereof "$21,278,000".

—Page 12, line 3, strike out "$3,674,000" and insert in lieu thereof "$3,374,000".

—Page 12, line 12, strike out "$185,000" and insert in lieu thereof "$168,000".

—Page 12, line 22, strike out "$1,640,000" and insert in lieu thereof "$1,591,000".

—Page 13, line 5, strike out "$2,263,000" and insert in lieu thereof "$2,205,000".

—Page 13, line 10, strike out "$3,939,000" and insert in lieu thereof "$3,839,000".

—Page 25, line 20, strike out "$1,106,000" and insert in lieu thereof "$845,000".

H.R. 4144

By Mr. DECKARD:

—Page 30, line 20, strike the figure "$137,743,000" and insert in lieu thereof "$121,943,000".

By Mr. FRANK:

—Page 2, beginning on line 15, strike out "$154,414,000, to remain available until expended" and insert in lieu thereof "$154,114,000, to remain available until expended: *Provided*, That none of the funds appropriated by this paragraph may be used for the collection and study of information (including any surveys and detailed studies and the preparation of any plans and specifications) pertaining to the North Nashua Flood Control Project, located in the State of Massachusetts".

—Page 3, line 1, strike out "$1,509,941,000" and insert in lieu thereof "$1,371,726,000".

—Page 3, beginning on line 1, strike out "$1,509,941,000, to remain available until expended" and insert in lieu thereof "$1,492,121,000, to remain available until expended: *Provided*, That none of the funds appropriated by this paragraph may be used for the Stonewall Jackson Lake Project, located in the State of West Virginia (including to acquire any land for such project or to commence construction on such project)".

By Mr. PRITCHARD:
—Page 3, line 6, strike out "$1,509,941,000" and insert in lieu thereof "$1,320,941,000".

By Mr. ROEMER:
—Page 3, line 1, strike out "$1,509,941,000" and insert in lieu thereof "$1,259,941,000".

H.R. 4209

By Mr. PEYSER:
—Include the following: "None of the funds in this Act shall be used to mandate any reduction under the Washington National Airport Policy of the number of air carrier slots, except air taxis, at Washington National Airport below the number authorized on July 20, 1981.".

EXTENSIONS OF REMARKS

CAPTIVE NATIONS WEEK

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 15, 1981

● Mr. BIAGGI. Mr. Speaker, since the 86th Congress, under President Eisenhower, authorized the proclamation to pay tribute to the captive nations of the world, we have been recognizing the third week of July as the Annual Observance of Captive Nations. This 23d year of observation is of particular significance. A new sense of optimism pervades the Soviet bloc countries as unprecedented steps are being taken to resist Soviet-imposed rule.

Beginning with the Soviet invasion of Armenia in 1920, the list of Soviet occupied nations has steadily grown, leaving no continent unscathed by their tyrannical rule. Invasion and occupation of Afghanistan marked the Soviet's most recent act of aggressive expansionism. However, the Afghan's valiant resistance and open challenge to the Soviets serve as an example of the increased nationalism and determination to be free, which characterizes the strength of the freedom fighters throughout the world.

The result of the revolutionary events that are taking place in captive nations today will be as significant as was the outcome of the Russian Revolution. In Poland, unprecedented steps are being taken to defy Soviet pressures. The unification and strength of the Solidarity movement in Poland has led to the first social upheaval on an all-national scale in a Soviet-enforced Communist state. The institution of the secret ballot is a major step in their efforts to establish a democratic process and oust the unwanted Soviet power.

The right to self-determination is a fundamental and moral objective of the United States. The United States continues to open its doors to the oppressed peoples in the world, who seek freedom and refuge in this country. Americans will continue such support of these people, but why should individuals such as the so-called boat people from Indochina be forced to risk their lives and flee from the lands and people they love, in order to experience the freedom that is rightfully theirs according to international laws? We must reaffirm our dedication to the spread and preservation of human rights to all peoples who have been forced to fight for what is inherently theirs.

The present administration has been very effective so far in its endeavors to deter further Soviet adventurism and expressionism. President Reagan's firm stance against the Soviet Union has proven to be successful, beginning with his choice of Alexander Haig as Secretary of State, and with the support he has received from Congress for his call for increased defense spending. However, the fight to end the spread of Communist totalitarianism is hardly over. As long as the Soviets continue to station troops on the borders of the Eastern bloc countries, ready to invade; as long as they continue to rule by force and terror; and as long as they continue to deny people such natural rights as the freedoms of expression, religion, and the right to emigrate, the United States must continue to encourage and pledge our full support for all captive nations in their efforts to be free.●

NUCLEAR FUEL MANAGEMENT CORPORATION

HON. MANUEL LUJAN, JR.

OF NEW MEXICO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 21, 1981

● Mr. LUJAN. Mr. Speaker, I am proposing today the creation of a Nuclear Fuel Management Corporation to provide reprocessing and spent fuel storage services to the nuclear industry.

For more than 4 years, since President Carter deferred reprocessing indefinitely, we have failed to address the problems of the back end of the nuclear fuel cycle in this country. Despite its commitment to do so, the last administration never made good on its promise to provide away-from-reactor storage for spent nuclear fuel. It made little or no progress in resolving our nuclear waste problems. And, of course, it destroyed the prospects for commercial reprocessing by reversing longstanding Federal policy to encourage such efforts.

The need for a rational national reprocessing policy is more urgent now than ever if the United States is to deal with the relentless buildup of spent nuclear fuel and have a viable breeder reactor program. Our breeder reactor program will require large quantities of plutonium by 1990. Because this plutonium is not available from the weapons program, it must be produced from reprocessing operations if we are to avoid the absurd situation of importing plutonium.

Besides removing valuable uranium and plutonium from spent nuclear fuel, reprocessing will greatly enhance the management of radioactive wastes by placing these wastes in a chemically stable form with a severalfold reduction in volume compared to storing spent fuel.

Reprocessing also provides a solution to the problem of dealing with spent fuel. After President Carter deferred reprocessing, the Government announced it would accept, take title to, and ultimately dispose of spent fuel delivered to an AFR facility.

The Department of Energy now estimates that additional interim storage capacity for spent nuclear fuel will be required by 1986. More than 6,000 tons of capacity will be needed by 1995. The temporary storage of spent fuel at a reprocessing facility, and the reprocessing itself, will help deal with this problem.

The Reagan administration has recognized and endorsed the benefits of reprocessing. It is not, however, willing to commit the resources necessary to a Federal reprocessing program. The private sector, for its part, is unwilling to launch a private reprocessing effort in light of past policy changes and future regulatory uncertainties. This stalemate is not in the national interest.

The Nuclear Fuel Management Corporation I am proposing would combine the public and private interest in closing the back end of the fuel cycle. The Corporation would be the vehicle for a partnership between Government and industry to provide reprocessing and spent fuel storage services.

The Corporation would be organized for profit, with a majority of the first directors appointed by the President. In its early stages, the Corporation would be controlled by the Government. Ultimately it would be privately owned and controlled.

The Corporation would acquire the Barnwell nuclear fuel plant on terms and conditions agreeable to its owners and the Corporation. The Barnwell plant is the newest and largest facility in the world for reprocessing light water reactor fuel elements and the only facility in the United States currently capable of reprocessing spent fuel from commercial power reactors.

The acquisition of Barnwell would provide the Corporation with a functioning reprocessing facility in the shortest possible time at the lowest possible cost.

The costs of acquiring Barnwell could be met through the issuance of stocks and bonds by the Corporation, as well as by advance payments made

by utilities for reprocessing and spent fuel storage services.

It should be emphasized that any reprocessing plant, including Barnwell, is capable of producing large revenue streams. For example, a current estimate for Barnwell prepared by International Energy Associates suggests revenues as high as $221 million for spent fuel storage and cumulative revenues from reprocessing as high as $2.5 billion by the year 2000.

The proposed Corporation could also play an important international role by contracting with foreign governments and corporations for reprocessing services. Foreign governments continue to express a strong interest in participating in a U.S. reprocessing operation and could, of course, contribute substantially to its costs. To the extent that the Corporation can offer reprocessing services to countries which might otherwise build reprocessing plants, it also serves a vital nonproliferation function.

The Corporation would also be authorized to conduct research and development programs in such areas as nuclear waste solidification, safeguards development and training and plutonium management.

Although the Corporation would not be an agency or establishment of the Federal Government, it would not be totally independent either of Congress or the executive branch. Any Federal funds to support research and development programs of the Corporation or to purchase plutonium from the Corporation would, of course, have to be appropriated by Congress. The Corporation's officers and employees would be required to testify before and cooperate with those committees of Congress with jurisdiction over the Corporation's activities. And finally, the licensing and regulatory functions of the Nuclear Regulatory Commission and other Federal agencies would extend to the Corporation's facilities and operations.

The proposed Nuclear Fuel Management Corporation moves away from the concept of Government reprocessing but recognizes the unavoidable role which Government must play in any reprocessing operation. Clearly, Government must be the licensor and regulator of any reprocessing facility. With Government as the only customer for plutonium recovered through reprocessing, it must be responsible for safeguarding and using the plutonium for national needs. And it will continue to play the dominant role in the national security and nonproliferation aspects of reprocessing.

Although the proposed Corporation is designed to limit the Federal role as much as possible, it should be recognized that Government decisions affecting the future of reprocessing could well affect the success of the Corporation. This is particularly true with respect to the licensing process. Investors may be reluctant to support the Corporation in the absence of some assurance that the licensing will not be prolonged and costly. The hearings on this concept must focus carefully on the issue of what is required to assure investor confidence in the economic viability of the Corporation and we must be willing to examine alternatives that will achieve this objective.

I hope this proposal will receive prompt and thoughtful study in both the public and private sectors. We must begin the dialog that is an essential prelude to legislative action. The problems of the back end of the fuel cycle are both real and urgent. We must deal with them effectively in the months ahead.●

"TOURIST APPRECIATION DAYS" IN PALM BEACH COUNTY

HON. DAN MICA

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 21, 1981

● Mr. MICA. Mr. Speaker, as many of my colleagues know, Florida is known for the many recreational, cultural, and historical facilities it has to offer the millions of tourists each year that visit our State. It can truly be said that Florida is a "tourist paradise."

Each year Palm Beach County celebrates the Royal Palm Festival with such activities as sailing regattas, a gala summertime ball, fishing tournaments, golf tournaments, and numerous civic events.

This year, the Outreach Prayer Breakfast Committee in cooperation with the 1981 Royal Palm Festival Committee wish to send a friendly welcome to all visitors both national and international, during the festival days. To that end, the Board of County Commissioners of Palm Beach County, Fla., has declared August 14 through August 23, 1981 as "Tourist Appreciation Days" in Palm Beach County.

I invite all of my colleagues to visit Palm Beach County anytime but extend a special invitation to them during these festive days.

I would also like to submit a copy of the county commissioners proclamation for the RECORD at this time:

PROCLAMATION

Whereas the residents of Palm Beach County have at their disposal, on a year around basis, the opportunity to enjoy outstanding recreational, cultural and historical facilities such as the miles of public beaches, municipal, County and State parks with facilities for swimming, fishing, boating and family picnics; museums, historical buildings, art galleries and theaters for the performing arts, and

Whereas many more activities will be available during the Royal Palm Festival, such as, sailing regatta, gala summertime ball, fishing tournaments, golf tournaments and numerous civic events, and

Whereas the Outreach Prayer Breakfast Committee, in cooperation with the 1981 Royal Palm Festival Committee, will be extending a friendly welcome to all visitors both national and international, during the Festival days; Now, therefore, be it

Proclaimed by the Board of County Commissioners of Palm Beach County, Florida, That August 14 through August 23, 1981, be declared Tourist Appreciation Days in Palm Beach County and does urge all citizens to join with the Outreach Breakfast Prayer Committee and the Royal Palm Festival Committee in welcoming visitors to the County during these 10 days of Festival events.●

PERSONAL EXPLANATION

HON. TOM CORCORAN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 21, 1981

● Mr. CORCORAN. Mr. Speaker, due to a previous commitment in my district last Friday, I was unable to be present and voting on a number of issues during the course of the day. If I had been present, I would have voted in the following way:

On passage of House Resolution 177, a sense of the House resolution calling for the development and implementation of a U.S. nuclear nonproliferation policy which strengthens the barriers to the further spread of nuclear weapons, "yea."

On an amendment offered by Mr. BEARD which reduces by $10 million, to $20 million, the appropriation for the HUD Office of Policy Development and Research, "yea," (paired for). (Amendment to H.R. 4034, HUD appropriations.)

On an amendment offered by Mr. DANNEMEYER which seeks to prohibit the use of EPA pollution abatement and compliance funds requiring States to adopt, implement or enforce a vehicle emission control inspection and maintenance program, "yea," (paired for). (Amendment to H.R. 4034, HUD appropriations.)●

PUERTO RICAN DAY PARADE

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 21, 1981

● Mr. RODINO. Mr. Speaker, this week, July 20 through 26, is Puerto Rican heritage week in New Jersey—a celebration of the traditions of Puerto Rico and its close ties to mainland United States.

New Jersey Gov. Brendan Byrne and Newark Mayor Kenneth Gibson have both signed proclamations declaring Puerto Rican week in tribute to our

brothers and sisters of Puerto Rico and their role in the cultural diversity that has made America strong.

I am honored that my home city of Newark will once again host the 19th annual Puerto Rican Statewide Parade—one of the largest and most festive events of the year in our State—on Sunday. In a State with roughly 900,000 Puerto Rican citizens, Newark boasts the largest Puerto Rican population—some 71,000 people. These numbers represent the tremendous growth and development of the Puerto Rican community within our society.

On Sunday I will join in the celebration with the parade's two grand marshals, the Honorable Julio Fuentes, who is a municipal court judge in Newark, and Mr. Luis Muñoz Arjona, who will be coming from Puerto Rico as a representative of the Puerto Rican Chamber of Commerce. Mr. Arjona's grandfather, Luis Muñoz Marin, was the first Governor of Puerto Rico who helped to establish the Commonwealth's first constitution. These men, like my good friend Dr. José Rosario, founder of FOCUS, and Newark Deputy Mayor Tony Rivera, have become examples for Puerto Rican youths who are striving to make a better life for themselves and their families.

The person most responsible for the success of this year's parade is Mike Garcia, president of the Puerto Rican Statewide Parade. Mr. Garcia has received help from Paul Echevarrias, parade vice president; Ralph Soria, executive secretary; Norma Ronda, secretary; Johnny Cossio, who served as last year's parade president, is treasurer and adviser; Jose Santiago, sergeant at arms; Marcellino Jimenez, general coordinator; and James Partin, John Carceres and Miguel Rodriguez are counselors.

This year's honorary parade committee includes Puerto Rican Gov. Carlos Romero Barcelo, New Jersey Gov. Brendan Byrne and Newark Mayor Kenneth Gibson.

The parade will be a culmination of a week of special events centered around Puerto Rican culture and the integral role it plays in Newark, in the State of New Jersey and throughout America as a part of Hispanic language and tradition.

Monday was Puerto Rican Women Day in Newark, where we paid tribute to the strength, beauty, and determination of Puerto Rican women. Today is Puerto Rican Student Day, devoted to the thousands of high school and university students from Puerto Rican families who are dedicating themselves to academic excellence. A substantial portion of the proceeds from the parade will go toward a college scholarship fund for needy Puerto Rican students. A very special day is set aside for Friday when we will recognize Puerto Rican leaders in New Jersey. Those men and women who have made outstanding contributions in the fields of art, science, sports, music, and education will be honored at an awards ceremony at Newark Museum. The Peoples Festival on Saturday at the Ironbound Stadium will highlight "Florclor" music to celebrate the heart of Puerto Rican culture.

The queen of Sunday's parade will be chosen Saturday evening at the annual Puerto Rican Day banquet at the Robert Treat Hotel in Newark. The many lovely young women vying for the crown of Miss Puerto Rico will make Saturday night's decision the most difficult of the week. But I have confidence that everything will go smoothly because my good friend Tony Perez is chairman of the banquet.

When the parade begins on Sunday, the efforts of so many people will come together to signify the ambition and creativity of the Puerto Rican people. I believe that this week and this parade will heighten our appreciation of Puerto Rican culture, and I am proud of the role that my community plays in bringing this Puerto Rican culture to mainland U.S.A.

I am especially pleased that I have lived all my life in a city where I have made so many close friends from Puerto Rico.●

TAX REFORM FOR SMALL BUSINESS

HON. DAN MARRIOTT

OF UTAH

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 21, 1981

● Mr. MARRIOTT. Mr. Speaker, I have spent a good deal of my time in Congress arguing for an approach to tax reform that recognizes the problems peculiar to small business. According to the Small Business Administration, 97 percent of all businesses are "small." Yet, most of our tax laws reflect the fact that the problems of big business are more visible and, hence, better understood.

The fact is, current tax laws are biased against small business. This bias is reflected in laws dealing with depreciation, inventory and accounting methods, investment tax credits for purchases of machinery, and estate and gift taxes. It is also a basic part of the present corporate tax rate structure.

Earlier this year, Mr. McDADE and I were joined by 15 other Members of Congress in introducing a bill containing tax reforms specifically aimed at small business. Our bill, H.R. 3202, now has 39 cosponsors, both Republican and Democrat. Many of us support the President's tax package; some may not. But, for all of us, H.R. 3202 is a testimony to our determination that, this time around, small business will not be lost in the shuffle.

So, I am particularly pleased to note a recently released SBA study which supports our contention that tax reform, directed at the needs of small business, is necessary if we are to preserve the tradition of the family owned and operated enterprise.

The following article, which appeared in the July 20, 1981, issue of Washington Report, a publication of the U.S. Chamber of Commerce, summarizes the findings of the SBA task force:

SBA ISSUES OWNERSHIP STUDY AT LAST

The Small Business Administration has released its study on small-business ownership continuity—six months after the task force formed to write the report disbanded.

Repeated requests from members of Congress finally pried the report from the SBA, said Rep. Berkley Bedell (D-Iowa), a member of the House Small Business Committee.

The task force, directed to consider the impact of federal tax policies on small firms, finished its work in early January.

The group's purpose, SBA noted in setting it up, was to develop specific legislative recommendations that would make it easier to continue family ownership of small firms.

The recommendations include:

Repealing federal estate taxes or, as an alternative, raising the net-worth exemption to $2 million. Currently, the exemption is $175,000, and the Reagan administration has agreed to a provision in the tax package that would raise the limit to $600,000.

Raising annual gift-tax exemptions from $3,000 to $20,000. Tax bills under consideration in Congress would raise the limit to $10,000.

Permitting capital-gains "rollover" for small-business owners when money from selling a firm is reinvested in another small business. In other words no capital-gains tax would be assessed in such cases.

Changing corporate income-tax rates so that the highest percentage rate would apply only to firms earning more than $500,000 a year. The maximum tax rate of 46 percent now applies to $100,000 of income. White House tax proposals do not include any form of corporate-rate changes, but Democrats on the tax-writing House Ways and Means Committee recently adopted a proposal that would raise the income level to $200,000.

The agency's officials cited "bureaucratic delays" in issuing the study, but several Capitol Hill analysts said the SBA was slow to release the report because its ideas on taxes and capital formation differ from Reagan administration plans.

The 36-member task force consisting of small-business owners, lawyers and accountants, was appointed during the Carter administration.

As we approach the climax of an effort to offer the American people the kind of tax reform that will provide a stimulus to all sectors of our ailing economy, those of us who have cosponsored H.R. 3202 recognize that change will not be total or sudden. But, we reaffirm our pledge to fight for meaningful tax reform for small

business. I invite our colleagues to join us in that effort.●

AUTHORITARIANISM VERSUS TOTALITARIANISM

HON. WILLIAM F. GOODLING

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 21, 1981

● Mr. GOODLING. Mr. Speaker, the July 20 issue of Newsweek provides its readers with an informative article by Michael Levin on the distinctions between authoritarianism and totalitarianism. Mr. Levin, a professor of philosophy at the City College of New York, accurately describes the distinguishing features of both these repugnant forms of government. But to judge them both unsavory is not to find them equally so. Mr. Levin correctly points out that "totalitarian cruelty is worse than its authoritarian counterpart because its rationale will always expand its scope." That rationale is not simply to maintain power, as is characteristic of the tyrannical authoritarian rules. Rather, the totalitarian regime is driven by an internalized doctrine or dogma which causes it to try to control every aspect of an individual's life. I urge my colleagues to take a few moments to read and reflect on Mr. Levin's article which follows below.

HOW TO TELL BAD FROM WORSE

(By Michael Levin)

The distinction between authoritarianism and totalitarianism is much in the news. Despite its clumsy defense by the Reagan Administration and the obfuscation of such critics as Amnesty International, the distinction is a clear and vital one. Nero was not Stalin, and it is important to understand why.

An authoritarian regime is the rule of a strongman or clique which forbids all activities that threaten its position, such as a critical press or an opposition party. It punishes resistance ruthlessly. Authoritarian rulers are typically venal and capricious; their rule encourages corruption and disaffection. There is, however, an important limit to the excesses of authoritarian regimes: They are indifferent to behavior that does not threaten their security.

By contrast, a totalitarian regime wants to control everything—not just political power, but all aspects of its subjects' lives. As its name suggests, a totalitarian state dictates values, art and personal and economic association. In addition to an official press, the totalitarian wants an official hour for calisthenics. The authoritarian does not care who becomes a doctor, so long as doctors remain apolitical; the totalitarian determines who becomes a doctor, where doctors practice, their remuneration and, so far as he can, their attitude toward doctoring. (Totalitarians want doctors to regard their skill as for the people.)

Where the authoritarian wants obedience, the totalitarian wants worship—not for himself, but for his regime. He wants the hearts and minds of his subjects. The totalitarian attacks religious and moral traditions precisely because they are independent objects of devotion.

MENACE

This difference in the degree of control should be obvious. It is, however, relatively superficial. At a more fundamental level, what distinguishes totalitarians from authoritarians is the kind of justification they claim. Only when this is appreciated does the greater menace of totalitarianism become apparent. Only then does it become clear why totalitarian states have given mankind a quite new idea of its own capacity for wickedness.

An authoritarian claims no legitimacy, properly speaking. He is where he is by being strong enough to get and stay there. He offers, at most, stability. But the totalitarian is a utopian who, intoxicated by some scheme for perfecting the world, regards his control as justified by the need to force his ideal on a shortsighted populace. Marxists, those paradigm utopians, see a workers' paradise emerging once the sin of ownership is extinguished, and they see this as entitling them to use whatever means are necessary to speed the process. A little duress is OK when there is a world to win.

Utopians always have a theory of Human Nature which implies that humanity as we know it is a stunted version of what it can be under their ministrations. Marxists, again, hold that people are all naturally creative, but have been "alienated" from their true selves by wage labor. As all past societies have thus deformed Human Nature, the utopian remedy is correspondingly sweeping; everything old—that is, everything—must go. The totalitarian sees his subjects as cripples, his measures as those of a dedicated surgeon. (Since what is being rectified is an abstraction—Human Nature—individuals get rather short shrift.)

A regime is totalitarian, then, if it justifies its full control as serving a higher good. In the China of the 1960s engineers were instructed to contemplate Mao's thoughts and courting couples to raise each other's revolutionary consciousness. Such policies were not instituted to prevent insurrection, but to speed the coming of the New Man. Even Nazi ideology was thought by its devotees to be a blueprint for a better world.

Totalitarian states are inevitably worse than authoritarian ones, first because the totalitarian sees nothing less than the human future at stake in his efforts. A Franco will execute (or imprison) all his rivals, but avoid further brutality as pointless. A Pol Pot will liquidate anyone with a European (hence "corrupt") education. If the disappearance of 8,000 Argentines is an outrage, what shall we make of the 20 million Russians that Beria eliminated?

ZEAL

Second, since utopia will never arrive, the totalitarian's "temporary" measures will become permanent. Worse, since the totalitarian must attribute failure to the insufficiency of his methods—the soundness of his overarching theory is a matter of faith—ever more surveillance and propaganda are inevitable. Disobedience is treated with special harshness. The authoritarian sees disobedience as a crime to be deterred; the totalitarian sees any deviation from the new order as persistent corruption in the human material he is out to mold. Indeed, since he has shown the way to utopia, backsliding must be subversive. Deviation implies reaction; against which the totalitarian is always on guard. Lenin said it best: "A good communist is always at the same time a good Chekist." (The Cheka, or Committee against Counterrevolution, had unlimited powers of life and death.)

Worst of all, the totalitarian is driven by a reformer's zeal. Threaten a tyrant and you may dissuade him; threaten a zealot and you only stiffen his resolve. As George V. Higgins put it, "There is no one as dangerous as an idealist with a machine gun."

Walter Mondale wants to know the difference between authoritarian and totalitarian torture. There is plenty. Totalitarian cruelty is worse than its authoritarian counterpart because of its scope, and because its rationale will always expand its scope. Murder is murder, but the scale of the murder counts. By this measure, totalitarianism easily outstrips all rival systems in evil.

Totalitarianism is a new phenomenon. The idea of remaking man by remaking society is—Plato's anticipations aside—scarcely two centuries old, and only the technology of this century has permitted armed prophets to attempt it. The old vocabulary for assessing governments is too narrow, and current jargon too trivial, to encompass totalitarianism. If insisting that IRA gunmen wear prison uniforms is a serious issue of "human rights," we need some other words for the Gulag.●

CAPTIVE NATIONS WEEK

HON. BARBER B. CONABLE, JR.

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 15, 1981

● Mr. CONABLE. Mr. Speaker, this week we observe the 23d anniversary of Captive Nations Week, as we have done every third week in July since President Eisenhower signed the resolution into law in 1959. We take this occasion to reassert our belief that people worldwide should be free to shape their own society and institutions without interference from outside countries. American citizens have enjoyed the blessing of personal freedoms for over 200 years, and yet the freedom we often take for granted remains unrealized for many of the world's people. Captive Nations Week commemorates these tragic circumstances.

For many years, the issue of human rights has been at the heart of the captive cause. In Central and Eastern Europe, as well as in Asia, the Soviet Union has extended its empire, entrapping millions of people under communism. This year, in view of the events in Poland and Afghanistan, the recent arrests of members of the Helsinki monitoring group in the Soviet Union, the exile of Andrei Sahkarov, it is our moral obligation to continue to press for the independence of these oppressed nations.

As our Nation seeks better understanding through trade, scientific, and cultural exchange programs with the Soviet Union and other Communist countries, we cannot forget the populace of subjugated nations who still desire and seek basic human liberties.

Populations have been removed from their homelands through deportation and resettlement programs, civil rights are broadly denied and economic and social freedoms are practically nonexistent in many nations. Our desire to coexist peacefully with the Soviet Union must not be taken as an endorsement of their sometimes barbaric human rights policy.

I join my colleagues today in expressing concern for those around the world who do not control their own destiny. As Americans, we remain dedicated toward ending personal oppression and extending human rights, and we are linked with these people, not only by bonds of family and culture, but also by the love of liberty and justice.●

SISTER CAROL COSTON'S SILVER JUBILEE

HON. WILLIAM LEHMAN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 21, 1981

● Mr. LEHMAN. Mr. Speaker, on Saturday evening, July 18, I was privileged to be one of a group of good friends who gathered in a small home in Northeast Washington for a ritual of commitment and celebration in honor of Sister Carol Coston's silver jubilee, the 25th anniversary of her profession as a Dominican Sister. With singing and dancing and sharing of food and prayers, these "gentle, angry, people" honored Carol for her years of dedication and service.

Having known Carol Coston personally for the past 9 years, as the director of Network, a Catholic social justice lobby, active here on issues that affect the poor and the powerless, and promote peace, I would like to insert in the RECORD the reflections of Sister Maureen Kelleher, R.S.C.J., one of her coworkers, which seemed to me to speak most authentically about Carol, as I know her.

CAROL COSTON, O.P.

I'd like to say how I have experienced Carol as my friend these nine years, and as a person on her way to being a disciple of Christ. Carol travels with a certain at homeness in her own skin, alive to her gifts for bringing life, joy, action. She travels too with an uncanny detector for forms of oppression, for the subtle ways the established arrangements confine folks. No one, though, could accuse Carol of being a do-gooder. Perhaps because she stays so in touch with her own experience, her own brokenness, she comes across as in solidarity with the folks she is lobbying and speaking out for.

As the next 25 years unfold we sincerely hope not to see the predictable persecution of the structures come to pass. If it comes, though, Carol's ready for it!

When I look back at Carol's 25 years as an Adrian Dominican Sister, from second grade teacher in Grosse Pointe, Michigan, to elementary teacher in Guayama, Puerto Rico, in Miami, in Melbourne, then as high school teacher in Tampa, then as a director of the Neighborhood Youth Corp in Fort Lauderdale, and then nine years as director of Network, I am aware of her amazing versatility, vitality, and staying power. I feel I can count on her to keep creating life and speaking out, so all may have life, and have it more abundantly.

Carol's vision of the future seems to me to be epitomized in these words of Judy Chicago:

And then all that has divided us will merge.
And then compassion will be wedded to power;
And then softness will come to a world that is harsh and unkind.
And then both men and women will be gentle;
And then both women and men will be strong.
And then no person will be subject to another's will;
And then all will be rich and free and varied.
And then the greed of some will give way to the needs of many;
And then all will share equally in the earth's abundance.
And then all will care for the sick and the weak and the old;
And then all will nourish the young.
And then all will cherish life's creatures;
And then all will live in harmony with each other and the earth.
And then everywhere will be called Eden again.●

H.R. 3355 TO AID ELDERLY AND DISABLED

HON. MILLICENT FENWICK

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 21, 1981

● Mrs. FENWICK. Mr. Speaker, I am sure that many of you here today have experienced, or have heard from constituents who have experienced, the sadness and trauma of admitting a elderly parent or relative into a nursing home. Loneliness, fright, and deterioration of their health follows in too many cases. Twenty to forty percent of the time this admission is unnecessary, and unfortunately, it is Government regulations which are far too often responsible.

Last winter, I received a letter from a woman who's mother was in a nursing home. The daughter was desperately trying to bring her home.

I don't know how much time my mother has left, but I would like to make that time a "family time" filled with caring and love * * * bathing her, feeding her, and most important of all, giving her the love, personal attention and home environment that should be her right to have * * * In a last effort, after trying to get some answers from some 28 different State and local offices * * * I am turning to you for some direction. From all the calls I made, being transferred and told to call other offices, I have come to the conclusion * * * and it is very sad * * * that the State would rather pay a tremendous amount of money to a Nursing Home rather than provide medical assistance to a child who is willing to care for her Mother at home but needs the medical help of a visiting nurse and a doctor in order to accomplish giving the proper medical assistance that is needed.

The only long-term help that the Government would provide was in a nursing home. The mother's income was approximately $550 a month, which was too high to qualify for medicaid home health care in New Jersey, but was under the income eligibility level for institutional care. So, at great unhappiness to this family, and at tremendous expense to the taxpayer, the mother remains, to this date, in a nursing home slowly deteriorating.

There are a number of home health programs which are available—medicaid, medicare, title XX, to name a few—but all of them have different eligibility criteria. There is no coordination or overall comprehensive structure to Government home health services to insure that those who are in need of services will receive them. I have introduced a proposal, which is now cosponsored by over 70 Members of the House, to provide some sense of order to this system. H.R. 3355 would establish a 10-State, 6-year demonstration project which would reorganize existing home health programs for the elderly and disabled under a separate title—title XXI—of the Social Security Act. Those people at risk of entering a nursing home would be screened by a health team to determine if home health care was a viable option and, if so, what services would be needed, including home health, homemaker, adult day care, respite services, and others. All people who are disabled or over 65 would be eligible, and services would be paid for through copayments according to the patient's ability to pay.

It is possible that significant savings will result from the maximum use of home health care. Medicaid costs—Federal and State—were $20.7 billion in fiscal year 1979 and approximately $8.7 billion of this was for nursing home care. Only $264 million—or 1.3 percent—was for home health care. The important aspect, however, is that the patients are at home, where they want to be, cared for as they need it.

Senator PACKWOOD has introduced the identical bill in the Senate, also with bipartisan support, and it is my hope that both the House and the Senate will work quickly to adopt this proposal.●

RETIREMENT OF PETER BENSINGER

HON. ROMANO L. MAZZOLI

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 21, 1981

● Mr. MAZZOLI. Mr. Speaker, I would like to call our colleagues' attention to the article which appeared in the Washington Star marking the retirement of Peter B. Bensinger as Chief of the Drug Enforcement Administration.

In his 5½-year tenure in that post, Mr. Bensinger made significant contributions to the effort to alleviate the devastating the persistent problem of drug use in the United States.

Mr. Bensinger worked diligently under three administrations to reduce the availability of marihuana and heroin by eliminating these drugs at their sources.

Marihuana use is a particularly serious hazard to both individual and society, and I join him in calling for a concerted effort on the part of this administration to work both at home and abroad in continuing the battle against the use of illegal drugs.

Mr. Bensinger deserves high commendation for his work, and best wishes for the days ahead. The article follows:

[From the Washington Star, July 10, 1981]

MARIJUANA CALLED NO. 1 DRUG PROBLEM

(By Allan Dodds Frank)

The major drug problem in the United States is marijuana and the last three administrations have failed to face it squarely, according to retiring Drug Enforcement Administrator Peter B. Bensinger.

Bensinger, who retires today after 5½ years as head of DEA, said marijuana is "the largest single drug problem we face in the United States."

In a recent interview with The Washington Star, Bensinger said the "biggest problem" he faced was with "the willingness of any of the three administrations with which I have worked to face up to the issue involving marijuana."

He said recent evidence indicates that marijuana does create significant health problems, including possible chromosome damage, lung injuries, loss of perception and memory, and is responsible for other social costs associated with crime.

He said a strong commitment by the administration to spend $100 million over the next five years in a cooperative program with Colombia to eradicate 156 square miles of marijuana is vital.

The millions of people who use marijuana in United States do so "because they haven't been discouraged from using it," Bensinger said.

"Its effect on teen-agers is alarming," he said. "I think it creates disrespect for law, greater dropouts from school, lower test scores, more accidents on the highways and in other locations."

"The health issues and the criminal-associated costs just have not captured the attention of the principal policy-makers," Bensinger said.

"It is not the president per se," he said. "It may be the secretary of health, education and welfare; it may be the State Department; it may be the attorney general."

Bensinger said this lack of attention is aggravated by the lack of "a long-range coordinated international State Department policy to deal at the source" of the marijuana, 90 percent of which is imported.

"The way to reduce the availability of drugs is not simply to add more agents who don't today have enough prosecutors to handle their cases," he said. "The answer is to turn off the supply at the source as was done in the case of Mexican heroin and to have a long range commitment cooperatively with several countries to destroy these illegal crops where they are grown."

Despite the vast number of marijuana users in the United States, estimated by the National Institute of Drug Abuse to be 11 million people, Bensinger said, he believes most marijuana consumption could be stopped easily.

He said the Ford and Carter administrations, in cooperation with the Mexican government, have destroyed most of the Mexican poppies grown to produce heroin during the last five years.

One of his greatest accomplishments, Bensinger said, was reducing the number of heroin addicts and heroin-related deaths in the United States in the last few years.

Attempting to stop the flow of marijuana from Colombia "is not a program that is impractical to launch," he said. "The area producing 70 percent of the marijuana consumed in the United States is . . . half the size of the area involved in the Mexican eradication program. It's only about 100,000 acres. . . . The Mexican government just deployed helicopters throughout their country to destroy the (poppy) fields and the same can be done throughout Colombia and more effectively for less cost."

Bensinger also disputed claims by the National Organization for the Reform of Marijuana Laws, which favors legalizing use of the drug, that the chemicals used for spraying the plants, notably paraquat, do serious damage to the lungs and other organs of marijuana smokers. Congress voted in 1978 to stop U.S. funding for spraying with paraquat because it was believed to cause serious health problems.

"There hasn't been an injury reported at the Atlanta Center for Disease Control as a result of anybody getting hurt with a paraquat-sprayed joint," Bensinger said. "In Mexico, they have been spraying with paraquat for four or five years now and there has not been a serious illness reported by the Mexican health authorities. The United Nations authorities last summer in Geneva recommended paraquat as the most effective herbicide."

"Congress will repeal the ban on paraquat this year," Bensinger predicted. "It is today in the State Department's authorization bill and it should be repealed. I don't see why we're trying to protect an illegal substance (marijuana), particularly when other countries that have used it (paraquat) have found no adverse effects."

"What concerns me is that there has been more attention to the health hazards of smoking cigarettes than there has been to the health hazards of marijuana," Bensinger said. "One, it is illegal; that's a threshold issue, and two, it is far worse from a health standpoint than a cigarette or alcohol."

"We need to discourage the use of marijuana," he continued.

"That means there needs to be enforcement of the laws that we have, an international effort to reduce availability and an educational program to provide users, parents, teachers and communities with accurate facts, a realistic description of what risks you run."●

AUGUST 21, 1968: A DAY OF SOVIET SHAME

HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 21, 1981

● Mr. MICHEL. Mr. Speaker, 1 month from today the world will commemorate the invasion of Czechoslovakia by Soviet-led armies.

Because of various scheduling problems, there may not be ample opportunity to speak about this subject on the day itself. I therefore would like to take the time today to say a few words about the invasion and what it means to us today.

The first thing we must consider is the very fact of the invasion. It happened at a time when we were being told the Soviet Union was "mellowing." But the Soviet Union, in violation of the United Nations charter and a number of resolutions of the United Nations, brutally crushed the Czechoslovakian attempt at securing even a minimum of freedom.

We should emphasize that point. What had been going on in Czechoslovakia at that time was no armed insurrection against the state or some attempt to get rid of the Communist Party that dominated that country. No, it was much simpler than that: Certain economic reforms and a few attempts at stretching the limits of censorship imposed by the Czech dictatorship was what had happened. But the Soviet Union would not allow it.

The Soviet Union has demonstrated its inherent ruthlessness in such a way that only a fool would think that present rulers of that country—the same rulers, by the way, who invaded Czechoslovakia—would hesitate to use the same brutal force against Poland today.

I recognize that the situation in Poland is different. But let us not deceive ourselves into thinking that the Soviet rulers think the way we do. They are not paralyzed by thoughts of what the world would say if they decided to invade Poland.

We cannot undo the invasion of Czechoslovakia. But we can learn from it and we can act in such a way toward the Soviet Union so that its rulers know we have not forgotten what happened in Prague 13 years ago.

It is my hope that over the period of the next month Radio Free Europe, Radio Liberty, and the Voice of America will broadcast to the captive nations of Europe and remind them of what happened 13 years ago. Let the

truth be told by our international broadcasters. Let the people in the captive nations hear interviews with leading experts on the history of that invasion; let Czechoslovakian refugees who escaped Soviet domination tell about life in the United States; let President Reagan himself speak to the people of the world over the Voice of America and remind them that the Soviet Union must realize that if there is a 1981 version of the Czech invasion they have in mind, with Poland as a target, the relationship between our two countries would be strained to such a point that for all intents and purposes it would be irreparable.

This Soviet day of shame should not be forgotten. And, more to the point, it should not be ignored by our international radio stations.●

OSHA DELAY IN THE EFFECTIVE DATE OF THE LEAD STANDARD

HON. GEORGE MILLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 21, 1981

● Mr. MILLER of California. Mr. Speaker, the Reagan administration has apparently found a new device for denying basic protections to American workers. What the Reagan administration is doing is simply delaying the effective date of worker protection regulations in callous disregard for the safety and health of our workers.

In a recent example of this, published in the Federal Register on June 30, 1981, the Occupational Safety and Health Administration yet again delayed the effective date of certain medical removal provisions of the OSHA lead standard.

The lead standard was initially proposed by OSHA in October 1975, but was not finally promulgated until November of 1978. That standard established lower threshold limits for lead exposure, and contained a number of additional provisions to protect workers exposed to lead, one of which requires that workers be monitored for blood lead levels, and that when blood lead reaches certain levels, that the workers be removed from areas of exposure, until their blood lead levels are suitably reduced.

The lead standard was challenged, and the U.S. district court issued its decision in March 1979. That decision stayed certain provisions of the lead standard, but not those provisions dealing with medical surveillance and medical removal protection, which were to go into effect on March 1, 1979.

There was an appeal, and the U.S. court of appeals issued its decision on August 15, 1979. The appeals court also upheld the lead standard, and concluded that the medical removal protection provisions were authorized by the statute, and that they were reasonably necessary and affordable by industry.

After additional administrative consideration, OSHA published a supplemental statement on January 21, 1981, to be effective on February 20, 1981.

It was then that the Reagan administation took over, and we have seen delay after delay in the effective date of the new medical removal protection even though both the district court and the appeals court have found those provisions to be valid and consistent with the law.

On February 6, 1981, the effective date of this and other regulations was deferred until March 30, 1981, pursuant to President Reagan's memo to department heads. The President wanted to review the so-called midnight regulations of the Carter administration, although this regulation, promulgated some 27 months earlier, and reviewed and affirmed by two Federal courts, could hardly be considered to be a "midnight regulation."

On March 27, 1981, OSHA again deferred the effective date for another 30 days.

On April 21, the agency published an advance notice of proposed rulemaking, indicating its intention to again review the technological and economic feasibility of the standard—even though those questions had already been answered by the courts.

On April 28, the effective date was again deferred until June 30, 1981.

And finally, on June 30, it was deferred again, until August 31, 1981.

Mr. Speaker, I would point out that well before this most recent delay, the Supreme Court, in the Cotton Dust case, clearly and decisively ruled that economic feasibility is not in issue with respect to OSHA standards. The technological feasibility of the lead standard, and especially of the medical removal protection provision, is also no longer in issue.

But, apparently, OSHA has not read the Cotton Dust decision, or is hoping that the Supreme Court will change its mind. Meanwhile, OSHA appears to have determined that the workers will suffer while it waits and tries to figure out some way to make this regulation which the Reagan administration does not want, go away.

Mr. Speaker, excess levels of blood lead pose a grave threat to the health of workers in these industries. And the simple expedient of removing workers with excess blood lead from the workplace exposure will enable time to pass without exposure, and will enable blood lead levels to subside.

It is time for OSHA to act responsibly, and to fulfill its statutory mandate to protect workers. It is time for the Reagan administration to let this basic worker protection, which had been more than 5 years in development, go into effect. It is time to protect workers.●

NEED FOR FEDERAL OPERATING ASSISTANCE FOR PUBLIC MASS TRANSIT

HON. HAROLD E. FORD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 21, 1981

● Mr. FORD of Tennessee. Mr. Speaker, last week I had the opportunity to appear before the Surface Transportation Subcommittee of the Public Works Committee as a part of their inquiry into the future of mass transit in our country. Because of the pervasive problems faced by metropolitan areas throughout the United States and because of our national commitment to reduce our dependence on foreign suppliers of energy, I thought I would share with my colleagues some of the reasons why we must maintain Federal operating assistance for public mass transit:

TESTIMONY—JULY 15, 1981

MR. CHAIRMAN: Thank you for this opportunity to share my views on the future of America's transportation systems. I am aware that the scope of these hearings cover a wide range of topics, but I would like to focus my remarks this morning on the specific topic of the future of Federal involvement in urban mass transit programs.

I think that it is only fair to let you know the context in which I come before this committee. Just last week, the city which I represent fell victim to a trend which is sweeping the Nation: Cutbacks in transit service and fare increases for riders. Memphis is not unlike other major metropolitan areas in our Nation, so I would like to spend my few minutes with you discussing the importance of the Federal role in mass transit funding from both a national and local perspective.

In the face of our national need to make our public transportation sector more viable, the Reagan Administration has recommended transferring the burden for operating mass transit systems onto the shoulders of States and localities. They have, in fact, recommended a complete phaseout of all Federal operating assistance dollars by fiscal year 1985.

Following such a course of action would be disastrous for the cities of our Nation, for working Americans who are dependent on mass transit to get them to work, and for millions of elderly and handicapped citizens for whom transportation costs make up a major portion of their personal budgets.

Cities throughout the United States will be the victims of the Reagan proposals. Public transportation plays an important role in the health of our local economies. Recent work stoppages in cities, such as New York (for 11 days) and Philadelphia (for 9 days), cost businesses there over $2 billion in lost business. Rapid increases in the costs of fuel—quadrupling in the last decade—and increased labor costs have forced cities to look for additional sources of revenues to operate their systems. Because of our national policies to reduce dependence on imported oil, to decrease pollution

caused by auto emissions, and to lessen the wear and tear on our roadways, the Federal Government has been matching local dollars spent on mass transit. Now faced with increased costs and uncertainty in Federal support, local transit systems have been searching for new sources of revenues and examining ways to curtail operations.

Last week in Memphis, the Memphis Area Transit Authority was forced to eliminate operations on Sunday, to increase fares to 75 cents, and to do away with special fares for the elderly and handicapped. The City of Memphis is without the authority to impose any new form of taxation without the permission of the State legislature. In spite of the need to raise new revenues for transit and other municipal operations, the Tennessee General Assembly, a body dominated by rural legislators, has refused to give Tennessee cities such as Memphis the right to generate new dollars other than increasing an already onerous property tax or tacking on even more of regressive sales tax.

This is the same situation that confronted the city of Birmingham, Ala., and which has now forced them to completely eliminate most of their mass transit operations. What would eliminating public transportation in Memphis mean? Over 60 percent of the riders of Memphis buses use them to get to work; 25 percent of those who participated in a recent poll said they depend on public transportation for medical care. Yet the Federal Government, in the face of fiscal crisis for systems across this country, asks working, poor, elderly, and handicapped Americans to bear more of the costs of operating mass transit systems. Let the riders bear the cost may sound good on paper, but in reality, we are asking those who can least afford it to assume even greater financial burdens.

I have carefully reviewed the testimony of Secretary Lewis and the Urban Mass Transit Administration Officials. They say that we must direct Federal assistance to capital improvements and to solving short-range problems. But cities and localities need more than short-term solutions. In Memphis, city officials have had to deal with crisis after crisis in funding transit programs. What they need more than anything is money to attack the long-range undertakings. What they need is money to plan for the development of new subdivisions, for servicing a population which will be increasingly dependent on cheap and efficient transportation for their basic needs, and for undertaking marketing campaigns to convince people to conserve through public transportation. These problems are too complex and too intertwined with the health of our Nation's economy to leave to the States and localities. Surely adequate planning requires participation of all levels of government, but we cannot leave localities faced with strained budgets and overextended tax bases to devise methods of coping with a problem that ties directly to our national security and economic well-being.

Federal dollars for public transportation is seed money used by cities and localities to develop methods of assuring citizens of their fundamental right to the necessities and amenities which make the American economy so strong.

The basic health of our national economy is linked to the health of our public transit systems. While the popular perceptions may hold that the recent slowdown of the inflation rate is because of new found Government austerity, in reality is more directly tied to our national efforts to reduce imports of foreign oil. Stabilization of America's imports has led to an oil glut and a recent decline in prices on the world market.

In the 1970's, the United States was forced to confront the fact that our dependence on imported supplies of oil was a major strategic weakness which places our country dangerously at the mercy of foreign suppliers. Being forced to rely on imported crude oil for our domestic petroleum needs means both that precious American dollars are being expropriated and that our national security is wrapped up with a very volatile region of the world.

Statistics tell us that one-ninth of the world's total energy consumption takes place when Americans use their automobiles. It should be clear that one way of reducing our energy imports and our strategic vulnerability is to strengthen our system of mass transportation and to reduce our dependence on the individualized automobile.

Are the 1980's going to mark the end of our efforts to strengthen public transportation and to end a decade of progress in freeing our Nation from its oil dependency?●

TRIBUTE TO CHARLIE ZARZOUR

HON. WILLIAM LEHMAN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 21, 1981

● Mr. LEHMAN. Mr. Speaker, Charlie Zarzour is a fellow native Alabamian who has served the North Miami community for the past 23 years. I would like to pay tribute to this man who has never let adversity get him down, and has never let his handicap keep him from getting involved in work for others. Any district would be lucky to have a citizen like Charlie Zarzour. I am inserting in the record the following article, in praise of Charlie's spirit, which appeared in the Miami Herald recently.

[From the Miami Herald, July 14, 1981]

THE CODE FOR HIM IS TO GET OTHERS TO SMILE

(By Marc Fisher)

When things don't go well inside the North Miami City Council chamber, political losers storm out to the lobby and grumble at Charlie Zarzour.

Their grumbling usually lasts just long enough for Zarzour to thrust a cup of steaming coffee in their hands, offer them a selection of cookies and serve up a gravelly "How ya doing" that's guaranteed to break through any political huff.

No matter what the event in North Miami, Zarzour is there with his coffee urn and table full of Fig Newtons, marshmallow wafers and vanilla cookies.

Zarzour, 63, is a veteran of 23 years of work for the city; he is now a code enforcement officer, patrolling the city's streets, watching for overgrown lawns and abandoned cars.

But Zarzour is in his prime at council meetings, city lunches and his favorite, the Miss North Miami beauty pageant, "I love dealing with the girls at the pageant," Zarzour said, "I make faces and gestures, do anything until they have no choice but to smile. I help them out with their poise."

One of this year's contestants, Peaches Jarvis, was so taken with Zarzour's antics that she wrote him a thank-you note. "It was the sweetest letter," Zarzour said. "It just about made me cry."

Though he lost his left leg when he was hit be a train in Washington, D.C., in 1942, Zarzour doesn't consider himself handicapped.

"I don't give the impression that 'I have one leg, so give me the world,'" he said. "I do everything I possibly can by myself." He added a Florida room to his house, laying all the blocks himself.

To meet Zarzour is to like him. "I love to talk to people," he said. "At council meetings, the menfolk come in and say, 'Charlie, baby!' and I kiss their wives."

Zarzour said he's always had a way with people. "When I lost my leg, I was in a wheelchair, I'd roll myself around the hospital, trying to get people to smile."

Zarzour figures he knows more North Miamians than anyone else in town, having lived in the same house for 34 years, working with football boosters and a host of community groups.

As one of the city's four code enforcement officers, Zarzour is in a far less endearing position than when he is dispensing coffee. He spends about four hours a day driving around the city, following up complaints of violations.

"If someone's lawn is more than 10 inches high, or the shrubs aren't cut or there's an abandoned car on the swale, I make a report and we send them a registered letter," he said, lighting a Kool.

The resident or business then has 10 days to adhere to the city's code. If the violator doesn't comply, the city will do the necessary work. The city then bills the person for the work.

"Especially in the rainy season, when the grass grows so much faster, people just don't bother to cut it," Zarzour said. "But we try to have them keep their property looking good."

Abandoned cars, overgrown lawns and trash cans put out more than 24 hours before the scheduled pick-up are the most frequent problems enforcement officers face, Zarzour said.

"Some people get angry, but I jive with them. You got to give them a little romancing to get them to go along," he said in a drawl left over from a childhood in Birmingham, Ala.

Zarzour began work for North Miami in 1958, earning $55 a week as a laborer. He moved up to clerk and served in the public works department before joining community planning four years ago.

He still lives in his northeast North Miami home, with his wife, Patsy, their daughter and son-in-law and six granchildren. Zarzour plans to retire at age 65, though his need for cancer treatments every three months worries him.

Until then, he'll be at City Hall on Tuesday nights, dishing out Lorna Doones and good cheer. "I get along with everybody."●

WORLD WAR I VETERANS

HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 21, 1981

● Mr. SKELTON. Mr. Speaker, historically, the United States has been

very dutiful in fulfilling its foreign obligations. This is important and worthy of a nation like ours. But, for too many years now, we Americans have ignored a far more important obligation. This obligation is to the veterans of World War I.

Throughout western Missouri, I am known as "IKE SKELTON, JR.," the son of the late, well-known lawyer, Ike Skelton, Sr. My father was more than a lawyer, he was a veteran of the U.S. Navy in WWI. I grew up in a patriotic home. When I was 9 years old, my father got me out of school so that I could hear a speech he was to give in Odessa on Armistice Day on November 11, 1941. I will never forget my father reciting "Flanders Fields" that day. He also told the Odessa High School assembly that many have been, and many will be called upon to defend this country. Less than a month later, we entered another great conflict.

Anyone who goes to war for their country makes the greatest sacrifice there is. These people have put their lives on the line for us and for our children, and we owe them. Obviously it is a debt which can never be fully paid to any veteran. No country has enough money to repay them. But it is vital that a valiant effort be made. I believe that Mr. Anderson's bill, H.R. 1918, is that kind of effort.

These are tough times with respect to money. Everyone is aware of the struggles that are going on to improve our economy. I continue to stand behind these efforts as I have in the past. But we must not allow past debts to slip by while we engage in new areas of spending. Recognizing these veterans is as important to our national defense as buying any military machinery. For, without the dedication and the conviction of soldiers such as those from previous wars, our machinery will prove worthless. Without these kinds of people, we will not stand up long against any foreign aggressor.

One of the greatest spiritual contributions that the WWI veterans have made is that of instilling and carrying on, the practice of patriotism. I think history will reflect this through the examples that these veterans have set. Those who fought in later conflicts, World War II, Korea, and Vietnam, were the beneficiaries of this way of thinking. Most of those who went to war, went without question, as a result of the influence of those of the older generation and what they had taught. It is important for us to remember not only their contributions on the battlefields and in ships, but also their far-reaching contribution to our country and our young people.

Those who fought for us in World War I gave what we needed at the time—their youth, their abilities, and courage. Let us now help them in the best way we can. As it says in "Flanders Fields," Let us not "break faith" with these Americans.●

COMMISSION ON FEDERAL DRUG APPROVAL PROCESS

HON. JAMES H. SCHEUER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 21, 1981

● Mr. SCHEUER. Mr. Speaker, tomorrow marks the first meeting of the Commission on the Federal Drug Approval Process. The Commission, which is being sponsored jointly by Congressman ALBERT GORE, JR. and I in our capacities as subcommittee chairmen on the Committee on Science and Technology, has been charged with making recommendations to both Congress and the administration on ways to improve the drug approval process.

Specifically, the Commission is mandated to recommend a system for the expedited treatment of new drugs in the NDA and IND phases of regulatory action by the Food and Drug Administration. In addition, it will devise a scheme of postmarket surveillance which will insure that drugs causing significant adverse effects are withdrawn quickly from the marketplace.

The Commission is composed of 25 distinguished members representing the public, industry, academia, and the administration. It will be chaired by Dr. F. Gilbert McMahon of the Tulane University Medical School. The Commission has the full support of the administration's Regulatory Relief Task Force and the Food and Drug Administration.

Mr. Speaker, I believe that the work of this Commission represents our best hope for making certain that Americans receive the very finest treatments medical science has to offer. For too long we have been deprived of lifesaving new medications which are available in Europe and Japan, although developed by American companies.

Following is a complete list of the Commissioners and a letter of support from Vice President George Bush:

COMMISSION ON THE FEDERAL DRUG APPROVAL PROCESS

REPRESENTATIVES FROM INDUSTRY

1. Barry Bloom, M.D., President, Pfizer Central Research, Pfizer, Inc., Eastern Point Road, Groton, Conn. 06340 (203) 445-5611, Ext. 641.

2. Norman Lavy, M.D., Director, Drug Regulatory Affairs, E. R. Squibb & Sons, Inc., Georges Road, New Brunswick, N.J. 08903 (201) 545-1300, Ext.2941.

3. Charles Leighton, Ph.D., M.D., Merck, Sharp & Dohme, Research Laboratories, West Point, Pa. 19486. (215) 661-6445.

4. Lewis Engman, President, Pharmaceutical Manufacturers Association, 1155 Fifteenth Street NW., Washington, D.C. 20005 (202) 463-2000.

5. Milan Puskar, President, Mylan Pharmaceuticals, P.O. Box 4293, Morgantown, W. Va. 26505 (304) 599-2595.

6. Daniel Shaw, M.D., Vice President, Wyeth Pharmaceuticals, 702 Knox Road, Villanova, Pa. 19085 (215) 688-4776.

PUBLIC MEMBERS

1. William Vodra, Attorney at Law, 1200 New Hampshire Avenue NW., Washington, D.C. 20036 (202) 872-8801.

2. Alice Fordyce, Assistant to the President, Albert & Mary Lasker Foundation, 870 United Nations Plaza, New York City, N.Y. 10017 (212) 753-8222; (212) 421-9010.

3. Joel A. Bennett, President, Joel Bennett Associates, 9 East 93rd Street, New York City, N.Y. 10028.

4. Michael R. Sonnenreich, Attorney at Law, Sonnenreich & Morrell, 600 New Hampshire Avenue NW., Washington, D.C. 20037 (202) 965-4150.

5. William Schultz, Public Citizen Litigation Group, Suite 700, 2000 P Street NW., Washington, D.C. 20036 (202) 785-3704.

ACADEMIC MEMBERS

THE VICE PRESIDENT,
Washington, D.C., July 17, 1981.

Hon. JAMES SCHEUER,
Chairman, Subcommittee on Natural Resources, Agriculture Research and Environment, U.S. House of Representatives, Washington, D.C.

DEAR JIM: I was gratified to hear of the efforts you have made to set up a Commission on the Federal Drug Approval Process.

As you know from our discussions, the Task Force on Regulatory Relief is committed to addressing the problems of drug lag, and will welcome suggestions for either administrative or legislative change, or both.

You have my support, as well as my best wishes for success.

Sincerely,

GEORGE BUSH.●

NEW VA HEAD COMPARES AGENT ORANGE WITH TEENAGE ACNE

HON. GEORGE MILLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 21, 1981

● Mr. MILLER of California. Mr. Speaker, the Washington Post of July 16 reported that Robert Nimmo, newly sworn in as head of the Veterans' Administration, commented that there is no evidence that agent orange causes anything other than a rash similiar to, and I quote him, "teen-age acne."

This gross insensitivity to the possible dangers from exposure to the defoliant agent orange follows unanimous passage by both the House and Senate of legislation that requires VA doctors to treat patients if their illness may have been caused by exposure to agent orange. Mr. Nimmo is obviously unaware of the multitude of medical ailments now suffered by veterans who were exposed to agent orange in Vietnam.

The legislation Congress unanimously passed recognized the need of the Veterans' Administration to address the physical and emotional disorders caused by agent orange as an important part of our obligation to the men and women who served this Nation. The callous remark by the new head of the Veterans' Administration illustrates a disturbing indifference to the needs of those who have served their country and the recent mandate of the Congress:

VA CHIEFS DEBUT—Robert Nimmo was sworn in yesterday as head of the Veterans Administration and launched his official career with a televised interview in which he said that Vietnam veterans have not been shortchanged by the government, that 95 percent of them are doing just fine.

Vietnam veterans organizations have complained that the administration has ignored their problems and failed to appoint Vietnam veterans to positions in the VA and elsewhere. One of the issues the veterans want addressed is Agent Orange, a herbicide widely used in Vietnam that many veterans blame for health problems.

Nimmo said yesterday that there is "no body of medical evidence" to suggest that the herbicide Agent Orange causes anything other than a skin ailment similar to "teenage acne."●

ECONOMIC OPTIONS

HON. CHARLES ROSE

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 21, 1981

● Mr. ROSE. Mr. Speaker, I recently came across this article by Dr. Max Moszer and was impressed by the clarity of his analysis of the President's economic program. He discusses in particular the enormous intuitive appeal of supply side economics, and challenges us to think deeply about the assumptions which underlie this newcomer to the economic scene.

I would like to submit to you this short article on this important subject.

ECONOMIC OPTIONS

(By Dr. Max Moszer)

Walkers making faster progress than drivers become the ultimate frustration of traffic jams. Watching the economy and economic policy unfold often creates similar feelings. Economists, with all their high powered theories and computer models, get nowhere fast.

Society's disappointment reflects more than the dashed hopes for successful solutions. The general impression remains that the economic fraternity produces much noise but yields few results; that miscalculation, misjudgment and confusion within the profession cause the lame conclusions.

Consider this sample of advices on inflation, for more than a decade the nation's number one economic problem:

"The best way to beat inflation is to buy only essentials. If we can discipline ourselves to postpone all other purchases, inflation soon would stop."

"Since rising prices just destroy the value of money, converting cash into things—anything real, like gold, silver, land—becomes the only way to beat inflation."

"The only way to beat inflation is for government to stop spending more than it takes in. Once Washington tightens its belt and learns to live within its means, prices will stabilize."

"To win the war on inflation, the Federal Reserve must halt the growth of the money stock. Once the supply of money falls, prices must fall as well."

More solutions can be added to these four recommendations. They come easily to mind. Tax cuts to increase productivity and to encourage rapid investment, sweep away the growth in regulation, especially of pollution and occupational hazards, impose wage and price controls. Other remedies could be added to this list with only the slightest effort. Most disconcerting, all of the above proposals fit snugly into the mainstream of current economic wisdom and practice.

While this potpourri could be defended, even quite respectfully, it is more important to recognize that economists have been unable to find a single cohesive theory universally acceptable to the profession. When it comes to inflation, economists are just like physicians and the common cold. So far, it has been impossible to isolate the cause. There exists no cure, we only have many therapies! Nevertheless, both cases require, and stimulate, treatment. Accordingly, each practitioner prescribes those palliatives considered to be the most promising.

Now, after many years of waiting, hope and despair, patience has worn thin. The nation's demand to attack its economic problems has caught economists in its fallout. The fundamental consensus developing may not stop short of declaring economists hindering, rather than expediting, the return to stability. While the economy nudges closer to bankruptcy, it is argued, economists fiddle with their jargon, hopelessly trapped in webs of intramural trivia.

While harsh, these collective judgments can hardly claim novelty.

Economists have always led precarious professional lifes, consigned to occupy a twilight zone between disdain and admiration. Yet recently, hesitant at first but with lightning acceleration, the economics profession has become the focus of mounting criticism. Columnists and officals describe the inefficiencies. "Economists have no trouble getting out of street cave-ins, they'll just assume a ladder." Or, "economists won't starve on a deserted island, they'll assume food." Economists have been wrong before, goes the response of an offical in defense of a questioned policy.

But these jokes look like the usual good natured, fun loving comments addressed to, and enjoyed by, economists at parties and business meetings. Don't all other professions and businesses bear their own share of gallows humor? Anyway, remember President Truman's edict to stay out of the kitchen if you can't stand the heat. Who would deny that those living by the crystal ball need to learn to eat glass? Surely even total perfection soon would become the object of its own derision.

Perhaps my reaction is too severe; it could be colored by my special interests in the economics profession. Nevertheless, current events do provide another insight to explain the escalated round of criticism. The massive economic reform and rejuvenation undertaken by the Reagan administration center on "supply side" economics. That is, reliance on tax cuts and price changes to provide the large incentives, to individuals and business, required to increase productivity and enlarge output. But supply side economics, a newcomer to the scene, remains largely untried; moreover, it lies outside the traditional, orthodox policy alternatives. Not surprisingly, disagreement about the president's economic package crystallized around their technical aspects. (Who would not want a stronger economy and an end to inflation?) With those in opposition claiming supply side economics does not work it was only natural for supporters, at the other extreme, to retort that economists don't know what works.

The convenient pigeonholes of liberal and conservative do not apply in this debate. The dispute, in large part, revolves around the impact of personal income tax cuts on inflation. Here the two dominant doctrines express very definite advises.

For the monetarists, the tax cuts result in a large, immediate drain on the federal treasury, requiring substantial increases in the supply of money. The inflationary consequence of this spiral would be so great as to outweigh, by a wide margin, the hoped-

for productivity gains behind the supply side tax cut. Monetarists want, instead, a reduction in the deficit and the money stock now. This is necessary not just to halt the escalating price level; it will eliminate the widespread feeling that inflation is here to stay. Until these expectations are reversed, people will continue spending, short changing thrift, in an attempt to retain the purchasing power of their past savings.

The Keynesians, or demand side advocates, the other branch of conventional wisdom, consider the tax cut too stimulative. The resulting spending would overwhelm the current capacity of American business. Despite the many idle factories and workers, the economy would overheat. A spiral of increases in wages and prices—or prices and wages—would follow. The inflationary consequence would be so great as to outweigh, by a large margin, the hoped for productivity gains behind the supply side tax cut. Demand siders would like to see an easier monetary policy, allowing lower interest rates to encourage investment. This, together with a restructuring of the tax system, especially on business costs such as payroll taxes, would lead to direct cost reductions and halt inflation.

With remarkable unanimity both lines of reasoning, although differing in the process, come to an identical conclusion. Inflationary, is the ultimate evaluation of the supply side proposal.

They show even less disagreement when it comes to the budget impact of the 10% across the board tax cut. Both forecast a massive deficit on the heels of a single tax cut, let alone 10% tax cuts in each of the next three years. They seriously doubt that lower tax rates will stimulate production and income sufficiently to enlarge total tax receipts. Yet this expectation lies at the heart of the "Laffer Curve," the basis of the Kemp-Roth tax bill. This strategy relies on the incentive aspect of the tax cut. With government getting a smaller share of earnings, individuals and business will want to work harder, save more and invest more. Proponents claim this incentive to be so strong that tax receipts will rise even as the tax rates go down. This means that income must go up sufficiently to offset the decline in the tax rate.

While countless computer simulations have been run to test this assertion, a straight forward look at some numbers yields a helpful insight. A 10% cut in tax rates will cost the federal government $45 billion in receipts. According to the Laffer Curve, income will increase enough to make up this loss. This requires a complementary, non-inflationary jump of $370 billion in the nation's income. (The 10% tax cut reduces the proportion that federal income taxes take of earned personal income from the current 13.5% to 12%. Thus $370 billion of additional income, at the new 12% effective tax rate, is needed to replace the $45 billion lost in the tax cut.)

Can the economy bring this about? To succeed, it requires a multiplier or ripple effect of more than eight to make the $45 billion cut generate $370 billion more income. If you look at it only from the supply side incentive effect, the needed gain comes to 20% of the $1,866 billion of personal income earned last year. That means, on the average, everyone's production and earnings must increase by a fifth in a single year. Little wonder, then, that few enthusiasts, either monetarists or Keynesians, have stepped forward to join the supply siders.

Yet the basic program has enormous intuitive appeal. It relieves the burdens of increasing taxes and inflation. It promises greater rewards for individual effort. It presumes the speedy recovery of the nation's economic strength. It reduces government interference. It restores reliance on our traditional economic methods. The very act of substituting fresh views for the old policies that have failed to reverse the ebb of the American economy creates optimism and hope.

Under these circumstances, criticism by economists, or anyone else for that matter, who question the program on narrow, technical grounds, will not find receptive listeners. Instead, it compels an intense defense just because a solution is so sorely needed. Fortunately, the success of President Reagan's Economic Recovery Program does not depend on the outcome of these skirmishes.

While the tax cuts have been patterned after the Kemp-Roth tax bill, the integrity of the budget balance does not depend on supply side economics. The president has not relied on increased economic activity to close the $45 billion tax loss. Instead he has proposed substantial spending reductions—amounting to $49 billion in the coming fiscal year—to offset the tax cut. Passage of the package by Congress would assure equivalent subtractions from the spending and receipts parts of the government's cash flow statement.

The net impact on inflation cannot be forecast as easily. Incentives and productivity will be greater. This reduces costs and prices. Will increased demand and stronger market positions erode, or even exceed, these gains? What about inflationary expectations, will these actions dampen or enhance them? Firm answers to these quantitative questions depend more on the specific assumptions than on the ability to grind out computer printouts.

Yet this is as it should be. For otherwise economists would make all the decisions. And economic policy is too important to be left only to economists. Their job is to provide the necessary framework for policy choice. Citizens, and the officials they elect, ought to decide between the policy alternatives. In the end, these will depend on the assumptions. Let the economists spell these out, and their meanings, and let each individual take on the hardest task: to judge which assumption best reflects reality.●

PROTECTING PITTSBURGH AREA RESIDENTS FROM FLOODS

HON. DOUG WALGREN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 21, 1981

● Mr. WALGREN. Mr. Speaker, today I am introducing a bill to authorize construction of the Saw Mill Run flood project in the West End area of the city of Pittsburgh. Although this is a small project, it continues a decades-old effort started by my distinguished predecessor in Congress, Hon. Jim Fulton.

The Saw Mill Run Creek is located entirely in Allegheny County with approximately 50 percent of the drainage basin within the Pittsburgh City limits. The drainage area is 19.4 miles square, the topography is hilly, and the flood plain is narrow except where it widens to about 600 feet in the West End area.

This flood control project is needed because the existing channel of the Saw Mill Run Creek in the West End will not contain high flows within its banks. As a result of overflow, storm drains and sanitary sewers back up and flood. According to the Corps of Engineers, the implementation of the Saw Mill Run Creek project will reduce the amount of flood damage by at least 92 percent. This investment is crucial if we are to finally eliminate a condition that causes this neighborhood to become an open sewer at high water.

The West End community has unfairly borne the brunt of wealthier suburban growth of the hills of Saw Mill Run watershed which reaches far into the south hills. In recent years, however, efforts of West End residents, through a local development corporation, have succeeded in reversing a long-term trend of business and population losses. The city of Pittsburgh has made a solid commitment to the redevelopment of this community by constructing a new sanitary sewer system and a new maintenance building in the West End. A new central police precinct headquarters, covering several surrounding communities, has also been located in the West End.

The low-income, poorly-maintained residential units, once a significant proportion of the flood plain developments, are gradually being refurbished and made over for use as small supply and service-type businesses. Ten new firms have already relocated there and a low interest loan program administered by the city will aid continued commercial development. This is strong evidence of the commitment of the residents and business people to the West End. Recent progress, coupled with the area's proximity to downtown Pittsburgh, make the West End an attractive location for the future.

The Saw Mill Run project is essential to sustaining this progress. I am not asking for Government funds for redevelopment. I am simply attempting to remove a public nuisance and to make the community a pleasant and healthy place to live and work.

I hope that the Public Works Committee will be able to act on this bill in the near future. We must once and for all complete a 20-year effort to solve this problem.●

RESIDENTIAL, ENERGY TAX CREDIT AMENDMENTS OF 1981

HON. BRIAN J. DONNELLY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 21, 1981

● Mr. DONNELLY. Mr. Speaker, today I introduced the Residential Energy Tax Credit Amendments of 1981. This bill would amend the Internal Revenue Code of 1954 so that credit for energy conservation expenditures may be allowed to dwelling units on which the construction was substantially completed before January 1, 1980. The original completion date is August 20, 1977; however, due to the current energy prices and our dependence of OPEC oil, it becomes necessary to reassess our own energy efforts.

Conservation particularly in New England, has increased in the last 8 years. In 1973 foreign petroleum provided a record high of 83 percent of New England's energy. In 1980 imported petroleum provided a modern record low of less than 73 percent. This decrease in dependence on foreign oil, coupled with the rising effort to conserve, has introduced the need for such financial incentives.

We must recognize the effect which our Nation can have on our energy resources. As President Reagan continues to cut back energy programs for the poor, it becomes necessary to reinforce our past efforts at conservation. Reexamining financial incentives such as the residential energy tax credit amendments is just one means to a secure energy future.

I urge my colleagues to support the Residential Energy Tax Credit Amendments of 1981. We must give our Nation the incentives to continue on a path toward conservation and in turn on a path toward a stable, independent energy future.●

HUMAN RIGHTS VIOLATIONS CONTINUE IN ARGENTINA, CHILE, URUGUAY, AND PARAGUAY

HON. TONY P. HALL

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 21, 1981

● Mr. HALL of Ohio. Mr. Speaker, in defiance of congressionally mandated human rights restrictions, the Reagan administration has decided to approve loans by the international development banks to Chile, Argentina, Paraguay, and Uruguay. This is in violation of section 701 of the International Financial Institutions Act, which states that the United States may not vote for loans to countries engaging in "a consistent pattern of gross violations of internationally recognized human rights."

Secretary of State Alexander M. Haig, Jr., has justified the administration's decision by pointing to dramatic improvements in human rights conditions.

This morning, an excellent article appeared in the Washington Post describing the human rights violations that continue today in these four countries. I commend it to my colleagues, and ask that they judge for themselves whether dramatic improvements have taken place.

The text of the article follows:

U.S. CLAIM OF BETTER LATIN RIGHTS RECORD SPURS DOUBTS

(By Cynthia Gorney)

BUENOS AIRES.—Thirteen days ago, acting on highly publicized and controversial orders from the State Department, U.S. representatives to the World Bank voted in favor of two energy development loans, totaling $300 million, for Argentina.

The votes broke a four-year tradition of voting no or abstaining on loans to countries considered human rights violators, one of the hallmarks of former president Jimmy Carter's foreign policy. They also added considerable fuel to the Washington debate over how the Reagan administration has mapped out a new world alignment of America's friends and enemies.

Both critics and supporters have acknowledged that the Argentina votes were devoid of almost any but symbolic meaning. The loans, like every other World Bank or Inter-American Development Bank loan granted to Argentina in recent years, would have been approved regardless of the U.S. vote.

But on an issue as weighty and emotional, for both the Carter and Reagan administrations, as the U.S. commitment to human rights, it has been the symbolism that matered.

In 1977, an act of Congress prohibited the United States from approving almost any World Bank or Inter-American Development Bank loan to countries exhibiting a "consistent pattern of gross violation of human rights." The act excepted only those loans aimed at "basic human needs". From then until the Argentina loan approval on July 7, American representatives abstained or voted no on all loans not involving "basic human needs" to the four nations of what is known as South America's southern cone—Argentina, Chile, Paraguay and Uruguay.

With their governments either dominated or openly run by the military, a history of political repression throughout much of the 1970s, and a record of complaints of human rights violations that is unequalled in the West, the nations of the southern cone became the most visible targets of Carter's human rights campaign. Although there was never a blanket directive labeling the four countries "consistent and gross violaters," each loan application was studied by an interagency working group of U.S. officials who assessed the human rights situation in the country in question. In every instance, during the Carter years, the situation was found to be so bad—disappearances, political prisoners, torture, arbitrary detentions—that U.S. approval was withheld.

When Secretary of State Alexander M. Haig Jr. two weeks ago defended the U.S. decision to approve all multinational development bank loans to the southern cone, he said one of the major reasons for the switch was the impressive changes he believed had taken place in the region.

"Without exception in each case the improvement has been dramatic," Haig said. "Now, that improvement does not represent . . . a corresponding level of complacency here in Washington that all that must be done has been done. But we do not believe that it serves any useful purpose to indulge in isolation and public admonishment in the face of internal improvements that have already taken place."

Although there is no question that the governments of Argentina, Chile and Uruguay have almost completely stopped "disappearances," the most widely attacked repressive tactic of the 1970s, Haig's claim of "dramatic improvement" has met with skepticism here by the people who monitor human rights most closely. Country by country, here is a comparison between 1977 and 1981:

Argentina.—By the end of 1977, the Buenos Aires-based Permanent Assembly for Human Rights had received testimony on the disappearance of 1,200 people.

The cumulative total—people kidnaped or arrested who vanished without a trace—today stands at about 5,800 in the assembly's records, although assembly members believe as many as twice that number may have disappeared without leaving relatives willing to report it.

In 1980, outside organizations such as Amnesty International reported to the assembly a total of 40 cases of disappearances but the assembly itself received only 18 reports. This year, according to assembly members, a western Argentina man who apparently had belonged to the Socialist Party was kidnaped and later found dead. Three other people were detained temporarily without any notice to their families, and two of them reportedly were tortured during their confinement. The assembly also received outside reports of the disappearance of two Chileans in southern Argentina last February, but was unable to confirm the reports.

In 1977, the assembly's records indicate that about 3,600 people were in jail under executive power, a special government dispensation that allows authorities to arrest and hold suspected political subversives or terrorists with or without formal charges. Last January, according to public statements by Interior Ministry spokesmen, 900 people remained under executive power, 300 of them without ever having been charged. Assembly members, who have similar figures on the number of people under executive power, say many of those who were charged have either completed their sentences or spent more than four years in prison with cases pending.

Political and labor activity is still illegal. Arrests and temporary detention of union and political leaders are routine, if somewhat haphazard. Rejecting internal pleas and strong international pressure—much of it coming from the Carter administration—the government has refused to release the names of the disappeared or make any accounting for the activity of security forces during the years when people were being taken from their homes and apparently killed in secret.

Chile.—Of the approximately 700 disappearances reported to the Vicariate of Solidarity, the church-connected human rights organization generally viewed as the most reliable source of such information, only 14 took place in 1977. The last disappearance

report the church received was in January 1978.

In 1977, following a massive release of political prisoners the year before, about 20 persons were in jail on what church records show as political charges. They now list 134 political prisoners—not including those who have been charged with allegedly politically inspired violent crimes like bombings. In addition, during the first five months of 1981, 49 persons were sentenced—under an administrative procedure for political charges that grants no due process—to three months of internal banishment, meaning they were sent without money or provisions into small, isolated towns and told to fend for themselves and check in with the police on a regular basis.

During the first five months of 1977, 104 persons were detained on mostly nonviolent political charges, according to church records. During the same period in 1981, 578 persons were detained. The church has received 29 reports in 1981 from people who said they had been tortured by the Chilean secret police. As in Argentina, labor organizing and political activity are illegal, and show no signs of opening up in the near future.

Uruguay.—In 1977, Amnesty International estimated that there were 5,000 political prisoners in Uruguay, and that 50,000 people had been detained at one time or another since the 1973 military coup, giving Uruguay the dubious distinction of having the most political prisoners per capita in the world.

The current number of what human rights groups refer to as "political prisoners" is estimated at between 1,100 and 1,500. The male prisoners are mostly housed at La Libertad, a prison that a late 1980 International Red Cross report strongly condemned for torturing and "bringing about the physical and moral breakdown" of its prisoners. Exiled Uruguayan human rights groups have recently reported six mysterious prisoner deaths at La Libertad since last September. Each one was officially attributed to natural causes, but reports have persisted that the prisoners—one of whom had been printing a newsletter inside the prison—were harassed or beaten to death.

Political activity has been illegal since 1973, and former political leaders are either exiled or officially banned from working in politics. But the atmosphere has loosened somewhat since voters in a national plebiscite soundly rejected a new constitution late last year.

Paraguay.—In 1976, according to Washington-based experts on Paraguay, the country had 6,000 political prisoners, some of whom had been held as long as 19 years without trial. The number is now about 30, and late last year Paraguay was taken off the United Nations' active list of countries most imperiling human rights. A general loosening of the political climate—fewer press restrictions, more church activity in caring for prisoners and monitoring human rights—drew praise for the Paraguayan government even from groups such as Amnestly International.

Paraguay has refused to allow the Organization of American States' Inter-American Commission on Human Rights to investigate conditions in the country, however. And within the past year human rights groups have grown alarmed about what the newsletter Paraguay Watch called "two major waves of repression" consisting of prologed detentions, 15 deaths attributed to alleged abuses of human rights, and the recent arrest and expulsion of the chairman of the Christian Democratic Party. In addition, the government's sale of Indian-occupied lands has come under intense international criticism recently and been described in several studies as "genocide."

Whether any of this can be called a "dramatic improvement" has become a matter of heated debate—particularly in the case of Chile, which still inspires bitterness in Washington because of the country's refusal to cooperate or extradite suspects in the 1976 Washington assassination of former Chilean diplomat Orlando Letelier and researcher Ronni Moffitt.

"Today, politically, it's not good to make somebody disappear," a Santiago human rights lawyer said last week. "But as far as the new methods of repression—torture, internal banishment—I would say it's much worse than 1977."

To use the simple statistics "out of context, without telling the full story behind them, is a distortion of the facts," countered a State Department official familiar with Chile. Like many of those who believe the atmosphere has improved substantially in the southern cone, he said a certain tolerance—undeclared breathing room for the opposition—has replaced the full-scale terror of the mid-1970s: "It is the threat of killing and disappearances that really stamps that out."

In Buenos Aires, a middle-aged woman who still does not know whether her son is alive or dead set down her pages of human rights data and slowly shook her head. "What I'd say to Senor Haig, if he wanted to hear me, is that the whole structure permitting the kidnapings, permitting the tortures, the arrests—the whole structure has been left intact," she said. "If they want to start again with the whole business, they can. And this remains like a terror over all of us. Be careful with this policy, Senor Haig. That is what I would say to him."●

THE WORLD BOXING HALL OF FAME

HON. WAYNE GRISHAM

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 21, 1981

● Mr. GRISHAM. Mr. Speaker, in this era of the fast buck in professional sports, it is my privilege to bring to the attention of this House the activities of the World Boxing Hall of Fame, a group dedicated to genuineness and honesty in sport.

The World Boxing Hall of Fame is a dream fulfilled for its founder and president emeritus, my friend Everett L. Sanders. As the World Boxing Hall of Fame approaches its second anniversary, it is only fitting that we pay tribute to this fine American.

According to Robert Myers, retired sports editor of the Associated Press, "there is no person in the world—yes, the world—more knowledgeable in all the multiple facets of the boxing game than Mr. Sanders."

It is little wonder that his knowledge of boxing is legend, since Everett has dedicated his life to the sport. From the years 1939 to 1955, he held a post on the California State Athletic Commission. During that time he wrote and updated the State's laws regulating both boxing and wrestling. His research and hard work made his laws a paradigm for boxing laws throughout the Nation and throughout the world.

In 1963, Everett was named general chairman of the Southern California Committee on Boxing. During his tenure he instituted safeguards that brought him a reputation for bringing honesty and safety to the forefront of the boxing profession.

Everett is 86 years old going on 25. His energy and creativity are as strong as ever. In the past few years he has written several books as well as founding the World Boxing Hall of Fame. The hallmark of honesty that marks that organization comes right from its founder and president emeritus, Everett L. Sanders. He is an American we can be proud to honor.●

CLARIFICATION ON CONSULTING REFORM AND DISCLOSURE ACT OF 1981 MAJOR PROVISIONS

HON. GERALDINE A. FERRARO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 21, 1981

● Ms. FERRARO. Mr. Speaker, on July 9, I introduced the Consulting Reform Act of 1981 and the summary of major provisions was inaccurately attributed in the CONGRESSIONAL RECORD. I would like to reinsert my statement and the list of major provisions of H.R. 4089:

STATEMENT OF HON. GERALDINE A. FERRARO (D-QUEENS) ON CONSULTING REFORM AND DISCLOSURE ACT OF 1981

Mr. Speaker, today I am introducing the Consulting Reform and Disclosure Act of 1981. Similar legislation has been introduced in the other body by Senator David Pryor (D-Ark).

I am compelled to introduce this legislation because the serious and pervasive problems which have characterized consulting activities for 20 years are continuing unabated. During a recent hearing by my Subcommittee on Human Resources, I was informed by the Office of Management and Budget (OMB) that all of the necessary safeguards against abuse are in place. OMB argues that it is now up to the agencies to properly use and monitor consulting services.

OMB says legislation is not necessary. What this Administration wants is to continue business as usual in the abuse and misuse of consulting and management support contracts.

I believe that the 20 year history of agency mismanagement of consulting services contained in 30 critical GAO reports demonstrates why this legislation is necessary. A GAO report received by the Human Resources Subcommittee last year cited "serious and pervasive" problems in consulting contracts in 6 civilian agencies. The most recent GAO report which I received concerned consulting type contracts in DOD. In

that Report GAO found that several of the management support services contracts reviewed "have preempted DOD's prerogative in directing national defense and in management and direction of the Armed Services."

Mr. Speaker, these facts give a haunting currency to the warning which President Eisenhower gave to us in his farewell address—a speech made when he had no future political ambitions:

"In the Councils of government, we must guard against the acquisition of unwarranted influence, whether sought or unsought, by the military-industrial complex. The potential for the disastrous rise of misplaced power exists and will persist . . . we must also be alert to the equal . . . danger that public policy could itself become captive of a scientific-technological elite."

I am afraid we have not heeded this warning.

Although the critical danger from the abuse in consulting is the rise of misplaced power, the economic arguments are compelling as well. Estimates of the amount of Federal funds spent annually on consulting services range from a conservative $2 billion to over $9 billion. Many of the contracts funded by these tax dollars were a complete waste because agencies never used the end products; many are fraught with conflicts of interest which negate the objectivity of the consulting studies; many of the contracts call for the performance of inherently governmental activities; and in the most blatant abuse of all, most are awarded without any competition.

This Administration has announced a major attack on waste, fraud and abuse throughout the federal government.

There is no better way to attack waste than to require by law each agency to identify the amounts requested for consulting and other contracting in their budgets so that every Member of Congress and every taxpayer can see it.

There is no more important fraud to attack than the fraud being perpetrated on the American people when direct federal employees are replaced by contract employees and billions of dollars of unsubstantiated savings are claimed.

Eighty-two percent of the contracts reviewed in a GAO study being awarded without competition is the worst kind of abuse.

The legislation that I am introducing today will respond to the problems that currently exist in the Federal Government's use of consulting and related services. It will attack waste, fraud and abuse in these contracts. The legislation has been carefully drafted so that it will have the maximum beneficial effect on certain wasteful spending practices, while having no adverse effect on an already overburdened procurement process. Furthermore, the legislation has been designed not to add unduly to the Government's paperwork requirements.

My bill employs the sunshine approach. It does not try to tell agencies that they must—or must not—use consultants. It says to agencies, "If you use consultants, we in Congress and the public want to know about it. We want to know whom you use, what you have them do, and how you use the work they do for you."

CONSULTANT REFORM DISCLOSURE ACT OF 1981 MAJOR PROVISIONS

Clarifies the authority of agencies to appoint experts and consultants pursuant to title 5, section 3109 U.S.C. Requires that OPM assume a more active oversight and reporting role in relation to the use of appointments by agencies.

Defines consulting services, management and professional services, and special studies and analyses as the universe to which most provisions apply.

Requires the publication of all consulting services, management and professional service, and special study and analysis contracts in excess of $10,000 in the Commerce Business Daily prior to award. Also requires notification and justification of all subsequent modifications which increase the contract value by $25,000 to be sent to the respective Inspector General or comparable official.

Requires basic attribution information to be included in reports prepared pursuant to a consulting service, management and professional service, or special study contracts and in agency-prepared reports which include substantial portions of such contractor-prepared reports.

Requires the evaluation of consulting management and professional service, and special study and analysis contracts which exceed a value of $50,000. Special attention is focused on performance according to the terms of the contract and deviations from cost and time as specified in the original contract.

Organizational conflict of interest determinations are required which are to be applied on a test basis—for three years—at the Departments of Energy and Transportation, and the Environmental Protection Agency. Actual conflicts and appearances of conflict are addressed in regard to consulting, management and professional service, and special study and analysis contracts only. Where an adverse determination is made the contractor will have an appeal procedure.

Line item identification in the budget submitted by the President to Congress is required for consulting service, management and professional service, and special study and analysis procurement requests. Agencies will also be required to explain requests for procurement budget in the budget justification process.

The Federal Procurement Data System is codified.

Agency contract listings for all contracts entered into within the preceding 12 months, and contracts which are active, are required to be maintained and be made available to the public for inspection. Such listing will be updated quarterly.

Written justification for consulting service, management and professional service, and special study and analysis contracts are required to be maintained by the agencies and are to be made available to the public.

All contracts, unless classified for national security purposes, are to be considered public documents and thus available for inspection by the public unless disclosure is prohibited by law.

Agency officials are held accountable for contracting decisions during performance appraisal and bonus consideration.●

SAUDIS UNDERCUT HABIB MISSION: DECLARE HIM PERSONA NON GRATA

HON. BENJAMIN S. ROSENTHAL
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 21, 1981

● Mr. ROSENTHAL. Mr. Speaker, it will become clearer as the months pass that the Reagan administration cannot offer sound arguments to support their decision to sell the AWACS aircraft and the F-15 enhancement equipment to Saudi Arabia.

One of the fictions which the administration persists in telling us is that Saudi Arabia is a moderate country that sees and conducts itself as an American friend and supporter in the Middle East. A careful review of Saudi-American relations over the past 40 years will reveal that the Saudi kingdom and the United States have few interests in common, different perceptions of the Middle East, contrasting views of the role of the Soviet Union in the region, and, of course, opposing policies for resolving the Arab-Israeli conflict. Of equal importance is the Saudi disdain for democracy and democratic institutions.

The diplomatic mission of Philip Habib, a sincere attempt to reconcile the interests of Syria and Israel in the continuing political turmoil in Lebanon, was viciously attacked last week in an editorial in the Saudi Government-controlled newspaper, AR-RIYAD. I share it with my colleagues as a useful description of the nature of relationship between the United States and Saudi Arabia.

THE AMERICAN RANCH AND THE ISRAELI COWBOYS

Israel found nothing better to welcome Philip Habib's arrival than to launch a 1-hour raid on Lebanon, killing and wounding scores of people, and threatening to do even more every time the U.S. envoy comes to the area. This has been the case to the extent that the inhabitants of the south know the time of the raids and go into hiding, praying that the visit of Kissinger's successor will not last long, or else what is left of their houses will be demolished. Meanwhile Washington did not condemn what Israel has done as it usually does, probably because there was a fault in the computer so that it stopped talking. The envoy also preferred to remain silent as usual after he found that Tel Aviv is paving the way by all the means available to it for assuming the "lofty position" the White House has promised it, that is, to chair the "autonomy" talks in the fall. Meanwhile Habib is working toward entrenching the Israeli intransigence; it is as if Washington had sent him only in order to meet Israel's endless demands and had nothing to do with the Middle East crisis as a whole. Thus all that he claimed when he first arrived in the Middle East was simply aimed at deceiving the Arabs. Fortunately the trick has been discovered before it is too late. It has become necessary to watch the man's movements very carefully. It would be better if he left the area the same way he came, or otherwise clarified his stand finally—although it has become quite clear—and spared himself the trouble of shuttling between Arab capitals, which have begun to look on him as persona non grata.

Philip Habib is not as shrewd as Kissinger, but he is equally loyal and devoted to serving Israel. Both men have harmed the Arabs greatly and both have proved the increasing deviousness of Washington's policy.

The question that is being urgently asked now is: What is Habib doing in the area and

why is he remaining silent over his activities, which have become suspicious and of which, as we said, we should beware. He has offered nothing on the Lebanese crisis or the fabricated missiles crisis, nor has come to gather information, as is usually the case. So far he has conveyed no solutions from Washington to those concerned. All that can be said about him is that he sees with Israeli eyes, thinks only Israeli thoughts, and carries out only Israeli plans. We have never heard him blaming Israel for its behavior, or trying to dot the i's and cross the t's, or adopt a neutral stand. In fact, he has out-done "dear Henry's" traveling to and from across the Middle East as if the area were an American ranch under the command of a Zionist cowboy.●

ESTABLISHING RECIPROCITY IN THE CABLE INDUSTRY

HON. DOUG WALGREN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 21, 1981

● Mr. WALGREN. Mr. Speaker, today I am introducing legislation which would establish reciprocity in the cable television industry between the United States and other countries. The principle of this bill is that foreigners will be permitted to invest in U.S. cable operations to the extent that U.S. citizens have the same rights and privileges in foreign countries.

The cable television industry is a rapidly growing industry, now serving 10,400 U.S. communities and 18.6 million subscribers, 24 percent of the Nation's households. In recent years, several Canadian companies have made in-roads into U.S. audiences. Canadian cable systems now reach into approximately half a million U.S. homes. In 1976, Canadian-owned companies served 1 percent of U.S. subscribers; today that figure is 3 percent. In December, Barron's magazine predicted that Canadian cable would be serving 5 to 7 percent of U.S. viewers by the end of the 1980's. While this bill does not single out Canada—it applies to all countries—Canada is the only other country owning and operating cable systems in this country at this time.

CANADA RESTRICTS THE UNITED STATES

This bill would not place any restrictions on Canada that Canada has not placed on U.S. companies. In 1968, Canada enacted a broadcasting act that states as follows:

The Canadian broadcasting system should be effectively owned and controlled by Canadians so as to safeguard, enrich and strengthen the cultural, political and economic fabric of Canada.

This was further expanded by extensive regulations which effectively limit foreign ownership in television, radio, or cable to 20 percent.

Following enactment of this law, American companies had to divest some $150 million of Canadian broadcast and cable investment. Thus, American companies have faced this restriction in Canada for some time. Additionally, Canadian businesses are discouraged from advertising on U.S. television stations whose signals reach Canadian audiences by a Canadian tax law that denies the same tax deduction available for advertising on Canadian stations.

OTHER RECIPROCITY LAWS

There are already several U.S. laws similar to this bill. The Communications Act limits alien ownership of U.S. broadcast licenses to 20 percent—and 25 percent under certain conditions. Additionally, foreign nationals are not allowed to hold any interest in oil, gas, or mineral leases in U.S. public lands if their country denies similar privileges to U.S. citizens. We have negotiated similar provisions with other countries in areas such as fishing rights.

CABLE HAS CHANGED OVER THE YEARS

Establishing reciprocity for the cable industry is particularly timely now since the industry is changing and growing significantly and the considerations that underlie alien ownership of broadcast licenses pertain also to cable. When cable began, it consisted primarily of the rebroadcasting of programs produced by others. Cable was simply a mechanism for providing a limited number of otherwise unavailable or poor quality broadcast signals to remote areas. Today, however, with dramatic developments in cable, satellite, and other related technologies, more than 80 percent of cable systems provide origination programing. There is more and more origination on cable. And today, cable operators exercise the same kind of editorial discretion over what U.S. audiences see and hear as their broadcast counterparts.

Furthermore, in one way, cable operators are in a unique broadcasting position. There are a number of broadcast channels in a given area or market. With cable, however, it is far more likely that there will be a single cable franchisee in a particular community, providing the exclusive vehicle for home video services. In other words, once a city is wired by a cable company, it is wired; a natural monopoly is established.

IMPROVING RELATIONS WITH OTHER COUNTRIES

Finally, this bill is in our national interest in the areas of trade and foreign relations. Under the bill, the restrictions would be dropped for any country that allows U.S. companies to operate cable in their country without restrictions. The bill includes a "like manner" rule—any ownership restriction which a foreign government imposes on U.S. citizens would be imposed in like manner to foreign citizens.

If commercial relations with our trading partners are to endure and flourish, they must be founded in the fundamental principle that trade and investment are a two-way street. I believe it is fair to place on other countries the same restrictions placed on our companies operating in those countries.

Mr. Speaker, the cable industry is a growing and complex industry. I hope that the Congress will carefully accept the principle of reciprocity with other countries as we consider revisions to our communications laws.

The text of the bill follows:

H.R. 4225

A bill to amend the Communications Act of 1934 to establish certain limitations relating to the ownership of cable television franchises by certain foreign entities

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That part I of title III of the Communications Act of 1934 is amended by adding at the end thereof the following new section:

"LIMITATION ON OWNERSHIP OF CABLE TELEVISION FRANCHISES

"SEC. 331. (a) No cable television system (including all parties under common control) shall carry the signal of any television broadcasting station or any programing delivered by a radio facility licensed by the Commission, or by any communications satellite the operation of which is subject to regulation by the Commission, if such system is owned, operated, or leased by—

"(1) any alien or a representative of an alien;

"(2) any foreign government or a representative of a foreign government;

"(3) any corporation organized under the laws of any foreign government;

"(4) any corporation of which any officer or director is an alien or of which more than one-fifth of the capital stock is beneficially owned or voted by (A) aliens or their representatives or by a foreign government or any representative of a foreign government; or (B) any corporation organized under the laws of a foreign country; or

"(5) any corporation directly or indirectly controlled by any other corporation of which more than one-fifth of the directors are aliens, or of which more than one-fifth of the capital stock is beneficially owned or voted by aliens or their representatives, or by any corporation organized under the laws of a foreign country.

"(b)(1) The provisions of subsection (a) shall not apply to any entity described in paragraph (1) through paragraph (5) of subsection (a) with respect to a foreign government which allows the United States or a citizen of the United States to construct, own, and operate cable television systems within territories subject to its jurisdiction, except that any ownership restriction which such foreign government imposes upon the United States and its citizens shall be applied in a like manner to those entities described in paragraph (1) through paragraph (5) of subsection (a) which seek to own cable television systems in the United States.

"(2) Not later than 90 days after the effective date of this section the Commission shall promulgate rules and regulations necessary to carry out the provisions of paragraph (1).

"(c) The provisions of subsection (a) shall not apply with respect to ownership interests inconsistent with this section until 2 years after the effective date of this section.

"(d) For purposes of this section, the term 'cable television system' means a facility which retransmits any broadcasting signal or which engages in programing origination for distribution by cable or any other closed transmission medium to multiple subscribers who pay to receive such service.".●

NUCLEAR PROLIFERATION AND THE CLINCH RIVER BREEDER REACTOR

HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 21, 1981

● Mr. BROWN of California. Mr. Speaker, in recent weeks, the very real and extremely serious issue of nuclear weapons proliferation has again been in the headlines. The Reagan administration, to its credit, has gone from a position of no concern to a position of visible concern. Unfortunately, this recent recognition that nuclear proliferation is something the U.S. Government should work to prevent has not resulted in policies that will accomplish this goal. This means that this Congress, like previous Congresses, will have to act on its own, in the absence of effective Executive leadership.

The chief weakness in the administration's policy is its continued advocacy of the plutonium economy, through the commercial development of breeder reactors and reprocessing facilities. If anyone believes the present generation of light water reactors, with their relatively low-grade nuclear fuels, are nuclear weapons proliferation threats, they can only be terrified of the prospect of a plutonium economy. Frankly, it is the reprocessing technology—and the weapons grade fuel which emanates from it—that is the greatest proliferation threat. With this type of technology in place, nuclear fuel diversion will be quick and simple—unlike diversions from enriched uranium stocks or light water reactor cores.

Mr. Speaker, we cannot pretend that our own country's entry into the commercial breeder era is not a nuclear proliferation threat. Nor can we deny that the proposed Clinch River breeder reactor is merely the first step to the plutonium economy. Is this what we want? Is this what we need? Have we considered the alternatives? I suggest the answer to all three questions is a resounding "No."

Mr. Speaker, I urge the House to reject the funding for the proposed Clinch River breeder reactor.

At this time, I wish to insert in the RECORD an editorial from the Los Angeles Times which makes the same points I have made. I commend it to my colleagues.

The article follows:

[From the Los Angeles Times, June 16, 1981]

THE CLOCK TICKS

Among the major headaches inherited by the Reagan Administration was the question of what to do about the obviously defective American effort to head off the further spread of nuclear weapons in the world. Although the Israeli raid on the Iraqi nuclear complex introduces new complications, the White House is expected to produce at least the general outline of a new policy within a few weeks.

President Jimmy Carter, building on a foundation laid by President Gerald R. Ford, took the nuclear nonproliferation issue seriously. He spent much diplomatic capital in efforts to persuade other nuclear-supplier nations to join the United States in stringent controls on nuclear exports. The idea was to make it difficult for Third World nations to launch a nuclear weapons program under cover of a peaceful nuclear power program.

Carter got considerable cooperation, especially from Canadians and Australians, but not enough. By the time he left office, his nuclear nonproliferation program was in tatters.

Pakistan is pursuing what most outside experts see as a vigorous effort to produce nuclear weapons, perhaps as early as next year. India, which provided the rationale for the Pakistani program by exploding a nuclear device in 1974, is darkly suggesting that it may feel compelled to resume nuclear testing.

Iraq has been impressively successful in obtaining sensitive nuclear materials and technology from France, Italy and other nations that want favorable access to Iraqi oil.

There is little question that, before the Israeli air strike, Iraq was on the verge of a nuclear bomb-making program that threatened the physical survival of Israel and the political survival of Arab regimes most friendly to the United States.

And there is little question that a number of other countries have the capacity to make nuclear bombs within a relatively short time if they decide to do so.

It is fair to say that Carter undercut his own program by his failure to enforce it. The underlying reality is, though, that the Carter policy did not attract the necessary support from West Europeans, whose anxiety to nail down oil supplies and to build their nuclear exporting industries outweighed their concern over contributing to the spread of nuclear weapons. And the United States, by itself, simply lacks sufficient leverage to be effective.

So what happens now? The Reagan Administration is expected to give some preliminary answers in hearings tentatively scheduled for late June by the Senate Foreign Relations Committee.

President Reagan hasn't said enough on the subject to give a reliable guide as to what the ultimate policy will be. But comments by his transition team and some subordinates offer some clues.

The Administration appears to feel—correctly, we think—that a major imperative is to build a framework of world peace and stability in which small countries can feel secure without nuclear weapons.

There is also a presumption that nuclear have-not nations will be more willing to accept controls aimed at preventing nuclear weapons proliferation if they can have reliable access to peaceful nuclear reactor fuels and technologies.

The hectoring of the French, the West Germans and other nuclear-supplier nations is felt to have been counterproductive. There is an assumption that the pitch for international cooperation will be more effective if it allows for less onerous restraints on supposedly trustworthy nations.

These are interesting ideas. But translating such generalities into specific policies is more easily said than done. And, while the new Administration insists that it will pursue a strong nonproliferation program, its credibility has been undercut by its support for the Clinch River breeder reactor program and its failure to appoint any strong nonproliferation figure to a key job.

Such skepticism may or may not be justified. But it won't go away until the Administration comes up with a reasonably detailed and coherent policy. Meanwhile, as the Israeli air strike demonstrated, the clock is ticking.●

WHO NEEDS THE ARTS? EVERYONE

HON. DENNIS E. ECKART

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 21, 1981

● Mr. ECKART. Mr. Speaker, the administration has proposed severe cuts in the National Endowments for the Arts and the Humanities. President Reagan calls for a plan in which private sector funds will replace Government funds. But can private giving offset the Federal grant money being cut? Many of our leading businessmen say no, and I have to agree.

Mr. Speaker, Cleveland, Ohio is nationally and internationally renowned as a community with an outstanding arts organization. Clevelanders are proud of our art museum and orchestra. They, as well as many other local art endeavors, are important to the culture and economy of our community. Not only do they attract scores of visitors from around the world, but they also employ hundreds of local people. This city, and this Nation, need the arts. Government must continue to play an important role in the arts if they are to survive in Cleveland and elsewhere.

Today, the House-Senate Conference Committee will be sitting down to discuss the level of funding for the arts and humanities. The House approved a single sum of $223 million for the arts and humanities, as compared to the Senate's authorization of $119.3 million for NEA and $113.7 for NEH. I will be supporting the Senate's higher level of funding.

A recent article in the New York Times by Harold Prince succinctly describes the dilemma facing the arts and humanities today. His message cannot be ignored. As John F. Kennedy said, "The life of the arts * * * is a test of the quality of a nation's civilization."

THE ARTS ARE IN ECONOMIC TROUBLE—SO, WHO NEEDS THEM? THE NATION

(By Harold Prince)

When I recently spoke to corporate executives about the importance of increasing private-sector support of the arts, because of the Administration's proposed 50 percent reduction in the National Endowment for the Arts' 1982 budget, someone said: "It isn't just the arts; we've been getting the same plea from education, health, welfare—from all areas of social concern. What would you do if you had to make a choice between educating a poor black child, feeding an elderly couple, or supporting an artist?"

While I did not want to present the continued support of artists as a greater priority than that of welfare mothers, I resist equating priorities in terms of immediate results. Of course I would not deny education to a child, nor food stamps and Social Security to an aged couple, nor health care. But the presence of art is never immediately measurable; it's a spiritual contribution to the quality of life, and state of mind, the dignity of man in his community. Harmony.

The cost of this harmony is relatively cheap. Prior to the suggested budget cut, the total arts budget came to $159 million—less than a dollar per person per year. A 1980 Harris poll of taxpayers found that 70 percent were willing to add $5 to their annual tax for the arts.

I have empathy for my corporate friend's dilemma. The Government should not force such a choice. I will not be thrown into life-and-death combat with the poor and aged.

Just after the election, Ronald Reagan reemphasized his support for the arts. Then the Office of Management and Budget "black book" hit the streets. David A. Stockman had declared flat out that the arts were not a priority. At a meeting of the National Council on the Arts, Robert Carter, from the Reagan transition team, told us that 50 percent cut represented a 100 percent improvement in the Administration's original budget plans.

What reasons has the Administration offered for the cut? Government funds, they tell us, have replaced private-sector funds and have become the first resort for arts organizations. They are incorrect and uninformed. No! That would be bad enough—what is worse, they *are* informed. They know the facts to be the opposite. They have chosen to misrepresent them. One of the Endowment's unchallenged successes is that it has nourished the growth in private giving for the arts, primarily in matching grants, from $205 million to $2.7 billion in the 15 years of its existence.

This speaks to a uniqueness of the Endowment and a rightness in the Government's role. When it's working right, Government is the people. It makes proprietors of the audience, for the use of their tax dollars gives them certain title to the work they enjoy. Moreover, the Endowment's peer-panel system takes decision-making away from bureaucrats. I cannot say I agree with every decision, every policy, every program. But ours is a Government agency open and democratic, where virtually any arts organization or individual artist can receive a fair review by his peers, accepting that the odds are heavily against him in all the disciplines.

This addresses another criticism of the endowment—that its standards have been lowered in order to make grants on regional or political bases. Actually, Endowment funds, in concert with those of state and local arts agencies, allow thousands of artists to stay and work with dignity and respect in their own communities.

Historically, too many artists have been discovered posthumously. It's a credit to our times that that has changed. Not always, of course. A minimal grant of $3,500 enabled the Lousiana State University Press to publish a manuscript by an unknown author who killed himself soon after completing it. This was "A Confederacy of Dunces," by John Kennedy Toole, this year's Pulitzer Prize winner for fiction. The Pulitzer Prize-winning play "Crimes of the Heart," by Beth Henley, was produced originally by The Actors Theater in Louisville, an Endowment-funded theater, and then in New York by the Manhattan Theater Club, another recipient.

What would happen if the Endowment were shackled, its powers diluted? Can we expect big business to assume its responsibilities, to structure an effective arts council checked and balanced by peer assessment?

The Endowment is uniquely capable of identifying problems and solving them. For example, it recognized the diffciulty of training qualified producers, directors, and writers in the musical theater, and created a master-apprentice program using both private-sector and Endowment funds.

Consider the dramatic accomplishments. The number of symphony orchestras in our country has grown from 25 in 1965 to 150 in 1980, dance companies from 30 to 400, professional theaters from 15 to 147, opera companies from 27 to 109. Not all of this is directly attributable to the Endowment, of course. State arts agencies and private giving have a lot to do with it. But an Endowment grant is a catalyst; the imprimatur of a panel review encourages private giving.

So, it's a bit ironic that we are subject to an enormous budgetary cut and the establishment of a task force, which implies a crisis of confidence. From where I sit, the Endowment is an amazingly effective instrument of public policy.●

THE LATE CONGRESSMAN DONALD L. JACKSON

HON. JOHN H. ROUSSELOT

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 16, 1981

● Mr. ROUSSELOT. Mr. Speaker, he was good humored and courageous, witty and adventurous; his spirit and vitality made him a true American, a statesman, a patriot. I make these remarks about Donald L. Jackson at the risk of repeating what my colleagues have said; yet I feel I must tell you how much I respect this man and how I hope he has found peace.

I unfortunately just missed serving in the House with this distinguished California Republican. As another Representative of southern California, I always admired his exceptional ability to understand the special problems of our neighbors to the south and to communicate with them. He was a most integral member of the Foreign Affairs Committee.

Throughout his 14 years as a Congressman, he showed foresight, effectiveness, determination, and a never-ending positive outlook. Perhaps it was his time spent with the U.S. Marine Corps, from 1927 to 1931 and again 1940 to 1945, that gave him his instinct for the dynamics and intricacies regarding issues of war and peace. His foresight in foreign affairs led him to anticipate the Korean war, and he firmly supported giving aid to Formosa (Taiwan) and other free Asian nations.

After finishing his term with the 86th Congress, just as I was beginning my first term, he became a television commentator. But public service life called him back when in 1969 he was appointed to the Interstate Commerce Commission by President Nixon.

His courage and perseverance showed in his politics and in his personal life. He fought for his ideals as a Member of Congress; he fought for his life against cancer. The day he passed away, May 27, 1981, will remain a sad day for me.

As my friend and colleague Mr. BURGENER said, "He was the life of every party." Let us not take this statement lightly. He was life itself to those around him with his determination, and consistent conviviality during times of crisis and peace alike. We need more men like Donald Jackson. Let us keep part of this wonderful, vibrant, fearless man within our hearts and minds.●

THE LIES OF HISTORY—LEE GRANT AND THE ATLANTA CONSTITUTION

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 21, 1981

● Mr. McDONALD. Mr. Speaker, they tell me that if a lie is told often enough and long enough, most gullible citizens come to accept that lie as a fact. Such is the case with Joseph Litsch interviewing actress Lee Grant in the Atlanta Constitution on July 10, 1981. There is a parallel between this and another interview from TV Guide entered into the CONGRESSIONAL RECORD for my colleagues last week (July 14, 1981, pages 15704-06.) That interview was of another actor, Lionel Stander of "Hart to Hart."

According to Lee Grant's interview with Joseph Litsch:

Miss Grant was a victim of Senator Joseph McCarthy's witch hunts to rid the U.S. movie industry of Communists.

That is a lie. Senator McCarthy never conducted, nor had anything to do with Reds in Hollywood.

Some other interesting items about that interview took place, such as Lee Grant's standing up in public in defense of those identified in sworn testimony as Communists. This, she said, is

what caused her to get blacklisted from further employment. Then in another part of the interview she states that had she been willing to "label her husband a Communist," she could have returned to work. Rather than do so, the interview states:

> Instead, she issued a statement saying her relationship with her husband was one of love, not politics. After his death in 1962, clearing her name was easier.

The fact is, clearing her name had nothing to do with her husband's death, but rather the fact that he was a Communist—did. Let us look at the record.

In contrast to Lee Grant who thinks that communism is "politics," there was Leo Townsend, who on September 18, 1951 identified Lee Grant's then husband, Arnold Marnoff, as a hard core Communist. The hearings were conducted by the Committee on Un-American Activities of the House, and not McCarthy's committee in the Senate.

Before Townsend began to name such as Lee Grant's then husband, he stated:

> Also I feel that since the American Communist Party in the last 4 years hasn't openly and honestly stated its aims and its goals and has evaded the issue of its allegiance to the Soviet Union. I think that the American people have a right to know which people have not yet made up their minds.

Well, Lee Grant's husband was one of the "hard core" who chose loyalty to the U.S.S.R. rather than the U.S.A.

If that was not enough, there was also the testimony of Edward Dmytryk before the same House Committee on April 25, 1951 with regard to Lee Grant's then husband Arnold Marnoff. It was Dmytryk who became disillusioned with the Communist Party, because they would not take a stand against the Soviet Union even after the evidence following World War II, that it was their intent to bring communism to the whole world. After pointing to the Korean war, both Soviet and Chinese Communist vicious onslaughts against humanity world-wide, Dmytryk turned to the domestic Communist Party support of subversion and espionage on behalf of the Soviet Union and against the United States:

> The third thing was the spy trials, the development of the Hiss, Coplon, and Greenglass cases, and the Fuchs case in England. To me there is a significant thing about the spy trials. The thing that impressed me was that these people did not get any money, or not much. There are spies that work for their country and we have respect for them. There are other spies who receive money for their work, and there may be a certain admiration for them, because they risk their necks. *These people are doing it for love of the party. This is treason. I think the party that has used them is treasonable also.* (Emphasis added)

It was not a lie of history, that Lee Grant's husband threw his lot in with the Communist world, including the shock which, incidentally, was investigated by the late Joseph McCarthy, that over 5,000 Americans, as prisoners-of-war had been brutally murdered by the Communists in Korea. If that's love or politics, then Lee Grant can have both her love and her politics. I think the American people would rather have the truth about Lee Grant, her former husband, and the Atlanta Constitution for contributing to her lies of history.

Also in that Atlanta Constitution article, Lee Grant stated that Joe McCarthy called the Army a "subversive outfit." That is another lie, aided and abetted by the Atlanta Constitution. Then of course came the old cliche, that Edward R. Murrow took McCarthy to task, which led to McCarthy's downfall. Some of us still remember the "real world" of Murrow when he brought Annie Lee Moss before the camera, and berated McCarthy for picking on this poor defenseless woman who McCarthy had accused of being a security risk. It is true that McCarthy did suffer damage, for it was weeks later that in fact Annie Lee Moss was permanently suspended as a security risk. But the press, as it is with the Atlanta Constitution today, was strangely silent. Only two newspapers in America carried the final chapter, the Chicago Tribune and the Brooklyn Tablet.

The final blow in the interview highlights the Army-McCarthy hearings with of course no identification as to what started the Army-McCarthy hearings, which was in fact, the covering up of those in the executive branch who were covering up espionage activity on behalf of the Soviet Union, by personnel at Fort Monmouth, N.J. But of course, this is a subject for at least two CONGRESSIONAL RECORD entries, and the main thrust here is the correction of the saga of Lee Grant and the Atlanta Constitution. Suffice it to mention in passing, that some gullible Americans did watch the "boob-tube," and the Army-McCarthy Hearings, and to this day 90 percent of the American people know not the truth of the cause of those hearings. But back to Lee Grant.

It was on April 1, 1957 (31 days before Senator Joseph McCarthy died), that Lee Grant (Marnoff) appeared before the House Committee on Un-American Activities, and again to repeat, not the McCarthy committee. Lee Grant was accompanied by none other than Leonard B. Boudin. And something should be said about Leonard Boudin, for among other things, he was also the counsel who has represented no less than 53 individuals who stood on the fifth amendment with regard to Communist activity. Leonard Boudin also represented such personages as Paul Robeson, Soviet spy Judith Coplon, Victor Rabinowitz, and of course our old friend from my prior entry on TV Guide interviewee, Lionel Stander.

But Leonard Boudin did, and is doing more. In 1951, the National Emergency Civil Liberties Committee (NECLC) was formed as a Communist Party, U.S.A., front, to provide funds for legal cases, such as Lee Grant's, and for the dissemination of Soviet propaganda. Since the early 1960's, Boudin, with his law firm of Rabinowitz, Boudin, & Standard, have represented none other than Fidel Castro's Cuba, while it did and does, spread terrorism, death, destruction, and ultimate Communist conquest over the continents of Africa and Latin America. It was also Boudin who went after FBI Agents John Kearney, Edward S. Miller, and W. Mark Felt. We do not think it an accident that Leonard Boudin's daughter, Kathy Boudin, was one of the fugitive terrorist leaders the FBI was after, and her last public appearance was when she fled from the collapsing Greenwich Village townhouse in March 1970 when an antipersonnel bomb exploded prematurely.

In 1977, Leonard Boudin addressed what could be referred to as a "radical chic" fund raising affair in New York City at the home of Diana Lewis. The purpose was to raise money this time on behalf of the Socialist Workers Party (SWP). Among the guests were Walter Bernstein, yet another "blacklist" victim of "witchhunting" as the defenders of all phases of communism put it; Ramsey Clark of Hanoi and Ayatollah fame, among other things, and none other than Edward Asner known now by TV viewers as "Lou" Grant, and we presume no relation to Lee Grant, fictionalized as it may be. Anyone who has watched the Lou Grant series might just remember the fictionalized account dramatizing in favor of the Iranian Students Association (ISA), probably one of the most dangerous terrorist organizations in the United States, if not the world. In any event the "radical chic" affair raised some $10,000 to further the aims of defending Communist activity within our borders. And Boudin continues today with CPUSA, SWP, Cuba, and much more.

On that day of April 1, 1957, ably represented by Leonard Boudin, Lee Grant when queried on past associations, activities, and yes, even membership in the Communist Party, U.S.A., invoked the fifth amendment some 17 times. Four years before, as I pointed out in a recent speech on the anniversary of the death of Joseph McCarthy, on December 14, 1953 to be exact, Lyon Boston, prominent New York attorney and founder of the Bill of Rights Society, aptly and correctly pointed out:

No person should be permitted to invoke the fifth amendment to hide a conspiracy against the *whole Bill of Rights and the whole Constitution.* (my emphasis).

And what of the late Bishop Fulton J. Sheen who stated:

There is no danger to academic freedom when a government asks its citizens whether or not they are loyal. But there is danger to academic freedom when a person invokes a constitutional privilege in order to destroy the very constitution they are invoking.

It is interesting that the Atlanta Constitution in that interview with Lee Grant, titled the headlines:

Blacklist bolstered Grant's true grit.

To that, this Member of the House would comment: Let the Soviet Union, their agent Leonard Boudin, keep the likes of Lee Grant, Lionel Stander, and all else. We do not need those kind of "grits" in the Southland of the United States—or anywhere else.●

TRIBUTE TO JESSE STARKEY

HON. ROY DYSON

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 21, 1981

● Mr. DYSON. Mr. Speaker, on July 1, 1981, a transition occurred in Charles County which marked the end of Jesse Starkey's illustrious tenure as superintendent of the Charles County public schools.

In June, Mr. Starkey was honored at a dinner at the officers club at Andrews Air Force Base. That salute to Mr. Starkey was an indication of the affection that the people of Charles County have for Mr. Starkey.

Mr. Speaker, I would like to share with the House a little of Jesse Starkey's history and acknowledge the participants who made that salute such a success.

JESSE LEE STARKEY

Jesse Lee Starkey, oldest of six children, was born in Hampton, West Virginia, on January 25, 1922. He attended the public schools in Upshur County through the ninth grade. At that time, his family moved to Richwood, West Virginia, where he was graduated from the high school in 1940.

Choosing work instead of a scholarship which had been offered to him, Mr. Starkey started in the business office of the Cherry River Boom and Lumber Company. Here he worked for about a year in the payroll department. Taking the payroll, while riding in an automobile that was modified to run on railroad tracks, to workers in the lumber camps and selling war bonds to them occupied most of his hours there.

He left employment with the lumber company to take a job with an uncle who ran a firm known as the West Virginia Wood Products—a furniture factory. In the short time he was in the furniture factory, he mastered the most challenging tasks to be performed.

Mr. Starkey entered the 81st Infantry Division of the U.S. Army in 1942, and he was sent soon to Western Maryland College, as part of an Army Specialized Training Program in basic engineering. From this highly concentrated course, he received a year and one-half of college credit. With the Germans threatening again to overrun Western Europe in what became known as "The Battle of the Bulge," the army interrupted Mr. Starkey's studies.

He was assigned to the 84th (The Rail Splitters) Division, and he took part in three major battles before the fighting in Europe was over. He was delayed in his return home by six months, because his talents were considered "essential." He was charged with the responsibility for heading a team of men, whose task was to oversee the flow of currency in and out of a specified sector. On January 25, 1946, he returned to the United States and immediately re-entered Western Maryland College, where he was graduated in January of 1948, after majoring in mathematics and taking minors in science, chemistry and physics.

Upon graduation, Mr. Starkey took a job for a year and a half as a teacher of math and science at the Manchester High School in Carroll County, Maryland. Then, he was made principal of the Elmer Wolfe School (grades 1-12) in the same county. At the end of the three years, he went on to become for a seven year period, the principal of Mt. Airy High School.

The Board of Education of Calvert County offered him in 1958 the job of High School Supervisor and Director of Instruction. That assignment was changed at his request in 1960, when he assumed the principalship of the then-new Calvert County Senior High School, in addition to carrying on the duties of personnel administration.

In 1965, Mr. Starkey came to Charles County as Assistant Superintendent for Instruction. He became Deputy Superintendent for Instruction and Pupil Services in 1967 and Superintendent of Schools in 1969.

A lifetime of work, that started back in his high school days as a manager of a large paper route, has not prevented Mr. Starkey from taking an active part in the life of whatever community his career has taken him. He has been a member of the Lion's Club in Carroll and Calvert Counties and has held offices in those clubs. He has been a scout leader and worked with Little League in Calvert County. He has the distinction of being the charter president of the Charles County Rotary Club. In his church, he has been a leader including duties as associate District Lay Leader. Currently, he is on the Administrative Board and serves as Chairman of the Council on Ministries.

He is a member of the Society for the Restoration of Port Tobacco; also he has been a member of the County Human Relations Commission. His interest in the social affairs of the community is matched by his participation in his profession's activities.

A member of Phi Delta Kappa, National Association of Secondary School Principals, Member of ASSA and ASCD, he has been president this past year of the Public School Superintendent's Association of the State. Most recently, he has held an appointment from the Maryland State Board of Education as Chairman of the State School Bus Formula Committee.

Now that he is counting the hours until his official duties will have been completed, Mr. Starkey looks forward to spending more time with his family, taking some trips, maybe fish. In his words, "Retirement is not an ending, but the beginning of something new."

PARTICIPANTS AT DINNER CEREMONY

John Thomas Parran, Jr., Rev. Davis W. Peck, Vincent C. Hungerford, Stephen C. Starkey, Randy Runyon, Janet Sexton, John R. Ward, James A. Forrest, Sr., Sandy A. Wilson, William A. Diggs, Dr. Larry A. Lorton, Mrs. Nancy J. Sefton, W. Cecil Short, Eugene M. Karol, Joseph L. Shilling, Dr. George Marx, James C. Simpson, Royden P. Dyson Paul S. Sarbanes (represented by Jim Gentile), Ralph C. Wachter, Walter W. Bowling, Jr., Robert E. King, James E. Wilson, Jesse L. Starkey, Father Oliver McGready, M. William Runyon, Paula N. Smith, W. Cecil Short, Philip A. Thorn, Roy E. Yanosh, Joseph J. Lavorgna, Rachel L. Dalrymple, Gordon J. Hasenei, Elwood M. Leviner, Anne S. Jameson, Joseph A. Shifflette, Dale Arbogast, Ruby J. Bales, J. Ronald Black, Keith G. Grier, Adrienne A. Jennings, Wiley E. Poindexter, Nancy T. Renfro, Charles L. Wineland, Elizabeth Shifflette, C. Ashley Smith, John H. Bloom, Linda S. Mowbray, Mary J. Wright, and Louis H. Cummings.●

CARL ALBERT CONGRESSIONAL CENTER

HON. GLENN ENGLISH

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 21, 1981

● Mr. ENGLISH. Mr. Speaker, I am pleased today to express my support for H.R. 3598, a bill authorizing matching Federal funds for the Carl Albert Congressional Center at the University of Oklahoma in Norman.

Carl Albert served as Speaker of the House from 1970 until January of 1977, a tumultuous time of change for the country. During this period, Speaker Albert capably guided Congress through the changes and into a new era.

The Carl Albert Congressional Center not only honors the former Speaker, but also provides the country with the exceptional opportunity of establishing an academic discipline in the field of congressional studies. Presently the center contains one of the largest collections of congressional papers in the country. Current plans call for significantly increasing the collection, creating a forum for the study of Congress unique to the Nation's scholastic world. The University of Oklahoma offers the facilities for the proper maintenance and care of these papers, thus preserving the historical record of Congress as well as supplying a concentrated area of study for undergraduate and graduate students.

If passed, this bill will provide matching Federal funds for public and private donations up to $3 million. I urge my colleagues to join me in supporting this important legislation.●

PETER BENSINGER: A JOB WELL DONE

HON. ANDY IRELAND

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 21, 1981

● Mr. IRELAND. Mr. Speaker, I would like to take a few moments today to call the attention of the House to the retirement from public service of the head of the Drug Enforcement Administration, the Honorable Peter Bensinger.

Faced with a seemingly impossible task, Peter Bensinger has labored through the last three administrations to increase public and Government awareness of the threat to our society represented by narcotics use and the crime it generates.

Equally importantly, since our country does not produce any heroin or cocaine, Peter Bensinger has stressed the need to pursue strong diplomatic initiatives overseas, particularly in the nations of South America, South Asia, and Southeast Asia which are the primary producers.

Finally, he has worked hard to coordinate and firm up the often diffuse Federal and State enforcement efforts against narcotics within the United States.

Because of the magnitude of the task remaining, it would be inappropriate to list "successes" in any of the above endeavors.

Peter would be the first to say that his task is not complete, and that his successor will have to continue the fight. I want to make clear my support for the initiatives begun under Mr. Bensinger's guidance, particularly with regard to the overseas diplomatic efforts.

It is clear that the Department of State must redouble its efforts, and must recognize that in many instances the claim that overall diplomatic concerns must place the narcotics menace in perspective is dangerous nonsense. In most of these instances, the only diplomatic relations we have with these countries revolve around the narcotics problem, and our dealing with them should reflect this, rather than some nebulous concern for diplomatic niceties.

Recently, I have been privileged to work closely with Mr. Bensinger and his people at DEA as we have fought to have the ban against overseas spraying of paraquat lifted, particularly in Colombia. In this cooperative effort we have been successful, both in the House and Senate. I am confident that the conference committee will hammer out an agreement on the overall foreign assistance legislation which highlights the need to act promptly and forcefully in the international narcotics control program.

When this happens, it will be in large part due to the leadership over the years of Peter Bensinger.

Also this year, I joined with other Members, again with the full support of DEA, in the successful effort to get the military more involved in pursuing smugglers as they seek to penetrate our shores with cocaine, heroin, and the incredibly profitable marihuana trade.

Other areas we are now examining for possible legislative initiatives include the need to help the banking industry with some protective cover against continued pollution from the millions—perhaps billions—of "narcodollars" now corrupting the financial system of our Nation.

Again, here, we have cooperated with Peter Bensinger, and profited from his counsel.

For the future, our task is obvious—we must do everything in our power to combat the importation and use of narcotics in our country. We should always be grateful that we have had Peter Bensinger helping to lead this fight for the past 5½ years.

Peter Bensinger has set a standard of thoughtfulness and leadership which will stand us, and his successor, in good stead. Thank you, Peter.●

THREE THAT DESERVE TO LOSE

HON. BOB EDGAR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 21, 1981

● Mr. EDGAR. Mr. Speaker, the Washington Post editorial today, "Three That Deserve to Lose," is important. As the cosponsor of the Edgar-Pritchard amendment to delete the Tennessee-Tombigbee Waterway, I urge my colleagues to read this statement and help us end this misuse of public funds. The editorial follows:

THREE THAT DESERVE TO LOSE

Three very large government projects—the Tennessee-Tombigbee Waterway, the Clinch River breeder reactor and SRC I (the solvent refined coal project)—come before Congress this week. All richly deserve to be defeated.

What else do these projects—a canal connecting the Tennessee to the Gulf of Mexico, a breeder reactor demonstration plant, and a plant to make solid and liquid fuels from coal—have in common? All three are to be paid for entirely or largely from Federal Government funds. All have incurred immense cost overruns beyond expenses due to delay and inflation. All are way behind schedule. All are extremely expensive—between $3 billion and $4.5 billion. And none of the three makes economic sense.

It took 25 years from the time the Tenn-Tom was first authorized for Congress to become sufficiently persuaded of its merit to appropriate money for it. Congress was right the first 25 times. The canal's cost has ballooned from about $300 million a decade ago to $3 billion, but less than 20 percent of its projected benefits for the last five years actually materialized. Nearly everything else about the project is uncertain, including where the canal could sensibly end, which direction barge traffic on it will travel, who would use it and for what, and whether the benefits would ever exceed the costs of contruction.

Since Clinch River was first proposed, the rationale for plutonium breeders has evaporated. Only a large and growing number of traditional nuclear electric plants, using up the available uranium fuel, would offset the breeder's greater cost and make it economically competitive. But in the last few years projected nuclear demand has plummeted, estimates of uranium availability have risen sharply, and the price of uranium has dropped. Meanwhile, the cost of the Clinch River plant alone has risen fivefold—to $3 billion—and construction has not even begun. Utilities lobby strongly on Clinch River's behalf, but do not put their money behind it: the private share of the cost is now down to 9 percent. European breeder programs, including the most ambitious in France, are on hold or being reevaluated.

The SRC I project is the youngest of the three, but it may already have set the record for cost overruns: up 99.8 percent in 18 months. As in the case of Clinch River, the government would bear most of the costs—up to 97 percent, depending on how successful the project is. The revenues now being projected by the principal contractor assume that the solid and low-grade liquid products will sell at the equivalent of oil priced at $76 a barrel, which is very unlikely. The project suffers from a number of basic design flaws.

None of these projects will yield benefits commensurate to the government's investment. Some may yield none at all. Termination would be the best choice even if there were plenty of money available. But at a time when badly needed government programs are being cut to the bone, their presence in the budget is an affront.●

SOCIAL SECURITY CUT WILL HURT

HON. WILLIAM D. FORD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 21, 1981

● Mr. FORD of Michigan. Mr. Speaker, we are heedlessly wading into deep and dangerous waters on social security legislation. We had best pause and reflect on where we are going before it is too late.

When we voted late last month for that hastily thrown together Republican reconciliation substitute known as Gramm-Latta II, we agreed to eliminate the $122 minimum social security benefit for 3 million Americans in April. Under the Senate-passed bill the benefits will terminate in August.

Even though the hour is now late, we should make every effort to correct this grievous error in conference. This is but another example of the heartlessness of the Reagan administration.

The administration argues that this payment should be abolished because the recipients never earned the bene-

fit. Have we reached a point in our society where we are prepared to turn our backs on those who depend on this meager payment because they have not earned the right to $122 a month? I hope not.

The administration sees this as a way to reduce 1982 outlays by $1.3 billion. It estimates that the cut would affect about 1.5 million of the 2.9 million present beneficiaries. It argues that only 17 percent of these are truly needy and that 74 percent receive additional retirement income.

The cruel fact is, however, that about 750,000 of these people rely solely upon the minimum benefit for their retirement income.

It is estimated that 1.2 million of all of the recipients would be eligible for other Federal benefits. The remaining 1.8 million would just have to suffer some income loss.

In itself this is disturbing enough. Equally worrisome, however, is the clear intention of the administration to make even more painful and more fundamental changes in social security. The minimum benefit proposal, as harsh as it is for those who so desperately count on it, is but the tip of the iceberg.

With great haste, as is the wont of the Republican budget cutters, the administration wants to make lasting changes in social security that will hurt million of Americans permanently.

They want to go far beyond the adjustments that are necessary to guarantee the solvency of the trust funds in order to achieve the balanced budget they have promised.

In short, they are seeking to play fast and loose with the futures of older Americans for their own political ends.●

A VIGOROUS DEFENSE OF THE FIRST AMENDMENT

HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 21, 1981

● Mr. BROWN of California. Mr. Speaker, although legislators are apt to become entangled in eternal debate over the particulars of governing, we must never become oblivious or neglectful toward the framework which affords us the luxury of disagreement. More than on any other thing, this framework—democracy—depends upon the first amendment for its existence.

Freedom of speech and assembly, in all its forms, represents the fundamental, shared value that binds individuals together as Americans, and Americans together as a nation. It is the one factor which, most wholly on its own account, is responsible for democracy. And, as the determining factor, it serves as the yardstick by which free societies are distinguished from those which are not.

There have been recent occurrences which indicate a lessening of public support for first amendment privileges. Veiled in cloaks of mainstream support, unrepresentative, extremist groups have attempted to impose censorship on both a local and national scale. Incidents of local book burnings and national invocations of a purportedly universal moral code should have each one of us up in arms over the audacity of their implications. Yet, all too often, these incidents go unexamined, and the defense of first amendment freedoms is treated with lethargy.

Within this context, I would like to call my colleagues' attention to an exceptional examination of first amendment freedoms by Kathy Olmsted of San Bernardino, Calif., in an essay that won first prize in KNXT television station's first amendment essay contest. Both Kathy, for her excellent essay, and station KNXT, for its celebration of our most fundamental freedoms, should be heartily commended.

At this time, I wish to insert in the RECORD the essay by Kathy Olmsted of Pacific High School, San Bernardino, Calif.

FIRST AMENDMENT ESSAY

(By Kathy Olmsted)

In recent years, there has been a notable resurgence of conservatism among American citizens. The present mood has increased the strength and visibility of groups like the Moral Majority and led to a weakening of public support for the unrestricted exercise of first amendment freedoms. This populist sentiment in favor of curbing individual liberties is in direct contrast to the mood of 50 years ago. The increasingly liberal rulings of the Supreme Court during the 1930's paved the way for the virtual elimination of restraints on the freedoms of speech, religion, assembly, petition and the press over the next 40 years. However, the present political climate could indicate the imposition of more limitations on civil liberties if public support of first amendment freedoms continues to wane.

The first amendment provides that Congress shall make no law "abridging . . . the right of the people peaceably to assemble, and to petition the Government for a redress of grievances." In 1876, the Supreme Court narrowly interpreted this passage to mean citizens could only assemble if their purpose was to petition the government. In 1937, however, the Court liberated freedom of assembly from its dependence on freedom of petition and held it to be a fundamental right in a democratic society.

But there are still problems in allowing all groups to publicly assemble. Public opinion seems to be strengthening against indiscriminately permitting groups like the Ku Klux Klan and National Socialist Party of America to stage demonstrations and parades. In June of 1978 the American Civil Liberties Union lost many of its supporters when it defended the Nazi Party's right to hold a march. The attention called to this activity brought a national outcry against extending the right of assembly to extremist groups.

Public support of freedom of the press has also gone full cycle over the last 50 years. In 1931, the Supreme Court declared censorship to be unconstitutional by invalidating a Minnesota newspaper "rag" law. But in the last decade, censorship has again been on the rise. Efforts to ban books from school systems and public libraries doubled in number over the first 5 years of the 1970's. Most banning attempts sprang from a populist, vigilante spirit to insure morality in literature, but often resulted in the banishment of classic works. Novels and plans judged too obscene, seditious, or blasphemous to allow in classrooms included such literate fare as "The Grapes of Wrath", "Catcher in the Rye", and "The Merchant of Venice". The extent of the popular support for these censorial efforts is evidenced by the more than 200 State and local groups organized to clean up the libraries.

The concept of the freedom of religion aroused very little controversy in 1930, but the issues of school prayer, private school tax credits and financial malfeasance are now bringing the idea into the political arena. An increasing number of Americans seem to be in favor of tightening the State controls on churches in order to deal with fiscal mismanagement and lessen the influence of religious cults.

The decade of the 1930's witnessed a number of advancements in the area of legal guarantees for free speech. The Nation has recovered from the Communist scare of the early 1920's and was not yet encumbered with concerns about wartime security. The Supreme Court under Chief Justice Charles Evans Hughes made a number of strides toward extending the rights of unrestricted speech to all citizens.

But recently public sentiment has swung in favor of eliminating the abuses of free speech inevitable in a democratic society. Carol Burnett's suit against the National Enquirer established that the press cannot always hide behind first amendment protections, organizations like the Moral Majority are challenging the Nation's pornography laws, and the "Pentagon Papers" raised questions about how far free speech can go before it conflicts with national security interests.

The Nation has changed much over the last 50 years. The 1930's were a time for putting democratic ideals into practice, while the 1980's seem to be a time for reacting to too much freedom too fast. Distrust of the media, the courts and Congress has contributed to a general consensus among the populace that the first amendment goes too far in guaranteeing freedom of the press, speech, religion, petition and assembly to everyone. But the freedoms enumerated in the first amendment have endured the fluctuation of public support for over 200 years and their flexibility seems to promise them at least 200 more.●

JOSEPH W. HOLLIDAY

HON. JOHN L. NAPIER

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 21, 1981

● Mr. NAPIER. Mr. Speaker, It is with sadness that I note the passing of a good friend, Joseph W. Holliday of

Galivants Ferry, S.C. Mr. Holliday was the president of Pee Dee Farms, one of the largest agricultural concerns in the State. He was postmaster of Galivants Ferry and was recently appointed as a member of my Tobacco Advisory Committee. He also served on the John F. Kennedy Agricultural Committee.

Mr. Holliday's lifelong contributions to agriculture will long be remembered. During his lifetime, he and his family created one of the largest and most modern farm operations in existence in the South. Many say the Holliday farm is the largest tobacco-growing concern in the world.

Joseph W. Holliday was born at Galivants Ferry, a small, riverside community famous statewide for perserving the heritage of American politics through its biannual, old fashioned stump meetings which signal the beginning of political campaigns. From this rural setting, Mr. Holliday reached out to serve his community, State and Nation through numerous organizations, associations and agencies.

He was director emeritus of South Carolina National Bank, served on the board of trustees of Coastal Carolina College and was past trustee of the Baptist College of Charleston and Furman University in Greenville. He was a member of Galivants Ferry Baptist Church.

An editorial in the Tuesday, July 14 Myrtle Beach, S.C. Sun News described Joseph W. Holliday in these well-chosen words which share the loss and sadness all those who knew him bear:

The death of Joseph W. Holliday of Galivants Ferry on Saturday deprives not only Horry County, but the entire state, of a farsighted businessman and an enduring civic leader.

Mr. Holliday is best known, we suppose, for his business activities in banking, farming and warehousing, but several of us appreciate Mr. Holliday's intense interest in keeping alive the spirit of politicking that came with the Democratic stump rally every other year. With his brother, John Monroe J. Holliday who survives him, Mr. Joseph Holliday made Galivants Ferry the center of South Carolina politics at least once every two years. No doubt, the stump speaking will succeed Mr. Holliday next year, and it will be a tribute to him.

We knew Mr. Holliday for many years, and we admired him as a family man as well as an entrepreneur who knew his way around the business world. That his death and that of Hoyt L. Jordon of Conway, another leader in business and civic affairs, came on the same day heightens our feeling of loss.

If the Pee Dee Farms Corp., perhaps the largest tobacco farm in the United States and certainly the forerunner of large tobacco businesses anywhere in the Carolinas, is a tribute to the Holliday brothers and to their father, then Mr. Joseph Holliday's unselfish devotion to family and friends and his untiring involvement in civic and business affairs writes his obituary more clearly and cogently than anything in print.

Horry County and South Carolina suffer the loss of Mr. Holliday from our midst. May he rest in peace, and may the sadness of his passing dissolve with time and memory.●

FOURTH CONGRESSIONAL DISTRICT RESIDENTS STRONGLY SUPPORT PRESIDENT REAGAN'S ECONOMIC RECOVERY PROGRAM

HON. NORMAN F. LENT

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 21, 1981

● Mr. LENT. Mr. Speaker, each year since being elected to the Congress, I have conducted a poll of my constituents in the Fourth Congressional District of New York which I have the honor to represent. Each year, when the tabulation of answers to my questionnaire has been completed, I have made the results available to my colleagues and to the President.

At this time, I would like to share with my colleagues the results of my 11th annual questionnaire. I am pleased to report that more than 21,000 constituents reponded to this survey. This impressive response is indicative of the intense interest my constituents have in the Federal Government, its policies and its programs.

A good share of the questions in this year's questionnaire dealt with the policies and programs of President Reagan and his administration. I am pleased to report to my colleagues that the questionnaire results revealed very strong support for President Reagan's economic recovery program within the Fourth Congressional District—84 percent of the questionnaire respondents approved of President Reagan's proposals to limit Federal spending, even though such proposals might curtail programs in which the respondents were interested. More than 82 percent endorsed President Reagan's across-the-board reduction in Federal income tax rates. And more than 71 percent supported the President's call for increased defense expenditures.

Concern over the state of the economy was evident in the survey results. Only 33 percent of the respondents were prepared to say that 1981 will be a better year, economically, for Long Island. Frankly, Mr. Speaker, I was startled by this rather pessimistic outlook. I feel it may have been due to an expectation that Congress would not approve the President's economic recovery program. Since the poll was completed, Congress has voted firm limits on Federal spending, as President Reagan proposed to curb inflation. And we can complete the President's program for revitalizing our Nation's economy by voting for the across-the-board reduction in tax rates, as President Reagan is requesting. If we do so, Mr. Speaker, we will see a much stronger and more prosperous economy emerging.

I trust the results of this questionnaire will persuade my colleagues on the other side of the aisle of the necessity to adopt the Reagan tax cut program.

So that my colleagues may be fully informed, I insert the complete tabulation of results of my 11th annual questionnaire into the RECORD at this point:

TABULATION OF 11TH ANNUAL QUESTIONNAIRE

[In percent]

Question	Yes	No	Undecided
1. Do you favor President Reagan's proposal for an across-the-board reduction in income tax rates of 10 percent per year for 3 years?	82.3	15.0	2.7
2. Do you favor President Reagan's proposals to limit Federal spending even though they may curtail some programs of interest to you?	84.1	14.5	1.4
3. Do you favor President Reagan's proposal to increase defense expenditures?	71.1	23.6	5.3
4. Do you favor increased Federal spending to provide larger subsidies to improve service on the Long Island Railroad?	40.0	56.5	3.5
5. Should the United States provide additional aid to El Salvador, if the guerrillas there continue to get arms from Communist countries?	47.9	48.1	4.0
6. Should the United States cut off aid to Nicaragua, if the Nicaraguan regime continues to allow arms shipments to guerrillas in El Salvador?	86.4	10.8	2.8
7. Should the United States lift its embargo on grain shipments to the Soviet Union at this time?	21.2	77.1	1.7
8. The Congress this year will consider revisions to the Clean Air Act. Do you favor some relaxation of air quality controls on coal-fired utility plants to allow greater use of lower-cost coal?	73.4	22.3	4.3
9. Do you favor separate and lower minimum wage requirements for teenagers to create more entry-level opportunities for young people?	59.5	37.4	3.1
10. To restore fiscal stability to the social security program, without sizable increases in social security taxes, do you favor funding nonretirement benefits—such as medicare and disability payments—from general tax revenues?	79.4	17.1	3.5
11. Do you favor replacing federally funded public employee job programs with greater tax incentives to create jobs in private industry and business?	77.2	18.3	4.5
12. Do you feel 1981 will be a better year, economically, for Long Island?	33.0	52.8	14.2

●

SOLVING THE MINIMUM BENEFIT CRISIS

HON. CHARLES E. BENNETT

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 21, 1981

● Mr. BENNETT. Mr. Speaker, Congressman MCCULLOM and I introduced a bill today which answers the problems of minimum social security, in a valid way, protecting those now covered or about to be covered; and furnishing the needed additional funds from general revenues. The bill reads as follows:

H.R. 4212

A bill to provide that the repeal of the minimum social security benefit shall not apply to individuals who are currently receiving monthly insurance benefits under title II of the Social Security Act or who initially become entitled to such benefits prior to 1984.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 215(a)(1)(C)(i)(I) of the Social Security Act and the related provisions in title II of such Act (establishing a statutory minimum benefit under the old-age, survivors, and disability insurance program) shall continue to apply, notwithstanding the repeal of such section and such provisions in 1981, to any individual who is entitled to a monthly insurance benefit under title II of such Act on the date of the enactment of this Act or who initially becomes entitled to such a benefit after such date but before January 1, 1984.

SEC. 2. There are authorized to be appropriated from time to time, to the Federal Old-Age and Survivors Insurance Trust Fund and the Federal Disability Insurance Trust Fund, such sums as the Secretary of Health and Human Resources deems necessary for any fiscal year, on account of—

(1) amounts paid or to be paid during such fiscal year from such Trust Funds under title II of the Social Security Act solely by reason for the first section of this Act,

(2) the additional administrative expenses resulting or expected to result therefrom, and

(3) any loss in interest to such Trust Funds resulting from the payment of such amounts, in order to place each of such Trust Funds in the same position at the end of such fiscal year as the position in which it would have been if the first section of this Act had not been enacted.●

RALPH DULANY

HON. ROY DYSON

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 21, 1981

● Mr. DYSON. Mr. Speaker, it was with great sadness that I learned last May of the death of a very close friend of my families who lived in Wicomico County on the lower Eastern Shore of Maryland.

Ralph Dulany was an inspiration to those who knew him and loved him. Wicomico County, Md., was a better place because of his untiring dedication and sense of civic responsibility.

Mr. Dulany was a member of the Maryland Department of Economic and Community Development Advisory Commission from 1964 to 1974, serving as chairman from 1967 until 1974. He was made chairman emeritus upon his retirement from the commission.

The former president of Dulany Foods, a prominent Salisbury, Md., food processing firm which was later purchased by the Green Giant Co., Mr. Dulany was extremely active in both the business world and his community throughout his lifetime.

He was a former president of the National Canners Association. He also served for 21 years on the Wicomico County Board of Commissioners, 10 years as chairman of the county housing authority and held numerous positions of leadership in civic and service organizations.

In the words of Hans F. Mayer of the Maryland Department of Economic and Community Development, "Mr. Dulany was a dedicated and tireless businessman, community leader and public servant."

Mr. Speaker, I would like to insert an editorial from the May 27, edition of the Daily Times which I feel expresses the thoughts of the people who knew Ralph Dulany and who will miss him.

RALPH O. DULANY

Friends and relatives paid their last respects today to Fruitland's most prominent citizen.

Ralph Olin Dulany died Sunday in Peninsula General Hospital Medical of heart failure. He was 87.

Dulany was active in community affairs for many years with much of his work unknown to the public. His impact upon the community will be difficult to assess but his peers recognized his worth when in 1951 he received the Salisbury Award. His memberships and honorary degrees are numerous.

Dulany probably became best known to the community in 1941 when he was appointed, with three others, by then Gov. Herbert O'Conor as a member of the 'Blue Ribbon' Wicomico County Commissioners, later changed to the Wicomico County Council. He served on that board until 1962 when he decided not to seek reelection. He was a quiet member of the board who attended each meeting with his trademark, a bulging briefcase stuffed with work papers prepared before the session. He was always prepared and was able to contribute something of value to each meeting.

There was no fanfare about his retirement from the old commissioners. He simply didn't say anything and when the candidate filing deadline passed it became apparent that he was not going to seek another term. Two wars had been fought during his tenure, the county had grown richer and county commissioners had served and been replaced within those two decades. He guided and helped the county reach statewide recognition.

A champion of the downtrodden, Dulany would hire ex-convicts at his Fruitland cannery in the days when work for an ex-convict was impossible to find. He advocated causes ahead of his time, serving as chairman of the controversial Wicomico Housing Authority between 1965 and 1975.

He was interested in the people of Fruitland and helped many of its citizens in time of need.

W. Lee Allen, a boyhood chum, commented when he presented Dulany with the 1951 Salisbury Award: "Never once have I seen him make a decision in which he did not regard the public welfare."

The statement does justice to the man.●

CONGRESSMAN McCLORY REPORTS QUESTIONNAIRE RESULTS

HON. ROBERT McCLORY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 21, 1981

● Mr. McCLORY. Mr. Speaker, never during my years in the U.S. House of Representatives have I sensed a greater interest in public issues on the part of my constituents than at the present time. Recently, I circulated my biennial questionnaire among my constituents in the 13th Illinois Congressional District, comprising large portions of Lake, McHenry and Kane Counties. This area represents a broad cross section of the political, economic, and social interests of our Nation. The questions propounded to my constituents were primarily those associated with the major concerns of the Reagan administration focusing on the problems of the economy and our national security.

A strong demand from my constituents for responsible management of the Government's fiscal business was the principal characteristic of this survey. Other responses expressed support for increased Federal handgun controls, opposition to a constitutional amendment to prohibit abortions, and dissatisfaction with former President Carter's handling of the Iranian hostage crisis.

It should be revealing to the Members of this body that less than one-fifth—19 percent—of my constituents would support legislation to provide for the Federal financing of congressional political campaigns. Hopefully, this result will influence my colleagues to oppose any expansion of the existing authority of the Federal Elections Commission which already dominates presidential election campaigns.

Stricter Federal handgun controls were favored by more than 60 percent of those whom I undertake to represent in the 13th District of Illinois. I should add that throughout the district women were precisely 2 to 1—or 67 percent—in favor of "stricter Federal handgun control laws," in contrast to 57 percent of the men who voiced similar support.

Mr. Speaker, except for the disparity which exists on the handgun issue, men and women appeared generally to express similar opinions. A slightly larger percentage of women—31 percent—in contrast to 28 percent of their male counterparts, favored a constitutional amendment to outlaw abortions.

Finally, Mr. Speaker, let me repeat that the responses to this year's questionnaire were greater than in any earlier years. In returning the answered questionnaire cards, literally thousands also penned individual letters commenting on the issues surveyed as well as on other subjects of current interest.

Mr. Speaker, I am pleased to attach hereto the questionnaire results giving the numerical details as well as the percentages. I am sure that many of my colleagues will be interested in comparing these results with those which they have secured from similar questions which they have propounded to their constituents. The results follow:

	Voting		Percent yes
	Yes	No	
1. Do you favor a 3-year, 10-percent-a-year cut in individual income tax rates	27,916	3,404	89
2. Would you favor such a tax cut even if it means an unbalanced Federal budget	15,945	14,944	52
3. Do you favor immediate, drastic cuts in Federal spending of the sort proposed by President Reagan	26,770	4,617	85
4. Should our Nation spend more on defense, even if this means running a deficit	18,260	12,589	59
5. Do you approve of the way former President Carter handled the Iranian hostage crisis	8,095	23,016	26
6. If such a crisis occurs again, should the President use force to gain the hostages' freedom	22,175	7,849	74
7. Do you favor stricter Federal handgun control laws	19,467	11,922	62
8. Do you favor legislation providing for Federal financing of congressional election campaigns	5,953	25,063	19
9. Do you favor a constitutional amendment requiring a balanced Federal budget except during national emergency	23,665	7,284	76
10. Should the Federal income tax provide a credit for tuition at private elementary and secondary schools	13,953	17,555	44
11. Do you favor a constitutional amendment to outlaw abortions	9,239	21,835	30●

ARE PESTICIDES REALLY NECESSARY?

HON. ANDY IRELAND

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 21, 1981

● Mr. IRELAND. Mr. Speaker, there has been a great deal of controversy surrounding some of the methods used to determine which chemicals are carcinogenic. The debate over saccharine a few year ago comes to mind. Some have argued that the use of animals is not an effective approach. Some have argued that using unrealistically high doses of chemicals biases the results. And some believe that the techniques we are using today are the best available.

I would like to take a moment to add the concerns of one of my constituents to this debate. Mr. Keith C. Barrons is an agricultural consultant from Holmes Beach, Fla. I would like to include below an excerpt from his book, "Are Pesticides Really Necessary?" to the ongoing debate of this issue.

EXCERPT FROM "ARE PESTICIDES REALLY NECESSARY?"

(By Keith C. Barrons)

The saccharin episode in the United States, following so quickly upon the banning of cyclamates, served to emphasize that many organic substances, both natural and synthetic, can be shown to be carcinogenic in one or another laboratory animal if administered at doses greatly in excess of likely human intake. The fact that there is no evidence of an increase in human cancer resulting from either of these sweetening agents after years of use should cause even the most wary to reflect on the wisdom of the Delaney Clause. As presently interpreted, this provision in U.S. regulatory law prohibits the addition to food of any substance that induces tumors in laboratory animals at any dosage, no matter how high. Valuable uses of at least ten pest control chemicals have been banned since passage of the Delaney Clause, and numerous promising materials have never been heard of beyond research facilities, where they fell by the wayside when toxicological investigations—as required by regulatory agencies—showed them to be probable carcinogens at doses greatly in excess of likely human exposure.

There is certainly reason to question the practical meaning of carcinogenicity tests with a single species, particularly tumor-prone strains of mice. Likewise there is reason to question that net benefit to man of preventing the use of chemicals that help assure an adequate food supply only because grossly exaggerated doses have a tumorigenic effect on an inbred strain of laboratory animal. In my view, the current inflexible interpretation of the Delaney Clause, with no allowance for degrees of possible risk or the benefits on the other side of the ledger, must be modified or reinterpreted.

Although Congressional action to clarify the law's intent and to provide guidelines for its future administration might be the preferred way to balance risks and benefits, many think such action is unlikely. Another approach would be a reinterpretation by regulatory officials of the word appropriate found in the Delaney Clause, which reads:

"No additive shall be deemed to be safe if it is found to induce cancer when ingested by man or animal, or if it is found, after tests which are *appropriate* for the evaluation of the safety of food additives, to induce cancer in man or animal. . ." (italics mine).

Researchers conducting tests for possible carcinogenicity customarily run the dosage range as high as the animal will tolerate without death resulting. Hence, the dosages employed are often far in excess of likely human exposure. With compounds having a relatively low acute effect, the highest nonlethal doses may place a severe burden on the animal's elimination system, including the liver. It is believed by some that the resulting pathological manifestations are often in reality a response to this overloading of the system, rather than true carcinogenicity. What is so sacred about these traditional ways of conducting such experiments? Why not a protocol for carcinogenicity tests, with the highest level at an agreed-upon multiple of anticipated average human intake, for example 100 to 1? Would not such a margin for safety be quite *appropriate?*

To me, it is highly *inappropriate* to provide for an infinite margin of safety against the possibility of a miniscule increase in the incidence on cancer, via the Delaney Clause, but at the same time ignore the need for a reasonable margin of safety for our food supply. When DDT was banned in some countries a decade ago, we had just such a margin of safety for crop protection in the form of alternate chemicals. Now, with outlawing of one pesticide use after another, that margin has evaporated, as has much of the incentive for industry to continue research aimed at safer and more effective crop and livestock protection materials.

As promising as some nonchemical methods of pest control may be, those who promote the idea that they alone can defend us against insects, fungi, nematodes, etc. without the aid and the backup of pesticides are proposing that we all play Russian roulette with life's number one essential: our food supply. A more flexible interpretation of the Delaney Clause, based on tests at an agreed-upon multiple of likely human intake, would go a long way toward assuring food for the future.●

SOVIET YAMAL NATURAL GAS PIPELINE—A CONCURRENT RESOLUTION OF DISAPPROVAL

HON. JOHN LeBOUTILLIER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 21, 1981

● Mr. LEBOUTILLIER. Mr. Speaker, today I am introducing a House concurrent resolution which expresses the disapproval of the Congress with respect to U.S. participation in the Yamal natural gas pipeline project. This resolution urges the President to establish allied cooperation in developing alternative free world energy sources.

Mr. Speaker, this concurrent resolution is part of a continuing effort which I and my distinguished colleagues, Representative NELLIGAN and Senator GARN, are pursuing to halt Western financial, material, and technological participation in the construction of the Soviet Yamal natural gas pipeline.

On June 24 we sent a letter—cosigned by nearly 50 Members of Congress—to President Reagan expressing our concern that the pipeline poses a clear and present danger to Western security. It was our judgment that, by significantly increasing Europe's dependence on the Soviet bloc for natural gas and other sources of energy, the Yamal natural gas pipeline would clearly provide the U.S.S.R. with tremendous economic and political leverage over NATO, leading to the potential "Finlandization" of Western Europe.

The administration's first public response to this letter was in the form of testimony last week before the Joint Economic Committee. Testifying before that committee, Under Secretary of State for Economic Affairs Myer Rashish warned that Europe's growing dependence on natural gas from Siberia could give the Soviet Union excessive influence over their economies. While the United States seeks a prudent level of economic relations with the Soviet Union and Eastern Europe, Under Secretary Rashish said that care must be taken to make sure that the Soviet Union is not afforded the opportunity to potentially disrupt the Western economies, as has OPEC.

This same point was underscored by President Reagan in a conversation with Chancellor Schmidt at the Ottawa Summit Conference on Sunday, June 19. According to published reports, President Reagan expressed concern over construction of the pipeline, adding that European dependence on Soviet natural gas might be reduced if alternative sources could be developed.

Mr. Speaker, I applaud these efforts by the administration, and urge the President to continue to take the leadership in this important matter. Moreover, I urge my colleagues in the House to support my resolution as an expression of support for the President. A strong American leadership in the development of alternative sources of free world energy is a course of action we should all welcome.

The resolution as introduced is printed below.

H. CON. RES. 159

Concurrent resolution expressing the sense of the Congress that the United States should not participate in the Yamal natural gas pipeline project, and urging the President to secure the cooperation of the nations of Western Europe and Japan in developing alternative Free World energy sources

Whereas the Union of Soviet Socialist Republics proposes to construct a 3,600-mile natural gas pipeline at a cost of $15,000,000,000, running from the Yamal Peninsula in northwest Siberia to the Federal Republic of Germany;

Whereas the Union of Soviet Socialist Republics proposes that the Yamal natural gas pipeline be built with Western financial, material, and technological resources;

Whereas the construction of the Yamal natural gas pipeline would substantially increase the economic and energy dependence of Western Europe on the Soviet Bloc, increase the possibility for economic and political blackmail by the Union of Soviet Socialist Republics, and undermine the historic cultural, economic, and security ties between the United States and Western Europe;

Whereas the construction of the Yamal natural gas pipeline would provide the Union of Soviet Socialist Republics with a substantial source of revenue to further finance its continuing military build-up and worldwide geopolitical offensive;

Whereas the security and economic stability of Western Europe require energy diversification; and

Whereas the United States and its allies possess manifold energy sources in need of development: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That it is the sense of the Congress that the President, exercising such authority as is available to him, should—

(1) prohibit any participation by the United States in the Yamal natural gas pipeline project;

(2) urge the nations of Western Europe not to participate in the construction of such project;

(3) propose and enlist the cooperation of the nations of Western Europe and Japan in an alternate energy diversification project in order to develop and maximize the vast energy potentials existing within the Free World; and

(4) promote this alternative energy diversification project as part of an effort—

(A) to strengthen the security of all Free World nations;

(B) to assure reliable and diverse energy supplies within the Free World;

(C) to strengthen the Western economy and increase levels of employment;

(D) to strengthen the bond between the United States and its allies; and

(E) to enhance the role of the United States as the leader of the Free World.●

STATEMENT BY REPRESENTATIVE NELLIGAN ON THE INTRODUCTION OF A RESOLUTION EXPRESSING THE DISAPPROVAL OF CONGRESS WITH RESPECT TO U.S. PARTICIPATION IN THE YAMAL NATURAL GAS PIPELINE PROJECT

HON. JAMES L. NELLIGAN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 21, 1981

● Mr. NELLIGAN. Mr. Speaker, I am pleased to join with Congressman LEBOUTILLIER in introducing this resolution urging President Reagan to discourage our Western European Allies from participating in construction of the Yamal natural gas pipeline.

In addition, a second and very important part of this resolution urges the President to take the lead, in cooperation with our European Allies, in developing free world energy resources so that the Europeans have sufficient and secure energy supplies for their industry.

Mr. Speaker, as you know, there are vast amounts of recoverable coal in this country. We need to develop our energy-related infrastructure—our railroads, our ports, our roads—so that we can get our coal to Western Europe. I believe this should be a high priority of this administration.

For too long, the United States has not played its proper role as free world leader in energy development. We must take the lead so that once again this country and its allies can reduce our dependence on OPEC. We must also insure that our European Allies do not feel forced to rely on other suppliers such as the Soviet Union.

I therefore urge my colleagues to join me in cosponsoring this resolution.●

SNYDER QUESTIONNAIRE

HON. GENE SNYDER

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 21, 1981

● Mr. SNYDER. Mr. Speaker, every year, since first coming to Congress, it has been my practice to send out a questionnaire and every year the good people of the Fourth Congressional District of Kentucky have responded by sharing their views with me on the issues covered by my survey.

This year was no exception. My questionnaire was sent out in May and the voters of the Fourth District—nearly 20,000 of them—took the time to let me know what they are thinking.

Over the years, the folks in the Fourth District who respond regularly to my questionnaires have, unfortunately, always been very far ahead of their time. They have long realized that there are no "free meals." They have long known the Government cannot make a habit of spending more than it takes in without creating serious economic problems. They have long realized that too much Government is the source of too many of our problems. I shared their point of view all along, but not enough of my colleagues here in Congress did.

Fortunately, it appears things have changed. The rest of the country is apparently beginning to catch up with the residents of the Fourth District and is beginning to realize that Government, in many cases, is the problem, not the cure.

Especially encouraging to me is the fact that there is a good chance that when this year is over, I will be able to tell my constitutents that, for once, their Government listened to them.

By overwhelming margins, my consitituents support increased defense spending and increased pay and benefits for military personnel. The House-passed defense authorization bill increases defense spending to record levels and a bill to increase pay and benefits is on the schedule.

By overwhelming margins, my constituents support the elimination of mandatory auto emissions inspection, support a reductions in the size of the Federal work force and support the dismantling of the Department of Education. In all likelihood, the administration's plans include all three.

Even more noticeable, the results of this survey indicate nearly unanimous approval of President Reagan's economic proposals. Whether you call this a "mandate" or not, the residents of the Fourth Congressional District of Kentucky think the President is on the right path.

The people I have the honor of representing here in the House have been ahead of their time for a good while, but this year it appears that Congress could catch up with them. And the Government and our country will be better off because of it.

It is my pleasure to share the results of my 1981 questionnaire with you.

QUESTIONNAIRE

[In percent]

1. In general, do you support the President's proposals for reducing the 1982 Federal budget? Yes, 96.9, no, 2.8; undecided, 0.3.

2. Do you favor a substantial increase in defense spending? Yes, 85.6; no, 13.1; undecided, 1.3.

3. Would you support import restrictions on foreign cars to give the U.S. auto indus-

try a chance of recovery? Yes, 58.5; no, 39.5; undecided, 2.0.

4. Do you think able-bodied welfare recipients should be required to perform some kind of work on public projects to maintain eligibility for welfare? Yes, 98.3; no, 1.3; undecided, 0.4.

5. Do you support President Reagan's plan to reduce the number of Federal employees by 33,900 in 1981 and 63,100 in 1982? Yes, 93.5; no, 4.4; undecided, 2.1.

6. Would you support efforts to dismantle the Department of Education? Yes, 70.1; no, 19.1; undecided, 10.8.

7. Do you favor an increase in pay and benefits for military personnel? Yes, 78.4; no, 17.9; undecided, 3.7.

8. The President has proposed an approximately $1 billion reduction in foreign aid spending. Should foreign aid be reduced? Yes, 95.7; no, 2.9; undecided, 1.4.

9. Do you support the Administration's "get tough" policy with the Soviet Union? Yes, 92.0; no, 5.2; undecided, 2.8.

10. Do you support mandatory automobile emissions inspection and maintenance programs? (Under existing law Jefferson, Kenton, Campbell, and Boone Counties would have to implement auto emissions inspection and maintenance programs by January of 1983.) Yes, 22.2; no, 74.5; undecided, 3.3.

11. Do you agree that reducing Federal spending is a necessary step to fight inflation? Yes, 97.0; no, 1.2; undecided, 1.8.●

A TRIBUTE TO MRS. CAROLYN GIBBONS COKER

HON. JOHN L. NAPIER

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 21, 1981

● Mr. NAPIER. Mr. Speaker, motherhood is one of the institutions which has served to provide this great Nation of ours with the men and women who created this free land. There is no greater service to any nation than that rendered by those who bear and rear the children who will be our future leaders.

It is with pride that South Carolina's Sixth District holds the honor of providing the representative for the Nation this year through Mrs. Carolyn Gibbons Coker, recently named National Young Mother of the Year.

Mrs. Coker, a 34-year-old mother of three boys, is married to a Florence, S.C. physician, Dr. Steven Coker. She won the national title after having served a year as South Carolina Young Mother of the Year.

A dedicated family person, Mrs. Coker instantly remarks her priorities are "God first, family next." She maintains a strong commitment to strengthening the spiritual and moral foundation of the home.

Mrs. Coker is a native of Turbeville, S.C. and graduated from one of South Carolina's finest institutions of higher learning, Lander College. She continued her studies while teaching, earning a master's degree. And, during this same period, she was elected president of the Charleston, S.C. Auxiliary to the Student American Medical Association and president of the Phi Chi Medical Auxiliary, activities in which she became involved while her husband attended medical school.

She has also served as the national secretary to the Student American Medical Association and in 1974 was named among the "Outstanding Young Women of America."

Presently Mrs. Coker lives in Florence with her family, where she serves as an active member of First Presbyterian Church, board member of the Association of Parents and Teachers at Briggs Elementary School, and president of the Parent's Guild at All Saints Episcopal Day School.

She has held garden club posts and is president-elect of the Florence Garden Council. Her organizational skills additionally led her to create three student groups in Florence for the Young Mother Council Service study group.

Lander College, her alma mater, recently recognized her contributions by naming her the 1981 Lander College Distinguished Alumni Award recipient.

Mrs. Carolyn Gibbons Coker will serve the Nation well during her yearlong reign as National Young Mother of the Year. It is with pride that South Carolina's Sixth Congressional District "lend" Mrs. Coker to the Nation because her ideals and values represent all the good and honorable things motherhood can mean.●

TRIBUTE TO HELEN SULLIVAN

HON. ROY DYSON

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 21, 1981

● Mr. DYSON. Mr. Speaker, on Friday, August 7, the Executive Director of the Agricultural Stabilization and Conservation Service—ASCS—in Charles County, Md., Mrs. Helen B. Sullivan, will be honored at a retirement luncheon in La Plata, Md.

Mrs. Sullivan has been an official of ASCS for 30 years and has dedicated her life to assisting Charles County farmers by providing excellent service as a liaison between the USDA and the farming community. In this capacity she has proved how invaluable the ASCS office can be.

Mrs. Sullivan and her husband John, are no strangers to the Charles County farming community. They have a 122-acre farm in Trinity Church near Newport, Md., which because of their busy schedules, they have had to rent to another local farmer.

In all her years with the Department of Agriculture, Mrs. Sullivan has always held the needs of the farmers in the highest regard.

Mr. Speaker, I join with the entire agriculture community in Charles County in wishing Mrs. Sullivan and John a happy and prosperous future.●

YES—A REPUBLIC; NO—A DEMOCRACY; LET'S KEEP IT THAT WAY

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 21, 1981

● Mr. McDONALD. Mr. Speaker, almost every day as of late, some effort is being made to bring this Nation of ours back to sanity. Last week I rendered for my colleagues a lesson of history to be learned from Alfred E. Smith, late Governor of New York, but most important, an American above all else. On July 9, 1981, I came across another item to share with my colleagues from the Atlanta constitution. This is another lesson of history from a more contemporary source.

It seems that there is a great debate going on in America as to whether, in view of men like Jerry Falwell, that there is a danger of what some refer to as a Christian theocratic government, being resurrected here in the United States. Collie H. Owens takes the humanist, the liberal, the radical, to task for all the cliches they present in opposition to returning not to a theocratic government, but to the beliefs that most Americans have had over the years, that this is a republic, not a democracy, and that form of government has enhanced the basic beliefs in God—family—country.

Concerning our Republic, to add to the comments of Collie H. Owens, my colleagues should glance back when Democrats like Al Smith were still calling our form of government—a republic. It was in 1928, November 30 to be exact, that the then War Department issued training manual 2000-25. The subject was "Citizenship." Concerning, for the benefit of present-day liberals, the manual stated of a democracy:

> A government of the masses. Authority derived through mass meeting or any other form of direct expression. Results in mobocracy. Attitude toward property is Communistic—negating property rights. Attitude toward law is that the will of the majority shall regulate, whether it be based upon deliberation or governed by passion, prejudice, and impulse, without restraint or regard to consequences. Results in demagogism, license, agitation, discontent, anarchy.

My colleagues would do well to reflect on this as they vote each day in the House. Do we continue to vote away the property rights of the great American middle class and negate the greatest freedom known to any country in the world? Do we continue to

buy votes by destroying the rich and not helping the poor? Do we, as Mr. Owens suggests, follow mobocracy and crucify Christ more again today—because it is the democratic thing to do? Once again, let us look to the lessons of history. To that end, as I did earlier with regard to Alfred E. Smith, I share with my colleagues the entire remarks of Collie H. Owens:

[From the Atlanta Constitution, July 9, 1981]

PULSE OF THE PUBLIC—A REPUBLIC, NOT DEMOCRACY

(By Collie H. Owens)

ATLANTA.—Allow me to respond to the critics (Pulse Of The Public, June 10 and 12) of my letter (June 4) advocating a return to a Christian theocratic government. Their responses were predictable and are, unfortunately, quite typical of the liberal nonsense that has brought this country to the brink of disaster. What really "scares" me and sends "cold chills up my spine" is the radical subjectivism of the humanistic mentality reflected in these letters. But rather than speculate about the level of epistemological self-consciousness of the respondents, let me answer some questions they raised. I'll lump their objections into categories (let's call them "The Cliches of Liberalism"), and I'll follow each cliche with my response.

First cliche: You can't legislate morality. It is true that we can't make men good by passing laws, but it is also true that laws are expressions of a moral system, i.e., a definite understanding of good and evil. From which moral system are going to derive our laws? God's biblical system (objective and absolute) or man's imaginery one (subjective and changing)?

Second cliche: You can't impose your morality on others. It is true that we should not create an arbitrary, existentialist-type morality and then force it on others, although that is what the humanists are doing every day, but, it is also true that Christians are to call our nation back to God's morality as expressed in biblical law. God's commandments did not originate with me, so they are not merely opinions; they are the absolute expression of God's unchanging character. The God of the Bible is an objective reality, and if people choose not to acknowledge him and his demands, they do so at their own peril. Imagine someone deciding to disregard the law of gravity and jumping off the Peachtree Plaza Hotel, yelling all the way down, "You can't impose the law of gravity on me!" Any individual or society which ignores the natural or moral absolutes of God's universe is headed for destruction. In this regard, George Washington stated in his first inaugural address, with great insight, that "the propitious smiles of Heaven can never be expected on a nation that disregards the eternal rules of order and right which Heaven itself has ordained."

Third cliche: You can't identify your interpretation of the Bible with God's will. True, we must be careful here, but it is also true that God has clearly and infallibly revealed his will in the Bible. Really now, folks, what's to interpret about "don't steal" and "don't kill?" For those who might have difficulty understanding these words, the definitive application of these commandments can be found in the case laws of the Old Testament. Insofar as our views are in accord with scripture, we can speak with authority and certainty.

Fourth cliche: You must separate church and state. True, if you mean we must keep separate the institutions of church and state and their functions. The church is to administer God's grace in the gospel and the sacraments, while the state is to administer biblical justice. But the cliche is false if you mean that the state is not to be submissive to the God who ordained its existence in the first place (Romans 13: 1-7). We do not believe in the separation of God and state, Bible and state, Christianity and state, or Christ and state. This point needs to be emphatically made: a theocracy does not mean the merger of church and state (as in Iran); however, both church and state (separate institutions, separate officers) must be under the authority of scripture because they are both God-ordained institutions. A theocracy (a government based on the Bible) is perfectly compatible with the First Amendment, not as interpreted by a liberal Supreme Court but as originally intended by the Christians who wrote it. For documentation of this point, see "The Separation Illusion" by John Whitehead, Mott Media, 1977.

Fifth cliche: A Bible-based government will result in the suppression of non-Christian religions. True, this has happened in the past, particularly in Europe. However, religious persecution is not a necessary ingredient of a theocracy. It would be more correct to say that a biblical government will result in the suppression of immoral actions (as defined objectively in scripture) rather than non-Christian ideas.

Sixth cliche: A Bible-based government would conflict with American democracy as established in the Constitution. First of all, the Constitution calls for a republic, not a democracy. Mr. Bruce Spengler (Pulse Of The Public, June 12) implied that I did not understand the meaning of the Constitution and that I was a dangerous, un-American person because I don't believe in democracy. As a matter of fact, I spend a whole quarter every year in my civil government course teaching nothing but the Declaration of Independence and the U.S. Constitution, so I am quite familiar with their contents. Since Mr. Spengler is such an expert on these documents, perhaps he can point out where, in either one, the word "democracy" is used.

The Founding Fathers knew that republican government (rule by law, rule by representative) is compatible with scripture but that democracy (rule by people) was a curse. I would refer Mr. Spangler to "Federalist No. 10" by James Madison (the main architect of the Constitution) in "The Federalist Papers" where democracy is denounced as one of the worst forms of government ever devised and is specifically contrasted with a republic. That many people ignorantly believe this country was founded as a democracy shows the extent to which Americans have been brainwashed by the leftist curriculum of state schools. The Constitution specifically guarantees for every state a "republican form of government."

Morever, the Bible condemns democracy. Read, for example, the tragic story in 1 Samuel 8 concerning Israel's substitution of democracy (mob rule) for theocracy (rule of God). Also, remember that it was mobocracy that sent the Lord Jesus Christ to the cross (Matthew 27:21-23). Democracy can lead to disastrous consequences through what the Christian philospher Francis Schaeffer has called "the tyranny of the 51 percent majority." Again, the question is, by what standard do you determine what is good, true, or beautiful? The choice is clear: The unchanging word of God or the rubber yardstick of man's sin-bent mind. It is Christ or Chaos.●

A VERY UGLY VISION

HON. JIM MATTOX

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 21, 1981

● Mr. MATTOX. Mr. Speaker, a very ugly vision has emerged from the Gramm-Latta amendment to the reconciliation bill that the House approved so narrowly. It is the certainty that millions of elderly, poor Americans will be completely done out of the minimum social security benefits they now rely on.

Never before has this House stricken from the social security rolls any groups of people currently receiving benefits. Recently, the House was stampeded into cutting off from the rolls, without any warning, the most vulnerable segment of our population—the elderly poor.

The argument that these people can be transferred to the supplemental security rolls is not only callous, it is unreal. It defies the facts. Only half of those people now eligible for SSI apply for it. We all know that the elderly are a proud group of people. What makes the administration think that the elderly now collecting the minimum benefits they have earned would willingly apply for welfare instead? This defies everything we know about the pride of older Americans.

It is not too late to undo this damage, I urge that we take whatever steps are necessary to insure that minimum social security benefits are not reduced for those currently receiving them.●

A FRAMEWORK FOR IMPROVING THE SUPREME COURT

HON. CARROLL HUBBARD, JR.

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 21, 1981

● Mr. HUBBARD. Mr. Speaker, Rev. Denny Burchett, pastor of Trinity Baptist Church in Hopkinsville, Ky., a city that I represent in Congress, has some ideas for improving the U.S. Supreme Court. At a time when the Senate is about to embark on historic confirmation hearings for Supreme Court nominee Sandra Day O'Connor, I share Reverend Burchett's letter with my colleagues. The letter follows:

DEAR REPRESENTATIVE HUBBARD: I am proposing a plan to change the term and appointments of the Supreme Court Justices of the United States. In engaging upon such a venture there are apparent problems: Amending the Constitution; keeping the Court as free from all prejudices, political

and otherwise, as possible; keeping a Supreme Court Justice appointment attractive to qualified, worthy individuals; having active, competent Supreme Court Justices unhindered by the quest for power, the self-delusion of egotism, the ravages of poor health, and the senility of old age.

I realize there are other problems, many of which I have never heard, but I believe the following plan can provide a framework for improving the Supreme Court.

Term of office: For each appointment—9 years.

How to attain office: Must be appointed by the President in power at time vacancy occurs on the Court; must be approved by a majority vote of the Senate in session.

How to maintain office: Must request reappointment each time a 9-year term ends; must repeat same procedure as outlined in attaining office.

Requirements for office: Must be at least 35 years old; must not be 72 or older at time of appointment; must have been a citizen of the United States for at least 20 years prior to appointment and for at least 15 of those years, the appointee's official residence must have been within the United States; must have at least two earned degrees from accredited colleges or universities located within the United States.

How to leave office: By reaching the age of 72 and the present appointment time running out; by voluntary resignation; by impeachment as prescribed by the Constitution; by not being reappointed by the President in power at the time the present appointment runs out; by not being reapproved by a majority of the Senate in session when the present appointment runs out; death; by being so physically or mentally impaired that one cannot perform the duties of the office and this matter of physical or mental impairment being brought to the Senate by the President in power at the time and the Senate, by a two-thirds majority vote, stating positively that the physical or mental impairment is so great that one cannot perform the duties of the office.

I pray you will give this subject some serious consideration, add your thoughts to it, and let there begin a winnowing that will make the Supreme Court of the United States a stronger, more efficient servant of the people of the United States.

With respect,

DENNY BURCHETT.●

MORATORIUM ON THE COMMERCIAL HUNTING AND KILLING OF WHALES

HON. JAMES WEAVER

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 21, 1981

● Mr. WEAVER. Mr. Speaker, I was pleased that the House concurrent resolution passed overwhelmingly on July 15, calling for an indefinite moratorium on the commercial hunting and killing of whales.

This week the 33d Annual International Whaling Commission begins a series of meetings in Brighton, England. For the past 8 years, the U.S. delegation has been pressing the IWC membership for approval of an international moratorium on the commercial hunting of whales. These efforts have so far been unsuccessful. The chances for such a moratorium being accepted look better than ever this year, as the idea has gained considerable support and economic conditions further diminish the viability of the remaining whaling industry.

Whales have existed for millions of years, and as such constitute a valuable historical, cultural, scientific, and esthetic natural resource. It is common knowledge that commercial whaling has been—and is still—responsible for bringing whale populations to the brink of extinction. Although they flourished for millions of years, man's lust for economic gain resulted in their demise in little over a century.

The normal course of whaling was to hunt a particular species until no more were found, then move on to another area and ravage another species. This methodical obliteration persisted until many whale stocks are now drastically reduced—some are believed, in fact, to be perilously close to extinction.

Today, the continued whaling activity carried on by a handful of nations compounds these problems, because very little scientific information is available on the response of whales to commerical exploitation. Thus, even though commercial harvest is less today than 20 years ago, these nations may still be endangering whale populations by either killing too many or not allowing adequate time for the population to recover. No one really knows. This reduces the margin for error, and makes it even more crucial that this senseless killing is stopped. The remaining whaling nations could easily find substitutes for whale products.

IWC has so far been unable, for a variety of reasons, to achieve its goal of preventing further decline of whale populations. Approval of the moratorium this year would provide a significant opportunity for the whales to regain their losses, if possible. The moratorium will also provide time to obtain scientific information about whales so crucially needed if wise decisions are to be made about management.

Hopefully, such a moratorium would effectively end, once and for all, the ludicrous and wasteful killing of these magnificent living fossils.●

WHY BIG OIL LOVES PUBLIC TV

HON. EDWARD J. MARKEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 21, 1981

● Mr. MARKEY. Mr. Speaker, I would like to call to the attention of my colleagues an article which recently appeared in TV Guide. The article, entitled, "Why Big Oil Loves Public TV," looks at the increasing instances of underwriting of public broadcasting programing by a number of large oil companies.

I have long been an active supporter of public broadcasting which is one of America's unduplicated cultural resources. During the initial debates on public broadcasting earlier this year, the issue of insulation was oft heard. By our system of forward-funding public broadcasting, we have effectively insulated this medium from political pressure and the whims of Congress and/or the administration.

My concern, Mr. Speaker, is to what extent is the insulation which we have so carefully guarded and fought for endangered by this new influx of corporate underwriting? The idea of increased advertising on public television and radio deeply concerns me as we have always pointed to the distinctions between commercial broadcasting which seeks to appeal to the lowest common denominator audience and the award winning, standard setting programing we have experienced on public broadcasting.

I hope my colleagues enjoy the following article by John Weisman which quite aptly sheds some light on this matter:

[From TV Guide, June 20, 1981]

WHY BIG OIL LOVES PUBLIC TV

A SURVEY SUGGESTS THAT THE HUGE GRANTS FROM ENERGY COMPANIES GO FAR IN CREATING PUBLIC—AND GOVERNMENT—FAVOR

(By John Weisman)

"Every time I hear a giant oil company has made a big donation to the arts, I get nervous," says a noted Washington lawyer with petroleum-industry experience. "I get nervous because it usually means they're after something."

These days, the attorney in question is nervous when he watches public television—nervous because public television is filled with programming largely paid for by oil-company donations.

How much of what you see on public television is funded by oil-company money? TV GUIDE asked for a typical month's programming from the Public Broadcasting Service. PBS delivered its February 1981 schedule as representative. That month, 72 percent of all the shows PBS telecast during its 32-hour core schedule—noncommercial TV's equivalent of prime time, running two hours a night. Sundays through Wednesdays—were funded wholly or in major part by four giant oil corporations. They were Exxon (12 hours), Mobil (eight hours), Arco (two hours) and Gulf (one hour).

These four multinational corporations were among the largest benefactors of public television in 1980. And 1979. And 1978. And 1977. And 1976. Exxon, Mobil, Arco and Gulf have funded some of the most-watched and best-loved programs on PTV.

Why do these corporate Medicis continue to spend their time, money and resources on noncommercial broadcasting? More important, precisely what influence do these corporations, whose underwriting made up more than half of all corporate donations to PTV in 1980, exert over what viewers of noncommercial television see—or don't see?

The answer to the first question is simple. Lawrence K. Grossman, president of Public Broadcasting Service, puts it succinctly: "What is clear—and no disguising—is that the oil companies are looking for a good image."

The second question—that of influence over programming—is much more complex. The relationship between big oil and public television is an intricate web spun over more than a decade.

Of course, at least one oil-company spokesman insists that the only reason for the support of public television is generosity. Mobil Oil vice president Herbert Schmertz, who estimates that he has spent roughly $20 million of his corporation's money on public broadcasting in the last decade and who plans to sponsor 80 to 100 hours of noncommercial fare in 1981, insists that Mobil does it for "the satisfaction of helping an emerging institution to prosper and succeed."

Most oil executives, however, probably concur with Lawrence Grossman's assessment. Joseph Downer, a vice chairman of Atlantic Richfield, says matter-of-factly that his corporation's investment of more than $15 million over the past five years has definitely helped Arco. "We gain an image of quality," he says "Our sponsorship of the Wolf Trap concerts resulted in a tremendous response from people in Government. And, my God, you walk into the departments, or the Congress, and you're identified as Arco, and there's a feeling of warmth. There's no question but that it's helpful to our lobbying effort."

Downer cites Arco's sponsorship of the Kennedy Center gala for visiting Chinese Vice Premier Deng Xiaoping in 1979 as another example of successful corporate lobbying through public television. Atlantic Richfield, he says, wants to do business in the People's Republic of China. And since the company came up with a $2-million donation that, at the very last minute, enabled PBS to carry the gala nationwide, it was logical that Arco chief executive officer Robert O. Anderson would sit near President Carter and Vice Premier Deng during the gala.

Obviously, no one gets something for nothing. Most public-television executives realize that the oil-company money they receive is simply selfish benevolence, by which petroleum-industry cash brings viewers opulent, well-produced shows in return for a better image for the corporations. James L. Loper, president of KCET, Los Angeles, which received a $3.5-million grant last year from Arco to produce Carl Sagan's popular Cosmos series, says, "I don't think anything is ever given on a purely philantropic basis." But Loper also insists, "I find nothing conspiratorial, malevolent or anything else in the fact that so much money is given by relatively few people. That simply is the way this country works."

Oil-company underwriting began in earnest in 1971, when Mobil gave $1.1 million to Boston station WGBH to complete funding the first two seasons of Masterpiece Theatre. But in 1971 such acts were rare. In those days the lion's share of PTV cash came from the Ford Foundation, which in all gave more than $200 million.

But Ford Foundation funds dried up in the late '70s, and stations had to look elsewhere for money. Surprisingly, they were helped by the fallout from the Arab oil embargo of 1973, and the subsequent OPEC oil price explosion of 1974, which sent the cost of a barrel of crude—and the profits of U.S. oil companies—soaring.

In 1974, the Nation's oil companies made more money than ever before. But they also sustained damage to their corporate images. Exxon, Mobil, Gulf and Arco were seen as profiteering, insensitive, hardhearted corporate monoliths.

But nothing is unsolvable. The gasoline ads that once filled the airwaves were replaced by calm pleas for conservation. And just like the tobacco companies, which had begun to sponsor televised athletic events once their products were banned from the airwaves, the oil companies started to look for other kinds of public exposure.

In the mid-'70s, the oil companies began to view public broadcasting as one way to show Americans that they were civic-minded and responsible, and that they supported the arts. What viewers got was series after series of beautifully produced shows. What the oil companies got was terrific value. This was true even though public broadcasting is not rated very highly as an advertising medium. Says Lawrence Bershon, Arco's manager of advertising services, "The cost per thousand is very expensive." But as part of a promotional package, PTV programming becomes an excellent investment. A 30-second commercial on CBS's top-rated 60 Minutes costs about $150,000. For little more than twice that—$375,000—Mobil's Herbert Schmertz was able to buy the whole series The Ascent of Man, with Jacob Bronowski, 13 hour-long episodes. Ninety seconds of commercial time on M*A*S*H would currently run an advertiser about $405,000. For a 90-minute PTV film, "Making M*A*S*H," which received rave notices from most TV critics, Arco paid $50,000.

More important, shows funded by oil companies are promotable. It is the well-planned promotion of PTV programs, according to corporate advertising people, that is the real basis for big oil's involvement with public television.

Until recently the only credit allowed to PTV underwriters was a single line of type at the beginning and the end of shows they helped to fund. Now, corporate logos will be permitted. But a PBS rule prohibiting corporate conflict of interest in underwriting (an oil company sponsoring a program on energy), will not be changed, despite pressure from some of the bigger producing stations.

But there is no restriction to the amount of outside advertising a company can do to promote one of its PBS shows. Thus, when Gulf sponsored a 1975 National Geographic special, "The Incredible Machine," it paid $350,000 for the one-hour show—and $900,000 to promote it.

In such advertisements Gulf's logo appears near the National Geographic's. "What you're getting," says one producer of high quality, heavily promoted PBS shows who asks for anonymity, "is nobility by association. Here's Gulf, a company some accuse of polluting the environment, and its logo is alongside the Geographic's."

Nobility by association is why Mobil vice president Herbert Schmertz spends $2 on promotion for every $3 he spends on programming. And why Atlantic Richfield allocates $1 for promotion to every $2 for programming.

Oil companies also hire outside public-relations firms to promote the shows they sponsor. Ben Kubasik, the head of Arco's PR firm, even has a say in what Arco will underwrite. Kubasik is part of an ad hoc evaluating committee, according to Arco corporate ad director Lew Angelos.

One public-relations executive explains what the oil company is after: "Our instructions are very clear. The company wants us to build an audience. Not just any audience: in public television you go after upscale decision-makers."

Indeed, one of PTV's main selling points is the quality of its audience. Here is what Larry Botto, KCET's director of development, wrote to one potential sponsor: "You can expect to win widespread and highly favorable recognition among an audience that will be made up largely of well-educated, affluent adults who are often in positions to influence your business as business and government leaders, clients, and customers, journalists, educators, investors, activists, securities analysts, professionals, as well as your key employees. . . . Likely, the television set in the White House will also be tuned to PBS when [the series] is telecast late in 1981."

Public television's demographics are good enough that CBS Cable used PBS's audience statistics to bolster its sales pitches when it began soliciting potential clients for its highbrow cultural service. They are also the reason why Mobil's Herbert Schmertz buys ads for Mobil's programs in most of the newspapers in which he places editorial ads aimed at Congress and the White House.

Says Robert Guthrie, former counsel of the House Commerce Committee, who now works for the AFL-CIO, "What the oil companies are doing is saying, 'Hey, movers and shakers, we're giving you this high-level intellectual programming.' I believe that they're looking way down the road, hedging against possible antitrust action in the future."

Rep. Henry Waxman (D-Cal.), who was deeply involved in writing this year's funding package for public broadcasting is less concerned than Guthrie. "If people tend to think well of major corporations for their underwriting, that doesn't offend me. What *is* disturbing—and I have never had an adequate answer to this—is whether a corporation, simply by making a contribution, has a subliminal impact on the kinds of programs public broadcasting will undertake."

Waxman's concern is similar to that of some of big oil's critics, who contend that while what the companies fund may be beautiful, it is also bland. "What you are getting is bread and circuses," says Ellen Stern Harris, head of the California Friends of Public Broadcasting. "Further," says Harris, "there is a certain self-censorship when you must maintain good relations with major corporate entities."

But Harris cannot offer any examples of corporate censorship to back up her charges. And her claim that there are virtually no controversial shows on PTV is contradicted by PBS broadcasts of such fare as "Death of a Princess," "On Company Business," "Paul Jacobs and the Nuclear Gang" and others.

There is another strand, as well, to the intricate relationship between big oil and PTV that could add to critics' claims of censorship by economic influence: The number of oil-company executives who sit on the boards of public-TV stations. Gulf vice president William Moffett is on the board of WQED, Pittsburgh. WQED produces the National Geographic specials for Gulf in Los Angeles. Joseph Downer of Atlantic Richfield is on KCET board in New York, a retired Exxon senior vice-president, George T. Piercy, is chairman of the WNET board.

Executives at public-television stations deny that the presence of big-oil executives on station boards leads to any indirect influence on programming. But one WNET staffer with access to the executive suite disagrees: "Sometimes the involvement is so bad it's an open flouting of public opinion."

Fred Friendly, who as head of the Ford Foundation gave more than $200 million to public broadcasting, puts it another way: "By deciding which shows they will underwrite, they have also decided what will not be on the air. By funding those programs—the Met, drama—that are harmless, so far as controversy goes, they are structuring the program schedule of public television. It means that people sitting in advertising agencies or corporate headquarters—people whose companies have bad public-relations problems—determine what will be on the air."

Corporate spokesmen disagree. Mobil's Schmertz says that programs go unsponsored because they fail the marketplace litmus test: they're no good.

One PTV producer currently looking for funding for a public-affairs series says that controversial shows fall into a kind of Catch-22: "To be successful you want to be part of the core schedule. That's where the viewers are. But if you're controversial, it's almost impossible to find a big corporation to underwrite you—and to commit money for outside promotion."

And making choices about what to underwrite is governed by different policies at each company. At Exxon, a source says, "You have to go through six layers of public-affairs executives before you get any final decisions." Mobil's Schmertz, on the other hand, is a virtual one-man shop, who even sits on the board of directors. But whether the choice is made by committee or decree, it must be a choice that does not offend the man at the top. Says Larry Botto, KCET's corporate bushbeater. "When the program gets on the air, the chairman has got to say, 'I'm glad we did that'."

That, say industry sources, is why there's so much blandness on public television. Corporation chairmen like the opera, and the ballet—and *Upstairs, Downstairs.* And keeping the oil companies happy is important to public broadcasting. In fiscal year 1980, 115 corporate underwriters gave just under $30 million for PTV programming. Of that number, four—Exxon, Mobil, Gulf and Arco—gave more than half. The other 111 gave the rest.

So when Arco's Lawrence Bershon says his corporation has commissioned studies about putting Arco's millions into areas other than public broadcasting, shock waves, emanate from KCET, a major recipient of Arco's beneficence, all through the PTV system.

Public broadcasting used to be the sole provider of high-quality cultural programming on television. But now the commercial networks, sensing that there is money to be made from cultural programming, want a piece of the action for themselves. So do cable and pay-cable companies.

Whether Exxon, Mobil, Gulf and Arco decide to stay with public broadcasting or take their money elsewhere, their decisions will have a significant effect on the shape and style of public broadcasting over the next decade. The big question now is: will they—or won't they?●

UKRAINIAN INDEPENDENCE

HON. DENNIS M. HERTEL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 21, 1981

● Mr. HERTEL. Mr. Speaker, in 1917, when the czarist authority was finally overthrown, the first opportunity came to the Ukrainian people to establish their own state and finally attain the freedom they had been dreaming of for so long. On January 22, 1918, the Ukrainian state was founded and survived for 5 years because of the ingenuity, courage, and determination of the Ukrainian people.

In 1921, the Bolshevik government under Lenin finally succeeded in overrunning the Ukraine and in imposing on the proud and brave people of the Ukraine the harsh totalitarian police-state rule that we have come to know since that first Bolshevik takeover.

Nevertheless, in spite of the hardships of this long and ruthless oppression, the spirit of freedom continued to flourish in the hearts of the people of the Ukraine.

In June 1941, soon after Nazi Germany invaded Russia, the Organization of Ukrainian Nationalists (O.U.N.) took advantage of the destabilization and turmoil caused by the impending war, to mount an attempt at reestablishing the long desired Ukrainian independence. On June 30, 1941, the O.U.N. headed by Stepan Bandea, organized a gathering of the citizens at which they proclaimed a reestablishment of the Ukrainian state. A democratic provisional Ukrainian Government was formed in Lviv with Yaroslav Stetzko elected as its Prime Minister.

Unfortunately, the return of freedom was shortlived. The Gestapo quickly arrested, tortured and deported prominent O.U.N. members. Ukrainians were imprisoned and murdered by the Gestapo as a part of their brutal response to the Ukrainian liberation attempt.

The 1941 restoration of Ukrainian independence, although constituting only a brief period in Ukrainian history, symbolizes the struggle and committment of the Ukrainian people toward regaining their far too long deserved right to freedom.●

BALANCING THE BUDGET ON THE BACKS OF THE ELDERLY: ELIMINATION OF THE MINIMUM BENEFIT

HON. JOHN CONYERS, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 21, 1981

● Mr. CONYERS. Mr. Speaker, the decision to eliminate the $122 monthly minimum social security benefit was made by the administration and rubberstamped by this body in the legislative fiasco which resulted in passage of the Gramm-Latta substitute of H.R. 3982, the Omnibus Reconciliation Act of 1981. As this measure is now being considered in conference committee, it is imperative that the House go on record today in support of the monthly minimum, which provides an economic margin of security for more than 3 million elderly Americans.

Elderly Americans constitute the fastest growing segment of the poverty population. During 1979, the latest year for which figures are available, the poverty rate for the aged rose from 14 percent to 15.1 percent. More senior citizens joined the ranks of the impoverished during 1979, than any single year since 1959 when the Census Bureau first compiled such statistics. Today, more than 75 percent of all senior citizens living along, live on incomes of less than $7,000.

It is to these people candidate Reagan vowed, "to defend the integrity of the social security system * * * and to make sure that benefits are adjusted to reflect the cost of living." The social safety net was to protect, "the full retirement benefits of more than 31 million social security recipients." The sweeping changes in social security proposed by President Reagan, however, would slash retirement benefits by nearly $9 billion in 1982 and $24 billion by 1987. Those retiring at age 62, two-thirds of whom cite poor health as their reason for early retirement, would be hardest hit, suffering a reduction from 80 percent to 55 percent of full benefits.

Other changes include the following:

Reduction of $4 billion in cost-of-living payments to 36 million current retirees by postponing their regular benefit increase.

The placing of new restrictions on applicants for disability benefits by requiring workers to show they are prevented from working for a period of 2 years as opposed to 1 year under current law, lengthening the waiting period for benefits from 5 to 6 months, and limiting eligibility to those in the work force for 30, as opposed to 20, of the previous 40 quarters.

The levying of social security taxes on an employee's first 6 months of sick pay.

The phasing out of the ceiling on how much can be earned by those 65 and over, permitting a retiree to make $10,000 in outside earnings in 1983; $15,000 in 1984; $20,000 in 1985, and unlimited earnings in 1986 and beyond. Implementation of this proposal would funnel two-thirds of added benefits to those with incomes over $17,000, and only 6 percent to those with incomes under $10,500.

These cuts cannot be justified as necessary to insuring the solvency of the three social security trust funds. As of June 30, 1980, there was $46.8 billion in the three funds combined: $23.565 billion for old age and survivors insurance, $7.68 billion for disability insurance, and $14.6 billion for hospital insurance. The implementation of certain bookkeeping changes to provide for interfund borrowing between the trusts alone would insure the system's solvency up to 1985.

In addition, 60 percent of the 1980 deficit in social security can be attributed to mismanagement of the trust funds. While the social security trusts earned an average of 8.3 percent interest in 1980 through investment in Government backed securities, private financial institutions investing exclusively in Government backed securities earned as much as 13.5 percent. Treasury Department managers of the funds are fully aware of the higher rate of return that could be gained by investment in issues of other agencies such as, GNMA, FNMA, and the Federal Home Loan Bank, but have invested the trust funds in low yield Treasury bonds because as employees of the Treasury Department, they are charged with holding down the interest on the public debt.

The irony is clear. The administration opposes the use of general revenues for social security financing because it would violate the integrity of the fund, sever the tie between benefits received and payments made, and destroy the contributory nature of the fund, making social security an annuity. The truth behind this politically motivated and misleading rhetoric is that social security funds are not managed in order to insure the long-term solvency of the system, but rather to subsidize general revenues by deliberately keeping low the interest the Government has to pay on them. What the 36 million current beneficiaries and 115 million workers who will contribute to the system this year need to be made aware of is the violation of their trust which is standard operating procedure at the Treasury Department.

The real issue in deciding whether to cut social security benefits is not the self-sufficiency, or integrity of the system. The question is whether it is sound policy to balance the budget on the backs of the elderly. The future does not appear promising for our aged. Health care costs are expected to skyrocket from $206 billion in fiscal year 1979 to $368 billion in fiscal year 1984. The average cost of health care for an elderly person is expected to rise from $2,259 to $3,868 during the same 5-year period. Lack of adequate housing remains a crucial problem. Those over 65 occupy 30 percent of the substandard housing in the Nation. While some 500,000 participate in the hot-lunch program on a daily basis, there are at least a million people on the waiting list. Included in the Gramm-Latta reconciliation bill are numerous cuts in medicare, medicaid, food stamps, low-income energy assistance and other social service programs serving older Americans. To enact into law the elimination of the minimum social security benefit and the reductions in funding for social service programs so essential to the elderly would be to send them the signal that they are indeed forgotten. While full funding for all these programs should be restored, social security, especially, should be inviolable.●

SOUTH CAROLINA COMPANY PLEDGES PRODUCTIVITY GAINS

HON. CARROLL A. CAMPBELL JR.

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 21, 1981

● Mr. CAMPBELL. Mr. Speaker, Members on both sides of the aisle can agree that stimulating our productivity rates is a key element in restoring America to her premier position in the world's economy. We are still the most productive nation on Earth, but our productivity growth rates have consistently lagged behind our major competitors and we seem to be falling farther behind each year.

That is why I was so impressed with the letter I received from my friend, Jim Strausbaugh, president of Tanco Adhesives, in Greenville, S.C. Jim, his employees, and his shareholders have determined to do something personally about turning our economy around by making improved productivity their major goal.

Tanco is interested in exchanging ideas with like-minded companies. I urge my colleagues to read the letter I received from Jim Strausbaugh, and to share it with companies in your districts.

TANCO ADHESIVES,
Greenville, S.C., February 18, 1981.

Congressman CARROLL A. CAMPBELL,
Cannon House Office Building,
Washington, D.C.

DEAR CARROLL: We, who collectively make up Tanner Chemical Company, i.e. employees, officers and shareholders, would like you to be aware that we are behind you and our new President in our national struggle to gain control of economic forces that have been, for all too long now, totally out of control. We particularly endorse and support President Reagan's economic policies.

Each of the fifty (50) of our employees recognize that we either have to give something up (salary, benefits, etc.) or become more productive, i.e. manufacture more with less people. I am proud to report that we have chosen the latter course and that our people are willing to be compared, in terms of job productivity, to any other company engaged in similar enterprise in these United States.

I would suggest to you, Carroll, that if you hear of any other companies that would like to see a company that has chosen productivity as a goal, have them contact us and we will arrange for a meeting. I would also invite you, your colleagues, and staff to visit us when in Greenville.

Please keep up the good work in Congress and continue to represent the interests of productive people.

Very truly yours,

J. N. STRAUSBAUGH,
President.●

JUSTIFICATION OF ASSISTANCE

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 21, 1981

● Mr. LAGOMARSINO. Mr. Speaker, I bring to my colleagues' attention an article by Mr. Walt Rosebrock of the Santa Maria, Calif., Times, regarding U.S. policy in El Salvador.

JUSTIFICATION OF ASSISTANCE

(By Walt Rosebrock)

The United States long standing commitment to preservation of human rights both at home and abroad has not been without perplexing problems. Probably the most Gordian in human rights problems recently is that of the U.S. providing military assistance to President Jose Duarte's Centrist Coalition, the current ruling political party of El Salvador.

Recently an amendment to the 1981 foreign aid bill concerning restrictions on military assistance and sales to El Salvador was the target of dissident Democrats who sought to cut off all military aid to that country and further order military advisors to immediately return home.

While the amendment failed and aid will be maintained, it must be noted that there are serious reservations by many concerning military aid both inside and outside the halls of Congress. These legitimate issues in our opinion center around the following:

There was the murder, and alleged rape, of Maryknoll nuns and missionaries by suspected members of the Salvadoran military, and, too, the murder of the chairman of the Institute of Agrarian Reform along with two U.S. advisors. These acts demonstrate an odious violation of human rights by the very government we support and ostensibly is supposed to protect and expand human rights policy in El Salvador.

Next, there is a genuine concern that in providing military assistance in Vietnam, now translated to state that as El Salvador goes so goes the uncommitted Central American neighbors, simply is not being bought by many in this matter.

However, in every issue there is its obverse which must most importantly be considered. In examining these, compelling reasons emerge that justify the foreign aid bill approved April 29 by the House Foreign Affairs Committee which continues U.S. military commitment but under restrictive considerations.

There is solid evidence that the Centrist Coalition—composed of reformist Christian Democractic Party, trade unions, including the 160,000 Salvadoran Peasant Union, the Catholic church and a preponderance of its number of bishops, and moderate business

and military groups—has made significant reforms in the advancement of human rights in El Salvador.

These advancements by the Centrist Coalition and reported by Dr. Constantine C. Menges, the Hudson Institute, in March 1981, include banking reforms which makes more credit available to small and medium farmers as well as positive agrarian land reforms. The reform Menges indicates is the breaking up of 320 large estates formerly owned by 200 families into producer cooperatives—ownership among 360,000 peasant farmers. A further 150,000 rental or sharecropped farms will go the same ownership route, and a 30-year repayment program to owners is under way.

As to the alternative parties in El Salvador, the extreme right has avowed that should it be successful in overthrowing the Centrist Coalition (three attempted coups have been tried since 1980) both banking and land reforms will be nullified.

Regarding the Marxist-Leninist extreme left, further terrorism will be inflicted on El Salvador and with the aid of other Communist nations. Representative Robert Lagomarsino has entered this evidence into the Congressional Record of June 4, 1981 when he said "There is no question but there has been and still continues to be Communist intervention in the form of military arms and equipment from the Soviet bloc, Cuba, Vietnam and Nicaragua. Radical Arab States and the Palestine Liberation Organization have also furnished funds, arms and training."

Finally in approving military aid for El Salvador, two important considerations should be kept in mind.

First, the Vietnam comparison because of the War Powers Act is not valid since presidents can no longer act unilaterally in these matters.

Second there are two important certifications that must be made by the president, one before military assistance can be started and the other in order for it to continue.

The president must first certify to the Speaker of the House of Representatives and to the Foreign Relations Committee of the Senate that the government of El Salvador has made verifiable good-faith efforts to both investigate and bring to justice those responsible for the murder of the six United States citizens.

Second, the same kind of certification must be made concerning key provisions thirty days after the enactment of the bill and every six months thereafter, and failing positive proof of these provisions, aid must be immediately suspended. These key provisions are to show a continuous pattern of advancement of human rights, El Salvador achieving substantial control over its own armed forces (some are splintered to the right and some to the left), continued progress in essential economic and political reforms, setting up free elections at an early date and to demostrate a willingness to deal equitably with opposition groups in settling internal conflicts.

In summary, there are 4.5 million people living in El Salvador, the largest portion of which historically have had minimal substance levels inflicted upon them—both from necessities of life such as food to those of the soul, meaning human dignity. There are those inside and outside the country whose aim is to keep the vast peasant population in perpetual bondage and enslavement by terror.

This is contrary to the U.S. recognition of the dignity of the individual and thus it would appear that our support of Duarte's Centrist Coalition—as does its neighbors Costa Rica and Venezuela and other European governments—under the current Foreign Aid Bill is warranted.●

REAFFIRMATION OF THE DECLARATION OF INDEPENDENCE

HON. BARRY M. GOLDWATER, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 21, 1981

● Mr. GOLDWATER. Mr. Speaker, on this July 4th past, the Daily News of the San Fernando Valley in southern California sponsored a unique promotion: It gave its readers the opportunity to "re-sign" the Declaration of Independence. Each of these modern-day signers reaffirmed the principles and convictions of freedom with their signatures, and I am happy to share the immortal words of the Declaration of Independence, and the names of the "new signers" with my colleagues:

IN CONGRESS, JULY 4, 1776, A DECLARATION BY THE REPRESENTATIVES OF THE UNITED STATES OF AMERICA, IN GENERAL CONGRESS ASSEMBLED

When in the Course of Human Events, it becomes necessary for one People to dissolve the Political Bands which have connected them with another, and to assume among the Powers of the Earth, the separate and equal Station to which the Laws of Nature and of Nature's God entitle them, a decent Respect to the Opinions of Mankind requires that they should declare the causes which impel them to the Separation.

We hold these Truths to be self-evident, that all Men are created equal, that they are endowed by their Creator with certain unalienable Rights, that among these are Life, Liberty, and the Pursuit of Happiness—That to secure these Rights, Governments are instituted among Men, deriving their just Powers from the Consent of the Governed, that whenever any Form of Government becomes destructive of these Ends, it is the Right of the People to alter or to abolish it, and to institute new Government, laying its Foundation on such Principles, and organizing its Powers in such Form, as to them shall seem most likely to effect their Safety and Happiness. Prudence, indeed, will dictate that Governments long established should not be changed for light and transient Causes; and accordingly all Experience hath shewn, that Mankind are more disposed to suffer, while Evils are sufferable, than to right themselves by abolishing the Forms to which they are accustomed. But when a long Train of Abuses and Usurpations, pursing invariably the same Object, evinces a Design to reduce them under absolute Despotism, it is their Right, it is their Duty, to throw off such Government, and to provide new Guards for their future Security. Such has been the patient Sufferance of these Colonies; and such is now the Necessity which constrains them to alter their former Systems of Government. The history of the present King of Great Britain is a history of repeated injuries and usurpations, all having in direct object the establishment of an absolute tyranny over these States. To prove this, let facts be submitted to a candid World.

He has refused his assent to laws, the most wholesome and necessary for the public good.

He has forbidden his Governors to pass laws of immediate and pressing importance, unless suspended in their operation till his assent should be obtained; and when so suspended, he has utterly neglected to attend to them.

He has refused to pass other laws for the accommodation of large districts of people, unless those people would relinquish the right of representation in the legislature, a right inestimable to them, and formidable to tyrants only.

He has called together legislative bodies at places unusual, uncomfortable, and distant from the depository of their public records, for the sole purpose of fatiguing them into compliance with his measures.

He has dissolved representative houses repeatedly, for opposing with manly firmness his invasions on the rights of the people.

He has refused for a long time, after such dissolutions, to cause others to be elected; whereby the legislative powers, incapable of annihilation, have returned to the people at large for their exercise; the state remaining in the mean time exposed to all the dangers of invasion from without, and convulsions within.

He has endeavoured to prevent the population of these States; for that purpose obstructing the laws for naturalization of foreigners; refusing to pass others to encourage their migrations hither, and raising the conditions of new appropriations of lands.

He has obstructed the administration of justice, by refusing his assent to laws for establishing judiciary powers.

He has made judges dependent on his will alone, for the tenure of their offices, and the amount and payment of their salaries.

He has erected a multitude of new offices, and sent hither swarms of officers to harrass our people, and eat out their substance.

He has kept among us, in times of peace, standing armies, without the consent of our legislatures.

He has affected to render the military independent of and superior to the civil power.

He has combined with others to subject us to a Jurisdiction foreign to our Constitution, and unacknowledged by our Laws; giving his Assent to their Acts of pretended Legislation:

For quartering large Bodies of Armed Troops among us:

For protecting them, by a mock Trial, from Punishment for any Murders which they should commit on the Inhabitants of these States:

For cutting off our Trade with all Parts of the World:

For imposing Taxes on us without our Consent:

For depriving us, in many Cases, of the Benefits of Trial by Jury:

For transporting us beyond Seas to be tried for pretended Offences:

For abolishing the free System of English Laws in a neighboring Province, establishing therein an arbitrary Government, and enlarging its Boundaries, so as to render it at once an Example and fit Instrument for introducing the same absolute Rule into these Colonies:

For taking away our Charters, abolishing our most valuable Laws, and altering fundamentally the Forms of our Governments:

For suspending our own Legislatures, and declaring themselves invested with Power to legislate for us in all Cases whatsoever.

He has abdicated Government here, by declaring us out of his Protection and waging War against us.

He has plundered our Seas, ravaged our Coasts, burnt our Towns, and destroyed the Lives of our People.

He is, at this Time, transporting large Armies of foreign Mercenaries to compleat the Works of Death, Desolation, and Tyranny, already begun with circumstances of Cruelty and Perfidy, scarcely paralled in the most barbarous Ages, and totally unworthy the Head of a civilized Nation.

He had constrained our fellow Citizens taken Captive of the high Seas to bear Arms against their Country, to become the Executioners of their Friends and Brethren, or to fall themselves by their Hands.

He has excited domestic Insurrections amongst us, and has endeavoured to bring on the Inhabitants of our Frontiers, the merciless Indian Savages, whose known Rule of Warfare, is an undistinguished Destruction, of all Ages, Sexes and Conditions.

In every state of these Oppressions we have Petitioned for Redress in the most humble Terms: Our repeated Petitions have been answered only by repeated Injury. A Prince, whose Character is thus marked by every act which may define a Tyrant, is unfit to be the Ruler of a free people.

Nor have we been wanting in attentions to our British brethren. We have warned them from time to time of attempts by their legislature to extend an unwarrantable jurisdiction over us. We have reminded them of the circumstances of our emigration and settlement here. We have appealed to their native justice and magnanimity, and we have conjured them by the ties of our common kindred to disavow these usurpations, which, would inevitably interrupt our connections and correspondence. They too have been deaf to the voice of justice and of consanguinity. We must, therefore, acquiesce in the necessity, which denounces our separations, and hold them, as we hold the rest of mankind, enemies in war, in peace, friends.

We, therefore, the Representatives of the United States of America, in General Congress, assembled, appealing to the Supreme Judge of the world for the rectitude of our intentions, do, in the name, and by authority of the good people of these colonies, solemnly publish and declare, that these United Colonies are, and of right ought to be, Free and Independent States; that they are absolved from all allegiance to the British Crown, and that all political connection between them and the State of Great-Britain, is and ought to be totally dissolved; and that as Free and Independent States, they have full power to levy war, conclude peace, contract alliances, establish commerce, and to do all other acts and things which Independent States may of right do. And for the support of this Declaration, with a firm reliance on the protection of divine providence, we mutually pledge to each other our lives, our fortunes, and our sacred honor.

Signed by Order and in behalf of the Congress,

JOHN HANCOCK,
President.

Attest: Charles Thomson, Secretary.

SIGNERS OF THE DECLARATION OF INDEPENDENCE

According to the Authenticated List Printed by Order of Congress of January 18, 1777, John Hancock.

New-Hampshire: Josiah Bartlett, Wm Whipple, Matthew Thornton.

Massachusetts-Bay: Saml Adams, John Adams, Robt Treat Paine, Elbridge Gerry.

Rhode-Island and Providence, &c.: Step. Hopkins, William Ellery.

Connecticut: Roger Sherman, Saml Huntington, Wm Williams, Oliver Wolcott.

New-York: Wm Floyd, Phil. Livingston, Fran^s^ Lewis, Lewis Morris.

New-Jersey: Richd Stockton, Jno. Witherspoon, Fra^s^ Hopkinson, John Hart, Abra. Clark.

Pennsylvania: Robt Morris, Benjamin Rush, Benja. Franklin, John Morton, Geo. Clymer, Ja^s^ Smith, Geo. Taylor, James Wilson, Geo. Ross.

Delaware: Caesar Rodney, Geo. Read, Tho M:Kean.[1]

Maryland: Samuel Chase, Wm Paca, Thos Stone, Charles Carroll, of Carrollton.

Virginia: George Whythe, Richard Henry Lee, Th^s^ Jefferson, Benj^a^ Harrison, Thos Nelson, jr., Francis Lightfoot Lee, Carter Braxton.

North-Carolina: Wm Hooper, Joseph Hewes, John Penn.

South-Carolina: Edward Rutledge, Thos. Heyward, jun^r^, Thomas Lynch, jun^r^, Arthur Middleton.

Georgia: Button Gwinnett, Lyman Hall, Geo. Walton.

CONGRESSIONAL STUDY CALLS TENN-TOM CANAL A WASTE

HON. JOEL PRITCHARD

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 21, 1981

● Mr. PRITCHARD. Mr. Speaker, the House will soon be asked to appropriate another $189 million to the Tennessee-Tombigbee Waterway Project. The project has already consumed $1 billion taxpayer dollars and, if allowed to continue, will require an additional $2 billion.

Several recently completed studies have questioned the wisdom of continued Federal funding for the Tenn-Tom. A GAO report released May 15, 1981, confirmed the ultimate $3 billion price tag and was unable to substantiate millions of dollars in benefits projected by the Army Corps of Engineers.

Last week, the Congressional Research Service completed a review of the prospects for achieving the coal transportation benefits projected for the waterway. Again, like GAO, they were unable to substantiate the coal movements predicted by the corps. The following article by Lance Gay of the Washington Star provides an excellent summary of the CRS review. I commend it to my colleagues.

CONGRESSIONAL STUDY CALLS TENN-TOM CANAL A WASTE

(By Lance Gay)

It is unlikely that there are enough markets for Appalachian coal to justify building the Tennessee-Tombigbee Waterway, and recent improvements in Eastern railroads will give them a competitive advantage over barge traffic, the Library of Congress' Congressional Research Service says in a new report.

In an eight-page report on the controversial waterway, the CRS says that demand for the sort of high-sulphur coal in Appalachia is declining as most European countries are purchasing low-surphur coal that does not require the use of scrubbers to clean the coal of sulphur before it is burned.

"Consequently, with the exception of a few specialized and limited markets for high-sulphur coal, Illinois Basin coal must reach the coast at a price low enough to at least compensate for flue-gas desulfurization," the CRS report says. "Any additional cost in mining or shipping, including barging in small tows, detracts from the marketability of basin coal."

Furthermore, the CRS study said coal industry reports show that no major expansion of coal mining is planned in the parts of Appalachia that the $2 billion canal project is supposed to serve.

Construction of the canal was justified on the grounds that it would expand coal trade between Illinois, southwestern Indiana, Kentucky and overseas markets.

The CRS said no planned expansion of coal mining is projected in Tennessee for several years and the largest expansion of mining is planned for Alabama, where it is planned to mine 23 million tons.

The report was compiled for Rep. Joel Pritchard, R-Wash., who is attempting to scuttle further funding for the canal project when the House water development appropriations bill comes to the floor this week. The appropriations bill envisions spending some $189 million on the project in the next fiscal year.

The canal project, which aimed at linking the Tennessee and Tombigbee River in a canal that would stretch to the Gulf of Mexico near Mobile, Ala., is about 55 percent complete. The General Accounting Office earlier this year estimated it would cost another $1 billion to complete and that the original plan for the project will have to be changed by Congress to remove a bottleneck in the proposed waterway between Demopolis and Mobile, Ala.

The project currently under construction is a barge canal between Pickwick, Tenn., and Demopolis. The barge runs parallel to the Mississippi River.

The CRS report says that the Mississippi River can handle more barges per tow than the Tennessee-Tombigbee Waterway would be able to handle because of the more gentle bends in the Mississippi than in the waterway. The requirements for less river navigation, the CRS said, would give the Mississippi River route a competitive advantage over the Tennessee-Tombigbee Waterway.

Furthermore, unlike the Tenn-Tom project, which would have 11 locks, the Mississippi requires none and would move traffic faster and more efficiently.

The waterway also would face competition from railroads, which have recently connected rail lines in Deane, Ky., and removed a major bottleneck. This connection, CRS said, saved an unnecessary 265 miles of rail "and opened new utility markets in Florida, Georgia, South Carolina and Alabama" for Appalachian coal that was supposed to be shipped down the waterway.●

RED CHINA'S EXPANDING DRUG INDUSTRY AND THE U.S. TOURIST EXPERIENCE THERE

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 21, 1981

● Mr. McDONALD. Mr. Speaker, in spite of the silence in high places, reports continue to arise concerning the growing and selling of opium by Red China. Drug Enforcement Administration officials are always reluctant to discuss the role of Red China, but the reports persist and as the old saying goes, "where there is smoke, there must be fire." This item appeared in American Cause of June 1981.

It is also encouraging to read an occasional press item giving a realistic view of the People's Republic of China and in this connection I would like to call my colleagues' attention to the item that appeared in the Washington Star on Sunday, July 19, 1981. Both items follow:

[From American Cause, June 1981]

RED CHINA'S EXPANDING DRUG INDUSTRY

Remember the story in the London Times about Chou En-lai telling Nasser about the use of narcotics? Chou claimed that his countrymen were given narcotics in an attempt to weaken the country and he planned, in retaliation, to promote drug use throughout the Free World in an attempt to subvert democracies.

Current reports from Taiwan indicate that the Chinese Communists are continuing with their plan. They have organized opium-poppy planting and have been so successful that they've achieved three crops of opium in two years. There are opium-poppy plantations of several thousand acres in Hsishan and Tienchih near Kunming, Yunnan province, which borders on Burma.

The production, refining, and distribution of the narcotics are handled directly by Red Chinese foreign trade agencies there. Generally, opium is first sent to Kunming and Nanning, where their trade agencies secretly ship it through the Golden Triangle on to Cuba, Albania, Beirut, and Amsterdam for sale in Europe and the United States.

After the Communists captured Indochina, they chose Cambodia to replace Vietnam as a new transfer center of opium from the mainland for sale abroad. They have also cooperated with the Burmese Communists in growing opium poppies and used Communist-controlled areas in Burma as a second opium center. A press report says that Burmese government troops captured 33 kilograms of heroin, 102 kilograms of opium, 18 pieces of arms, four steamboats and large quantities of heroin-related chemical materials in the Golden Triangle bordering Burma, Thailand and Laos in a mopping-up operation carried out this spring.

Our sources indicate that the Peking regime now operates more than 80 "state"-owned narcotics farms in 196 counties throughout the mainland, while 90 opium-processing plants were set up in several areas and are turning out 57 types of drugs.

To make all this run smoothly, the Peking regime has set up a "Narcotics Trade Promotion Department" in Kwangtung to spread sales overseas. The Paochiang Pharmaceutical Plant alone exported more than 300 kilograms of the drugs last year, sources said. It seems Red China markets opium the way Florida sells orange juice.

[From the Washington Star, July 19, 1981]

THE LURE OF A CHINA EXPERIENCE

(By Edwin M. Reingold)

PEKING.—An elderly, overweight American tourist waddled out of the elevator at the Qianmen Hotel the other morning and sighed irritably to a fellow passenger, "This is strenuous. We don't leave a hill unclimbed, do we?"

The lure of a China experience brought an army of 50,000 American tourists to this once off-limits land last year, and this year the number is expected to swell to 70,000.

Because China is remote and because it wants foreign exchange badly, it is expensive to tour China. Naturally, those who can afford the trip are often people in their 60s and 70s.

But it is, as the lady tourist said, strenuous. For many it is hazardous to health, and for at least 20 visitors in the past two years, it has meant death. In fact, three American tourists, all in their 70s, have died in China in the past four weeks.

One American who must deal with the deaths and often with illness, injury and just plain dissatisfaction, is the American Consul in Peking, Bruce Gray.

"Not all the hills need to be climbed by these older people," insists Gray. "Some

could be viewed from an air-conditioned bus. But people seem to want to do everything on this romantic China tour. They've paid for it. But many pay for it in ways they didn't intend."

Gray is the man who must seal the coffins, contact the relatives, recommend courses of action and sometimes explain to distraught tourists that medical facilities in China are by any standards primitive. The food can be greasy and loaded with monosodium glutimate and salt, the hotel facilities are at present second or third or 10th-rate at best, transportation is erratic. Sometimes the facilities tourists complain about are the finest available at this primitive stage in China's attempt to modernize.

And the costs are high, even exorbitant. But then, what else could you expect in a country where the family of an executed criminal must pay for the bullet used to kill him?

In their grief, families have learned that the average cost of returning a body to the U.S. is between $5,000 and $7,000. Embalming is rarely available, so families are cautioned to consult their local morticians before viewing the remains.

Says Gray, flashing a wan, grim smile: "I sometimes feel like a mortician myself."

Many people come to China even though they have medical conditions that would give them pause were it not for the magnetism of China, says Gray.

"The tour guides tell me the average age of their clients is well over 65. Not one of the people who have died here in the last two years was under 60, most were over 65 and a third were over 70," says Gray.

Gray and others concerned with the problem feel that travel agents ought to be more explicit in explaining conditions in China to prospective tourists.

"They should know that emergency medical care of the type accessible to most rural Americans is literally not available here," says Gray, recalling the story of a 72-year-old woman who slipped and broke her hip at the Great Wall of China at Badaling, a two-and-one-half-hour drive north of Peking.

"They brought her to Peking on the back of a flatbed truck. When she got to Capital Hospital (where foreigners are treated) the doctors refused to operate on her, afraid she would die. So we decided to med-evac her."

This required purchasing an army field stretcher, sawing off the handles, buying quilts at the friendship store to pad the canvas, and putting it aboard a Chinese airliner bound for Tokyo. Payment of four-class fares was required. Because of Chinese airline regulations, she had to be moved painfully on each takeoff and landing at two intermediate stops before arriving in Tokyo.

"Miraculously," says Gray, "she survived and wrote me about her experiences."

Another tourist who survived a heart attack last year was charged $4,800 for three days in what was called a "life support unit" which amounted to a cylinder of oxygen and a mask for breathing it.

The husband of a woman who died in far-off Chengdu in Sichuan province was told he'd have to charter an Antonov-24 airplane for $18,000 to get the body to Canton. Gray found there were four scheduled flights that could have done the job.

An American visiting the ancient Buddhist caves in remote Dunhuang had trouble with the kidney drain he wore and called Gray asking for the embassy helicopter. There is, of course, no such thing, and the only way to get to the nearest airstrip was the normal 22-hour train ride from Dunhuang to Lanchou.

"Why he went out there in his physical condition is a mystery to me," says Gray.

Mountain climbers who lost a teammate on Mount Gonga had to walk nine days to reach a road where they could flag down a truck. The body was abandoned long before they reached the road.

"But," says Gray, with the macabre humor embassy hands have developed to handle their depressing chores, "maybe it was worth it. After all, nobody's climbed the Chinese Himalayas for 40 years."

The ailments that should preclude a trip to China are precisely those that many of the aged tourists suffer. Says Gray: "emphysema, asthma, hypertension or any heart condition, all of these are conditions that we find in those who died."

One tour guide says that although the travel company requires a statement of health from each prospective traveler, the applications are so eager to come that they lie.

In some cases where a tourist finds himself in the hospital—or writhing on the couch in Gray's office as one woman did recently, with blood pressure of 240/150—Gray calls the family physician. "I wish I had a nickel for every time I've had a doctor tell me 'I begged him not to go.'"

"You have to 'black humor' this thing," says Grays. "Otherwise you couldn't handle it. These people come out here and do all these unhealthy things they wouldn't dream of doing at home. They breathe polluted air in the winter when the coal dust is thick, or in the spring when the dust storms are raging or in the summer when it is unbearably hot and they eat unwisely, drink too much, smoke too much.

"All of these people who die seem to die at night, on the next to last night of the tour, usually after the Peking duck farewell dinner. Peking duck, heavy on the grease, too much of everything, including the monosodium glutimate. I knew that's pseudoscience, but some say MSG is a heavy contributor to exacerbating hypertension.

"In any case, they eat the duck, get sick and die. That's why we've coined the phrase 'death by duck.'

"They always seem to want to seal the coffin at 3 a.m., and I have to go down this dank stairway lit with a bare bulb into what is called a morgue but is just a damp, fetid basement. It's like a bad horror movie."

And if the food won't get them, the pollution might. A delegation from the Environmental Protection Agency visited China last year, says Gray and took tests on a street corner in Peking. It showed the air contamination was six times the alert level of Washington, D.C. The measuring device literally broke down when they tried to use it in the industrial city of Wuhan. Warnings from family doctors, from scrupulous tour companies or from people like Bruce Gray do not seem to deter the folks in their hunger to get that long yearned-for look at China. Some are so enthralled by China that even death doesn't stop the tour.

The husband of one 71-year-old woman who died this year impatiently had her body cremated for $150 and carried the urn of ashes with him in his suitcase so he wouldn't miss the rest of the tour.

"The minimal comforts and facilities Americans can expect are simply not available in China," says Gray, who has served in Denmark, Taiwan and Hong Kong. "Things like hand railings, heating, air conditioning, drinking fountains, sanitary rest rooms, things we are accustomed to in most tourist spots in the world. One woman told me she was so cold last winter she opened her suitcase and put on all her clothing.

"One man called me to complain that he was being cheated and had been taken to a bad, overpriced restaurant. I had to tell him he was taken to one of the best Peking had to offer."

Airline schedules are erratic, flights are sometimes cancelled, trains are overbooked, hotels are switched. Gray admits that statistically almost all American tourists survive the experience and arrive home with interesting stories to tell, but many have hurt themselves physically in doing it. Tour companies set a blistering pace for the tour groups with almost no concession to the age of the clients.

An elderly chain-smoking woman from Boston complained of the pace: "We got there last night and barely had time to change clothes before they took us to see the Peking opera. Most of us fell asleep in the first 10 minutes."

Gray recommends that elderly people who have pre-existing medical conditions go to Taiwan or Hong Kong, where tourist facilities are better, less expensive, safer and medical help is accessible.

"If they really must see the Peoples Republic of China," he says, "they can take a day trip from Hong Kong to Canton."

In view of the existing problems, one can only shudder at the suggestion made last week by Vice Premier Chen Muhua that China should develop ethnic tourist facilities so that travelers can live in Thai-type bamboo houses in steamy, humid Hunnan province and in yurts (felt tents) when they visit the primitive Inner Mongolian Desert.

Tourism is on the rise, according to Chen, and by 1983 Peking is expected to be able to handle 430,000 visitors a year in 3,600 hotel rooms—5,600 rooms by 1985. New hotels will also go up in Xian, Hangzhou, Suzhou, Wuxi and other scenic areas which are sorely lacking in tourist facilities, but which take many thousands of tourists nevertheless.

The Chinese view of the importance of tourism was frankly revealed in a memorandum lately circulated within the China travel service which pointed out that tourism is the fastest way for China to get foreign exchange, and urged agents to keep this in mind when dealing with tourists. In the last three years China has earned $1.3 billion from tourists, including some 12 million overseas Chinese who have come "home" for a visit.

As American tourists contribute to that increase, Gray and his colleagues are knocking on wood because while this is the height of the "mortuary rush season"—more black humor—there hasn't been a death for several weeks.

As for China's development of tourist infrastructure and the hope that tourist facilities will reach world class standards soon, one Peking wag puts it succinctly: "China is the country of the future," he says. "It always has been, and it always will be."●

WORLD WAR I PENSION ACT

HON. JAMES WEAVER

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 21, 1981

● Mr. WEAVER. Mr. Speaker, I speak in support of H.R. 1918, the World War I Pension Act. I would like to congratulate my friend from California, Mr. Anderson, for his tireless efforts on behalf of the veterans of World War I in having sponsored this much needed bill for the past several years. I hope that his dedication and tenacity are finally rewarded this session by the passage of this bill.

Mr. Speaker, I feel a personal responsibility in supporting this legislation. As a veteran of World War II, I came home to new kinds of veterans benefits. My education was completed as a result of the GI bill. I was able to receive a veterans home loan. Countless others who came home from Europe and the Pacific at that same time also were able to receive the start in life they might not otherwise have had were it not for the GI bill.

The responsibility for the GI bill can be accredited to our predecessors in battle, the veterans of World War I. They were the ones who foresaw the need for improved benefits for veterans. They knew from experience the problems young veterans have after returning to civilian life. Without them, there would have been no GI bill.

The creation of the GI bill, however, caused a gap in benefits that has left the veteran of World War I "frozen out," so to speak, from the benefits which had been traditionally given the veterans of earlier wars and those they worked to create for the veterans of wars since. Admittedly, World War I veterans were technically eligible for the GI bill benefits when those were first created. With careers established, however, and families begun, it was impossible for nearly all of the World War I vets to take advantage of college educations or first home loans.

It is for this reason I feel a debt to the veterans of World War I. I see, however, another reason for a World War I veterans pension beyond that—one of importance to us all.

I firmly believe that the way a nation treats its veterans will be reflected in the quality of its servicemen and the ability of the Nation to recruit new soldiers. I think the example of the past decade supports this. Many of my colleagues have argued that our military has not been up to par, that it is impossible to adequately maintain our manpower without military conscription. I have argued that a draft has nothing to do with a strong military. The way we treat our soldiers and our veterans, on the other hand, has everything to do with it. When our soldiers returned from Vietnam they were shuffled aside and forgotten. They have been underemployed. Small wonder, then, that it is only now, once again, that the occupation of soldier is becoming one to be proud of.

The President has asked that we increase the size of our military by an additional 54,000 troops. I respectfully wish to ask how, when our oldest veterans are forced to live on the meagerest of incomes in their final years, we can ask today's youth to serve a country so unwilling to acknowledge the service of the past?

I am sure, however, that I hardly need to justify the entitlement of the veterans of World War I to a pension to the Members of the House. We all share the same respect and sense of obligation to these veterans. My major concern is the additional expenditure in a time when a reduction of the Federal budget is so urgently needed.

Since my election to the House in 1974, I have always worked to reduce Federal spending. There is obviously little room for any increase in our spending at this time.

I believe, however, that there are some things too important to be put off until we have a budget surplus. A World War I pension is one. Each year more World War I veterans die without having received the benefits they deserve. In my district in southwestern Oregon, there are less than 2,000 World War I vets still living. The amount of money which H.R. 1918 authorizes would not mean a dramatic change in their lifestyles. None of these veterans would suddenly be living in luxury, buying new cars, or spending winters in Florida. It would mean, however, a better diet or perhaps a warmer winter. In Oregon, that monthly pension would pay for two cords of firewood. Each year, we would be spending less on the entire program than the year before—one of the few Federal programs I can think of to which that statement applies.

Let me conclude by saying that I recognize that those who answered their country's call in 1917 did not go to war with the assurance that they were doing so for a pension. They went because they believed in their country and they believed in their duty. But when they went, they did so for a country that had always honored and cared for its veterans. From the Revolutionary to the Spanish-American War, pensions had been established. The veterans of World War I deserve no less. And for a yearly amount roughly equivalent to the cost overruns of one single Trident submarine, I think I am safe in believing that it is justified.●

BRING BACK PARKS AND YCC

HON. DON BONKER

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 21, 1981

● Mr. BONKER. Mr. Speaker, I would like to call to your attention a recent article from the Seattle Post-Intelligencer. This article offers an alternative solution to a problem currently facing the Department of the Interior—the dilapidation of our national parks.

As you know, Congress, at the request of President Reagan, voted to eliminate both the Youth Conservation Corp and the Young Adult Conservation Corp. The primary function of these two programs was to preserve our national parks and recreational facilities. Not only did these programs meet that goal, they also provided full time and summer employment for this country's youth; the segment of the population with the highest rate of unemployment—19 percent as of June 1981, Bureau of Labor Statistics.

I am pleased the Secretary of the Interior has acknowledged the poor condition our national parks are in. But his solution to the problem is to use funds already set aside for new parkland acquisition. I disagree with his solution. I believe the expansion of our national parks and the repair and improvement of our current park properties go hand in hand. Congress realized this when they mandated the Interior Department to carry out both of these responsibilities.

At present, we do not have enough national park land to accommodate all the citizens that want to use the park facilities. Last year alone, over 1 million people were turned away from national parks in California due to overcrowding. The Federal Government has a responsibility to our future generations to put a priority on the expansion, as well as upkeep of our national parks.

I believe the better solution to the problem is to reinstate the YCC and the YACC programs. These programs could continue to be responsible for improving the parks already in existence, leaving the money allocated for land acquisition for what it was originally intended for.

Because of the interest we all have in the future of our national parks, I wish to include the following article at this time.

[From the Seattle Post-Intelligencer, June 15, 1981]

BRING BACK PARKS AND YCC

Secretary of Interior James Watt, the man environmentalists love to hate, has been serving up a steady diet of doom over the deteriorating conditions in our national parks. He says their condition is "appalling," that there has been a failure of stew-

ardship and that the parks' inheritance is one of "shame."

Support for Watt's gloomy overview comes from a General Accounting Office study. That office estimates that safety deficiencies in the 334 units of the park system could be as high as $1.6 billion. Last week the Post-Intelligencer ran a five-part series detailing some of the problems: pollution, overcrowding and the meager budgets of past years. Congress, it seems, has been overeager to set aside lands, not as willing to appropriate money to take care of them.

The remedy, according to Watt, is to take money earmarked for land acquisition and use it to fix up the existing parks. Watt recommends abandoning some parks. He wants to hand over to private concessionaires some jobs done by the Park Service rangers.

It seems to us that there is one solution to park deterioration that Watt and the Reagan administration have not considered. That's the reinstitution of the Young Adult Conservation Corps (YACC) and the Youth Conservation Corps (YCC). These programs were the brainstorms of Washington's Sen. Henry Jackson and former Rep. Lloyd Meeds.

During last year's attack of austerity, Congress killed the YCC and all but leveled the YACC, leaving only $26 million to finish up some ongoing programs. A pity. The two conservation programs were little miracles: cost effective bureaucracies. In Washington and Oregon in 1979, $1.35 in manual labor was returned for each dollar invested in the program, aimed at getting teenaged youth off the streets.

Young people were put to work building trails, fixing guard rails and clearing away debris. They spent two hours a day on environmental education, six hours with shovels and wheelbarrows. They labored in parks, fish hatcheries and wildlife preserves, with the feds paying 80 percent, the states 20 percent. Those who took part came away with a dedication to nature and to the work ethic.

Secretary Watt would defuse some criticism of his office by using his influence to bring back the two programs. The young people could do the rebuilding and clean-up that he has in mind. Then the parks budget would stretch further, enabling Watt to use the acquisition money (mostly from the leasing of offshore oil lands) as it was intended: to buy more recreational land. Heck, Watt might end up winning so many points from environmentalists that they'd offer to name a park (or a parking lot) after him.●

SALUTE TO AMOS AND PAT KAUNE OF GULLIVER'S, N.J., DISTINGUISHED CITIZENS IN THE ARTISTRY OF JAZZ

HON. ROBERT A. ROE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 21, 1981

● Mr. ROE. Mr. Speaker, On Tuesday, July 22, a special anniversary of musical and cultural significance will take place in Gulliver's, West Paterson, N.J., when fans and artists will join together to honor two distinguished citizens, outstanding community leaders and good friends, Hon. Amos and Hon. Pat Kaune and commemorate the 11th anniversary of Gulliver's, Mr. and Mrs. Kaune's unique jazz club established over a decade ago to help, promote and enhance the American musical art form known as jazz.

Gulliver's has been the subject of news correspondents of New Jersey and New York over the years and with your permission I would like to insert at this point in our historic journal of Congress the following excerpts of some of these writings in tribute to the outstanding contributions that Mr. and Mrs. Laune have made to our cultural heritage through the artistry of American jazz:

Amos Kaune's devotion to jazz is paying off not for Mr. Kaune, who owns Gulliver's, a local jazz club, but also for the town of West Patterson.

All through the coming week, Gulliver's will be celebrating its 5th anniversary, and one of its means of celebration will be to turn over the proceeds of concert session on Thursday night to the Bicentennial program of West Paterson . . .

Another recipient of Gulliver's anniversary largesse will be the House That Jazz Built, a community center at 1312 Stebbins Avenue, the Bronx, which was opened last Saturday by its founder and director, Maxine Sullivan, the singer. The house, once owned by Miss Sullivan and her late husband, Cliff Jackson, the stride pianist, will be a center for jazz instruction, research and performance. . . .

JOHN S. WILSON

(*Special to The New York Times*).

Gulliver's is that rarity of rarities, a jazz club that is consistently popular. In a business (jazz clubs) where the chances of surviving more than a year or two in New Jersey are slim, Gulliver's is marking a milestone this week. Its tenth anniversary. That makes it the oldest continuously running jazz club in the state today. . . .

GEORGE KANZLER, JR.

I have always been an ardent admirer of jazz drummer Joe Morello.

So naturally when I picked up the paper and saw that the former Dave Brubeck percussionist was appearing at a spot called Gulliver's, I had to see him.

That was my introduction to Gulliver's . . . a small jazz haven located on McBride Avenue here. The club, owned and operated by Amos and Pat Kaune, features some of the top jazz artists in the country . . .

While the music is the main drawing card, Gulliver's itself is a fascinating place.

The building is over 100 years old, said Kaune, who bought the edifice in February 1970. . . .

WADE WALKER.

Mr. Speaker. In helping to preserve the endowments and traditions of the American way of life, the strength of our Nation's foundation and the sphere of America's heritage, the commemoration of the artistry of jazz has vast significance to all of our people. Mr. and Mrs. Kaune through Gulliver's has held many jazz festivals and presented some of the most skilled artists of jazz throughout our Nation. By their example, goodwill and many accomplishments in civic, community and charitable endeavors, they have personified a quality of leadership, dedication and sincerity of purpose which have made a major contribution to the cultural endeavors of our community, State and Nation.

In their continuing efforts to bring refreshment and re-creation to our people through preserving and enhancing the artistry of jazz music, we do indeed salute Hon. Amos and Hon. Pat Kaune upon the celebration of the 11th anniversary of Gulliver's.●

A TRIBUTE TO TOMÁS GLYNN

HON. ROBERT T. MATSUI

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 21, 1981

● Mr. MATSUI. Mr. Speaker, I rise today to pay tribute to an American civilian who did much to aid our Nation's efforts during the Second World War.

This man, Tomás Glynn, aided the U.S. Navy in defending allied ocean shipping in the Caribbean against Nazi submarines, which were sinking about two ships a day early in the war.

Due in part to Mr. Glynn's knowledge of the people and the coastal waters of Honduras, a system was devised to log vessels in out of Caribbean ports, thus making identification of friend or foe more certain for scarce allied patrol craft.

Tomás Glynn, still living in Trujillo, Honduras, deserves the recognition of the U.S. Congress for his service to our Nation during the war. I hope all of my colleagues will join me in extending to Mr. Glynn our heartfelt appreciation.●

IT'S TIME FOR A BAN ON COMMERCIAL WHALING

HON. DON BONKER

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 21, 1981

● Mr. BONKER. Mr. Speaker, yesterday marked the opening day of the 33d annual session of the International Whaling Commission. In Brighton, England, representatives of the IWC's 27 member nations are debating the future of these extraordinary—and endangered—mammals.

As you know, Mr. Speaker, the House last Wednesday gave its unanimous approval to a resolution calling for an indefinite moratorium upon the senseless and brutal slaughter of whales for commercial purposes. In approving House Resolution 142, the House reaffirmed our Nation's position as a leading proponent of a commercial ban, as well as other protective measures, and placed the will of the American people squarely behind the efforts of the U.S. delegation to the IWC in working for a moratorium.

President Reagan has also appealed for an end to the slaughter, in a letter

to the IWC, expressing his support for a commercial moratorium.

Recently, one of the outstanding newspapers of the west coast, the Seattle Times, added its editorial support to the efforts toward a commercial moratorium to protect the whales. The Times editorial provides a succinct and comprehensive analysis of the major issues which underlie the IWC meetings and the entire whaling controversy.

In particular, the editorial points out the moral and economic indefensibility of whaling when alternatives are readily available for all whaling products, and the rising impatience of antiwhaling activists, ecological groups, and the international public as a whole, at the unwillingness of the few remaining whaling nations to abandon their savage and senseless practices.

I commend this incisive overview of the international whaling conflict to the attention of my colleagues.

IT'S TIME FOR A BAN ON COMMERCIAL WHALING

Every summer in recent years, the call for a world-wide ban on commercial whaling has reached a crescendo just before the annual meeting of the International Whaling Commission. This summer is no different, as the commission will meet again in Brighton, England, next week.

What has changed, however, is the degree of broad, vocal and bipartisan support for an end to commercial whaling—a brutal, anachronistic industry whose time has passed.

In Congress, the House this week passed a strongly worded resolution calling for an indefinite commercial whaling moratorium. Authored by Washington's Representative Don Bonker, it had 67 co-sponsors and was endorsed by the White House, the State and Commerce Departments, and many environmental groups. It is expected to clear the Senate easily.

But the resolution is only advisory, aimed at strengthening the hand of the U.S. delegation and its allies at the meeting in England. Trying to persuade the I.W.C.—a group originally formed to promote commercial whaling—to reverse itself and ban the practice is a difficult task.

I.W.C. rules require a three-fourths majority vote for such an action. Of the group's 29 member nations, 10 still engage in some whaling. If that coalition holds, the ban will be blocked again, even though it no doubt will win a simple majority for the fifth consecutive year.

The number of whaling nations has dwindled in the past decade as most abandoned this unpopular, unecologic, and increasingly uneconomic enterprise. The only countries that still conduct commercial operations are Japan, the Soviet Union, South Korea and Iceland.

If the moratorium is defeated, the U.S. delegation will try to improve enforcement of quotas that have decreased the number of whales killed from more than 45,000 in 1973 to 14,000 last year.

If these efforts fail, there inevitably will be more attempts by groups like the crew of the trawler Sea Shepherd II, which set out from Los Angeles this week to confront a Russian whaling ship in the Bering Sea. This crew in the past has rammed or planted mines on whaling ships their tactics are so violent and radical that they are not condoned by other environmental groups such as Greenpeace, whose members have physically placed themselves between whales and whalers.

But if the I.W.C. will not place itself between whales and whalers by approving a moratorium, whaling nations must expect continued harassment, economic sanctions, and negative world opinion.●

COMPASSION

HON. JIM WRIGHT

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 21, 1981

● Mr. WRIGHT. Mr. Speaker, recently Vernon Jordan, president of the National Urban League, identified the one word which he says makes government relevant to the governed. Mr. Jordan, in his keynote address to the NUL's annual conference, identified that word as "compassion."

Mr. Jordan offered a comprehensive analysis of why he feels that current administration policies toward the "truly needy" are inadequate. I believe my colleagues may find Mr. Jordan's remarks of special interest in light of current budget and tax considerations.

The remarks follow:

KEYNOTE ADDRESS BY VERNON E. JORDAN, JR.

Last year's NUL Conference was the first in my decade in the Urban League that I did not attend personally. I saw the proceedings on video tape. I spoke to the Conference on audio tape. But all the while, I felt deeply deprived, for there can be no more vital experience than being among the people I love in this meeting of the Movement I love.

But last year's experience also renewed my appreciation of the strength of the Urban League. Few organizations could sail through a crisis such as we faced last spring and summer. Few could demonstrate the depth of skills and experience that we did.

Our Chairman, Coy Eklund, merits our deep appreciation for the way he helped our agency pull through, Coy, our dedicated trustees, and our 25,000 volunteers all provided encouragement and support far beyond the call of duty.

With their help, national and affiliate staff performed with the devotion to excellence and to results that typifies the Urban League. And John Jacob displayed a unique blend of grace under pressure, hard work, wisdom and leadership that won the admiration of everyone—in and out of our Movement. He deserves a special thanks from all of us for his superb job.

Thanks to your great efforts, the Urban League emerged from its crisis stronger than ever, So it is good to be here tonight, to salute you—not on tape, but in full, living color.

My first Urban League Conference address was in 1971. Then too, it dealt with a conservative Administration in Washington. But that Administration, while hostile to black people, was pragmatic. It had to be. There was still a strong national consensus that operated to preserve black gain. The Congress was a bulwark against attempts to dismantle important social programs. We had a two-party system then.

Today, there is another conservative Administration in Washingon. But this time, much has changed.

This Administration is wedded to an ideology of radical conservatism. This Administration has introduced a new political vocabulary—"Budget reconciliation," "truly needy," "supply side economics," and other phrases. But it has dropped from the political vocabulary the one word that makes government relevant to the governed, the one word that grants legitimacy to its laws—"compassion."

This is not mere semantics. The Administration's refusal to temper ideology with compassion makes it a clear and present danger to black people and to poor people.

Those are harsh words, but true ones. And they apply despite the obvious charm of the President. We must make a clear distinction between our political and ideological differences with President Reagan and our high personal regard for him. The President is a good man, a courageous man, and on a personal level, a compassionate man.

Not since Franklin Delano Roosevelt has America been led by so gifted a communicator. Not since Lyndon Johnson has it been led by so skillful a politican. And not since Herbert Hoover has it been led by a President willing to sacrifice millions of people on the altar of an outmoded ideology.

Yes, outmoded. The President claims to be bringing us new ideas and new policies. But they are actually a recycled version of ideas and policies that were buried in the Great Depression. And with good reason.

What are the new ideas the Administration is ramming down the throats of the nation? Get government off our backs. Give power and programs to the states. Federal programs have failed. Rely on the free enterprise system. Build more missiles.

Those are not ideas, they are slogans. Like most slogans, they contain a grain of truth. And like most slogans, they oversimplify and distort. They reinforce the meanest instincts of selfishness. They cut society loose from its moral bearings.

Black people don't need to be told that government is on our backs because we know it has been by our side, helping to counterbalance the vicious racism that deprived us of our lives, our liberty, and our rights.

Black people don't need to be told that power and programs should go to the states, because we know the few, feeble programs that have helped us were those mandated by Washington. It was the state and local governments that excluded us from everything from voting to paved streets. And it is they who will trample on our interests again if this Administration dumps the programs we need into block grants.

Black people don't need to be told federal programs have failed because we know many have succeeded. The Pentagon may not be able to land helicopters in Iran, but the Food Stamp program has fed the hungry; social security has wiped out poverty for most older citizens; CETA has put the jobless to work, compensatory education programs have improved reading scores of disadvantaged youth, and Legal Services has given poor people access to the justice system.

Black people don't need to be told to rely on the free enterprise system. We believe in the free enterprise system. We want to be part of it. We want our fair share of it.

And we know that will not happen without a federal government that pushes the private sector into affirmative action programs. It will not happen without a federal government that has setasides for minority

enterprises and job and training programs for the disadvantaged.

Black people don't need to be lectured about the need for economic growth. When others were talking of "an era of limits," "less is more," and "small is beautiful," we were saying "bake a bigger pie." We want economic growth. We know that in this America we will not get our fair share unless there is more for everyone. But we also know that we will not get our fair share just because there is more. America has managed to push us from the table of prosperity in good times as in bad.

So it is not enough just to have growth. What we want to know is "economic growth for whom?" "A rising tide lifts all boats" is no answer. A rising tide lifts only those boats in the water; our boats are in the drydock of America's economy. And we know we will be stranded on dry land, far from that rising tide, unless government steps in with the programs and protection that help launch into the mainstream.

That will not happen with an economic program that gives to the wealthy in the vague hopes that some of it will trickle down to the poor. What little trickles down is soaked up long before it reaches us.

Let us cut through the rhetoric of a supply-side economics that suppies misery to the poor: this Administration's economic program amounts to a massive transfer of resources from the poor to the rich.

It takes money, programs and opportunities from poor people and promises them in return an end to inflation and prosperity for all. It says to poor people: give up the little you have today and we promise you a lot more in the bye and bye. Well, black people aren't buying pie-in-the-sky economics.

Last year Candidate Reagan came to the Urban League's annual conference. He catalogued the many economic problems our nation faces. And he said: "let us make a compact among ourselves—a compact not to fight these problems on the backs of the poor."

But that is exactly what this jelly bean budget does!

Candidate Reagan said: "Think of how discouraging it must be for those who have always had less, to now be told that they must further reduce their standard of living."

But that is exactly what this jelly bean budget does!

Last month President Reagan said: "I do not intend to let America drift further toward economic segregation."

But that is exactly what this jelly bean budget does!

When we look at the budget, we say to the President, in the words of the Psalmist: "Thou hast showed thy people hard things: thou hast made us to drink the wine of astonishment."

A brief look at what happened to some of the major domestic programs will demonstrate that black people are the major victims of a budget that tears huge, gaping holes in our safety net:

Social security.—The minimum benefit—a measly $122 a month is eliminated. Who gets hurt? Poor black people who spent their working lives on their knees cleaning floors. Disability benefits are tightened. Who gets hurt? Workers who are injured or fall sick and can't work anymore—a disproportionate number of them black.

Food stamps.—A million people will lose their food stamps, millions more will have their benefits reduced. Who gets hurt? The working poor. Over a third of all food stamp recipients are black.

Public service jobs ended.—CETA training cut back. Who gets hurt? Over a third of all CETA workers are black.

Medicaid is capped.—Poor people will suffer reductions in access to health care. Who gets hurt? Over a third of Medicaid recipients are black.

Legal services.—The Administration wanted to kill it. But our compassionate Congress just cut its budget by two-thirds. Who gets hurt? People who can't afford a lawyer. Poor people. A third are black.

Welfare is cut and a forced work program authorized in the hope that unpleasant make-work jobs will drive people off the rolls.—Who gets hurt? Almost half the recipients are black children and black mothers. Who gets hurt most? Working mothers who get small welfare checks to supplement their low earnings.

Education aid cut heavily.—Who gets hurt? Disadvantaged children, over a third of them black.

Defenders of that budget will tell us black people are not being singled out. That's true. It's only poor people who are being victimized. And we are twelve percent of the population but a third of the poor—so we are the main victims.

We are told the nation can no longer afford to help the poor. But it can afford to throw one-and-a-half trillion dollars at the Pentagon over the next five years.

We are told social programs don't help poor people: they help the people in social service professions. Tell that to the families deprived of their food stamps, their welfare checks, their public service jobs.

We are told social programs breed dependency. Tell that to the working mothers who will have to quit their jobs or lose benefits. Tell it to young people in training programs who will lose their chance to learn and to earn their way out of poverty. Tell it to sick people whose public health clinics are shut down.

We are told that it's bad to look to government for special help—everyone should be treated the same. Tell that to the affluent who will get the huge tax cuts on top of their loopholes. Tell it to the corporations on welfare. Tell it to the special interests who still get their subsidies while poor people lose their life-lines.

Last month the Congress rushed this jelly bean budget through. With no real debate, the programs that help the poor were cut to ribbons. With no real debate, years of slow, patient progress were swept out to sea by the rising tide of radical conservatism.

Never have so few taken so much from so many in so little time!

Where was the outcry against that outrage? Where were the Democrats? Where were the liberals? Where were the Congressmen who once fought for the programs that give poor people opportunities?

With some honorable exceptions, they were engaged in a last-ditch fight to cut the President's three-year tax cut back to two years. They were in a last-ditch fight to save benefits for the middle class and farm interests. Roosevelt led a Party concerned with the "ill-housed, ill-clad, ill-nourished." Today his successors are concerned with the upper-middle class.

Democrats and Republicans alike need some arithmetic lessons. They need to learn that poll results still show significant public support for social programs that work.

They need to learn that when they cut social programs whose beneficiaries are one-third to one-half black, the remainder are white. Whites make up half to two-thirds of the victims of the cuts.

And if they don't care about blacks and poor whites, they must remember that this is just the beginning. Tax cuts combined with massive increases in defense spending mean more budget cuts down the road. And when the poor have no more programs left to cut, the cuts will start reaching into the middle class constituency the Democrats are now courting.

One last word for the Democrats who take the black vote for granted—an opposition that does not oppose is not worthy of governing.

But the silence extends well beyond a passive Congress. When aid to the arts is cut, there are full-page newspaper ads of protest. There are petitions, and loud protest. When an aggressive foreign policy is implemented, there is the same. But where are the voices raised in behalf of poor people? Where are the churches, the universities, the other sectors of our society that once marched with us and supported us?

And where is the enlightened business community? Will they keep their silence as the price for their tax cuts? Will they choose short-term profits over the long-term social stability that ultimately is the surest guarantee of the free enterprise system? Will they silently pocket billions in tax cuts without speaking out on behalf of poor working people who lose their food stamps?

The silence is frightening because the real issue extends beyond the specific budget cuts. The real issue is the grand design of substituting charity for entitlements, local tyranny for federal protection, and unbridled, law-of-the-jungle capitalism for a balanced cooperation between the public and private sectors.

Thus, the real issue is the nature of our society.

We of the National Urban League Movement believe there is no contradiction between equality and liberty; between economic growth and social justice, between a strong defense and healthy cities; between government assistance and individual opportunities. We believe that a moral society requires compassion for the poor, economic justice and racial equality.

We will play our part in the national dialogue about the future of the nation we love so much and for which we have sacrified so much. We will do our part by following the Biblical mandate to "open thy mouth, judge righteously, and plead the cause of the poor and needy."

But a dialogue means listening to opposing views as well. We will listen. Tomorrow the Vice President will speak to us. Other high Administration officials will also present their case. We welcome them.

We want to hear them address issues of concern to black people and to all Americans. We want to hear them explain their program. We want to hear them give us their vision of America and of black people's role in its future.

I hope they go beyond the usual justifications for their program. We agree with them that inflation must be curbed. We agree with them that blacks do better when the economy is better. We agree with them that America must produce more and create more jobs in the private sector.

But what I hope they will tell us is: what are black and poor people supposed to do in the meantime?

Even the wildest optimist knows it will take years for the President's program to produce the prosperity he promises. What do we do until then? How do poor people survive without the basic programs they need until then? How do they take advantage of future opportunities when present training and education programs are cut, when despair replaces hope?

A true dialogue goes beyond simple slogans and partial truths. It cuts to the core of the issues. So if this Administration is serious about engaging in a frank, open dialogue with us, will it tell this Urban League Annual Conference how the black poor are to survive in the interim?

Will it tell us how its program will bring equality to black people, when we have had far higher unemployment and far lower income than whites, even when times were good?

Will it tell us what we are to say to our poor black constituents when we go home to our 116 cities where misery lies thick on the ground and the weeds of despair flourish?

The black community today feels itself under siege. It is victimized by the budget cuts. It is harassed by attacks on affirmative action. It is alarmed that state legislatures will redistrict our representatives out of the Congress and out of local offices. It is outraged by the Administration's tilt toward racist South Africa. It is threatened by block grants.

And it is burdened by events beyond the political arena: By growing racial insensitivity and rising anti-black attitudes; by the murders of black children in Atlanta and violence against blacks elsewhere; by the continued deterioration of black neighborhoods; by the flow of drugs and the increase of crime; and by the rise of the fanatics of the far right like the Klan and the Nazis.

High on our long list of concerns is the future of the Voting Rights Act. It expires next year. Voting is, in President Reagan's words, "the most sacred right of free men and women." That sacred right will be lost to millions of black and Hispanic people unless the President comes out forcefully in favor of extending the Voting Rights Act.

The fight for voting rights symbolizes the erosion of black gains. We are now fighting the fight we fought sixteen years ago. And in some ways, we are dealing with basic issues like better race relations that were issues of the 1950s. We moved far beyond that stage, and now we are thrust back to square one.

But the path of progress has always been crooked and twisted. It has always been marked by two steps forward and one step backward. We cannot give way to despair; rather we must mobilize the black community to protect its rights and to prepare for the next push forward on the hard, rocky road to equality.

In many ways, today's challenges are more difficult. The national consensus for racial justice has withered.

The complexities of today's racial, economic and political issues are such that there is no one grand strategy or leader to deliver us. We will have to draw on our immense resources of survival skills to get us through these hard times. And we will have to cultivate our bonds of unity to once again overcome.

In many ways, it is back to basics for black people. That means a recommitment to the slow, agonizing work of building community strengths and community institutions.

The progress we have achieved has been due to the institutions rooted in our communities and responsive to our needs. Throughout history, it has been our churches, our press, our colleges, our community organizations that have fought on our behalf.

So now is the time for us to shore up those institutions, to strengthen them and support them. We of the Urban League Movement know we cannot be fully effective unless other community institutions are strong. In effect, the civil rights movement is as strong as its weakest link, and each of us must cooperate and work together, while performing the roles and functions best suited to us.

Back to basics also means a recommitment to group progress. We reject completely the notion that individual progress is meaningful while half of our black brothers and sisters are mired in ghetto poverty. We reject completely the notion that a black person who has worked and clawed his way into the middle class has no responsibility to the black poor. And we reject just as completely the vile notion that a black person who has gained a toehold in America's middle class has anything to apologize for.

We are sick and tired of hard working black people having to apologize for sharing the American Dream of a decent standard of living; of having to apologize for not being poor; of having to apologize for aspiring and achieving, of being put on a guilt trip for trying to make it.

We will not allow ourselves to be held hostage to other people's ideas about what our proper place is. We know that if you are black in America, you are in trouble; you are not safe, you are always in danger of losing the little you have. We know what it is to be poor; most of us are the first generation to be educated and to wear a white collar to work. All of us are bound by ties of family and racial unity to all black people.

Back to basics also means a recommitment to excellence. There is no margin granted to black Americans—we've got to be better than others in order to get what other Americans take for granted. That spirit of excellence and accomplishment must be characteristic of all our institutions. That spirit of excellence can be the spark that revitalizes our communities.

Back to basics also means political action. It's hard to break through the cynicism that grips people who have been subjected to brutalizing poverty and hopelessness. But the 1980s must be the decade of maximizing black political strength. We have the numbers to influence events, but in election after election we throw away half our power by not voting. So citizenship, education and political involvement in all parties must be a major priority in the 1980s.

Back to basics also means building coalitions. We've got to reach across class and ethnic lines to win victories for all people. America's tragedy is the racism that drives a wedge between whites and blacks who have so much to gain by working together.

Back to basics also means devising new strategies, alternatives for a nation that thinks old ideas that led to the Great Depression are new ideas for an uncertain future; alternatives like the Urban League's income maintenance plan.

Back to basics also means challenging America's institutions. It means challenging the Administration and the Congress to discover compassion, to make their conservatism humane. It means challenging the private sector to live up to its job creation and affirmative action obligations. It means challenging the churches to practice the morality they preach. It means challenging weak-kneed liberals and hard-hearted conservatives wherever they may be found. It means reminding America's institutions that black people are American too, that our blood, sweat and tears helped make this country what it is, and all we want is our fair share.

And back to basics means back to protesting our condition. Protest has been the basic response of black Americans, from the protest of the slave revolts to the protest of the March on Washington.

Now, when all about us is dark with despair, now is the time to raise high a fresh banner of protest. Now is the time to speak out loud and clear. Now is the time to tell the Administration that poor people can't live on a diet of jellybeans, to tell local officials they can't close our hospitals, to tell corporations they can't hire us last and fire us first, to tell the school boards they are failing their duty to our children, to tell all of America's institutions that they must root out the racism at the core of our national life.

It was a black preacher right here in Washington, D.C., Francis Grimke, who said many years ago:

"It is our duty to keep up the agitation of our rights, not only for our sakes, but for the sake of the nation at large. It would not only be against our own interest not to do so, but it would be unpatriotic for us quietly to acquiesce in the present condition of things, for it is a wrong condition of things. If justice sleeps in this land, let it not be because we have helped to lull it to sleep by our silence, our indifference; let it not be from lack of effort on our part to arouse it from its slumbers."

That is our duty, to our nation, to ourselves, to our children, and to our children's children. Let us then get back to the basic job of building new foundations for a new thrust for equality. Let us get back to the basic job of making America America again—this time for everyone.●

HOUSE OF REPRESENTATIVES—*Wednesday, July 22, 1981*

The House met at 10 a.m.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

Gracious Lord, from whom we receive every good gift, bless, we pray, all those who work in this assembly and who attempt through their labors to be of service to this Nation. Make everyone aware of their special responsibility and may all see in what they do the opportunity to fulfill Your commandment that by helping others we truly serve You. Make us sensitive to the needs of those about us and may we, in our daily tasks, become ministers of healing and understanding, of caring and good will. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

APPOINTMENT OF CONFEREES ON H.R. 3454, INTELLIGENCE AUTHORIZATION ACT FOR FISCAL YEAR 1982

Mr. BOLAND. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 3454) to authorize appropriations for fiscal year 1982 for the intelligence and intelligence-related activities of the U.S. Government, for the intelligence community staff, and for the Central Intelligence Agency retirement and disability system, to authorize supplemental appropriations for fiscal year 1981 for the intelligence and intelligence-related activities of the U.S. Government, and for other purposes, with the Senate amendments thereto, disagree to the amendments, and agree to the conference asked by the Senate.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts? The Chair hears none, and appoints the following conferees: Messrs. BOLAND, ZABLOCKI, MINETA, STUMP, ROBINSON, WHITEHURST, and YOUNG of Florida; for such matters within the jurisdiction of the Committee on Armed Services pursuant to clause 1(c) of rule X of the Rules of the House of Representatives: Messrs. PRICE, STRATTON, and DICKINSON; and for such matters within the jurisdiction of the Committee on the Judiciary pursuant to clause 1(m) of rule X of the Rules of the House of Representatives: Messrs. RODINO, EDWARDS of California, and MCCLORY.

PERMISSION FOR PERMANENT SELECT COMMITTEE ON INTELLIGENCE TO SIT TODAY DURING 5-MINUTE RULE

Mr. BOLAND. Mr. Speaker, I ask unanimous consent that the Permanent Select Committee on Intelligence be permitted to sit during the 5-minute rule today.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

PEACE IN THE MIDDLE EAST

(Mr. LANTOS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LANTOS. Mr. Speaker, at this moment in history, as violence flares again in the Middle East, I come to this rostrum to commend President Reagan and Secretary of State Alexander Haig and the Governments of Egypt and Israel for successfully concluding the final and history-making step in the peace process between Egypt and Israel by agreeing to a multinational force of observers who will permanently insure the tranquillity and stability of the negotiated peace between Egypt and Israel.

The Middle East Subcommittee of our Foreign Affairs Committee, in a 3-hour session yesterday afternoon, carefully scrutinized the President's request that Congress approve U.S. participation in this critical peacekeeping operation.

The President's emissary, in response to my questions, characterized the attitudes of both the Egyptians and the Israelis during these serious negotiations as harmonious, cooperative, and committed to the pursuit of peace.

I commend our own Government and the Governments of Egypt and Israel for their statesmanlike and responsible behavior and call on my colleagues on both sides of the aisle to grant President Reagan's request and to approve overwhelmingly and without delay the multinational peacekeeping force in the Sinai.

ENERGY INDEPENDENCE A NO. 1 NATIONAL PRIORITY

(Mr. ROSE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ROSE. Mr. Speaker, on June 26, 1980, by a vote of 317 yeas, 93 nays, this body overwhelmingly approved the Energy Security Act, otherwise known as the synthetic fuels bill. This Congress, in bipartisan fashion, expressed the very clear intent to the administration to move forward with the synthetic fuels program.

The President's Energy Secretary has attempted to do that. But at this very hour, Mr. Speaker, the President himself is presiding over a Cabinet-level meeting to determine whether or not roadblocks put in the way of this legislation will be removed or allowed to stay, roadblocks placed there by OMB Director David Stockman.

Mr. Speaker, the eyes of the country are on this project and energy independence is a No. 1 priority for this Nation today, just as it was when we overwhelmingly passed this bill.

STOCK PRICES PLUNGE ON INTEREST WAVE

(Mr. ALEXANDER asked and was given permission to address the House for 1 minute, to revise and extend his remarks, and to include extraneous material.)

Mr. ALEXANDER. Mr. Speaker, the business section of the Washington Post reported yesterday:

STOCK PRICES PLUNGE ON INTEREST WAVE

(By James L. Rowe Jr.)

NEW YORK, July 20.—Stock prices plummeted today as a new wave of interest rate worries swept Wall Street.

The Dow Jones Industrial Average of 30 stocks fell 18.36 points to 940.54. That was the biggest one-day decline for the most closely watched barometer of stock prices since Jan. 20, when it declined 20.31 points. Today's closing Dow Jones level was the lowest since Feb. 20, when it hit 936.09.

And the front page of the Washington Post yesterday reported:

REAGAN DEFENDS MONETARY POLICIES

(By Hobart Rowen)

OTTAWA, July 20.—European leaders who had bitterly protested high American interest rates backed away today from any pressure for a change following President Reagan's strong defense of the U.S. position at the opening of the two-day summit conference of seven leading industrialized nations here.

The Reagan administration can no longer blame high interest rates on inflation. Donald Regan, U.S. Secretary of the Treasury, has said that maintaining high interest rates is essential to fighting inflation.

□ This symbol represents the time of day during the House proceedings, e.g., □ 1407 is 2:07 p.m.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

Obviously, the maintenance of high interest rates is a deliberate Reagan administration policy.

The high interest rates of the Reagan administration have now become a part of the inflation problem. Maintaining high interest rates is wrong because it is breaking the back of the farmer, merchant, and manufacturer. No longer can President Reagan claim that he inherited the problem when the stock market is plunging in response to the administration's high-interest-rate policy.

□ 1010

UPDATE ON RECONCILIATION CONFERENCES

(Mr. PANETTA asked and was given permission to address the house for 1 minute and to revise and extend his remarks.)

Mr. PANETTA. Mr. Speaker, this is a continuing update on reconciliation on the conferences. Of the 58 subconferences that were established, 14 have been completed, 14 are substantially completed, so that 28 of the subconferences, or almost one-half of all the subconferences, are virtually completed as of this morning.

Seventeen of the subconferences have had their separate conferences or staff meetings with no agreement at this point and 13 have no action. Many of those are minor issues that will be resolved once the committees and the conferences are able to turn their attention to those smaller issues.

At this point, I think there has been very good progress as far as the overall reconciliation of subconferences are concerned. What we are looking for is to try to urge those that have not met to complete their conferences by this Friday.

Today, House Agriculture is meeting at 10 o'clock; the Education and Labor Committee is meeting on the employment issues at 1 o'clock; Energy and Commerce is meeting on health issues at 10 o'clock; Senate Banking is meeting at 2 o'clock; Energy and Commerce is meeting on energy matters at 4 o'clock; and Small Business is scheduled to meet later this week on their issues.

DAILY REPORT ON CONFERENCE ACTIVITY—JULY 21, 1981, 6 P.M.

SUBCONFERENCE COMPLETED

[Dollars in millions]

Committees: House/Senate	Date completed	1982 savings achieved

TAX RELIEF FOR WORKING AMERICA

(Mr. JEFFRIES asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. JEFFRIES. Mr. Speaker, I am growing weary of the old argument that the Reagan tax cut—a 25-percent reduction for 3 years—is designed to help the rich at the expense of the poor. The figures just do not back it up. Those now earning between $10,000 to $50,000 pay 72 percent of

the Nation's tax—and they will get 73 percent of the total tax reduction. That hardly sounds like some devious scheme to enrich the wealthy.

In reality, it is a sensible proposal to give tax relief to that vast majority of our people who get up in the morning—go to work—and then see a large part of their paycheck disappear for taxes.

To me, the most insensitive part of this issue is to force the poor, the needy, and the unemployed into accepting small handouts—with no hope of ever bettering their situation. Would it not be better to stimulate the economy so we might provide them a decent job—and a better way of life for their families?

I urge my colleagues to pass the Reagan tax reduction plan—25 percent for 3 years—for all taxpayers—and the sooner the better.

COMDR. RONALD W. DODGE COMES HOME

(Mr. MILLER of Ohio asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. MILLER of Ohio. Mr. Speaker, Navy Comdr. Ronald W. Dodge has returned from Vietnam.

Shot down in May 1967, Ron Dodge hit the ground alive. He was captured alive. He was paraded before newsmen alive and his photo in the grasp of North Vietnamese personnel has been reproduced millions of times. In each case, Ron Dodge was clearly alive.

Yesterday, we learned from the Pentagon that he came home to America in a small wooden box.

Ron Dodge was alive when he fell into North Vietamese hands. He did not come home with his colleagues in 1973. He, instead, is shipped home 14 years after his capture with no explanation. I can think of nothing more inhumane. The North Vietnamese owe us some answers. And we owe it to the family of Ron Dodge to keep asking questions about his fate until they are honestly answered.

BAILOUT PROVISION IN TAX BILL FOR NATION'S LARGEST INDUSTRIES

(Mr. MOORE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MOORE. Mr. Speaker, I have taken the floor many times in the last several weeks to acquaint the Members on the ill-advised provision in the Ways and Means Committee's tax bill essentially providing a bailout for some of the largest industries in the United States, many of whom do not need it.

Last night, the Ways and Means Committee finished its work on the tax bill. I offered an amendment to take out this ill-advised provision. It lost on a very close recorded vote. It is now necessary that I go to the Rules Committee and seek permission under the rule that will bring the tax bill to the floor next week to have made in order an amendment to allow me to offer my colleagues the chance to strike that provision from the bill.

The Members should be most interested in my request for this rule and the Members should hope that such a rule be granted.

The Members deserve the right to pass upon this particular provision. It is very unusual, it is probably the most controversial part of the bill, had no hearings, and amounts to a $3.3 billion bailout of some of the largest industries in this country, many of whom do not need it. It is done with no objective test whatsoever. We are accepting the subjective test of the author of this provision. This is most ill advised, very poor tax policy; it creates superindustries and is in fact special legislation and special benefits for special interests of the worst order.

I urge my colleagues to support me in seeking this rule.

SOCIAL SECURITY

(Mr. WALKER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WALKER. Mr. Speaker, I listened to the entire debate on social security on this floor yesterday. At one point it was inferred that the Democrats have a corner on compassion. Other than being the height of arrogance, such a statement is highly questionable if we examine the Democrats record with regard to social security.

Let us remember, first of all, the Gramm-Latta package about which they talk was an alternative to the Democratic leadership bill, and what did that leadership bill do? Why beginning next July, it cut benefits to all 36 million social security recipients. That is compassion? I think not.

And who can forget that it was their administration last year that proposed to tax social security benefits—a real act of compassion? I think not.

One of the proposals for social security reform that they are presently floating proposes to make the social security program—and get this—into one giant welfare program by injecting it with general revenues. That is not likely to be viewed as an act of compassion by those who have earned benefits under the system.

But certainly, their most uncompassionate act has been to drive the system to the brink of bankruptcy with the addition of countless unearned beneficiaries to draw down the fund. The fear of the present is a legacy of that irresponsibility of the past. The Democrats' efforts to exploit that fear, as they did yesterday, is hardly compassion as most of us understand the word.

THE PHONY WAYS AND MEANS COMMITTEE THIRD-YEAR TAX CUT

(Mr. GINGRICH asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GINGRICH. Mr. Speaker, the bill which was reported out of the Ways and Means Committee last night has in it a phony trigger for a phony third-year tax cut. The Members should understand that the way the trigger is written, there is an absolute guarantee in the bill that the American people will never see a third-year tax cut.

In fact, the bill is designed in such a way that the politicians who are willing to promise a tax cut can make their speeches through the next election, knowing in their hearts that it will never happen.

The bill is in fact a tax increase bill with phony propagandistic language built into it that sounds good but will not yield any increased take-home pay. It is a shame for this body to be presented with such a bill.

THE HANDICAPPED AND THE BUDGET

(Mr. SMITH of New Jersey asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SMITH of New Jersey. Mr. Speaker, helping others is a hallowed American tradition, enshrined in our national heritage from colonial times onward.

At a time when we are trying to practice fiscal austerity, it is important that we do not lose sight of that tradition. As representatives of a generous people, we should fulfill our moral obligation to help those in need—such as the handicapped.

In adopting the Gramm-Latta bipartisan budget, the House of Representatives authorized $15 million for the handicapped loan program, which is administered by the Small Business Administration. However, the Senate has only authorized $7 million for this very worthwhile program.

I believe that this has to be changed and the Senate budget adjusted upward to the House $15 million figure.

It is important to note that the rate of default on SBA loans to the handicapped is the lowest in the administration. While the default rate on other SBA loans runs anywhere between 5 and 12 percent, the handicapped in-

vestment loan program has stayed at a low 4-percent default rate.

This program also has a built-in benefit. Employment opportunities for the handicapped have a direct relationship to reductions in welfare and food stamps. The handicapped who benefit from the SBA loans are in turn contributing to the productivity of our country. It is more than a worthwhile program. It is a sound investment in our Nation's economy.

As a member of the House Committee on Small Business, I fought to keep the interest rate on handicapped loans from tripling by offering an amendment in committee. Fortunately, that amendment was adopted.

Mr. Speaker, I am urging in the strongest terms possible that the House and Senate conferees adopt the higher loan figure that has been adopted by the House. As a matter of conscience, we should do no less.

SYNTHETIC FUEL PRODUCTION

(Mr. VOLKMER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. VOLKMER. Mr. Speaker and Members of the House, today is a very momentous day in the history of this country, and we will find whether or not history shall repeat itself.

Twenty-eight years ago, at approximately this time of the year, another Republican administration, another Congress, made a decision that we should no longer participate and have demonstration projects for the synthetic fuel industry. Plants for coal gasification and coal liquefaction plants were closed down by that administration and by that Congress.

Today in the White House a decision is being made by the President whether we shall have a large coal gasification plant in North Dakota and oil from shale in Colorado and Utah. If that decision is against those loan guarantees, those programs will not go on.

Today this Congress, this House, will make a decision whether we continue on with SRC-I. If we do not, we will undoubtedly be putting the nail in the coffin on synthetic fuel production in this country once again and denying energy independence for this country for the future 10 to 20 years.

THIRD-YEAR TAX CUTS MUST BE LINKED TO ECONOMIC TRIGGERS

(Mr. LEVITAS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LEVITAS. Mr. Speaker, yesterday the Ways and Means Committee took the very correct step by writing in a third year on the individual tax reduction and linking that third year to economic triggers based upon the performance of the economy.

It makes absolutely perfect sense to provide additional tax relief for the American taxpayer, and to stimulate the economy as well. But to do that without linking it to the performance of the economy would result only in higher deficits, higher inflation, and higher interest rates. By using the economic triggers of the administration's own assumptions, we have provided the fiscally prudent safety net to avoid that consequence.

Now, I have heard that some people in the administration say that that really is not fair to link a third-year tax cut to the performance of the economy as gaged by their own economic assumptions. And I suggest to the Members that if the administration does not believe in its own economic assumptions, we had better know that right now, or else we are going to face extremely high inflation, ever higher interest rates, and huge deficits if the anticipated economic recovery has not occurred.

I believe we are going to achieve those economic goals with economic recovery, and I think the administration ought to put its money where its mouth is.

The third-year tax reduction with a trigger is as certain and predictable as the administration's economic assumptions are reliable. We have based the entire budget on those economic assumptions. Why not the tax cut, too? If the administration does not have confidence in their own economic assumptions, they are in trouble and we are in trouble.

PERMISSION FOR COMMITTEE ON ARMED SERVICES TO SIT TODAY DURING 5-MINUTE RULE

Mr. EMERY. Mr. Speaker, I ask unanimous consent that the Committee on Armed Services be permitted to sit today during the 5-minute rule.

The SPEAKER pro tempore (Mr. FRANK). Is there objection to the request of the gentleman from Maine?

There was no objection.

DEPARTMENT OF THE INTERIOR AND RELATED AGENCIES APPROPRIATIONS, 1982

Mr. YATES. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill, H.R. 4035, making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 1982, and for other purposes.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Illinois (Mr. YATES).

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. WALKER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 383, nays 3, answered "present" 1, not voting 46, as follows:

So the motion was agreed to.

The result of the vote was announced as above recorded.

IN THE COMMITTEE OF THE WHOLE

Accordingly, the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill, H.R. 4035, with Mr. DANIELSON in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. When the Committee of the Whole rose on Tuesday, July 21, 1981, title I had been considered as having been read and open to amendment at any point.

For what purpose does the gentleman from Pennsylvania (Mr. McDADE) rise?

Mr. McDADE. Mr. Chairman, I move to strike the last word, and I will make a unanimous-consent request.

I ask unanimous consent, Mr. Chairman, that an amendment which I will offer to the bill at page 37, line 8, if successful in changing the numbers thereto, will not preclude a further amendment to further change those numbers.

I would like to explain, if I may, Mr. Chairman, exactly what we are doing. My amendment that I will offer is a rescission of $69 million in budget authority affecting both those numbers. It is, I believe, a noncontroversial amendment, and I think we can save $69 million in budget authority by so doing.

Now, there are a great many Members in the Chamber who wish to have a full debate on the issue of funding SRC-I. If I offer my amendment, as I intend to do, and since it is noncontroversial and I hope we can succeed with it, it would preclude the vote up or down on the SRC-I amendment which I believe ought to be able to take place.

Therefore, Mr. Chairman, I ask unanimous consent that if my amendment succeeds and those numbers are changed, the numbers may be further changed notwithstanding any other rule that might permit a point of order at that point.

The CHAIRMAN. Is there objection to the request of the gentleman from Pennsylvania?

Mr. YATES. Mr. Chairman, reserving the right to object, and I shall not object, I believe that the gentleman's proposal will expedite the debate, and I think it is a constructive suggestion. Therefore, I will offer no objection.

Mr. Chairman, I withdraw my reservation of objection.

The CHAIRMAN. Is there objection to the request of the gentleman from Pennsylvania?

Mr. OTTINGER. Mr. Chairman, reserving the right to object, I would just like assurance from the Chair that the gentleman's unanimous-consent request will in fact achieve the result that he seeks, and that is to say that further amendments and amendments to those amendments would then be in order.

□ 1050

The CHAIRMAN. If the McDade amendment is adopted, another amendment would be in order, but only relating to those particular figures.

Mr. OTTINGER. And amendments to that amendment or substitutes for that amendment?

The CHAIRMAN. To that amendment, yes.

Mr. OTTINGER. I thank the Chair. I withdraw my reservation of objection.

The CHAIRMAN. Is there objection to the request of the gentleman from Pennsylvania (Mr. McDADE)?

There was no objection.

Mr. YATES. Mr. Chairman, I move to strike the last word.

I yield to the gentleman from California (Mr. PHILLIP BURTON).

Mr. PHILLIP BURTON. Mr. Chairman, I wish to call my colleagues' attention to the important contribution to the Interior appropriations bill made by Representative LES AUCOIN's provision barring use of 1982 money to lease oil and gas tracts in four controversial basins off the California coast. His leadership on this issue, as well as all other environmental issues, is especially appreciated because protection of these coastal areas is of such critical significance to the environment and the economy in our region that the leasing has met with bipartisan opposition. I believe the following editorial from the June 28, 1981, Los Angeles Times will be of particular interest to my colleagues because it demonstrates the importance of working together on such issues of mutual concern.

[From the Los Angeles Times, June 28, 1981]

AMBUSHING THE ROUGH RIDERS

The White House refused to get involved last week when a bipartisan group of congressmen ambushed the new rough riders of the Interior Department.

It was a wise move on the part of the White House, and a welcome development. The incident will be even more welcome if it turns out to be a signal to Interior Secretary James G. Watt to show a little restraint and discretion in what he calls his "crusade" to throw open the natural resources of the West.

The ambush was set because Watt had made it clear that he intended to lease four geologic basins for oil exploration—basins that lie seaward from some of the most elegant coastline in the world.

The basins stretch north for about 600 miles from Santa Barbara, past Big Sur, past Point Reyes and the Golden Gate, past the fog-shrouded trees that crowd against the sea in Mendocino County.

Nobody knows how much wealth lies under the ocean floor in that area. Geologists generally think there is very little oil there, and geologists more often err on the high side than on the low side these days.

But there is no question about the wealth of marine life in the areas that would be put at risk by blowouts or other accidental spills of oil—sea otters, seals, whales and fishing grounds.

For that reason, virtually every community and community leader along the coast objected to Watt's plan to offer the offshore tracts for lease. The protest was not, as

Watt insisted on characterizing it, a protest by environmental extremists.

Nor was the opposition to the leases a partisan effort. Republicans complained as loudly as Democrats.

But Watt persisted, arguing with some who complained and at one point taunting California congressmen when they tried to get him to explain why it was so important to lease those particular offshore tracts.

The White House did not intervene publicly, and there is no sign that it enjoyed sitting back while its interior secretary walked into the ambush last week. But it did not move to help him, either.

The ambush occurred in the House Appropriations Committee, where Rep. Les AuCoin (D-Ore.) offered an amendment to the Interior Department's budget bill that would explicitly forbid leasing the disputed tracts.

The White House did not object to the amendment, and it was approved after Rep. Clair W. Burgener (R-La Jolla) told the committee that all Republicans in the California delegation opposed the leases.

The amendment still must be approved by the full House and Senate. Even if that happens, it will not mean a permanent end to the threat of offshore oil exploration off the northern coast. But it will at least provide some time to take another look at the wisdom of risking damage to marine life and coastal grandeur when the risk would be taken with so little hope of gain. As Burgener said in committee last week, at best there might be a two-week supply of oil in the four basins.

There is another hopeful sign in the incident. Watt has often told the story of a meeting with President Reagan in which he described the aggressive way in which he planned to approach the development of natural resources. The President's response, he said, was "Sic 'em." It is just possible that the behavior of the White House in the appropriations vote contains a new order for Watt: "Down, boy."

Mr. YATES. Mr. Chairman, I yield to the gentleman from California (Mr. MILLER).

Mr. MILLER of California. Mr. Chairman, I rise in strong support of section 109 of H.R. 4035, which would prohibit any leasing, development, or related activities on four tracts of the Outer Continental Shelf off northern California.

There is strong bipartisan support from the California legislative and congressional delegation for withholding these areas from offshore oil and gas development. Only 3 years ago, the Congress noted the special characteristics on the northern California shore by creating the Nation's only exception from OCS leasing, the Point Reyes Sanctuary, as the result of an amendment to the 1978 OCS Act offered by my colleague, Mr. JOHN L. BURTON of California.

I share the view of my colleagues from California that the small reserves in these four basins, as estimated by the U.S. Geological Survey, do not merit endangering the environmentally irreplaceable northern coastal region.

The potential for environmental damage is just one of the grounds for concern. Equal, and perhaps greater, financial grounds exist for objecting to this and the other overly ambitious lease sales now scheduled by Secretary Watt. Mr. Watt apparently believes that faster OCS leasing means more revenue for the Treasury and more domestic oil and gas for Americans.

But he is wrong. If Secretary Watt goes ahead with his proposed 200 million acres per year, he will be responsible for the loss of billions of dollars to the taxpayer.

Secretary Watt is using the rhetoric of energy self-sufficiency to pursue the most costly, most irresponsible transfer of public energy resources to private oil companies since Teapot Dome. The American taxpayer, and this Congress, should be shocked that the supposed guardian of our Nation's resources is auctioning off our most valuable national assets.

In 1978, Congress enacted a new OCS law designed to remove the administrative and legal roadblocks which had delayed responsible offshore development. The Interior Secretary is responsible for enforcing that law, but it appears Secretary Watt prefers to dispose of the public's energy resources in his own way.

The law requires the Secretary to consult with coastal State and local officials about OCS leasing decisions, and to follow their advice on leasing decisions in most cases. But Secretary Watt has ignored the bipartisan appeals of State and Federal legislators in California.

The law requires the use of royalty and net profit share bidding systems instead of relying solely on the high-risk, capital-intensive bonus bid favored by the major oil companies. But Secretary Watt prefers the bonus system, and is being sued to use the alternatives mandated by Congress which could bring a much better return to the public.

The law requires diligent exploration by OCS lessees who, in the past, have sat on their tracts, waiting for their value to inflate. Secretary Watt apparently dislikes these due diligence safeguards, because there is no way to "diligently" explore 1 billion acres of the OCS in the next 10 years.

The reason for low production from OCS lands is not because insufficient lands have been leased. Less than 6 percent of the roughly 50 million acres of the OCS which have been leased are producing oil or gas.

Why should we believe that leasing another billion acres of deepwater, "frontier" lands, which are more dangerous and costly to develop than lands already under lease, will improve on that percentage?

In fact, many oil companies have publicly told Secretary Watt that his plan for expanding lease offerings is unsound.

"Drastic changes [in leasing schedules] can upset the capital, equipment, and manpower planning efforts of many firms," according to a spokesman for several major oil companies who supports the previous lease schedule, under which 2.6 million acres were offered in 1980. Mr. Watt wants to increase that nearly 100 times, to 200 million acres per year.

The president of Sohio Petroleum has warned that Watt's equation between increased leasing and increased production is doubtful. "Our resources would be used more efficiently if the previous schedule were left intact," said Michael J. Savage. The commitment of billions of dollars to lease acquisition deprives companies of the capital resources they need to develop some of the 96 percent of existing leases which are not producing, let alone an additional billion acres.

The Congress was warned in 1974 of the detrimental effects of financial depletion on companies' production efforts. Concern about excessive use of the front-end bonus moved the Congress to insist on the use of royalty and net profit share bidding in order to allow companies to use their financial resources for expeditious development, and to assure the public a better return on its resources.

From the standpoint of the American taxpayer, the Reagan administration has chosen the worst of both worlds: More leasing and more use of bonus bidding.

The combination of these unwise policies will result in a loss of many billions of dollars to the taxpayer, because the return to the public drops in relation to the number of tracts offered for lease.

We have had years of warnings that excessive leasing will undermine the return to the Treasury and reduce competition for offshore tracts.

A 1974 report of the House Banking Committee noted:

> The Department of the Interior has been unable to properly manage the current OCS leasing program, and will undoubtedly commit even greater disservices to the public interest under the accelerated leasing schedule. * * * A glut on the market of lease offerings will reduce competition because of a limited amount of capital available for bidding purposes. * * * Offering more tracts will decrease the average number of bids per tract. A positive correlation exists between the number of bids per tract and the level of the winning bid.

A 1975 report of the National Ocean Policy Study staff concluded that:

> Evidence from 1973 and 1974 lease sales shows that competition has declined as acreage offered has increased and suggests that the proposed accelerated leasing program may lead to a significant reduction the public receives for its resources.

The General Accounting Office made similar observations in 1975 and 1977:

Increases in shelf sales size and frequency in 1974 have caused workload problems resulting in an abbreviated valuation program and which have also lessened the Government's ability to insure a fair market return on lease offers.

GAO reported in 1975:

Because of large lease offers, competition is weakened.

In commenting on proposed lease sale 40 in 1977, GAO noted:

Much of area that is considered for lease is not even examined and tracts are included in sales *despite their apparent low promise of resources. We believe this policy encourages speculation in bidding, can result in tying up limited industry capital in lands with little or no mineral resources, and bring into question the public's right to receive a fair market value.* [Italics added.]

Mr. Chairman, the record clearly establishes that Secretary Watt's proposed leasing schedule, including the four northern California tracts, is economically unsound. Mr. Watt's proposal misleads people into believing that a rapid expansion of OCS leasing would result in a massive increase in the availability of domestic oil and gas. It will not.

The taxpayers of this country would be grievously injured by the Watt speedup leasing plan. The Treasury would lose billions of dollars from reduced bonus bids, and billions more because of low, 16⅔-percent royalties collected on bonus-bid leases.

Passage of section 109 will reiterate the intention of Congress that the OCS leasing program continue along the orderly, economically sound path mandated by the 1978 law. Passage of section 109 will be a clear rejection by the Congress of the irresponsible management of our offshore resources currently being pursued by Secretary Watt.

Mr. YATES. Mr. Chairman, I yield to the gentlewoman from California (Ms. FIEDLER).

Ms. FIEDLER. Mr. Chairman, I rise in support of H.R. 4035.

Mr. Chairman, I rise today to point out to the Members a most important portion of the Interior Department appropriations bill (H.R. 4035). Under the appropriations for land acquisition for the National Park Service is $10,395,000 for purchasing land for the Santa Monica Mountains National Recreation Area.

The committee is to be commended for setting aside funds for this area and still staying within the President's budget.

I have lived all my life in southern California. I grew up with a view of the Santa Monica Mountains. And, today, I live in their shadow. In the midst of the sprawling area that is Los Angeles, they are a breath of wilderness. The appropriation we make here today will be a beginning step toward preserving that wilderness.

The mountains are part of the rim of hills that forms the San Fernando Valley, which is my district.

I am happy, Mr. Chairman, to be able to play a part in this effort. I urge my fellow Members to join with me in voting to save the Santa Monica Mountains.

● Mr. GOLDWATER. Mr. Chairman, I rise in support of H.R. 4035, the fiscal year 1982 Department of the Interior and related agencies appropriation bill.

Almost 10 years ago, President Nixon said:

Among the most important legacies that we can pass on to future generations is an endowment of parklands and recreational areas that will enrich leisure opportunities and make the beauties of the Earth and sea accessible to all Americans.

Since that time, attendance at our Nation's parks has increased by over 100 million visitors.

Recently, a prominent news magazine called New Mexico's 3-percent population growth rate horrendous. Well, I have got news for you—the National Park Service projects a 5-percent annual increase in the number of park visitors over the next 10 years.

Last July Fourth, for example, 25 percent more Americans enjoyed the Nation's parks than at any other similar time in history.

Mr. Chairman, this seems to indicate to me that Americans want to protect our natural resources and urban open spaces. I have asked in testimony before the House and Senate authorizing and appropriations committees for Federal protection of the Santa Monica Mountains National Recreational Area. Besides the fact that the Santa Monica Mountains National Recreational Area is a breathtakingly beautiful area of unique cultural, biological, and archeological significance; besides the fact that studies have shown that urban open space contributes to the mental health and well-being of its users; besides the fact escalating land values may soon inhibit further land acquisitions; the Santa Monica Mountains NRA gives a person the personal enrichment that can only come from outdoor recreation.

The administration has a different view, believing that maintenance—not acquisition—should be our priority. I ask: Why can we not protect and maintain our land as we continue our acquisition program? Instead of denying needed Federal participation, the administration needs to come forth with a proposal on land acquisition.

There are no simple answers. We cannot refuse to acquire more parkland—neither can we conduct business as usual. Our economic climate is changing, and that demands striking a balance between diverse views. Quite frankly, that is what I have done. I have proposed a 12-point program of innovative, alternative land acquisition methods. I was pleased to learn of a recent Senate seminar on land acquisition which explored some of my alternatives. I am committed to saving the Santa Monica Mountains, and I will try to protect those mountains for the enjoyment of ourselves and future generations.

California offshore oil drilling is another concern of mine, and I believe it has been adequately addressed by this bill. I oppose drilling in the four northern basins of Outer Continental Shelf lease sale No. 53. It is my understanding that only a 12-day oil and gas reserve exists within the Point Arena, Bodega, Santa Cruz, and Eel River basins. In other words, in the short time that has passed since we approved the budget, we would have already exhausted those basins' oil and gas reserves. The fifth basin, known as the Santa Maria basin, has 80 percent of the potential oil and gas reserves. The lease for that basin is currently under litigation, and a judicial decision is expected by August.

Mr. Chairman, I urge passage of the Department of the Interior and related agencies appropriation bill, 1982.●

Mr. MARRIOTT. Mr. Chairman, I would like to express my concern for the termination of funding for the mining and mineral resource institutes program.

The mineral institutes program was established under title III of the Surface Mining Control and Reclamation Act of 1977 (Public Law 95-87) to provide seed money for matching general administrative program grants, research project grants and scholarships/fellowship grants to 31 designated institutes of higher education around the country. While originally authorized at levels ranging from $200,000 to $400,000 per institute through 1984, an average of only $110,000 per institute has been made since 1978. The primary objectives of the program are to increase the national manpower pool of trained specialists in mining and minerals technologies and mined land reclamation. The program also contributes to finding solutions to technological and environmental problems encountered in mining operations through research studies.

I feel strongly, however, that the mineral institutes are an important part of our country's future industrial and defense manpower preparedness system and need our continuing support. As reported by the Director, National Science Foundation, we are facing a serious shortage of over 2,000 faculty members in our engineering universities as the experienced professors and potential professors are being drained off into industry by the high salaries being offered for their special expertise.

The mineral institutes program needs to be beefed up to provide the research environment and the economic incentives to maintain a continuing flow of trained geological, chemical, mining, and metallurgical engineers.

The program should also be reexamined to insure that we are obtaining a maximum benefit for our Federal dollar. We should consider reducing the number of institutes and concentrate funding on building up a selective number of strong, well-funded programs under a regional concept. The Secretary of Interior should be asked to prepare a proposal for streamlining and strengthening the program and report back to Congress.

I would also like to recommend that the Secretary of Interior shift the mineral institutes program from the Office of Surface Mining to the Bureau of Mines which has a broader range of mineral, engineering, and metallurgical experience to administer the program.

● Mr. PANETTA. Mr. Chairman, I would like to take this opportunity to commend my colleagues on the Appropriations Committee for their excellent, bipartisan resolution of an issue which is of the greatest importance to California, Oregon, and the other coastal States. I am speaking, of course, about the provision in the Interior appropriations bill dealing with the Outer Continental Shelf (OCS) program which prohibits the Secretary of the Interior from expending any funds for the procurement, leasing, bidding, exploration, or development of the four northern basins of lease sale 53.

As my colleagues are aware, these basins stretching from Big Sur to the Oregon border, form one of the most magnificent coastlines in the entire world, and serve the United States as an esthetic and recreational resource. Secretary Watt has proposed that these basins be reconsidered for leasing; however there are very compelling reasons why this is not an appropriate course of action.

The resource estimates for the northern four basins would provide a mere 11 days of oil and gas at current rates of consumption. The Santa Maria basin, which is the fifth basin in lease sale 53, harbors 80 percent of the resources of the lease sale. The State of California and the California delegation did not object to leasing in the lower 81 tracts of the Santa Maria basin where the resource estimates were high and the environmental and economic risks were lower. Clearly, the objection is not to increased offshore production of energy, but to the criteria used to judge which areas are suitable for exploration. It makes good economic and energy sense to target resources where the resource estimates and the yield potentials are the highest. It is also important to remember that offshore drilling is one of the most energy intensive forms of energy production. This further underscores the need to target areas where a high degree of success is likely.

The northern four basins of lease sale 53 do not fit any of these criteria and for these reasons have been opposed by the majority of the California delegation, the State of California, every unit of State and local government in the affected areas as well as the chambers of commerce, and fishing and tourism industries.

The committee, in its report language, echoes the sentiments of the State of California, the local governments and the majority of the California delegation in its concern that proceeding with leasing of the northern four basins is inconsistent with the Secretary's self-proclaimed good neighbor policy. Just 2 days ago Secretary Watt again reiterated that.

> The President believes the State, local and county officials are many times in a better position to know and understand the needs of the people than are officials at the national level.
>
> The President believes that Washington has to work not as the final arbiter, but as a partner with State, local and county governments in helping solve the problems facing the people.

The slippage between the announced policy and the reality of the Secretary's actions was addressed by my distinguished friend from Oregon, LES AUCOIN, who offered this provision as an amendment in the Interior Appropriations Subcommittee and worked so diligently to see it retained in full committee.

I look forward to final passage of this bill because of the substantative arguments in favor of not leasing the northern four basins, but also because it is an important step toward asserting congressional prerogatives vis-a-vis the executive branch. The intent of Congress is very clear in the OCS Lands Act Amendments which require a balance between risks to the environment and projected gains from energy production. Congressional intent is equally explicit with respect to the provision requiring that the Department of the Interior's actions be consistent with California's federally approved coastal plan. Thus, the Appropriations Committee has acted wisely and prudently in insuring that this treasured coastline will not fall victim to an encroachment on congressional intent which can devastate the economy and environment of hundreds of coastal communities.●

Mr. YATES. Mr. Chairman, I take this time to advise the House that in the near future the subcommittee, of which I am chairman, will undertake hearings on the ways used by the various Interior agencies in fighting fires on the public lands within their jurisdiction. We shall do this because of the shocking deaths of two employees of the Fish and Wildlife Service recently in a fire that occurred at the Merritt Island Refuge in Florida.

Scott Maness was one of those who died. While I did not know him personally, I felt I knew him because his family are my constituents and close friends in Chicago. I know of Scott Maness through his educational background. He was a herpitologist. He loved the outdoors. He loved nature. He wanted to work with the Fish and Wildlife Service and I made an appointment for him with the Service. He wanted any position, he said. He was devoted to its work. The Service gave him a temporary position. His ability, his personality, his comprehensiveness won him a better position and an assignment to Merritt Island; 3 weeks ago, Scott Maness died. He died fighting a fire on Merritt Island. He was not trained to fight fires like the one in Merritt Island, but he joined his fellow employees to fight that fire. The wind changed. He and another employee could not escape the fire which had escalated to a real conflagration.

Why did the Service send an untrained employee into such jeopardy? How often does it happen? Is it a common practice?

We intend to find out. It is a tragedy—a tragedy that should not have happened—that Scott Maness lost his life. In tribute to Scott Maness and to the ideals to which he was devoted, we will try to make sure others who serve this country in protecting and fostering its natural resources and the live creatures who inhabit them will not be required to make the sacrifice Scott Maness made.

Mr. Chairman, I have taken this time to advise the House as to what the course of the debate seems to be at this time. As the committee sees it, there may be approximately 17 amendments offered, which will provoke various degrees of contest.

I think for the most part these may be acted upon by the House without undue debate. I think SRC-I seems to be the only amendment which will provide extended debate. The rest of them, I think, may be disposed of in relatively short order. I think as the debate progresses we may be able to finish this bill within the next 2 hours.

The CHAIRMAN. Are there further amendments to title I?

There are none. The Clerk will report title II.

Mr. YATES. Mr. Chairman, I ask unanimous consent that title II be considered as read and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The CHAIRMAN. Are there any points of order to title II? There are none.

Are there amendments to title II?

AMENDMENT OFFERED BY MR. YATES

Mr. YATES. Mr. Chairman, I offer an amendment. I have three amendments to offer which are in the nature of technical amendments. I ask the Clerk to read the one that is on page 31, line 19.

The portion of the bill to which the amendment relates is as follows:

TITLE II—RELATED AGENCIES

DEPARTMENT OF AGRICULTURE

FOREST SERVICE

FOREST RESEARCH

For necessary expenses of forest research as authorized by law, $109,722,000.

STATE AND PRIVATE FORESTRY

For necessary expenses of cooperating with, and providing technical and financial assistance to States, Territories, possessions, and others; and for forest insect and disease activities, $68,715,000, of which $63,260,000 shall remain available for obligation until September 30, 1983, to carry out activities authorized in Public Law 95-313: *Provided*, That a grant of $3,000,000 shall be made to the State of Minnesota for reforestation activities in the Boundary Waters Canoe Area.

The Clerk read as follows:

Amendment offered by Mr. YATES: On page 31, line 19 after Minnesota strike "for reforestation activities in the Boundary Waters Canoe Area" and insert "for the purposes authorized by section 6 of Public Law 95-495".

Mr. YATES. Mr. Chairman, this is a technical amendment to conform the purpose for which a $3 million grant has been made to the State of Minnesota. The bill, as reported, provided a grant for reforestation in the Boundary Waters Canoe Area. No timber cutting is permitted within that area, so there is no need for State reforestation activities.

The purpose of the grant provided in the bill is to permit the State to continue an aggressive reforestation program in 19 northern counties outside the Boundary Waters Canoe Area, with the expectation that in 50 to 60 years there be a viable timber industry to replace the industry that was lost by the establishment of the area.

This amendment insures the grant will be used for the purpose for which the appropriation was recommended by the committee.

Mr. OBERSTAR. Mr. Chairman, will the gentleman yield?

Mr. YATES. I yield to the distinguished gentleman from Minnesota.

Mr. OBERSTAR. Thank you. I want to thank both the chairman and the ranking member for their attention to the programs authorized by the Boundary Waters Canoe Area Wilderness Act. The law prohibited logging within the BWCAW, and greatly restricted motorized recreational use of the area. The 1978 law authorized programs to mitigate the impact of those restrictions, including funds for intensified forest management activities outside the Boundary Waters Canoe Area on Federal and State lands. The $3 million matching grant to the State of Minnesota which the chairman and the subcommittee agreed to restore in this appropriation is vitally important to the future of forestry in northern Minnesota and to the jobs and the whole economy in this area which has so large a Federal lands ownership.

I also want to thank the chairman for the technical amendment he has just offered to the bill.

Mr. YATES. Mr. Chairman, I thank the gentleman for his contribution. I should like to commend him for the leadership that he has exhibited in this whole boundary waters discussion.

Mr. McDADE. Mr. Chairman, will the gentleman yield?

Mr. YATES. I yield to the gentleman from Pennsylvania.

Mr. McDADE. Mr. Chairman, I support the position of the chairman.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois (Mr. YATES).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. YATES

Mr. YATES. Mr. Chairman, I offer an amendment on page 47, line 10.

The portion of the bill to which the amendment relates is as follows:

SALARIES AND EXPENSES, NATIONAL GALLERY OF ART

For the upkeep and operations of the National Gallery of Art, the protection and care of the works of art therein, and administrative expenses incident thereto, as authorized by the Act of March 24, 1937 (50 Stat. 51), as amended by the public resolution of April 13, 1939 (Public Resolution 9, Seventy-sixth Congress), including services as authorized by 5 U.S.C. 3109; payment in advance when authorized by the treasurer of the Gallery for membership in library, museum, and art associations or societies whose publications or services are available to members only, or to members at a price lower than to the general public; purchase, repair, and cleaning of uniforms for guards and elevator operators, and uniforms, or allowances therefor, for other employees as authorized by law (5 U.S.C. 5901-5902); purchase, or rental of devices and services for protecting buildings and contents thereof, and maintenance, alteration, improvement, and repair of buildings, approaches, and grounds; and not to exceed $70,000 for restoration and repair of works of art for the National Gallery of Art by contracts made, without advertising, with individuals, firms, or organizations at such rates or prices and under such terms and conditions as the Gallery may deem proper, $32,777,000, of which not to exceed $4,100,000 for the repair, renovation, and restoration program of the original West Building shall remain available until expended.

The Clerk read as follows:

Amendment offered by Mr. YATES: On page 47, line 10 strike "$32,777,000" and insert in lieu thereof "$31,777,000".

Mr. YATES. Mr. Chairman, this amendment would reduce the appropriation for the National Gallery of Art by $1 million. The committee has been informed by the Gallery that the cost of utilities has been lower than expected in fiscal year 1981 and that the corresponding costs for fiscal year 1981 and that the corresponding costs for fiscal year 1982 are now estimated to be $1 million less than previous estimates.

I want to commend the Director of the National Gallery for playing fair with the committee and keeping us advised of what his expenses are and telling us where his costs have been lowered and permitting the committee to make appropriate reductions where they are in order.

This amendment would make that adjustment and I urge its adoption.

Mr. McDADE. Mr. Chairman, I echo the comments of my distinguished chairman and urge adoption of the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois (Mr. YATES).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. YATES

Mr. YATES. Mr. Chairman, I offer an amendment on page 32, line 2.

The portion of the bill to which the amendment relates is as follows:

NATIONAL FOREST SYSTEM

For necessary expenses of the Forest Service, not otherwise provided for, for management, protection, improvement, and utilization of the National Forest System, and for liquidation of obligations incurred in the preceding fiscal year for forest fire protection and emergency rehabilitation, $769,093,000, of which $221,198,000 for reforestation, timber stand improvement, cooperative law enforcement, and maintenance of forest development roads and trails shall remain available for obligation until September 30, 1983.

The Clerk read as follows:

Amendment offered by Mr. YATES: On page 32, line 2 after which strike "$221,198,000" and insert "$226,267,000".

Mr. YATES. Mr. Chairman, this is a technical amendment to include the correct amount of funds as approved by the committee for certain activities of the Forest Service, including reforestation and timber stand improvement, cooperative law enforcement, and maintenance of forest roads and trails.

After action by the committee, the amount which should be provided for these activities to remain available until September 30, 1983, is $226,278,000.

This amendment merely insures the figure in the bill accurately reflects the level of funding recommended by the committee for these activities.

I urge adoption of the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois (Mr. YATES).

The amendment was agreed to.

The CHAIRMAN. Are there further amendments to title II?

Mr. RUDD. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise not to propose an amendment, but to ask the distinguished chairman of the subcommittee, the gentleman from Illinois (Mr. YATES) a question regarding construction of the Hopi Medical Center, which was part of the settlement reached in connection with the Navajo-Hopi Indian Relocation Act Amendments, Public Law 96-305.

I think the distinguished chairman is aware that the legislation required the Department of Health and Human Services to assign the highest priority to construction of the Hopi Medical Center.

I understand from the Department that the estimated $800,000 necessary to conduct the construction planning and design of this facility through an oversight was not included in the pending 1982 budget request for Indian health facilities, and thus is not included in the $46.739 million appropriation recommended for Indian health facilities on page 42 of the bill.

□ 1100

In lieu of offering an amendment to increase this amount by $800,000, I understand that it might be possible for the Department of Health and Human Services to reprogram $800,000 for preconstruction activities for the Hopi Medical Center. I would ask the distinguished gentleman from Illinois (Mr. YATES), chairman of the subcommittee, and the ranking minority member, the gentleman from Pennsylvania (Mr. MCDADE) whether they would look favorably on this reprograming alternative to allocate the necessary $800,000 for the Hopi Medical Center in fiscal year 1982, and whether they would be likely to look kindly on or approve such a request if it is submitted to the subcommittee at a future time by the Secretary of Health and Human Services?

Mr. YATES. Mr. Chairman, will the gentleman yield?

Mr. RUDD. I yield to the distinguished chairman (Mr. YATES).

Mr. YATES. The committee is very much aware of the gentleman's interest in this matter. Upon investigation, the committee found the gentleman's representations were correct. The medical center the gentleman refers to is a matter of urgent priority, and the fact that the committee did not take action on it in the bill is attributable to a failure to present it to the committee at an appropriate time.

In answer directly to the gentleman's question, I would say the committee would look favorably upon such a reprograming.

Mr. RUDD. I thank the distinguished chairman.

Mr. McDADE. Mr. Chairman, will the gentleman yield?

Mr. RUDD. I yield to the ranking minority member, the gentleman from Pennsylvania (Mr. MCDADE).

Mr. McDADE. Mr. Chairman, I want to commend my very distinguished colleague from Arizona (Mr. RUDD) for pursuing this very important issue. He has been a strong advocate of curing this problem, and I know only last evening in a conversation I had with the Secretary of Health and Human Services he was aware of the gentleman's concern.

The committee is aware of the gentleman's concern. He is to be commended for it and, of course, we hope the reprograming comes up and we can act upon it. I commend the gentleman for his interest.

Mr. RUDD. I thank the gentleman and yield back the balance of my time.

AMENDMENTS OFFERED BY MR. KILDEE

Mr. KILDEE. Mr. Chairman, I offer two amendments, and I ask unanimous consent that they be considered en bloc.

The CHAIRMAN. Is there objection to the request of the gentleman from Michigan?

There was no objection.

The portion of the bill to which the amendments relate is as follows:

ADMINISTRATIVE PROVISIONS, HEALTH SERVICES ADMINISTRATION

Appropriations in this Act to the Health Services Administration, available for salaries and expenses, shall be available for services as authorized by 5 U.S.C. 3109 but at rates not to exceed the per diem equivalent to the rate for GS-18, for uniforms or allowances therefor as authorized by law (5 U.S.C. 5901-5902), and for expenses of attendance at meetings which are concerned with the functions or activities for which the appropriation is made or which will contribute to improved conduct, supervision, or management of those functions or activities: *Provided,* That none of the funds appropriated under this Act to the Indian Health Service shall be available for the initial lease of permanent structures without advance provision therefor in appropriations acts: *Provided further,* That non-Indian patients may be extended health care at the Talihina Hospital in Talihina, Oklahoma, and the Zuni-Ramah Indian Health Service Unit in Zuni, New Mexico, subject to such reasonable charges as the Secretary of Health and Human Services shall prescribe: *Provided further,* That funds appropriated to the Indian Health Service in this Act, except those used for administrative and program direction purposes, shall not be subject to limitations directed at curtailing Federal travel and transportation.

The Clerk read as follows:

Amendments offered by Mr. KILDEE: On page 43, line 11, after the comma, insert the following: "if such care can be extended without impairing the ability of the Indian Health Service to fulfill its responsibility to provide health care to Indians served by such facilities"; and

On page 43, line 12, strike out "prescribe:" and insert in lieu thereof the following: "prescribe, the proceeds of which shall be deposited in the fund established by sections 401 and 402 of the Indian Health Care Improvement Act:".

Mr. KILDEE (during the reading). Mr. Chairman, I ask unanimous consent that the amendments be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. KILDEE. Mr. Chairman, my amendments serve two basic purposes. First, they would clarify existing language in the bill by specifying that providing services to non-Indians cannot impair the ability of the Indian Health Service to serve Indians. Second, they would insure that funds derived from fees charged to non-Indians benefit the Indian Health Service by requiring that they be deposited in the fund established by the Indian Health Care Improvement Act for medicare/medicaid reimbursement to IHS hospitals. Under existing law, such fees become part of the general fund.

In most cases, IHS health care is the only health care available to Indians. Because there is a limit to the amount of funds which are available to IHS, expanding their responsibility to serve non-Indians could dilute its ability to meet Indian needs.

Mr. Chairman, I have talked this over with the gentleman from Illinois (Mr. YATES) and the gentleman from Pennsylvania (Mr. MCDADE) and I believe they are prepared to accept the amendments.

Mr. YATES. Mr. Chairman, will the gentleman yield?

Mr. KILDEE. I yield to the chairman.

Mr. YATES. I have reviewed the gentleman's amendments. We have checked the matter very carefully and the gentleman's information is correct. We on this side are willing to accept the amendments.

Mr. McDADE. Mr. Chairman, will the gentleman yield?

Mr. KILDEE. I yield to the gentleman from Pennsylvania (Mr. MCDADE).

Mr. McDADE. Mr. Chairman, we have no objection on this side to the amendments as drafted by the gentleman. We are ready to accept them.

The CHAIRMAN. The question is on the amendments offered by the gentleman from Michigan (Mr. KILDEE).

The amendments were agreed to.

AMENDMENT OFFERED BY MR. M'DADE

Mr. McDADE. Mr. Chairman, I offer an amendment.

The portion of the bill to which the amendment relates is as follows:

ENERGY CONSERVATION

(INCLUDING TRANSFER OF FUNDS)

For necessary expenses in carrying out energy conservation activities, $272,890,000 and $99,608,000 to be derived from "Fossil Energy Construction", Department of Energy, to remain available until expended: *Provided,* That the indebtedness guaranteed

or committed to be guaranteed under section 10 of the Electric and Hybrid Vehicle Research, Development and Demonstration Act of 1976, as amended (15 U.S.C. 2509) shall not exceed the aggregate of $21,500,000.

The Clerk read as follows:

Amendment offered by Mr. McDADE: On page 37, line 8, strike "$272,890,000 and $99,608,000" and insert in lieu thereof "$203,890,000 and $168,608,000".

Mr. McDADE. Mr. Chairman, may I say to my colleagues that I believe this is a noncontroversial amendment that will enable us to cut budget authority by about $70 million. We have had a proposal for a project called SRC-II that was to be done in cooperation with the German and Japanese Governments come unglued.

As a result of that, the administration has requested a rescission of the money, and what I am proposing to do here is to transfer the money to other accounts. The savings will be $69 million in new budget authority and help us bring this budget closer in line with the President's budget request.

I urge its adoption.

Mr. YATES. Mr. Chairman, I move to strike the last word.

I agree with the suggested amendment offered by the gentleman from Pennsylvania (Mr. McDADE) and I urge its adoption as well.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania (Mr. McDADE).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. WEBER OF MINNESOTA

Mr. WEBER of Minnesota. Mr. Chairman, I offer an amendment.

The clerk read as follows:

Amendment offered by Mr. WEBER of Minnesota: Page 37, line 8, strike out "$203,890,000 and $168,608,000" and insert in lieu thereof "$68,890,000 and $303,608,000".

Mr. WEBER of Minnesota. Mr. Chairman, the purpose of the Weber-Wolpe amendment is to delete funding for the solvent refined coal project in Newman, Ky., SRC-I. The committee has recommended no new funding for the fossil energy construction program in fiscal year 1982. Instead, SRC-I is funded through a deferral of $135 million in the fiscal year 1981 supplemental appropriation bill.

My amendment achieves the termination of the SRC-I program by transferring $135 million from the fossil energy construction program and reducing new appropriations by a similar amount.

This somewhat complicated procedure, Mr. Chairman, is necessary because, as I mentioned, the project is funded entirely through deferrals and transfers, but the intent of the amendment should be clear to my colleagues and everyone listening. It will eliminate the funding for the SRC-I project and save the taxpayers $135 million in fiscal year 1982.

Let me make equally clear at the outset, Mr. Chairman, that this amendment has the strong support of the administration, the Office of Management and Budget, and the Department of Energy. The administration is, of course, interested in saving $135 million in this fiscal year, but even more important are the outyear costs over the remaining years for the completion of the project.

Let us look at the cost history of SRC-I to understand why the administration places such a high priority on the termination of this project. The original estimate of the cost of SRC-I was $685 million. In December 1979 that figure had risen to $2.289 billion.

By March of this year a GAO report indicated that the cost had risen to $3.1 billion. The latest contractor estimates in this year show the cost would be $4.574 billion.

In addition, another point to be made, since we have seen over a 100-percent increase in the cost of this project over the last 2 years, is that construction has not even begun on the project. Recent GAO reports have indicated clearly the cost overruns in energy projects really begin to multiply when construction begins, and we have not yet seen construction begin on this project.

With costs increasing at a rate of 100 percent every 2 years, construction not yet begun, who can say what the final cost of this project will be, $6 billion, $8 billion, $10 billion? That is a guess, but it is as good a guess as anyone else can make. That is one of the reasons why the administration is so concerned about eliminating this project now, because clearly the costs of this project alone justify its termination, and the failure to do so will seriously jeopardize the administration's long-term goal of achieving a balanced budget by the year 1984.

The administration is rightly concerned about these enormous costs. We have a letter from Budget Director David Stockman expressing their concern and outlining the opposition of the administration to the SRC-I project, and I would like to quote from Mr. Stockman's letter:

□ 1110

We believe that termination of the SRC-I project will yield major budget savings in future years without jeopardizing in any way the nation's energy security. Even at its current early stage of planning, the SRC-I project has been experiencing massive cost-overruns. When initially authorized by Congress in 1977, the SRC-I project had a total estimated cost of less than $500 million. The most recent official DOE estimates—now eighteen months old—show a total cost of $1.4 billion. Contractor estimates developed this spring show estimated construction costs of $2 billion and operating costs of another $2 billion. New DOE estimates under development indicate that even this large increase may significantly understate the actual cost of the project.

Therein lies the core of the administration's opposition to this very expensive and rapidly escalating in cost project.

But, Mr. Chairman, cost is only one reason to support this amendment. I also ask Members for their support in order to give the administration's synfuels policy a chance to work.

The Weber-Wolpe amendment should not be construed and should not be considered as an attack on synfuels development in this country.

In fact, an argument can be made and has been made by the Department of Energy and the administration that continuation of this project will be counterproductive to this administration's policy for the development of synfuels.

The administration has made it very clear that what they seek is greater competition and a freer energy market in the development of synfuels. It is the administration's belief that through that course of action we can see a more soundly developed synfuels industry.

The CHAIRMAN. The time of the gentleman from Minnesota (Mr. WEBER) has expired.

(By unanimous consent, Mr. WEBER of Minnesota was allowed to proceed for 3 additional minutes.)

Mr. WEBER of Minnesota. So let us look at the two cornerstones of a policy based on more competition and a freer market in energy.

First of all, the Federal Government's efforts in the energy field should be limited to research and development, not commercial-size projects. This clearly is not the case with SRC-I. In the case of two presently operating synfuels projects, the Exxon donor solvent project and the H coal project, the plants utilized 250 tons of coal and 600 tons of coal per day respectively. SRC-I takes a quantum leap from this scale project to utilize 6,000 tons of coal per day.

Mr. Chairman, no one suggests that a plant of this size is necessary merely to demonstrate the process. It is clearly a commercial-size project and not an R. & D. effort. The National Academy of Sciences had made a comment on this point, and I quote from them:

Demonstration of a process to obtain data for the design of a commercial plant can be carried out in a properly designed and operated unit utilizing 250 to 600 tons per day.

Furthermore, one of the subsidiaries of the contractor involved has in the past stated that this size is not necessary for the demonstration of this particular technology. According to a statement by ICRC's own subsidiary, Wheelabrator Cleanfuel, and I quote:

A 2,000-ton-per-day plant has been selected as the largest size for which commercially available equipment can be practically employed, yet is sufficiently large to permit extrapolation to full commercial size with reasonable confidence.

Mr. Chairman, that demonstrates clearly, in my judgment, that the size of this plant, utilizing 6,000 tons of coal per day, is far larger than is necessary to achieve the administration's goal in terms of energy policy of supporting R. & D. efforts rather than commercialization efforts.

Clearly this is a commercial project, not an R. & D. project, and thus directly undermines the administration's policy toward synfuels development.

Again I would like to quote from Mr. Stockman's letter, in emphasizing that this is contradictory to the administration's policy toward the development of synfuels:

The administration believes that synthetic fuels development must proceed on a basis that will lead to commercial deployment of private production facilities. The only way to insure attainment of this goal is to limit the government's role to protecting against the unique political risks associated with construction of synfuels plants by demonstrating an unwavering commitment to market pricing of energy, by directing Federal regulatory agencies to develop comprehensive reforms that will lead to simplified and less costly permitting, and by making available carefully directed financial incentives through the Synthetic Fuels Corporation, the administration believes that we have provided a climate in which an economically sound synthetic fuels industry will grow and flourish. The SRC-I project, which has virtually no private capital involvement and which is managed by the Federal bureaucracy is inconsistent with the administration's synthetic fuels policy. Continuation of this project will saddle the taxpayer with an enormous financial burden, yet will yield little returns to anyone other than the project's sponsors.

Mr. Chairman, I believe that this amendment is consistent with the mood of this Congress in terms of fiscal restraint and consistent with the administration's economic and energy policies and I ask support for our amendment.

Mr. McDADE. Mr. Chairman, will the gentleman yield?

Mr. WEBER of Minnesota. I yield to my colleague, the gentleman from Pennsylvania.

Mr. McDADE. I thank my colleague for yielding and commend him on his statement even though I have obvious differences of opinion with the gentleman.

The gentleman stated that this is not an R. & D. project. Is that correct?

Mr. WEBER of Minnesota. That is the statement of the Office of Management and Budget and the Department of Energy, and I share that statement that it is too large to be an R. & D. project.

Mr. McDADE. How much money is in the bill for SRC-I, in this bill that we are going to vote on?

Mr. WEBER of Minnesota. The sum of $135 million is available for funding of the project.

Mr. McDADE. That is $135 million, which is hardly the construction of any plant; is that not correct?

Mr. WEBER of Minnesota. But as the gentleman is aware, I am sure, construction has not begun on the plant yet, and the total cost is estimated today, preconstruction, at about $4.5 billion, which is more than adequate for——

Mr. McDADE. If the gentleman will yield, that is the problem. The gentleman is confusing apples and oranges. What this committee is attempting to do is to lead the country to the edge of research technology so that we can make a decision, an informed decision, about whether or not this plant ought to go forward with construction. That is the reason that the money that is in this bill is design money, money to look at environmental problems, money to look at economic problems, money that will enable us as a Congress in a future year to make an informed judgment about whether or not we ought to take this technology to commercialization in an outyear. That decision has not been made. I am sure the gentleman will agree with that, will he not?

Mr. WEBER of Minnesota. I appreciate the gentleman's point of view, but as I would point out, it may well be a question of timing. But this administration has decided that the jury is in on that question and it is time now to terminate this project.

The gentleman just offered a successful amendment to rescind $69 million for the SRC-II project, which was terminated for precisely the same reason, and the same arguments which led me to support that amendment argue in favor of termination of the SRC-I project at this time, before we incur the multibillion-dollar cost to continue the project.

Mr. McDADE. If the gentleman will continue to yield, I want to reiterate to my colleagues that there is $135 million in design money, environmental study money, baseline study money. There is no construction start yet.

The CHAIRMAN. The time of the gentleman from Minnesota (Mr. WEBER) has again expired.

(On request of Mr. McDADE and by unanimous consent, Mr. WEBER of Minnesota was allowed to proceed for 1 additional minute.)

Mr. McDADE. There may be in an outyear construction money for a commercial demonstration of this project.

Now, the gentleman could not be more incorrect when he talks about SRC-II. What happened there was, what was to be a cooperative agreement between the Governments of Japan, Germany, and the United States fell apart because there was no support in the administration to go forward with SRC-II.

This is the last chance the Congress of the United States will have—and I may say to the gentleman that we are here as a subcommittee of the Appropriations Committee without dissent, recommending to the House that we take another step, that we look at this project from its environmental, engineering, and economic aspects, and be ready to make an informed judgment on the last chance we will have to decide whether or not we construct a direct liquefaction process for this country. This is it. If we adopt the gentleman's amendment, we will not see a direct liquefaction plant built in the United States.

I think that is against the national interest. That is why I oppose the gentlemen's amendment.

□ 1120

Mr. WEBER of Minnesota. I appreciate the gentleman's concern, but I would also point out his initial argument is that we need to proceed with the design costs and R. & D. costs so that we can at some later date make an informed decision on whether or not to proceed with this project. As the gentleman has pointed out, in the case of SRC-II the Governments of France, Germany, and the United States have already made that decision.

Mr. McDADE. If the gentleman will yield, France was not involved. The Germans and Japanese were. The technology may now shift to Germany and Japan and in a few years we may see the United States going over to Germany or Japan and once again trying to license a new technology. We have seen it happen time and time again over the last decade, and may I say to my friend that is what we are risking here.

If we abandon this technology, if we abandon this effort you can bet the Germans and Japanese are going to pick it up.

The CHAIRMAN. The time of the gentleman from Minnesota (Mr. WEBER) has expired.

(At the request of Mr. CORCORAN and by unanimous consent, Mr. WEBER of Minnesota was allowed to proceed for 2 additional minutes.)

Mr. WEBER of Minnesota. I must reply to that again that the administration's policy is not to abandon the development of coal liquefaction. There are presently 66 projects which are in some state of application or design which have the potential to carry forward this technology through the Synfuels Corporation.

Mr. McDADE. I must correct the gentleman. There is no, and I repeat—and the gentleman can go back and check the record and call anybody downtown he likes—there is not one single direct liquefaction project pending before anyone at the Synfuels Corporation, before anyone at the Department of Energy, except for the one that we are going to vote on today. That is the only direct liquefaction

process that is in any form in any existence before anybody in this Government.

Mr. WEBER of Minnesota. The gentleman would concede, I am sure, that there are 66 other synthetic fuels processes—maybe not precisely the same process—but other processes are in varying states of application for approval.

Mr. McDADE. I say to my friend that there are applications pending before a corporation which as yet does not exist, called the Synthetic Fuels Corporation. There is one chairman appointed. There are four vacancies. If the gentleman read this morning's paper he will see that there is a discussion going on today, "Settlement of synfuels fund indicated." It talks about the question of whether or not the Office of Management and Budget is going to prevail thereto and stop all funding of shale oil, of indirect liquefaction process, which is what the gentleman was referring to, of alcohol projects and some other types of projects, that may at some date get to the Synfuels Corporation if it ever gets operating. It is not operating today. It cannot operate. It does not even have a quorum.

At no point, may I say to the gentleman, this is very important for him to realize.

The CHAIRMAN. The time of the gentleman from Minnesota (Mr. WEBER) has again expired.

(By unanimous consent, Mr. WEBER of Minnesota was allowed to proceed for 3 additional minutes.)

Mr. McDADE. Mr. Chairman, if my colleague will yield further, it is important for the gentleman to realize and all of the House that there is no direct liquefaction process pending anywhere. This is the only one. It is important to know that for a variety of reasons. It is not just a minor modification of technology.

Indirect liquefaction was discovered in 1913, after 100 years of European scientific effort. The man who discovered the process won the Nobel Peace Prize that year. Ironically that process was used by Hitler to run his engine of war, taking coal and converting it through indirect liquefaction processes to run his war machine.

There are now some indirect liquefaction processes in being around the world. For example, in South Africa. Indirect liquefaction, is totally, totally different than what we are trying to do here. This is a totally different technology, may I say to my colleague, that would attempt to upgrade what was done in 1913 by a European scientist, that what was done during World War II, by the Germans, what is being done today in South Africa, under the Sasol process. All those are indirect liquefaction techniques. None of them, none of them, is duplicative in any way of this one. This is the only direct liquefaction process that is before anybody in the Federal Government for action. This is it.

When we vote on this today, we are deciding whether this country goes forward with this technology or whether we abandon it.

Mr. WEBER of Minnesota. The gentleman's comment notwithstanding, I am sure that he is aware that what we have come down to is a fundamental difference of philosophy on how the country's synthetic fuels program should proceed.

This administration is committed to a greater interplay of market forces and competition to make the types of decisions that the gentleman is referring to here, rather than having those decisions made at total cost to the taxpayer by politicians. So I concede the gentleman's point about this particular process. But I would say it only reinforces the belief of this administration that completion of this project at taxpayer expense undermines this administration's whole approach to synthetic fuels development before they even have a chance, as the gentleman pointed out, to get the board together.

Mr. McDADE. May I say in reply to the gentleman that he concedes and the House can now accept as a fact that what we are talking about in this amendment is a direct liquefaction technology. It is the only one that exists in the Government. We can agree on that?

Mr. WEBER of Minnesota. It is the only synfuels project that exists within the Government directly funded by the Government at all.

Mr. McDADE. The gentleman is totally wrong about that. The gentleman just conceded this was the only direct liquefaction project in existence.

The CHAIRMAN. The time of the gentleman from Minnesota (Mr. WEBER) has again expired.

(At the request of Mr. CORCORAN and by unanimous consent, Mr. WEBER of Minnesota was allowed to proceed for 3 additional minutes.)

Mr. CORCORAN. Mr. Chairman, will the gentleman yield?

Mr. WEBER of Minnesota. I yield to the gentleman from Illinois.

Mr. CORCORAN. I thank the gentleman for yielding.

I want to commend the gentleman from Minnesota for the amendment that he has offered, and I would like to ask him a question. I know that he has gone to great lengths to underscore the fact that the Office of Management and Budget has come down four square in support of his amendment, and I would just like to know the position of the Department of Energy, which has some responsibility in this particular matter, inasmuch as the committee is trying to foist, in my judgment, over their objections, this additional subsidy to a major corporation in this country. I just wonder whether or not the Department of Energy has taken a position on this amendment?

Mr. WEBER of Minnesota. I thank the gentleman for his support, and the answer is yes, we have contacted the Department of Energy and they do not want the money. I have a letter from the acting Under Secretary, Mr. Romatowski, which underscores the Department of Energy's opposition to SRC-I, and their support for our amendment, furthermore clarifying how the termination costs and other matters can be handled successfully by DOE, and again underscoring that this is consistent with this administration's approach to the development of synfuels.

Mr. CORCORAN. As the sponsor of this amendment, what the gentleman is telling the House is that the administration supports his amendment. The administration does not want to continue down that road subsidizing corporations to develop synthetic fuel projects, that we have a different approach, that we have the Synthetic Fuel Corporation, which has the responsibility for managing the growth and the Government support therein of developing this industry?

Mr. WEBER of Minnesota. The gentleman is correct in outlining my position, the administration's position, and the general philosophy of this administration toward the development of synfuels.

Mr. CORCORAN. If the gentleman will yield further, will the gentleman explain to me the position of the senior Republican on this committee?

Mr. WEBER of Minnesota. Without trying to put words in my colleague's mouth, the question comes down, as I tried to indicate, to a philosophical one of whether or not we want to accept this administration's philosophical approach to synthetic fuels which is greater competition, greater interplay of market forces forcing projects to compete for funding from the Synfuels Corporation, or whether this body is going to make the decision to fund the only remaining synfuels project in the DOE fossil fuels construction budget directly and almost entirely at taxpayer expense.

Mr. CORCORAN. As a Member of the House who supported the Gramm-Latta substitute, I would like to know whether or not this particular inclusion of $135 million is within the budget or outside the budget?

Mr. WEBER of Minnesota. The $135 million that funds this project in this year is funded through deferrals and transfers, and so it is not directly in contradiction. In the outyears the administration has great concern about the effect that it would have on the budget.

Mr. CORCORAN. I thank the gentleman.

Mr. McDADE. Mr. Chairman, will the gentleman yield?

Mr. WEBER of Minnesota. I yield to the gentleman from Pennsylvania.

Mr. McDADE. I appreciate the accuracy of the gentleman's last statement in clearing up the fact that there is no conflict with the Gramm-Latta——

Mr. WEBER of Minnesota. In this year.

Mr. McDADE. That is what we are talking about, and that is what we are acting on.

I do want to say that there is no philosophical disagreement between myself and the administration on the viability and the value of the Synthetic Fuels Corporation. As a matter of fact, it was this subcommittee——

The CHAIRMAN. The time of the gentleman from Minnesota (Mr. WEBER) has again expired.

(At the request of Mr. McDADE and by unanimous consent, Mr. WEBER of Minnesota was allowed to proceed for 4 additional minutes.)

Mr. McDADE. If the gentleman will yield further, I want to imform my colleague that it was this subcommittee that broke the logjam in the last Congress and set up the reserve that permits money to be drawn down for synthetic fuels under the Defense Production Act and under the Non-Nuclear Regulatory Act.

It was this committee that acted for the House of Representatives to set up the Synthetic Fuels Corporation. The Synthetic Fuels Corporation is designed for one purpose, and as the gentleman knows, it is to bring to commercialization projects which have been through R. & D., projects which are ready, such as oil shale, which we hope will be a viable process if OMB, according to the morning paper, agrees to let some of the money go. That is the purpose of this Synthetic Fuels Corporation.

I am sure that gentleman knows that there is a restriction on funding within this Synthetic Fuels Corporation, through its basic legislation, that the legislation provides that there cannot be more than 60/40 cost sharing.

Does the gentleman agree to that?

Mr. WEBER of Minnesota. I accept the gentleman's statement.

Mr. McDADE. All right. The basic organic law provides that there cannot be more than a 60/40 mix. What that means is that if you go back to something that is basic R. & D., which is what this plant is, nobody has ever built one, nobody has ever demonstrated one, nobody has ever attempted yet to——

Mr. CORCORAN. Mr. Chairman, will the gentleman yield?

Mr. WEBER of Minnesota. I yield to the gentleman from Illinois.

□ 1130

Mr. CORCORAN. I appreciate the gentleman yielding.

Mr. Chairman, there has been a testing of this technology. I am sure the gentleman from Pennsylvania (Mr. McDADE) is familiar with the Alabama project. What has been the record of that particular project? It has tested satisfactorily this technology.

The question the gentleman from Minnesota (Mr. WEBER) has raised is whether or not we ought to go to a commercial scale. The answer to that is not as a subsidy from the general revenues when we already have an expanding deficit in this country but, rather, we ought to use the $88 billion that is already in the Synthetic Fuels Corporation for commercial projects.

Mr. McDADE. Mr. Chairman, will the gentleman yield?

Mr. WEBER of Minnesota. I yield to the gentleman from Pennsylvania.

Mr. McDADE. Mr. Chairman, I would like to respond to the colloquy by my friend, the gentleman from Illinois (Mr. CORCORAN).

I am sure both gentlemen are aware there is a buy-back provision in this contract, that as this plant operates, it is going to hopefully sell its product, which is going to be petroleum products, which will bring revenues to the Treasury; and assuming American technology can once again succeed, as it has so many times in the past—whether the question was synthetic rubber or now synthetic fuels, or whatever it was to get us through a national crisis—when we applied our technology we made it work. We just saw Columbia, at a cost of some $15 billion, bring us into a brandnew age of transportation through American technology. If this process should work—and we all should hope that it does—it will take the coal that exists in the United States, 25 percent of the world's supply, and give us a reserve of oil by conversion from coal of 1 trillion barrels, and the process that the contract is written under provides that the Government has the option to buy it back.

This process that we are talking about can produce revenues to the Treasury because we have a buy-back provision in here. We have a provision for royalties selling; and if the project succeeds, the Government gets a share of the licensing. So if the plant becomes replicated—and let us hope it does because we need those trillion barrels of oil that this can potentially deliver to us—we will not only get our money back, we will make a 250-percent profit on the investment in American technology we are making here today.

I thank the gentleman for yielding.

The CHAIRMAN. The time of the gentleman from Minnesota (Mr. WEBER) has expired.

(By unanimous consent, Mr. WEBER of Minnesota was allowed to proceed for 3 additional minutes.)

Mr. WOLPE. Mr. Chairman, will the gentleman yield?

Mr. WEBER of Minnesota. I yield to the gentleman from Michigan.

Mr. WOLPE. Mr. Chairman, I thank the gentleman for yielding.

I want to respond directly to the point made by the gentleman from Pennsylvania (Mr. McDADE). The gentleman speaks of the revenue that is to be coming in from this plant operation. One of the most curious aspects of the entire history of this demonstration proposal is that precisely as the cost estimates of the plant have escalated, doubled within an 18-month period, so have the revenue projections. Indeed, the revenue projections from the plant have gone up by an incredible 249.8 percent over that same period of time.

I think it is also noteworthy that those revenue projections to which the gentleman refers are based upon an assumption of the sale of a barrel of oil equivalent to $76 per barrel, an assumption that is questionable at best.

Finally, I think it ought to be noted that the revenue projections upon which the gentleman is basing his argument would occur only if the ICRC decides to buy the plant from the Government. This decision is totally up to the ICRC, and if the process does not work, the Government is left with a $4.5 billion plant that simply does not work.

In short, the real issue is who should bear the financial risk and the costs of this operation? That is really the only issue that is before the House in this amendment.

Mr. McDADE. Mr. Chairman, will the gentleman yield?

Mr. WEBER of Minnesota. I yield to the gentleman from Pennsylvania.

Mr. McDADE. Mr. Chairman, may I say to my colleague, the gentleman from Michigan (Mr. WOLPE), that that $76 a barrel figure the gentleman uses is another one of those questionable estimates we read about everyday. There is nobody in this Chamber that can predict what the cost of a barrel of oil is going to be in the period 1985, 1990, 2000.

What we can tell everybody is that U.S. production of petroleum is decreasing, and so is natural gas. The only thing that we have in large supply in hydrocarbons is one-quarter of the world's coal, 25 percent of the entire supply.

With respect to the cost, may I say the Joint Economic Committee looked at this question. They believe that the cost of a barrel of oil that we import today—and we see it today. Saudi Arabia is charging us $32 a barrel; Libya and Algeria are trying to charge

us $42 a barrel. The Joint Economic Committee, if the Members want to read their study, says the cost of every barrel of oil that we import is $100. All one has to do is factor in inflation, factor in the $90 billion we now pay for our imported oil bill, factor in unemployment, and we have a cost today for a barrel of imported oil of $100 a barrel. What we are talking about is using that 1 trillion potential barrels we have in this country to free ourselves from the $100 a barrel cost today, in 1981, for imported oil.

The CHAIRMAN. The time of the gentleman from Minnesota (Mr. WEBER) has again expired.

(At the request of Mr. BROWN of Ohio and by unanimous consent, Mr. WEBER of Minnesota was allowed to proceed for 6 additional minutes.)

Mr. WOLPE. Mr. Chairman, will the gentleman yield?

Mr. WEBER of Minnesota. I yield to the gentleman from Michigan.

Mr. WOLPE. Mr. Chairman, the issue that is before us today is not whether or not we ought to be in the business of attempting to displace the petroleum that we are now importing. Indeed, the real question is how can we create a financial funding mechanism that will best insure that we will put our dollars behind those investments and those technologies that will most quickly displace petroleum, and at the lowest possible cost.

What is being proposed in this particular project is a direct Government subsidy behind a technology that the investor himself is so uncertain about that that investor is unwilling to advance more than something like less than 3 percent of the total project cost, representing the risk that that investor is willing to take.

Mr. CORCORAN. Mr. Chairman, will the gentleman yield?

Mr. WEBER of Minnesota. I yield to the gentleman from Illinois.

Mr. CORCORAN. Mr. Chairman, let me make a comment about the commitment of the private investors. They are talking about an ultimate commitment of $90 million, but in the contract to which my friend, the gentleman from Pennsylvania (Mr. MCDADE), referred—and I would hope with this new administration we would get some new people writing those contracts in the Government—there is a provision that the bulk of that $90 millllion—$60 million—will not be forthcoming from the private investors until 30 days prior—and I quote—"to the end of Phase II."

Phase II is the end of construction, which means up to this point the private investors have put no cash into this project that my friends here are asking that the U.S. taxpayer finance to the extent that is provided in this bill.

Let me make one other point. That is with respect to the market in terms of whether or not we will ever get a payback to the U.S. Treasury. What we are talking about is developing another kind of coal product. This SRC-I product is mostly in solid form which would be used by the large powerplants and which would be used by the large industrial boilers. The fact is that we are not going to have that available until sometime in the next decade. We do not know what the market is going to be. We do know that today the large industrial users and the electric companies are using scrubbers. They are developing a different technology in order to use coal.

I do not question the need to use coal. The question is: What technology are we going to have available? We are just out of sync by about 10 years; and the taxpayers are being asked to cough up the $2 billion involved while the private investors have got to contribute only real cash to the project. It is wrong for the taxpayers of this country to finance this risky venture.

Mr. BROWN of Ohio. Mr. Chairman, will the gentleman yield?

Mr. WEBER of Minnesota. I yield to the gentleman from Ohio.

Mr. BROWN of Ohio. Mr. Chairman, I want to ask a procedural question for my benefit as the ranking minority member on the Fossil and Synthetic Fuels Subcommittee of the Committee on Energy and Commerce, and also as a member of the Joint Economic Committee.

The question is: How did the gentleman in the well find out who speaks for the administration on energy policy?

I must say that over the last few months, I have had some difficulty in making that determination, and I must say also that I had some difficulty in making the determination of just precisely what the logic is.

If the gentleman will bear with me just for a moment, we are spending—and I hate to differ with my friend on the other side of the aisle, the gentleman from Michigan (Mr. WOLPE), when the gentleman says that the substitution for imported oil is not the issue. The substitution for imported oil is the issue.

□ 1140

It is perhaps the overriding issue which we face in this country today with reference to energy. We get our oil in large measure, 25 percent of it, from the most volatile part of the world, and we have had a President of the United States of one party and a Secretary of State of another party—our party—suggest the possibility of war in the Middle East over this source of energy.

Now, let me just ask, if it makes sense for us to invest $3 billion in the strategic petroleum reserve, if it makes sense for other committees than the Appropriations Committees of this Congress currently negotiating between the House and Senate and the administration on the idea of building a $40 billion plus natural gas pipeline from Alaska, how we can say that the issue is not displacing foreign oil and how we can say that a cost overrun in this project is sufficient reason to in a way eliminate coal.

Now, where were all these decisions made in the administration to decide to—I think the term is "off-budget"—off budget the $3 billion for the financing of SPRO, "off-budget" meaning it is not part of the budget this year but it is money that we are going to finance with Treasury notes? Can the gentleman explain that?

Mrs. SCHNEIDER. Mr. Chairman, will the gentleman yield?

Mr. WEBER of Minnesota. I will yield to the gentlewoman in just a moment.

First, the gentleman from Ohio (Mr. BROWN) has brought up a number of points, many of which relate to the decisionmaking process in this administration on energy policy. It is not my intention to try to define for the Members how this administration makes policy.

Mr. BROWN of Ohio. Well, can the gentleman tell us what the policy is?

Mr. WEBER of Minnesota. The amendment we are addressing here has the support of the Office of Management and Budget and the Department of Energy, and thus it is consistent with the administration policy. If the gentleman has information to contradict that statement, he is welcome to offer it to us here on the House floor. My only purpose in bringing that up is to point out that our amendment is supported by the administration and rather strongly.

The CHAIRMAN. The time of the gentleman from Minnesota (Mr. WEBER) has expired.

(On request of Mr. OTTINGER, and by unanimous consent, Mr. WEBER of Minnesota was allowed to proceed for 5 additional minutes.)

Mrs. SCHNEIDER. Mr. Chairman, will the gentleman yield?

Mr. WEBER of Minnesota. I yield to the gentlewoman from Rhode Island.

Mrs. SCHNEIDER. Mr. Chairman, I thank my colleague, the gentleman from Minnesota, for yielding.

I would like to clarify another point that was brought up. Insofar as the SRC-I plant providing any back out opportunity for foreign oil, of course, that is an issue in our overall energy policy, but we are talking about one site-specific project, the SRC-I project. The corporation that is involved, International Coal Refining Co., has submitted testimony indicating that nearly 50 percent of its final product will be a solid; it will not be a liquid fuel, I think for the record it is important to bring that forward.

The other point is that this single plant will produce only 18,000 to 20,000 barrels of oil equivalents per day. By itself, that will not answer the question that we need to solve, which is, how do we solve our back out oil problem at the cost of $4.5 billion?

If the issue is one of technology demonstration, clearly this plant is larger than necessary, as has already been pointed out by my colleague, the gentleman from Minnesota.

The final point I would like to make is that the DOE is much less optimistic about this project because the draft environmental impact statement on this project, issued in January of this year, states there will be three products: Solid SRC-I boiler fuel, anode-grade coke, and a hydrogenated boiler fuel, and each will account for one-third of the total.

If the intent is to back out oil with solids, one should carefully compare the enormous cost of this process with other processes and other methods of coal cleaning.

Mr. OTTINGER. Mr. Chairman, will the gentleman yield?

Mr. WEBER OF Minnesota. I yield to the gentleman from New York.

Mr. OTTINGER. Mr. Chairman, I thank the gentleman for yielding. I have asked the gentleman to yield for two purposes.

One is to point out the question of why we should use our coal supplies for liquid fuels. We can make methanol at the present time for 40 cents a gallon commercially. It comes to about $15 or $16 per barrel in manufacturing costs, and we can use it to propel our vehicles or for stationary purposes.

The question is whether we ought to sink money down this SRC rathole. I think the gentleman is correct, that we ought not to go for this kind of project, which will produce oil at $80 a barrel, when we can produce methanol out of the same coal and have it available for the same purposes to relieve our dependence on imports at a fraction of the cost.

Mr. Chairman, I would like to point out to the gentleman that I have an amendment which, under present parliamentary procedure, would have to be offered as an amendment to his amendment. It deals with State energy conservation offices' funding.

Mr. OTTINGER. Mr. Chairman, therefore, Mr. Chairman, I would at this point ask unanimous consent that should the amendment offered by the gentleman from Minnesota (Mr. WEBER) succeed, I would still be allowed to offer my amendment as a separate amendment.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

Mr. McDADE. Mr. Chairman, reserving the right to object, and I will not object. First I want to ask my friend a question. The gentleman said there are methanol plants that can produce gasoline at $16 a barrel? Is that what I understood the gentleman to say?

Mr. OTTINGER. Mr. Chairman, if the gentleman will yield, we had testimony before our committee that they can produce methanol at 40 cents a gallon and deliver it to stations at 80 cents a gallon. Why it is not being done is a great, great mystery. Methanol producers will not produce it in quantity because they say there is no emergency.

The CHAIRMAN. The time is that of the gentleman from Pennsylvania, who has yielded to the gentleman from New York.

Mr. OTTINGER. The automobile companies say that they will not produce this modified oil product.

Mr. McDADE. Mr. Chairman, reserving the right to object——

The CHAIRMAN. The gentleman will suspend.

The gentleman from New York (Mr. OTTINGER) has asked unanimous consent to offer another amendment in the event the pending amendment should prevail.

Is there objection to the request of the gentleman from New York?

Mr. McDADE. Mr. Chairman, I have reserved the right to object.

The CHAIRMAN. The reservation has been noted.

Mr. McDADE. Mr. Chairman, further reserving the right to object, I would like to have the gentleman from New York tell me where one of these methanol plants exists today, where we can find one.

Mr. YATES. Mr. Chairman, I think we ought to dispense with the unanimous-consent request.

Mr. McDADE. Mr. Chairman, I would like to find out where one of these plants is so I could go and visit it.

Mr. OTTINGER. Mr. Chairman, the testimony was before our committee by the Badger Co., which is an engineering company.

Mr. McDADE. Is there such a plant in existence at the present time?

Mr. OTTINGER. There is not a plant at the present time.

Mr. McDADE. Are they building one?

Mr. OTTINGER. No, but they should.

Mr. McDADE. Mr. Chairman, I withdraw my reservation of objection.

Mr. YATES. Mr. Chairman, reserving the right to object, I would ask the Chair to propound the unanimous-consent request rather than having Members engage in further debate.

The CHAIRMAN. The Chair is about to propound that request.

Is there objection to the request of the gentleman from New York (Mr. OTTINGER)?

Mr. VOLKMER. Mr. Chairman, reserving the right to object, I would like to know again what the unanimous-consent request is and what it contains.

The CHAIRMAN. The unanimous-consent request by the gentleman from New York (Mr. OTTINGER) was that in the event the amendment offered by the gentleman from Minnesota (Mr. WEBER) is agreed to, may he be permitted to offer another amendment to the same portion of the bill?

Mr. VOLKMER. Mr. Chairman, I object at this time.

Mr. OTTINGER. Mr. Chairman, I would ask the gentleman if he would change his mind. I do not want to confuse this issue of SRC-I with an entirely different amendment, because otherwise I would have to offer my amendment as an amendment to the pending amendment.

Mr. YATES. Mr. Chairman, reserving the right to object, I advise the gentleman that under the parliamentary situation as it exists, the gentleman would have to offer his amendment as an amendment to the pending amendment on an entirely different issue. What the gentleman is asking for is permission to separate the two issues, and that if the gentleman wins on his amendment, he be allowed to offer his amendment.

Mr. OTTINGER. Then I would have the right to offer my amendment separately.

Mr. VOLKMER. Mr. Chairman, I withdraw my objection.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

Mr. BROWN of Ohio. Mr. Chairman, reserving the right to object, I ask the chairman of this distinguished subcommittee if under this procedure by not objecting we are abrogating parliamentary procedure here and if the amendment of the gentleman from New York (Mr. OTTINGER) would be germane in the form in which he wants to offer it, in the process in which he wishes to offer it, or should it be offered to the amendment offered by the gentleman in the well.

Mr. YATES. Mr. Chairman, will the gentleman yield?

Mr. BROWN of Ohio. Of course, I yield to the gentleman from Illinois.

Mr. YATES. Mr. Chairman, as the gentleman from Illinois understands it, the same parliamentary rights will remain with respect to points of order or other points that might be made as of the time the gentleman offers his amendment. His amendment is to obtain $9 million for the State Energy offices, which is not related to the SCR discussion.

Under the parliamentary as it now exists, he would have to offer his amendment while the gentleman's amendment was pending. It is an entirely different issue. The purpose of the gentleman's unanimous-consent request is to separate the issue and to

offer the amendment at a later time, and the rights of the gentleman and of the House would still be preserved as of the time he offers that amendment.

Mr. BROWN of Ohio. Then, Mr. Chairman, I certaintly withdraw my reservation of objection.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

The CHAIRMAN. The time of the gentleman from Minnesota (Mr. WEBER) has expired.

□ 1150

Mr. NATCHER. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I rise in opposition to the amendment offered by the gentleman from Minnesota.

Our country, as we all know, has about 6 percent of the population of the world, but at the same time we consume well over one-third of all the entire energy output.

Today our oil reserves are decreasing and our natural gas reserves are decreasing. We all agree that our Nation's most important energy resource at this time is coal.

Adoption of this amendment, Mr. Chairman, would destroy nearly a decade of work placed in operation by engineers and scientists who have assembled for this particular project and who have worked together down through the years. If this amendment is adopted, it would require years to again place in operation an expert synfuel project team.

If SRC-I is approved for funding, this demonstration project will be carried out by International Coal Refining Co., a partnership formed by subsidiaries of Air Products & Chemicals, Inc., and Wheelabrator-Frye, Inc.

The Commonwealth of Kentucky, Mr. Chairman, is a major partner in the SRC-I program. Beginning in the year 1977, the State of Kentucky commissioned the Rust Engineering Co. to perform engineering design for a 2,000-ton-per-day SRC-I plant. The entire $5 million cost was borne by the Commonwealth of Kentucky. In addition, Kentucky has more than half of a 1,500-acre proposed plantsite now under option. The most convincing evidence of the support by the State of Kentucky, Mr. Chairman, in assisting with this project is the commitment to share in the funding of the demonstration plant through the sale of bonds which debt service will be funded by the severance tax collected on coal mined in Kentucky. This support is estimated to total about $30 million.

On August 7, Mr. Chairman, of 1980, last year, the International Coal Refining Co. and the Federal Government signed a cost-sharing agreement. This agreement calls for International Coal Refining Co. to buy out the Federal Government's investment following completion of the demonstration phase of the project. This company will purchase the plant for its full economic value. During the demonstration period, the Federal Government and the company will share in revenues generated by the sale of the refinery's products.

This company and the State of Kentucky accepted the Federal Government's invitation to develop and demonstrate this technology.

I have served, Mr. Chairman, as the chairman well knows, on the Appropriations Committee for a number of years. I do not serve on the Subcommittee on Interior Appropriations chaired by my distinguished friend, the gentleman from Illinois (Mr. YATES). After I was informed, Mr. Chairman, that this amendment would be offered, I secured copies of the hearings from the subcommittee and read the hearings carefully concerning this project that is now here before the committee under this amendment.

I know that the gentleman from Illinois (Mr. YATES) carefully developed this subject during the hearings. I read them all. I know he carefully developed it and I say the same thing for my friend, the gentleman from Pennsylvania, JOE MCDADE, the ranking minority member. The ranking minority member, one of the able Members of this House, carefully developed this subject throughout the hearings.

Mr. Chairman, I say that there is no question what when this was brought before the subcommittee it was carefully investigated during the hearings, during the fiscal year consideration of the budget for 1982 and at all times prior to this time.

Today our Government finds itself, Mr. Chairman, in the position of having to decide once and for all whether or not energy will remain one of our national priorities. Complacency has been with us too long and no longer should we be satisfied with the situation as it exists today.

The work performed by the International Coal Refining Co. under the Department of Energy contract must be carried out in full.

Mr. Chairman, very few of those who have spoken in favor of this amendment have advised the members of this committee that a contract was signed, a contract signed last year. The Government of the United States of America recognizes its contracts and, Mr. Chairman, this amendment should be defeated.

Mr. MCKINNEY. Mr. Chairman, I move to strike the last word. I rise to speak against the amendment.

Mr. Chairman, I just like my counterpart, the gentleman from Ohio (Mr. BROWN) find it very difficult to see who is speaking with the energy voice of this administration. The Secretary of Energy is entirely and completely for going ahead with this project, albeit Mr. Stockman may not, but I remember Mr. Stockman fighting the majority leader, this member, the ranking member of Economic Stabilization, the chairman of Economic Stabilization, when we brought the DPA synthetic fuels bill in this House and passed it overwhelmingly.

Mr. DECKARD. Mr. Chairman, will the gentleman yield?

Mr. MCKINNEY. Yes, I yield.

Mr. DECKARD. Mr. Chairman, I thank the gentleman for yielding.

Is the gentleman aware that the gentleman from Minnesota earlier today in discussion on this issue read a letter from the Department of Energy, of which Mr. Edwards is Secretary, obviously, in which the Department of Energy said it does not support this proposal and would, one may infer, support the amendment of the gentleman from Minnesota.

Mr. MCKINNEY. I would suggest to the gentleman from Minnesota, taking back my time, right now today in the paper, Secretary Edwards is fighting for the synthetic fuels program to the very point where I would question whether he will retain his office should he be beaten off by the Office of Management and Budget.

Let me finish, because I will be very brief. This Member fought off six Cabinet officers of the last administration who spent 3 days on the Hill over the Alaskan oil amendment.

This Member also brought the defense production synthetic fuels bill in front of this House and fought off objections.

I am not about to change.

The comment that was made by Mr. Stockman in OMB and the comment that is made, "Let the free market take its course in oil," is nonsense. You cannot have a free market in a product you do not control. The Defense Department itself in testimony in front of our committee many times has said that the problem with the synthetic fuels industry that we must build up is that if this country gets really serious about it, if this country decides it is going to do something, there is no guarantee of the end product price.

The free market does not work. The minute we start pumping out synthetic fuels, the Arabian states can very simply just drop the price of crude and knock private industry right out of the park as far as synthetic fuels are concerned.

If one goes back to the Defense Production Act years during the Korean war when this country galvanized one of its greatest surges into defense, we will find out that of all the guarantees that were made, only about one one-tenth of them were ever paid out.

I would suggest to this House as we discussed it in Alaskan oil, as we dis-

cussed it in the Alaskan pipeline, as we discussed it in the synthetic fuels bill, this is not going to cost a dime, because by the time it is done oil is going to be right up there with the product of this plant.

The issue is very simple: Energy independence for this country, so that at least no matter how expensive it is, we control the price rather than having the entire economy of the free world, if you pardon the expression, jerked around by the most volatile part of the world fed by some of the most volatile crazies in the entire world.

Mr. FUQUA. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to the amendment.

The SRC-I project should not be killed. It is an important part of our overall strategy, carefully crafted during the past Congresses and, as has been mentioned here today, to develop a synthetic fuels policy for the country.

The DOE demonstration program is a necessary complement to the activities of the Synthetic Fuels Corporation. The development of more efficient advanced direct coal liquefaction technologies, like SRC, will bring knowledge about the economics and the environmental effects of these processes unavailable at smaller scale.

□ 1200

The choice we face today is not one of economic and market forces. It is intrinsically bound in our national security. There are no gaslines today. Our imports are down.

But in absolute dollar terms we are in deeper economic bondage to OPEC than we have ever been at any other time in the history of this country. The administration talks about sending signals. The commitment to the SRC-I project and to the completion of its design is a powerful signal to our determination to utilize our domestic resources to replace our vulnerable liquid fuel supplies. We cannot back away from this inevitable requirement.

The Science and Technology Committee has been deeply involved in synthetic fuels since the 94th Congress. In 1975 my predecessor, Chairman Teague, had a synthetic fuels bill on this floor only to lose by one vote. Then in 1979 we finally passed a bill, and it took us almost a year in conference in order to conclude that bill and bring it back to where it was overwhelming approved for the development of new technologies and their demonstration to scale sufficient so that we can determine the real financial risks as well as the technical viability, which are not separable, and from a national production goal of our synthetic fuels.

I would like to make one point and then yield to my friend. It was pointed out in a colloquy a few minutes ago that this can be funded by the Synthetic Fuels Corporation. When we crafted the Synthetic Fuels Corporation, and my colleague from Ohio (Mr. BROWN) and my colleague from Connecticut (Mr. MCKINNEY) and many others in this Congress served on that conference, it was made very clear at that time that the Department of Energy would do the research, development, and demonstration. It would be the research arm and move the technologies, and the Synthetic Fuels Corporation would be the production-oriented organization. We would not have both involved in duplicating the work of the other.

That was very, very clear, it was very thought out. In the conference with the other body it was bipartisan and I think unanimous that this was the division of responsibility that should exist.

SRC-I is a demonstration project, not a production project. I hope, as my collegue from Pennsylvania (Mr. MCDADE) said, that it will become one very soon. But we need to demonstrate this technology so that we can rid ourselves of the bondage that we are in with OPEC today.

Mr. OTTINGER. Mr. Chairman, will the gentleman yield?

Mr. FUQUA. I am happy to yield to my friend from New York (Mr. OTTINGER).

Mr. OTTINGER. I thank the gentleman for yielding. I have the greatest respect for the gentleman and serve under him on the Science and Technology Committee. But I do think it ought to be made clear to this House that the Science and Technology Committee this year did vote to eliminate the authorization for this project.

Mr. FUQUA. The gentleman is correct. By approximately one vote it was eliminated in the committee. At that time we realized what the Appropriations Committee was planning to do, and it was not as important it be reauthorized this year. There were funds that would be available.

I might say the gentleman in the well communicates very well with the distinguished chairman of that committee and the distinguished gentleman from Pennsylvania. We found that there were other funds that could be used, and they should have been used, and this is not the problem, but the manner in which they are used.

Mr. MCDADE. Mr. Chairman, will the gentleman yield?

Mr. FUQUA. I am happy to yield to the gentleman from Pennsylvania (Mr. MCDADE).

Mr. MCDADE. I thank my colleague for yielding. Is it not true that after the vote the gentleman's committee carried language in the bill indicating that you would let the Appropriations Committee take a look at this, and that we have worked together on it through the years both in the Science and Technology Committee and the Appropriations Committee, and the gentleman entrusted us to make the decision, knowing there was flexibility, as the gentleman has stated, and so stated in the report from the Science and Technology Committee?

Mr. FUQUA. The gentleman is absolutely correct.

Mr. WEBER of Minnesota. Mr. Chairman, will the gentleman yield?

Mr. FUQUA. I yield to the gentleman from Minnesota (Mr. WEBER).

Mr. WEBER of Minnesota. The language, of course, that the gentleman refers to is correct. But let us now not obscure the fact that the committee of which I am a member and glad to serve with the gentleman from Florida (Mr. FUQUA) did oppose this. That is the bottom line.

The CHAIRMAN. The time of the gentleman from Florida has expired.

(By unanimous consent, Mr. FUQUA was allowed to proceed for 2 additional minutes.)

Mr. FUQUA. I might point out it was by one vote. Let me say we realized at that time, and had been communicating with the Appropriations Committee. It was not a total deauthorization of the project. We removed the funds from the bill, and they provided us a mechanism where we could provide some funds for solar and conservation that were not in there, and we could still utilize some surplus funds that the Appropriations Committee had identified.

Mrs. SCHNEIDER. Mr. Chairman, will the gentleman yield?

Mr. FUQUA. I am happy to yield to the gentlewoman from Rhode Island.

Mrs. SCHNEIDER. I thank the gentleman for yielding. Having been the author of the original amendment to eliminate the funding in the Science and Technology Committee, and having worked very closely with my colleague from Minnesota, (Mr. WEBER) we made a concerted effort to make sure that the arguments which were to be put forward were based purely on economics. The testimony we presented incorporated information from the corporations that were deeply involved in this project.

Since that time there have been indications by the corporations that are involved in this project which indicate that if the funding were eliminated from SRC-I it would be no big deal. I think we should keep this in mind at a time of fiscal restraint, and that we ought to, when we are cutting various budgets, we ought to look very closely at a project where the constructors of the project themselves feel that they will be able to survive despite Federal funding.

Mr. FUQUA. I must respond that the gentlewoman must have information that others do not have, because I am not aware that these companies would be able to go ahead and risk capital in this technology, because this is a risk. We are not talking about economics. If we looked at the economics of every research, development, and demonstration program, we would never build anything, because one does not know how much they will cost. This is the first time that one builds these.

But we hope we demonstrate the technology, that it will be economically feasible, it will be environmentally sound and we can move forward to try to rid ourselves of this economic bondage that we are still involved in.

Mrs. SCHNEIDER. If the gentleman will continue to yield, I would like to document my statement.

The CHAIRMAN. The time of the gentleman from Florida has again expired.

(At the request of Mr. WEBER of Minnesota and by unanimous consent Mr. FUQUA was allowed to proceed for 3 additional minutes.)

Mr. FUQUA. I yield to the gentlewoman.

Mrs. SCHNEIDER. To document my statement, in the New York Times March 10 of this year, 1981, there was a statement which said:

> Should the worst happen—Government aid is dropped and the demonstration plant is not built—analysts and Wheelabrator executives seem confident that Wheelabrator would weather the storm.

Then again in the same article it says:

> Should the worst happen, however, and the various synthetic fuels projects be abandoned, Mr. Dingman said it would not put his own company in a bind.

Mr. FUQUA. I think they are talking about the money that they have already spent, not that they would go ahead with the project. I would hope that the company has strength enough and management enough that they would not subject their entire company to bankruptcy if the Government pulled the plugs on this project.

Mr. McDADE. Mr. Chairman, will the gentleman yield?

Mr. FUQUA. I am happy to yield to my friend from Pennsylvania (Mr. McDADE).

Mr. McDADE. I want to reinforce most emphatically the conclusion the chairman of the Science and Technology Committee has given the House. Of course the company will survive. The project will die.

Mr. FUQUA. That is correct.

Mr. McDADE. What we will see here is the last effort ever by this Congress to produce a technology in direct liquefaction. That is what this is about. The gentleman from Florida (Mr. FUQUA) is absolutely correct. Of course we would hope the companies will survive. It is the technology that will stop immediately.

Mr. WEBER of Minnesota. Mr. Chairman, will the gentleman yield?

Mr. FUQUA. I yield to the gentleman from Minnesota.

Mr. WEBER of Minnesota. I thank the gentleman for yielding. I think we have to get back to the basic discussion of the problem involved here, which is the design of the project is of commercial size to begin with.

Mr. FUQUA. We have to build up to those size scales so that we can demonstrate that technology.

Mr. WEBER of Minnesota. If the gentleman will yield further, as I tried to point out in my statement, Wheelabrator-Frye itself indicated that a 2,000-ton-per-day plant would be more than adequate to demonstrate the scale the gentleman is referring to, and yet we have designed a plant which will utilize 6,000 tons per day, which clearly indicates to me that we have gone far beyond what was necessary to demonstrate this technology, and that the Government should not be involved in funding a project that is far beyond what is necessary to demonstrate a given technology and actually is in the commercial field.

Mr. FUQUA. I must beg to differ with my friend, who is my friend, that in this project you have to scale up. You cannot go from the test tube type operation to the full scale. This is the full-scale size. But the technology must be demonstrated, and then there can be modular units built on as it becomes commercial and the Government is not intending to be involved in that. But to demonstrate the scale model as it has increased in size, we do need help because it is a very, very risky business.

□ 1210

Mr. WEBER of Minnesota. If the gentleman will yield further, I certainly accept the gentleman's point. But I do think that that underscores the wisdom of constructing a smaller plant.

The CHAIRMAN. The time of the gentleman from Florida (Mr. FUQUA) has again expired.

(On request of Mr. McDADE and by unanimous consent, Mr. FUQUA was allowed to proceed for 3 additional minutes.)

Mr. McDADE. Mr. Chairman, will the gentleman yield?

Mr. FUQUA. I yield to the gentleman from Pennsylvania.

Mr. McDADE. Mr. Chairman, this is a very important point on the question as to whether or not this is an oversized plant.

Let me read, if I may, what the Department of Energy has said about this specific plant. It is a little bit complicated, but I do want to read it to the House, and I quote them:

> It must be noted that plant size and product volume do not decrease by the same percentage as capital cost. As an example, when plant size is reduced from 6000 to 2000 TPD, or by 67%, capital cost decreases by only 36%. Consequently, capital cost required to produce a barrel of product increases which in turn reduces net revenue.

So what we do when we do this is shoot ourselves in the foot. And the DOE is the one who says, as does the distinguished chairman of the Sci-Tech Committee, that if you take this back to a 2,000-per-day plant, you have not only decreased revenue, but you have not demonstrated a plant that you want to be able to replicate itself.

Mr. FUQUA. The gentleman is correct. And it gives them an opportunity to make a variety of marketable products, which means revenues. And revenues mean that the Government has a better chance of getting its money back from the facility.

Mrs. SCHNEIDER. Mr. Chairman, will the gentleman yield?

Mr. FUQUA. I yield to the gentlewoman from Rhode Island.

Mrs. SCHNEIDER. I thank the gentleman for yielding.

In addition to the Department of Energy, there are two other sources that have closely scrutinized the scale of this particular project, one being the National Academy of Sciences, and they concluded that the plant size of 250 TPD to 600 TPD is of sufficient size to obtain data for scale up to a commercial-size plant.

Mr. FUQUA. I would agree with that. But the fact of the matter is, though, you have decreased the potential of the plant to be a viable plant so that it can ultimately pay off the loan that it has to the Government and make it viable.

Mrs. SCHNEIDER. But as long as the cost to the Government continues to increase, we will still not be able to realize the revenues that we should.

The CHAIRMAN. The time of the gentleman from Florida (Mr. FUQUA) has again expired.

(On request of Mrs. SCHNEIDER and by unanimous consent, Mr. FUQUA was allowed to proceed for 2 additional minutes.)

Mrs. SCHNEIDER. If the gentleman will yield further, as a new Member and very honored to serve on the chairman's committee, it seems to me that we have reviewed various projects line by line, and we have done our cost/benefit analyses and compared various technologies. But when the Federal Government is picking up the tab and subsidizing one particular plant to the tune of 97 percent, and the industry is only paying for 3 percent of the project, then I wonder, how are we going to continue to do a cost/benefit analysis when the contract itself allows for continuous overruns and puts the responsibility on the Federal Government or on the taxpayer to pick up those overruns.

Mr. FUQUA. Well, I might say that there are no overruns. We have never built a plant of this type before. There is no way that you can determine how much one will precisely cost. There are cost adjustments as it goes into development, and there is no way that you can precisely say how much any plant will cost if it is new and has never been done before. We even have enough problems of building Federal buildings, and so forth, that we have built many, many times. There should be no reason for that.

Mr. BROWN of Ohio. Mr. Chairman, will the gentleman yield?

Mr. FUQUA. I yield to the gentleman from Ohio.

Mr. BROWN of Ohio. Mr. Chairman, I was not going to get into the debate at this point because I would like to get my own time eventually, but I feel I may be running out of opportunity. But it is precisely that point that you build a plant for this process, to find out what the cost of this particular operation will be.

Mr. FUQUA. The gentleman is absolutely correct.

Mr. BROWN of Ohio. And how you can save money when you move it into a commercially viable operation for production purposes.

As to the point raised by the gentlewoman a moment ago about this not producing all liquid fuel and therefore not backing out oil, I would have to say to the gentlewoman and to other Members of the congregation who are here that we all know that energy is to some degree fungible, that if you can produce natural gas, you move out coal, you move out oil. If you can produce gas from coal so it is usable under environmental laws, you save a lot of other processes.

Mr. FUQUA. The gentleman is correct.

Mr. REGULA. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman and members of the committee, I had not intended to speak on this issue, but I think a few things ought to be pointed out.

The irony of all of this debate is that if it were taking place in 1979, there would not be any debate. If we had gasoline lines, blocks long, as we did in 1979, people would be demanding that we move ahead with this technology. But because we tend to respond only to crises, today we are saying, "Well, we can put it off."

I do not think the issue is what happens to Wheelabrator-Frye or the New York Times or OMB; it is what happens to the security of the United States of America.

We tasted OPEC blackmail in 1978; we tasted it in 1973. And if we do not want to taste it again, we better be prepared.

One of our famous generals, and I think it was General MacArthur, said the reason battles are lost is four words, "Too little too late." We do not want to be faced with the energy problem in the future and have to once again say to the American people, "Too little too late," for if we do, we will once again have to surrender to OPEC blackmail.

The problem in all of these things has been vacillation. Recently we approved, rather substantially, the idea of multiyear contracting in defense. This is the right way to go. We need the same type of approach to developing synthetic fuel technology. That is the important feature. We are talking about developing the technology. We are not necessarily talking about producing fuel. Once the technology is available, the private sector will move ahead.

In World War II our Nation recognized that it was absolutely essential to our national security that we develop synthetic rubber. In 3 years, with Government expenditures, we did this; and the trucks that rolled across Europe and brought victory were rolling on synthetic rubber because the Government had the vision to develop the technology; the private sector made the tires.

But the point is, we need the same approach today. I dare say that there is not a Member in this Chamber who was serving in 1979 who did not have somebody catch him on the street downtown or at the coffee shop and say, "Why does not the Congress do the same thing for oil that you did for rubber in World War II?" That is what we are talking about today, to have the same security in energy, which is just as vital as we developed in the case of rubber during World War II. I think that to give up on this project, to not continue and develop the technology would be a serious mistake. We would be confronted with the criticism in the future of not responding when once again an oil crisis arises. Once again we would attempt in a crash way to go at it. Certainly this committee has examined it carefully. We have developed this policy before OMB, under the present management, was even around. What I am saying is that this is the responsibility of judgment that has been made by this committee based on the facts presented to us, and we certainly do not want to be in a position of too little too late in the years ahead. I think it is important to the future security of the United States that we develop this technology. We have already expended $200 million in developing SRC-II and SRC-I. It is very important that we move ahead.

I think it would be a great mistake to adopt this amendment to the bill today.

Mr. WEBER of Minnesota. Mr. Chairman, will the gentleman yield?

Mr. REGULA. I yield to the gentleman from Minnesota.

Mr. WEBER of Minnesota. I thank the gentleman for yielding.

Mr. Chairman, the comments of the gentleman from Ohio, along with those of other Members who have opposed this amendment, are premised on the idea that to proceed with this plant yields us a measure of strategic security.

In order to do that you have to presume that this plant is going to produce large quantities of transportation fuel. The gentleman from Ohio has made that point in his remarks about gasoline lines.

But look at the facts as to what ICRC itself projects is going to be the product of this plant: 6-percent sulfur, 18-percent anode coke, 29-percent refined coal, 25-percent heavy oil, 22-percent medium oil, and 22-percent naphtha.

Most of the liquid fuel, which is less than half of the product of this plant, is going to be boiler fuel, not the transportation fuel that is alleged to be available in great quantities.

Mr. REGULA. I would respond to the gentleman that energy is energy is energy; and a rose by any other name is still a rose. Energy is energy—if you can produce boiler fuel, you replace other types of petroleum products that can be used to produce gasoline; it is a total package.

I yield to my colleague, the gentleman from Pennsylvania.

□ 1220

Mr. McDADE. I thank my colleague from Ohio for yielding to me and I want to point out to the House that my colleague from Minnesota has raised an issue incorrectly about this process that ought to be clear to the House.

The CHAIRMAN pro tempore (Mr. FOWLER). The time of the gentleman from Ohio (Mr. REGULA) has expired.

(By unanimous consent, Mr. REGULA was allowed to proceed for 2 additional minutes.)

Mr. McDADE. If the gentleman will yield further, the process that we are bringing before the House today, direct liquefaction, has the capacity to produce either a barrel of petroleum or to produce, if the market demands it, a hard coal substance that could be used to put under boilers and back out oil or back out natural gas, if that is what the market demanded.

What this plant offers that is unique is the capacity to produce either a liquid or a solvent, and that is one of the reasons that everybody in the House ought to be supporting it, not a reason to oppose it.

I say to my friend from Ohio that he has articulated his position in terms of our national security well. We ought to recognize that this plant does have

dual capacity and can meet market demand for either liquid and/or solid and that is one of the great reasons we should support it here today and reject the Weber amendment.

Mr. WRIGHT. Mr. Chairman, I rise in opposition to the amendment.

This vote is a test of two things. It is a test of the continuing will of the United States of America, and our continued commitment to energy independence. And it is a test of whether or not we have the vision that always must characterize a great Nation.

Solomon said it well. He wrote, "Where there is no vision, the people perish."

May that never be the epitaph of our civilization.

In 1941, when the Japanese cut off the rubber supplies to this country and left us bereft of that very essential commodity so necessary to conduct a successful effort at war, Franklin D. Roosevelt called in Bill Jeffers and Bernard Baruch and said to them, "We must have a synthetic substitute for rubber if we are to win." They did not know how to do it, but they and our other leaders gave it their total committed devotion, and within 3½ years, when the allies rolled into Berlin, we rolled on rubber tires made by a synthetic American rubber industry. We can be that Nation once again.

Twenty years later, in 1961, I sat in this Chamber and heard John F. Kennedy stand behind that rostrum and pledge to the American Nation, in 1961, that we would have a man on the Moon by 1970.

The sheer audacity of the dream shocked us. Hardly anybody understood how it could be done, but we gave it the priority that it needed and the goal was achieved. We can be that Nation once again.

In the 1970's, it became apparent to us that our greatest menace, the greatest danger that beset our people, was our profound and growing dependence upon other countries for the oil which is the lifeblood of our economy.

These are some of the countries upon whom we have come to depend for our supplies of oil: Saudi Arabia, Nigeria, Venezuela, the Arab Emirates, Libya, Algeria. From those countries we at least receive a third of the entire supply on which our people depend.

How secure are they? How certain are we of their future?

We set in motion 2 years ago and last year a commitment by which we said this country of ours is going to produce not less than 2 million barrels a day of synthetic oil by the year 1990, by the end of this decade.

Shall we now, so soon, turn tail and run? Are we ready to give up? Like St. George, who drew his sword to slay the dragon of war, slink home and pick our teeth with it? Is petroleum no longer a problem? Are we weary so soon of the struggle?

Let me ask my colleagues, do you believe that this present so-called oil glut is a permanent situation? There is nothing permanent about it, I assure you. Let us look into the future. The question between whether one is a mere politician or a statesman is supposed to be judged by his or her ability to look at the next generation, not just the next election.

Experts disagree on how much oil and gas reserves we have left. They do not disagree that ultimately, someday, maybe 20 years, maybe 30 years, maybe 40 years from now, our voracious thirst for power will inexorably eat its way through those finite oil reserves. When that time comes, then will come the crucial test or our vision of today. If we have not acted to bring on in sufficient quantities actual production of alternate energy sources before we run out of oil and gas, then we shall have condemned a future generation to a steadily declining standard of living and the American Nation to a steady decline among the nations of the world.

How much coal do we have? We could be the Middle East of the world in coal. The United States has one-third of the entire world's known coal reserves. We have enough coal in this country to last us at its present rate of production and consumption for 620 years, without finding any more. Or, we could double the present consumption of conventional coal and convert enough additional coal to make 4 million barrels of synthetic oil—and still have enough to last us for 218 years.

My last point is that the public expects us to demonstrate that vision without which a people will perish.

Two years ago, the Harris Poll undertook to ask the people this simple question—bear in mind this was in 1979, the very year when the so-called tax revolt was occurring in California——

The CHAIRMAN pro tempore. The time of the gentleman from Texas (Mr. WRIGHT) has expired.

(By unanimous consent, Mr. WRIGHT was allowed to proceed for 1 additional minute.)

Mr. WRIGHT. In that same year, when the American people were demonstrating their prudent desire for economies, they were asked by the Harris organization, "Would you be willing to spend $10 billion for synthetic fuel development in this country?"

Seventy-six percent of the American people said, "Yes." Only 18 percent said "No."

So in that, as in so many other things, we often find that the people are ahead of the politicians.

Let us simply have the same vision that the American people have and that this Nation always has had in times of crisis in the past. Let us reject this ill-considered amendment of retreat.

Mr. LOEFFLER. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, this country has not yet faced a devastating oil crisis. When we do, it will be too late for us to look around and see if there is an alternative technology on the shelf to provide us needed assistance.

Should this devastating crisis occur, we will be paying a devastating price indeed for our shortsighted energy policies of the last decade.

The SRC-I or solvent refined coal technology is one that we cannot now afford to lose. After reviewing all of the current DOE demonstration projects, both the House and the Senate Appropriations Committees agreed to allow the project, SRC-I, to proceed through its critical final stage, the final design stage, rather than throwing away the Government investment in the most promising coal conversion technology available.

□ 1230

The funds provided in the fiscal year 1981 supplemental appropriations legislation will only be used to complete final design and prepare essential cost studies, and no more. The committee approved no funds for construction.

I want to emphasize this point. The committee has approved no funds for construction, contrary to part of the preceding debate. No funds have been approved for plant operations, nor are there any funds for advance procurement. Following the completion of the critical design studies, the project will stand on its own, to then seek assistance through the private sector through private financial institutions—perhaps the Synthetic Fuels Corporation—or, if Congress approves, through continued Government involvement. Without these funds—the $135 million that we are seeking to appropriate today—the project is dead and the Government is faced with a loss on SRC-I of the $90 million that has been invested, coupled with $33 million for close-out costs.

In addition, with the demise of the SRC-II project, which has already cost the Government approximately $125 million, we would be throwing away a quarter of a billion dollars.

I say to the Members on both sides of the aisle, as one individual who was not enthusiastic about the mammoth, far-reaching ability of the Synthetic Fuels Corporation, that I, for one, am sick and tired of throwing away money. For those who want to support this amendment, they are in the position of being wastrels, wastrels of the American taxpayers' money to the tune of a quarter of a billion dollars.

It is interesting to note that some of the critics of this project are from the very area of our country which is so severely dependent upon imported crude oil from the Middle East. It is also the area of the country which has consistently rejected attempts to allow offshore drilling and the construction of new refineries, consistently rejected the utilization of abundant local resources of coal, and has consistently opposed nuclear powerplant development in the Northeast.

Furthermore, the SRC technology was developed in response to the demands of the Northeast to replace their existing oil reliance with a clean-burning domestic fuel. Because the SRC process results in the production of solids and liquids, both of which can be used in existing utility oil-fired burners without the need of scrubbers or other environmental trade-offs usually associated with coal, it is exactly the kind of project that meets the needs of this area of our country.

I must also point out that the feedstock for this technology—high-sulfur eastern coal—is found in abundance in Illinois, Indiana, Ohio, Kentucky, Pennsylvania, West Virginia, Virginia, and Tennessee, but it is currently unmarketable due to existing restrictions placed on its use.

Through this SRC-I process, our Nation's abundant supply of high-sulfur coal can be converted into a clean-burning fuel in liquid or solid form.

I might also point out that the funds recommended to complete SRC-I design work amount to less than one-third of the total energy conservation budget for fiscal year 1982.

The CHAIRMAN pro tempore. The time of the gentleman from Texas (Mr. LOEFFLER) has expired.

(By unanimous consent, Mr. LOEFFLER was allowed to proceed for 3 additional minutes.)

Mr. LOEFFLER. Mr. Chairman, one of the major faults that I found in the past administration was the overreliance on conservation and the lack of attention toward the supply side in terms of producing our own domestic resources. I believe that we should take this money, complete the design phase, then allow the private sector, the Synthetic Fuels Corporation, and—yes—the Congress, if Congress wants to proceed into the future stages, to make the ultimate decision.

I am not talking about $4 billion, and I am not talking about $2 billion. I am talking about spending $135 million rather than throwing down a rat hole a quarter of a billion dollars in a failed attempt to prove SRC technology.

Mr. EMERY. Mr. Chairman, will the gentleman yield?

Mr. LOEFFLER. I yield to the gentleman from Maine.

Mr. EMERY. I thank the gentleman for yielding.

Mr. Chairman, I wonder whether the gentleman can tell us if this project is essentially designed to aid in the removal of sulfur from high-sulfur coal?

Mr. LOEFFLER. It is, for we are able to take high-sulfur coal and, through this technology, convert it into solid or liquid products—ranging from tar all the way to aviation fuel—so that when this fuel is burned, for instance, at the burner tip in New England, there would be no need for the use of a scrubber, whether the fuel is in the liquid state or the solid state.

That, in its own right, is a tremendous saving to the utility consumer.

Mr. EMERY. Mr. Chairman, will the gentleman yield further?

Mr. LOEFFLER. I would be happy to yield further.

Mr. EMERY. I think that is a very, very important point. I have been very concerned for a number of years now that the push toward high-sulfur coal technology has ignored that essential component, the fact that combustion of high-sulfur fuel is one of the major causes of acid rain and one of the great problems that is associated with conversion of any high-sulfur fuel.

I think it is absolutely essential that we develop a technology in this country, and hopefully with the use of both the public and private sector, to allow us to get away from the necessity of imposing on home consumers, on business and on industry, the installation and operation of inefficient, uneconomical stack scrubbing mechanisms. The fuel originally and initially will resolve much of the acid rain problem at ultimately less expense.

So I feel that the gentleman has made a valuable contribution and that this synthetic fuel technology is altogether appropriate and one that may well result in an ability to utilize high-sulfur fuels to a much greater extent.

I thank the gentleman for yielding.

Mr. DECKARD. Mr. Chairman, will the gentleman yield?

Mr. LOEFFLER. I yield to the gentleman from Indiana.

Mr. DECKARD. I thank the gentleman for yielding.

Mr. Chairman, I merely hope to clarify the statement of the gentleman in the well with respect to the amount of money that will be lost should the Weber amendment be adopted.

The CHAIRMAN pro tempore. The time of the gentleman has expired.

(At the request of Mr. DECKARD and by unanimous consent, Mr. LOEFFLER was allowed to proceed for 3 additional minutes.)

Mr. DECKARD. Mr. Chairman, the gentleman mentioned $100 million-plus of Government expenditures up to this point. The gentleman has stated a separate amount of $90 million. Would the gentleman explain what that $90 million is?

Mr. LOEFFLER. I am referring to the $90 million expended on SRC-I to this point, in addition to the $33 million that would be expended for shutdown of this project. If we stop it today, we are terminating the project. To close it down per the agreement, we, the American taxpayer and the Federal Government, will then spend $33 million more. That amounts to a $123 million loss just for SRC-I. That, coupled with the loss of $125 million as a result of the demise of the SRC-II project, adds up to a quarter of a billion.

I am sick and tired of paying money out of the Federal Government for nothing, for studies that go on and on and on, and now we are at a point in a project that I am convinced—once we complete the final design stages—is going to be a viable alternative for the American energy user at a price that can be funded through the private sector.

Mr. DECKARD. Mr. Chairman, will the gentleman yield further?

Mr. LOEFFLER. I yield to the gentleman from Indiana.

Mr. DECKARD. Mr. Chairman, I think it is appropriate the gentleman has mentioned the SRC-II project since just recently, as the Members know, the Governments of the United States, West Germany, and Japan voted to terminate that project for precisely the same reasons that the proponents of the Weber amendment are giving here today.

I thank the gentleman for yielding.

Mr. CORCORAN. Mr. Chairman, will the gentleman yield?

Mr. LOEFFLER. I yield to the gentleman from Illinois.

Mr. CORCORAN. I appreciate the gentleman yielding.

I would like to clarify the issue of what the termination costs would be. We have here a letter dated July 20 of this year from the Acting Under Secretary of the Department of Energy, the agency of Government which has now the supervisory responsibility for this project. He said the cost would be $19 million. I wonder where the gentleman gets the larger figure.

Mr. LOEFFLER. The actual costs for terminating the SRC-I project in the event that occurs have been provided to me by those involved in this particular project.

Mr. CORCORAN. Are they speaking for the Department of Energy?

Mr. LOEFFLER. I have not been in a position to acquire anything from the Department of Energy. I find it very interesting that the Department of Energy failed to deliver this document to me. I have not seen it. All I have seen from the Department of energy is someone moving around throughout the Halls of this Congress saying it is not a good project. When I asked them about the particular fact

that a quarter of a billion dollars was being thrown down the drain when, in fact, the Director of OMB has said that it would be savings, they turned their heads and they walked away. So I am not able to respond to something I have not seen.

□ 1240

Mr. Chairman, I do believe the information I have gotten to be accurate.

Mr. OTTINGER. Mr. Chairman, will the gentleman yield?

Mr. LOEFFLER. I yield to the gentleman from New York.

Mr. OTTINGER. Mr. Chairman, I just wondered whether the gentleman would answer this.

The CHAIRMAN. The time of the gentleman from Texas (Mr. LOEFFLER) has expired.

Mr. OTTINGER. Mr. Chairman, I ask unanimous consent that the gentleman from Texas (Mr. LOEFFLER) be allowed to proceed for an additional 2 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

Mr. YATES. Mr. Chairman, reserving the right to object, the reason I am objecting to this request is that there are a number of Members who want to speak on this amendment, and we have gone along on this for just about an hour and a half already.

The gentleman has made his statement. I think, therefore, we ought to be thinking in terms of limiting the debate, but I am not going to ask to limit it at this time.

However, Mr. Chairman, I do object to further time for the gentleman at this time.

The CHAIRMAN. The gentleman from Illinois (Mr. YATES) objects, and objection is heard.

Mr. DECKARD. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the Weber amendment.

Mr. Chairman, I have reasons for reluctance in voting today for deletion of funding for the SRC-I demonstration project. Newman, Ky., is only a few miles from my district. Construction of the plant would provide a tremendous, but temporary, boomtown stimulus to the economy of the tri-state area, and it is strongly supported by more than a few potential suppliers, contractors, and construction workers in my district, who have not been bashful about expressing their interest to me.

Moreover, part of the plant's product may supply the anode coke requirements of one of the largest industrial operations in my district and, on purely environmental grounds, SRC-I is perhaps the most promising of the various synfuels technologies now under development.

Nonetheless, it is time for us to pull the plug.

This is a subsidy whose time has passed. The SRC-I project is the last survivor of the Department of Energy's synthetic fuels demonstration program. These projects—as recently as a year ago, there were five of them—were almost wholly federally funded, with private sponsors acting merely as Government contractors. At Newman, for example, the private commitment is limited to $90 million, although total project costs have risen from a 1977 estimate of only $500 million to a 1981 estimate of $4.574 billion.

Let me underline that contrast. The private contribution of SRC-I is limited to $90 million—3 percent of the presently estimated project costs—a figure which can only decrease as costs escalate.

This leaves an excess project cost of nearly $4¼ billion over the private share, and no one here will have to think too long to figure out who is going to ante up the $4¼ billion.

Now, I am not going to stand here and castigate ICRC or DOE for negotiating that kind of agreement. Two or three years ago, it may have been defensible. Before we had a Synthetic Fuels Corporation, it may have been defensible. Before synfuels projects were moving ahead with private financing—and no more than a Federal safety net in the form of loan or price guarantees—it may have been defensible. But, the cost sharing arrangements of this project are, in fact, defensible no longer.

DOE funding for four of the original five demonstration plants has already been terminated. And in a very strong letter, the administration has recommended termination of the SRC-I project as well. Synfuels projects sponsors desiring Federal support will, in the future, be expected to contribute at least 40 percent of the total project cost, the minimum private share that will be considered by the Synfuels Corporation.

In point of fact, the Union Oil Co., the Tosco Corp., and American Natural Resources Co., at this moment have negotiated contracts awaiting signature which call for 100 percent private financing, backstopped only by Federal guarantees of loans and price supports. In these cases, there is no immediate budgeting impact and there probably never will be. Yet somehow, SRC-I, with its 97 percent Federal funding, has survived to this point and it is time to bring this monument to bureaucratic inertia and turf fighting to an end.

This is not a prosynfuels or antisynfuels issue. Synthetic fuels production has an integral role to play in this country's energy strategy. We have a Synfuels Corporation, with nearly a $20 billion pot of money, to promote the commercial development of synthetics. We have private firms ready to move ahead and prepared to do so with their own money, not the taxpayers. The question today, simply put, is whether we actually mean what we have been telling each other, and our constituents, since the Congress first went into the synfuels business: That subsidies should be limited to the minimum necessary to generate private investments; that the Federal role should recede as private entities become willing to accept more of the risk; that we are serious about a rational and cost-conscious energy policy, and not in using synfuels as an alternative to dams as a means of dumping Federal dollars into the backyards of Congressmen. If we believe these things, we will adopt this amendment.

The CHAIRMAN. The time of the gentleman from Indiana (Mr. DECKARD) has expired.

Mr. McDADE. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I have been privileged to serve as a Member of this body for almost 20 years, and I have seen important moments come in the history of virtually every Congress in which I have served. When we make decisions critical to the future of this Nation and critical to its survival, these are those moments, and that is where we are in my judgment today.

We are going to make a decision in a short time. We will vote on whether or not to continue direct coal liquefaction technology.

Look at the morning paper. The morning paper says: "Israel Rejects U.S. Appeal for Cease Fire With Lebanon."

Look at a map of the Middle East. How many wars are going on in the Middle East right now? The Israelis and the Palestinians are fighting; it is not called a war by us yet, but that is what the head of the PLO calls it. Iran and Iraq are engaged in hostile conflicts. Right at the head of the Persian Gulf bordering Saudi Arabia, the mighty fist of Russia has extended itself into Afghanistan, and to the south of Saudi Arabia, a nation of about 3 to 4 million people, the Russians have intruded into both South Yemen and Ethiopia.

So all we have to do as Members of this body is to look at the geography that surrounds virtually all of the offshore oil productions that the free world relies upon, and we can begin to place into perspective why it is terribly important that we as a nation, the "Saudi Arabia of the world in coal," begin to move ahead and develop our own resources.

We are, if we look at energy across the board, the third richest energy nation in the world; yet we export our wealth to these countries. We export

to Libya and Colonel Qaddafi, a great friend of the United States, and we export to Algeria, another great friend of the United States. We export to those countries in today's dollars $90 billion of our wealth.

I was here in 1973, and I saw the price of a barrel of petroleum in the first Arab oil shock go from $3 to $12, and I saw this Nation go into a recession. I was here in 1979 when the Iraq-Iran war occurred, and I saw the price of a barrel of oil go from $12 to $32 a barrel. In some countries, in Algeria and in Libya, they still want to charge us $42 a barrel.

We are in the midst of an issue that is second to none as it affects our Nation. It involves us in war and peace. We are talking now about the development of a rapid deployment force. Where do we suppose we might use it? We might use it if we need it in an area that relates to our national interest, our national interest being, in geographical respects, in that highly volatile area that we call the Middle East.

Now, we have, as has been stated, within our own borders roughly 25 to 33 percent of the coal of the world. What we want to do today and what our committee recommends is that we appropriate from fiscal year 1981 dollars, not 1982 dollars, left-over money—money to do baseline studies in order to make a judgment in the next Congress about whether to go to construction on this process which can take those stores of coal and turn them into 1 trillion barrels of petroleum.

□ 1250

That is the technology gap that we are now trying to bridge. That is why I say to my colleagues that we are facing an issue, yes, second only to war and peace in this vote that we will take in just a few moments. It is an issue that affects us economically more dreadfully than any I know.

The CHAIRMAN pro tempore (Mr. FOWLER). The time of the gentleman from Pennsylvania has expired.

(By unanimous consent, Mr. MCDADE was allowed to proceed for 3 additional minutes.)

Mr. MCDADE. Just picture a scenario, if you will, of war in the Middle East. The only reason the United States is able to maintain its current import rate, which, thank Heaven, is down, is because Saudi Arabia is maintaining its production at 10 million barrels a day. All you need is one terrorist attack and you can wipe out all the capacity to produce that petroleum.

We are a signatory since 1975 to an international agreement that says if there is a shortfall of oil in the world, we will take a proportionate cut. If that scenario should happen, my friends, you will see gas lines like you have never seen. You will see unemployment like you have never seen. You will see the spot market for oil in this country and in the world go to $100 a barrel and you will see military action being contemplated by the free world.

What I say to my colleagues is that now is the time for us to attempt to prepare, not when the event happens. We can do that today by rejecting this amendment, which I believe to be against the national interest, and deciding to go forward with the technology that can bridge that gap and help us to get off this ever-increasing role that we have been on of being captive to a group of nations which are inimical to our interest, inimical to the free world, and constantly being threatened and surrounded by hostile actions.

Mr. Chairman, I hope that the committee will resoundingly disapprove the Weber amendment and vote in the national interest, in the national security of the greatest Nation in the world and let our technology, let our will bridge the gap from where we are to where we ought to be for future generations of this country.

Mr. MARKEY. Mr. Chairman, will the gentleman yield briefly, please?

Mr. MCDADE. Yes; I am happy to yield.

Mr. MARKEY. Mr. Chairman, I thank the gentleman.

I agree with the gentleman that the national security of our country is inextricably entwined with the energy policy that we form on this floor and down in the White House.

I disagree with the gentleman, however, as to the immediacy that SRC-I offers as a solution to that threat. The gentleman seems to imply that by investing in synthetic fuels today that in some way or another we are going to place a hold upon the threat of the shortfall of energy——

Mr. MCDADE. That is exactly right; that is exactly what we are doing.

Mr. MARKEY [continuing]. That will come from Saudi Arabia or the Persian Gulf. As we know, the first synthetic fuel plant that will be giving us any substantial production will not occur until the year 1990.

Mr. MCDADE. Mr. Chairman, the gentleman can get 5 minutes of his own time, I am sure; but let me just respond. In World War II when we did not have any supply of natural rubber and were cut off, we developed that process in 3 years with Government funding.

I say that if we do not go forward with this amendment, we will not see this technology until the year 2000, if then.

Mr. HUBBARD. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I yield to the gentleman from Pennsylvania (Mr. RITTER).

Mr. RITTER. Mr. Chairman, I rise in opposition to the Weber-Wolpe amendment. Since 1973 we have talked a lot about the energy crisis. Legislation has been passed, several precedents have been involved, policy has been set, yet realistically we have accomplished very little of what we set out to do. We are still talking.

The situation as it stands today is not very different from what it was right after the Arab oil embargo of 1973. Although we have reduced oil imports in the last few years, we still imported more oil in 1980 than we did in 1973. A recent CBO report noted that a 1-million barrel shortfall of oil per day could have a devastating effect on our economy and result in a sudden immediate price increase of $20 per barrel. So, after 8 years since the embargo we are still dangerously exposed to the severe danger of a Middle East oil cutoff.

Our long-range liquid fuel use stability is at stake. One of the clear alternatives is to begin the production of liquid fuels from coal. The only major project available to this country today in using coal for liquid fuel is SRC-I. There are other projects very much in the research stages, but the only real active major project is SRC-I.

A colleague mentioned the demise of SRC-II as reason to curtail SRC-I. The opposite is true and also instructive. The moving force behind SRC-II was a major oil company, and let us be frank, given the way the system operates, the major oil companies cannot be bothered with these more long-range technologies. They have too much going on today, tomorrow, and next year, meeting our short-range energy needs in the way they know how to.

It was also mentioned that there was limited private investment in SRC-I, but if we look at these companies that are contributing to SRC-I, one is taking 50 percent of its 1980 profits and the other is taking 80 percent. That may not stick up high in absolute dollars against oil company profits but it represents massive investment from the companies concerned.

The fact is, these companies are young, high-technology companies. They do not have the megabillions that big oil might have to put into this—if they were interested.

The SRC-I team has worked for nearly a decade to provide our Nation with its first operating synthetic fuels from coal plant. All other synfuels projects are at least a couple of years behind SRC-I. Trying to develop another expert team like this one will take years.

This amendment cuts deeply into America's progress in turning coal into liquid fuel. It was mentioned by proponents of the amendment that this was a solid product effort. Not so. The

SRC-I project can provide 85 percent liquids and 15 percent solids. It could go the other route and work for 90 percent solids and 10 percent liquid; the fact is, it can provide according to the demand. It can produce gasoline. It can produce naphtha. It can produce boiler fuel. It can do it onsite. It would not have to be shipped to refineries.

The cost of this project to the Government was brought up. It was said by proponents of the amendment that it is $4.5 billion; but it is really $1.65 billion for the life of the project. It is during the 2-year initial demonstration period that the molders of the amendment have taken the operating costs and added them to the development costs of the project.

It should be known, however, that the developers of SRC-I are calculating that the product that comes out of initial operation will provide that difference between $4.5 billion and $1.65 billion plus $300 million beyond. Initial operation of the plant should provide financial return.

In addition, the Federal Government will receive payment for all licensing royalties from project inventions, discoveries, and patents from SRC-I.

In addition, ICRC, the combined company that is working on this project, will buy out the Government's investment in SRC-I before final commercialization.

I think if we are serious about reducing energy dependence, we cannot afford to forgo the synthetic fuel from coal option. This project is the only major synfuels-from-coal project remaining from years of talk. It is time to stop talking and start producing. We have vast quantities of coal, more than 25 percent of the world's reserves.

The CHAIRMAN pro tempore. The time of the gentleman from Kentucky (Mr. HUBBARD) has expired.

Mr. HUBBARD. Mr. Chairman, I ask unanimous consent to proceed for 3 additional minutes.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Kentucky?

Mr. YATES. Mr. Chairman, I reserve the right to object.

Mr. Chairman, I ask unanimous consent that the time on this amendment be limited to another 30 minutes, 15 minutes of that time to be controlled by the gentleman from Minnesota (Mr. WEBER) and the other 15 minutes to be controlled by the gentleman from Pennsylvania (Mr. MCDADE).

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Illinois (Mr. YATES)?

Mr. CORCORAN. Mr. Chairman, I object.

The CHAIRMAN pro tempore. Objection is heard.

Mr. YATES. Mr. Chairman, I withdraw my reservation of objection.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Kentucky (Mr. HUBBARD) to proceed for 3 additional minutes?

There was no objection.

Mr. HUBBARD. Mr. Chairman, I yield to the gentleman from Pennsylvania (Mr. RITTER).

Mr. RITTER. Mr. Chairman, I would like to point out to my colleagues that both the Germans and South Africans have commercial synfuel technologies, and recently the Soviet Union and Japan announced stepped-up synthetic fuels programs.

□ 1300

We have a commercial lead, a technological lead. Our project is more advanced than either the German or the South African technology. It is far more efficient.

If we end this project we are again surrendering another important technological arena to foreign competition. Let us not lose this technological lead in liquid fuel production from coal. Let us show to the world we are serious about reducing oil imports and that we can also look toward our long-range needs. Let us get on with the production of liquid fuel from coal.

If these are our goals, then it is truly important that we defeat the Wolpe-Weber amendment.

I yield back the time to the gentleman from Kentucky (Mr. HUBBARD).

Mr. HUBBARD. Mr. Chairman, I rise in opposition to the Weber-Wolpe amendment to delete $315 million in prior appropriated funds for the synthetic fuels demonstration project at Newman, Ky., from the Interior appropriation bill. I congratulate the gentleman from Pennsylvania (Mr. RITTER) who spoke before me. He has an emergency in his office and needs to return. He and I have cosponsored a "Dear Colleague" letter in opposition to this amendment. I appreciate his remarks.

First, let me dispel one of the myths about this project which has circulated of late among the project's opponents and in the news media. SRC-I costs have not become bloated over the past 18 months, as some will tell you. In reality, those costs are realistic and have actually decreased when based on constant dollar comparisons.

Naturally this project, which is scheduled for western Kentucky, is very important to my district and will mean more coal production, more jobs for our people, and a better economy. But more important, it will be great for the entire United States of America.

I would ask my colleagues not to forget that on August 7, 1980, International Coal Refining Co. and the U.S. Department of Energy signed a contract, a cost-sharing agreement for this synthetic fuels project. I have visited with the Secretary of the Department of Energy, James Edwards. He, indeed, does support the synthetic fuels industry.

This very morning at 8 a.m. the gentleman from New York (Mr. STRATTON), the gentleman from Texas (Mr. WHITE), and I were hosted for breakfast at the Department of Interior by Interior Secretary James Watt. Secretary Watt emphasized, as has President Ronald Reagan during his campaign for the Presidency and afterwards, that the Nation's coalfields are, indeed, a great asset for America, and we must use our natural resource of coal to meet our energy needs and become energy independent. Secretary Watt of the Reagan administration was saying that this very morning.

The CHAIRMAN pro tempore (Mr. FOWLER). The time of the gentleman from Kentucky has expired.

Mr. HUBBARD. Mr. Chairman, I ask unanimous consent to proceed for 1 additional minute.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Kentucky?

Mr. YATES. Mr. Chairman, reserving the right to object, I renew my unanimous-consent request that after the gentleman's minute expires that the time for the debate be limited to 30 minutes, 15 minutes of which shall be controlled by the gentleman from Minnesota (Mr. WEBER) and 15 minutes by the gentleman from Pennsylvania (Mr. MCDADE).

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Illinois?

Mr. VOLKMER. Mr. Chairman, I object.

The CHAIRMAN pro tempore. Objection is heard.

(By unanimous consent Mr. HUBBARD was allowed to proceed for 1 additional minute.)

Mr. HUBBARD. Mr. Chairman, a lot has been said and more will be said by many speakers. I repeat that it means a lot to the entire Commonwealth of Kentucky, it means a lot to my congressional district. I would urge those who are thinking in the interests of the Reagan administration to remember that the synthetic fuels industry is and can be extremely important during the 4 years of the Reagan administration to bring about energy independence for our country.

Let us not forget that if we adopt the Weber amendment today to terminate SRC-I, we will be signaling to other nations around the world that the United States is not serious about development of its richest natural resource, coal, to a point where liquid fuel from coal can serve to substitute for imported oil.

Adoption of the Weber amendment today by the House of Representatives will be saying to the OPEC countries we intend to remain dependent upon your needed oil.

Mr. YATES. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I ask unanimous consent that time on this amendment and all amendments thereto be limited to 30 minutes, 15 minutes of which should be controlled by the gentleman from Pennsylvania (Mr. McDADE) and the other 15 minutes to be controlled by the gentleman from Minnesota (Mr. WEBER).

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The CHAIRMAN pro tempore. Does the gentleman from Minnesota (Mr. WEBER) desire to yield time?

Mr. WEBER of Minnesota. Mr. Chairman, I yield 5 minutes to the gentleman from Michigan (Mr. WOLPE).

Mr. WOLPE. Mr. Chairman, this afternoon we have heard some very eloquent statements regarding the critical energy situation facing our country. Our energy vulnerability is exposing us to the possibility of international blackmail. That vulnerability directly contributes to the tremendous cost of energy and rate of inflation we are experiencing. It needs to be clear from the outset that the views of the supporters and the opponents of this amendment do not differ with respect to the dimensions of the energy crisis this country is facing.

It, indeed, is precisely because of our energy vulnerability that we in this body must understand that the indiscriminate throwing of subsidies at one energy technology after another, with no evaluation of whether those investments have the potential to effectively displace petroleum, will only prolong our energy dependency and increase the insecurity of our country.

What is at issue here is whether or not we are going to allow one energy interest after another to hide behind the national security argument and persuade this body to subsidize technologies indiscriminately, not on the basis of whether they can withstand close economic scrutiny.

As we near the termination of this debate, it is useful to evaluate some of the basics of what is involved in the SRC-I project. First, it needs to be emphasized that the Science and Technology Committee, which has responsibility of the Nation's research and development budget in the field of energy, voted against providing funds for this project. We did not do so because we were opposed to synthetic fuels development. Indeed, the Science and Technology Committee budget provides millions upon millions of dollars of funding for synthetic fuels research.

This Congress has already made clear its commitment to the development of a synthetic fuels industry by the establishment of a Synthetic Fuels Corporation. But it was the best judgment of the Science and Technology Committee that, from a taxpayers' standpoint, and from the standpoint of energy development, this was simply a bad taxpayer investment.

Second, this amendment is supported by the Office of Management and Budget and the Department of Energy for precisely the same reason—out of a recognition that it will weaken, rather than strengthen, this country's move toward energy independence.

Third, it also needs to be emphasized that in the last 18 months the total cost of this project has jumped from $2.3 billion to $4.57 billion—almost a doubling of costs in only 18 months.

□ 1310

It has been suggested that this is not a cost overrun; it is simply a cost adjustment. Whatever you want to call it, this is a project that is out of control. Construction has not even begun, and the cost estimates have already doubled.

At the same time that those total cost estimates have increased, has the industry commitment increased correspondingly? Unfortunately, the answer is no. The industry began with a commitment of $90 million to this project at a time when the original estimated cost was $685 million. Now that the cost is $4.57 billion, the industry commitment remains at $90 million. The industry is investing less than 3 percent of the total gross cost of this project, less than 5 percent of the estimated net cost of this project. And I submit that if the industry is so uncertain about this technology that it is unwilling to offer a more substantial commitment of its own, does that not tell us something about the degree of the risk we are asking the American taxpayer to assume?

Over the next 4 years we will have to allocate approximately $500 million a year just for the construction of this project. That is money that is not built into outyear budget authority or outlays. That is money that will have to either be taken away from other energy programs, or will add to the already very serious Federal deficit.

The issue we are facing is one of priorities. We established a Synthetic Fuels Corporation with the express purpose of providing money to stimulate the commercial development of a synthetic fuels industry. There is only one reason that the sponsors of this project have persevered in their efforts to get this direct DOE subsidy, rather than go before the Snythetic Fuels Corporation. And that is that if they go to the Synthetic Fuels Corporation, they will have to come up with a 40-percent industry investment, a demonstration of their willingness to assume some reasonable amount of risk in this project. Under the present DOE arrangement, they have to come up with no more than a 5-percent total commitment to this project.

Mr. OTTINGER. Mr. Chairman, will the gentleman yield?

The CHAIRMAN pro tempore. The time of the gentleman from Michigan (Mr. WOLPE) has expired.

Mr. WEBER of Minnesota. Mr. Chairman, I yield 1 additional minute to the gentleman from Michigan (Mr. WOLPE) for the purpose of yielding to the gentleman from New York (Mr. OTTINGER).

The CHAIRMAN pro tempore. Without objection, the gentleman from Michigan (Mr. WOLPE) is recognized for 1 minute.

There was no objection.

Mr. WOLPE. I yield to the gentleman from New York (Mr. OTTINGER).

Mr. OTTINGER. I thank the gentleman for yielding.

Mr. Chairman, this is not a question of survival. As the gentleman from Texas (Mr. WRIGHT) and the gentleman from Pennsylvania (Mr. McDADE) so correctly point out, the question of our oil dependence is a question of survival. But it is not this project. This project is projected to produce from coal liquid fuels at $80 a barrel. We can use that coal, in response to the concerns of the gentleman from Maine (Mr. EMERY), taking all of the sulfur out, with no acid rain problem at all, by making methanol at 40 cents a gallon, about $20 a barrel.

So it is not a question of whether or not we should use our vast coal resources or not. It is a question of whether we should proceed with a very bad project which is uneconomical and behind which industry is unwilling to put its money, just for the sake of saying that we are supporting synthetic fuels.

Mr. WOLPE. Let me just add, if I may, in response to the gentleman, that when an officer of this SRC corporation raised to his own board of directors the wisdom of adding to the industry investment, the corporate board of directors laughed at him. And that is an indication of the confidence of the industry in their own project. If they get a handout, they are going to take it. But that does not make sense from the taxpayers' point of view.

Mr. McDADE. Mr. Chairman, I yield 3 minutes to the gentlewoman from Tennessee (Mrs. BOUQUARD).

Mrs. BOUQUARD. Mr. Chairman, I rise in opposition to the amendment. Today we must face the question of whether the Congress is serious about synthetic fuels development. Our Science and Technology Committee and the Appropriations Committee have

encouraged the executive branch over the past 5 years to put in place a coherent strategy for implementing synthetic fuels development. Unfortunately, some voices within the administration and the Congress have convinced the President to pursue the so-called free market approach to this energy supply issue. Today this amendment is being offered by the antienergy supply faction to kill the last key demo project in synfuels just as they will seek to kill our nuclear development program.

It has been painful to watch the near demise of the technology demonstration program which our committee put in place for coal conversion with great care and after considerable struggle. Our own Energy Development and Applications Subcommittee's tragic vote on the SRC-I project was only exceeded by the full Science and Technology Committee vote on the Clinch River reactor in terms of dealing a crippling blow to energy supply. By the SRC vote our committee temporarily abandoned its commitment to the development of advanced technologies for synthetic fuels production and deferred to the Appropriations Committee to keep the project alive. The SRC-I deferral in this bill is a symbol that the Congress has not completely abrogated its responsibility in this critical area of national security.

The administation's suggested alternative is that we turn to the Corporation, a creature which our committee had considerable involvement in structuring through the Energy Security Act. Unfortunately, the Board of this Corporation, thus far, seems to have been chosen with the explicit intent of avoiding the selection of anyone who knows very much about synthetic fuels and/or whomever showed any interest in fostering such technology development with Federal dollars. Despite the avowed best intentions of its chairman and directors, this is not a reassuring trend. In fact, I have long been convinced that if Mr. Stockman had his way the President would have already proposed legislation to dissolve the Synfuels Corporation. The Corporation's recent decision to put off a decision simply tells me the administration may not be serious and Mr. Stockman is now openly opposing these awards. I hope someone can offer us some hope for a turnaround since I thought the SFC must provide building blocks for industrial deployment.

I think that it is inexcusable that the OMB has chosen to terminate the Federal role where it is most appropriate, that is, in sponsoring the risky DOE technology demonstration projects. As a result of this anti-free-market approach, we have lost the opportunity for a balanced energy program and nothing but a memory remains of the House concept for providing a true national security reserve from synthetic fuels.

I pointed this out in a speech this spring and have since seen no action on the part of the administration that does anything but confirm my suspicions about synfuels. It is unfortunate that those who feel the simple answer to our energy problem is to simply drill faster and deeper have had the final word on this subject within the administration. To those who have suggested that oil decontrol is the only incentive required to stimulate energy R. & D. I think it is worth quoting testimony we received in our committee just last week with respect to Federal funding of energy demonstration projects.

> The long-range research and development costs of large energy systems probably will not be picked up by private industry if the Government pulls out of these programs. This is because of several factors:
>
> There are inadequate financial returns in light of long-range payback, huge investments, potential inflation, and large risks. Such an investment cannot be prudently justified by private industry.
>
> The market acceptance of many technologies is vitally dependent on Government policies which can change many times before commercial acceptance of the product.
>
> Therefore, the Government should support the research and development for these large systems through the commercial demonstration phase of the programs which are in the national interest. R. & D. should be supported by the Government until commercial feasibility has been reasonably established.

Let us not go on record as voting against energy supply based on distorted perceptions of energy needs and economic reality. This project is aimed at a technology demonstration plant and its operation is critical to verifying second-generation liquefaction technology. There are reasons which relate both to national security and economic prosperity for this Nation to develop a reliable domestic source of energy. In fact, there are only two technologies available today to meet these needs: synthetic fuels and nuclear power. It is significant that the supporters of this amendment oppose both of these sources.

I urge my colleagues to vote down this amendment and to recognize the absolute necessity of moving ahead with all of the technologies to enhance our domestic energy supply, protect our national security, and improve the quality of life for all our citizens.

Mr. WEBER of Minnesota. Mr. Chairman, I yield 4 minutes to the distinguished gentlewoman from Rhode Island (Mrs. SCHNEIDER).

Mrs. SCHNEIDER. Mr. Chairman, our debate today has focused, unfortunately, more on our national energy policy than on anything else, and I think that we would be doing an injustice if we were not to indicate that all of us in this room, every Member of Congress, agrees that we must pursue energy independence. We all agree that our energy situation is in a dismal state of affairs. We all agree on apple pie and the American flag. But we do not agree on the fact that we are willing to accept energy at any cost.

This project is not in the national interest, and I feel quite confident that the taxpayers are not willing to support energy at any cost.

Some of my colleagues say yes. But I say that we must be selective, we must do our cost-benefit analysis. The SRC-I project is merely one of many synthetic fuels projects. It is not the whole synthetic fuels industry. And we are wrong to generalize during these debates that it is any kind of indication as to the future of the synthetic fuels industry. I repeat, this is merely one project for which we are asking to eliminate the funding. Are we willing at this time to throw good money after bad? I personally am not, and I would like to address myself very quickly to the specifics of the costs of this project.

The costs of the SRC-I are out of control, as a chronology of the project's estimates clearly demonstrates. In 1978, SRC-I was expected to cost $685 million; in December of 1979, $2.3 billion; in March of this year, $3.2 billion; in April of this year, $4.5 billion. Cost overruns on this one project have gone up 99.8 percent in merely 18 months. What will another $135 million bring us and bring to this project? Yet another escalating estimate?

This may be the appropriate time to point out what the private sponsors are investing in SRC-I. The International Coal Refining Co., a partnership formed to take advantage of this Federal subsidy, has a total investment of $90 million. This would amount to less than 3 percent of the project's total costs.

Now, I ask my colleagues, how is it possible for us to return to our constituents and say that we are willing to cut the subsidies for school lunches, we are willing to cut the subsidies to mass transit, we are willing to cut the subsidies for student loans, and yet we are not willing to cut the subsidies to private industry when we are allowing the taxpayer to cover 97 percent of the cost?

What will the ICRC get in return for their meager 3-percent investment? They will get plenty.

First of all, if the ICRC decides that the SRC-I project is a commercial success, it has the option of buying out the Government, with its previous contributions to the project deducted from the purchase price.

Second, the ICRC will share royalty rights with the DOE until the Government has received 2½ times its invest-

ment in the project. After that point, ICRC will collect 100 percent of the royalties from any companies that make use of the technology developed through SRC-I.

And, third, ICRC will itself have royalty-free rights to use any patent developed through the SRC-I up to a production capacity of 300,000 barrels per day. This represents approximately 10 commercial-size plants.

The harder you look at this particular contract, the less the SRC-I looks like a research and development project and looks more like a commercial transaction, with the taxpayer assuming all of the risks and the private investors reaping all of the profit.

SRC-I has been designed as the first unit of a commercial modular design. After ICRC had been walked through installation and operation of the first commercial module by DOE, the plant could be expanded to a capacity of 30,000 tons per day. This kind of arrangement looks suspiciously like an easy way for ICRC to use public money to set itself up in the synthetic fuels business under the guise of a research project.

The Synthetic Fuels Corporation was expressly created to help private investors get established in the synfuels market. The catch is that a company asking for help from the SFC must put up at least 40 percent of the capital required, as compared to the 3 percent that ICRC is willing to invest.

Members may not be aware that two competing investor groups have proposed building huge 30,000-ton-per-day synthetic fuels plants within a few miles of the planned SRC-I site in Newman, Ky. Both plants would use the high-sulfur eastern coals that would provide the raw material for SRC-I. These investors will not have the advantage of having the public pay for 97 percent of the cost of building and operating the first commercial unit.

I would urge my colleagues to support the Weber-Wolpe amendment, which has been endorsed by the President, by major environmental groups, by the National Taxpayers Union, by the League of Women Voters, and by the Oil, Chemical & Atomic Workers Union. The SRC-I project is exactly the kind of ill-conceived open-checkbook contracting this Government can no longer afford. Let's pass this amendment today, and put an end to a bad bargain. Remember, of the key projects that are blatant wastes of taxpayers' dollars, this one, which has increased in costs 99.8 percent in only 18 months is a project that has no justification—and the taxpayers will remember. If you do not vote in support of this amendment you are not voting for the taxpayer—you are saying that this Congress will continue its big spending ways when it comes to private industry.

□ 1320

Mr. McDADE. Mr. Chairman, I yield 5 minutes to the gentleman from Missouri (Mr. VOLKMER).

Mr. VOLKMER. Mr. Chairman, I have listened to the full debate on the SRC-I project. As one who has been interested in synthetic fuels for a good many years, and before I ever came to this Congress, because of the past location within my present congressional district at Louisiana, Mo., only 35 miles from my hometown, there existed in 1949 through 1953 a synthetic fuels plant for production of liquid fuel from coal, both coal gasifications and coal synthesis, processes and, using the old Fisher Trobat process.

I have here with me reports from the Bureau of Mines, as to those plants, producing oil from coal, and also for the information of my colleagues, oil from shale.

Listening to these arguments today reminded me of the debate that occurred in this very room in 1953. Because I have read that debate, and some of the present Members who have not participated in this debate but who are still Members of this Congress participated in that debate, including the gentleman from Kentucky (Mr. PERKINS) and the gentleman from Illinois (Mr. PRICE) and others—we hear the same things, we hear cost overruns, it was costing too much money to the taxpayers to develop synthetic fuels for this country, that even then was recognized as necessary to become energy independent.

At that time we were already importing oil, and many people at that time saw the problems with continuing to import oil. So we had a developed synthetic fuel program in this country, but they said $2 million was too much. We had to help the economy. We had to cut back. Two million dollars was too much money. We hear that today.

We heard then also from the oil companies that it could never be done—it could never be done. The Members can read the newspaper accounts. The oil companies said we could never produce oil from coal at the same price that we can produce oil from the ground.

Even then that was disproven. Even then it was proven that it was comparable and that it could be done. But the technology had to be proven out. Even the SRC-I technology was talked about.

I can read to the Members from a report, if I had more time—I wish I did, of this technology, discussed in 1953 but never proven out. It was to be proven at that plant in Louisiana, Mo. It was to be done. It was in the stage of development. But it was never done.

That plant was closed down by the Congress and by that administration in 1953. In 1954 it was given back to the Army, which was before part of the Army chemical and Army ordnance, and it was thereafter sold to private industry, Hercules. The plant was dismantled, never again heard of.

Synthetic fuel production in this country, research and development, came to an end, a complete end. Even though back then, it is interesting to note, to read such things as this chart—which in 1953—how much oil we would need in this country for domestic use in the year 1970, and they hit it almost exactly on the button.

It also shows, which did not happen, the number of barrels per day of oil from shale, and oil from coal that would be produced. It did not happen. We got zero. We are still getting zero. They say SRC-I will only produce so much. Sure it is not supposed to be a commercial huge production facility to produce a million barrels. We are not going to get it from it. But it is to demonstrate a technology that is needed. No private industry will ever demonstrate this technology, not in the next 10 years. It has not been done in the last 27, 28 years. Even then it was said, "Let private industry do it." They will do it. It has not been done and private industry did not do it.

So, we are at a crossroads. I support the position of the floor leader as I did just 2 years ago when we pushed for a Synthetic Fuels Corporation. What I see today is the same thing happening, even though I welcome the support from this side of the aisle to continuation of the SRC-I and consideration of synthetic fuels. I ask that the amendment be defeated.

The CHAIRMAN pro tempore. The gentleman from Minnesota (Mr. WEBER) has 5 minutes remaining, and the gentleman from Pennsylvania (Mr. McDADE) has 8 minutes remaining.

Mr. WEBER of Minnesota. Mr. Chairman, I yield 1 minute to the gentleman from Massachusetts (Mr. MARKEY).

Mr. MARKEY. I think that the important thing here is apart from all of the numbers that are going to be discussed, and have been discussed in the course of the afternoon, there is one underlying principle that we are really debating here, and that is the free market.

You can love synthetic fuels, you can love nuclear fuel and the breeder reactor, all you have to do is love the free market more, in order to understand what we are talking about in this amendment.

Neither one of them can stand on their own two feet. Neither one of them has met the test of the marketplace. Neither one of them would give Adam Smith anything but apoplexy if he knew what his Republican and Democratic colleagues were trying to do here today.

What we have are the energy Edsel twins of 1981. If we want to continue

to support them, let us not make it under the guise of supporting any principles of David Stockman or Ronald Reagan or the message of 1980 in November. Let us just continue to support them on the principles that were allegedly repudiated, that are supported time after time by Members that stand up on the floor of this House. Political porkbarreling pure and simple.

Mr. McDADE. Mr. Chairman, I yield 3 minutes to the gentleman from Kentucky (Mr. ROGERS).

Mr. ROGERS. Mr. Chairman, I rise in opposition to the amendment offered by the gentleman from Minnesota and I would like to commend the gentleman from Illinois and the gentleman from Pennsylvania for their leadership in formulating this legislation, including the funding for SRC-I in committee.

As we travel through our districts, we hear people ask: What is America's energy policy? Do we have an energy policy in this land? And I say to my colleagues that we do not.

We have heard this morning and this afternoon people say that the real policy of this administration on energy is to let the marketplace solve the problem.

I suggest to my colleagues that the marketplace has not solved this problem. The problem we encounter today is that we are shipping $90 to $100 billion per year out of this Nation to the OPEC nations for oil that we use to run this country. That cannot long last if this Nation is to succeed as a viable society.

I say to my colleagues that this committee's work, including funding for this synthetic fuels plant, a full-scale prototype, of a system that we hope will be the wave of the future, is an attempt at a national energy policy which this Nation desperately needs.

If we reject SRC-I today, what do we put in its place? What is the view of this body of a national energy policy without synthetic fuels and with a continuing dependence upon the OPEC nations for the huge quantities of oil that we now import? What do we do? Who has the interest in developing an alternative to oil? Who? It is not the oil companies. They have no motivation in developing an alternative to the oil that they are selling to this Nation. It is not the large coal companies who already have long-term contracts with utility companies. They have no interest in converting to oil.

Who is interested in getting off the OPEC habit?

I say to this body, the only group who has a real interest is the American public. As the distinguished majority leader showed us a moment ago, 76 percent, three-fourths of the American people, say to you and to me, establish an energy policy for this land, develop synthetic fuels, convert the huge quantities of coal that we have to the oil that we import from the OPEC lands.

They are saying to us, establish a national energy policy, and I suggest to the Members the amendment we are voting on today, just this hour, if we pass that amendment, will do away with the only energy policy we can adopt.

The CHAIRMAN. The gentleman from Pennsylvania (Mr. McDADE) has 5 minutes remaining, and the gentleman from Minnesota (Mr. WEBER) has 4 minutes remaining.

□ 1330

Mr. WEBER of Minnesota. Mr. Chairman, I yield 1 minute to the gentleman from Arkansas (Mr. BETHUNE).

Mr. BETHUNE. Mr. Chairman, it has been a good debate. I have been persuaded—not being a member of the committee—to support the Weber amendment for this reason: If the project is economically feasible, then the private sector ought to be doing it.

If the project needs help, then its investors and supporters can apply to the Synfuels Corporation for funding or credit assistance.

If that is not enough, then we ought not to be doing it or the Government ought to be doing all these sorts of things.

Thus, it occurs to me that the right vote here is to vote for the Weber amendment.

Let me make a point from a different perspective: If we permit SRC-I to have "privileged" status, so that outside the Synfuels Corporation we have a special entity running around that gets special treatment, we undermine the competitiveness of those who are applying through the Synfuels Corporation to seek and develop funding assistance and credit assistance.

In fact, a CBO analysis in February 1981 noted that there appears to be enough private capital to fund this type of capital and that outright subsidization may work against the mission of the Synthetic Fuels Corporation. I quote:

> There is reason to believe that sufficient private capital is available in the energy industry to develop new energy technology. Moreover, the funding of any technology through DOE undermines the competition for fixed funds within the SFC and reduces the long-term effectiveness of federal expenditures to develop synfuels.

Additionally, it must be pointed out that—

First, other synfuel projects are being negotiated which call for 100 percent private financing; SRC-I, however, will be financed at least 97 percent by taxpayers.

Second, the original cost estimate for the project was $685 million. An April 1981 estimate puts the total cost at $4.574 billion. Every penny of the increased costs will be paid for by taxpayers. The companies involved have a fixed obligation of only $90 million, regardless of how high the costs go.

Third, new DOE estimates indicate that even the large increase may significantly understate the actual costs.

Fourth, OMB has said about SCR-I: "Continuation of the project will saddle the taxpayer with an enormous financial burden, yet will yield little returns to anyone other than the project sponsors."

These are all valid reasons to support the Weber amendment.

Mr. McDADE. Mr. Chairman, I yield 1 minute to the gentleman from Kentucky (Mr. HUBBARD).

Mr. HUBBARD. Mr. Chairman, I rise once again in opposition to the amendment. I would point out to my colleagues and friends in the Congress that indeed this amendment will greatly diminish western Kentucky coal production and the economy of western Kentucky. But more important, it will be a minus for our entire Nation.

The 96th Congress expressed overwhelming approval to finally start the development of synthetic fuels to reduce our energy dependence and to make greater use of domestic resources such as coal in its vote to establish the Synthetic Fuels Corporation in the Energy Security Act. While we have vast quantities of coal, we have yet to make use of them for liquid fuel production. We just keep on talking.

This amendment to terminate SRC-I will signal to other nations that the United States is not serious about the development of its own coal resources to a point where liquid fuel from coal can serve to substitute for imported oil. If we fail to support our most advanced synthetic fuel project, we will surrender yet another important technological area to foreign competition.

Mr. WEBER of Minnesota. Mr. Chairman, I yield the balance of my time to the gentleman from Illinois (Mr. CORCORAN).

The CHAIRMAN. The gentleman from Illinois (Mr. CORCORAN) is recognized for 3 minutes.

Mr. DERRICK. Mr. Chairman, will the gentleman yield?

Mr. CORCORAN. I yield to the gentleman from South Carolina.

Mr. DERRICK. Mr. Chairman, I wish to associate myself with the amendment offered by the gentleman from Minnesota (Mr. WEBER).

I have continued to support synthetic fuels development. However, the project cost of SRC-I is over $4 billion. This amendment, which I support, will, in effect, stop further funding until further evaluation of the need of the project can be determined once and for all. I believe we owe the American taxpayers another look at this

project before we commit to spending their $4 billion.

I thank the gentleman for yielding.

Mr. CORCORAN. Mr. Chairman, I rise in support of the Weber-Wolpe amendment to the fiscal year 1982 Interior appropriations bill, an amendment to delete $135 million for the SRC-I synthetic fuels project. I urge my colleagues to join in my support.

As my colleagues well know, the Reagan administration has requested the termination of Federal funding for SRC-I. The issue at hand today is not whether the Government should continue to support and encourage the development of our Nation's synthetic fuels industry in order that we lessen our dependence on foreign oil, but rather, whether the taxpayers of this country should be expected to support a project with a history of dramatically increasing construction costs, rising operating expenses and delays, a project in which private industry's capital contribution and risk has been virtually zero.

While I am sure that private industry has many valid reasons for its unwillingness to assume the capital risk of this venture, it is time that we face the fact that the expenditure of Government dollars to finance this project does not eliminate the risk involved. The risk is merely shifted from private investors to our Nation's taxpayers. I am concerned that the taxpayers, in assuming this enormous financial risk of funding SRC-I, will not be getting that for which they bargained.

Two-thirds of the product of this design process will be a solid fuel. Solid fuel will not provide us with a replacement for our transportation needs nor loosen OPEC's grip on the consumers of this Nation. Our energy security will not be increased. In fact, potential buyers of this product are currently in the process of converting to coal by using a combination of pollution control technologies. At this very moment, the potential market for these products is eroding.

While I believe that the synthetic fuels potential of our coal should be developed in order that environmentally acceptable ways be found to use this vastly untapped energy resource, I am concerned that by the continued funding of the SRC-I through the commitment of several billion Federal dollars, we will jeopardize the possibility of developing other coal-based technologies which can increase our energy security.

To push this subsidy through at the same time that we are cutting back on payments and subsidies and support programs to millions of people in this country, without taking another look at the appropriate Government role in this endeavor, is pure recklessness.

In fact, one would be hard pressed to label the SRC-I as a demonstration program. The design of this plant would process 6,000 tons of coal per day. According to an independent study of DOE's coal liquefaction program by the National Academy of Sciences, the demonstration of this process for the design of a commercial plant could be done with an operational capacity using 250 to 600 tons of coal per day—not 6,000. While I believe that the Government role is to provide assistance in the research and development of synthetic fuels technology by helping to fund demonstration scale level projects which can be turned over to private industry for commercial scale development, I do not believe that a plant of the magnitude of SRC-I constitutes a demonstration project of a technology to relieve our dependence on foreign oil.

I am fearful that if we start committing a tremendous amount of money, as we did during the last administration and during the last Congress, before we have the opportunity to reexamine the direction of our synthetic fuels policy, we run the risk of demonstrating that, even with tremendous Government subsidies, the synthetic fuels industry will not be able to lessen our dependence on foreign oil. Such an error in judgment could place us in a very difficult position at some future point in time. When we really need synfuels to meet our energy requirements people would be unwilling to develop and support the synfuels industry because our record of creating a viable synthetic fuels industry may well be one of failure and shortsightedness.

Let us not blunder into this costly commitment which straps taxpayers with a costly financial burden over the next several years, but let us take this opportunity to demonstrate to the American people that the Congress is capable of pulling back on the reins of a project which appears to be totally out of control.

I urge my colleagues to support this amendment which is consistent with the Gramm-Latta reconciliation amendment, as recently approved by the House.

Mr. CORCORAN. Mr. Chairman, I think this has been an excellent debate. I think we have tended to focus on the major question before us. I was amused to hear my friend and colleague and predecessor in South Bend, the gentleman from Pennsylvania (Mr. McDADE), talk about the need to, in a comprehensive way, deal with the energy problem that confronts the United States. I would submit that the message of the election of 1980 suggested that in our first response to the oil crisis back in 1973 and 1974, we panicked and we made a mistake in the Government program enacted at that time.

I would also suggest that in the second oil shock that we got back in 1979 that we panicked by keeping the same legislative framework available for distributing and managing the scarcity and we made a mistake in doing that.

What we are trying to do, what the new administration stands for in energy, with respect to synthetic fuels is that the sponsorship of this new industry from a Government standpoint and the management of the limited Government role in this regard is with the Synthetic Fuels Corporation.

What we do not want, what we do not need, is to have over here outside this framework the Department of Energy subsidizing a corporation, not just a "Ma and Pa" kind of corporation, but two entities that rank in the top 300 of the Fortune 500 with subsidies from the general taxpayer to minimize the risk to that corporation.

I would submit that the main question before the House is simply this: Is the project, the SRC-I project, a commercial project or a research and development project?

I think the evidence is clear that it is a research and development project. We have had the first stage. We had this project down in Wilsonville, Ala.; and that project has shown that the technology is desirable. But do we step up right away from 6 tons a day to 6,000 tons a day? We only do that after we take the intermediate step of about 600 tons a day. We are not doing that. The reason we are not doing that is because of the previous administration, and the Congress at that time wanted to rush pellmell into commercialization, and I think we would fall into the same trap if we were not to support the amendment of the gentleman from Minnesota (Mr. WEBER).

If we do not support the reduction of this $135 million for this project, we are just saying we have to do something in order to give the appearance of doing something. That simply is throwing good money after bad money. Now is the time to pull the plug on this project and leave the synthetic coal projects exclusively under the SFC.

So I would suggest, Mr. Chairman, that the administration has examined this question. The administration examined the project. The administration looked at this amendment. And the administration is in enthusiastic support of the amendment offered by the gentleman from Minnesota.

I urge the House to do likewise.

The CHAIRMAN. The time of the gentleman from Minnesota (Mr. WEBER) has expired.

Mr. McDADE. Mr. Chairman, I yield 2 minutes to the gentleman from Texas (Mr. WILSON).

Mr. WILSON. Mr. Chairman, I have been very impressed with the arguments of the people from New England on behalf of austerity. I wish they had thought of those arguments

last week when we were voting for the FA-18, which is only going to cost $46 billion and is the greatest overrun of any weapons system in history.

The next war will be a come-as-you-are war. You cannot make a baby in less than 9 months no matter how much you want to. You cannot build a synfuels plant in less than 3 years no matter how much you want to. It would be absolute lunacy for the United States to go into the 1980's and 1990's with no possible way to develop liquid fuels out of coal.

The idea that this an be done with private capital is pure nonsense. The only people with enough private capital in the United States to do this are the major oil companies. What do the major oil companies do with their private capital? They buy other major oil companies. All of us have seen the ludicrous things taking place over the past 2 weeks with the bids from Mobil and Gulf for Conoco. It is nonsense. They are not going to do it. They are going where the profits are sure and where the profits are certain. They will buy Conoco and Montgomery Ward. Sheik Yamani is smart enough not to let oil prices rise high enough to make it economical for the United States to develop alternative fuel sources.

The gentleman from Massachusetts earlier said that the gentleman agreed our energy supplies were intrinsically entwined with our national defense and national security. Yet the gentleman opposes drilling oil off the Georges Banks. The gentleman opposes nuclear power. The gentleman opposes coal mining in the Western United States. The gentleman opposes exploring for our oil resources in Alaska. The gentleman opposes shale development. The gentleman is planning on flying our planes by the Sun and driving our tanks by windmills.

Mr. McDADE. Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Minnesota (Mr. WEBER).

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. WEBER of Minnesota. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 177, noes 236, answered "present" 1, not voting 19, as follows:

NOT VOTING—19

Blanchard	Hansen (UT)	Roberts (SD)
Bonker	Lewis	Rosenthal
Cotter	Martin (NC)	Savage
Dougherty	Mattox	Smith (IA)
Dymally	McCloskey	Young (AK)
Fascell	Michel	
Gaydos	Patterson	

□ 1350

The Clerk announced the following pairs:

On this vote:

Mr. McCloskey for, with Mr. Dougherty against.

Mr. Roberts of South Dakota for, with Mr. Young of Alaska against.

Mr. Mattox for, with Mr. Fascell against.

Messrs. ANNUNZIO, SPENCE, and DONNELLY changed their votes from "aye" to "no."

Mr. GILMAN and Mr. GOLDWATER changed their votes from "no" to "aye."

So the amendment was rejected.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. OTTINGER

Mr. OTTINGER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. OTTINGER: Page 37, line 8, strike out "$203,890,000" and insert in lieu thereof "$223,890,000."

Mr. OTTINGER. Mr. Chairman, we have just heard the majority leader and the gentleman from Pennsylvania (Mr. McDADE) and others argue so very eloquently about the very critical nature of our dependence upon imported oil and how it is vital to our survival to get off that dependence.

Well, study after study has shown that the quickest and cheapest and

cleanest way to get off imported oil is through energy conservation.

□ 1400

This fact has been confirmed starting with the Ford Foundation study, the Harvard Business School study, a recent Mellon Institute study, and just recently a study for the Department of Energy that was performed by the Solar Energy Research Institute. Increasingly the administration's push, as adopted by Congress, has been to put the responsibility for energy conservation on the States.

What this amendment does is add a mere $20 million to the appropriations for energy conservation to continue the energy conservation programs in the Department of Energy that are known as the State energy conservation program.

This very addition was originally recommended by none other than the chairman of the Interior Subcommittee of the Committee on Appropriations, the gentleman from Illinois (Mr. YATES). But unfortunately it was deleted during the subcommittee markup.

The amendment is modest in nature and will keep the appropriations well within the ceilings established in the budget resolution, as well as the authorization ceilings contained in both the House- and Senate-passed reconciliation bills.

Mr. Chairman, I am privileged to be a conferee on the portion of the budget dealing with this matter, and tentative agreement has already been reached between the House and the other body to authorize much higher figures for this program than are represented by this amendment. Continuation of this program is crucial if States are to have the capability to encourage more efficient use of energy, especially in view of the curtailed Federal role and the vastly expanded State role proposed by the Reagan administration

The funds provided under the State energy conservation program provide States with seed money to plan for energy emergencies, to carry out Federal energy conservation programs such as conservation grants to schools and hospitals and to initiate innovative voluntary conservation programs.

The loss of these funds could spell the end of State energy offices and of vigorous State participation in promoting energy efficiency.

According to the National Governors Conference, a majority of the 50 State energy offices are more than 80 percent dependent upon these Federal funds for their existence. It appears that most States, according to the Governors Conference, could not find replacement support for the Federal-State energy conservation dollars before their fiscal year 1981 grants expire. All States are constitutionally required to maintain balanced budgets. Some have limits on annual increases in spending.

In addition, most State legislatures have already completed consideration of their fiscal year 1982 budgets, or, if they are still in session, are too far through the process to make major changes.

It is for this reason that in their winter meeting in February the Governors Council identified funding for this program as their priority among all of the administration's proposed budget cuts in energy and environmental programs. The $20 million which I propose to restore for the State energy offices would be a 50-percent reduction from the fiscal year 1981 appropriation.

Nevertheless, it will provide the very minimum assistance needed to maintain these vital programs.

These programs, like many other conservation efforts, have proven that energy efficiency is our most cost-effective energy resource. An analysis of four measures undertaken by the State energy conservation program shows that for every dollar of Federal funds spent, $5.50 worth of energy was saved.

By voting for this amendment, my colleagues will keep the Interior appropriation bill well within the ceiling that was established by Congress in the first concurrent budget resolution. As the distinguished subcommittee chairman pointed out last Monday on the House floor, the new budget authority in the bill is $191,273,000 below the amount allocated to it under section 302 of the Congressional Budget Act.

Any question about SPRO being off budget has been completely resolved because both the other body and the House committees, with respect to reconciliation on the subject, have voted to take the SPRO off budget. So the $191 million is surely available.

The CHAIRMAN pro tempore. The time of the gentleman from New York has expired.

(By unanimous consent Mr. OTTINGER was allowed to proceed for 4 additional minutes.)

Mr. OTTINGER. My colleagues will be told that this amount will make the appropriations exceed the Reagan budget as originally submitted. There is no reason why we should stay within those limits. The only limits we are obliged to stay within are the actions of the House itself in the budget reconciliation process. As I indicated before, this is well within that amount.

If the amendment is adopted, the energy conservation appropriation will still be $85 million below the authorization established in the Senate-passed reconciliation bill, and will remain consistent with the House-passed ceiling.

I would also note that the Interior Subcommittee of the Senate Appropriations Committee last week added $26 million, or $6 million more than is provided in this amendment for this program.

Finally, I would like to emphasize that this amendment has wide support from State and local government groups. The amendment has been strongly endorsed by the National Governors' Association, the U.S. Conference of Mayors, the National League of Cities, the National Association of Counties, the League of Women Voters, the Consumer Energy Council, the Conservation Coalition, and the Solar Lobby. At this time when we are turning more and more responsibility over to the States, it would be most unfortunate to deprive them of the ability to deal with important energy issues by cutting off their Federal funds.

I would like to point out that many people here are interested in creating block grants to the State and local governments to perform energy conservation functions and, indeed, I have sponsored one version of that with the gentleman from Massachusetts (Mr. MARKEY) and the gentleman from Connecticut (Mr. MOFFETT). The gentleman from Iowa (Mr. TAUKE) has another version, and we will not be able to get those block grants, which is the approach that is sought by the administration, unless there are sufficient funds provided through the appropriation process to be able to make that possible.

I have committed myself and our committee to process that block-grant legislation just as quickly as I can. If we are going to give the States the responsibility, we have to give them the means, and as the Governors Association has pointed out, the large majority of the States get at least 80 percent of their funds for their State energy offices from this program.

I strongly urge the House to adopt this amendment and to provide the States the funds that are needed to pursue this very successful and important program, which really can do something rapidly for us in getting off of imported oil.

Mr. GEJDENSON. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, I want to take this opportunity to express my strong support for the amendment offered by my distinguished colleague from New York (Mr. OTTINGER). I speak today not only as a concerned Member of the House, but as someone who worked for the department in Connecticut that included this State energy division. As the gentleman from New York has pointed out, we received tremendous support from Fed-

eral dollars—in Connecticut, almost 90 percent of employee salaries were so funded.

The effort of State energy departments adds a phenomenal amount to the Federal contribution. Working with municipalities, private industry, and individuals, the Connecticut office was able to substantially impact on energy conservation measures in the State. Connecticut and other States in the Northeast were able to effect a near 7-percent reduction in energy consumption in the last 2 years assisted by State energy offices, and, nationally, we have been able to reduce our importation of the foreign product by some 27 percent.

Some would argue that we can now afford to weaken our commitment to energy conservation. Supplies are plentiful. OPEC is weak. Prices are flat. I urge my colleagues to reject this advice.

We have been given a respite from the continuing steep rise in energy prices which has plagued us throughout the last decade. But none of us can predict how long this period of price stability in petroleum might last.

Those who might be inclined to turn their attention from energy issues should read the July 16 Wall Street Journal. The headline in the Journal's lead article states: "Experts Say Oil Glut May Be Ending, Prices May Climb Again Soon." The article points out, and I quote, that—

> Twice in the past decade, periods of shortage and high prices were followed by abundance and easier prices—only to be reversed with a sudden jump in quotes. During the ups and downs, oil soared from $2 a barrel in 1973 to an average of $36 a barrel today.

The lesson we can and must draw from this article is a simple one. We must continue to encourage reasonable efforts to promote energy conservation efforts which will further protect us from the actions of the cartel. By restoring $20 million for the State energy conservation program and $3 million for the residential conservation service, the Ottinger amendment lends support to efforts that are consistent with that approach.

Mr. Chairman, massive savings in energy use have been made in my region of the country, New England, and we can attribute a portion of these gains to efforts by government at all levels. In its recent publication, "Energy in New England: Transition to the 80's" the New England Congressional Institute points out that—

> Per capita consumption of energy fell * * * from 271 million Btu's in 1978 to 252 million Btu's in 1980.

This means that New England consumed 6.5 percent less energy in 1980 than it did in 1978. In discussing these gains, the institute concludes that—

> A contributing factor to greater conservation activity has been a number of federal, state and local energy conservation programs which provide information, technical assistance, and financial incentives. Operated primarily through the State Energy Offices, the Schools and Hospitals Program, the Energy Extension Service, vanpool programs, and residential/commercial audit programs, among others, have aided New Englanders in saving energy.

We have an opportunity today, Mr. Chairman, to demonstrate our continuing commitment to energy conservation by voting in favor of the Ottinger amendment. I urge my colleagues to support this effort.

Mr. YATES. Mr. Chairman, I rise in opposition to the amendment, somewhat reluctantly, but nevertheless in opposition.

The gentleman from New York is, of course, a very distinguished and hardworking member of the Energy and Commerce Committee and has specialized in energy matters. He knows a great deal about them. We on the committee take a great deal of stock in his recommendations.

The question here is a very close one. It boils down to this: How much money shall the Federal Government give to the States to carry on their energy offices?

In the past, the Federal Government has provided almost 100 percent of the money for the State energy offices. Now these offices are funded by 80 percent Federal funds.

The gentleman wants a Federal contribution at a time when funds that are now available for fiscal year 1981 will be adequate to keep the programs of most of these offices going for fiscal year 1982.

This was a close question for our subcommittee. We do favor conservation programs. We are very much aware of the fact that a barrel of oil conserved is one that this Nation does not have to buy. And we consider energy conservation programs to be of very great importance. But that is not involved in this amendment.

The question, fundamentally, is: Who shall pay for the operation of the State energy offices?

The gentleman from New York says the Federal Government should pay another $20 million for that purpose. Our Appropriations Committee said we believe that the money can be more fruitfully used for other conservation programs and that the States themselves should make up the $20 million difference.

That is the issue before the committee.

I think we ought to leave it to the States to pay for their own energy offices, and I call for a vote, Mr. Chairman.

Mr. MARKEY. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, there is an interesting hypocritical dichotomy in the arguments that are used to support the SRC-I, or to support the breeder reactor, and at the same time to say that conservation, to say that solar energy ought to be placed onto the marketplace to fend for itself.

We heard, before, long polemics as to the need for us to teach a lesson to the Persian Gulf nations, to not allow ourselves to be held captive by these sheiks meeting in Abu Dhadi deciding the fate of our country.

And we hear that these new technologies of the breeder reactor, which might give us some added energy by the year 2000, or synthetic fuels by the year 1990, are the panaceas. But yet every single major energy study done over the past 3 or 4 years, from the Harvard Business School to Stanford to Michigan to independent studies done by solar energy research institutes, all indicate that conservation is the best short-term remedy to our energy addiction, to the dramatic reduction of the consumption of energy which we make in this country.

So what do we say? We say to the most fragile, to the newest, to the most vulnerable source of energy, that is, conservation, "We are just going to snip off the umbilical cord, zero you out and send you out into the marketplace and we hope you do well despite the fact that every energy analysis indicates that you get the best return per barrel per Btu for the investment."

And we say to synthetic fuels and to nuclear power and to the oil and gas industry: "Just keep coming in and asking not for $20 million, but $20 billion, $200 billion, whatever you need in order to keep you people as the major dominant energy source in this country."

What we are asking for here is $20 million to give to States so that they are not just abruptly cut off in their capacity to be able to provide energy information, energy technology advice, energy expertise to local communities, to individuals, so that they can begin to reduce dramatically their energy consumption.

We are not asking for the world here. We are asking for basically a small pittance. In comparison to what these other major energy sources are asking it is not much.

If there is any intellectual consistency at all in this debate, then you must believe in one thing: Either we are going in one direction, or we are going in the other. Either we are going to the free market route, and everybody is out there all by themselves, and if that is the case, strip away all grants for conservation. I will stand here with you in support of that. But if we are saying that handouts are acceptable we must put all of these technologies that we like out there for a Federal handout, with Adam Smith spinning in his grave. If we are going to say to

coal and to nuclear and oil and gas, "Come in and take whatever you want," then let us just give $20 million to conservation so that they can demonstrate in the future, as it has in the past 5 or 6 years, that it is the most economical, the cheapest, and the cleanest means of producing new energy resources for this country.

I hope that in its wisdom this Congress would not in a hypocritical attempt to satisfy some needs for budget pruning cut off the one program which has a demonstrated record of cost effectiveness and results for the American people.

Mr. YATES. Mr. Chairman, will the gentleman yield?

Mr. MARKEY. I yield to the gentleman from Illinois.

Mr. YATES. Mr. Chairman, the gentleman has made a most eloquent speech in the abstract. It just is not pertinent to the points under consideration here.

The gentleman talks about the actions of this committee without knowing what the committee did. Is the gentleman aware that the committee has made available $440 million for the conservation programs, approximately $245 million above the administration's recommendation?

It is not a question of the committee not having made sufficient money available. The only question that is involved here—and it is only $20 million—what we are asking the States to do is to provide another one-half million dollars themselves in each of their energy offices. Now, what is wrong with that?

Mr. OTTINGER. Mr. Chairman, will the gentleman yield so that I might reply to the chairman?

Mr. MARKEY. I yield to the gentleman from New York.

Mr. OTTINGER. Mr. Chairman, I would like to acknowledge the chairman's strong support of energy conservation, and the actions that he indicated were in fact taken by his subcommittee.

Mr. YATES. That is right.

Mr. OTTINGER. The gentleman has always been a champion of those programs, to the extent that when our subcommittee acted, we just provided a general cap and counted on him to fund the various essential conservation and renewable energy resource programs.

Mr. YATES. And we did.

Mr. OTTINGER. And the gentleman did.

The difficulty that I have and the difference that my good friend and I have is that, increasingly, we are putting burdens upon the States to carry out these responsibilities. The subcommittee, despite the chairman's recommendation to provide this $20 million, rejected it on the grounds of what I think are false economies. In fact, we are moving forward with legislation that will provide a match between the States and the Federal Government so that the States will indeed have to show their interest by putting up their share of the funds.

The CHAIRMAN. The time of the gentleman from Massachusetts (Mr. MARKEY) has expired.

(On request of Mr. OTTINGER and by unanimous consent, Mr. MARKEY was allowed to proceed for 2 additional minutes.)

Mr. OTTINGER. However, as the Governors Association has pointed out, many of the States simply cannot provide this funding in the coming fiscal year because their legislatures will no longer be meeting.

We are in the process of passing this new cost-sharing legislation. So for this fiscal year I would plead with the chairman, and with the ranking minority member, the gentleman from Pennsylvania (Mr. MCDADE), to provide this $20 million so that the States can carry on the essential functions as we are putting an ever-increasing burden upon them.

Mr. MARKEY. Mr. Chairman, if I may reclaim my time, I do not want to be placed in a position in which I misrepresent the attitude that I have toward the gentleman from Illinois. The gentleman has long been the backstop to provide for conservation programs in this country. He has been the one last real hope in this Congress and in past Congresses to include these conservation programs. But I am speaking more to my friends on the other side of the aisle who do not want any cuts in the nuclear budget, who do not want any cuts in other of their favorite energy programs. That is what I am saying here; that if we are going to phase out our commitment in this particular area to conservation programs, then let us at least give them a 1-year grace period, not at the end of this fiscal year in which they are cut out completely and sent out into the street, but rather at least a 2-year period in which a matching grant system can be established so that the States can be brought into the process to provide for matching funds so that they will also be able to continue these programs rather than seeing them cut off abruptly and then attempting a year from now to establish them again from scratch.

□ 1420

Mr. TAUKE. Mr. Chairman, will the gentleman yield?

Mr. MARKEY. I yield to the gentleman from Iowa.

Mr. TAUKE. Mr. Chairman, I thank the gentleman for yielding.

In a few minutes I plan to speak in support of the gentleman's position on this amendment, but I do want to point out that he might check the last vote to determine which side of the aisle supports which projects.

Mr. MARKEY. Nuclear power, I am afraid, is the one Achilles' heel that the Republican party will still have to walk with. The gentleman from Iowa, of course, is a shining light in all conservation issues for both sides of the aisle; all I ask for is a bit of equity and also a bit of foresight.

Mr. MCDADE. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I have great respect as well for the gentleman from New York, but this amendment really ought to be voted down summarily. We have put into this bill unanimously by the subcommittee I want to underline, since the gentleman from Massachusetts apparently wanted to raise some kind of extraneous issue, $440 million for conservation programs.

What we have cut is $20 million that goes to the States in order to say to the States we are only going to fund about 80 percent of your State energy offices.

Now if we pass this amendment the gentleman has offered, we are going to bust the budget. We are, as the House knows, $7 million under the budget. So I do not think we ought to bust the budget for the benefit of bureaucrats in States where we are currently funding those State offices at 80 percent of the total cost.

Let me tell my colleagues where the committee decided to put some of the conservation money and see if the Members do not believe it is a higher priority than bureaucrats in Governors' offices.

We have got $150 million in here for weatherization programs for low-income groups to try to help them make their homes energy secure.

We have got $100 million in here to retrofit schools and hospitals to try to make them energy secure, to try to make them more conservation oriented.

We have got $15 million in here for an energy extension service that tries to get softwear out to consumers so that they can make appropriate conservation choices as they try to decide what they are going to do with marketing purchases or developing their homes or insulating or whatever they are going to do.

So, we are putting a lot of money into hardware, $250 million.

We are putting $250 million into hardware where there is a tangible payout in conservation efforts to all of us in displacing Arab oil.

We are putting $15 million into an outreach program to try to reach consumers to educate them.

Do not break the budget by putting $20 million more into funding State offices that the Governors can pick up a greater share.

Mr. Chairman, I yield back the balance of my time and urge a "no" vote.

Mr. TAUKE. Mr. Chairman, I move to strike the requisite number of words and I rise in support of the amendment.

Mr. Chairman, I hope that the Members of the House are very aware today of exactly what we are attempting to do. Unlike some of those who are suggesting that this is an issue of whether or not we will support conservation programs, I think this is really an issue of how we are going to treat State energy programs.

We should recognize that what we are doing with our energy programs generally is transferring many of them from administration at the Federal level or through federally supported programs to administration at the State level.

Thus, this is a question of whether or not the States are going to have the resources to carry out meaningful energy programs.

Many State legislatures, of course, have already gone out of session, so those States will be unable to cope with this unexpected reduction in Federal funds.

But even those States that would have the possibility of having their legislatures meet to make up this shortfall face a very serious problem. A State like my own, for example, has watched its energy bill grow very substantially over the past number of years. Now that energy bill is really crippling our economy.

Our State energy bill, the amount of money that is flowing out of our State in order to pay for energy costs, increased to about $5 billion this year. That has had a very detrimental impact on our economy.

As a result, a State like ours, which needs this kind of program a great deal, is one of the States that is most hard pressed when it comes to finding that money in the State budget.

I would suggest, therefore, that it is very critical for those States that are more dependent upon conservation programs and other energy programs—such as in my own State, the production of alcohol fuels—to have this kind of money in order to maintain ongoing energy programs and keep good people in those programs.

Right now the people who have been trained and have been working in Iowa's energy office are leaving because of the uncertainty of their jobs. They know that as of October 1 they may be without jobs because of lack of funds. That means even if the legislature comes back in January and puts these moneys back into the State budget our programs will suffer. We will have lost trained people; we will have experienced an interruption of the programs and we will not have the same kind of service that we would have had if we expended this rather small amount of money in order to keep the ongoing programs working.

I would submit that in my State and other States the work of the State energy offices has been much more effective than almost any other dollar expended on energy programs at the Federal level. So I am hopeful that this committee will today decide not to kick those States that are down because of the high cost of energy and will decide not to interrupt very important and very worthwhile State energy programs by making a very abrupt and a very unnecessary cut in these funds. I hope we will support State-based energy programs by backing this amendment.

Mr. AuCOIN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of the amendment offered by the gentleman from New York.

Before I do that, I want to respond to remarks made by my good friend from Massachusetts, who indicated that in some way the Interior Appropriations Subcommittee was engaged in intellectual hypocrisy when it came to the question of the development of energy technologies like the SRC-I project, and energy conservation.

Such a comment ought to be answered. I wish that my colleague had not made it. If anyone gives a fair reading to the work of this subcommittee, one will see that there is energy conservation funding over the amounts recommended by the administration under the leadership of the chairman of this subcommittee, and I think the subcommittee ought to be congratulated for that fact.

One hundred and fifty million dollars in funds for conservation and weatherization for low-income families are provided by this subcommittee in this bill.

□ 1430

One hundred million dollars for conservation in schools and hospitals has been funded.

The question we then have before us is the question stated by the chairman of the subcommittee: Who should pay—in whole or in part—for the operation of the State energy offices? As good as this bill is, and as much as I respect the chairman of the subcommittee, it is my feeling that this bill would be better if, in addition to the work we did for low-income families in the weatherization of their homes, and if, in addition to the work we have done in the subcommittee for funding for weatherization projects for schools and hospitals, we would take the additional step of providing assistance to the State energy offices. They are doing a good job in this country, not a bad job. And I am surprised that my good friend, the gentleman from Pennsylvania (Mr. McDADE), the ranking minority member of the subcommittee, would disparage energy gains through conservation after the statement that he made on the SRC-I project a few moments ago when he indicated that this country needs to grab every ounce, every barrel of energy possible in order to make ourselves independent from the political dangers and the energy dangers from the Middle East. Here is another opportunity.

I do not think we should let this opportunity pass.

Mr. OTTINGER. Mr. Chairman, will the gentleman yield?

Mr. AuCOIN. I yield to the gentleman from New York, who has offered the amendment which I think is excellent.

Mr. OTTINGER. Mr. Chairman, I thank the gentleman very much for his support.

I would like to point out that all these programs that the Interior Subcommittee has funded and that the gentleman from Pennsylvania (Mr. McDADE), so eloquently recited, have to be administered by the States. Many of those States simply will not be able to have the funds to administer those programs if there is not some money provided. This is just the absolute minimal amount. It is half of what those State energy offices got last year.

Mrs. FENWICK. Mr. Chairman, will the gentleman yield for a question?

Mr. AuCOIN. I yield to the gentlewoman from New Jersey.

Mrs. FENWICK. I thank my colleague for yielding.

Mr. Chairman, do I understand it correctly that the States will get no Federal money in order to administer these programs which we are funding in this appropration?

Mr. YATES. Mr. Chairman, will the gentleman yield?

Mr. AuCOIN. I yield to the gentleman from Illinois, the chairman of the subcommittee.

Mr. YATES. Mr. Chairman, the answer to that question is that the States do receive money for administering specific programs. For example, the weatherization programs, the schools and hospitals programs, all the programs of the Federal Government that go into the States also carry money for administering them.

Mrs. FENWICK. There was mention made of 80 percent. Is that wrong?

Mr. YATES. That is 80 percent of the operation of the energy offices themselves, out of this fund. But the other funds do supply money for the operations of those programs.

Mrs. FENWICK. What does the gentleman mean by 80 percent of this fund? What I am asking is: Are the States going to receive 80 percent of the costs of administration or not?

Mr. YATES. Not in the energy offices themselves, they are not, if this amendment does not go through.

The CHAIRMAN. The time of the gentleman from Oregon (Mr. AuCoin) has expired.

(By unanimous consent, Mr. AuCoin was allowed to proceed for 4 additional minutes.)

Mr. YATES. Mr. Chairman, will the gentleman yield?

Mr. AuCOIN. I yield to the gentleman from Illinois.

Mr. YATES. Mr. Chairman, I would like the gentleman from Pennsylvania (Mr. McDade) to tell the Committee what he just told the gentlewoman from New Jersey (Mrs. Fenwick).

Mr. McDADE. Mr. Chairman, will the gentleman yield?

Mr. AuCOIN. I yield to the gentleman from Pennsylvania.

Mr. McDADE. I thank my colleague for yielding.

Mr. Chairman, I want to reiterate that we have added $440 million for conservation in this bill. If we put this $20 million in to fund the last portion of these State offices, we are going to bust our budget. I do not think there is any reason for us busting our budget to prop up that 80 percentage that is available out there in the States now on an average, because every time we fund one of these programs, there is a component that goes for administration. So we are effectively funding on an average, across the Nation, 80 percent of all the Governors' statewide offices.

Mr. AuCOIN. Mr. Chairman, I am going to reclaim my time.

I appreciate the gentleman's comments, although I do not agree with them.

Mr. YATES. Mr. Chairman, will the gentleman yield further?

Mr. AuCOIN. I yield to the gentleman from Illinois, the chairman of the subcommittee.

Mr. YATES. I want to say that the committee was very close to funding this.

Mr. AuCOIN. Yes. It was a close call.

Mr. YATES. The Senate has put in more money for this program. I told the gentleman, speaking as one member of that subcommittee, that when we do go to conference, in the event the gentleman's amendment does not prevail—and I hope it does not prevail—we will nevertheless be most receptive to the question as to whether or not the State energy offices do need these funds. We will negotiate with the Senate on that basis.

We are very much aware of the importance of this. It was just a question, after we had put $250 million in for programs for the States, that this was one case where we hoped the States could take up the slack.

Mr. AuCOIN. Mr. Chairman, one of the reasons this program is important is that it provides a structure that would enable other Federal programs to be folded in on a block grant basis. That is why so many of us think we can improve upon the bill if we add funds to keep the State energy offices alive.

In Oregon, this program is used to initiate free energy audits and low-interest or no-interest loans to weatherize homes. This complements a State income tax credit for weatherization. Oregon and other States, as part of this program, have adopted energy-efficient procurement practices; thermal and lighting efficiency codes; carpool and vanpool programs; and education outreach programs.

Moreover, Mr. Chairman, for every dollar invested in this program, there is a return of $5.40. This program is cost effective and addresses our energy problems. Let us approve this amendment.

Mr. MOFFETT. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise to speak in favor of the amendment.

First of all, I want to add one Member's thanks to the distinguished subcommittee chairman and the entire subcommittee for their attention to conservation matters in the face of a very, very difficult fiscal situation and fiscal environment.

It is sometimes said that we do not have an energy policy and we have all been knocked around on the editorial pages as part of an institution that supposedly never came up with an energy policy. The fact of the matter is, if the Members will look at where this program that we are discussing came from, it came out of the discussion in 1975. It was a bipartisan discussion and a bipartisan bill. President Ford signed that bill. The following year the program was reaffirmed—in 1976. We are now in a bit of a different atmosphere, obviously. We have oil decontrol going forward with all of its results, good and bad. Many of us thought that we had a kind of agreement with some of our friends that pushed so hard for decontrol that they would now be more supportive of conservation efforts because they realized that decontrol by itself was no policy. As a matter of fact, in the debate on the amendment just prior to this one, on a synthetic fuels matter, it was said again and again that decontrol is no energy policy by itself, and the proponents of synthetic fuels seemed to say over and over again that the administration's policy, if it is only decontrol, is not a satisfactory policy.

I thought, as one Member serving on energy committees and chairing an oversight subcommittee on energy, that we had a kind of agreement with some of our friends from Texas and Louisiana and Oklahoma and other friends from other parts of the country who had supported decontrol that they would, in fact, try and be supportive of conservation measures as well, beyond the conservation that comes from the price mechanism. I am not sure that that kind of understanding now exists. I think it is unfortunate.

Third, we are now in an environment where everything seems to be shifting back to the States. This amendment fits precisely into that pattern. I wonder if those people who raised the argument during the last amendment of whether we are only capable of legislating on top priority issues relating to energy when there are gasoline lines or a problem in the Persian Gulf—I wonder if they are listening now to the argument on this amendment? Do they really believe that we need to be the kind of mature, scholarly body that looks at the facts and, despite where the popularity of an issue may be or where the sense of urgency might be, if we are the kind of body that can move forward and say this is important even though there are not any gas lines?

□ 1440

I wonder if the same argument does not hold for the State energy offices and for conservation in general as it did just moments ago for a synthetic fuels subsidy of great expense and dubious value.

I think we are in a very dangerous period because we are living with a false sense of security. Look at the record of these State energy offices. They have been doing some extraordinary things. And does anyone doubt that when the next gasoline lines come—and we know they will someday, hopefully not soon but someday—or when there is the next threat of a cutoff in the Persian Gulf, most of us will be scurrying about to examine the issue to determine whether the States are prepared to deal with an emergency?

We passed the S. 1030 bill through here last year by four or five votes. That is the one that included rationing, as the Members may recall, and it had a component that said the States should be ready for an emergency and the Federal Government ought to set guidelines for the States. What we are doing here is turning back on the whole thrust of that argument, which was a sensible one, in the bill we adopted, albeit by a close vote. It was an argument that said when the crisis comes the States should be ready, and if we do not adequately fund them we will be sorry.

After all, the gentleman from New York (Mr. Ottinger) only puts us at a level which is half of that or less than half, if I am not mistaken, of where we were last year, and last year we were not even adequately funding our State energy offices.

So, Mr. Chairman, let us put aside our partisan or philosophical differences, look at commonsense, and adopt the amendment offered by the gentleman from New York (Mr. OTTINGER).

● Mr. HOLLENBECK. Mr. Chairman, I rise in support of the amendment offered by my colleague from New York (Mr. OTTINGER). The amendment restores $20 million to the energy conservation budget for the State energy conservation program (SECP). The amendment does not violate the appropriation ceilings established in the first concurrent budget resolution (H. Con. Res. 115) and is well within the ceilings authorized in both the House and Senate reconciliation bills. The $20 million in the amendment constitutes less than 50 percent of the fiscal 1981 funding level.

My native State of New Jersey received approximately $1.4 million for these energy programs in fiscal 1981 and will receive roughly $600,000 in fiscal 1982 under the provisions of the amendment. Without this funding, New Jersey cannot continue its energy conservation programs which include such important areas as home energy savings and home heat retrofit programs. Last year, 500,000 people who heat their homes with oil had combustion audits done under the home heat retrofit program. The resulting repairs to combustion systems resulted in significant savings for the individual homeowners and in total energy consumption in the State.

Furthermore, in an independent study conducted by the office of fiscal affairs of the New Jersey State Legislature, it was found that for every dollar spent on State energy conservation programs, $130 in savings was achieved. Based on this ratio, the State conservation programs saved about $620 million last year in energy costs. The State saved 74 trillion Btu's under their 1980 conservation plan which is equivalent to 12 million barrels of No. 2 home heating oil. In an energy-consuming State such as New Jersey, whose residents will spend $16 billion for energy costs next year, conservation is a vital part of the State's total energy plan.

An energy policy that ignores conservation will have an adverse impact on our Nation's economy and rate of inflation. Conservation is a necessary part of our national energy goals and the continued support of the Federal and State governments is needed. I strongly urge my colleagues' support for this important program.●

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York (Mr. OTTINGER).

The question was taken; and on a division (demanded by Mr. OTTINGER) there were—ayes 18, noes 36.

So the amendment was rejected.

AMENDMENT OFFERED BY MR. WILLIAMS OF MONTANA

Mr. WILLIAMS of Montana. Mr. Chairman, I offer an amendment.

The portion of the bill to which the amendment relates is as follows:

INDIAN HEALTH FACILITIES

For construction, major repair, improvement, and equipment of health and related auxiliary facilities, including quarters for personnel; preparation of plans, specifications, and drawings; acquisition of sites; purchase and erection of portable buildings, purchases of trailers, and for provision of domestic and community sanitation facilities for Indians, as authorized by section 7 of the Act of August 5, 1954 (42 U.S.C. 2004a), the Indian Self-Determination Act and the Indian Health Care Improvement Act, $46,739,000, to remain available until expended.

The Clerk read as follows:

Amendment offered by Mr. WILLIAMS of Montana: On page 42, line 16, strike "$46,739,000", and insert in lieu thereof "$62,239,000".

Mr. WILLIAMS of Montana. Mr. Chairman, I appreciate having the attention of the House because this is a complex matter. The debate will not take long, but it is of enormous importance to the American Indian people.

In the planning, development, and construction of Indian housing, there is an awkward and somewhat uncoordinated situation. The Bureau of Indian Affairs, Housing and Urban Development, and Indian Health Service all share responsibility for Indian housing. The involvement of IHS, Indian Health Service, is to provide water and sewer system planning, construction, and hookups. The moneys for IHS sewer and water for newly constructed Indian homes are not authorized or appropriated during the early phases of housing planning and development.

It is almost impossible to project when the money will be needed or what the costs will finally be, and as a result the funding for the sewer and water hookups for these homes that is in the budget is very precise and has to come at the right moment.

Now, the committee has appropriately provided $28 million for sewer and water hookups: $20 million of that money is for homes ready for occupancy before October of this year, and $8 million of the $28 million is for planning and design for 9,000 homes now in the planning and construction pipeline.

The committee does not take into account, however, that 500 homes now ready for occupancy and 4,000 homes which will be ready for occupancy between October of this year and the end of September of next year do not have funding. The committee does not appropriate money for hooking up those homes, and, thus, approximately 4,000 Indian homes will be completed in the next fiscal year but will not be hooked up for water or sewer. Five hundred Indian homes are now constructed and ready for hookup; 1,000 Indian homes will be ready by this Christmas for hookup, and 4,000 homes will be constructed and waiting for hookup between now and September 1982.

But there is no money in this bill to provide that hookup, and, therefore, we are going to have at least 4,000 homes, between now and the end of September, with no money for hookup, sitting there vacant.

Mr. YATES. Mr. Chairman, will the gentleman yield?

Mr. WILLIAMS of Montana. I yield to the distinguished chairman of the subcommittee.

Mr. YATES. Mr. Chairman, the gentleman's concern for this program is well shared by the committee. It is a most anomalous situation.

The Department of Housing and Urban Development is responsible for approving the construction of homes in the first instance, and the Indian Health Service is responsible for providing the funds for the sanitation facilities. Sometimes there is a gap, but on every occasion where this situation has been called to the attention of the committee, the committee has provided funds, on almost every occasion, over the budget recommended by the administration, whether it be the Carter administration or whether it be the Reagan administration.

The reason the committee tends to oppose the gentleman's amendment, even though it is well aware of the fact that homes are being constructed, is because there is no definite number of units and, therefore, no specific amount that the committee could furnish for the sanitation facilities.

Speaking as one member of the committee, however—and I am sure the committee will follow suit—I would want the gentleman to know that as soon as the amount that will be needed to provide the sanitation facilities becomes known, the committee will be pleased to provide it—in a supplemental appropriations bill, for example.

Mr. Chairman, I know that does not offer complete assurance to the gentleman. I can only tell the gentleman that the committee shares his despair and his reluctance to see a program go forward which would provide empty shells as houses without sanitation facilities.

□ 1450

The CHAIRMAN. The time of the gentleman from Montana (Mr. WILLIAMS) has expired.

(At the request of Mr. YATES, and by unanimous consent, Mr. WILLIAMS of Montana was allowed to proceed for 3 additional minutes.)

Mr. YATES. Mr. Chairman, will the gentleman yield further?

Mr. WILLIAMS of Montana. I yield.

Mr. YATES. The only reason for the committee's hesitation in going along with the gentleman is the fact that there is not something tangible to which the committee could address itself and the gentleman may have the committee's assurance that at such time as the figures do become precise and definite, that the committee will respond, I am quite sure, constructively and sympathetically to the gentleman's request.

Mr. WILLIAMS of Montana. I recognize that the gentleman from Illinois has been very sympathetic to this problem and has worked on it at more length than anyone in this House, including the gentleman from Montana, who spent a great deal of time on it and chaired a full committee hearing and on behalf of the gentleman from Arizona, to whom I now yield.

Mr. UDALL. Mr. Chairman, will the gentleman yield?

Mr. WILLIAMS of Montana. I yield to the gentleman from Arizona.

Mr. UDALL. Mr. Chairman, I rise in strong support of the gentleman from Montana's amendment to increase the appropriation for Indian housing sanitation item by $15,500,000.

First, let me say that this addition is not violative of any budget reconcilation levels. H.R. 4035 appropriates a total of $676,739,000 for the Indian Health Service. The House budget reconciliation bill caps the Indian Health Service at $725,900,000. The addition of this $15,500,000 will still keep the IHS budget well within the limit. Tentative agreement reached by the budget reconciliation conferees would drop the cap altogether.

The principal reason I rise in support of this amendment is because of the actions of the Office of Management and Budget in this matter. Initially, OMB requested no funds for fiscal year 1982 for sanitation facilities for federally assisted Indian housing. Finally, they realized that Indian housing scheduled for construction, or under construction, would not be constructed or would not be occupied for lack of sanitation facilities. But, rather than admit their error and request adequate funds, they began to propose ridiculous proposals such as using nonexistent community development block grant funds for such purpose.

Fortunately, our Appropriation Committee did include some money in the budget for Indian sanitation facilities. But it is not adequate. The report on H.R. 4035 itself states that only planning and design money will be made available for Indian housing scheduled for completion of construction in fiscal year 1982 and awaiting water and sewer hookup.

Mr. Chairman, as noted in Mr. Williams' statement, the staff of my committee, based upon information provided by the Indian Health Service, has determined that another $15,500,000 will be needed for fiscal year 1982 if Indian housing are to be built on schedule and are to be fit for habitation.

Again, in staff discussions, this was brought home to OMB staff and they again admit the discrepancy. It is their new proposal to make up this difference of $15,500,000 which has angered me and generated my support for this amendment.

In order to meet this need, which they admitted to only under pressure, they plan to reprogram certain fiscal year 1981 funds appropriated to the Department of Housing and Urban Development. Which funds, Mr. Chairman? Which "Peter" are they proposing to rob to pay "Paul." Of course, they propose to reprogram fiscal year 1981 funds for the construction of desperately needed Indian housing to pay for desperately needed sanitation facilities for the rest of the desperately needed Indian housing units.

For 20 years, I have observed and resisted the failures and quirks of the Office of Management and Budget through six administrations, including the present one. I urge the Members, Democrat and Republican alike, to oppose this unfair and misguided position and support the Williams amendment.

We do not violate any budget reconciliation restriction of any kind with the Williams amendment.

Mr. WILLIAMS of Montana. I thank the gentleman for his remarks.

Mr. YATES. Mr. Chairman, will the gentleman yield further?

Mr. WILLIAMS of Montana. I yield, yes.

Mr. YATES. We do violate a budget restriction, because this is over the budget. As the gentleman pointed out, we put $28 million over the budget into this bill to take care of the situation that should not have taken place in the first instance.

It is a ridiculous situation. There ought to be one agency handling both the construction of the housing and the sanitation facilities. I think perhaps the gentleman's committee ought to take care of that situation.

Mr. UDALL. Mr. Chairman, if the gentleman will yield further, we are going to work on it. We are willing to take care of the gentleman.

Mr. WILLIAMS of Montana. I hear that every year. We are going to work on one matter or another.

I yield to the gentleman from Arizona.

Mr. UDALL. I am not sure of my ground here, but my staff tells me that H.R. 4035 appropriates a total of $676 million, while the budget reconciliation caps the Indian Health Service at $725 million; so you could add this $15 million and still be well within the budget.

Mr. WILLIAMS of Montana. Reclaiming my time, Mr. Chairman, I was about to make the same point.

The IHS budget as it first came from the President was $634 million. The reconciliation bill was $726 million and the committee's bill is $676 million, considerably under the cap which I now understand has been removed.

The CHAIRMAN. The time of the gentleman from Montana (Mr. WILLIAMS) has again expired.

(By unanimous consent, Mr. WILLIAMS of Montana was allowed to proceed for 3 additional minutes.)

Mr. WILLIAMS of Montana. Mr. Chairman, let me make this point concerning the supposed uncertainty about how many homes are going to be standing vacant. We already know there are 500 homes right now and there are 500 because this problem continues year after year.

We already know from the Indian Health Service that there are going to be 1,000 homes complete and sitting vacant and not hooked up to sewer and water and not available to Indians who desperately need these homes by Christmas of this year.

They estimate—a rough estimate—that there will be 4,000 completed homes by the end of the coming fiscal year. That is the best estimate we can get.

I tell the chairman of the subcommittee that it is a relatively specific estimate as to the number of homes.

Now, are we going to wait for the supplemental? Well, No. 1, we do not know that the administration is going to ask for a supplemental of any kind. They did not request a supplemental for 1981.

Mr. YATES. Yes, they did.

Mr. WILLIAMS of Montana. They requested no moneys in this matter for 1982; so there is no certainty that they are going to ask for any money for this, particularly this administration.

Mr. YATES. Mr. Chairman, will the gentleman yield?

Mr. WILLIAMS of Montana. Yes, I yield.

Mr. YATES. I agree with the gentleman, the Reagan administration did not ask for money for these purposes; but the committee was aware of the problem and the committee did put money into the budget.

Let me point something out to the gentleman here. There are $676,223,000 in this bill for the Indian Health Service, of which $41 million is over the budget.

Now, the gentleman from Arizona combined apples and oranges. He talked about the Reagan budget and he also talked about the reconciliation. Those cannot be compared. We have to stick with the President's

budget until we know what the reconciliation is. We do know what those figures are. We will be below our 302 allocation in the budget bill.

I do not know what the reconciliation will be ultimately. The conference committees are working on that; But I do want the gentleman to know that if there is no supplemental appropriation bill, it will be the first time in I think 20 or 25 years that there has not been one. The chances are overwhelming that there will be such a bill. That is why I tell the gentleman that I reluctantly have to oppose his amendment at this time, knowing what the situation may be, but still knowing further that we do not know how much money to put into the bill for the purpose.

I think the gentleman's $15 million request is something he wants to put in the bank for the purpose and we say to the gentleman that the bank is the supplemental appropriations bill, when we know what the debt is.

The CHAIRMAN. The time of the gentleman from Montana (Mr. WILLIAMS) has again expired.

(By unanimous consent, Mr. WILLIAMS of Montana was allowed to proceed for 3 additional minutes.)

Mr. WILLIAMS of Montana. I thank the Chairman.

Of course, there will be a supplemental, almost certainly; but we are uncertain that the administration will offer to solve this particular appropriation problem in the supplemental and we are uncertain that the administration may not fight the addition of this money in a supplemental.

Knowing that, I think now is the time to strike. We know there are 500 homes sitting there. We know there are going to be a thousand more completed by Christmas.

I think now is the time to move; 30 percent of the money that I am asking for goes to Alaska. They need it by December 1, so that supplies can be delivered to Alaska by March 1, when the barge leaves. Unless this money is put in this bill now, there are going to be 688 units in Alaska that are fully constructed but without sanitation or water facilities.

Now, there are other States that are in somewhat similar situations. Obviously, we do not all miss the barge the way Alaska does; but there are other angles that other States have that affect the situation similarly to Alaska; so I think that we ought not to wait until the supplemental.

Let me conclude by saying this. To have at least 4,000 and perhaps 6,400 homes completed and sitting on Indian reservations and not being lived in because sanitation and water facilities cannot be hooked up is to give people 6,400 other reasons to say, "Look at what this Federal Government has done. They construct these homes and then they let them sit idle for 3 months or 6 months or 1 year with nobody allowed to live in them, despite the desperate conditions of Indians who want to move into them." They are going to point and have 6,400 reasons to say, "Look how uncoordinated this Government is."

Now, we can take care of this situation here and now for $15 million. We are talking about 1,600 homes in Arizona, 700 in Alaska, 300 in Nevada, 633 in Minnesota, and the list goes on.

By the way, in my State of Montana we have fewer of these homes than many other States, so this is not a particularly parochial amendment on my part.

Mr. BEREUTER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of the amendment offered by the gentleman from Montana (Mr. WILLIAMS) to H.R. 4035. While my State is not among the 26 States that will benefit from this amendment, this amendment certainly is a worthy one deserving of support.

The purpose of the amendment is to add $15.5 million for construction of the sanitation facilities necessary to complete some 6,300 homes which will be built on Indian reservations around the country during fiscal year 1982.

The need for this amendment has its origins in several actions affecting the funding of Indian housing construction, which is the product of the coordinated efforts of three agencies—HUD, the Bureau of Indian Affairs, and the Indian Health Service.

By way of background it should perhaps be explained that essential water and sewer facilities for Federal, State, and tribal housing projects for American Indians and Alaska Natives are provided by the Indian Health Service (IHS) in accordance with the Interdepartmental Agreement on Indian Housing among the Department of Housing and Urban Development (HUD), the Department of Interior (DOI), and the Department of Health and Human Services (HHS). This agreement was established by the Office of Management and Budget (OMB) because the Indian housing programs had been severely inhibited by a lack of water and sewer facilities. The HHS had the engineering, procurement, construction, and logistical support staff available at the local level to efficiently perform water and sewer construction, with the legislative authority of Public Law 96–121, the Indian Sanitation Facilities Act.

In H.R. 4035, the Appropriations Committee has recommended that $28,625,000 be provided for Indian sanitation facilities in fiscal year 1982; $20.5 million of this amount represents the balance of the 1981 supplemental request. The remainder is to provide only for planning and design of sanitation facilities for houses in the Indian housing production "pipeline." The problem is that more than 6,300 houses in that pipeline will be under construction in fiscal year 1982.

Unless additional funds are provided, most of these homes will be completed in 1982. Their onsite plumbing in most cases will also be completed, but they will not have water and sewer hookups. The water and sewer hookups will only have been planned.

The Indian Health Service has estimated that to provide water and sewer service to these 6,300 homes will cost $59 million. However, using a phase funding approach, IHS calculates that 40 percent of the $59 million, or $23.6 million, is actually needed in fiscal year 1982; $8.1 million of this amount is provided for in H.R. 4035; $15.5 million is the balance needed to fund the ongoing construction phase for water and sewer for the 6,300 Indian homes in fiscal year 1982. This is the amount the Williams amendment would provide.

While I do sympathize with the uncertainties that the committee faced on this program it is not right for the Indians and Alaska Natives to be penalized for lack of coordination at the Federal level. It is clear that unless additional funds are provided to construct water and sewer facilities for Indian homes being built under the HUD and BIA programs next year, thousands of these homes will be without water and sewer and thus be subject to the vandalism, rent loss, premature deterioration, and other problems that befall unoccupied housing. We have had too many of these problems in the past. For the Congress to knowingly permit such a situation to develop in these Federal programs whose beneficiaries are among the poorest housed in our Nation is unconscionable and irresponsible.

I would like to point out that approval of this amendment would not put the House over the amount authorized for the Indian Health Service by the Gramm-Latta budget. Gramm-Latta provided for $725.9 million for the Indian Health Service in fiscal year 1982. In H.R. 4035, the Appropriations Committee has provided just over $673 million. Thus, if the Williams amendment were adopted, the House would still be more than $35 million under the Gramm-Latta amount set for the Indian Health Service.

In conclusion, this amendment would make the funding of Indian housing sanitation facilities construction a little less haphazard and inefficient. It is a fiscally responsible amendment, and as the chairman of the Republican Interior Committee Task Force on Indian Affairs and in behalf of the Republican members of the House Interior Committee, I urge

my colleagues to support the Williams amendment.

Mr. Chairman, I yield back the balance of my time.

Mr. McDADE. Mr. Chairman, I move to strike the requisite number of words and rise in opposition to the amendment.

I shall not take my full 5 minutes. I think the issue has been explored quite thoroughly. The House ought to know that we are directly appropriating in this bill $1.8 billion in appropriations for our trust responsibilities for American Indians.

This is not a pernicious amendment or bad amendment. There is one thing wrong with it. It is going to bust the budget if we adopt it, and we have already, as the chairman had indicated, appropriated almost $30 million over the budget to try to cope with this problem which is, indeed, a difficult problem.

But the record ought to be clear that if we adopt this amendment we have busted the budget, the Reagan budget is busted, and we have eliminated any leverage we have in going over to the other body.

I hope the amendment will be defeated and I urge its defeat.

Mr. BEREUTER. Mr. Chairman, will the gentleman yield?

Mr. McDADE. I yield to the gentleman from Nebraska.

Mr. BEREUTER. I made the statement just a few moments ago that even with the additional $15.5 million to be added by the Williams amendment, if adopted, that the Gramm-Latta budget for the Indian Health Service would still be $35 million under that amount. Is that correct or incorrect?

Mr. McDADE. It is totally irrelevant. What did the President request for this program?

Mr. BEREUTER. I do not have the figure.

Mr. McDADE. I can tell the gentleman. It is zero. We are over the President's request by $28 million. May I say to my friend that we are still under the budget, but we have tried to help with this problem by adding $28 million that was not requested in the Indian Health Service. We are trying to get at the same problem the gentleman is, but we are trying to do it in a way that keeps us under the President's budget. We are $7 million under that budget. Reconciliation has not even occurred yet.

Mr. YATES. Mr. Chairman, will the gentleman yield to me?

Mr. McDADE. I yield to the gentleman from Illinois (Mr. YATES).

Mr. YATES. More than that, the chairman of the subcommittee has given his assurance that when the occasion arises we will take care of the problem. This is not the time. Neither the gentleman from Nebraska (Mr. BEREUTER) nor the gentleman from Montana (Mr. WILLIAMS) have given us a precise figure for appropriation. As I indicated in response to the gentleman from Montana before, he wants to put the money in the bank to comply with this. I do not think we should. We will handle it in a supplemental bill.

● Mr. MARKEY. Mr. Chairman, I rise to speak in support of the amendment offered by the gentleman from Montana, PAT WILLIAMS, that would provide $15.5 million to connect water and sewer pipelines to 6,400 Indian houses. Although none of these housing units are in Massachusetts I speak on behalf of this amendment because I believe American Indians suffer living conditions worse than those of any minority group in our Nation. It is estimated that 50 percent of Native Americans live in substandard housing.

But there is another reason to support this amendment as well. Congress appropriated funds for these dwellings 3 years ago, and all construction will be completed by the end of 1982. The majority of the houses are already finished. If funds are not appropriated for the sewer connections, these houses will remain empty and these funds will be wasted.

For reasons both of equity and economy, therefore, I urge you to support the gentleman's amendment.●

The CHAIRMAN. The question is on the amendment offered by the gentleman from Montana (Mr. WILLIAMS).

The question was taken; and on a division (demanded by Mr. WILLIAMS of Montana) there were—ayes 15, noes 19.

So the amendment was rejected.

Mr. WEAVER. Mr. Chairman, I offer several amendments, and I ask unanimous consent that they be considered en bloc.

The CHAIRMAN. Is there objection to the request of the gentleman from Oregon?

Mr. DICKS. Mr. Chairman, I object.

The CHAIRMAN. Objection is heard.

□ 1500

AMENDMENT OFFERED BY MR. STANGELAND

Mr. STANGELAND. Mr. Chairman, I offer an amendment.

The portion of the bill to which the amendment relates is as follows:

CONSTRUCTION AND LAND ACQUISITION

For necessary expenses of the Forest Service, not otherwise provided for, for construction and land acquisition, $509,743,000, to remain available until expended, of which $22,793,000 is for construction and acquisition of buildings and other facilities; and $486,950,000 is for construction of forest roads and trails by the Forest Service and construction and maintenance of forest roads by timber purchasers: *Provided*, That $78,700,000 available under the Act of March 4, 1913 (16 U.S.C. 501) shall be transferred to the General Fund of the Treasury of the United States.

The Clerk read as follows:

Amendment offered by Mr. STANGELAND: On page 32, line 11, strike out "$486,950,000" and insert in lieu thereof "$481,950,000".

On page 32, after line 16, insert the following:

WOOD RESIDUE UTILIZATION

For expenses necessary to carry out section 3 of the Wood Residue Utilization Act of 1980 (16 U.S.C. 1682), $5,000,000.

Mr. STANGELAND. Mr. Chairman and members of the committee, this is a very simple amendment that I think has some very real merit and one that this body ought to adopt to this bill at this time.

The amendment provides that $5 million would be made available for the establishment of wood residue utilization pilot projects. These have been authorized under the Wood Residue Utilization Act of 1980. The amendment requires no additional appropriations but instead removes the necessary funds from the Forest Service construction and land acquisition program's currently proposed budget of $486,950,000. This represents a shifting away of only one one-hundredth of the funds now earmarked for construction and land acquisition and, therefore, does not threaten the accomplishment of the important objectives of that portion of the Forest Service budget, that of building and maintaining roads and trails within our national forests.

This amendment recognizes that in order to meet our future energy needs, we cannot rely on any one energy source but instead must rely on a mix of several. Oil, coal, natural gas, and nuclear power all figure to play major roles in satisfying at least our short-term future energy demands. Wood residue also holds the capacity to play a significant part. Wood residue is logging slash, down timber material, woody plants and other tree matter in itself not normally considered useful.

The Forest Service estimates that there are 600 million dry tons of wood residue available for use annually. If given the chance, residue in this amount could supply 14 percent of our Nation's current energy demand and cut our oil import needs by one-half.

What is more, wood residues are available widely, unlike the other fuels that we currently depend on.

The appropriation proposed in this amendment would help to provide the necessary seed money to begin taking advantage of the vast energy potential wood residue offers. The Wood Residue Utilization Act of 1980 provides for several different wood residue applications.

Under section 3, one of the demonstration projects that could be funded through this amendment would help fit a gas-fired district heating plant with a wood gasifier, using wood and forest residue. Other applications could include the conversion of

schools and public facilities to wood-fired heating systems. All of this is documented in testimony by the Forest Service on section 3 of the act before the Agricultural Committee on March 11, 1980, and the days following.

Mr. Chairman, it is true that the budget submitted by the Forest Service does not now include appropriations for section 3 of the Wood Utilization Act or for any other part of the act. But that was only because the act did not become law until after the Forest Service budget was submitted for fiscal year 1982. And because the administration budget basically encompasses the Forest Service proposal, the Forest Service necessarily will be opposed to amendments offered at this time.

It is also true that the Biomass Division of the Department of Energy is authorized to fund wood residue utilization projects. But the type of project that the Biomass Division will consider does not include the projects of the type that I have just described. They will only fund projects embodying untested technologies. The projects contemplated by this amendment are no less valuable because the technology is in place and there is no other way that communities in their schools can start them up, in most cases, except through seed money of the type that my amendment contemplates.

The modest shift of funds that this amendment proposes represents a bargain too good to pass up. It will enable us to make important progress toward energy independence, and I would ask acceptance of this amendment.

I would like to quote from a March 3, 1981, GAO report dealing with the subject of wood residues.

Basically, the study by the GAO points out that at the present time forest management costs to take care of the residue problem run as high as $100 million annually. The GAO report says that utilization of these waste wood products in some form of energy conversion system would eliminate a portion of that $100 million cost. And it goes on to state:

> Overall, we believe that the Forest Service and DOE must begin to give greater attention and priority to wood residues in recognition of their vast potential for producing energy and products.

This is their suggestion.

Mr. WEAVER. Mr. Chairman, will the gentleman yield?

Mr. STANGELAND. I yield to the gentleman from Oregon.

Mr. WEAVER. I want to thank the gentleman from Minnesota and associate myself with his remarks. We are offering this amendment jointly, and I strongly support it. I was deeply grieved that the money was not put in here, and I appreciate the efforts of the gentleman from Minnesota. I will ask for my own time to speak on it.

Mr. AUCOIN. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. The time of the gentleman from Minnesota (Mr. STANGELAND) has expired.

(On request of Mr. AUCOIN and by unanimous consent, Mr. STANGELAND was allowed to proceed for 2 additional minutes.)

Mr. STANGELAND. I yield to the gentleman from Oregon.

Mr. AUCOIN. I appreciate the gentleman yielding to me, and I also sympathize with his amendment because I offered his amendment in the subcommittee. I was sorry it failed on a tie vote. This fact should show the gentleman that I have some sympathy for programs that can realistically and responsibly capture wood waste and convert it into an energy use.

But could the gentleman tell the House why he chose to take the funds for his amendment out of the Forest Service's roads program? Is there a reason why the gentleman would single out this program, for which I have worked very, very hard to try to achieve a responsible level of funding? I have great difficulty with the gentleman's amendment today because he takes funds out of a good program that is vital in the Northwest. So I ask the gentleman, why would he single out the Forest Service roads program, which is so important to my region and the rest of the country?

Mr. STANGELAND. Mr. Chairman, I would be more than happy to respond to the gentleman.

As I state, we are requesting $5 million out of a $486 million appropriation. It is apparent, to me at least, that the Forest Service would have, with that $481 million left, adequate funds for roads.

I would also like to point out that in this same bill, in the same appropriation bill, the Forest Service is returning to the U.S. Treasury through excess forest sales, timber sales, over and above the amount appropriated, $78 million. So the Forest Service has adequate funds.

Mr. AUCOIN. I disagree with the gentleman. The Forest Service does not have adequate funds. The level of funding in the forest roads program—the timber sales program—is a level providing a harvest of approximately 11.9 billion board feet of timber. That is the same level that we had last year. If the gentleman's amendment is accepted, the level would drop by 100 million board feet, and that is damaging.

The CHAIRMAN. The time of the gentleman from Minnesota (Mr. STANGELAND) has again expired.

(On request of Mr. DICKS and by unanimous consent, Mr. STANGELAND was allowed to proceed for 2 additional minutes.)

Mr. DICKS. Mr. Chairman, will the gentleman yield?

Mr. STANGELAND. I yield to the gentleman from Washington.

Mr. DICKS. I, too, sympathize with the gentleman's amendment and probably would support it if it were not going to result in a cutback, a substantial cutback, in the forest roads program.

In my view, we do not want to reduce the revenues coming into the Forest Service. And the quickest way to make sure that the Forest Service cannot carry out its program of sales is to cut off the absolutely essential road construction program.

I would urge the gentleman to reconsider. If he would change the amendment, I think I could support it. I supported that kind of an effort in the subcommittee. But when you take the money out of the road construction program you cut into 100 to 200 million feet of sales, which is desperately needed by smaller mills throughout this country for basic survival. I would urge the gentleman to reconsider. If he cannot, then I would have to oppose the gentleman's amendment.

□ 1510

Mr. STANGELAND. I appreciate the comments of the gentleman from Washington. It would seem to me that one one-hundredth of the appropriations is a very modest amount.

Mr. DICKS. That would be true except that the road construction program has been underfunded over the years and we are behind on the roads that are needed to be built to execute the sales plan.

I know it looks like a large amount of money but it does produce revenues. If you cut into it you are going to cut into the revenues and you are going to make it impossible for the Forest Service to execute its sales program.

Mr. WEAVER. Mr. Chairman, will the gentleman yield?

Mr. STANGELAND. I yield to the gentleman from Oregon (Mr. WEAVER).

Mr. WEAVER. I thank the gentleman for yielding.

I am astonished by the statement that the road program has been underfunded. It has been burgeoned by hundreds of millions of dollars over the last decade and it is now up to all-time highs, $84 million for maintenance alone, that is not even in this budget, in this figure.

Some places they are building 6 miles of road for every square mile of national forest.

The CHAIRMAN. The time of the gentleman from Minnesota (Mr. STANGELAND) has expired.

(At the request of Mr. WEAVER and by unanimous consent, Mr. STANGELAND was allowed to proceed for 2 additional minutes.)

Mr. WEAVER. If the gentleman will continue to yield, we are building a superhighway system in our national forests. What is even worse, what is worse, Mr. Chairman, is that when the gentleman says building roads is important to get money back into the Treasury, this is absolutely the opposite, because many of these sales are deficit sales.

The roads are so costly, so overengineered, go up into inaccessible areas, high mountain areas, ravines, that the road costs more than the timber. There are many deficit sales.

Actually by cutting back on the road budget we may be saving the Treasury money.

Mr. DICKS. Mr. Chairman, will the gentleman yield?

Mr. STANGELAND. I would much prefer that the debate on roads not enter into this. I think we are missing the point.

I yield to the gentleman from Washington.

Mr. DICKS. I thank the gentleman for yielding.

I would point out to Mr. WEAVER that his subcommittee has legislative jurisdiction over the Forest Service and over their road program and if he does not like the way they build roads, why does he not do something about it?

Mr. STANGELAND. I think we are missing a point here where we are appropriating $5 million, the potential for savings to the Forest Service of the need to clean up the residue and the waste timber could be substantial if we start a program of utilization of that slash and that down timber and private enterprise doing the cleaning up for the Forest Service.

I think in the long run, the Forest Service is going to be gainer on this type of program.

Mr. DICKS. If the gentleman is not successful, I want him to know we will try to support him next year in the committee.

Mr. MORRISON. Mr. Chairman, will the gentleman yield?

Mr. STANGELAND. I yield to the gentleman from Washington.

Mr. MORRISON. I thank the gentleman for yielding.

I would like to support the amendment proposed by the gentleman from Minnesota, however, I can cite examples of a shortage of road funds for the Forest Service in the area of Mount St. Helens, in which we have only 3 years to remove 3½ billion board feet of timber blown down by the volcano over 1 year ago. We have lost 2 or 3 precious months this year because we do not have adequate funds through existing Forest Service road appropriations, and I must oppose the reduction embodied in this amendment.

Mr. AuCOIN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise to oppose the amendment. I hope that my colleagues would not rush to a judgment on this question and somehow ignore where the gentleman from Minnesota gets the funds to fund what I consider in the abstract to be a worthy program.

We have to link these two issues together because the gentleman is cutting a very vital program, the timber sales program, the forest roads program, which we need in order to assure a steady, supply of timber into the marketplace for the consumer in the construction of housing.

I hope my colleagues will recognize we cannot simply deal with one side of this question. The other side is equally important and it will be devastating not only to the Pacific Northwest and other timber-producing regions of the country but to housing consumers who will find the cost of housing going up if we reduce substantially further the timber sales level proposed in this bill.

Now I must say that my friend from Oregon surprises me. Of course, he has surprised me in the past, and I am sure he will surprise me in the future, but he surprises me today when he stands before the Members and states that we are building superfreeways in the national forests.

The gentleman ought to know that if this amendment passes we will have brought the level of funding for timber sales and forest roads down to the lowest level since fiscal year 1977. The consumer is going to catch it in the neck in economic costs that will be caused as a consequence of such an amendment.

I do not understand how my friend from Oregon can rationalize that fact.

I cannot understand why my friend from Oregon, who is the chairman of the authorization subcommittee, fails to see what is happening in the bidding practices on the national forests.

I would like to share this information with my colleagues. Mills and timber buyers bidding on national forest timber are bidding on a panic basis because of fear that they are not going to be able to acquire adequate amounts to stay alive.

Do my colleagues know what that means? It means panic bidding which is driving up the price of stumpage to record levels. Who do the Members think ultimately pays for that? The American consumer pays for that, not just people in the Pacific Northwest, but people from Minnesota who are going to be buying housing because the studs and other wood products that go into the construction of that house are going to cost infinitely more if we allow this panic bidding to continue.

Panic bidding for Federal timber will continue if we do not allow a basic funding level for timber sales and forest roads.

Let me share with my colleagues what has happened since the year 1970 on bidding on national forest timber.

In 1970, prices were $37 a thousand. But because of uncertainties about future timber supply, because of underfunding of the forest roads, bid prices have risen by almost 200 percent in the last 9 years. Some sales are going for $700 a thousand compared to $37 a thousand 9 years ago.

Now, of course, it is necessary to capture wood waste lying on the forest floor and convert it to energy use, and I will support that as I supported it in the subcommittee. I offered a similar amendment in the subcommittee and I only wish the gentleman from Minnesota would separate the question today, because Members do not have to be forced into this kind of choice. We do not have to say we have to decimate the timber sales program in order to have this program.

I just think we have got the wrong linkage of issues here and I would urge my colleagues who care as I do about wood utilization to defeat this amendment, as much as it pains me to say so to my friend from Minnesota. We should defeat it because of damage it would cause to consumers across the United States who want housing.

Mr. REGULA. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, this amendment has been thoroughly discussed. I simply would point out that the budget presently does have funds for this purpose although not specifically earmarked as such. We have confidence in the Forest Service management, that they will dispose of the slash in the most effective possible way, and I do not think it is necessary to earmark funds for this particular purpose.

As a matter of fact, in many of the national forests they have made them available to the public, and we find citizens going in on the weekends with trailers and taking the waste material out. I think this is a good way for the people to become acquainted with the national forests. It is good recreation and provides them with wood, and I do not believe it is necessary to earmark money to drag this out to the road so that it can be conveniently secured by those who want to use this energy material.

The Forest Service is doing an excellent job of handling it and this amendment just simply is not necessary.

But further, I would agree with the remarks of the previous speakers that we do not want to tamper with the road fund. It is probably too low as it is and in order to have timber sales we need access to the mature trees we are losing.

Mount St. Helens is probably the worst case. We are losing mature trees in other parts of the national forests. As with every crop there is a time to

harvest. The gentleman from Minnesota would appreciate that fact. There is a time to harvest, therefore, you need roads that we can get to trees otherwise they blow down and rot and are lost to the consumers of America.

Mr. STANGELAND. Mr. Chairman will the gentleman yield?

Mr. REGULA. I yield to the gentleman from Minnesota.

Mr. STANGELAND. I thank the gentleman for yielding.

I would like to point out that while the Forest Service has said they are going to utilize approximately these amounts of dollars for clearing and cleaning up, we are not going to get pilot projects underway to utilize the amount of downfall and slash that we have by people going in and harvesting their firewood. It is just not going to be done. That is using a thimble to drain the ocean.

It just does not work that way. This is seed money to encourage the utilization of timber and waste wood products in a fashion that is going to provide a prime source of energy. There is a tremendous amount of benefit and good to this program, and I think this program is meritorious enough that the road program and the program for acquisition can sacrifice one one-hundredth of their appropriation.

□ 1530

Mr. DICKS. Mr. Chairman, will the gentleman yield?

Mr. REGULA. I yield to the gentleman from Washington.

Mr. DICKS. I want to commend the gentleman from Ohio for reminding us of one very important factor. At any one time on our national forest system there is 1 billion board feet of salvage timber, either blown down or diseased, that could be taken off that system and used effectively if we had an appropriate road structure. By standing in the way of getting the kind of road structure we need, we stand in the way of salvaging that timber and being able to utilize it, keeping prices down and helping the consumer. So the gentleman's point is very well taken.

Mr. REGULA. I thank the gentleman.

One last comment. I have visited a number of our national forests and have a great interest in them. I think it is one of the very well managed functions of the Federal Government. I have confidence that the programs, with the funding that we have already provided, will be adequate to meet this need and that we should not adopt an amendment that earmarks funds for this purpose particularly if it means taking it out of the road funds.

I yield back the balance of my time.

Mr. WEAVER. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, I want to say I appreciate the remarks of my friends and colleagues who have said that I was the chairman of the authorizing subcommittee and why do I not act? Indeed, I did. For 3 years I fought a lonely fight pushing this bill through. I authored, sponsored, managed, and carried the Wood Residue Utilization Act through the Congress. With the help of my dear friends and colleagues, we enacted this bill. So I did my job exactly as I should as chairman of the authorizing subcommittee.

But when it came to the Appropriations Committee, they refused to fund it. What good is the Wood Utilization Act if it is not funded? This is a very important piece of legislation—why do we not fund it?

I tell my dear friend, the gentleman from Ohio (Mr. REGULA), who says that the Forest Service is doing an excellent job of disposing of this wood waste, does the gentleman know what they do? I have the most national forests in my district of any district in the country; 20 percent of the standing national forest timber in the country, in my district; five of the great national forests. Does the gentleman know what they do with the wood slash from timber harvests? They burn it. They pay people to rake it up. It is as much as 6 inches in diameter. They put it in piles called pum piles and then they pay people to burn it.

What happens in the burning time? The skies of Oregon, the air, sometimes you cannot even see across the street in the cities because of all this wood waste that the Forest Service is burning.

If the gentleman calls that an excellent way to manage, I have to ask the gentleman this: I have lumber mills now producing electricity with this wood waste at one-third the cost of the nuclear plants they are building. One-third cheaper. Yet we are burning in our national forests of Oregon enough energy every year to heat three-fourths of the homes and buildings in Oregon. That is just Oregon. That is an excellent job?

I have hundreds of gypo loggers who go to the local ranger or their local BLM Director and beg them to allow them to go up and get the slash piles that they are burning to rescue the wood and bring it out. They refuse. They refuse to do it. I can cite the gentleman literally dozens and dozens of instances because they call me up. They call me at 4 in the morning. That, or earlier, is when loggers get up. They say, "The local ranger is going to burn those huge piles out there today. I can make money on them. I can get energy out of them." They will not do it. That is an excellent way? Oh, no, I say to my friend, the gentleman from Ohio, whom I hear constantly saying things that are wise and good and I agree with the gentleman most of the time. No; this is not an excellent way.

Mr. REGULA. Mr. Chairman, will the gentleman yield?

Mr. WEAVER. I yield to the gentleman from Ohio.

Mr. REGULA. I think the gentleman fully understands the reason that in some instances they have to clear-cut, because if one is going to have to have sustained yield and if the new reforestation planning is to flourish, it has to be done in an environment that is clear of other brush and other waste.

As the gentleman well appreciates—perhaps more than I—these projects are let on a bid basis. Therefore, if this slash had the value that the gentleman alludes to, the company that bid on the timber originally would have a subcontract with all these 4 a.m. loggers to come in and get that slash, because it would reduce their costs.

Mr. WEAVER. I say to my dear friend, the gentleman from Ohio (Mr. REGULA), that the companies have insurance policies, and when these gypo loggers go to them they say our insurance men would not allow them on that site. We cannot do it. I have gone to the Forest Service and asked them to please write into the contract so the gypo logger could go in and do it, but no. All they want is the green timber, get it out, and the slash goes to waste.

Mr. REGULA. Mr. Chairman, will the gentleman yield further?

Mr. WEAVER. I yield to the gentleman from Ohio.

Mr. REGULA. Mr. Chairman, economics would cover this situation.

The CHAIRMAN. The time of the gentleman from Oregon (Mr. WEAVER) has expired.

(By unanimous consent, Mr. WEAVER was allowed to proceed for 5 additional minutes.)

Mr. REGULA. Mr. Chairman, will the gentleman yield?

Mr. WEAVER. I yield to the gentleman from Ohio.

Mr. REGULA. Mr. Chairman, once the logger has taken out the saw timber, there would be no problem, no liability if—as the gentleman from Oregon is using the term—the "gypo logger" would go in and follow up and gather the slash. As the gentleman knows, the Forest Service does in many instances allow the public to go in and gather up this slash.

Mr. WEAVER. I say to the gentleman this is the very point of this bill. The big lumber companies do not think it is commercially feasible. I have held hearing after hearing after hearing in which they appeared and said, "We cannot take that out; it is not commercially feasible."

That is why I introduced this Wood Utilization Act, so the Forest Service can go out with demonstration projects to determine whether or not it is commercially feasible.

Then I say to my dear friend, my beloved colleague, the gentleman from Oregon (Mr. AuCoin), who got up on the floor and talked about panic bidding because somehow or other there were no roads to build into the forests, the roads have nothing to do with it. Region 6, our region in the Northwest, is cut to the maximum of the allowable cut in every year in the last 20 years; and I have testimony from probably a dozen different hearings from the Chief of the Forest Service and the Assistant Secretary and the region 6 administrator to this effect; but what causes the panic bidding is the fact that there are foreign buyers in our market, in our private timber market, that bid the price up. We all know that. We all know that the 2 billion to 3 billion board feet that go out of the Northwest a year and the bidding on that is what causes the prices of the timber to go up, not the fact that we have roads or not.

We have plenty of roads. The roads have never stopped a board foot from being cut in the Northwest. The panic bidding has been from log exports and the diminishing supply of private timber in the Northwest. This is the reason for panic bidding. I just wanted to set the record straight on this.

So, therefore, the log exports—and I will be offering an amendment on log exports, and I assume my friends will support me on my log export amendment because that does cause the cost of housing to go up; that does cause the price of the stumpage to go up, and that does put our people out of work.

Mr. Chairman, let me speak briefly on why it is necessary to get this wood out. We do have one development down in Honey Lake, Calif., where they are going to start producing electricity from wood waste.

□ 1540

It is this very kind of project that we must demonstrate and put into practice, because we could create energy immediately. We could put 1,000 people to work in the Northwest within the next 6 months if we used our wood waste. We do not have to wait 10 years for a synfuels plant or wait 10 years for a nuclear plant. We have heavy unemployment in the Northwest—it is now 30 percent in many areas of my district—and we could put these people to work making energy at one-half the cost of foreign oil and one-third the cost of nuclear power from plants being built today. It would cost much less than the money we funded early on here for synfuels.

Mr. Chairman, here is a chance to get cheap energy and put people to work, and we would not have to wait 10 years, not even a year. We can put people to work immediately, but we need this project funded to prove to the industry that it is commercially feasible.

Mr. REGULA. Mr. Chairman, will the gentleman yield?

Mr. WEAVER. I yield to the gentleman from Ohio.

Mr. REGULA. Mr. Chairman, I thank the gentleman for yielding.

I would like to read from the hearing record. This is Mr. Regula, questioning Mr. Peterson, who is the Director of the Forest Service:

Has this phenomenon of people wanting firewood had much impact on going in and cleaning out the areas?

Mr. Peterson. Yes. In fact, we have a couple of regions, that apparently moved more material last year in firewood than they did in regular sales. We had over 972,000 free firewood permits last year that removed about 2 billion board feet.

This is the slash the gentleman from Oregon is talking about.

And the witness goes on to say this:

Mr. Peterson. That is big business. In some places the demand is such that we probably are going to move into some kind of a charge system for the firewood, a nominal charge.

So here we have the Director of the Forest Service in our hearings saying that we have 972,000 permits, and people want the slash. They are gathering it, and there is no need for the approach provided in the amendment of the gentleman from Minnesota.

Mr. WEAVER. Mr. Chairman, let me say to my friend that I never said that. I agree with the gentleman that the firewood program is a great program. I never at any time made an allusion, even the slightest allusion, to the firewood program. That is sacred to me.

The CHAIRMAN. The time of the gentleman from Oregon (Mr. Weaver) has expired.

(By unanimous consent, Mr. Weaver was allowed to proceed for 30 additional seconds.)

Mr. WEAVER. Mr. Chairman, let me repeat the firewood program is great. Even with it, we still burn and waste in our forests 6 million tons of wood a year in Oregon alone.

Mr. DICKS. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I just want to point out several things here on behalf of myself and my colleague, the gentleman from Oregon (Mr. AuCoin).

Of course, we are not in region 6 cutting anywhere near the sustained yield. That is one point we want to make.

Second, I want to point out that there is an implication in terms of the small timber companies in our area. If this amendment were approved, the one that has been endorsed by my colleague, the gentleman from Oregon (Mr. Weaver), between 100 million and 200 million board feet of timber would not be available to those people who are dependent on the Federal forest lands for their livelihood. That troubles me, because when we talk about other issues, they do not even reach the dimension of this cut and what it would do in making timber available to the small timber owners in the Pacific Northwest.

So there is no free lunch here. When we cut off roads, we cut off sales. My friend, the gentleman from Oregon, knows that, but he did not seem to be willing to express that point in his discussion of concerns about the level of sales and the availability of timber in the Pacific Northwest. We just want that to be clear in the record.

Beyond that, I would say to my friend, the gentleman from Minnesota, that I do share his concern. I supported the amendment in committee. I only wish that he would revise his amendment to take care of the wood utilization but not penalize the road program, the sales program, and the small firms all over this country that are dependent on forest services.

Mr. WEAVER. Mr. Chairman, will the gentleman yield?

Mr. DICKS. Mr. Chairman, I yield back the balance of my time.

Mr. YATES. Mr. Chairman, I move to strike the last word, and I rise in opposition to the amendment.

Mr. Chairman, I ask unanimous consent that all time on this amendment and all amendments thereto expire in 5 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. YATES. Mr. Chairman, this amendment has been thoroughly discussed already. The gentlemen from the Northwest who have gathered about this amendment have brought us all the facts in connection with it.

The information we have is that the road program is necessary in order to carry out the projected timber cuts not only for this year but for the next year, and that the gentleman's amendment would result in a large economic loss.

For that reason, Mr. Chairman, I urge defeat of the amendment, and I yield back the balance of my time.

The CHAIRMAN. All time for debate on this amendment having expired, the question is on the amendment offered by the gentleman from Minnesota (Mr. Stangeland).

The amendment was rejected.

AMENDMENT OFFERED BY MR. GLICKMAN

Mr. GLICKMAN. Mr. Chairman, I offer an amendment.

The portion of the bill to which the amendment relates is as follows:

FRANKLIN DELANO ROOSEVELT MEMORIAL COMMISSION

SALARIES AND EXPENSES

For necessary expenses of the Franklin Delano Roosevelt Memorial Commission, established by the Act of August 11, 1955 (69 Stat. 694), as amended by Public Law 92-332

(86 Stat. 401), $30,000, to remain available for obligation until September 30, 1983.

The Clerk read as follows:

Amendment offered by Mr. GLICKMAN: On page 51, strike lines 8 through 14.

Mr. GLICKMAN. Mr. Chairman, in the total scope of things in America, this is probably not going to make us or break us. What the amendment does is strike the $30,000 for the Franklin Delano Roosevelt Memorial Commission that is appropriated in this bill.

I hope I have some integrity in this process, because I raised the same amendment last year. I have talked to the subcommittee chairman about it, and I have talked to the ranking minority member, the gentleman from Pennsylvania (Mr. MCDADE), about it.

I would make the following points that I think are relevant: This Commission was authorized in 1955, 26 years ago, to come up with an idea to have a memorial for our beloved former President, Franklin Roosevelt. Through fiscal year 1981, or over a quarter of a century, $510,000 has been appropriated for this Commission. The funds included in this bill are $30,000.

There have been four design proposals from this Commission which has been in existence 26 years that have been submitted to the Congress. The first one, in 1962, was rejected; the second one, in 1966, was rejected; the third one, in 1970, was never fully pursued; and the fourth proposal, in 1978, is currently pending. There are resolutions introduced in both Houses of Congress authorizing this. The latest memorial is estimated to cost in excess of $20 million.

The Commission has been in existence over 25 years. It has come up with four proposals. The Commission has cost the taxpayers a half million dollars trying to come up with a memorial. Actually Mr. Roosevelt did not want a memorial, although I happen to think that if it could be built, it could be a nice tribute to him.

I would state to my colleagues that one of my staff went out and took this picture which has been in front of the Archives Building, and I want to read what it says. It says:

In September of 1941, President Franklin Delano Roosevelt called his friend on the Supreme Court, Justice Frankfurter, to the White House and asked the Justice to remember his wish.

He then expressed this:

If any memorial is erected to me, I know exactly what I want it to be. I should like it to consist of a block about the size of this (putting his hand on his desk) and placed in the center of that green plot in front of the Archives Building. I don't care what it is made of, whether limestone or granite or whatnot, but I want it plain without any ornamentation but the simple carving, "In memory of——."

And he left a blank for his name.

This block of granite now exists in front of the Archives. Underneath it says: "The living associates of the President on April 12, 1965, the 20th anniversary of his death, fulfilled his wish by providing and dedicating this modest memorial."

Now, I suppose that one can argue pro or con against the memorial. A very lovely memorial has been proposed by the Commission. It is contained in a beautifully decorated book called "The Franklin Delano Roosevelt Memorial," and it has been submitted to Congress.

This Commission has been in existence 26 years at a cost of $40,000 or $50,000 a year. I believe it has been the longest Commission with that single purpose orientation that has ever been in existence in the Government of the United States.

As for myself, I think that the real, significant memorial to Franklin Delano Roosevelt ought to be the social security system, or the minimum wage, or the public works programs, or the shelter belts that have prevented soil erosion, or the highway system, or the thousand other things he did to make America great. Perhaps some of the funds for the Commission's operations, and the memorial itself, could be used to fund some of the programs he initiated, and which the current administration is trying to eliminate. But even if we build a permanent memorial, which may be a wonderful thing to do, the Commission can still complete its work by September 30, 1981.

Let us end this little bit of nonsense which is costing the taxpayers $30,000 to $50,000 per year. We have had four proposals, and the proposals can go to the Interior Department now.

We can make a decision in this Congress whether to authorize a memorial to President Roosevelt or not. It is not necessary that we fund this additional $30,000, which expenditures for a Commission has been written up in every conceivable example of public waste that we can imagine.

Mr. Chairman, I would urge my colleagues to vote for this amendment. I think that we can justify a memorial to a great President, but this Commission was proposed in Public Law 84-372 in 1955, and it has been funded every single year for 26 years. We have had for 26 years an office and a staff person there and a Commission to decide on the kind of a memorial we should build for this President.

□ 1550

I just think it is $30,000 that is being frittered away. We can go ahead with the memorial if we want to. The Commission will have until September 30, 1981. They have another 60 days to come up with the proposal. After that the Interior Department and this Congress can decide upon it.

So I would urge adoption of the small but simple memorial.

I might add that somebody called my office and said, "Are you proposing this because you are from Kansas and Alf Landon ran against Mr. Roosevelt?"

I said, "Of course not; that is all the more reason for me to support it, because I am the only federally elected Democrat representing the State of Kansas in Washington."

The other thing is that I have communicated with some members of the Roosevelt family, and they themselves have indicated that they think that the current memorials, the block stone, the F. D. R. Library at Hyde Park, and the plans underway for the 100-year celebration of Mr. Roosevelts' birthday are sufficient.

The CHAIRMAN. The time of the gentleman from Kansas (Mr. GLICKMAN) has expired.

(By unanimous consent, Mr. GLICKMAN was allowed to proceed for 1 additional minute.)

Mr. GLICKMAN. In addition, the plans underway for celebration of the centennial of his birth, and funds were included in the fiscal year 1981 supplemental appropriations bill, are sufficient for honoring the greatest American President certainly in this century; so I would urge if you want to go ahead and build a memorial, fine; but let us not appropriate this $30,000 for a Commission which is clearly not needed.

Mr. YATES. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I ask unanimous consent that all time on this amendment and all amendments thereto expire in 10 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. YATES. Mr. Chairman, much of what the gentleman has said is true. There is no question about the fact that the Commission has been in existence for a long time. It has proposed numerous memorials in honor of the late President and in each instance their suggestions have been rebuffed.

The fact that no memorial has yet been agreed upon does not mean that no memorial should be agreed upon. I think the killing of this Commission will result in the destruction of every attempt to try to provide a worthy memorial for the late great President.

So I am moved to tell the gentleman that I oppose his amendment, I think the Commission ought to be given 1 more year, with the direction to come up with some tangible, acceptable proposal within the next fiscal year. If they are not going to do that within the next year, I think we ought to

listen to an amendment like the gentleman's at that time.

I continue to oppose the amendment.

The CHAIRMAN. The chair recognizes the gentleman from California (Mr. DANNEMEYER).

Mr. DANNEMEYER. Mr. Chairman, I rise in support of the amendment offered by the gentleman from Kansas (Mr. GLICKMAN) which would, if adopted, delete the $30,000 appropriation for the Franklin Delano Roosevelt Memorial Commission contained in the pending bill, H.R. 4035.

The F. D. R. Memorial Commission was established by Congress pursuant to Public Law 372 on August 11, 1955, "for the purpose of considering and formulating plans for the design, construction, and location of a permanent memorial to Franklin Delano Roosevelt in the city of Washington, or in its immediate environs." Furthermore, the resolution creating the Commission charged it to complete its work "at the earliest practicable date." Twenty-six years and over $500,000 later, a memorial has yet to be built. On its fourth try, the Commission was able to produce a design acceptable to the Fine Arts Commission in March of 1978. Accordingly, the original purpose of the F. D. R. Memorial Commission—that of "formulating plans" had been achieved as of March of 1978. As the gentleman from Kansas (Mr. GLICKMAN) has pointed out, since 1978 the ball has been in our court here on Capitol Hill. It is now up to Congress to authorize the construction of the memorial. In fact, resolutions are pending before the House and Senate to do just that—House Joint Resolution 196 and Senate Joint Resolution 95. Therefore, deleting the funding for the F. D. R. Memorial Commission does not prejudice a future decision on the construction of the memorial itself.

U.S. News & World Report carried an item in its issue of March 30, 1981, appropriately headlined "The F. D. R. Memorial Commission—$500,000 of Wheel Spinning." The magazine referred to the Commission as an agency that "sputters along—a one-person agency tucked away on Capitol Hill and largely forgotten."

In his widely read book, "Fat City (How Washington Wastes Your Taxes)" author Donald Lambro writes that F. D. R.'s son, James, once told the Commission that the family did not like the then-pending plans for a memorial in the early 1960's. Further, Lambro writes, "Roosevelt (referring to F. D. R. son James) also told the Commission that if it could not reach agreement by 1965, it should be disbanded."

I should also point out for the benefit of the House that the adoption of the gentleman's amendment would only remove the Federal appropriation. The authority for the Commission itself would remain in law, pursuant to Public Law 372. In addition, I note that the enabling resolution specifically authorizes the Commission, in section (2), subsection (b)—

> To accept gifts to be used in carrying out the provisions of this joint resolution or to be used in connection with the construction or other expenses of such Memorial.

Despite this authority for partial or total private funding via gifts, the lone employee of the F. D. R. Memorial Commission informed my office that the Commission has never accepted any gifts. I would suggest that $30,000 is not an unreasonable sum to raise should there be a reason to continue the Commission, even though its original purpose has been achieved. Furthermore, private gifts can and should be encouraged to finance all or part of the monument itself, should Congress ever make the decision to authorize construction.

The adoption of the pending amendment, and the deletion of the appropriation the amendment would achieve, would not remove all Federal support for F. D. R.-related activities. One can actually make the argument that other memorials to F. D. R. already exist. The Federal Government supports the F. D. R. Library in Hyde Park, N.Y. I believe the gentleman from Kansas (Mr. GLICKMAN) has a picture of the small stone structure near the National Archives here in Washington where the story is retold of F. D. R.'s instruction to Justice Frankfurter on F. D. R.'s preference for a small stone marker. I am informed that the fiscal year 1981 Supplemental Appropriations Act included funds for an appropriate celebration of the centennial of F. D. R.'s birth. Finally, the "Little White House" in Warm Springs, Ga., where F. D. R. was treated for polio, was designated as a national historic landmark by the Department of the Interior. The site is now a rehabilitation institute.

While the $30,000 appropriated in H.R. 4035 is very small, adoption of the amendment embodies an important principle. In a period of budget austerity, it is incongruous for us to allow this Commission to continue. We must eliminate unnecessary Government-financed agencies, boards, and commissions if we are to get a handle on Federal spending. This is a clear case of an agency trying to stay alive after its mission is over.

For all of the foregoing reasons, I urge the House to adopt the amendment offered by the gentleman from Kansas (Mr. GLICKMAN).

The CHAIRMAN. The Chair recognizes the gentleman from New York (Mr. FISH).

Mr. FISH. Mr. Chairman, I rise in opposition to the amendment to strike the appropriation for the Franklin Delano Roosevelt Memorial Commission.

As a commissioner, I have been involved for many years in the plans for a memorial for Franklin Delano Roosevelt. I do not think that any Member of this body can argue that the only man to be elected President four times does not deserve a lasting, permanent memorial here in Washington.

Plans for the memorial have been submitted since 1955, and the current plan holds the most promise for approval by the Congress. This plan has the support of the Commission on Fine Arts, in a letter dated October 10, 1979, as well as the National Capital Planning Commission and the National Park Service. Since the approval of the design, the Commission has been working within its limited means to convince the Congress to fulfill its statutory duty to authorize the construction to proceed. To cut off the Commission at this time would mean that new authorizing legislation for another group or agency to proceed with construction would have to be passed. We do not need more legislation on this matter: Only the approval of the Congress of the design being offered by the Commission.

I believe the House would be acting irresponsibly if it eliminated the Commission at this time. The climate appears more favorable now than at any time in the past to approve construction of the memorial. Next year marks the 100th anniversary of the birth of President Roosevelt. It took just as long to build a memorial to President Washington.

The current design would cost $23 million, half of the original 1978 proposal, to construct a memorial of bronze statues and gardens near the Tidal Basin. It would be in a park setting, encouraging visitors to participate in and experience many of the achievements of President Roosevelt.

There are two misleading reports regarding the Commission's plans for the memorial. First, U.S. News & World report claimed in a recent article that an acceptable memorial has yet to be designed. This is absolutely false, as indicated by the approval of the Fine Arts Commission and other responsible planning organizations in the District of Columbia. On May 30, 1978, the Commission reported its memorial design to Congress. The Commission's design, approved only 3 years ago and subsequently scaled down, needs only congressional approval. Without an opportunity to review the blueprints and the historically acceptable setting for the memorial, there can be no determinations as to the final disposition of the plans.

There have also been indications that James Roosevelt, the late President's son, did not approve the design

and wanted the Commission eliminated. This may be valid if we are discussing the 1962 design and Mr. Roosevelt's comment that a new design should be approved by 1965 or the Commission should end its work. But 15 years later, which is obviously more relevant, Mr. Roosevelt has approved the 1978 design and has not indicated his desire to eliminate the Commission. Further, only the Commission is authorized by law to plan for a memorial. We can respect the wishes of the Roosevelt family, but this does not determine the disposition of the Commission's work.

I have introduced legislation, House Joint Resolution 196, along with two other Commission members, Mr. Green and Mr. Howard, to authorize the construction of the F. D. R. memorial. The Committee on House Administration is planning to hold hearings on the resolution in September, and the Senate Rules Committee has scheduled a hearing on Senate Joint Resolution 95, a companion to our resolution, on October 15.

The memorial to President Roosevelt cannot be completed without the Commission's involvement and the cooperation of the Secretary of the Interior, as expressed in Public Law 94-332. We should not be misled that the Interior Department can alone construct a memorial. The authorizing legislation passed by Congress in 1955 and amended in 1972 would again have to be revised, or new legislation would have to be passed in order to change the current method of constructing the memorial.

The Memorial Commission members agree that a memorial should be constructed. I also agree that the Commission's work should come to an end. But we can only do this properly by approving the design and construction of the memorial and fulfilling the Commission's statutory mandate.

I urge a vote against the amendment.

The CHAIRMAN. The Chair recognizes the gentleman from New York (Mr. GREEN).

Mr. GREEN. Mr. Chairman, like my colleague, the gentleman from New York (Mr. FISH), I, too, am a member of the F. D. R. Memorial Commission.

I think the gentleman has explained well what the status of the Commission's work is, why it does have work left to do, and that the real stumbling block at this moment is the Congress of the United States, rather than the Commission.

I would simply like to make one point which has already been alluded to by the gentleman from Kansas. Next year will be the centennial of Franklin Roosevelt's birth. It is my hope and I think it is a sentiment shared by other members of the Commission that that event, by focusing attention on the life of President Franklin Roosevelt, will finally cause all the things that are needed to gel, so that a suitable monument may be erected.

The CHAIRMAN. The Chair recognizes the gentleman from Georgia (Mr. GINN).

Mr. GINN. Mr. Chairman, I am sorely tempted to vote for the amendment, but my better judgment tells me that we should give the F. D. R. Commission another year to come forward with a recommendation.

Now, the Commission has made several recommendations. Unfortunately, they have been very expensive.

I would urge the Commission if it is to be continued to consider a living memorial for Franklin Delano Roosevelt at Warm Springs, Ga., an institution which he founded and which has helped thousands of Americans who suffered from polio. I am one of those. I think a memorial to F. D. R. should be people oriented. It should be a living memorial.

I would hope if the Commission continues to exist that they would seriously consider a living memorial at Warm Springs, Ga.

Mr. ZEFERETTI. Mr. Chairman, I rise in opposition to the amendment.

Over the years, proposals to honor President Franklin Roosevelt have been discussed, blueprints have been studied, and memorials have been proposed—all of which have, to date, proven fruitless. The Federal Government's failure to construct a proper shrine to this great leader is marked by bureaucratic inefficiency on the part of the Federal Government, not the F. D. R. Memorial Commission.

We now have the vehicle with which to put those frustrations behind us. Each of the various agencies of Government have finally approved the design of the Commission's proposed memorial and only congressional approval is lacking. Some Members argue that the appropriation of funds for continuing the work of the Commission is inappropriate at a time when we are making every effort to curtail Federal spending.

But this relatively small sum of $30,000, a 25-percent decrease from the original request, is a small price to pay for the preservation and memorialization of American history. Five hundred thousand dollars has already been spent in studying, planning, and designing the proposed memorial, money that will be wasted unless we appropriate this additional small expenditure to bring an end to the Commission's work, to bring an end to the final chapter in this long and arduous process.

Franklin Delano Roosevelt is one of the most significant world figures of the century. He was our leader during the greatest military conflict in history, the architect of numerous social programs so vital to the health and well-being of the American people, and a man of uncommon courage in overcoming his own physical handicaps to lead us through those troubled times.

Paying for the cost of a proper and dignified tribute to this great American President is the responsibility of the Federal Government. Congress should be willing to accept the fact that the F. D. R. Memorial Commission is a vital cog in our effort to erect a suitable shrine to Franklin Delano Roosevelt. The major portion of its work has been completed. We should now appropriate the funds necessary to keep the Commission in operation and at least give it the opportunity to finish its work.

The CHAIRMAN, The question is on the amendment offered by the gentleman from Kansas (Mr. GLICKMAN).

The question was taken; and the Chairman being in doubt, the committee divided, and there were—ayes 19, noes 19.

The CHAIRMAN. The amendment is rejected.

RECORDED VOTE

Mr. DANNEMEYER. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

□ 1600

ANNOUNCEMENT BY THE CHAIRMAN

The CHAIRMAN. The Chair notes that the voting machine is not functioning properly. Therefore the Chair will terminate this electronic vote and will commence a rollcall de novo.

I do wish to announce for the information of the Members, to the extent Members have already been recorded, those votes will be counted. However, to insure everyone has a chance to vote, the Clerk will be instructed to call the roll in the normal manner, de novo.

The Clerk will call the roll.

The CHAIRMAN. The Clerk will call the names of those Members who failed to answer on the first call.

Before he commences, the Chair will announce that the Clerk is trying to retrieve the list of those Members who voted by electronic device before the time that the machine failed to function, and in the event it is possible to retrieve that, those Members who are so recorded will later be added to the rollcall. However, the Chair admonishes all Members to be sure that they are on the rollcall and, for that purpose, the Clerk will now call the names of those who did not respond on the first time through the rollcall.

The question was taken; and there were—ayes 201, noes 216, not voting 16, as follows:

[Roll No. 152]

□ 1640

Messrs. DICKS, LOWRY of Washington, and D'AMOURS, Mrs. BOUQUARD, and Mr. ECKART changed their votes from "aye" to "no."

Mr. RHODES changed his vote from "no" to "aye."

So the amendment was rejected.

The result of the vote was announced as above recorded.

□ 1650

ANNOUNCEMENT BY THE CHAIRMAN

The CHAIRMAN. The Chair will announce for the benefit of the Members that the Clerk successfully retrieved the list of those Members who had voted prior to the time that the electronic device malfunctioned and their names have been included in the list of those voting, if they have not subsequently responded.

Are there other amendments to title II?

Mr. RICHMOND. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise in support of the Appropriations Committee's bill to provide $157 million to the National Endowment for the Arts (NEA), $144 million to the National Endowment for the Humanities (NEH) and $14 million to the Institute of Museum Services (IMS).

As we all know, under the courageous leadership of our colleague, SIDNEY YATES, the Committee on Appropriations Subcommittee on Interior has weighed all the evidence during exhausting hearings and determined that the administration's proposals to cut the National Endowments for the Arts and Humanities by 50 percent and to eliminate the Institute of Museum Services are improper and unwise.

We must remember that the administration's position on reducing Federal spending for the arts has nothing to do with economics, it is a philisophical issue to which Mr. Reagan has always subscribed: "If people want the arts they will pay for them." But ironically this is not always possible. For example, the King Tut exhibit, which was visited by over 1 million people, would not have existed at all without the support of the National Endowment for the Humanities.

According to Mr. Reagan's premise, theaters, symphonies, museums, zoos, botanical gardens, and all other arts organizations would have to charge astronomical entrance fees to retain minimal operational levels.

Tax support of the arts provides every American citizen the opportunity to support the arts at the local, State, and Federal levels. The National Endowments' granting system provides for the equitable selection of the highest quality programs and projects on a nationwide basis, while allowing for experimentation and development.

Will Americans pay $15 to visit a zoo, botanical garden, theater, or museum? Is $20 a reasonable amount for a ticket to a nonprofit, experimental theater when tickets to profitmaking Broadway shows have similar prices? What the President actually postulates is a return to antiquated 19th century ideals—the arts should belong to and be enjoyed by only a select few.

Thanks to 16 years of Federal arts funding, today the arts are found in our schools, shopping centers, parks, recently built or renovated theaters, museums, and art centers and even on street corners.

The National Endowments are funded at roughly 70 cents per capita and the IMS at only 4½ cents per capita. But their return to the country is enormous. Last year in New York City alone, the gross economic impact of the arts was $5.2 billion. The arts are the second largest industry in the States of New York and Massachusetts, the only States where such studies have already been completed.

Mr. Chairman, the money that this country provides right now in support of the arts is embarrassingly low compared to Great Britain's per capita expenditure of $3.60, Denmark's $28.44, and Austria's $100.

The administration believes that Federal funding of the arts is a very low priority and that private corporations will make up the difference between present Federal funding and the new proposed levels. But corporate executives have told us time and time again that they cannot make up the difference, nor will they make up the difference. In fact corporations are already cutting back their commitments to arts organizations and a number of State legislatures have taken their cue from the Federal Government and have started cutting back their commitment to the arts as well. The States, corporations, foundations, and individuals have always followed the Federal Government's lead in supporting the arts. If we say "the arts are a low priority" then all the others may well follow suit and the cuts could quickly reach $2.8 billion, not the proposed $88 million that Mr. Reagan requested.

The cuts that this administration proposes in the arts are doing what Mr. Reagan complained about bitterly during his last campaign: politicization of the arts. Mr. Reagan accused President Carter of making the arts political, but nothing in the history of this country has made those involved in the arts more politically aware and active than these proposed cuts. For the first time musicians and sculptors and actors and designers and singers and dancers and all other artists are working together to fight a potential injustice which could be perpetrated on their industry.

I urge my colleagues to join with me in supporting the Appropriations Committee's bill and hope that everyone understands what the administration's proposed cuts would really mean. Hopefully, the Senate will appropriate similar figures and we can stop the day-to-day battle for the survival of the arts community and allow artists to go back to developing their art forms instead of developing their knowledge about the legislative process.

Thank you.

Mr. DE LUGO. Mr. Chairman, I move to strike the next to the last word, and I rise in support of the committee bill.

Mr. Chairman, as the House considers H.R. 4035, the fiscal year 1982 Interior appropriations bill, I would like to take this time to personally thank the distinguished chairman of the Appropriations Subcommittee on Interior, Hon. SIDNEY YATES, for demonstrating extreme sensitivities to the unique problems faced by the territories of the United States, including my native Virgin Islands. He has extended a much-needed helping hand to us at a time when we need it the most—and for his thoughtfulness I will be forever grateful.

As we all know, times are tough everywhere—including in the U.S. territories. In the U.S. Virgin Islands the effects of historic budget cuts are already being felt. The impending tax cut threatens a further loss of revenue because of our unique "mirror tax" system. On top of this, the general state of the economy is wreaking havoc on our local industries, including our most important source of revenue—tourism.

In the midst of this bleak economic picture, Chairman YATES has proven to be a beacon of hope for the U.S. territories. His compassion for our ominous situation was particularly evident during hearings before his subcommittee where the Governor of the Virgin Islands, Juan Luis, the members of his cabinet, and myself were afforded a forum to inform this Congress of the drastic effects of the budget and tax cuts. In all the years I have represented the Virgin Islands in Washington, it is hard to recall a more open, comprehensive, and, I believe, educational exposé of the unique economic problems faced by the territories. Then again, it is hard to remember a time when the situation was this serious.

The extent of the chairman's concerns are evident in the bill before the House today. For example, under his leadership the committee directs the Department of the Interior to submit a report, concurrent with the submission of the fiscal year 1983 budget request, that specifies the fiscal impact of program and tax cuts enacted in this session of Congress on each of the territories. The committee also encourages the submission of a supplemental request for fiscal year 1982 which provides an equitable adjustment for these impacts. The chairman also led the fight to increase, by $6.4 million, the appropriation for hospital construction which will guarantee that the new facilities on the three islands in the Virgin Islands will be completed—and ahead of schedule at that.

Again, I would just like to thank Chairman YATES for his help and for his understanding of the unique problems facing the U.S. territories today.

AMENDMENT OFFERED BY MR. SIMON

Mr. SIMON. Mr. Chairman, I offer an amendment.

The portion of the bill to which the amendment relates is as follows:

DEPARTMENT OF ENERGY

FOSSIL ENERGY RESEARCH AND DEVELOPMENT

(INCLUDING TRANSFER OF FUNDS)

For necessary expenses in carrying out fossil energy research and development activities, under the authority of the Department of Energy Organization Act (Public Law 95-91), $463,750,000 and $400,000 to be derived from "Energy production, demonstration, and distribution", Department of Energy, to remain available until expended: *Provided*, That no part of the sum herein appropriated shall be used for the field testing of nuclear explosives in the recovery of oil and gas.

The Clerk read as follows:

Amendment offered by Mr. SIMON: On page 36, line 22, insert ", of which not less than $5,000,000 is to be used for the Carbondale Mining Technology Center located at Carbondale, Illinois" after "until expended".

Mr. SIMON. Mr. Chairman, I hope we can get by without taking more than 5 minutes.

This amendment has an impact on the Carbondale Mining Technology Center which exists in no small part because my distinguished colleague, the gentleman from Illinois, the chairman of the Appropriations Subcommittee (Mr. YATES) was good enough and wise enough and farsighted enough to see that we needed to do more in the area of coal research in this Nation.

My concern in the appropriation and with the situation is this: Two years ago this particular research center received from the Department of Energy approximately $22 million. Last year, or the current fiscal year, they are receiving about $7 million. Their money is going down, as I would point out to my colleagues in the House, as is research in the conventional use of coal generally. Unfortunately, we are spending much more money in nuclear research, but not in the conventional use of coal.

My second concern is a general concern that applies not simply to the Carbondale Center, and that is, we are not doing anywhere near enough on high sulfur coal research. And Carbondale is in the center of the Nation's high sulfur coal.

My third concern is what is happening over in the Senate. In the Senate Appropriations Subcommittee they have put on an amendment that says this particular research center can be given to Southern Illinois University. Some of my friends at Southern Illinois University have talked to the people in the Department of Energy about this and I do not oppose it if there is some assurance of continued funding.

I would like the attention of my colleague (Mr. YATES) on this. The Department of Energy people have talked to the people at Southern Illinois University and the Southern Illinois personnel have been assured, "You are going to have money to support this if this is handed over to you."

Mr. YATES. Mr. Chairman, will the gentleman yield?

Mr. SIMON. I would be pleased to yield to my distinguished colleague from Illinois.

Mr. YATES. The gentleman knows I share deeply the best interests of Southern Illinois University and of the Carbondale Mining Technology Center. I share the gentleman's feelings on this most deeply. I would like to see it continue. The program, however, is being cut down.

The one objection I have to the gentleman's amendment, and perhaps it can be avoided, is that the amendment proposes to earmark approximately 25 percent of the money that is available for mining research and development for this one facility, which I think would be unfair for the rest of the country.

I would make this suggestion to the gentleman, that we have no objection to negotiations concerning the transfer of facilities to Southern Illinois University. The negotiations are now going on, as the gentleman has indicated. We do not know what the cost is likely to be.

I would like to suggest to the gentleman that I will work with him in making available whatever funds are necessary, assuming, of course, that the funding will be reasonable, in order to make that transfer possible.

I would suggest to the gentleman, therefore, that he withdraw his amendment at this time and that he and I try to work out what an appropriate amount would be for making the transfer and we will try to see that that is made available.

□ 1700

Mr. SIMON. I thank my colleague and appreciate his attitude and his concern.

My concern, frankly, is that the Department of Energy will simply hand over a facility and do nothing else. Down in Carbondale, Ill., when somebody says we are going to give you money, it is your word. But sometimes the country boys from Southern Illinois University get to Washington and somebody in the Department of Energy says something, and they can get taken in.

So with the assurance from the chairman of the subcommittee that we will try and work out some kind of reasonable accommodation, an assurance for the future for the center, I would ask unanimous consent, Mr. Chairman, that the amendment be withdrawn.

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois?

There was no objection.

AMENDMENTS OFFERED BY MR. DANNEMEYER

Mr. DANNEMEYER. Mr. Chairman, I offer several amendments.

The portion of the bill to which the amendments relate is as follows:

SMITHSONIAN INSTITUTION

SALARIES AND EXPENSES

For necessary expenses of the Smithsonian Institution, including research in the fields of art, science, and history; development, preservation, and documentation of the National Collections; presentation of public exhibits and performances; collection, preparation, dissemination, and exchange of information and publications; conduct of education, training, and museum assistance programs; maintenance, alteration, operation, lease (for terms not to exceed ten years), and protection of buildings, facilities, and approaches; not to exceed $100,000 for services as authorized by 5 U.S.C. 3109; up to 3 replacement passenger vehicles; purchase, rental, repair, and cleaning of uniforms for employees; $136,374,000: *Provided*, That funds appropriated herein are available for advance payments to independent contractors performing research services or participating in official Smithsonian presentations: *Provided further*, That none of these funds shall be available to a Smithsonian Research Foundation.

The Clerk read as follows:

Amendments offered by Mr. DANNEMEYER: On page 44, line 25, strike the period and insert in lieu thereof the following: "*Provided further*, That none of these funds shall be available for public exhibits and performances that present the theory of evolution as the sole explanation of life's origins.".

Page 45, line 16, strike the period and insert in lieu thereof the following: "*Provided further*, That none of the funds shall be made available for museum programs that present the theory of evolution as the sole explanation of life's origins".

POINT OF ORDER

Mr. YATES. Mr. Chairman, I make a point of order against the amendments.

The CHAIRMAN. The gentleman will state his point of order.

Mr. YATES. Mr. Chairman, I make a point of order that the amendment offered by the gentleman is legislation on an appropriation bill contrary to clause 2 of rule XXI. The amendment provides that funds would not be available for exhibits and performances that present the theory of evolution as the sole explanation of life's origins. This would require Smithsonian officials to make a determination whether or not an exhibition or performance presents the theory of evolution as the sole explanation of life's origins.

Deschler's Procedure (chapter 26, section 11.1) states that an amendment which places new duties on officers of the Government or implicitly requires them to make judgments and determinations not otherwise required by law assumes the character of legislation and is subject to a point of order.

Because this amendment does require that a determination be made that is not now required by law, it legislates on an appropriation bill. These determinations are not ministerial in nature. They would require a determination regarding the sole explanation of life's origins. This is a matter which academicians for centuries have not agreed upon. It would require a significant level of activity on the part of Smithsonian officials to determine the sole explanation of life's origins.

I think on that basis, Mr. Chairman, it is subject to a point of order.

The CHAIRMAN. Does the gentleman from California (Mr. DANNEMEYER) wish to respond to the arguments of the gentleman from Illinois (Mr. YATES) on the point of order?

Mr. DANNEMEYER. Just briefly, Mr. Chairman.

There would be a preferred way to offer the thought expressed by this amendment, and that would be through an authorization bill. But it relates to an authorization, or the subject relates to the Smithsonian Institution, and I am advised that we do not have an authorization bill going through the House that governs or covers or relates to the Smithsonian Institution. It has just been there so long, the memory of man runneth not to the contrary, we do not have an authorization, so the only ability a Member has, in effect, in a matter of this type is the appropriation vehicle.

That is one argument.

The second argument is that the amendment would—I concede there is some merit to the gentleman from Illinois argument—that it would, one interpretation would cause the operator of the museum to survey the field to determine what theories exist as to the origin of man and, therefore, it could be argued that it imposes new duties.

I submit in response to that contention that there is nothing in this amendment that would preclude the museum operator from exhibiting the theory of evolution, but they could not use it as a means, as an explanation of life's origin. To that extent I do not believe that it imposes any new duties.

The CHAIRMAN. Does the gentleman have any further argument?

If there is no further argument, the Chair has considered the amendments, the arguments of the gentleman raising the point of order and the response thereto and is prepared to rule and does now rule.

The amendments would require more than incidental determinations by some public official. The amendments would require that a Federal official substantially evaluate public exhibits and performances, and in the case of the second amendment, museum programs, to draw conclusions therefrom as to their theoretical basis.

The Chair finds that the amendments constitute legislation which would be in violation of clause 2 of rule XXI prohibiting legislation on an appropriation bill, and the point of order is sustained.

AMENDMENTS OFFERED BY MR. DANNEMEYER

Mr. DANNEMEYER. Mr. Chairman, I offer two amendments, and I ask unanimous consent that they be considered en bloc.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

The Clerk read as follows:

Amendments offered by Mr. DANNEMEYER: Page 44, line 25, strike the period and insert

in lieu thereof the following: ": *Provided further,* That none of these funds shall be available for the "Dynamics of Evolution" Exhibit at the National Museum of Natural History.".

Page 45, line 16, strilke the period and insert in lieu thereof the following: ": *Provided further,* That none of these funds shall be available for the "Dynamics of Evolution Exhibit at the National Museum of Natural History.".

Mr. DANNEMEYER. Mr. Chairman, this Member would have preferred to offer an amendment that would have said what I am really after, that the Natural History Museum here in Washington, if it chooses to have an exhibit depicting the theory of evolution as the origin of the universe, it should give equal time to the theory of creation. That is what the gentleman is after.

How does one reach that? To reach that is not easy because, as I indicated earlier in arguing the point of order, there is no authorization bill this Member is aware of going through the House to which an amendment could be offered.

But let us put this in perspective; 56 years ago in this country the conventional wisdom in the public school systems was to teach the theory of the origin of the universe based on the theory of creation. Our children were taught that.

Then about that time, in 1925 to be precise, a famous case in the annals of American jurisprudence occurred. A man named Scopes, a substitute biology teacher, was charged with the audacious act of teaching the theory of evolution in a public schoolroom in Tennessee in violation of a State law of that sovereign State. He was tried, prosecuted by William Jennings Bryan and defended by Clarence Darrow, and the jury found Mr. Scope guilty and he was fined $100.

The case is interesting because today, some 56 years later, the pendulum has swung about 180 degrees. Today most public school systems in the country are teaching students that the fact of evolution explains the origin of the universe. Only exceptionally do we find biology teachers or science teachers teaching the theory of creation. In fact, the pendulum has swung to such an extent that two States in the Union, Arkansas and Louisiana, very recently passed laws saying that we must give equal time to the theory of evolution and the theory of creation.

In case the Members have not noticed it, there is here in Washington, D.C., the Smithsonian Institution, and the National Museum of Natural History. On the second floor of that building, right now, you can go and see it for yourself, is an exhibit entitled "Dynamics of Evolution."

□ 1710

There is no question, when you walk through this exhibit on the second floor, that it treats the matter of the origin of the universe as based on the theory of evolution.

I do not quarrel with this exhibit. I think the origin of life is something that man has wondered about from the beginning of time. And it is proper for this exhibit to be in the Museum of Natural History. But I think it is also proper for this museum, if it has chosen to use one theory as to the origin of the universe, that is, evolution, that it also give credence to the theory of how we all got here that is exemplified in Genesis. This is the basis of the Judeo-Christian ethic, which is the foundation of all Western civilization.

For this Nation not to recognize in a museum the importance and fundamental nature of the theory of creation as the answer of how we all got here is a tragedy, and it is something that should be remedied.

Now, there is a tendency, I think, for some in our society to say:

Now, wait a minute. Are you contending that the exhibit on evolution as to the origin of the universe in the Museum of Natural History in Washington, D.C., seeks to establish a religion in our society?

I am saying precisely that.

"Well, what is your authority for that position?"

Well, I say to the Members, that a U.S. Supreme Court case decided in 1961, Tarcaso against Watkins, that humanism was recognized as a religion and the expression of humanism is entitled to the protection of the first amendment.

The CHAIRMAN. The time of the gentleman from California (Mr. DANNEMEYER) has expired.

Mr. DANNEMEYER. Mr. Chairman, I ask unanimous consent to proceed for 3 additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

Mr. YATES. Mr. Chairman, reserving the right to object—and I shall not object—I do so in order to ask unanimous consent that all debate on this amendment and all amendments thereto end at 25 minutes after 5.

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The CHAIRMAN. All debate on this amendment and all amendments thereto will end at 25 minutes after the hour.

Mr. YATES. Mr. Chairman, I withdraw my reservation of objection.

The CHAIRMAN. Is there objection to the request of the gentleman from California (Mr. DANNEMEYER) to proceed for 3 additional minutes?

There was no objection.

Mr. DANNEMEYER. Mr. Chairman, the Supreme Court in the decision of Tarcaso against Watkins in 1961 announced that humanism as a religion was entitled to the protection of the first amendment.

Now, if you check the publications of the Secular Humanist Society of our country you find that the sixth doctrine recognizes and promotes the theory of evolution as a part of humanism.

I bring this issue to the Members from the standpoint of fair play. If this museum chooses to use this means of describing the theory of how we all got here, depicting the theory of evolution, then they should be giving equal treatment to the theory of creation. I think it is fair, it is equitable, and it will give balance in the presentation of the exhibit which I think the American taxpayers who pay the bill demand. After all, we have people in our society who profess the Judeo-Christian ethic and the theory of creation as exemplied in Genesis, and we have those who follow a monotheistic theory, which evolution is, and they are entitled to recognition in our society. I think fairness would indicate that both theories are entitled to equal treatment in the museum.

The CHAIRMAN. Members standing at the time the unanimous-consent request to limit debate on this amendment and all amendments thereto was granted will be recognized for approximately 1½ minutes each.

(By unanimous consent, Messrs. DICKS, LEVITAS, and AUCOIN yielded their time to Mr. YATES.)

The CHAIRMAN. The Chair recognizes the gentleman from Illinois (Mr. YATES) for approximately 5 minutes.

Mr. YATES. Mr. Chairman, I appreciate very much the sincerity with which the gentleman offered the amendment. I know that he is very much disturbed. He has talked to me about the exhibit at the Smithsonian. He is very much disturbed by the form that the exhibit "Dynamics of Evolution" takes.

It does try to project how the evolutionary theory of man came about. It is one form of an explanation, and I think it is the function of the Smithsonian in its educational mandate to make known to the country what the scientific community believes.

I asked the Smithsonian about this because a gentleman appeared as an outside witness before our subcommittee and made the same argument that the gentleman from California makes. The Smithsonian, in replying to it, makes the point that no one at the Smithsonian in any way attempts to raise any point in the exhibits as a religious matter. It just points out what the scientific conclusions are.

I just do not know how the Smithsonian could fulfill what the gentleman

from California wanted. For example, would it fulfill what the gentleman from California required if, for example, the Smithsonian put a Bible close to that exhibit so that a person could read the chapter on Genesis?

Mr. DANNEMEYER. Mr. Chairman, will the gentleman yield?

Mr. YATES. I yield to the gentleman from California.

Mr. DANNEMEYER. Mr. Chairman, Genesis talks about the creation of our universe.

Mr. YATES. Yes.

Mr. DANNEMEYER. It describes the work of our Lord in 6 days.

Mr. YATES. Yes.

Mr. DANNEMEYER. It describes elements in the world that were created on each of those 6 days.

Mr. YATES. Yes.

Mr. DANNEMEYER. And it does not take a great deal of imagination to contemplate in one's mind as to how these 6 different days can be exhibited. Museum curators are paid very well to develop such exhibits.

Mr. YATES. The gentleman is saying something with which I cannot agree. I think it takes a great deal of imagination to present that properly.

For example, the Sistine Chapel has this magnificent fresco on the ceiling of the Lord creating man, by pointing his finger, a man just touching the finger of the Lord. That was Michaelangelo's interpretation of the creation.

Now, if I understand the purpose of the gentleman's amendment, it would serve his purpose if there were a picture of the Sistine Chapel, because that is at least one person's account of how the creation of man was achieved. And yet I would suggest to the gentleman that, were the Smithsonian to place that as its exhibit, somebody would come along and say, "No, Michaelangelo was wrong. This is a much better way to interpret it." And then the possibility occurs: Suppose the Smithsonian tried to portray the Garden of Eden, with two nude figures, and they were nude, as the gentleman says, they have a fig tree, and they have a serpent there. Would that serve the gentleman's purpose?

The point I am trying to make is that it places an onerous burden on the Smithsonian, which I do not think the Smithsonian should have.

I would agree with the gentleman that the Smithsonian does adhere pretty much to scientific presentations. It does try to avoid religious controversy, because even though this is a Nation that is founded on the Judeo-Christian tradition, the fact remains that there are people in this country, many people in this country, who do not observe either of those religions. I am sure we have many Buddhists and I am sure we have many people who believe in Zoroaster. I am sure we have many people who would want their religions portrayed in the same way as the gentleman wants the chapter on Genesis portrayed. It seems to me that a whole kettle of worms would be generated in the event that such a requirement were placed on the Smithsonian.

□ 1720

I believe that what we do today, that is, to educate our children, and the children's parents, at the churches of the country through books and through teaching and through other methods of this kind, this burden should not be placed on the Smithsonian.

The CHAIRMAN. The Chair recognizes the gentleman from Oregon (Mr. WEAVER).

Mr. WEAVER. Mr. Chairman, religion is a sacred matter between each individual and his Creator and deals with the unknown, the mysteries. Science is simply, no matter how imperfect, the best we have to determine what the facts are about our existence. The two simply should not be compared.

Mr. VENTO. Mr. Chairman, I rise in opposition to the amendment offered by the gentleman from California (Mr. DANNEMEYER).

This amendment would surely represent a backward step in which Congress would be attempting to put certain religious beliefs on the same level with scientific knowledge.

They do not equate and there is no reason or necessity to place them on a common ground. Religious beliefs are a matter of faith supported to be sure by our history and culture.

The theory of evolution or the dynamics of evolution as this amendment states is scientific fact, surely subject through years of debate and investigation and is supported by scientific facts, facts written into the rock record of geologic history verified for example by radiocarbon and argon gas dating. The effect of this amendment is for Congress to legislate scientific fact. This astounds me. I can hardly believe that such an assault would be made on the Institutions in our society which we have dedicated to foster human knowledge and understanding such as the Smithsonian.

It is as if mankind has climbed the mountain of human ignorance and we are arriving at the top and there sit the Creationists asking that we repudiate all that we have learned and give their beliefs based on faith the same status.

I submit that there is no need to place scientific facts in competition with religious beliefs and that attempts to do so misunderstand either scientific concepts, their faith or both.

The CHAIRMAN. The question is on the amendments offered by the gentleman from California (Mr. DANNEMEYER).

The question was taken and on a division (demanded by Mr. DANNEMEYER) there were—ayes 3, noes 32.

So the amendments were rejected.

The CHAIRMAN. Are there other amendments to title II?

If not, the Clerk will read.

Mr. YATES. Mr. Chairman, I ask unanimous consent that title III be considered as read and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The CHAIRMAN. Are there any points of order against title III? There are none.

AMENDMENT OFFERED BY MR. LEVITAS

Mr. LEVITAS. Mr. Chairman, I offer an amendment.

The portion of the bill to which the amendment relates is as follows:

SEC. 302. No part of any appropriation under this Act shall be available to the Secretaries of the Interior and Agriculture for use for any sale hereafter made of unprocessed timber from Federal lands west of the 100th meridian in the contiguous 48 States which will be exported from the United States, or which will be used as a substitute for timber from private lands which is exported by the purchaser: *Provided*, That this limitation shall not apply to specific quantities of grades and species of timber which said Secretaries determine are surplus to domestic lumber and plywood manufacturing needs.

The Clerk read as follows:

Amendment offered by Mr. LEVITAS: Page 54, after line 8, insert the following:

"SEC. 307. No part of any appropriation contained in this Act shall be available to implement, administer, or enforce any regulation which has been disapproved pursuant to a resolution of disapproval duly adopted in accordance with the applicable law of the United States."

Mr. LEVITAS (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered and read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Georgia?

There was no objection.

Mr. LEVITAS. Mr. Chairman, the amendment I am offering would prevent the use of any funds by the departments and agencies funded by this bill for the implementation of any regulations or actions which have been vetoed by Congress using the specific veto procedures provided by applicable law.

There are several programs and agencies funded under this bill which are subject to some sort of legislative veto. For example, all regulations promulgated under the Federal Land Policy and Management Control Act of 1976 with regard to land use planning, sales, withdrawals, review of withdrawals, and the Unintentional Trespass Act of 1968 are subject to

congressional veto. Congress also has the right to veto rules and regulations concerning Indian education and Forest Service boundaries.

The basic issue here, however, transcends the question of legislative veto. Even the few Members who still do not support legislative vetoes, surely must support the doctrine of following the law under which legislative vetoes are enacted and then duly exercised.

I have offered this amendment because past administrations have stated their intentions not to obey the law with regard to legislative vetoes. This unfortunate circumstance became concrete under the Carter administration last year after Congress vetoed four sets of regulations proposed by the Department of Education. In response, the Carter administration, through Attorney General Benjamin Civiletti and Secretary Shirley Hufstedler, announced a decision to ignore these vetoes. In short the Carter administration said it would not obey the law, providing for legislative veto of these regulations, as it was duly enacted by Congress and signed by the President.

The law is this case is very simple. It is very explicit. It says that where both Houses of the Congress have adopted a congressional veto, the regulations become null and void.

However, the problem was not just with the Department of Education. It was the general policy of the Carter administration. While I would hope that the Reagan administration will not be willing to disregard the law, we must be sure that the law is followed. This amendment will act as a safeguard to prevent this disregard for the law from occurring again.

The action of past administrations makes the issue one of whether we in Congress are going to allow the law to be ignored. I do not believe any Member of Congress can stand by and allow our mandates to be treated in such cavalier fashion. The Constitution of the United States requires the President of the United States to faithfully execute the laws. He is not given the authority to pick and choose those laws he wants to implement and those that he does not want to implement.

It is not for the executive branch to decide what laws will be enforced. There is a very important case that illustrated that point, Kendall against United States, decided by the Supreme Court in 1838. In that instance, the President of the United States directed the Postmaster General not to pay a certain sum required to be paid by Congress to a contractor with the Post Office, and in issuing the writ of mandamus, the Court said:

> To contend that the obligation imposed on the President to see the laws faithfully executed implies a power to forbid their execution is a novel construction of the Constitution and entirely inadmissible.

No, the President of the United States does not have the power or the right or the prerogative not to enforce the laws. Where such disputes exist the proper forum for resolving them lies within the court system and ultimately within the jurisdiction of the Supreme Court. The administration's questions about this provision of the law should be resolved in that arena, not by noncompliance.

Mr. Chairman, this is a simple proposition. Once a legislative veto has been exercised, it is a disobedience of the law by those charged with the responsibility of executing the law to disregard it, and I do not think we ought to give them money to disobey the law. The only way we can effectively enforce these provisions of the law is to provide a limitation for funding so that no funds can be used for purposes of implementing disapproved or vetoed actions.

That is the reason I have offered this amendment, Mr. Chairman. We are facing a significant challenge to our constitutional powers, and we must rise to meet it. My amendment will do so in a simple direct fashion. I urge every Member of this body to support its passage.

Mr. YATES. Mr. Chairman, will the gentleman yield?

Mr. LEVITAS. I yield to the gentleman from Illinois.

Mr. YATES. I thank the gentleman for yielding.

The committee on this side has examined the gentleman's amendment and has no objection to it.

Mr. LEVITAS. I thank the gentleman.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Georgia (Mr. LEVITAS).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. ERTEL

Mr. ERTEL. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

> Amendment offered by Mr. ERTEL: On page 54, immediately after line 8 insert the following new sections:
>
> SEC. 308. None of the funds provided in this Act to any Department or Agency shall be obligated or expended to provide a personal cook, chauffeur or other personal servants to any officer or employee of such Department or Agency.
>
> SEC. 309. None of the funds provided in this Act to any Department or Agency shall be obligated or expended to purchase passenger automobiles as defined in 15 U.S.C. 2001 with an EPA estimated m.p.g. average of less than 22 miles per gallon.

Mr. ERTEL (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. YATES. Mr. Chairman, will the gentleman yield?

Mr. ERTEL. I yield to the gentleman from Illinois.

Mr. YATES. I thank the gentleman for yielding.

Mr. Chairman, may I say that the committee has examined the gentleman's amendment. It was accepted to the HUD bill as I recall, and I will say on behalf of the majority on this side we have no objection to the amendment.

Mr. McDADE. Mr. Chairman, will the gentleman yield?

Mr. ERTEL. I yield to the gentleman from Pennsylvania.

Mr. McDADE. I thank the gentleman for yielding.

Mr. Chairman, I join in those statements. We will be happy to accept the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania (Mr. ERTEL).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. DICKS

Mr. DICKS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

> Amendment offered by Mr. DICKS: On page 53, line 5, after the word "the" add "first".

Mr. DICKS. Mr. Chairman, I just add this amendment. It is technical in nature. It clarifies the legislative intent.

Mr. Chairman, I yield back the balance of my time.

Mr. WEAVER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, this amendment is being offered in order to preclude me from offering my amendment and thereby deprive this House of the ability to debate one of the most critical issues in the Northwest.

That issue is the issue of log exports.

Presently the product of the great national forests of Oregon is about 3.2 billion board feet and we export logs in the amount of 3.2 billion board feet, enough to build several hundred thousand homes in this country.

So, therefore, I believe the issue of log exports should be debated fully and thoroughly and I wish that the gentleman from Washington had not offered his amendment.

The House should have the opportunity to debate such an issue of such momentous importance to the Northwest.

Over 15,000 jobs are lost in the Northwest to log exports. Mills are closing. I have had dozens of mills closed in my district and thousands of people thrown out of work because our logs are being exported to countries overseas instead of milled in our own mills with American labor.

The buyer of this timber, primarily Japan, exports to us finished products

manufactured with their labor, manufactured with their capital, Toyotas and Datsuns and Sonys, and we instead turn around and sell them our unprocessed raw material. I maintain that so long as Japan can buy our unfinished, unprocessed logs, they will not buy our finished products.

I ask the House, how much longer can we remain an industrial nation, when we export the very resource on which our Northwest jobs and manufacturers depend and buy back finished products? Are we going to be a colony nation, a nation simply dependent on others for our manufactured goods? Because so long as Japan can buy our logs they will not buy our finished lumber. And our mills will continue to go out of business. Our workers will continue to be thrown out of jobs. There is now 30 percent unemployment in many areas of my district.

So, I feel very strongly about this amendment that I was going to offer. It would have struck the phrase "by the purchaser," from the language panning Federal log exports, in the appropriations bill. The present language is confusing. The Forest Service has interpreted it to mean that companies can export their own timber and then buy from people who have bought Federal timber, and replace that timber for their mills. In other words, direct substitution of Federal timber for their exported timber.

My amendment would have foreclosed that possibility and perfected the existing language preventing Federal log exports.

□ 1730

So I feel very strongly—very strongly—that the House should fully debate this issue so critical to the Northwest. I feel that it is necessary to carry this issue much further until we stop the drain, the bleeding in the Northwest that is represented by log exports.

I would ask the gentleman from Washington (Mr. DICKS) exactly what the gentleman's amendment does.

Mr. DICKS. Mr. Chairman, will the gentleman yield?

Mr. WEAVER. I yield to the gentleman from Washington.

Mr. DICKS. Mr. Chairman, the language is meant to clarify. For the last 7 years, I think the gentleman from Oregon would be less than accurate if he did not admit there has never been any confusion in the Northwest about the intent of this language.

We have had regulations on the books that clearly indicate that the first purchasers are the ones regulated under the law, and I just offered this amendment to clarify that point.

Mr. WEAVER. What does the gentleman's amendment say? Is it "by the first purchaser"?

Mr. DICKS. By the first purchaser.

Mr. WEAVER. The gentleman adds "first" after the word "the"?

Mr. DICKS. That is right; to alleviate any misunderstanding.

Mr. YATES. Mr. Chairman, I ask unanimous consent that the time for debate on this amendment and all amendments thereto do now expire.

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Washington (Mr. DICKS).

The question was taken; and on a division (demanded by Mr. WEAVER) there were—ayes 30, noes 5.

So the amendment was agreed to.

Mr. WEAVER. Mr. Chairman, I move to strike the last word.

I simply want to state for the record that I was one of the five to vote "no" on the amendment. I feel very strongly that the amendment we have just adopted now assures continued log exports in the Northwest and the continued bleeding of our economy.

Mr. ANTHONY. Mr. Chairman, will the gentleman yield?

Mr. WEAVER. I yield to the gentleman from Arkansas.

Mr. ANTHONY. I thank my chairman for yielding.

Mr. Chairman, during the last 20 years much of the growth in Pacific Northwest forest products industrial employment and production has been based directly on export markets, not only for logs but for increasing amounts of fiber and solid wood manufactured products. These offshore markets have also produced the income and the incentive for greater investments in forest management and domestic production capacity.

Employment gains have been substantial. Most importantly, these export-based jobs have remained steady in the Northwest while southern and northwestern mills are experiencing massive layoffs from the collapse of the domestic homebuilding industry. Log exports alone directly and indirectly supported more than 38,000 jobs in Washington and Oregon last year.

Sponsors of recent and current legislation designed to curtail log exports have claimed that protectionist measures are needed to assure domestic timber supply. Yet the national forests of western Washington and western Oregon currently have record volumes of uncut timber under contract, and this timber is banned from log exports.

In addition, State agencies in both Washington and Oregon have identified biological opportunities to grow more timber than is currently used for both domestic and foreign markets. In Washington, the primary log exporting State, a Department of Natural Resoures study found that timber supply could increase slightly by the middle of this decade if nothing changes—and intensification of management could increase the supply 8 percent by 1985.

Neither is there credible evidence to support claims that Northwest log exporters are substituting significant amounts of purchased Federal logs in their mills as replacements for exported private logs. The Forest Service found this was not the case in a study last year.

Mr. YATES. Mr. Chairman, I move to strike the requisite number of words.

Mr. OBERSTAR. Mr. Chairman, will the gentleman yield?

Mr. YATES. I yield to the gentleman from Minnesota.

Mr. OBERSTAR. I thank the gentleman for yielding.

I was rising merely to strike the last word not to offer an amendment but to raise with the committee a question about a problem that has occurred in my congressional district related to an amendment the gentleman offered earlier.

The committee has provided $3 million for funding of a tree-planting program in consequence of the Boundary Waters Canoe Area Wilderness Act, to plant trees on State land and Federal forest land outside the Boundary Waters area to replace that timber which would be lost because of the wilderness designation under the law.

The Forest Service comes along and wants to close the tree nursery from which most of the trees would come for that tree-planting program. They want to close the Eveleth Tree Nursery and shift its activities to another Forest Service tree nursery in Michigan at Watersmeet, Mich.

The Minnesota tree nursery has been exceptionally efficient. They use the most modern seed extraction device, the most modern seedling planting and seedling transplanting devices. They are capable of producing 13 million seedlings a year. They operated at a $145,000 profit last year, while the tree nursery in Michigan had a $75,000 loss in operations.

If the Forest Service operates as they have told the public and told me, by contracting with the State of Minnesota to grow these seedlings, they are going to have enormous problems trying to get the State to grow seedlings the way the Federal Government wants them to do with the costs of transporting these seedlings. It is just going to be a very expensive operation. It is a needless waste on the part of the Forest Service.

I am inquiring if there is anything the committee can do to help us.

Mr. YATES. In reply to the gentleman, let me say this is the first knowledge the committee has of the Forest Service's intention to move the nursery. From what the gentleman says such a move does not make much

sense. I want to assure the gentleman that the committee will begin tomorrow to look into this matter and try to find out what should be done. If the committee determines that the move should not be made, it will make its opinion known to the Forest Service.

At any rate, it will keep the gentleman fully advised of what the results of its investigation are.

Mr. OBERSTAR. I greatly appreciate the chairman's recognition of the matter. I will submit information formally to the committee.

May I raise another question about the Voyageurs National Park in which the authorization for land acquisition has been consumed? There is no further authority. The Park Service is continuing to acquire properties under the 10-percent limitation of authority, which means at a rate of about $2.6 million a year.

At that rate, it will take probably another 20 years or 30 years to acquire all of the property within Voyageurs, some of which is needed for development. The development cannot go forward because they have not acquired the property.

I am just inquiring if the gentleman might anticipate any funds might be available by the end of this year for land acquisition.

Mr. YATES. Let me tell the gentleman I am going to have an interchange in a few seconds with my good friend, the gentleman from Georgia (Mr. LEVITAS), who is very much interested in the acquisition of lands along the Chattahoochee River. The problem of acquisition is one of the most pressing and most confusing that we have. The administration has taken the position that the land and water conservation fund should not be used for acquisitions but, rather, for rehabilitation in parks. This is contrary to legislation. I do not know whether the appropriate committees of the House will be looking at it from that angle. I do want the gentleman to know, however, that the committee has taken the position that acquisition procedures should continue; and while we placed a rather substantial sum in the bill for acquisition—which I may say in passing was over the budget—it still is not adequate to take care of the needs of the country.

Nevertheless, we will keep in mind the need for acquiring lands in the Voyageurs area, and we will keep the gentleman advised of that.

Mr. OBERSTAR. I want to commend the chairman and the subcommittee on the brilliant job they have done of restoring funds for land and water.

The CHAIRMAN. The time of the gentleman from Illinois (Mr. YATES) has expired.

(At the request of Mr. WEISS, and by unanimous consent, Mr. YATES was allowed to proceed for 1 additional minute.)

Mr. WEISS. Mr. Chairman, will the gentleman yield?

Mr. YATES. I yield to the gentleman from New York.

Mr. WEISS. I thank the gentleman for yielding.

Mr. Chairman, this appropriation bill for the Interior Department and related agencies for fiscal 1982, H.R. 4035, represents a strong effort by the House of Representatives to counter the policies of the Reagan administration which would allow despoiling of our limited natural resources. I want to commend my colleagues on the Committee on Interior and Insular Affairs, the Committee on Energy and Commerce, and the Appropriation Committee for their work in shaping responsible legislation within the policies set forth by Secretary of the Interior James Watt and other administration officials.

Several of the amendments being offered to this bill would help to further restore balance to endangered programs and thus maintain our Nation's commitment to preservation of the environment. Let me speak briefly on those amendments which seem most important.

I strongly support the amendment offered by the gentleman from New York (Mr. OTTINGER), the chairman of the Subcommittee on Energy Conservation and Power. This amendment would restore a total of $23 million to the energy conservation budget in two specific programs—$20 million for the State energy conservation program and $3 million for the residential conservation service.

Energy conservation is now widely recognized as the best immediate response to our short-term energy needs. It is important that the Federal Government act to insure that conservation assistance to low- and middle-income people is made available, as this amendment seeks to do. It is for these reasons that the amendment has received the backing of many groups, including the U.S. Conference of Mayors, the Consumer Energy Council of America, and the State of New York.

I also want to express my support for the amendment offered to eliminate funding for the SRC-I synthetic fuels plant by the gentleman from Michigan (Mr. WOLPE) and the gentleman from Minnesota (Mr. WEBER). The SRC-I project has skyrocketed in cost, almost doubling in the last year and a half even though construction has not yet begun; devoting further funding to it would sap badly needed funding from other, more promising, energy sources; and the project is an unjustifiable burden to taxpayers when the energy industry could finance it.

As I said earlier, Mr. Chairman, I consider this bill a clear response to the policies of the Reagan administration. Those policies disregard the importance of maintaining our resources. Secretary Watt's proposal to allow oil exploration in environmentally sensitive basins off the coast of California and his efforts to block the protective work of the Office of Strip Mining are just two examples of many policies which appear likely to allow gross misuse of our environment. I believe that Congress must fulfill its responsibility to present and future generations to preserve and protect our resources by adopting the amendments I have discussed and by approving this bill.

Mr. LEVITAS. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise for the purpose of engaging the distinguished chairman of the subcommittee in a brief colloquy concerning the Chattahoochee River National Recreation Area in Georgia.

As the chairman knows, several years ago, in 1978, Congress created the Chattahoochee National Recreation Area and authorized $72.9 million, of which thus far $53 million has been appropriated.

□ 1740

The balance of $19.9 million has not yet been appropriated. As part of the acquisition process in this very important and beautiful park, there are certain portions of land along the river which have been placed under option for acquisition at very favorable prices to the Government.

We have at the most critical point on the river acquired an option for $500,000 which will expire in October of this year, and I was hoping that there might be some opportunity for the chairman of the subcommittee to give consideration, in the event that the other body should include funding, for this important and beautiful area to be acquired at great savings to the taxpayer, when compared to future acquisition costs, because this is an area which will be subjected to development and which will be lost irrevocably to future generations.

Mr. YATES. Mr. Chairman, will the gentleman yield?

Mr. LEVITAS. I am happy to yield to the subcommittee chairman.

Mr. YATES. Mr. Chairman, the gentleman from Illinois is aware of the magnificent beauty of the Chattahoochee River and its surroundings. I recognize, too, that because of its beauty there is tremendous pressure from developers who want to take advantage of the beauty for the purpose of erecting homes, apartment buildings, and condominiums and whatever else may bring them a profit.

So I take most seriously the representation of the gentleman from Georgia (Mr. LEVITAS), and I want to assure him that if it is at all possible for our committee to negotiate a sum of money necessary to take up that option, we will try to do it.

Mr. LEVITAS. Mr. Chairman, I thank the gentleman from Illinois (Mr. YATES) very much for his comment.

Mr. GINN. Mr. Chairman, will the gentleman yield?

Mr. LEVITAS. I yield to my colleague, the gentleman from Georgia.

Mr. GINN. Mr. Chairman, I would like to commend the gentleman from Georgia (Mr. LEVITAS) for making this very worthwhile and timely suggestion and recommendation to the distinguished chairman of the Interior Subcommittee, and I would express the hope that the distinguished chairman would look with favor upon the gentleman's suggestion.

Mr. LEVITAS. Mr. Chairman, I thank my colleague, the gentleman from Georgia (Mr. GINN), for his statement and also his consistent support of the Chattahoochee River National Recreation Area.

Mr. Chairman, at this point I include a letter dated July 9, 1981, which I wrote to the Director of the National Park Service describing the importance of this land acquisition:

WASHINGTON, D.C., *July 9, 1981.*

Mr. RUSSELL E. DICKENSON,
Director, National Park Service,
Washington, D.C.

DEAR MR. DICKENSON: I am writing to request your urgent attention to a situation involving the desirability and necessity of acquiring a certain parcel of land for the Chattahoochee River National Recreation Area.

The Chattahoochee River National Recreation Area was authorized by Congress and signed into law on August 15, 1978 (Public Law 95-344). The land acquisition ceiling was set at $72.9 million. From that amount there was $53 million appropriated in fiscal year 1980 for the acquisition of lands and interests in lands for the National Recreation Area. No appropriations were made in fiscal year 1981 toward the remaining $19.9 million. The administration's budget proposal for fiscal year 1982 and the House marked-up version contain no provision for land acquisition funds for the Chattahoochee River National Recreation Area.

The concept of this park is a series of park tracts along the river, linked by the river like a string of pearls.

Tract 103-34 (River Properties, Inc.) is the most critically needed parcel in the park. It is the vital link in the chain—or the vital pearl on the string. This 354.67 acre parcel lies between and separates two other already acquired major tracts (289 acres and 192 acres) in the river corridor. This key parcel, at present, is undeveloped and no business or persons would be displaced through its acquisition.

The National Park Service entered into a $500,000/24-month option to acquire Tract 103-34. This option expires on October 31, 1981, and there is no provision for an extension. It is highly likely that this property will be extensively developed if the option is not exercised. While the owners have been very supportive of the creation of the Chattahoochee River National Recreation Area, they appear over the last two years to have extended themselves to a point where they will not continue to hold up the development of the tract when the nearby area is under so much pressure from development interests. Unless Congress appropriates the already authorized approximately $14.2 million plus other associated overhead costs (title insurance, closing costs, etc.) needed to complete the purchase by October 31, 1981, the half million dollar option money supplied by the federal government will be lost.

In order to protect the initial investment and preserve the integrity of this key park unit, it is imperative that this tract be acquired at this time.

In addition to the monetary savings outlined above, the Government will gain by:

(1) Allowing full utilization of existing and future park facilities as determined by the General Management Plan to accommodate a wide range of visitor use activities.

(2) Allowing management to concentrate on the development of complete park unit for maximum visitor enjoyment. The unit as foreseen by Congress is at present incomplete. It is divided and creates problems in maintenance, law enforcement, interpretation, and visitor accessibility. The completion of this unit will allow the National Park Service to contain visitor use on public property thereby minimizing trespassing and encroachment on private property nearby.

(3) Removing the area from the imminent threat of development thereby protecting the natural and scenic beauty of the Chattahoochee corridor and the preservation of archeological sites. If the area undergoes development, the sites could be severely impacted.

(4) Enhancing the visitors' appreciation and use of one of the most heavily used recreational units on the river. The heavy use of jogging trails and open recreational activity areas is best exhibited in this unit. Approximately 80 percent of the present use takes place within Tract 103-34 with the full knowledge of the landowner. If the option is not exercised, this recreational use will be terminated.

(5) Avoiding possible land value escalations, if the tract remains available for purchase, and maintaining credibility of the National Park Service with conservation and civic groups who have been working toward completion of the Chattahoochee National Recreation Area.

In light of the foregoing, I trust this will meet with your favorable consideration and that you will initiate or request such steps as are necessary to provide the necessary funds. It would truly be a shame as well as a loss of the taxpayer's investment to miss this opportunity. This is not a situation of expanding beyond the boundaries of the existing park, but rather it is filling in a predetermined, selected unit contiguous to the remainder of the park, which has already begun to be acquired.

If there are other persons you feel I should contact regarding this, please let me know. I will be happy to meet with them to discuss the matter.

With best wishes, I am,

Very truly yours,

ELLIOTT H. LEVITAS,
Member of Congress.

AMENDMENT OFFERED BY MR. WALKER

Mr. WALKER. Mr. Chairman, I offer an amendment.

The portion of the bill to which the amendment relates is as follows:

SEC. 306. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

The Clerk read as follows:

Amendment offered by Mr. WALKER: On page 54, at line 9, add the following new section:

SEC. 309. No funds appropriated under the Act may be used to impose mandates on the States which require duties and obligations to the States that have not been fully complied with by Federal Government departments and agencies.

Mr. YATES. Mr. Chairman, I reserve a point of order on the amendment.

The CHAIRMAN. The gentleman from Illinois (Mr. YATES) reserves a point of order on the amendment.

The gentleman from Pennsylvania (Mr. WALKER) is recognized for 5 minutes in support of his amendment.

Mr. WALKER. Mr. Chairman, this amendment is an amendment that I would like to call a lead-by-example amendment. I do not think it is subject to a point of order because I do not think it imposes any new duties on anyone.

Simply, what the amendment is trying to do is to assure that the Federal Government does those things that we tell other people they have to do. For too long what we have done is we have gone to the States and we have said to them, "Look, you have got to do this," and when the States turn around and look at us, they find out that indeed we do not even do those things ourselves. We say to them, "You have got to spend your money this way," when we do not want to place a priority and spend our money this way.

This is simply an amendment that says if the Federal Government is not complying with the things it is mandating on other people, those mandates in fact cannot go forward. It is an effort to say that as we go about the process at the Federal level of cutting back on funding, we are not going to send those spending obligations out to the States.

That is going to be the temptation here. As we cut back here, we are going to be tempted along the line to mandate more things on the States and, therefore, just transfer the spending burden. I do not think that is what the new federalism is all about. I think what it should be about is the fact that if we see things that are true priorities, we ought to be able to work out an agreement with the States, or we ought to be able to say that we are going to at least do those things with the Federal departments and agencies that we mandate to the States.

That is what this amendment says, that we simply do ourselves what we ask others to do.

Mr. Chairman, if this amendment is approved, it would not speak to any voluntary program or any kind of matching program; it would simply speak to those things that we mandate on the States and that we are not willing to do.

This is a lead-by-example amendment, Mr. Chairman, and I ask for its approval.

POINT OF ORDER

The CHAIRMAN. Will the gentleman from Illinois (Mr. YATES) state his point of order?

Mr. YATES. Yes, Mr. Chairman. I make a point of order that the amendment offered by the gentleman from Pennsylvania (Mr. WALKER) is legislation on an appropriation bill, contrary to clause 2 of rule XXI.

I make the further point of order that it places additional duties on officers of the Government or implicitly requires them to make judgments and determinations not otherwise required by law. It assumes the character of legislation. It requires a determination as to whether or not funds appropriated for the States have been fully complied with by Federal governmental departments and agencies.

Mr. Chairman, I do not know how in the world an officer of the Federal Government could carry out what I think is implicit in this legislation without having additional duties imposed on him. For that reason, I press my point of order.

The CHAIRMAN. Does the gentleman from Pennsylvania (Mr. WALKER) desire to be heard on the point of order?

Mr. WALKER. Yes, I would like to respond to the point of order, Mr. Chairman.

Mr. Chairman, the operative language of my amendment says:

No funds appropriated under the Act may be used to impose mandates on the States—

The qualifying clause in it would not come into play unless the Federal Government is out imposing mandates on the States, and then it simply says that as we impose such mandates, it is something the Federal Government has already done. That seems to me to require no new duties. It is something we would have already accomplished, and I do not see any way that the language within this amendment requires any new duty. So it is clear that what it seeks to do is to stop the process of imposing mandates on the States.

The CHAIRMAN (Mr. DANIELSON). The Chair has studied the amendment, has listened to the arguments of the gentleman raising the point of order and the answer thereto, has checked the precedents of the House, is prepared to rule, and does now rule that the point of order is sustained.

First of all, the Chair adopts the argument advanced by the gentleman from Illinois (Mr. YATES) and points out that under chapter 2C of Deschler's Procedure, section 11.1, any amendment which explicitly or implicitly requires officers of the Government to make investigations, compile evidence, or otherwise make judgments and determinations, not otherwise required by law, would be excessive work and, therefore, subject to the point of order.

Are there other amendments to title III? The Chair hears none.

Mr. DICKS. Mr. Chairman, contrary to the statement made by my colleague from Oregon regarding the intent of my amendment I want to restate that my amendment was simply clarifying in nature. There appears to be some confusion as to the meaning of the three words "by the purchaser". My amendment makes it clear that the meaning of these words is the same as provided in the report language to the 1974 Interior approriations bill.

In no way did my amendment prohibit the gentleman from offering this amendment. I am quite surprised by the gentleman from Oregon's statement that he was blocked. Under the rules of the House his amendment could have been offered. I cannot explain why he chose not to offer it.

● Mr. LOEFFLER. Mr. Chairman, I rise in support of H.R. 4035 and urge the House's favorable consideration of the bill. Mr. Chairman, as this is my first term on the Appropriations Committee, and on the Interior Subcommittee, I wish to express my sincere appreciation to the ranking minority member of the subcommittee, the gentleman from Pennsylvania, and the chairman, the gentleman from Illinois, for their helpful guidance and assistance to me during these past few months. I look forward to working with you, and all members of the subcommittee, in the future.

Mr. Chairman, this bill represents a great deal of effort on the part of the subcommittee to balance fiscal year 1982 spending priorities with the critical need to reduce the growth of Federal spending. The committee and the House have made several major cuts in programs to arrive at a final figure which is $76 million below the President's budget request.

The administration has, however, expressed its reservations regarding the outlay impacts of the changes in spending priorities made by the committee. I share that concern, and would hope that the committee could consider henceforth the outlay impacts of spending changes made by the committee during its deliberations.

Mr. CHAIRMAN, I again want to thank my good friends, the gentleman from Pennsylvania, and the gentleman from Illinois, for their leadership on this bill.

I urge my colleagues to support H.R. 4035.

Thank you, Mr. Chairman. ●

Mr. YATES. Mr. Chairman, I move that the Committee do now rise and report the bill back to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill, as amended, do pass.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. DANIELSON, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee having had under consideration the bill (H.R. 4035) making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 1982, and for other purposes, had directed him to report the bill back to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill, as amended, do pass.

□ 1750

The SPEAKER. Without objection, the previous question is ordered.

There was no objection.

The SPEAKER. Is a separate vote demanded on any amendment?

Mr. WEAVER. Mr. Speaker, I demand a separate vote on the so-called Dicks amendment.

The SPEAKER. Is a separate vote demanded on any other amendment? If not, the Chair will put them en gros.

The amendments were agreed to.

The SPEAKER. The Clerk will report the amendment on which a separate vote has been demanded.

The Clerk read as follows:

Amendment: On page 53, line 5, after the word "the" add "first".

The SPEAKER. The question is on the amendment.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. WEAVER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Would the gentleman from Oregon ask unanimous consent to put this vote over until tomorrow?

Mr. WEAVER. I would be glad to, Mr. Speaker.

I ask unanimous consent to put the vote over until tomorrow.

The SPEAKER. Is there objection to the request of the gentleman from Oregon (Mr. WEAVER)?

Mr. DICKS. Mr. Speaker, I object.

The SPEAKER. Objection is heard.

Mr. DICKS. Mr. Speaker, I withdraw my objection.

The SPEAKER. Then we will have the vote tomorrow and the vote on final passage will be tomorrow.

Further proceedings on this bill, the vote on the amendment and the vote on final passage will take place when the House convenes tomorrow morning.

PARLIAMENTARY INQUIRY

Mr. YATES. Mr. Speaker, I have a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. YATES. Mr. Speaker, at what time is the House meeting tomorrow morning?

The SPEAKER. The House meets at 10 o'clock.

Mr. YATES. I thank the Chair.

DEPARTMENT OF THE INTERIOR AND RELATED AGENCIES APPROPRIATION, 1982

PARLIAMENTARY INQUIRIES

Mr. LEVITAS. Mr. Speaker, I have a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. LEVITAS. Mr. Speaker, I missed out on something. Has the previous question been ordered?

The SPEAKER. In view of the fact that the automatic voting machine is out of order and it would require a call of the roll, unanimous consent has been asked that the amendment as offered by the gentleman from Washington (Mr. DICKS), at the request of the gentleman from Oregon (Mr. WEAVER), will be postponed until tomorrow and the final passage of the bill will be postponed until tomorrow.

Mr. LEVITAS. Mr. Speaker, a further parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. LEVITAS. Is the previous question automatically ordered under the rule, or has the previous question been ordered?

The SPEAKER. The remaining amendments have been agreed to.

Without objection, the previous question was ordered.

The Chair recognizes the gentleman from Illinois (Mr. YATES).

Mr. YATES. Mr. Speaker, I had hoped to finish up the bill tonight.

The SPEAKER. So had the Speaker.

Mr. YATES. Well, I had hoped to finish up the bill tonight and dispose of it once and for all. There is a chance that I might not be here tomorrow.

I would urge the gentleman from Oregon to reconsider.

Mr. WEAVER. I will not reconsider.

Mr. YATES. The gentleman will not reconsider the request for a vote?

Mr. WEAVER. No.

Mr. McDADE. Mr. Speaker, I have a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. McDADE. Mr. Speaker, is it my understanding that the voting machine is still not working?

The SPEAKER. The gentleman is correct.

Mr. YATES. Mr. Speaker, the gentleman from Oregon has graciously consented to withdraw his request for a recorded vote on the Dicks amendment if we can have a vote on final passage tonight.

I would urge the Speaker, even though it will require a long rollcall vote, to have that vote tonight so we may dispose of the bill.

The SPEAKER. The Chair would have to say in respect to the fact that the President of the United States is going to be due on the Hill here at 6 o'clock.

Mr. McDADE. Mr. Speaker, I have a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. McDADE. Mr. Speaker, could we not accommodate the gentleman from Oregon by a teller vote, which would occur quite rapidly and Members would march down the aisle on the yeas and nays and be recorded by their peers that way?

Mr. WEAVER. No.

Mr. McDADE. Well, Mr. Speaker, I have a further parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. McDADE. Mr. Speaker, would the gentleman be satisfied with a division vote?

The SPEAKER. Well, does the gentleman from Washington intend to ask unanimous consent that the vote not be taken?

Mr. WEAVER. Mr. Speaker, if the Speaker would yield, I am going to ask for a recorded vote on final passage, but I am perfectly willing to withdraw, at the request of the chairman of the subcommittee, my request for a separate vote on the so-called Dicks amendment.

The SPEAKER. Well, it is the prerogative of the Chair to postpone the vote on final passage and the Chair will postpone the vote until tomorrow.

Mr. YATES. Mr. Speaker, on final passage?

Mr. SPEAKER. On final passage.

Mr. YATES. Well, I would urge the Chair not to do that, even though the President of the United States is coming over. I think the Members can vote and then go to meet the President of the United States.

I would urge the Chair to have final passage tonight.

The SPEAKER. Well, without objection, the previous unanimous-consent request to place the matter over until tomorrow is vacated and the Chair will put the question de novo on the amendment.

The question is on the amendment offered by the gentleman from Washington (Mr. DICKS).

The amendment was agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER. The question is on the passage of the bill.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. WEAVER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members, and the Clerk will call the roll.

The question was taken, and there were—yeas 358, nays 46, not voting 29, as follows:

[Roll No. 153]

□ 1830

Mr. LOWERY of California changed his vote from "nay" to "yea."

Mr. SENSENBRENNER changed his vote from "yea" to "nay."

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

PERSONAL EXPLANATION

Mr. FORD of Michigan. Mr. Speaker, I ask unanimous consent that the permanent RECORD show I was called from the floor to work on a conference yesterday when rollcall 145 was held. I returned to the building and to the floor too late to vote.

Had I been present I would have voted "yea" on the resolution.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

CHAIRMAN OF WAYS AND MEANS SHOULD COMMIT HIMSELF TO TAX CUT BY AUGUST 1

(Mr. BLILEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BLILEY. Mr. Speaker, I was disturbed by an article in yesterday's New York Times indicating that Ways and Means Committee staff believe it "increasingly doubtful" that the American people will get the tax cut they deserve in time for withholding taxes to be reduced on October 1; instead, they would get refunds after filing returns next spring—8 months late.

This is inexcusable. The only reason to delay is if you do not believe the American people ought to get a tax cut.

I have pointed out before that the House has been in session less time this year than any year since records have been kept, starting in 1947. The American people will not wait until May, because Congress has not worked hard enough to give them the tax cut they need. They want to see a tax cut in their first October paychecks.

I urge my colleagues to join me and express their disapproval of this foot dragging. I have written the chairman of the Ways and Means Committee to call upon him to publicly commit himself to a real tax cut for the American people by August 1.

That is what the American people want. That is what the American people deserve.

HOUSE OF REPRESENTATIVES,
Washington, D.C., July 22, 1981.

Hon. DAN ROSTENKOWSKI,
Chairman, Ways and Means Committee, House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: I was deeply disturbed to read in yesterday's New York Times that members of your staff believe it is "increasingly doubtful" that Congress will pass a tax cut for the American people by August 1.

Even more disturbing is the assertion that it really does not matter whether the tax cut is passed in time to reduce withholding on October 1: the tax cut could be delivered in the form of refund checks next May—eight months late—after the American people have filed their tax returns.

As I commented on the House floor last Thursday, the House of Representatives has been in session less this year than in any year since the CONGRESSIONAL RECORD began publishing legislative activity statistics in 1947. We can pass a tax cut if we want to. Let's not delay America's Economic Recovery any longer. There has been too much foot dragging already.

The American people want and need tax relief now, not some time next year. They will not wait for a refund check until next May because the Congress did not work diligently enough to pass a tax cut by August 1. They want and deserve to see that tax cut in their first October paychecks.

I urge you to disavow the comments of your staff and to commit yourself publicly to final passage of a tax cut by August 1. That is what the American people want. That is what the American people deserve.

Sincerely,

THOMAS J. BLILEY, Jr.

[From the New York Times, July 21, 1981]

CHARITIES FAVORED IN TAX VOTE

(By Edward Cowan)

WASHINGTON, July 20.—By a vote of 97 to 1, the Senate today approved legislation that would let taxpayers who take the standard deduction on their tax returns also claim a separate deduction for charitable contributions.

The proposal was adopted as an amendment to the pending tax-relief bill. Despite the one-sided vote for the amendment, enactment this year seems uncertain. Last week the Democratic majority on the House Ways and Means Committee voted down the proposal, which charities, churches and colleges have been sponsoring since the 1970's.

On the Senate floor, the Administration-sponsored tax-relief bill made slow progress toward final passage. As often happens, the Senate bogged down on what was essentially a side issue. This one was an amendment concerning the voting rights of employees who acquire stock in closely held corporations.

After more than two hours of debate, the Senate approved, 94 to 3, an amendment to let closely held corporations with employee stock ownership plans give their workers nonvoting shares. Opposed were three Democrats: Howard M. Metzenbaum of Ohio, Wendell H. Ford of Kentucky and Gary Hart of Colorado. They argued for retaining the existing law, which requires that employees be given voting rights.

In the House, the Ways and Means Committee did not meet today. It will resume deliberations on a tax bill tomorrow. The Democratic leadership, Speaker Thomas P. O'Neill, Jr. and the House majority leader, Representative Jim Wright, are expected to give their support to passage of a three-year tax-rate cut if the third year is conditioned on achievement of President Reagan's economic goals.

The Treasury Department denounced such a conditional, or "trigger," approach

on the ground that it would create public uncertainty about whether tax rates would be reduced in 1983. The Administration bill would authorize cuts of 5 percent on Oct. 1, then 10 percent in mid-1982 and 10 percent more in mid-1983.

Although President Reagan has pressed repeatedly for final passage of a tax bill by Aug. 1, aides to Dan Rostenkowski, chairman of the Ways and Means Committee, indicated that it was increasingly doubtful that this target could be achieved. The aides again disputed the repeated White House assertions that enactment by Aug. 1 was a prerequisite for a tax cut to take effect on Oct. 1.

Even if enactment comes later, the aides said, perhaps even too late to reduce withholding taxes in 1981, a tax cut could still be delivered by giving taxpayers refund checks next spring after they file their tax returns.

"LENGTHY DEBATE" URGED

Mr. Rostenkowski indicated in a television interview yesterday that he disliked having pressure put on him by the White House to hurry. "I don't think we can hustle through a bill like this," he said. "I think there has to be a lengthy debate."

The Illinois Democrat also seemed to indicate that a House-Senate conference might not be resolved until September, rather than in the two or three days the Administration would like. Saying that the tax staff would have to work carefully in drafting the language of a conference report, Mr. Rostenkowski said that "only in conference can you correct the inequities or the loopholes that surface" after the Senate and House pass their bills.

The only Senator voting against the amendment on charitable deductions was S. I. Hayakawa, Republican of California. Not voting were Paul E. Tsongas, Democrat of Massachusetts, who had signed a letter of support for the proposal, and Mark O. Hatfield, Republican of Oregon. The amendment was introduced by Daniel Patrick Moynihan, Democrat of New York, and Bob Packwood, another Oregon Republican.

HOW METHOD WOULD WORK

As approved, the amendment would authorize deductions equal to 25 percent of contributions in 1982 and 1983 with a maximum deduction of $25 each year. That would cost $38 million in the fiscal year 1982, which starts Oct. 1, 1981, followed by $280 million in the fiscal year 1983 and $390 million in the fiscal year 1984.

In 1984, taxpayers who take the standard deduction could also deduct 25 percent of contributions with no limit. In 1985 the deductible ratio would be 50 percent, and in 1986 it would be 100 percent. The amendment would lapse at the end of 1986 unless reauthorized.

The revenue cost would climb to $1.2 billion in the fiscal year 1985 and $2.8 billion in the fiscal year 1986.

The Internal Revenue Service said that 71 percent of tax returns for 1979 used the standard deductions, as against 52 percent in 1970. Charities, churches and colleges fear that this trend could erode their support from people of medium means.

Republicans on the Joint Economic Committee today released a paper by Robert E. Weintraub, a staff economist, which argued that cutting taxes and enlarging the budget deficit were not necessarily inflationary. Mr. Weintraub, well known as an economist who emphasizes the centrality of the money supply as a cause of inflation, said that much depended on whether the budget deficit was financed by expansion of the money supply or by borrowing from the public's existing stock of money.

THE TERRORIST LOGIC

(Mr. RUDD asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. RUDD. Mr. Speaker, everywhere we look, successful terrorists are being hailed as revolutionary heroes or tomorrow's leaders, and the not so successful ones are being mourned as martyrs. Meanwhile, the free world becomes more complacent to the deliberate and systematic destruction of governments and innocent citizens beyond our borders, and the routine acceptance of terrorist acts goes on.

It has become the tongue of the trade for intellectuals of one breed or another, to write off these events with rhetorical devices, such as blaming all of a society's ills on a set of vague underlying causes. This tactic avoids the real issue at hand. We cannot let this destructive logic cloud our thinking. A terrorist's primary objective is to inspire fear and violence in order to gain political ends. Quite simply, what terrorists do is oppose legitimate solutions to the problems. As long as we ignore this reality, we will continue to face the same dangers other nations have so suddenly encountered.

James Q. Wilson, Shattuck professor of government at Harvard, has written a worthy dissertation on terrorism and its significance which was reprinted in the July 19, 1981, Washington Star, which I would like to share with my colleagues.

[From the Washington Star, July 19, 1981]

THE TERRORIST'S GOAL IS NOT TO SOLVE THE PROBLEM

(By James Q. Wilson)

For a decade or more, the U.S. government, like the governments of most Western powers, was largely silent on the question of Soviet complicity in international terrorism. But beginning in 1979, and culminating in 1981 with the publication of Claire Sterling's book, The Terror Network, the evidence that the Soviet Union had provided, at a minimum, substantial supplies of arms and training facilities to a broad spectrum of terrorist organizations became so compelling that it was difficult to deny it.

Suppose, however, you wished to reject the hypothesis that the Soviet Union, either directly or through its satellite regimes, was deeply involved in a variety of terrorist enterprises. Suppose further that you were skeptical of the claims of unnamed "Western intelligence sources."

You would still have to explain, or explain away, the following facts:

When the wealthy Italian publisher and financial patron of the red underground, Giangiacomo Feltrinelli, was killed by a bomb he was trying to affix to a high-tension pylon near Milan, the police discovered that he had a false passport showing that he had made, under an assumed name, at least 22 visits to Czechoslovakia.

When Gen. Jan Sejna, military counselor to the Central Committee of the Czech Communist Party, defected to the West in 1968, he brought with him a list of 13 Italians, including Feltrinelli, who had attended a KGB school for terrorists set up in Karlovy Mar.

After the Italian police began to crack the Red Brigades, a key leader, Patrizio Peci, confessed, stating, among other things, that Red Brigade members had attended training schools in Czechoslovakia throughout the 1970s and had received Czech-made arms, shipped from Prague by way of Hungary and Austria.

When the Israeli police arrested a Dutch terrorist, Ludwina Janssen, she confessed that she had been trained by Cuban instructors at camps in South Yemen, a Soviet satellite regime, and that there were also in attendance at these camps students from the Provisional Wing of the IRA, the German Revolutionary Cells, and other terrorist groups in Japan, Latin America, and the Middle East. All this was subsequently confirmed by a German terrorist who defected and who had actually taught at a camp in Aden.

When the Irish Navy seized the S.S. *Claudia* in 1973, it was carrying Soviet-bloc arms consigned to the IRA and accompanied by an IRA member. Four years later, another ship was seized off Antwerp—the SS *Towerstream*—and it was also loaded with Soviet-bloc weapons destined for the IRA. In 1971, the Dutch police seized a shipment of Czech arms, ordered by the IRA from Omnipol, an arms factory in Prague. An IRA member was later to write that they ordered the weapons from an illustrated catalogue supplied them in Prague.

When Viktor Sakharov defected from the KGB, he described being trained in the South Yemen camps for his assignment—to work in Kuwait on plans to mount terrorist campaigns in Arab nations and in Turkey.

After several dozen fedayeen were arrested in Israel, they admitted—both to the Israeli police and later to a Canadian Broadcasting Corporation reporter—that they had been trained in Soviet camps located near the Black Sea.

Terrorist training camps in Yemen and Libya were staffed by, among others, Cuban instructors long after Cuba had become totally dependent on the Soviet Union and the Cuban Intelligence Service (DGI) had become an adjunct of the KGB.

In the light of all this, it is h the Soviets direct any terrorist organization. Moscow seems to have had great influence over the Popular Front for the Liberation of Palestine (PFLP) but less over other factions within the Palestine Liberation Organization (PLO). Most of the money for many terrorist groups probably comes, not from the Soviet Union, but from wealthy Arab nations and from criminal activities.

Moreover, right-wing terrorism is on the rise: there have been bombings of a French synagogue, an Italian railroad station, and a

German festival that have been the work, apparently, of various fascist groups.

It ought to be possible to condemn terrorism no matter who commits it, but what passes for an intellectual discussion of the matter today seems not to allow that possibility. Instead of proposing a definition of terrorism and then attempting to deal with it in all its ugly manifestations, we seem locked into the familiar rhetorical tactic of answering a charge by leveling a charge. The key to this is the speed and facility with which one can employ the phrase, "But what about . . .," followed by some atrocity allegedly committed by your opponent:

"The Soviet Union murdered its own citizens in the Gulag."

But what about the Indians at Wounded Knee?

"The IRA Provos kill innocent persons in Belfast."

But what about the torture of Jacobo Timerman by the Argentine police?

"The Soviet Union is supporting world terrorism."

But what about the CIA in Chile?

The tactic is not confined to foreign affairs. When I speak about the problem of urban street crime to a college audience, the first rejoinder is usually, "But what about pollution?" (or poorly designed Pintos, or the Lockheed loan, or Watergate).

DISCUSSION IMPOSSIBLE

The purpose of such tactics, obviously, is to avoid discussion of an issue by changing the subject in a manner that implies the moral inferiority of your opponent. Since there is always more than one evil loose in the world, this method means that no single evil can ever be discussed without discussing all evils simultaneously. And since one cannot, even in principle, discuss all things at once, nothing can be discussed. Moreover, the "but-what-about?" rejoinder implies that the counter-example is precisely analogous to the original example and, thus, that no distinctions among cases can be made. Since the essence of intelligent discussion is the willingness and capacity to make useful distinctions, the "what-about" gambit renders discussion impossible.

An especially deplorable, but by no means unusual, example of this kind of intellectual obfuscation can be found in a review of the Sterling book by Jonathan Marshall. Writing in Inquiry, Marshall asserts that Israel is a client state of the United States much as Cuba is a client of the Soviet Union. Having implied that the two cases are analogous, Marshall can accuse Sterling of practicing a double standard by failing to condemn the "regular practice of terrorism" by Israel, an American "surrogate."

I had not thought that anyone's capacity to make distinctions had atrophied to the point of being unable to find differences between the two instances. The Soviets control the DGI; the Americans, at best, can only envy the Mossad. Israel is a free society with a vociferous opposition; Cuba is a closed society with an imprisoned or emigre opposition. Cuban instructors teach terrorists from a score of nations how to kill in order not to defend Cuba but to "destabilize" the rest of the world; Israel launches reprisals against those who have attacked it. There are few simple rules by which to evaluate the actions of a beleaguered democracy—no doubt some of Israel's acts deserve condemnation—but it is not hard to know what to think of a totalitarian regime that has sold itself, lock, stock, and barrel, to an imperialist power.

TERRORISM DEFINED

Let us try to clear away this thicket of rhetorical tricks and offer a definition of terrorism. Though perhaps it can be improved upon, I would begin with that adopted by a conference on international terrorism held in Jerusalem in 1979; terrorism is the "deliberate, systematic murder, maiming, and menacing of the innocent to inspire fear in order to gain political ends."

Whatever its deficiencies, this definition at least permits one to distinguish between pure terrorism (e.g., random murder in Turkey) and guerrilla warfare directed at the political or military arms of an occupying power. It also suggests a difference between force used to disrupt a particular political or military order and force used to make impossible the maintenance of any form of order under any auspices.

Moreover, the definition implies that one must judge any killing by the extent to which other, less violent means exist to achieve political ends. If terror is practiced in a society with free elections, open courts, and a legitimate opposition, it is more despicable than when terror, even defined as the killing of innocent persons, occurs in a society where no alternative means of change exists. Such a definition can be applied to terror of the Right as well as on the Left, terror practiced by a government as well as terror practiced by those who oppose a government.

If there is one thing wrong with the definition, however, it is the implication that there are known "political ends" toward which terror is customarily directed. Sometimes there are: the aims of terror in the Soviet Union or in Nazi Germany were plain enough—to maintain the position of those in power. But just as often there are not: who can describe in anything more than empty generalities the political aims of the IRA Provos or the Red Brigades? For many of their members, the purpose of terrorism is simply to terrorize. The modern terrorist employs it, not as a last resort, but as a preferred method; as Paul Johnson has written, the terrorist exalts violence over other forms of political activity. This leads in turn to the suppression of the natural moral instincts so that it is no longer easy—perhaps no longer possible—for members of such conspiracies to distinguish between the political zealot and the psychopathic killer. The routinization of violence, the melding of the true believer and the bloodthirsty killer, leads to the final irony. As Johnson has pointed out, terrorism assists in the spread of the totalitarian state.

TERRORISTS VS. HEROES

Not all political violence we see in the world about us deserves to be called terrorism, but enough of it does to make one wonder why some of us strain to call it something else. A favorite intellectual device is to remark that what to one person is a terrorist is to another person a revolutionary hero, as if it were not possible to distinguish between terrorists and heroes. This kind of moral relativism, applied to ordinary shootings, would make it impossible to describe a common criminal. Does anyone really think it especially helpful, or even decent, to remark that one person's mass murderer is another person's "role model"?

We are more inclined to confound terrorists with heroes than we are to confuse psychotic killers with decent people because the former claim a political justification, and we tend to accept political justifications for acts that are otherwise unjustifiable. That acceptance might be defensible—if not persuasive—if we examined with care the justification, but usually we do not. We simply note that a person claims a political motive, that he employs some conventional bits of ideological bluster, and then assume that this must indicate the existence of some well-reasoned political argument that, had we the time and opportunity, we could discover. On the contrary, there is typically less to the matter than meets the ear.

There are essentially two ways of thinking about terrorism. One is to assume that terrorists are but an extreme expression of underlying social injustices and political tensions and that this symptom cannot be treated without first treating the underlying causes. This view is half right: terrorism rarely exists for long where there is neither freedom nor injustice. The error in this view is the assumption that if the underlying causes can be addressed, the extremist systems will disappear.

This is an error because it overlooks the second way of thinking about terrorism—the way Claire Sterling makes so vivid for us. It is that, whatever the root causes of terrorism and the underground political culture that gives it nurture, the terrorists quickly and inevitably develop a stake in opposing solutions to the problems. They will do whatever they can, make whatever alliances are necessary (including alliances with common criminals and homicidal maniacs), to prevent any "political solution" short of the destruction of the state itself. They will thus direct their attacks chiefly against groups desirous of constructive change. The Red Brigades, after all, killed Aldo Moro, a center-liberal politician, and not some monarchist fanatic. The aim of the true terrorist is not to hasten progress, but to provoke a fascist reaction. The most encouraging thing to know about the terrorist network is that in the West, after a dozen years of trying, and endless bloodshed, it has failed.

"NATURAL" RESULT?

This suggests why it is important to recognize that the Soviet Union has aided parts of the terrorist enterprise. It is not because we can get them to stop it (for all I know, they may have stopped already), or because being aware of the facts of Soviet involvement makes it easier to cope with terrorism from a law-enforcement point of view.

The most important reason is that it tells us something about the nature of terrorism itself and puts us on our guard against assuming that it is the natural result of social inequity. If we judge, as we have tended to do, the quality of a society or a regime by the amount of terrorism directed at it, assuming that the level of violence is a measure of the degree of injustice, then we may be making a very great error. For to the extent other nations abet and support terrorism, the correlation, otherwise perhaps natural, between the level of injustice and the level of violence in a democratic society is distorted. So long as we think terrorism natural or inevitable, or wholly the product of underlying causes, we cannot be prepared for what in fact happens. Once West Germany was sufficiently aroused, it was able to destroy the Baader-Meinhof gang without destroying German democracy. After Aldo Moro was murdered, the Italian police broke the back of the Red Brigades. Society did not change; terrorism changed.

THE TAX BILL AND THE BUDGET PROCESS

The SPEAKER pro tempore (Mr. SAM B. HALL, JR.). Under a previous order of the House, the gentleman from Georgia (Mr. GINGRICH) is recognized for 60 minutes.

Mr. GINGRICH. Mr. Speaker, last night I took a special order to begin the process of talking about the ongoing saga of the tax-cut bill.

Tonight I can report that the Democratic leadership bill was voted out of the Ways and Means Committee around 2:20 in the morning, that it included a number of new special interest cuts and changes, possibly the most significant best illustrated in this Washington Star headline this afternoon that says, "Big Oil Industry Break Voted By Democrats."

In other words, as I suggested yesterday, in one last desperate effort to retain power, to hold together a coalition that was rapidly breaking apart, what we have is a Democratic liberal leadership that at the last minute, late at night, not only passed out special breaks for the oil industry, but did so with the help of liberal Democratic votes from Members who have consistently, year after year, attacked the very industry which at the last moment they were convinced to help bail out.

It was not a large bailout. All this talk about helping the common man, the poor man, the Democratic leadership only offered $6.6 billion over the next 5 years.

Let me read the key paragraph in the Washington Star:

> The other, a $6.6 billion 5-year tax break for the oil industry, squeaked by 18 to 17, with all committee Republicans voting against it. It would provide a break averaging between $1 million and $2 million a year for each oil producer.

That is the current tax gift of the party of the common man, $1 million here, $2 million there; help out whatever interest group you have to in order to retain control.

Why are we reduced to this sad shape? As I said last night, since 1971, under liberal Democratic policies, our taxes have gone up 249 percent; that is, if you were paying $100 in taxes in 1971, thanks to the rise in your income just to keep up with inflation, the share of money that your Government took out of your pocket before you got to spend it went up year after year after year so that today it is 249 percent higher.

I will give you another example: In the last 5 years alone, taxes have gone up by 78 percent, more than three-fourths higher than they were just 5 years ago; but our incomes only went up 58 percent. That is, the liberal Democrats designed a tax code so that as your income would go up, your taxes would go up even faster.

□ 1840

If you gained a dollar, the Government gained $1.60. The result was that your income went up 58 percent, but the Government raised your taxes 78 percent. It was not an openly voted raise; it was just a quiet hidden structure in the system.

But this House has the opportunity and the chance to take us off that escalator. This House can make a difference. We now have basically two alternatives, and this chart shows you those alternatives.

I want to bring this a little closer. If you look at this chart, it tells you the big dollar figures. One of the biggest frauds we have heard for the last month is that one side, the liberals, are helping people who earn under $50,000 and the other side, the conservatives, are not. That is just not true.

If you look at the total tax cut for middle-income Americans, in 1984 all middle-income Americans would together get a total of $37.7 billion in tax cuts under the Rostenkowski liberal Democrat tax cut. In that year, under President Reagan's plan, those same Americans would get $43.7 billion in tax cuts.

Now, it is simple to anyone that $37 billion is less than $43 billion, and that the difference is that under the Reagan tax cut you get more money back from the Government. The Government takes less money out of your pocket.

What group are we talking about? Families between $15,000 and $50,000, the working Americans who are the backbone of this country.

Let me go through this one more time because there has been so much confusion and so much distortion. If you are in a family that earns between $15,000 and $50,000, by 1984, under the liberal tax program, you will get back less than under President Reagan's program.

Let me put it differently. If you get a cost-of-living increase, as you have in the past decade, what happens? Remember, you get a little more from your boss and lose a lot more to the Government. Some people actually get pay increases and lose take-home pay because the Government takes more away from them than their boss gives them in pay raises. Many, many people, possibly you, have had this experience.

What does this mean? By 1984, if you are in one of these brackets, if you earn right now $20,000, if that is the amount you earn right now and you get cost-of-living increases in 1984, the Rostenkowski liberal bill is designed in such a way that by 1984 you are actually paying more money than you paid this year.

That is not a tax cut at all in the long run, it is a tax increase, and anyone who votes for the Rostenkowski bill is voting to raise taxes in 1984, not to cut them.

It is the same gimmick we saw throughout the 1970's. They talk of a tax cut, but we never get to spend it because we end up with a tax increase.

Now, let me quote from the President's bipartisan tax program talking paper, a paper put out specifically to help people understand what is happening. I quote as follows:

> The fundamental difference between the two proposals is that the President's plan is a real tax cut while the Rostenkowski-O'Neill plan would allow taxes to continue to increase on working people. The full 25-percent tax cut is essential to provide a real tax cut to working people. Tax rate reductions of more than 22 percent are needed merely to offset the tax increases facing the American people. A 2-year tax cut of 15 percent is no tax cut at all.

In other words, the Rostenkowski tax cut, so-called, turns out to be a tax increase if you hope to get any pay raises. The only way it becomes a tax cut is if you promise not to work hard and do better or get promoted or get a pay raise or get a cost-of-living increase, because if you do any of those things, you end up in a higher bracket under the Rostenkowski liberal bill.

We hear talk that says, "Oh, but this isn't a 2-year bill. This is a 3-year bill with a trigger." This is the latest in a long series of lines designed to confuse the issue. The truth is that there is a phony trigger in the Rostenkowski bill, a trigger which is designed in such a way that it will never work, a trigger which proves, if you just look at the Rostenkowski bill, that it is clearly designed not to work.

Let me explain why. President Reagan has a carefully thought out plan to change the way things have been going, to fight high prices, to bring down interest rates, to cut taxes, to create jobs, and to make America prosperous again. President Reagan's plan cuts Federal spending and cuts taxes. It is designed to create economic growth, with new jobs and new opportunities. Under the plan that he designed, he thinks we will have a $22 billion deficit in 1983.

The Rostenkowski bill takes that figure of $22 billion and puts it into their bill as a trigger. Then they say, "Ah, if we get down to Reagan's level, then we get a third year cut." Then, however, they walk over and change the tax bill and increase the cost of the tax cut to such a degree that it is absolutely guaranteed that we cannot possibly have as small a deficit as President Reagan wants.

In fact, the Rostenkowski bill is a big deficit tax bill. It guarantees bigger Federal expenditures. It guarantees, I think, higher interest rates because the Federal Government clearly will have to borrow more money in 1983 under the Rostenkowski bill.

Then, having passed a tax bill which guarantees that they cannot possibly get to President Reagan's deficit figures, they turn around with a smile and say, "Ah, but if you do, we get the third year." In other words, it is a phony promise in a phony tax bill that will lead to a tax increase.

Asking President Reagan to accept the Rostenkowski tax bill as a step toward the Reagan economic plan is like going to the doctor and saying, "You have to make me well, but I don't want to take the medicine you prescribe. I want to invent my own medicine."

If the O'Neill-Rostenkowski proposal supporters and the liberal Democrats are willing to be responsible for the economy of the country, if they want to take the burden of higher inflation, higher interest rates, and more unemployment, if they want to see Americans out of work, they will want to fight for their bill and pass it. But if they pass it, the burden is theirs because they will not have passed the Reagan economic program and they will not have helped the President fight for recovery.

Let me say that we, the Republicans and the conservative Democrats who have been working together, are committed to a bipartisan tax program. Many conservative Democrats have shown great courage in working with President Reagan to put America above partisanship. We are committed to a real tax program that will genuinely cut taxes, that will leave your money in your pocket, and that will create new jobs.

Let us think of it this way. I represent Jonesboro, Ga., in Clayton County. Our basic goal is to have a tax cut that leaves money back home in Jonesboro so that people in Jonesboro can go into a Jonesboro store and buy things in Jonesboro to create jobs in Jonesboro. We want Clayton County to be prosperous. We want folks in Georgia to have a better future. We think that the only way to do that is to have a real tax cut that hits right at working Americans.

Let me put it a little differently. There is a fancy term called "marginal rates." It is really not very complicated. A marginal tax rate is what you pay on the next $100 of income. It is not what you pay on all of your money. Let us say you are working and earning, say—we will just pick a number—$16,000. If you are working, if you are married and the two of you are making $16,000 and filing a joint return, of the next $100 that you get in a pay raise, $16 of it will go to the Federal Government.

Let us say that you are earning $20,000 a year and filing a joint return. Of the next $100 pay raise, $19 will go to the Federal Government. If you are earning $24,000, that gets up to $22.

In other words, your marginal rate is what happens to the next pay raise you get. As I said earlier, many people find that if they get into a high enough bracket, with the next pay raise they lose money because they are pushed into the higher bracket and have to pay more taxes.

Let us look at a couple of these brackets. What happens under the Rostenkowski-O'Neill bill to someone who is making $16,000 and filing a joint return? Right now they are paying 16 percent on their marginal rate. In 1984, if they get cost-of-living increases over the next 3 years, their taxes will have gone up to a marginal rate of 18 percent.

We are not talking about rich people; we are not talking about a $50,000 income. A couple who earns $16,000, under the Rostenkowski-O'Neill plan, is going to pay 2 percent more on a marginal rate with their next pay raise in 1984 than they paid in 1980.

I think that is wrong. I think it is wrong to pass a tax cut that is a tax increase. I think it is wrong to try to mislead the American people. I think it is wrong to try to put in every possible special interest.

It may be good, as the Washington Star said, to have a "big oil industry break voted by Democrats."

It may be good, as the Washington Star said, to have a "$6.6 billion 5-year tax break for the oil industry, a break averaging between $1 million and $2 million a year each for oil producers."

I do not think it is good for working Americans to have a Rostenkowski-O'Neill bill that is a phony tax cut that will raise their marginal rates, that will leave them with less money, that will cripple President Reagan's recovery plan, that will guarantee fewer jobs, more unemployment, and higher interest rates.

In the next 10 days, you have a chance to change everything. You have a chance to write your Congressman, to phone your Congressman, to visit your Congressman, to say that the time has come as a decade in which my taxes went up on the average by 249 percent. The time has come for a real tax cut that really cuts taxes.

I think you have a chance now to change American history if you will take that opportunity.

CONGRESSIONAL IMPROVEMENT AMENDMENTS OF 1981

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Connecticut (Mr. MOFFETT) is recognized for 5 minutes.

● Mr. MOFFETT. Mr. Speaker, the House Committee on Rules recently held hearings on Representative LOTT's proposed changes in the way in which the House of Representatives conducts its business. I was pleased to speak before that committee in the topic of congressional oversight, to initiate the process of making old laws work, rather than making more new laws.

Unfortunately, our present system does not give Members adequate time to study existing laws, either during debate in committees or in the House Chamber. Our time is constantly eroded away be meaningless procedural votes, often called intentionally to delay the work of the House. The average citizen would be appalled to learn that these votes—to approve the House Journal, to begin consideration under the 5-minute rule, and so forth—cost $25,000 each.

During debate on these matters, valuable time passes, serious consideration of legislation is disrupted and oversight is neglected.

There has to be a better way. Testifying before the Rules Committee, I offered one alternative, a congressional moratorium on new legislation, combined with an oversight and investigative season for 2 or 3 months each year.

The elimination of overlapping subcommittee hearings and other meetings would allow Members to step back and conduct a much-needed sober, scholarly examination of those laws already on the books. We could effect change without having to legislate, by getting rid of the dead wood and drawing attention to those programs which are effective. And, finally, Government could be viewed by the public as helpful rather than ineffective.

I hope that my colleagues will respond to my testimony se we can at least establish a demonstration project in which the drafting of new laws is deferred for a time in favor of making old laws already on the books work.

CONSIDERATION OF HOUSE RESOLUTION 100: THE CONGRESSIONAL IMPROVEMENT AMENDMENTS OF 1981

(Testimony of Congressman TOBY MOFFETT)

Thank you, Representative Moakley and Members of the Committee. I am delighted to have this opportunity to discuss Representative Lott's proposed amendments to the House rules. I applaud the Rules Committee for its attention to the issues which are raised by the Lott resolution. He has recommended some fundamental and thoughtful changes in House procedures—reforms which may sound academic but which are procedurally important—with regard to limiting the number of subcommittees, limiting staff, and focusing the attention of Congress on the oversight of existing federal programs.

My daughter's seventh grade textbook still, in what is an excellent school system, teaches students that a good Congress is one which passes a lot of laws. I am sure that this lesson is taught throughout the country and that this yardstick is being used by textbooks and by teachers. It is an outdated yardstick.

When I first ran for Congress in 1974, I said that we should spend more time

making old laws work than making new laws. My experience since that time has only served to confirm that view.

I have had the honor and privilege of serving with two outstanding oversight chairmen: Representative John Moss of the Commerce Oversight and Investigations Subcommittee, and Representative Ben Rosenthal of the Government Operations Subcommittee on Commerce, Consumer and Monetary Affairs. Those of you on the Committee elected before 1978, when John Moss retired, certainly remember his hearings and the effective way he brought about change in government without legislating.

You'll remember his hard-hitting investigation of the Arab blacklisting of American firms which did business with Israel. And you'll also remember how former Secretary of Commerce, the late Rogers C. B. Morton, attempted to withhold data which identified firms complying with the boycott of Israel. John Moss stood down Secretary Morton, not for political reasons, but for a principle. He did not want the United States government capitulating with or encouraging a form of blackmail, nor did he want our nation's leaders ignoring violations of U.S. laws.

Ultimately, Secretary Morton agreed to transmit this data to our House Oversight Subcommittee. Congress used this data to convince firms that they should not give aid and comfort to the Arab boycott. Our Subcommittee accomplished this without passing legislation or amending a statute. We did it through oversight.

Ben Rosenthal has exercised his Subcommittee's oversight responsibility in a similarly aggressive and successful way. His investigations into such controversial areas as the 1979 oil shortage, the manipulations of the silver market by the Hunt Brothers and the acquisitions of domestic firms for foreign investors serve as textbook examples of how the effectiveness of Congress should be judged.

I have tried to operate in a manner which, if it does not emulate it, does justice to the examples of my colleagues. I chair the Government Operations Subcommittee on Environment, Energy and Natural Resources—a Subcommittee with the luxury of not having to dot the i's and cross the t's of legislation.

Instead, we take a step back and try to determine if the federal departments and agencies under our jurisdiction are actually operating within the mandates of Congress. I would like to talk a little bit about my Subcommittee—not to boast about it—but to try to give the Rules Committee an example of how we work.

It's tempting—since we have under our jurisdiction the Department of Energy, the Environmental Protection Agency, the Nuclear Regulatory Commission, the Army Corps of Engineers, and the Department of the Interior—to set loose our investigative staff on a daily basis. It's tempting to hold a hearing a day. But we resist that temptation and, instead, look in depth at four or five areas per year.

An example: Synfuels. All year, my Subcommittee has been examining the issues revolving around synthetic fuels, the establishment of the Synthetic Fuels Corporation, the awarding of projects, contracts, etc.—a total look at the policy commitment Congress made when we passed the Energy Security Act.

Some of our work has already produced results.

Executives were hired for the Corporation at extravagant salary levels in direct contravention of the mandate in the Energy Security Act (ESA) which stated that, unless impossible, all hiring should take place within the salary ranges of the Senior Executive Service. Our Subcommittee found salaries for the Executives which were set at half-again, double, and triple of what Civil Servants are receiving. Our findings resulted in President Reagan rejecting the total compensation packages for these employees.

Our investigation continues in a number of other fruitful areas, including an inquiry into whether the Department of Energy has awarded contracts to companies which should not be eligible for Federal aid.

These investigations, and the results which we may obtain, matter. If the public has no confidence in the Synthetic Fuels Corporation, its mission will suffer. If the Synthetic Fuels Corporation feels it can operate outside the law, avoiding Congressional oversight, it may never fulfill its function. And the Synfuels program could become a massive 'syn-pork' project that produces no energy. We cannot afford that.

We have had the good fortune to produce reports—like that on the Synfuels program—which won near unanimous approval by the Subcommittee. We might have a dissenting vote or two but, generally speaking, we come out of the Subcommittee and ultimately the full Government Operations committee quite united.

These bi-partisan expressions of concern about the way in which an agency or a department is operating are important. They demonstate that you can have oversight without having legislation. They demonstrate that you can make changes in the behavior of administrative agencies. You can make changes "downtown" in the Executive Offices of the President or of his Cabinet Secretaries, if you are given the time and the breathing space to perform oversight properly.

All of this leads me to ask; when will Congress have the time to perform effective oversight regularly? And, how can we create a situation wherein all Subcommittees of Congress—not just Subcommittees such as mine—have an opportunity to exercise their oversight powers as a regular matter of course?

To help me answer these questions, I went back through about a decade's worth of proposals made by the various Commissions, committees and panels we have created, to help us develop a "blueprint for a House that works." Among all the proposals I examined—and I looked at the Obey Commission, Jerry Patterson's Select Committee, and the work of my former colleague Bob Giaimo with Rep. Hanley—I was most comfortable with the recommendations of former Representative Ned Pattison of New York. Ned Pattison recommended a "legislative moratorium" for a certain period of time; he suggested setting aside the latter part of the year, from October on. Regrettably, nothing came of his proposal.

We need to set aside such a time when no legislation is enacted except in emergencies, when Congress focuses on oversight.

Scheduling is very important. Of course, there are other stimuli: a Chairman exercises his prerogatives; when the Subcommittee Chairman and the Members feel the impacts of the mail, special interest pressure in the best sense of the phrase, or the ebb and flow of current events—these stimulate good oversight activity. But without the breathing space to step back and examine our programs, we won't be able to translate these pressures and influences into action and change.

This breathing space is not now available. We are constantly interrupted by votes on approving yesterday's Journal, on technical procedural matters, on countless other meaningless and unnecessary items. Taxpayers would be shocked to learn that the Clerk of the House estimates that these votes cost $25,000 each! What a waste of time and money; what a waste of private sector expenses for expert witnesses who wait while we cast these solely procedural votes.

Subcommittees which authorize legislation—that is, write new programs or continue old ones—must have an opportunity to do more oversight. The Comptroller General, in his November 22, 1977 report, actually recommended that legislation be written to include oversight mandates. His suggestions included that, during the life of a program's authorization, Congress would receive periodic reports by the program's managers. He suggested a mandatory schedule where the managers would testify as to the current status and effectiveness of the program.

I am not sure that such rigid formulas work or are helpful. The Rules Committee is probably best equipped to make that judgment.

More recently, the entire budget process has had a direct bearing on scheduling and on time constraints. I had requested a Congressional Research analysis of the time used by Committees for hearings, to demonstrate where the most slack time was, such that Congress could suspend its normal legislative routine at that time and devote itself to oversight. I quote from their results:

"This memorandum has shown where slack time exists according to one set of data collected in the 94th Congress. Since then, other elements, most notably the Congressional budget process, have further infringed upon what little legislative slack time existed at the time of the Obey Commission's report and an analysis of the requested data will shed additional light on this subject."

We need to take a hard look at the budget process, particularly with the reconciliation process factored in, to determine where we are and how more oversight can be included. It would be nice to think that Senators and Congressmen, who are trying to resolve the differences between the House and Senate budget-cutting bills, are making their decisions based upon a scholarly analysis or deliberative process with respect to the programs undergoing such severe reductions in funding. But I don't even think that Mr. Reagan would make such an assertion. I would submit that Congress has failed to create a sober scholarly process through which we can analyze what works and what does not.

In fact, Mr. Chairman and Members of the Committee, aren't we largely to blame for the frustration which has resulted in a meat-axe approach to cutting the budget, rather than a more sober process? I think the case could be made that if we had developed a process 10 years ago for finding out what works and what doesn't, then we might not be in the current predicament, where we are going forward with such an imperfect and often brutal mechanism for reducing federal spending.

In sum, I would make a plea that we need some space and time for an oversight session in Congress. If such a proposal is too difficult to schedule, let's at the very least try a demonstration project that might take place in the late fall of a non-election year,

where we would surrender our legislative roles and assume exclusively our oversight function.

There is a "good government" coalition outside of Congress which would include everyone from Ralph Nader to the National Association of Manufacturers, from Common Cause to the Chamber of Commerce, a coalition that would applaud our stepping back and taking a look at the "big picture."

It would be good for the country; it would be good for the Congress; and it might even improve this institution's dismal national approval ratings.●

KING CRIME

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. GONZALEZ) is recognized for 30 minutes.

Mr. GONZALEZ. Mr. Speaker, I would like to say that I am sure that it will be not necessary to use anywhere near the 30 minutes alloted for this special order; but I rise to continue and conclude the last presentation on what I have called and labeled "King Crime."

It has to do with the dastardly murder of Western Judicial District Federal Judge Wood and the prior attempt to assassinate the assistant district attorney for the western district, James Kerr.

At the time I spoke last, I was bringing the House up to date. I have spoken on this matter for better than 2½ years. The first half year was on the attempted murder of James Kerr, which I still believe is fundamental to the solution of the pattern that discerns itself in both crimes, but particularly the murder of Judge Wood.

This is an unprecedented crime. It just has never happened before in the history of the judiciary. The press has said that once before a Federal judge was killed, but that was an entirely different circumstance. It was, indeed, a homicide, but it was related to something nearer akin to passion than to the results of a deliberate intended premeditated crime based on the activities of the most sophisticatedly organized criminal element in the world, which is the syndicate or the organized crime organization of the United States, which I label "King Crime" because their rate of supremacy is undiminished. In fact, it has grown to the admitted point of noncontrol by the law enforcement agencies and those elements in our society that are structured to protect the people from the criminal element.

The connotations and the significance of the meaning behind these crimes continuously agitate my mind and have generated and have triggered off my appearances at this well, this forum. It is, after all, the only thing we do have available to us.

This crime and the other one related to the attempt on James Kerr are clearly an attack on the third branch of our Government, the Judiciary. It has resulted in the intimidation of the judiciary, at least in the western-southern portion of the judiciary system. The members of that and the related agents in the law enforcement constituency in that area, such as the assistant Federal district attorneys, are still under U.S. marshal custody or surveillance, which in itself entails a tremendous cost. It has cost several million dollars to provide this in the last 2½ years.

I have said that it is a sad commentary on our society and our country that while these agents that we have charged with the enforcement of the laws passed by this body should be hiding furtively and under the protection of U.S. marshals and at the same time the criminal element with head high walks the streets with complete untrammeled freedom and not only continues their nefarious trade today, a near $2 billion illicit trade that forms the financial background for the origanization that is clearly implicated in these crimes.

The fact that 2 years and 1½ months, almost 2 years and 2 months after the murder of Judge Wood, there is not even an indication of an indictment is also compounding this sad commentary and sad state of affairs of our society.

I have said and repeat now, we cannot boast of a free and democratic society as long as we have this element of control. We have the incisive penetration into business and government and politics. In fact, as I have said, it is this inextricable link between these communities, the highly organized criminal element and the business and political, that make it possible for us to have developed this terrible form and pattern of criminal and illicit behavior in our country.

Years ago, at the time of the gangster period and the reign of Al Capone, the good people in the Cook County area saw fit to import an English expert on crime and law enforcement. He came over, and being a diligent and an honest man, did not stay long. He tendered his decision and report immediately, almost just weeks after having arrived in the United States and said, "Gentlemen, I would like very much to fulfill the commission that has been authorized me, but I cannot in honor and in truth and efficiency do anything, because I am prepared to study and evaluate and offer recommendations with respect to the control of crime and criminal behavior, but where you have a situation here where you have such a linkage between the political, the official and the criminal element, I must say that once you have made that split between the two and once you have separated this linkage between the criminal element and the political, then call me and I will be glad to come and study the situation."

Well, this, of course, is a lot worse in this latter part of the 20th century than it was in the thirties and early forties. As a matter of fact, we have had such penetration between the organized, syndicated, criminal structure, that today they have penetrated the banking system and every form of business activity that is legitimate and some operating so efficiently that even those involved in the administration of these businesses do not even know who the real boss is behind the scenes.

□ 1900

They have no question, and as I have said since 1970 on the occasion of the Sharpstown scandals, penetrated the highest levels of Government where today the chief law enforcement agencies of the Nation have lost their capacity to penetrate these underground labyrinths of crime, possibly because in the last 1½ years the main elements that the law enforcement agencies, such as the FBI and others had been working with as informers or double agents have been hit, they have been murdered in unprecedented numbers. There is no resolution of their crimes, which means that our law enforcement agencies have no means of controlling this criminal element.

Therefore, they are handicapped, and I think no better illustration of this, in fact, and a terrible illustration of this is the murder of Judge Wood.

I have pointed out, and this is where I left off in the last discussion, the connections between these crimes and others that have remained enshrouded in history. I have said that I am dedicated to the proposition, because I have feared this from the beginning, that we shall prevent in the case of the attempted murder of James Kerr and the murder of Judge Wood, that we will not have the same thing that has happened with the case of Jimmie Hoffa where even the body, the so-called corpus delicti has not even been found, and no ability on the part of our national law enforcement agents to penetrate that crime. It has faded into the dust of history, and we cannot accept at great cost to our democracy, to our form of government and our structure of society, no longer suffer or much longer delay in the resolution not only of the discovery of those who were the direct responsible individuals in the murder and the attempted murder of these two cases, but those behind the scene, and their exposure, and bringing before the bar of justice, and their conviction, and above all, their punishment, because it is a continuing confession that our society has lost even the basic reasons why governments are instituted.

After all, governments were begun from the beginning for the basic protection of life and limb and property, and if we cannot guarantee that, as we are not to our citizens, and particularly those highly placed in the offices of public trust, who have been elected and selected by the people, what it is is a continuing pattern of government by the board and not by the ballot.

In the case of Judge Wood, when the attempt was made to kill the district attorney, James Kerr, I stated then, locally, of course, because I have been concerned for more than a decade, locally, and had appeared before four grand juries, and was a source of information to those grand juries that eventually led to the discernment of such things as the Carrasco Gang, the tremendous rise in the international and especially in the southern border in the illicit drug trade, and especially with the attempt on James Kerr.

Two months before that I had more or less predicted that something of that kind was in the making, because it was clear in the murder of two persons whose murder has still yet to be resolved in the southern portion of the country that there was an emerging new pattern, and that has turned out to be this $2 billion traffic in stolen motor vehicles and automobile parts from the United States into Mexico, and in many instances, in most if not all in exchange for drugs.

In fact, I have said this before, that it has become so refined, this traffic, this give-and-take traffic, that a certain vehicle of a certain make and model and year will bring a certain amount in kilos of a certain drug, whether it is cocaine, heroin, or marihuana. A 1979 Chevy, for example, a pickup will have a certain value in the amount of exchange for brown heroin, for example. That has become so refined, I pointed out at the time, and this was before the attempt on James Kerr, that apparently a very, very substantial and aggressive penetration by organized crime had been made into what had been up to 3 years ago a desultory traffic in stolen vehicles.

The national statistics reflect that.

Three years ago the overwhelming number of reported automobile thefts were attributed to teenagers joyriding and the like. Today the overwhelming preponderant number of automobile thefts is something else, and even the official statistics do not reveal but just the tip of the iceberg of the extent of this traffic because today an inordinate amount is in stolen automobile parts, which because of the lack of identification, the law enforcement officials are unable to enforce even when they make an arrest.

We have had certain "sting" operations, for example, in the Southwest in which in less than 48 hours over 300 stolen vehicles and parts or agents involved in parts transactions have been arrested. Eighty percent of those automobile thefts had not been reported, yet the agents were successful in apprehending 90 percent of those stolen automobiles which were en route, they were not emanating say from the San Antonio area, but they were en route to the border for transportation and exchange and sale south of the border.

That coincided with the increase in and the refinement in the so-called brown heroin market, the so-called Latin American connection which coincided with the closing of the French connection and our Canadian border exposure and closing.

That, incidentally, was due mostly to the work of an agent by the name of Sante Bario. In the meanwhile, after his great work in the exposure of the French connection, he ended up in Mexico City as an agent in charge of the DEA.

Then in 1978 he was arrested in San Antonio and charged, after a very mysterious type of entrapment situation. For example, I have had meetings with the head of the DEA and the agents, and some of those that were involved in the Bario transaction, and they explained to me how they had entrapped Bario in a hotel room in San Antonio. When I asked them if any one of them could speak French they said no. Yet the transaction that exposed Bario was between this highly sophisticated double and triple agent with whom Bario had worked in the custom and fashion which is novelist and unbelievable in the real world, with this third agent and only conversing in French.

□ 1910

So how did the agents know at what point to break into the room? They were listening. They had bugged the room. How did they know, if they did not speak the language?

Bario was arrested and charged with bribery. This was the agent who had broken the French connection. This was the agent who had successfully worked with the New York Crime Commission in busting the corruption that that crime commission exposed prior to Bario's service with the Federal Government.

He was then placed in a jail 80 miles north and west of San Antonio. The attorney he hired, finding it difficult to communicate with his client, complained. And for some reason or another, they brought him into the Bexar County jail in San Antonio. He had not been there half a day before he was given a peanut butter and jelly sandwich to consume, and choked up on it and went into a coma from which he never recovered.

Sante Bario never had his day in court. He vegetated and died 6 months later.

Now, that case has been closed, with many questions unanswered. In my opinion, that case is tied in to the pattern of events which led eventually to the attempt on the life of James Kerr and the murder of Federal Judge Wood. Yet you do not hear anything about that. The case is considered closed. There are very mysterious elements.

There is no question in my mind—and I have some testimony to that effect, except that I have not advanced it because it is not documented, and I have never yet made an allegation that I could not or would not be able and capable of documenting—but there is no question in my mind that Sante Bario was the first one to know, and he should have known—and remember that Sante Bario was arrested on the cheek-by-jowl relationship between the sophisticated criminal Picault, who was not only a double agent, he was a triple agent, who was the one who reported to DEA that Sante Bario was on the take. Yet this is the man who had worked with Sante Bario for years, and Sante Bario knew the danger of working with him, and they expressed it while he was in Mexico City. Yet Picault moved to Mexico City and lived there, and, according to the widow of Sante Bario, was a source of great troublement and worry to both Bario and his wife.

Yet DEA, like other Federal agencies and some other local and State law enforcement agencies, has developed such a noxious pattern of being able to solve crimes, so they say, by working in partnership with the criminal only, which, in my opinion, means that that is a concession of surrender on the part of our law enforcement agents in their ability to solve crime. And anytime anybody has to go into partnership with a criminal, it is my belief and conviction that you become a victim of that criminal. Sooner or later he will be using you. And this is what they have done. And in the case of Sante Bario, there is no question in my mind that he was the first to detect the pattern and the source and the connections between officialdom in Mexico and officialdom in the United States connected with organized crime and the tremendous upsurge in this growing traffic of the importation of drugs into the United States and stolen vehicles into Mexico. There is no question of that in my mind.

Is the fact that he choked up and went into a coma after eating a peanut butter and jelly sandwich coincidental? There is no question in my mind. I am continuing my conversations and contacts with the medical examiner who was called in locally later on. But there are discrepancies between the first and then some of the postexaminations that were made. But it still seems to me that you would have to be very naive and almost believe in every

one of the fairy tales that we have been told and accept unquestionably the series of events beginning with the Sante Bario case, or going even before that, the Carrasco case and the experiences in the Bexar County jail with Carrasco, where Carrasco was treated as if he were in a hotel and continued doing the illicit drug business with a telephone at his command from the jail cell.

Now, it seems to me that given all of those facts, it would have been a mighty, mighty careless and negligent law enforcement agency that would bring a prisoner who had been on the other side of that law enforcement game with drug peddlers, bring him into that kind of an environment where he could be accessible.

Just a week or so ago I was again called by the San Antonio papers with respect to an arrest and an exposure that was making headlines in California, where the FBI apparently had descended on a substantial traffic in stolen automobiles from the California connection. I have brought out for 2 years that there are essentially four flows: The California, the Las Vegas-El Paso, the New York-Chicago-Austin-San Antonio-Laredo and Northern Laredo, and eastern, which incidentally involves the District of Columbia very heavily. There are quite a number of vehicles that have not been found in the District of Columbia area that I am sure have been in Mexico for some time. And that flow is the eastern seaboard down to Florida and across the way to New Orleans, Houston, and the southern border crossing points in Texas and Mexico, Brownsville, and across the way there.

Now we are talking very substantial business, closer to $2 billion than $1½ billion, a pattern which could not exist unless there were intimate connections between many forces, not only in otherwise normal business, but also in officialdom.

So that another headline was the recent arrest in San Antonio of a double agent who had been working very closely with the Drug Enforcement Agency and other law enforcement agencies. And unexpectedly, with him, the arrest of a police sergeant of the San Antonio Police Department which, for the first time, casts shadows on that department. I have been proud of the San Antonio Police Department and have good reason to be.

□ 1920

They have had great efficiency, and as far as I have known, never any involvement such as appears to be the implication now, at least with respect to this one longtime veteran of the force, a sergeant.

But I am saying here and now that this particular double agent who, incidentally, had been convicted and had received a term for his involvement in the old Carrasco gang doings a few years ago, today apparently is apprehended in what the law enforcement said was an unexpected arrest, that they were dealing with this double agent.

He meanwhile is alleging he was entrapped by DEA, that he was given money of a substantial nature by DEA in order to make a purchase of drugs, and says that he was entrapped and that the police sergeant happened to be there to protect him.

But that agent also involved other implications having to do with what the law enforcement agents say in the newspaper is unquestionably some capital funding from yet to be determined sources. They suspect otherwise honorable business sources.

I am saying that if this newly arrested double agent, as in the case of Sante Bario, does find that he is released he had better look out because if he really does open up and start talking, as it would be my hope he would, though I doubt it—because of the peculiar background of this individual—his life will be in danger or jeopardy.

I noticed in the newspaper that there was a big question about the amount of bond and his inability to receive it. He may have made it by the time I am speaking today.

Because it is another thing, let me say by way of parenthesis, for years now, when some of these arrests have been made, particularly of these involved in the international trade, and a bond is placed of $250,000, $350,000, $400,000 as in the case of Judge Wood, a related case of an individual—these individuals have come in with cash payment bonds, with the cash, not the bondsman, but the cash, $250,000 in cash.

As far as I know, no effort is being made or has been made to try to find out how in the world could those resources be made available to a lesser agent who is simply the courier transporting the goods.

Well, I think that the nearest thing that has been done is what has been done on my insistence on the Banking Committee level, where we have gone into the cash flow investigation in our Federal Reserve System and sure enough, the report that I rendered in this forum last year shows an inordinate amount of heavy cash transactions exceeding $5,000 in these areas like Miami, San Antonio, El Paso, and, of course, there is no question the conclusion is inevitable, it is related to the drug traffic and the attempt to launder the money that way. But nothing is being done to follow through and no progress has really been made in the resolution of these dastardly crimes that implicate so much of our own national destiny, so that in an attempt to do something from this level other than just talking, what can one do?

I did intervene at the highest levels with the Jimmy Carter administration. They did respond to a certain extent but I could never, and I have not succeeded in really bringing about this as a national priority, which is what it ought to be.

CONGRESS AND THE FREEDOM OF INFORMATION ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Oklahoma (Mr. ENGLISH) is recognized for 5 minutes.

● Mr. ENGLISH. Mr. Speaker, last week, the Subcommittee on Government Information and Individual Rights, which I chair, conducted 3 days of general oversight hearings on the Freedom of Information Act. During the course of these hearings, the subcommittee heard testimony from 29 witnesses representing the press, the business community, public interests groups, historians, and others. The hearings provided a useful review of the issues that will be the focus of debate on freedom of information.

One issue that was raised at the hearing that may be of general interest to all of my colleagues is the so-called congressional exemption from the Freedom of Information Act. Jonathan Rose, Assistant Attorney General for Legal Policy, recommended that this congressional exemption be reconsidered. He indicated that the administration is not convinced of the wisdom or necessity for the exemption. I would like to take this opportunity to respond.

The Congress of the United States operates in greater openness than any other branch of the Federal Government. I challenge any agency of the executive branch to match this record:

All of the debate on the floor of the House and Senate is open to the public.

The proceedings of the House are televised, and the Senate is currently debating whether to televise its own proceedings.

A full transcript of floor debate for each House is printed and available within 24 hours.

The mark up of legislation at subcommittee and full committee—the fundamental decisionmaking process of our Congress—is normally conducted in open session.

Virtually all hearings are open to the public and press, and transcripts of most hearings are published and freely distributed.

Bills, resolutions, and committee reports are published and freely distributed.

A detailed statement of all expenditures made by Members and commit-

tees is published regularly by the Clerk of the House and the Secretary of the Senate.

If Congress were made subject to the Freedom of Information Act, it is quite likely that less information would have to be made public than is presently disclosed. Some documents now disclosed might fall within the act's exemptions and be subject to withholding. Congressional documents not now regularly disclosed—such as constituent correspondence and staff memorandums—would continue to be exempt from disclosure under the law. Further, if the Government in the Sunshine Act were applied to the Congress, many meetings that are now open to the public could be closed.

Congress is exempt from the FOIA because its own openness already surpasses the requirements of the law. Congress is also exempt in recognition of the status of its Members as elected officials of the United States. Since Members of Congress are accountable directly to the voters, we need not be subject to rules that were designed to apply to appointed officials and bureaucrats who are accountable to no one.

The exemption for Congress cannot be treated in isolation from the exemption for all elected officials. In fact, Congress exempted all elected Federal officials from FOIA. In addition to Members of Congress, the President and Vice President are not covered by the act. Included within the Presidential exemption are the President's personal staff and those units in the Executive Office of the President whose sole function is to advise and assist the President. The congressional exemption is no broader than the exemption for the President.

The decision to exempt Congress from the FOIA was a part of the policy decision to exempt all elected officials. If the administration thinks that it is time to reconsider this exemption, then we should reconsider the exemption for all elected officials, congressional and executive alike.

I am not certain that the repeal of the congressional exemption will have much of an effect on the availability of congressional information. The present disclosure policy of the Congress will be hard to improve upon.●

JUDICIARY SUBCOMMITTEE TO STUDY THE BAIL REFORM ACT OF 1966

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Wisconsin (Mr. KASTENMEIER) is recognized for 5 minutes.

● Mr. KASTENMEIER. Mr. Speaker, I am pleased to announce that the Subcommittee on Courts, Civil Liberties, and the Administration of Justice, which I chair, will begin a series of hearings examining possible amendments to the Bail Reform Act of 1966. Over the years since the enactment of this historic reform in the Federal criminal justice system, suggestions have been made that amendments are needed to strengthen the ability of Federal judges to detain defendants prior to trial for reasons other than to compel their appearance at trial, traditionally the only permissible purpose of pretrial detention. Others have suggested that such options would result in nothing more than preventive detention, an unconstitutional expansion of the function of bail.

Over the next months the subcommittee will conduct a thorough and openminded series of hearings examining the preventive detention question and other issues regarding the Bail Reform Act.

We will begin on July 29 and 30, 1981. Our witnesses will include: Hon. William Hughes, chairman of the House Subcommittee on Crime; Hon. Charles Ruff, U.S. attorney for the District of Columbia; Hon. Gerald Tjoflat, judge of the U.S. Court of Appeals for the Fifth Circuit, and Prof. Daniel Freed, Yale Law School. Additional witnesses will be invited following the August recess.●

EARLY WARNING REPORT OF HOUSE BUDGET COMMITTEE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Oklahoma (Mr. JONES) is recognized for 15 minutes.

● Mr. JONES of Oklahoma. Mr. Speaker, this week the House of Representatives is scheduled to vote on six appropriation bills that provide spending for fiscal year 1982—Interior, HUD-independent agencies, Agriculture, Treasury, Energy-Water, and legislative branch. I have asked the staff of the Budget Committee to continue the briefings that have been provided in the past to members of the Budget Committee and the House. These materials factually compare the total amount of spending and credit provided in these bills with the targets for such spending and credit that resulted from congressional approval of the first budget resolution for fiscal year 1982. I intend to insert into the CONGRESSIONAL RECORD these staff analyses, and analyses of all other appropriations, entitlement, or revenue bills as they are scheduled for floor action. It is my hope to provide these "Early Warnings" to interested Members every Monday. I believe that it is very important for the House to have information that compares such bills to the budget resolution—achievement of the resolution spending targets is not likely to occur unless the Members are clearly aware of the budget impact of their votes.

HOUSE BUDGET COMMITTEE EARLY WARNING REPORT—WEEK OF JULY 20, 1981

H.R. 4034, FISCAL YEAR 1982 HUD-INDEPENDENT AGENCIES

This bill is under its targets for discretionary spending.

Staff analysis

Committee: Appropriations.

Subcommittee: Hud-Independent Agencies.

Chairman: Mr. Boland (Massachusetts).

Ranking minority member: Mr. Green (New York).

Scheduled: Tuesday, July 21, 1981.

I. Description of bill

This bill provides appropriations for HUD, the Environmental Protection Agency, NASA, the Veterans Administration, and several other smaller independent agencies.

The bill as a whole is under the 302(b) targets for this subcommittee by $977 million in budget authority and $756 million in outlays (the sum of lines 5 and 12 below). If amounts assumed in the Budget Resolution but not yet considered are added and mandatory programs are fully funded, the subcommittee could be over its targets by $356 million in budget authority and $470 million in outlays (the sum of lines 7 and 14).

II. Comparison with target for discretionary appropriations action

Pursuant to the Budget Act and HBC scorekeeping, the subcommittee has two targets: one for discretionary programs and one for mandatory programs. Since the Appropriations Committee is bound by existing entitlement law, it generally cannot effectively change the amounts required for the funding of mandatory programs. Its target for discretionary programs is therefore the main focus for this Early Warning report. Further, if the conference report on this appropriation bill exceeds the target for discretionary budget authority, the bill will be subject to the "delayed enrollment" provision of Section 305 of the fiscal year 1982 First Budget Resolution. As shown on line 7 below, the bill plus discretionary amounts not yet considered is below the 302(b) target for discretionary action by $20 million in budget authority and $93 million in outlays.

III. Summary table

[In millions of dollars]

	Budget authority	Outlays
The amounts shown below are only for discretionary 1982 spending in this bill:[1]		
1. Discretionary amounts in bill	48,764	19,298
2. Prior action		
3. Total action to date	48,764	19,298
4. 302(b) target	48,910	19,491
5. Over(+)/Under(−)	−146	−193
6. Amounts assumed but not yet considered	126	100
7. Over(+)/Under(−)	−20	−93
The amounts shown below are only for mandatory appropriations included in this bill:		
8. Mandatory amounts in bill	14,549	13,362
9. Prior action	115	23,368
10. Total	14,664	36,730
11. 302(b) target	15,495	37,293
12. Over(+)/Under(−)	−831	−563
13. Supplemental amounts needed	1,207	1,126
14. Over(+)/Under(−)	+376	+563

[1] In this display, General Revenue Sharing is scored as a discretionary program, consistent with the classification used by the Appropriations Committee in setting its 302(b) targets. GRS is fully funded, so this classification has no impact on whether the bill is under or over its targets.

IV. Explanation of over/under

The total of the 302(b) subdivisions made by the Appropriations Committee must equal the total amounts of the 302(a) allocation, but the assumptions which make up the subcommittee target need not be the same as the program assumptions that underlie the Budget Resolution. The specific assumptions behind the 302(b) target are not known—as a result, the specific programmatic reasons that the bill is over or under the subcommittee targets cannot be precisely identified.

Although this bill is within its 302(b) allocation for total discretionary amounts, there are several differences from the budget resolution and the Omnibus Reconciliation bill, as passed by the House. The bill would appropriate $20.45 billion for new subsidized housing which would support an estimated 179,000 units. This is $2.06 billion more than the House-passed reconciliation bill which would support an estimated 158,000 units. The bill would appropriate $1.2 billion for operating subsidies for public housing, $440 million less than the House-passed reconciliation bill would authorize. The bill would set a limitation of $3.6 billion of 1982 GNMA mortgage purchase commitments, $1.6 billion more than the House-passed reconciliation bill would allow. The bill would appropriate $3.8 billion for community development block grants, $366 million less than the House-passed reconciliation would authorize. The Committee in effect does not follow the administration's block grant approach for community development, which is in the House-passed reconciliation bill, by appropriating a separate $500 million for UDAG.

For mandatory items, the bill plus assumed "full funding" of mandatory items would be over its targets primarily because the targets seem not to make an allowance for the civilian agencies pay raise that will become effective this October. The Budget Committee estimates that $0.2 billion in budget authority and outlays would be needed by this subcommittee for the pay raise.

V. Comparison with the President

This bill is above the President's requests for items in this bill by $190 million in budget authority and $297 million in outlays.

VI. Credit

The Budget Resolution contains nonbinding targets for credit program amounts. This is the first year that there has been a credit scorekeeping system. There is no 302(a) and 302(b) allocation for credit program annual limits. For comparative purposes only, the table below shows the bill and First Budget Resolution assumptions.

[In millions of dollars]

	Direct loan obligations	Primary guarantee commitments	Secondary guarantee commitments
1. Credit program limits in the bill	9,139	39,959	67,000
2. Limits assumed in the Budget Resolution not acted on in the bill			
3. Credit programs not subject to limit	−223	−3,924	
4. Total in bill	8,916	36,035	67,000
5. Budget Resolution assumptions	8,720	32,082	64,208
6. Over(+)/Under(−)	+196	+3,953	+2,792

Within the Appropriation Committee the HUD-Independent Agencies subcommittee has taken the lead on annual credit program limits. This subcommittee, which has the largest credit program jurisdiction within Appropriations, has enacted annual limits for each account requested by the Administration. However, the total limits proposed exceed the non-binding assumptions in the Budget Resolution. The main increase in direct loans is a limit of $260 million for the National Consumer Cooperative Bank, which the administration proposed to terminate. The increase in primary guarantees reflects basically a $4.0 billion increase in FHA mortgage insurance commitments, up to $39.0 billion, over the Resolution assumptions. The increase in secondary guarantees reflects a $2.8 billion increase in GNMA mortgage-backed securities, up to $67.0 billion, over the Resolution assumptions. The committee proposed these latter two increases because it felt that credit assistance limits for housing should not have a ". . . negative effect on the already depressed housing industry. . . ."

VII. Amendments

None known at this time.

VIII. Definitions of terms in summary table, section III

Line 1. Discretionary amounts in bill: discretionary fiscal year 1982 appropriations in H.R. 2000.

Line 2. Prior action: the fiscal year 1982 budget authority and outlays for this subcommittee that were appropriated in prior bills.

Line 3. Total action to date: line 1 plus line 2.

Line 4. 302(b) target: the target for discretionary appropriations for this subcommittee set by the Appropriations Committee pursuant to the Budget Act.

Line 5. Over (+)/Under (−): line 3 minus line 4.

Line 6. Amounts assumed but not yet considered: these are amounts assumed in the fiscal year 1982 Budget Resolution for which funding has been deferred by the Appropriations Committee, probably until next Spring's supplemental appropriation bill.

Line 7. Over (+)/Under (−): line 5 plus line 6.

Line 8. Mandatory amounts in bill: funding for mandatory programs (entitlements).

Line 9. Prior action: outlays from budget authority enacted for years prior to fiscal year 1982, plus any permanents assigned to the Appropriations Committee.

Line 10. Total: line 8 plus line 9.

Line 11. 302(b) target: the target for mandatory amounts for this subcommittee set by the Appropriations Committee. The target set by the Appropriations Committee includes the effect of assumed authorizing legislation that would change the level of mandatory programs.

Line 12. Over (+)/Under (−): line 10 minus line 11.

Line 13. Supplemental amounts needed: amounts for any new entitlement legislation assumed in the Budget Resolution, for the October 1 pay raise, and to fund mandatory items in the bill at the level estimated in the Budget Resolution.

Line 14. Over (+)/Under (−): line 12 plus line 13.

H.R. 4035, FISCAL YEAR 1982 INTERIOR AND RELATED AGENCIES APPROPRIATIONS

The bill is over the budget resolution targets primarily because of the strategic petroleum reserve funded on-budget at $3.4 billion. Both House and Senate versions of the omnibus reconciliation bill contain provisions for moving SPRO funding off-budget. If enacted, funding for SPRO will not be counted against the targets and the bill will be under the targets.

Staff analysis

Committee: Appropriations.
Subcommittee: Interior.
Chairman: Mr. Yates (Illinois).
Ranking Minority Member: Mr. McDade (Pennsylvania).
Scheduled: Tuesday, July 21, 1981.

I. Description of bill

This bill provides funds for the Department of Interior (except the Bureau of Reclamation) and for other related agencies, including the U.S. Forest Service, the Department of Energy, the Smithsonian Institution, and the National Foundation on the Arts and the Humanities.

The bill as a whole is over the 302(b) targets for this subcommittee by $3.0 billion in budget authority and $1.7 billion in outlays (the sum of lines 5 and 12 below). If amounts assumed in the Budget Resolution but not yet considered are added, and mandatory programs are fully funded, the subcommittee could be over its targets by $3.1 billion in budget authority and $1.8 billion in outlays (the sum of lines 7 and 14 below).

II. Comparison with first budget resolution targets

Pursuant to the Budget Act and HBC scorekeeping, the subcommittee has two targets: one for discretionary programs and one for mandatory programs. Since the Appropriations Committee is bound by existing entitlement law, it generally cannot effectively change the amounts required for the funding of mandatory programs. Their target for discretionary programs is therefore the main focus for this Early Warning report. Further, if the conference report on this appropriation bill exceeds the target for discretionary budget authority, the bill will be subject to the "delayed enrollment" provisions of Section 305 of the fiscal year 1982 First Budget Resolution.

As shown on line 7 below, the bill plus discretionary amounts not yet considered exceeds the 302(b) targets for discretionary action by $3.0 billion in budget authority and $1.4 billion in outlays.

III. Summary table

[In millions of dollars]

	Budget authority	Outlays
The amounts shown below are only for discretionary 1982 spending in this bill:		
1. Discretionary amounts in bill	11,182	6,412
2. Prior action		
3. Total action to date	11,182	6,412
4. 302(b) target	8,175	4,986
5. Over (+)/Under (−)	+3,007	+1,426
6. Amounts assumed but not yet considered		
7. Over (+)/Under(−)	+3,007	+1,426
The amounts shown below are only for mandatory appropriations included in this bill:		
8. Mandatory amounts in bill	28	10
9. Prior action		6,595
10. Total	28	6,605
11. 302(b) target	42	6,317
12. Over (+)/Under (−)	−14	+288
13. Supplemental amounts needed	88	85
14. Over (+)/(−)	+74	+373

IV. Explanation of over/under

The total of the 302(b) subdivisions made by the Appropriations Committee must

equal the total amounts of the 302(a) allocation, but the assumptions which make up the subcommittee targets need not be the same as the program assumptions that underlie the Budget Resolution. The specific assumptions behind the 302(b) targets are not known—as a result, the specific programmatic reasons that this bill is over or under the subcommittee targets can not be precisely identified. For illustrative purposes, therefore, the following paragraphs consider the funding levels of certain major programs compared to the nonbinding Budget Resolution assumptions.

When compared to the Budget Resolution the bill is primarily over its targets because of the funding of the Strategic Petroleum Reserve. The bill provides $3.4 billion in budget authority and $1.7 billion in outlays for SPRO. The First Budget Resolution assumed $0.9 billion in budget authority and −$2.2 billion in outlays for SPRO. Thus, the bill is over the First Budget Resolution assumption for SPRO by $2.5 billion in budget authority and $3.7 billion in outlays. The outlay amount assumed for this program in the First Budget Resolution was the result of a $3 billion reduction in outlays from the President's request of $0.8 billion in outlays. The Appropriations Committee, in its 302(b) subdivision, shifted about $2 billion in outlays from other subcommittees to partially offset the unrealistic outlay assumed in the First Budget Resolution.

It is important to note that the reconciliation bill as passed by the House and Senate contains funding for the Strategic Petroleum Reserve off-budget. Therefore, if the reconciliation bill is enacted with SPRO financed off-budget, the funds provided in this appropriation bill for SPRO would be scored off-budget. This action would result in the bill being under its 302(b) targets by about $400 million in budget authority and $100 million in outlays.

The bill also appears to be over the Resolution by about $500 million in budget authority for other programs. The Committee recommended more funding for nearly every other programmatic area including National Park Service operations, Urban Parks, Historic Preservation, federal land acquisition, Indian programs, the Youth Conservation Corps and the National Foundation for the Arts and Humanities. There were also a few decreases in some programs compared to the First Budget Resolution assumptions.

[In billions of dollars]

	Fiscal year 1982 President's request		First budget resolution		302(b) targets		Interior appropriations bill	
	Budget authority	Outlays	Budget authority	Outlays	Budget authority	Outlays	Budget authority	Outlays
Strategic petroleum reserve	3.90	0.55	[1] 0.90	[2] 2.20	(2)	(2)	3.40	1.45
Other DOE	1.00	0.70	1.00	.55	(2)	(2)	1.10	.65
Department of Interior	3.25	1.70	3.20	1.95	(2)	(2)	3.35	2.25
Department of Agriculture (Forest Service)	1.65	1.00	1.65	1.00	(2)	(2)	1.70	1.00
Indian Health	.65	.50	.65	.50	(2)	(2)	.70	.50
Indian Education	.35	.15	.35	.15	(2)	(2)	.40	.20
Smithsonian	.20	.15	.20	.15	(2)	(2)	.20	.15
National Foundation on Arts Humanities	.15	.10	.15	.10	(2)	(2)	.30	.15
Other	.05	.05	.05	.05	(2)	(2)	.05	.05
Total	11.20	4.90	8.15	2.25	8.15	5.00	11.20	6.40
[1] These amounts were derived as follows:								
President's request	3.9	0.8						
	−3.0	−3.0						
First budget resolution	0.9	−2.2						

[2] Not available.

For mandatory items, the bill plus assumed "full funding" of mandatory items would be over its budget authority targets only because the target seem not to make an allowance for the civilian agencies pay raise that will be effective this October. The Budget Committee estimates that $85 million in budget authority would be needed by this subcommittee for the pay raise.

V. Comparison with the President (discretionary amounts only)

This bill is above the President's request by $7 million in budget authority and $1,481 million in outlays.

VI. Credit

The Budget Resolution contains only nonbinding targets for credit program amounts. This is the first year that there has been a credit scorekeeping system. There is no 302(a) and 302(b) allocation for credit program annual limits. For comparative purposes only, the table below shows the bill and First Budget Resolution assumptions.

[In millions of dollars]

	Direct obligations	Primary commitments
1. Credit program limits in bill	15	28
2. Credit limits assumed in Resolution but not acted on in the bill		31
3. Credit programs not subject to limit	32	2,000
4. Total in bill	47	2,059
5. Budget resolution assumption	47	2,059
6. Over(+)/under(−)		

VII. Amendments

None known at this time.

VIII. Definitions of terms in summary table, section III.

Line 1. Discretionary amounts in bill: discretionary FY 1982 appropriations in H.R. 4035.

Line 2. Prior action: the FY 1982 budget authority and outlays for this subcommitee that were appropriated in prior bills.

Line 3. Total action to date: line 1 plus line 2.

Line 4. 302(b) target: the target for discretionary appropriations for this subcommittee set by the Appropriations Committee pursuant to the Budget Act.

Line 5. Over (+)/Under (−): line 3 minus line 4.

Line 6. Amounts assumed but not yet considered: these are amounts assumed in the fiscal year 1982 Budget Resolution for which funding has been deferred by the Appropriations Committee, probably until next Spring's supplemental appropriation bill.

Line 7. Over (+)/Under (−): line 5 plus line 6.

Line 8. Mandatory amounts in bill: funding for mandatory programs (entitlements).

Line 9. Prior action: outlays from budget authority enacted for years prior to fiscal year 1982, plus any permanents assigned to the Appropriations Committee.

Line 10. Total: line 8 plus line 9.

Line 11. 302(b) target: the target for mandatory amounts for this subcommittee set by the Appropriations Committee. The target set by the Appropriations Committee includes the effect of assumed authorizing legislation that would change the level of mandatory programs.

Line 12. Over (+)/Under (−): line 10 minus line 11.

Line 13. Supplemental amounts needed: amounts for any new entitlement legislation assumed in the Budget Resolution, for the October 1 pay raise, and to fund mandatory items in the bill at the level estimated in the Budget Resolution.

Line 14. Over (+)/Under (−): line 12 plus line 13.

H.R. 4144, FISCAL YEAR 1982 ENERGY AND WATER APPROPRIATIONS

This bill is under its targets for discretionary spending.

Staff analysis

Committee: Appropriations.

Subcommittee: Energy and Water Development appropriations.

Chairman: Mr. Bevill (Alabama).

Ranking minority member: Mr. Myers (Indiana).

Scheduled: Tuesday, July 21, 1981 (Tentative).

I. Description of bill

This bill provides funds for the U.S. Army Corps of Engineers, the Bureau of Reclamation, the Department of Energy, the Water Resources Council, the Appalachian Regional Commission, the Nuclear Regulatory Commission and the Tennessee Valley Authority for fiscal year 1982.

The bill as a whole is *under* the 302(b) targets for this subcommittee by $397 million in budget authority and $180 million in outlays (the sum of lines 5 and 12 below). If amounts assumed in the Budget Resolution

but not yet considered are added, and mandatory programs are fully funded, the subcommittee could be under its targets by $346 million in budget authority and $131 million in outlays (the sum of lines 7 and 14).

II. Comparison with target for discretionary appropriations action

Pursuant to the Budget Act and HBC scorekeeping, the subcommittee has two targets: one for discretionary programs and one for mandatory programs. Since the Appropriations Committee is bound by existing entitlement law, it generally cannot effectively change the amounts required for the funding of mandatory programs. Their target for discretionary programs is therefore the main focus for this Early Warning report. Further, if the conference report on this appropriation bill exceeds the target for discretionary budget authority, the bill will be subject to the "delayed enrollment" provision of Section 305 of the fiscal year 1982 First Budget Resolution. As shown on line 7 below, the bill plus discretionary amounts not yet considered is *below* its 302(b) target for discretionary action by $397 million in budget authority and $195 million in outlays.

III. Summary table

[In millions of dollars]

	Budget authority	Outlays
The amounts shown below are only for discretionary 1982 spending in this bill:		
1. Discretionary amounts in bill	13,314	7,184
2. Prior action	.....	.....
3. Total action to date	13,314	7,184
4. 302(b) target	13,711	7,379
5. Over(+)/Under(−)	−397	−195
6. Amounts assumed but not yet considered	.....	.....
7. Over(+)/Under(−)	−397	−195
The amounts shown below are only for mandatory appropriations included in this bill:		
8. Mandatory amounts in bill	.....	.....
9. Prior action	.....	6,011
10. Total	.....	6,011
11. 302(b) target	.....	5,996
12. Over(+)/Under(−)	.....	+15
13. Supplemental amounts needed	51	49
14. Over(+)/Under(−)	+15	+64

IV. Explanation of over/under

Despite the fact that the House Budget Committee is unable to give a definitive answer to the question of *where* a particular bill is over or under its 302(b) allocation, it does compare the items in a bill to the assumptions contained in the Budget Resolution. It is important to note that the line-item assumptions in the Budget Resolution are *not binding* on a committee. Although within the totals requested by the Administration and assumed in the Budget Resolution for this bill, the bill makes several changes among funding priorities including:

An increase of $200 million for the Appalachian Regional Commission which was terminated by the administration (this program was funded at $299 million in fiscal year 1981);

A $302 million reduction in atomic energy defense activities (from a budget request of $4.7 billion, and a fiscal year 1981 program funding level of $3.7 billion);

A $70 million reduction in uranium enrichment construction activities, which according to the committee report does not represent any delay in project schedules because contracts scheduled for award late in fiscal year 1982 would be slipped into early fiscal year 1983.

In addition, the bill provides $228 million in funding for the Clinch River Breeder Reactor Project, and a $115 million increase in solar, geothermal and hydro program activities which are funded largely with funds deferred from fiscal year 1981.

For mandatory items, the bill plus assumed "full funding" of mandatory items would be over its budget authority target only because the target seems not to make an allowance for the civilian agencies pay raise that will become effective this October.

V. Comparison with the President

This bill is below the President's requests for items in the bill by $232 million in budget authority and $153 million in outlays.

VI. Credit

The Budget Resolution contains only nonbinding targets for credit program amounts. This is the first year that there has been a credit scorekeeping system. There is no 302(a) and 302(b) allocation for credit program annual limits. For comparative purposes only, the table below shows the bill and the First Budget Resolution assumptions.

[In millions of dollars]

	Direct loan obligations	Primary guarantee commitments	Secondary guarantee commitments
1. Credit program limits in the bill	31	.....	.....
2. Limits assumed in the budget resolution not acted on in the bill	.....	.....	.....
3. Credit programs not subject to limit	−1	4,502	.....
4. Total in bill	30	4,502	.....
5. Budget resolution assumption	27	4,502	.....
6. Over (+)/under (−)	+3	.....	.....

VII. Amendments

None are certain to be offered but we may expect: A Coughlin amendment to terminate the Clinch River Breeder Project, and a Pritchard amendment to terminate the Tennessee-Tombigbee project.

VIII. Definitions of terms in summary table, section III

Line 1. Discretionary amounts in bill: discretionary FY 1982 appropriations in H.R. 2000.

Line 2. Prior action: the FY 1982 budget authority and outlays for this subcommittee that were appropriated in prior bills.

Line 3. Total action to date: line 1 plus line 2.

Line 4. 302(b) target: the target for discretionary appropriations for this subcommittee set by the Appropriations Committee pursuant to the Budget Act.

Line 5. Over (+)/Under (−): line 3 minus line 4.

Line 6. Amounts assumed but not yet considered: these are amounts assumed in the fiscal year 1982 Budget Resolution for which funding has been deferred by the Appropriation Committee, probably until next Spring's supplemental appropriation bill.

Line 7. Over (+)/Under (−): line 5 plus line 6.

Line 8. Mandatory amounts in bill: funding for mandatory programs (entitlements).

Line 9. Prior action: outlays from budget authority enacted for years prior to fiscal year 1982, plus any permanents assigned to the Appropriations Committee.

Line 10. Total: line 8 plus line 9.

Line 11. 302(b) target: the target for mandatory amounts for this subcommittee set by the Appropriations Committee. The target set by the Appropriations Committee includes the effect of assumed authorizing legislation that would change the level of mandatory programs.

Line 12. Over (+)/Under (−): line 10 minus line 11.

Line 13. Supplemental amounts needed: amounts for any new entitlement legislation assumed in the Budget Resolution, for the October 1 pay raise, and to fund mandatory items in the bill at the level estimated in the Budget Resolution.

Line 14. Over (+)/Under (−): line 12 plus line 13.

H.R. 4119, FISCAL YEAR 1982 AGRICULTURE, RURAL DEVELOPMENT, AND RELATED AGENCIES APPROPRIATIONS

The bill is under its targets for discretionary spending.

Staff analysis

Committee: Appropriations.

Subcommittee: Agriculture.

Chairman: Mr. Whitten (Mississippi).

Ranking minority member: Mrs. Smith (Nebraska).

Scheduled: Wednesday, July 22, 1981 (tentative).

I. Description of bill

This bill provides funds for the Department of Agriculture for fiscal year 1982, and for related independent agencies.

The bill as a whole is under the 302(b) targets for this subcommittee by $1,448 million in budget authority and $1,201 million in outlays (the sum of lines 5 and 12 below). If amounts assumed in the Budget Resolution but not yet considered are added, and mandatory programs are fully funded, the subcommittee could be under its targets by $389 million in budget authority and $222 million in outlays (the sum of lines 7 and 14).

II. Comparison with target for discretionary appropriations action

Pursuant to the Budget Act and HBC scorekeeping, the subcommittee has two targets: one for discretionary programs and one for mandatory programs. Since the Appropriations Committee is bound by existing entitlement law, it generally cannot effectively change the amounts required for the funding of mandatory programs. Its target for discretionary programs is therefore the main focus for this Early Warning report. Further, if the conference report on this appropriation bill exceeds the target for discretionary budget authority, the bill will be subject to the "delayed enrollment" provision of Section 305 of the fiscal year 1982 First Budget Resolution. As shown on line 7 below, the bill plus discretionary amounts not yet considered is under the 302(b) target for discretionary action by $540 million in budget authority and $455 million in outlays.

III. Summary table

[In millions of dollars]

	Budget authority	Outlays
The amounts shown below are only for discretionary 1982 spending in this bill:		
1. Discretionary amounts in bill	20,039	14,777
2. Prior action	−6	.....

III. Summary table—Continued

	Budget authority	Outlays
3. Total action to date	20,033	14,777
4. 302(b) target	21,481	16,148

6. Amounts assumed but not yet considered	908	916
7. Over (+)/Under (−)	−540	−455
The amounts shown below are only for mandatory appropriations included in this bill:		
8. Mandatory amounts in bill	990	2,338
9. Prior action	2,152	1,992
10. Total	3,142	4,330
11. 302(b) target	3,142	4,160
12. Over (+)/Under (−)		+170
13. Supplemental amounts needed	151	63
14. Over (+)/Under (−)	+151	+233

IV. Explanation of over/under

The bill is under the discretionary targets. The total of the 302(b) subdivisions made by the Appropriations Committee must equal the total amounts of the 302(a) allocation, but the assumptions which make up the subcommittee target need not be the same as the program assumptions that underlie the Budget Resolution. The specific assumptions behind the 302(b) targets are not known—as a result, the specific programmatic reasons that the bill is under the subcommittee targets cannot be precisely identified.

The amounts assumed but not yet considered reflects the difference between the Budget Resolution and the amount appropriated by the Appropriations Committee for food stamps. The Appropriations Committee recommended appropriations for food stamps only for the period September 1, 1981, through August 15, 1982. The Appropriations Committee recommended $9,765 million in budget authority for food stamps. This is the full amount requested in the President's budget for fiscal year 1982. The time period restriction imposed by the Appropriations Committee is intended to allow the President time to carefully review the new food stamps law and to analyze the new funding requirement, particularly with regard to the operation of the food stamps program in Puerto Rico.

For mandatory items, the bill plus assumed "full funding" of mandatory items would be over its targets primarily because the targets seem not to make an allowance for the civilian agencies pay raise that will become effective this October.

V. Comparison with the President (discretionary amounts only)

This bill is over the President's requests for items in the bill by $232 million in budget authority and $254 million in outlays.

VI. Credit

The Budget Resolution contains non-binding targets for credit program amounts. This is the first year that there has been a credit scorekeeping system. There is no 302(a) and 302(b) allocation for credit program annual limits. For comparative purposes only, the table below shows the bill and First Budget Resolution assumptions.

[In millions of dollars]

	Direct loan obligations	Primary guarantee commitments	Secondary guarantee commitments
1. Credit program limits in bill	8,080	731	
2. Credit limits assumed in Resolution but not acted on in the bill		5,145	
3. Credit programs not subject to limit	6,736	5,474	
4. Total in bill	14,816	402	
5. Budget Resolution assumption	13,747	−148	
6. Over (+)/Under (−)	+1,069	+550	

The main increases in direct loans are for disaster loans and water and sewer facility loans. The Budget Resolution reflected only $1.35 billion for direct disaster loans. The President's request reflected $1.6 billion for disaster loans of which $250 million were to be guaranteed loans. However, numerous fact sheets by the Administration indicated the Administration had intended the full $1.6 billion be allocated to direct loans. The bill also sets a limit of $450 in direct loans for water and sewer facility loans. The Budget Resolution assumes a zero level.

The main increases in guaranteed loans result from the bill allowing for $300 million in Industrial Development loans and $250 million for alcohol fuel production facilities loans. The Budget Resolution assumes zero levels of funding for both programs. The bill also does not place a limit on Rural Electrification and Telephone Revolving Fund guaranteed loans. The Budget Resolution assumes a limit.

VII. Amendments

None known at this time.

VIII. Definitions of terms in summary table, section III.

Line 1. Discretionary amounts in bill: discretionary fiscal year 1982 appropriations in H.R. 4119.

Line 2. Prior action: the fiscal year 1982 budget authority and outlays for this subcommittee that were appropriated in prior bills.

Line 3. Total action to date: line 1 plus line 2.

Line 4. 302(b) target: the target for discretionary appropriations for this subcommittee set by the Appropriations Committee pursuant to the Budget Act.

Line 5. Over(+)/Under(−): line 3 minus line 4.

Line 6. Amounts assumed but not yet considered: these are amounts assumed in the fiscal year 1982 Budget Resolution for which funding has been deferred by the Appropriations Committee, probably until next Spring's supplemental appropriation bill.

Line 7. Over(+)/Under(−): line 5 plus line 6.

Line 8. Mandatory amounts in bill: funding for mandatory programs (entitlements).

Line 9. Prior action: outlays from budget authority enacted for years prior to fiscal year 1982, plus any permanents assigned to the Appropriations Committee.

Line 10. Total: line 8 plus line 9.

Line 11. 302(b) target: the target for mandatory amounts for this subcommittee set by the Appropriations Committee. The target set by the Appropriations Committee includes the effect of assumed authorizing legislation that would change the level of mandatory programs.

Line 12. Over(+)/Under(−): line 10 minus line 11.

Line 13. Supplemental amounts needed: amounts for any new entitlement legislation assumed in the Budget Resolution, for the October 1 pay raise, and to fund mandatory items in the bill at the level estimated in the Budget Resolution.

Line 14. Over(+)/Under(−): line 12 plus line 13.

H.R. 4121, FISCAL YEAR 1982 TREASURY-POSTAL APPROPRIATIONS

This bill is under its targets for discretionary items.

Staff analysis

Committee: Appropriations.

Subcommittee: Treasury, Postal Service, General Government.

Chairman: Mr. Roybal (California).

Ranking Minority Member: Mr. Miller (Ohio).

Scheduled: Tuesday, July 21, 1981.

I. Description of bill

This bill provides funding for the Department of the Treasury, the U.S. Postal Service, the Executive Office of the President and certain independent agencies for fiscal year 1982.

The bill as a whole is under the 302(b) target in budget authority by $454 million in budget authority and $226 million in outlays (sum of lines 5 and 12 below). If amounts assumed in the Budget Resolution but not yet considered are added, and mandatory programs are "fully funded", the subcommittee could be $228 million under its 302(b) target in budget authority and $114 million in outlays (the sum of lines 7 and 14).

II. Comparison with target for discretionary appropriations action

Pursuant to the Budget Act and HBC scorekeeping, the subcommittee has two targets: one for discretionary programs and one for mandatory programs. Since the Appropriations Committee is bound by existing entitlement law, it generally cannot effectively change the amounts required for the funding of mandatory programs. Its target for discretionary programs is therefore the main focus for this Early Warning report. Further, if the conference report on this appropriation bill exceeds the target for discretionary budget authority, the bill will be subject to the "delayed enrollment" provision of section 305 of the fiscal year 1982 First Budget Resolution. As shown on line 7 below, the bill plus discretionary amounts not yet considered is *below* the 302(b) target for discretionary action by $331 million in budget authority and $235 million in outlays.

III. Summary table

[In millions of dollars]

	Budget authority	Outlays
The amounts shown below are only for discretionary 1982 spending in this bill:		
1. Discretionary amounts in bill	5,675	5,265
2. Prior action		
3. Total action to date	5,675	5,265
4. 302(b) target	6,129	5,512
5. Over (+)/under (−)	−454	−247
6. Amounts assumed but not yet considered	123	12
7. Over (+)/under (−)	−331	−235
The amounts shown below are only for mandatory appropriations included in this bill:		
8. Mandatory amounts in bill	4,091	4,091
9. Prior action		420
10. Total	4,091	4,511
11. 302(b) target	4,091	4,490

III. Summary table—Continued

[In millions of dollars]

	Budget authority	Outlays
12. Over (+)/under (−)		+21
13. Supplemental amounts needed	+103	100
14. Over (+)/under (−)	+103	+121

IV. Explanation of over/under

The total of the 302(b) subdivisions made by the Appropriations Committee must equal the total amounts of the 302(a) allocation, but the assumptions which make up the subcommittee targets need not be the same as the program assumptions that underlie the Budget Resolution. The specific assumptions behind the 302(b) targets are not known—as a result, the specific programmatic reasons that the bill is under the subcommittee targets cannot be precisely identified.

Amounts assumed in the Budget Resolution but not yet considered (line 6) consists of contributions to the international buffer stocks ($120 million in budget authority, $10 million in outlays) and the Domestic Policy staff ($3 million in budget authority and $2 million in outlays).

For mandatory items, the bill plus assumed "full funding" of mandatory items would be over its budget authority target only because the target seems not to make an allowance for the civilian agencies pay raise that will become effective this October.

V. Comparison with the President

This bill is below the President's requests for items in the bill by $220 million in budget authority but is $10 million above the President's requests in outlays.

VI. Credit

None.

VII. Amendments

None known at this time.

VIII. Definitions of terms in summary table, section III

Line 1. Discretionary amounts in bill: Discretionary fiscal year 1982 appropriations in H.R. 2000.

Line 2. Prior action: The fiscal year 1982 budget authority and outlays for this subcommittee that were appropriated in prior bills.

Line 3. Total action to date: line 1 plus line 2.

Line 4. 302(b) target: The target for discretionary appropriations for this subcommittee set by the Appropriations Committee pursuant to the Budget Act.

Line 5. Over (+)/under (−): line 3 minus line 4.

Line 6. Amounts assumed but not yet considered: These are amounts assumed in the fiscal year 1982 budget resolution for which funding has been deferred by the Appropriations Committee, probably until next spring's supplemental appropriation bill.

Line 7. Over (+)/under (−): line 5 plus line 6.

Line 8. Mandatory amounts in bill: Funding for mandatory programs (entitlements).

Line 9. Prior action: Outlays from budget authority enacted for years prior to fiscal year 1982, plus any permanents assigned to the Appropriations Committee.

Line 10. Total: line 8 plus line 9.

Line 11. 302(b) target: The target for mandatory amounts for this subcommittee set by the Appropriations Committee. The target set by the Appropriations Committee includes the effect of assumed authorizing legislation that would change the level of mandatory programs.

Line 12. Over (+)/under (−): line 10 minus line 11.

Line 13. Supplemental amounts needed: Amounts for any new entitlement legislation assumed in the budget resolution, for the October 1 pay raise, and to fund mandatory items in the bill at the level estimated in the budget resolution. For this bill, the only assumed supplemental is for the pay raise.

Line 14. Over (+)/under (−): line 12 plus line 13.

H.R. 4120, FISCAL YEAR 1982 LEGISLATIVE BRANCH APPROPRIATIONS

This bill is under its targets for discretionary spending.

Staff analysis

Committee: Appropriations.
Subcommittee: Legislative Branch.
Chairman: Mr. Fazio (California).
Ranking minority member: Mr. Burgener (California).
Scheduled: Tuesday, July 21, 1981.

I. Description of bill

This bill provides funds for the Legislative Branch for fiscal year 1982.

The bill as a whole is under the 302(b) targets for this subcommittee by $333 million in budget authority and $285 million in outlays (the sum of lines 5 and 12 below). If amounts assumed in the Budget Resolution but not yet considered are added, and mandatory programs are "fully funded", the subcommittee could be under its targets by $53 million in budget authority and $38 million in outlays (the sum of lines 7 and 14).

II. Comparison with target for discretionary appropriations action

Pursuant to the Budget Act and HBC scorekeeping, the subcommittee has two targets: one for discretionary programs and one for mandatory programs. Since the Appropriations Committee is bound by existing entitlement law, it generally cannot effectively change the amounts required for the funding of mandatory programs. Its target for discretionary programs is therefore the main focus for this Early Warning report. Further, if the conference report on this appropriation bill exceeds the target for discretionary budget authority, the bill will be subject to the "delayed enrollment" provision of Section 305 of the fiscal year 1982 First Budget Resolution. As shown on line 7 below, the bill plus discretionary amounts not yet considered is below its 302(b) target for discretionary action by $83 million in budget authority and $63 in outlays.

III. Summary table

[In millions of dollars]

	Budget authority	Outlays
The amounts shown below are only for discretionary 1982 spending in this bill:		
1. Discretionary amounts in bill	529	461
2. Prior action		
3. Total action to date	529	461
4. 302(b) target	612	524
5. Over(+)/under(−)	−83	−63
6. Amounts assumed but not yet considered		
7. Over(+)/under(−)	−83	−63
The amounts shown below are only for mandatory appropriations included in this bill:		
8. Mandatory amounts in bill	572	499
9. Prior action		126
10. Total	572	625
11. 302(b) target	822	847
12. Over(+)/under(−)	−250	−222
13. Supplemental amounts needed	280	247
14. Over(+)/under(−)	+30	+25

III. Summary table—Continued

[In millions of dollars]

	Budget authority	Outlays
10. Total	572	625
11. 302(b) target	822	847
12. Over(+)/under(−)	−250	−222
13. Supplemental amounts needed	280	247
14. Over(+)/under(−)	+30	+25

IV. Explanation of over/under

Despite the fact that the House Budget Committee is unable to give a definitive answer to the question of where a particular bill is over or under its 302(b) allocation, it does compare the items in a bill to the assumptions contained in the Budget Resolution. It is important to note that the line item assumptions in the Budget Resolution are not binding on a committee. A list of the major areas where this bill differs from the Budget Resolution follows:

−$3.4 million in budget authority and −$3.1 million in outlays for the Library of Congress, −$14.0 million in budget authority and −$3.3 million in outlays for the Library's buildings and grounds, −$1.4 million in budget authority and −$1.1 million for GPO and, finally, −$3.2 million in budget authority and −$12.2 million in outlays for congressional printing and binding.

Amounts assumed in the Budget Resolution but not yet considered (line 13) consists entirely of funding for the Senate which is consistent with traditional practice, and funding for the October 1 pay raise. It is this latter item which causes the mandatory total to be exceeded; the target seems not to make an allowance for this pay raise.

V. Comparision with the President

This bill is below the President's requests for discretionary items in the bill by $61.0 million in budget authority and $11 million in discretionary outlays.

VI. Credit

There are no credit items in the bill.

VII. Amendments

None known at this time.

VIII. Definitions of terms in summary table, section III

Line. 1. Discretionary amounts in bill: Discretionary FY 1982 appropriations in H.R. 2000.

Line 2. Prior action: The FY 1982 budget authority and outlays for this subcommittee that were appropriated in prior bills.

Line 3. Total action to date: line 1 plus line 2.

Line 4. 302(b) target: The target for discretionary appropriations for this subcommittee set by the Appropriations Committee pursuant to the Budget Act.

Line 5. Over (+)/under (−): line 3 minus line 4.

Line 6. Amounts assumed but not yet considered: These are amounts assumed in the fiscal year 1982 Budget Resolution for which funding has been deferred by the Appropriations Committee, probably until next spring's supplemental appropriation

Line 7. Over (+)/under (−): line 5 plus line 6.

Line 8. Mandatory amounts in bill: Funding for mandatory programs (entitlements).

Line 9. Prior action: Outlays from budget authority enacted for years prior to fiscal year 1982, plus any permanents assigned to the Appropriations Committee.

Line 10. Total: line 8 plus line 9.

Line 11. 302(b) target: The target for mandatory amounts for this subcommittee set by the Appropriations Committee. The target set by the Appropriations Committee includes the effect of assumed authorizing legislation that would change the level of mandatory programs.

Line 12. Over (+)/under (−): line 10 minus line 11.

Line 13. Supplemental amounts needed: Amounts for any new entitlement legislation assumed in the Budget Resolution, for the October 1 pay raise, and to fund mandatory items in the bill at the level estimated in the Budget Resolution.

Line 14. Over (+)/under (−): line 12 plus line 13.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. SMITH of New Jersey) to revise and extend their remarks and include extraneous material:)

Mr. GINGRICH, for 60 minutes, July 27.

Mr. GINGRICH, for 60 minutes, July 28.

Mr. GINGRICH, for 60 minutes, July 29.

Mr. GINGRICH, for 60 minutes, July 30.

Mr. GINGRICH, for 60 minutes, July 31.

(The following Members (at the request of Mr. GONZALEZ) to revise and extend their remarks and include extraneous material:)

Mr. DANIELSON, for 60 minutes, today.

Mr. MOFFETT, for 5 minutes, today.

Mr. GONZALEZ, for 30 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. ENGLISH, for 5 minutes, today.

Mr. KASTENMEIER, for 5 minutes, today.

Mr. JONES of Oklahoma, for 15 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. MARRIOTT, immediately prior to title II, in the Committee of the Whole.

Mr. ZEFERETTI, to extend his remarks just prior to rollcall No. 152.

Mr. VENTO, prior to the vote on the Dannemeyer amendment in the Committee of the Whole today.

Mr. PANETTA, immediately preceding the reading of title II of H.R. 4035 in the Committee of the Whole today.

Mr. YATES, on the death of Scott Maness, during consideration in the Committee of the Whole of the Fish and Wildlife Service provisions of H.R. 4035.

(The following Members (at the request of Mr. SMITH of New Jersey), and to include extraneous matter:)

Mr. DERWINSKI in two instances.

Mr. ASHBROOK in three instances.

Mr. COLLINS of Texas in two instances.

Mrs. FENWICK.

Mr. LENT.

Mr. SHUMWAY.

Mrs. SCHNEIDER.

Mrs. SNOWE.

Mr. CHAPPIE.

Mr. WINN.

Mr. GINGRICH.

(The following Members (at the request of Mr. GONZALEZ), and to include extraneous matter:)

Mr. MATSUI.

Mr. WAXMAN.

Ms. OAKAR.

Mr. HAMILTON in two instances.

Ms. MIKULSKI.

Mr. ROSE.

Mr. DINGELL in two instances.

Mr. FOLEY.

Mr. BENNETT.

Mr. MILLER of California.

Mr. LEHMAN.

Mr. SIMON in two instances.

Mr. WEISS.

Mr. SMITH of Iowa.

Mr. PEYSER.

Mr. FUQUA.

Mr. OTTINGER.

Mr. EDGAR in two instances.

Mr. GUARINI in five instances.

Mr. DELLUMS.

Mr. HOWARD.

Mr. MOFFETT.

Mr. LUKEN.

Mr. BONKER.

ADJOURNMENT

Mr. GONZALEZ. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; and accordingly (at 7 o'clock and 23 minutes p.m.) the House adjourned until tomorrow, Thursday, July 23, 1981, at 10 a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of the rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1854. A letter from the Secretary of Agriculture, transmitting the annual report of the Rural Electrification Administration for fiscal year 1980, pursuant to section 10 of the act of May 20, 1936; to the Committee on Agriculture.

1855. A letter from the Acting Assistant Secretary of Defense (Comptroller), transmitting notice of the proposed obligation of certain funds in the Air Force stock fund for war reserve stocks, pursuant to section 734 of the Defense Appropriation Act, 1981; to the Committee on Appropriations.

1856. A letter from the Deputy Chief of Naval Material (Contracts and Business Management), transmitting a report as to the validity of a claim by the Grumman Aerospace Corp. arising under a contract for the design, development, and production of a naval electronic warfare training system, pursuant to section 747 of Public Law 94-419; to the Committee on Appropriations.

1857. A letter from the Chairman, Council of the District of Columbia, transmitting D.C. Act 4-69, "To reform the sexual assaults laws of the District of Columbia, and for other purposes," pursuant to section 602(c) of Public Law 93-198; to the Committee on the District of Columbia.

1858. A letter from the Acting Director, Office of Congressional Affairs, Equal Em-

ployment Opportunity Commission, transmitting a report on activities under the Age Discrimination in Employment Act during the last quarter of fiscal year 1979 and fiscal year 1980, pursuant to section 13 of the act; to the Committee on Education and Labor.

1859. A letter from the Administrator, Energy Information Administration, Department of Energy; transmitting reports covering the month of April 1981 on petroleum market shares of refined petroleum products and retail gasoline, pursuant to section 4(c)(2)(a) of the Emergency Petroleum Allocation Act of 1973; to the Committee on Energy and Commerce.

1860. A letter from the Assistant Secretary of State for Congressional Relations, transmitting notice of the State Department's intention to consent to a request by the Government of Australia for permission to transfer certain U.S.-origin military equipment to New Zealand, pursuant to section 3(d) of the Arms Export Control Act; to the Committee on Foreign Affairs.

1861. A letter from the Assistant Secretary of the Treasury for Legislative Affairs, transmitting various project performance audit reports or project completion reports prepared by the International Bank for Reconstruction and Development and the Asian Development Bank, pursuant to section 301(e)(3) of the Foreign Assistance Act of 1961, as amended; to the Committee on Foreign Affairs.

1862. A letter from the Assistant Attorney General for Administration, transmitting notice of proposed changes in an existing records system of the Immigration and Naturalization Service, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

1863. A letter from the Assistant Attorney General for Administration, transmitting notice of a proposed new records system, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

1864. A letter from the Administrator, Sacramento Farm Credit Employees' Retirement Plan; transmitting the annual report of the retirement plan as of December 31, 1980, pursuant to section 121(a)(2) of the Budget and Accounting Procedures Act of 1950, as amended; to the Committee on Government Operations.

1865. A letter from the Director, Community Relations Service, Department of Justice, transmitting the annual report of the Service for fiscal year 1980, pursuant to section 1004 of the Civil Rights Act of 1964; to the Committee on the Judiciary.

1866. A letter from the Register of Copyrights, transmitting a report on the likely effects of the expiration of the manufacturing clause of the copyright law, in response to a request by Senators Scott and McClellan in 1976; to the Committee on the Judiciary.

1867. A letter from the Vice Chairman, Merit Systems Protection Board, transmitting a status report on performance appraisal and merit pay among mid-level employees, pursuant to 5 U.S.C. 1205(a)(3); to the Committee on Post Office and Civil Service.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. UDALL: Committee on Interior and Insular Affairs. H.R. 2015. A bill to enable the Secretary of the Interior to erect permanent improvements on land acquired for the Confederated Tribes of Siletz Indians of Oregon; with an amendment (Rept. No. 97-191). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. UDALL (for himself, Mr. HOWARD, Mr. LUJAN, Mr. CLAUSEN, Mr. MCCOLLUM, Mr. FUQUA, Mr. GIBBONS, and Mr. BREAUX):

H.R. 4230. A bill to facilitate the transportation of coal by pipeline across Federal and non-Federal lands; jointly, to the Committees on Interior and Insular Affairs and Public Works and Transportation.

By Mr. ARCHER (for himself and Mr. PICKLE):

H.R. 4231. A bill to amend sections 169 and 103 of the Internal Revenue Code with respect to tax treatment of pollution control facilities; to the Committee on Ways and Means.

By Mr. EVANS of Iowa:

H.R. 4232. A bill to amend the Internal Revenue Code of 1954 to provide that cost-share payments not used primarily to provide a significant increase in agricultural productivity shall be excluded from gross income; to the Committee on Ways and Means.

By Mr. FLIPPO:

H.R. 4233. A bill to make applicable to the Tennessee-Tombigbee Waterway certain provisions of law relating to taxation on fuel used in commercial transportation on inland waterways; to the Committee on Ways and Means.

By Mr. FRENZEL:

H.R. 4234. A bill to amend the Internal Revenue Code of 1954 with respect to the definition of political contribution; to the Committee on Ways and Means.

By Mr. JEFFRIES:

H.R. 4235. A bill to amend title 5, United States Code, to allow married Federal retirees to modify spousal survivor annuity elections; to the Committee on Post Office and Civil Service.

By Mr. JONES of North Carolina (for himself, Mr. BIAGGI, Mr. BREAUX, and Ms. MIKULSKI):

H.R. 4236. A bill to amend the Internal Revenue Code of 1954 and for other purposes; jointly to the Committees on Ways and Means and Merchant Marine and Fisheries.

By Mr. PAUL:

H.R. 4237. A bill to repeal certain provisions of law relating to the private carriage of letters, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. SMITH of New Jersey:

H.R. 4238. A bill to amend the Internal Revenue Code of 1954 to phase out the Federal estate and gift taxes and the tax on generation-skipping transfers; to the Committee on Ways and Means.

H.R. 4239. A bill to amend the Internal Revenue Code of 1954 to increase the amount of dividends and interest which may be excluded from gross income, and to make such exclusion permanent; to the Committee on Ways and Means.

By Ms. OAKAR:

H. Res. 192. Resolution expressing the sense of the House of Representatives that the President continue to call for a cease-fire along the Lebanese-Israeli border and to provide strong leadership to help insure peace and stability in Lebanon and Israel and in the entire Middle East region; to the Committee on Foreign Affairs

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. HUBBARD:

H.R. 4240. A bill for the relief of Doctor Armando Sandoval, his wife, Holivia Hofilena Sandoval, and their children, Nellissa Sandoval, Armando Sandoval, Jr., Oliver Sandoval, and Katrina Sandoval; to the Committee on the Judiciary.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 1005: Mr. RAILSBACK.

H.R. 1313: Mr. FOWLER and Mr. HAMILTON.

H.R. 1359: Mr. SIMON.

H.R. 1360: Mr. SIMON.

H.R. 1361: Mr. SIMON.

H.R. 1554: Mr. DENARDIS.

H.R. 1894: Mr. JAMES K. COYNE, Mr. NAPIER, Mr. PATTERSON, and Mr. WIRTH.

H.R. 1918: Mrs. SMITH of Nebraska, Mr. ROYBAL, Mr. BARNARD, Mr. RAHALL, Mr. TAYLOR, Mr. WILLIAMS of Ohio, Mr. FIELDS, Mr. MOAKLEY, Mr. SOLOMON, Mr. HORTON, Mr. PATTERSON, Mr. FASCELL, Mr. ROE, and Mr. HARTNETT.

H.R. 1964: Mr. FOGLIETTA, Mr. YOUNG of Missouri, and Mr. BAILEY of Missouri.

H.R. 2322: Mr. MURPHY.

H.R. 2333: Mr. ERTEL, Mr. TAUKE, and Mr. NAPIER.

H.R. 2515: Mr. BARNARD, Mr. BEDELL, Mr. EMERSON, Mr. JEFFRIES, Mr. KOGOVSEK, Mr. STANGELAND, and Mr. WEBER of Minnesota.

H.R. 2833: Mr. GLICKMAN and Mr. GOODLING.

H.R. 2906: Mr. STANGELAND.

H.R. 3083: Mr. STENHOLM and Mr. CHENEY.

H.R. 3269: Mr. FITHIAN, Mr. MATTOX, Mr. GUNDERSON, Mr. SIMON, Mr. RUDD, Mr. UDALL, Mrs. HOLT, and Mr. ANDREWS.

H.R. 3631: Mr. LEVITAS, Mr. STANGELAND, Mr. NELLIGAN, Mr. NAPIER, Mr. GEJDENSON, Mr. BARNARD, and Mr. PATTERSON.

H.R. 3696: Mr. DWYER.

H.R. 3697: Mr. DWYER.

H.R. 4067: Mr. HANSEN of Utah, Mr. COELHO, and Mr. CLAUSEN.

H.J. Res. 174: Mr. NEAL, Mr. WALGREN, Mrs. FENWICK, Mr. RAHALL, Mr. LEHMAN, Mr. BAILEY of Missouri, Mr. BONER of Tennessee, Mr. CHAPPELL, Mr. COURTER, Mr. FAZIO, Mr. GOLDWATER, Mr. CLINGER, Mr. PEPPER, Mr. PURSELL, Mr. RANGEL, Mr. LELAND, Mr. SIMON, Mr. VANDER JAGT, Mr. FORD of Tennessee, Mr. WEISS, Mr. WILLIAMS of Ohio, Mr. CORCORAN, Mr. KEMP, Mr. RODINO, Mr. GILMAN, Mr. MATTOX, Mr. KRAMER, Mr. CAMPBELL, Mr. YOUNG of Alaska, Mr. GINN, Mr. GRADISON, Mrs. SCHNEIDER, Mr. DELLUMS, Mr. DIXON, Mr. DORNAN of California, Mr. KAZEN, Mr. SHAMANSKY, Mr. SOLARZ, Mr. LEACH of Iowa, and Mr. DONNELLY.

H.J. Res. 260: Mr. COURTER, Mr. HANSEN of Idaho, Mr. SHELBY, Mr. LAFALCE, Mr. STATON of West Virginia, Mr. ROTH, Mr. ARCHER, Mr. BROWN of Colorado, Mr. GUNDERSON, Mr. DUNCAN, Mr. LEBOUTILLIER, Mr. WHITEHURST, Mr. BROYHILL, Mr. EMERSON, Mr. HYDE, Mr. MORRISON, Mr. DANNEMEYER, Mr. CHAPPELL, Mr. KINDNESS, Mr. HARTNETT, Mr. WEBER of Ohio, Mr. DYSON, Mr. BETHUNE, Mr. DANIEL B. CRANE, and Mr. GINGRICH.

H. Con. Res. 94: Mr. BEILENSON, Mr. WEAVER, Mr. ASPIN, Mr. FORD of Tennessee, Mr. OTTINGER, Mr. CONYERS, Mr. SIMON, Mr. STOKES, Mr. WOLPE, and Mr. GRAY.

H. Con. Res. 157: Mr. DORNAN of California, Mr. FAZIO, Mr. FINDLEY, Mr. GILMAN, Mr. HUGHES, Mr. MCDONALD, Mr. ROTH, and Mr. SOLOMON.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

141. By the SPEAKER: Petition of the Association of Retired Policemen of the District of Columbia, Inc., Washington, D.C., relative to police retirement benefits; to the Committee on the District of Columbia.

142. Also, petition of the Interstate Oil Compact Commission, Oklahoma City, Okla., relative to natural gas decontrol; to the Committee on Energy and Commerce.

143. Also, petition of the Interstate Oil Compact Commission, Oklahoma City, Okla., relative to mineral accounting; to the Committee on Interior and Insular Affairs.

144. Also, petition of the Interstate Oil Compact Commission, Oklahoma City, Okla., relative to issuance of permits by the U.S. Army Corps of Engineers; to the Committee on Public Works and Transportation.

145. Also, petition of the Interstate Oil Compact Commission, Oklahoma City, Okla., relative to future enhanced oil recovery incentives; to the Committee on Ways and Means.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 4121

By Mr. JACOBS:

—Page 25, line 20, strike out "$1,106,000" and insert in lieu thereof "$293,500".

By Mr. SIMON:

—Page 10, line 14, insert immediately before the period the following: ": *Provided*, That except in accordance with section 404 of title 39, United States Code, no part of any funds appropriated under this title shall be available to plan, administer, or implement the closure or consolidation of any post office of the reduction or suspension of services provided by any post office.".

H.R. 4144

By Mr. LEVITAS:

—Page 31, after line 19, insert the following:

SEC. 504. None of the funds in this Act shall be used to implement, administer, or enforce any regulation which has been disapproved pursuant to a resolution of disapproval duly adopted in accordance with the applicable law of the United States.

By Mr. ROEMER:

—Page 3, line 1, strike out "$1,509,941,000" and insert in lieu thereof "$1,309,941,000".

By Mr. SIMON:

—Page 7, after line 23, insert the following new section:

SEC. 109. From the funds appropriated by the second paragraph of this title for general investigations, not less than $70,000 shall be expended for a study of flooding and drainage problems in Alexander County and Pulaski County, both located in the State of Illinois, and not less than $100,000 shall be expended from funds appropriated for the main stem study of the Ohio River to evaluate alternatives for flood damage reduction in Saline County and Gallatin County, both located in the State of Illinois.

SENATE—*Wednesday, July 22, 1981*

(Legislative day of Wednesday, July 8, 1981)

The Senate met at 10 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, LL.D., D.D., offered the following prayer:

Let us pray.

Loving Father in Heaven, we regret that so often it takes a tragedy to draw us together and make us aware of each other. How often we have been indifferent to someone, have failed to express to him our appreciation, respect and affection, then tragedy overtakes and we remember with regret our negligence.

Forgive us for taking each other for granted, for failing to show honor, gratitude and love. Dear God, do not let us wait until someone dies to appreciate him, do not allow us to have to lose privilege to appreciate it. Keep us from treating people in ways we will regret if they are taken away from us; help us to treat others in ways we will wish we had. We pray this in the name of Him who loved to His death even those who opposed Him. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The majority leader is recognized.

Mr. BAKER. Mr. President, I thank the Chair.

THE JOURNAL

Mr. BAKER. Mr. President, I ask unanimous consent that the Journal of the proceedings be approved to date.

The PRESIDENT pro tempore. Without objection, it is so ordered.

LEGISLATIVE PROGRESS REPORT

ECONOMIC RECOVERY TAX ACT OF 1981

Mr. BAKER. Mr. President, I am pleased to note that the Committee on Ways and Means of the House of Representatives met until the early hours of this morning to complete action on a tax bill in the House of Representatives.

I believe that is a hopeful sign that may indeed reignite the flicker of hope that we can finish this session by the first of the month and keep the schedule adopted earlier in the year for the statutory August recess.

In that connection, Mr. President, there will be a vote at 11 a.m. today on a Dole tabling motion against the Dole amendment (No. 509) in the first degree.

I hope that when this issue is acted upon we can get on with the business at hand and complete action on the tax joint resolution here as it will be necessary, of course, to meet with the House of Representatives in conference on this joint resolution.

As I indicated yesterday, Mr. President, it is my hope that the distinguished minority leader and I, as well as other Senators who are interested, could today actively explore the possibility of one of several possible unanimous-consent agreements to expedite the passage of this measure.

I especially wish to examine the possibility of establishing by unanimous consent the number of amendments yet to be dealt with and the sequence. I have such a list on this side of the aisle, and I hope we will have an opportunity to explore that possibility this morning.

I hope, in the same connection, that we may be able to establish time limitations on the amendments remaining to be disposed of. I optimistically express the hope that they will be very short-time limitations except in the few instances where major issues are yet to be resolved by this body.

So, Mr. President, I think that by the action of the House of Representatives last evening and this morning in ordering the bill reported or at least completing work in order to prepare for that final vote today and by good progress, that I hope and trust the Senate will make on the tax joint resolution here, with our efforts to design unanimous-consent agreements in respect to the amendments to be dealt with, the manner in which they are dealt with, and the time in which they are dealt with, that the Senate can complete action on the tax joint resolution by Friday.

While there is an order for the convening of the Senate on Saturday at 10 a.m., it is my intention to vitiate that order or attempt to do so in the event we can finish this joint resolution on Friday.

If we do that, Mr. President, I think there is some chance, at least perhaps even a good chance, that the House of Representatives and the Senate could complete action on the tax bill and complete the conference process in time for the August recess to begin late on the evening of July 31 or the early morning of August 1.

CONFERENCE ON BUDGET RECONCILIATION ACT

Mr. President, I report as well on the reconciliation conference. This morning I met with Members from the House of Representatives and the Senate in that respect, and I believe very good progress is being made on the budget reconciliation conference.

I think it is fair to say that fully half of the subconferences have completed or virtually completed their work. Of those remaining, some have not completed their work simply because Members have been engaged in other matters, such as debate on the tax joint resolution in this Chamber, or in the Ways and Means Committee, and have not been able to attend the conferences.

I predict that a significant number of subconferences will complete their work today and that it is possible to complete work on the conference between the House of Representatives and Senate on the disagreeing votes on the budget reconciliation bill by Friday of this week as well.

So, Mr. President, it appears that Friday is not only a target day for the House of Representatives and Senate, most especially for the Senate, but of extraordinary import because it offers the promise, at least the potential, for the completion of the budget reconciliation conference and the completion of the tax joint resolution in the Senate.

Mr. President, I have no further need for my time under the standing order.

Mr. President, if any time remains to me under the standing order I am prepared to yield it back or to yield it to the distinguished minority leader or to a Senator.

RECOGNITION OF THE MINORITY LEADER

The PRESIDING OFFICER (Mr. GORTON). The minority leader is recognized.

SOCIAL SECURITY

Mr. ROBERT C. BYRD. Mr. President, I was amazed by President Reagan's letter of July 18 to me and other congressional leaders. I am dismayed that the President of the United States would accuse Members of Congress of "opportunistic political maneuvering, cynically designed to play on the fears of many Americans * * *." I regret that legitimate and strongly held policy disagreements could be characterized in such a political and partisan fashion.

Five months ago, when the President came before the Congress to argue the merits of his budget plan, he said that no budget savings would be made by cutting the social security retirement program. He said:

> The full retirement benefits of the more than 31 million Social Security recipients will be continued along with an annual cost-of-living increase.

These benefits were to be preserved as part of the Nation's safety net.

The checks for some current beneficiaries will soon be cut substantially, not

by any piece of legislation dealing specifically with social security, but through the budget process, and as a result of administration budget proposals.

The depth of benefit cuts in the administration's social security reform plan goes well beyond what might be necessary to insure adequate future financing of retirement benefits. The plan calls for $88 billion in cuts over the next 5 years which grow into a 23-percent cut in total benefit protection, and more than a 40-percent slash in retirement income for people who must retire at age 62. After examining the plan, one can only reasonably conclude that it is part of a larger Federal budget-cutting strategy.

According to the administration's own economic forecasts, upon which their budget plan and tax cut are premised, about $80 billion of the proposed savings would not be needed to pay for benefits during the next 5 years. The administration's program is clearly structured in a suspicious fashion. The administration has steadfastly defended a 3-year tax cut on the grounds of very optimistic assumptions regarding the Nation's future economic performance. In sharp contradiction, it has used extremely pessimistic economic assumptions about our future to evaluate the economic health of the social security system.

The short-term cash flow problems of the retirement trust fund are problems of the economy—high interest rates, unemployment, and low-growth—rather than of demography. The administration has painted a bleak economic future as its basis for justifying immediate, major, and permanent reductions in social security protection. The administration's plan is cruel and inhumane; it is unfair and it is unnecessary.

The nonpartisan, professional Congressional Budget Office has predicted that the short-term cash flow difficulties of the retirement trust fund can be solved by a simple, noncontroversial bookkeeping change: interfund borrowing among the social security system's three separate trust funds.

Health and Human Services Secretary Schweiker recently supported such an accounting change in testimony before the Senate Finance Committee. The Congressional Budget Office has supported this short-range solution, based on economic conditions more pessimistic than the administration's own forecasts, and assuming the benefit cuts which will soon be enacted as part of the President's reconciliation bill.

Last week, when Senate Democrats, under the leadership of Senator MOYNIHAN, attempted to resolve the short-term financing problems of the social security retirement trust fund through interfund borrowing, we were defeated on a party line vote.

The purpose of our action was to find a solution for the immediate, 5-year financing problems of the social security retirement fund, so that any other proposed changes in the social security benefit structure might be considered in a calm, realistic, and moderate manner—with time to examine the implications and reasons for such actions.

The purpose of our action was also to resolve the crisis of confidence, among the American people, regarding the fiscal integrity of the social security system. We welcomed Republican votes in attempting to resolve this crisis. Unfortunately, only one Republican voted with us.

In his letter to me, the President said that:

The highest priority of my administration is restoring the integrity of the social security system.

Th's claim rings hollow when measured against his proposal to slash immediately the benefits of millions of Americans who were planning to retire at age 62 next year. The integrity of the social security system is based on confidence and predictability. This administration has intentionally undermined confidence in the system. Its hastily conceived cuts have seriously eroded the system's predictability.

Mr. President, I shall read the letter of the President addressed to me into the RECORD. Then I shall read my response to the President into the RECORD. The letter from the President is dated July 18, 1981:

DEAR SENATOR BYRD: The highest priority of my Administration is restoring the integrity of the Social Security System. Those 35 million Americans who depend on Social Security expect and are entitled to prompt bipartisan action to resolve the current financial problem.

At the same time, I deplore the opportunistic political maneuvering, cynically designed to play on the fears of many Americans, that some in the Congress are initiating at this time.

It is true, Mr. President, as the President suggests in his letter, that the American people are frightened and concerned. Several thousands of our citizens expressed that fear and concern on yesterday when they braved the 94-degree heat and traveled long distances to petition their Congress and their Government on the west front of the Capitol in the hope of salvaging their dignity and their livel'hood. They came because millions of them are suddenly faced with the real possibility of losing their minimum monthly benefits. They came because they are confronted with living out their retirement years in poverty.

Of course, they can always turn to welfare. That is the cynicism with which this administration apparently views the matter.

They came because, for those who are retiring at age 62 because of ill health or other factors, the administration plans to reduce their benefits by 40 percent—40 percent, Mr. President, at a time when inflation makes affording the bare essentials a tough proposition.

The President writes of "opportunistic political maneuvering, cynically designed to play on the fears of many Americans." Mr. President, those several thousands of our senior citizens who gathered here yesterday on the Capitol lawn came because they are frightened, their "fears" created by the White House and Mr. David Stockman.

They came because David Stockman has told them that the Social Security Fund will be bankrupt in November of 1982.

Yes, they are frightened. They are frightened because the administration has deliberately whipped up anxiety, deliberately exaggerated the direness of the financial situation of the Social Security Fund so that the administration's harsh and unfair proposals will be accepted.

The letter continues:

These efforts appear designed to exploit an issue rather than find a solution to the urgent Social Security problem. They would also have the unfortunate effect of disrupting the budget conference and reversing the actions of a majority of both Houses of the Congress. Such a result would jeopardize our economic recovery program so vital to the well-being of the Nation.

In order to tell the American people the facts, and to let them know that I shall fight to preserve the Social Security System and protect their benefits, I will ask for time on television to address the Nation as soon as possible.

During this address, I will call on the Congress to lay aside partisan politics, and join me in a constructive effort to put Social Security on a permanently sound financial basis as soon as the 97th Congress returns in September.

Sincerely,

RONALD REAGAN.

Mr. President, I responded to the President on yesterday as follows:

DEAR MR. PRESIDENT: This will acknowledge receipt of your July 18 letter, expressing your concern for the 35 million Americans who depend on Social Security for their livelihood. I regret that you suggest in your letter that any deviation from the Administration's proposals on Social Security is "opportunistic political maneuvering, cynically designed to play on the fears of many Americans. . . ."

Your Administration's proposed Social Security cuts are a breach of faith with the American people. Gloom and doom predictions for the financial solvency of the system are severe distortions of the problems faced by the Social Security trust funds.

Since the inception of the Social Security program, no Administration has done more to shake the confidence of the American people in the security of the Social Security system. No Administration has ever before attempted to balance the budget by reducing Social Security benefits.

The "facts" are that the draconian solutions proposed by the Administration simply are not necessary to keep the system solvent in the short run. On July 15, Senator Moynihan offered an amendment which would have solved the foreseeable short-run problems of the system, and allowed for a dispassionate analysis of the long-term problems which the system may face in the next century. But the amendment which provided for borrowing among the three Social Security trust funds was defeated on July 16 by a party-line vote.

We did not wish to make this a partisan issue. We have welcomed Republican votes in support of our efforts. But partisan politics, directed from the White House and the OMB, have time and again resulted in a partisan vote on the Social Security issue.

I would respectfully suggest that your Administration's rhetoric is responsible for much of the fear and panic being experienced by the elderly. In recent testimony, David Stockman, Director of the Office of Management and Budget, stated that "The most devastating bankruptcy in history will occur on or about November 3, 1982." Such fear tactics certainly do not contribute to

the calm and reasoned atmosphere needed to fashion a bipartisan solution to the problems of the system.

I would also suggest, Mr. President, that our elderly citizens were misled by campaign promises to leave the Social Security retirement benefits unscathed by budget cuts. The frustration, anger, and fear we are witnessing now from our senior citizens is a result of those broken promises, and of the exaggeration of the system's problems in order to stampede the American people into support for unfair and ill-reasoned cuts. Balancing the budget is something that we must do, but not on the backs of Social Security beneficiaries.

Democrats stand ready to work for a resolution of the long-range problems of the Social Security system, while protecting the financial security of our elderly in the short run. I believe that such a solution can be found, and that the American people expect us to find it.

Sincerely,

ROBERT C. BYRD.

Mr. President, I ask unanimous consent to have printed in the RECORD the President's letter addressed to me and a resolution which was adopted yesterday by the Democratic Conference.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

THE WHITE HOUSE,
Washington, July 18, 1981.

Hon. ROBERT C. BYRD,
Minority Leader, U.S. Senate,
Washington, D.C.

DEAR SENATOR BYRD: The highest priority of my Administration is restoring the integrity of the Social Security System. Those 35 million Americans who depend on Social Security expect and are entitled to prompt bipartisan action to resolve the current financial problem.

At the same time, I deplore the opportunistic political maneuvering, cynically designed to play on the fears of many Americans, that some in the Congress are initiating at this time. These efforts appear designed to exploit an issue rather than find a solution to the urgent Social Security problem. They would also have the unfortunate effect of disrupting the budget conference and reversing the actions of a majority of both Houses of the Congress. Such a result would jeopardize our economic recovery program so vital to the well-being of the Nation.

In order to tell the American people the facts, and to let them know that I shall fight to preserve the Social Security System and protect their benefits, I will ask for time on television to address the Nation as soon as possible.

During this address, I will call on the Congress to lay aside partisan politics, and join me in a constructive effort to put Social Security on a permanently sound financial basis as soon as the 97th Congress returns in September.

Sincerely,

RONALD REAGAN.

RESOLUTION

Resolved by the Senate Democratic Conference:

Whereas on May 12, 1981, the President proposed precipitous, severe, unnecessary, unfair, and permanent reductions in Social Security benefits; and

Whereas the President's plan strikes at nearly every American who is employed, or has been employed, under the Social Security System; and

Whereas Social Security is the principal pension for most Americans and most private pensions are built on the expectation that employees will also receive social security benefits; and

Whereas the President's plan constitutes a serious breach of faith with Americans currently approaching retirement age, who have contributed to the Social Security System and have planned for their retirement upon the promise of a specific level of Social Security income; and

Whereas for many Americans retirement at age 62 is not a voluntary choice; and

Whereas ill health, unemployment, obsolescent skills, and discrimination force many people into early retirement; and

Whereas trust, confidence, and predictability are basic and essential qualities of the Social Security System; and

Whereas the President promised the American people that no budget savings would be made by reducing basic Social Security retirement benefits and that these benefits would be preserved as part of the Nation's "safety net"; and

Whereas the President's benefit cuts go well beyond what savings might be necessary to insure the future solvency of the Social Security System; and

Whereas on May 20, 1981, the Senate unanimously rejected the President's social security plan by a bipartisan vote of 96 to 0; and

Whereas on March 27, 1981, and June 23, 1981, and July 21, 1981, Democrats in the Senate supported action to preserve basic social security retirement payments to current beneficiaries; and

Whereas on July 16, 1981, Democrats in the Senate attempted to resolve the short-term financing problems of the social security retirement trust fund through interfund borrowing; and

Whereas the Congress would never renege on its commitment to the Nation's retirees, workers, and employers, by allowing the social security trust funds to become insolvent; and

Whereas on July 18, 1981, the President accused Members of the Congress of "opportunistic political maneuvering" regarding social security financing issues, "cynically designed to play on the fears of many Americans"; Now, therefore, be it

Resolved

(1) That the Senate Democratic Conference rejects the characterization of legitimate and constructive legislative actions to preserve social security retirement income for current beneficiaries as "opportunistic political maneuvering"; and

(2) That it is the sense of the Senate Democratic Conference that no change in the social security benefit structure shall be made which is designed to balance the Federal budget rather than insure the financial solvency of the social security system; and

(3) That Democrats in the Senate will continue to fight to defend social security benefits to which the elderly of this country are entitled, to reassure the American people who have been stunned by the President's plan, and to resolve the immediate and long-term financing difficulties of the social security trust funds.

RECOGNITION OF SENATOR THURMOND

The PRESIDING OFFICER. The Senator from South Carolina is recognized for not to exceed 15 minutes.

THE DAVIS-BACON ACT, PART IV, IMPACT ON FEDERAL CONSTRUCTION PROGRAMS

Mr. THURMOND. Mr. President, on Monday I began a discussion on the impact that the Davis-Bacon Act has on Federal construction programs. Today I want to continue that discussion, concentrating on recent findings of several revealing studies.

PART IV—DAVIS-BACON ACT IMPACT ON FEDERAL CONSTRUCTION PROGRAMS

GAO STUDIES

In the past 2 years there have been a number of studies reported to the Congress calling for the repeal of the Davis-Bacon Act and reporting that substantial cost savings to the Federal budget could be realized by repeal of the act. In the most comprehensive analysis of the Davis-Bacon Act to date, the General Accounting Office, GAO, recommended in their April 1979 report that the Davis-Bacon Act is no longer needed and should be repealed.

The GAO estimated that the act added over $700 million to the cost of Federal or federally assisted construction in 1977, and that Department of Labor determined prevailing wage rates ranged from 5 to 15 percent higher than the actually prevailing construction wage rates.

In addition, GAO criticized the DOL's administration of the act and blamed the Department for disrupting local work practices and wage structures nationwide. GAO concluded that Davis-Bacon was incapable of practical administration.

Mr. President, that April 27, 1979, GAO study is an exposé on bad legislation. I urge all my colleagues to get that study and read it. Let me quote from the digest of that report:

The Davis-Bacon Act is no longer needed. Other wage legislation and changes in economic conditions and in the construction industry since the law was passed make the law obsolete; and, the law is inflationary. GAO believes it should be repealed.

Since the act was passed, the Congress has enacted a number of other laws to protect the wages of construction workers, including laws requiring that minimum and overtime rates be paid and laws prohibiting contractors from requesting kickbacks of wages.

After nearly 50 years of administering the Davis-Bacon Act, the Department of Labor has not developed an effective system to plan, control, or manage the data collection, compilation, and wage determination functions. GAO's review of the wage determination activities in five regions and headquarters showed continued inadequacies, problems, and obstacles in Labor's attempt to develop and issue wage rates based on prevailing rates.

In GAO's opinion, Labor's procedures for developing and issuing wage rate determinations provide no assurance that the rates stipulated actually prevail for corresponding classes of workers on similar private construction projects in the locality.

The act results in unnecessary construction costs of several hundred million dollars annually.

I ask unanimous consent that the complete digest of that report be included in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. THURMOND. The GAO did not end its criticism of Davis-Bacon in 1979. A more recent GAO report focusing on the construction of Washington, D.C.

Metro system concluded that the Davis-Bacon requirements will add approximately $150 million, or a 6.8 percent increase, in unnecessary construction costs. And most recently, in his last appearance before the House Budget Committee, retiring Comptroller General Elmer Staats, a man whom we all respect and admire, recommended the repeal of Davis-Bacon as one way to reduce the budget, which would not result in any program reduction.

CONGRESSIONAL BUDGET OFFICE STUDIES

GAO is not alone in recognizing the urgent need for the repeal of the Davis-Bacon Act. In its February 1981 edition of "Reducing the Federal Budget: Strategies and Examples," the Congressional Budget Office, CBO, stated that the repeal of the Davis-Bacon Act would have significant cost-saving benefits.

In that report, CBO examined the cost impact of Davis-Bacon on three programs: Ground transportation, military construction; and EPA construction grants, which when considered together account for about one-half of the Federal construction program.

Based on a conservative estimate of the wage differential between the Labor Department specified Davis-Bacon prevailing wages and actual local prevailing wages of 2.1 percent, CBO calculated savings to the Federal budget over the 1982–86 period to be approxmiately $780 million from just those three programs.

Moreover, at the request of the House and Senate Budget Committees, CBO calculated that by using President Reagan's budget authority figures and an estimated 4.2 percent wage differential, $2.4 billion in outlays could be saved in the budget over the next 5 years by repealing the Davis-Bacon Act.

REPORT OF THE CARTER FORCE

Two years ago, on May 28, 1979, the Carter administration completed a study aimed at addressing the controversy surrounding the Davis-Bacon Act. This study was not immediately released to the public. The Chamber of Commerce of the United States had to file a Freedom of Information suit in order to get a copy. Fortunately, with a change in administration, the Office of Management and Budget readily released the findings last March at the request of Senator HATCH and Senator NICKLES.

This study was summarized in a document entitled "The Options Paper: Interagency Review of Contract Wage Laws." It was compiled by a special OMB task force comprised of Labor Department officials and procurement officials from various agencies including the Defense and Energy Departments, the General Services Administration, and the National Aeronautics and Space Administration.

This report is important because it involves candid and open Cabinet debate on Davis-Bacon by the previous administration. The report took a highly critical view of the act. It said that administrative changes alone could reduce Federal expenditures by about $1 billion. This condemnation was made by officials who oversee the daily administration of the law. The statements tend to confirm what the business community has been saying about Davis-Bacon. It is even more important because the procuring officers now think that the act is highly inflationary, whereas when the act was passed in 1931, procuring officers were among the leading supporters of Davis-Bacon.

Since this study a candid discussion by high-level Carter Cabinet officials, their comments are most helpful in understanding the effects of the act. These officers contend that:

> The way the Labor Department has administered Davis-Bacon disrupts the contract process, bloats their budgets, and contributes to unwarranted inflationary pressures.

They further maintain that:

> The implementation of Davis-Bacon by the Labor Department is inflationary and that procedures followed result in minimum wage determinations that are higher than the actual prevailing wage rates in the locality.

Their final observation is that Davis-Bacon "serves to reduce competition for Federal construction needs."

As part of this study, the interagency task force had a confidential report from President Carter's Council on Economic Advisors. With regard to Davis-Bacon, the study made the following points:

In 13 States for which wage data are available, Davis-Bacon minimum wages are significantly above those in the local labor market for similar types of construction, this despite the fact that the sample was much more heavily unionized than the industry as a whole. The cost-increasing impact of the act was found to be greater, as a rule, in areas of lower unionization, as one would expect.

Minimum fringe benefits on Davis-Bacon projects tend to be set at levels comparable to those mandated by collective bargaining agreements, despite the presence of significant nonunion employment and the generally lower levels of fringe benefits paid to nonunion workers.

Setting Davis-Bacon minimum wages at the local mean wage within each occupation category would reduce the wage premium on Davis-Bacon projects, but, because there is significant dispersion in wage distribution, it would not eliminate that premium for workers. The law would still have the effect of raising many workers' wage above their free-market equilibrium levels.

Employment of helpers is a widespread practice in construction not covered by the act but it is usually not allowed in Davis-Bacon construction. This makes it very likely that comparisons of journeyman-person wage rates to Davis-Bacon minimums understate the cost increasing effect of the law as presently administered.

The staff report concluded that through administrative changes alone, the Government could save over $1 billion and reduce the aggregate rate of inflation by 0.225 percent.

Mr. President, this study performed by the Carter White House needs serious consideration. I want to share key portions of this document with my colleagues. I ask unanimous consent that they be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 2.)

OTHER STUDIES

Mr. THURMOND. An influential group of House Democrats, the Conservative Democratic Forum, in March 1981 recommended the repeal of the Davis-Bacon Act in a package of further budget cuts which they presented to President Reagan. The Conservative Democratic Forum estimated outlay savings of $560 million in fiscal year 1982 alone, from the repeal of Davis-Bacon.

The Associated Builders and Contractors, using OMB and GAO calculations, has estimated that repeal of the Davis-Bacon Act would result in savings to the Federal budget of approximately $5.4 billion in budget authority and $3.9 billion in outlays over the next 5 years. I ask unanimous consent that the figures prepared by the Associated Builders be included in the RECORD following the GAO report digest at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. THURMOND. Mr. President, from the facts I have presented in my last two discussions, it can only be concluded that Davis-Bacon costs the taxpayer money. I want to repeat—this is the GAO speaking and these other groups that have made these studies and it is clear that the Davis-Bacon Act costs the taxpayers money. Tomorrow I will present several case studies with specific examples to demonstrate the impact that Davis-Bacon has on some specific projects.

Mr. President, I yield the floor.

EXHIBIT 1

COMPTROLLER GENERAL
OF THE UNITED STATES,
Washington, D.C.

To the President of the Senate and the Speaker of the House of Representatives:

This is our report to the Congress, "The Davis-Bacon Act Should Be Repealed."

We are recommending that the Congress repeal the Davis-Bacon Act because (1) there have been significant changes in the economy since 1931 which we believe make continuation of the act unnecessary, (2) after nearly 50 years, the Department of Labor has yet to develop an effective program to issue and maintain accurate wage determinations, and it may be impractical to ever do so, and (3) the act is inflationary, and results in unnecessary construction and administrative costs of several hundred million dollars annually.

We are sending copies of this report to the Secretaries of Labor; Commerce; Defense; Health, Education, and Welfare; Housing and Urban Development; Transportation; and the Treasury; the Administrator, Environmental Protection Agency; the Postmaster General; and the Director, Office of Management and Budget.

ELMER B. STAATS.

Digest

COMPTROLLER GENERAL'S REPORT TO CONGRESS

The Davis-Bacon Act should be repealed. The Davis-Bacon Act is no longer needed. Other wage legislation and changes in economic conditions and in the construction industry since the law was passed make the law obsolete; and, the law is inflationary. GAO believes it should be repealed.

The Davis-Bacon Act requires that each contract for the construction, alteration, or repair of public buildings or works in excess of $2,000 to which the United States is a party—or, under 77 related laws, in which the United States shares the financing—state the minimum wages to be paid to various classes of laborers and mechanics. The minimum wages (including fringe benefits) are those determined by the Secretary of Labor to be prevailing for the laborers and mechanics employed on projects of a similar character in the area in the work is to be performed.

The act was intended to discourage nonlocal contractors from successfully bidding on Government projects by hiring cheap labor from outside the project area, thus disrupting the prevailing local wage structure.

GAO believes that the Davis-Bacon Act should be repealed for the following reasons.

SIGNIFICANT CHANGES IN ECONOMIC CONDITIONS AND WORKER PROTECTION LAWS SINCE THE 1930'S

When the act was passed in 1931, the United States was rapidly sliding into the great depression. Construction, which was about $10.8 billion in 1929, fell to $2.9 billion by 1933, and most of that was Government financed.

During the same period, employment in the construction industry declined from 1.5 million in 1929 to about 800,000 in 1933. Competition for contracts and for jobs was great—especially for Government construction. There were no minimum wage laws and no unemployment compensation programs or other laws to protect the wages of workers.

Since the act was passed, the Congress has enacted a number of other laws to protect the wages of construction workers, including laws requiring that minimum and overtime rates be paid and laws prohibiting contractors from requesting kickbacks of wages. (See ch. 3.)

In 1977 about $172.5 billion was spent on new public and private construction projects. About 78.1 percent ($134.7 billion) was for privately financed projects without the prevailing wage protection of the Davis-Bacon Act. The remaining of $37.8 billion was for direct Federal or federally assisted construction spent by State and local agencies and involved an estimated 600 000 prime and subcontracts and an estimated 22 percent of the Nation's 3.8 million construction workers. (See ch. 1.)

THE ACT HAS BEEN AND CONTINUES TO BE IMPRACTICAL TO ADMINISTER

After nearly 50 years of administering the Davis-Bacon Act, the Department of Labor has not developed an effective system to plan, control, or manage the data collection, compilation, and wage determination functions. GAO's review of the wage determination activities in five regions and headquarters showed continued inadequacies, problems, and obstacles in Labor's attempt to develop and issue wage rates based on prevailing rates.

Evaluation of the wage determination files and inquiries regarding 73 wage determinations at five regions and headquarters showed that, in many instances, wage rates were not adequately or accurately determined.

About one-half of the area and project determinations reviewed were not based on surveys of wages paid to workers in the locality, but on union-negotiated rates.

When surveys were made, the data collection and compilation practices were varied and inconsistent within and among regions, and at the headquarters level. There were also problems in identifying similar projects and collecting data from contractors on a voluntary basis.

Further, Labor deleted, added, and changed the wage data received without adequate reason or rationale. As a result, many of the worker classifications and rates issued did not represent the prevailing wages paid in the locality.

In GAO's opinion, Labor's procedures for developing and issuing wage rate determinations provide no assurance that the rates stipulated actually prevail for corresponding classes of workers on similar private construction projects in the locality. (See ch. 4.)

INCORRECT RATES ARE INFLATIONARY ON THE LOCAL AND NATIONAL ECONOMY

GAO's review of 30 Federal or federally assisted projects, costing an estimated $25.9 million, showed that the majority of the rates issued by Labor were higher than the prevailing rates in 12 of the localities and lower in the other 18. In the 12 determinations where Labor's rates were higher, wage costs paid on the projects averaged 37 percent more than the comparable wage costs at rates prevailing in the localities. The higher wage costs ranged from a low of 5 percent to a high of 123 percent. As a result, Federal construction costs may have been inflated by an average of 3.4 percent. The increases ranged from 1 to nearly 9 percent. (See ch. 5.)

While GAO's selection of the 30 projects was made on a random sample basis, the sample size was insufficient for projecting the results to all Federal or federally assisted construction costs during the year with statistical validity. However, even in the absence of statistical certainty, the random nature of GAO's sample leads it to believe that, if these projects are representative (and GAO has no reason to believe they are not), the act results in unnecessary construction costs of several hundred million dollars annually. (See pp. 77 and 78.)

The inflated wage costs may have had the most adverse effect on the local contractors and their workers—those the act was intended to protect—by promoting the use of nonlocal contractors on Federal projects. Nonlocal contractors worked on the majority of these projects, indicating that the higher rates may have discouraged local contractors from bidding.

In the 18 projects where Labor's rates were lower than those prevailing locally, local contractors were generally awarded the contracts. They generally paid workers the prevailing rates in the community—higher rates than those stipulated by Labor. Thus, the act's intent—to maintain the local prevailing wage structure—is carried out only when the administration of the act has no effect.

In addition, the act and a related weekly payroll reporting requirement of the Copeland Anti-Kickback Act result in unnecessary contractor costs—which are passed on to the Government—estimated at almost $191.6 million for 1976 and $189.1 million for 1977. In addition, estimated unnecessary costs of $10.9 million in 1976 and $12.4 million in 1977 were incurred by Federal agencies to attempt to administer and enforce the act. (See ch. 6.)

The excessive wage determinations have an inflationary effect on areas covered and, because of the large volume of covered construction (about $37.8 billion in 1977), on the construction industry and the national economy as a whole.

CONCLUSION

GAO believes that Davis-Bacon Act wage determinations could be eliminated with the same success achieved by eliminating wage determinations for workers on Federal contracts for supplies and materials under the Walsh-Healey Public Contracts Act. For the past 14 years Labor has issued no determinations under that act for the largest segment of Federal contractor employees, and apparently no adverse effect on wage rates of the workers involved has been evident. (See pp. 25 to 27.)

GAO believes that the significant changes in the Nation's economic conditions and the economic character of the construction industry since 1931, plus the passage of other wage laws, make the Davis-Bacon Act unnecessary. Moreover, the legislative intent—not to disturb local wage standards—is often not met; it is met only when Labor's wage determinations are lower than the wages prevailing in the project area.

RECOMMENDATIONS TO THE CONGRESS

The Congress should repeal the Davis-Bacon Act. GAO also recommends that the Congress rescind the weekly payroll reporting requirement of the Copeland Anti-Kickback Act.

In addition, the Congress should repeal the provisions in 77 related statutes which involve federally assisted construction projects and which require that wages paid to contractor employees be not lower than those determined by the Secretary of Labor to prevail in the locality, in accordance with the Davis-Bacon Act.

AGENCY COMMENTS

Officials of the Office of Management and Budget disagreed with GAO's recommendations and said that problems in implementing the Davis-Bacon Act could be resolved where appropriate, modification of Labor's through administrative action including, implementing regulations.

GAO disagrees. It believes the problems and inadequacies it has identified—over almost 20 years of reviews—cannot be corrected or improved significantly by any administrative action, regulation modification, or application of additional resources to program administration. (See p. 13.)

Labor officials also disagreed with GAO's recommendations, and in many cases they questioned GAO's findings and conclusions. The Secretary of Labor stated that he was satisfied that, on balance, the Davis-Bacon Act was being competently and effectively administered.

GAO believes that Labor was less than objective in its comments. GAO's analysis showed that Labor's comments for the most part were misleading, inaccurate, taken out of context, unsupported, and often did not reflect the information in its files.

As a result of Labor's voluminous comments, GAO had to make an extraordinary effort to review and evaluate Labor's comments and claims. GAO believes that its findings are accurate and representative of Labor's administration of the Davis-Bacon Act. GAO believes also that, in administering the act, Labor has been consistently inconsistent.

Indeed, in GAO's opinion, its analysis of Labor's largely unsupported comments further supports GAO's view that the act is not susceptible to practical and effective administration. Therefore, the results of GAO's analysis are included in the report in some detail. (See the end of chs. 3, 4, 5, and 6 and apps. IV through XII.)

SAVINGS FROM REPEAL OF THE DAVIS-BACON ACT—BY FUNCTION

Total	−342	−578	−869	−931	−1,149	−3,869

[1] Excludes outlay savings from sec. 8, public housing, and housing for elderly and handicapped programs due to lack of construction costs estimates.

Assumptions used: 10 percent wage differential between Davis-Bacon prevailing wage and the comparable local wage rate. OMB spend-out rates for appropriate functions (see attachment). 0.5 percent of budget authority is attributable to administrative costs.

ASSUMPTIONS USED IN COST-SAVINGS ESTIMATES

I. BUDGET AUTHORITY

Used OMB computer run which shows funding for construction and rehabilitation.

Attempted to obtain construction costs associated with housing programs (Section 8, Public Housing, Housing for the Elderly and Handicapped, and FHA). However, no construction costs estimate is calculated separate from finance and operating costs (verified by OMB and HUD). These programs are subject to Davis-Bacon requirements but no savings could be calculated.

To determine the amount of general revenue sharing used for construction is somewhat difficult. Department of Treasury's State reports for FY 1978 estimates that $1.5 billion or 22.4% of the total $6.7 billion was spent for capital expenditures. Both OMB and Treasury stated that this statistic is very unreliable and should not be used. Instead, an official in Treasury's Office of State and Local Finance stated that the following statistics are available and more reliable:

Fiscal year 1979

(Bureau of Census data)

State and local direct expenditures, $380.4 billion.

Amount for construction, $53.2 billion.

Percentage of total for construction, 14 percent.

Assumptions used:

(a) 15 percent of revenue sharing for construction.

(b) 90 percent of construction for actual construction costs (10 percent for land and equipment).

II. ECONOMIC ASSUMPTIONS

Used CBO assumptions for CPI in 1983 through 1986.

CBO–CPI assumptions

[In percent]

1981	11.3
1982	9.5
1983	9.0
1984	8.3
1985	7.7
1986	7.2

III. SAVINGS

A. Budget Authority. 25 percent for labor costs X 10 percent wage differential (difference between Davis-Bacon prevailing wage and local wage rate) = Savings

B. Outlays:

1. OMB Spend-out percentage is multiplied to the Budget Authority saved for 1982–86 to obtain savings from wage differential.

Examples: Defense—BA savings in 1982 is 162 million.

Outlay spend-out first year is 15 percent or $24 million = Savings.

2. Administrative savings is based on a calculation of 0.5 percent of total budget authority, used by both OMB and GAO in their estimates.

We are showing separate line items for savings calculated for wage differentials and for administrative savings for each function listed.

EXHIBIT 2

CARTER WHITE HOUSE OPTIONS PAPER: INTERAGENCY REVIEW OF CONTRACT WAGE LAWS

THE ISSUE

What administrative changes, if any, should be made in the way contract wage rates are set under the Davis-Bacon and Service Contract Acts in order to:

(1) Improve administration of these contract wage laws; and

(2) Minimize unwarranted inflationary pressures.

BACKGROUND

Federal procurement statutes mandate competition. For labor-intensive contracts, such as construction and services, Congress has attempted to insulate labor from competitive pressure by enacting laws which mandate payment of locally "prevailing" wage rates. The Secretary of Labor is required to determine prevailing wage rates for hundreds of occupations and thousands of local areas.

The Davis-Bacon Act (1931) covers construction wages. Department of Labor issues 18,000 wage determinations annually covering $40 billion worth of contracts and 1 million workers, about one-fourth of all U.S. construction activity. The Act covers

both direct Federal contracts ($11 billion) and Federal assistance monies.

The Walsh-Healey Act (1936) covers manufacturing or furnishing of materials. This law has become a dead letter, however. Legal barriers have prevented DOL from obtaining sufficient private wage data upon which to base wage determinations and none have been issued since 1964.

The Service Contract Act (1965 and amendments in 1972, 1976) covers both blue and white collar service wages for direct Federal contracts but not Federal assistance monies. In addition to the prevailing wage determination, it also requires any successor contractor to pay not less than the prior wages and fringe benefits paid in a prior collective bargaining agreement. DOL issues 36,000 wage determinations annually covering $5 billion worth of contracts and 350,000 workers. Recent DOL rulings have tended to expand the coverage of the SCA to more types of contract activity to compensate for the defunct Walsh-Healey Act.

PROBLEM AREAS

Significant administrative issues fall into four broad categories:

(1) Wage Rate Calculations: With a range of wages being paid, what is the minimum "prevailing" rate: the average, the mode, the rate paid to at least 30 percent of the workers?

What data should be used, collected from whom, and how frequently?

How are job categories defined for comparability to setting wages?

(2) Definition of Locality:

How are "localities" defined and bounded, especially when heavy concentrations of Federal workers (and Federal wage rates) in the vicinity, such as the Cape Canaveral area in Florida, may severely skew the results?

Which wage rates should be used when the place of performance is unknown until a winning contractor is selected?

Under the Service Contract Act, how should the "successorship" requirements be applied when the new contractor is geographically far removed from the prior place of performance?

(3) Collective Bargaining Conflicts:

How should wages set under collective bargaining agreements be treated when contract wage determinations by DOL are different?

How should new wage determinations issued by DOL be allowed to affect ongoing negotiations?

(4) Interagency Procedures:

How can the Labor Department enforce the laws when procuring agencies neglect to request wage determinations or ignore rulings?

How can procuring agencies get timely determinations to support contract actions or appeal apparent discrepancies?

INTEREST GROUP POSITIONS

These contract wage laws have a long-standing history of controversy, challenges, court rulings, and interagency conflict. They rank high on the agenda of issues on industry, labor and procuring agencies.

Industry sees these laws as prime examples of Federal interference in the economy and business practices. They contend that:

Wage rates set under these acts are highly inflated and inflationary, and do not reflect "prevailing" rates,

These laws infringe on business management prerogatives, including choice of job categories and associated pay, preventing the most efficient business operations.

Internal operations and labor stability are upset by driving up wages for some workers on Federal contracts above other workers doing identical work in the private sector,

Collective bargaining agreements are nullified by higher wage requirements and specially-requested variance rulings from DOL are used by labor as self-serving floors for their demands during negotiations.

The mass of paperwork and reporting requirements, especially under Davis-Bacon procedures, substantially adds to nonproductive overhead,

Homogenized wage rates deaden the beneficial effects of competition, leaving little opportunity, if any, for new contractors to displace incumbents who then retain contract work literally for over a decade at a time.

Wage rate determinations require companies to import big city wage rates into other localities.

The labor community is incensed over the fact that a Democratic Administration could undertake such a review of basic labor protection laws. They contend that

Applications of these laws is not inflationary: the whole underlying statutory concept of "prevailing wages" is, by definition, not inflatonary but rather a protection against workers wages being deflated below industry and local norms,

With wages representing such a large fraction of total contract costs (25 percent in construction, up to 95 percent in service contracts), cut throat competition makes workers the pawns while profits remain high without the protection of Labor Department wage rulings,

Without these protections, especially the Service Contract Act "successorship" provision, the local labor force is periodically cast off, wages cut and fringes lost with each new contractor who wins the next competition,

These laws do not export high wages; they prevent the disruptive export of jobs to areas of the country where workers cannot follow,

Procuring agencies have systematically ignored and subverted DOL rulings by not requesting wage determinations and by inserting protective clauses in contracts in lieu of the required wage rates,

Procuring agency interests will always be inimical to wage protection laws. Their narrow budget interests always seek to squeeze labor costs.

Labor should not have to keep fighting this issue, year after year, through both Republican and Democratic Administrations, just because procuring agencies are never satisfied and can take a never ending series of bites of this apple,

DOL's current administration of the laws falls short owing to poor wage surveys which do not take into account the latest collective bargaining agreements.

The procuring agencies have for years contended that the way the Labor Department has administered these laws disrupts the contract process, bloats their budgets, and contributes to unwarranted inflationary pressures. They contend that—

Implementation of these laws by DOL is inflationary: procedures followed by DOL result in minimum wage determinations that are higher than the actual prevailing rates in the locality;

Procedures and regulations carried out by DOL serve to reduce competition for both Federal construction and Federal service needs, with its attendant increase in costs and subsequent budgetary impact;

Service contract procedures employed by DOL under locality, successorship, and use of labor management agreement issues, represent an intrusion in and disruption of nationally and historically recognized principles of collective bargaining;

DOL has systematically expanded coverage of the Service Contract Act to more and more nonservice contract activity, not to fulfill statutory intent but to compensate for the weakened Walsh-Healey Act coverage of manufacturing activity;

DOL rulings have been historically inconsistent, changing which Acts should apply and giving different wage rates for the identical jobs in identical locations for different contracts during the same year. Even DOL's administrative law judges have overruled the Department owing to these reversals and discrepancies.

OMB's Office of Federal Procurement Policy convened an interagency task force to address these issues last August. DOL, DOD, DOE, NASA, and GSA were participants. This latest review follows earlier efforts which led to the issuance and then retraction of changes to Service Contract Act regulations during the early months of this Administration.

GAO Review: The General Accounting Office recently circulated a draft report calling for outright repeal of the Davis-Bacon Act. They reasoned that significant changes in economic conditions and the economic character of the construction industry, since 1931, plus the subsequent passage of other wage protection statutes makes the Act unnecessary. The report also finds that after nearly 50 years, DOL has not developed an effective program to issue and maintain current and accurate wage determinations and it may be impractical to ever do so. The legislative intent of the Act is seldom achieved, in GAO's view, and the Act itself results in unnecessary annual construction costs of $715 including $215 million for administrative costs. At least eight bills with over fifty sponsors for repeal have already been introduced in the 96th Congress. Special interest in this review was also stimulated by the President's Special Advisor on Inflation.

CEA Review: CEA has completed a confidential-staff paper on the effects of these laws which it released to the members of the interagency review group. With regard to Davis-Bacon, the study makes the following points:

In 13 cities for which wage data are available, Davis-Bacon minimum wages are significantly above those in the local labor market for similar types of construction, this despite the fact that the sample was much more heavily unionized than the industry as a whole. The cost-increasing impact of the Act was found to be greater, as a rule, in areas of lower unionization, as you would expect.

Minimum fringe benefits on Davis-Bacon projects tend to be set at levels comparable to those mandated by collective bargaining agreements, despite the presence of significant nonunion employment and the generally lower levels of fringe benefits paid to nonunion workers.

Setting Davis-Bacon minimum wages at the local mean wage within each occupation category would reduce the wage premium on Davis-Bacon projects, but, because there is significant dispersion in the wage distribution, it would not eliminate that premium for all workers. The law would still have the effect of raising many workers' wages above their free-market equilibrium levels.

Employment of helpers is a widespread practice in construction not covered by the Act but is usually not allowed in Davis-Bacon construction. This makes it very likely that comparison of journey-person wage rates to Davis-Bacon minimums understate the cost-increasing effect of the law as presently administered.

With regard to the Service Contract Act, the CEA study asserts that Service Contract minimum wage rates for at least some DOD and NASA installations tend to be higher and increasing faster than local private sector wages.

It is virtually impossible to attach specific dollar savings or inflationary impact estimates to each of the specific administrative changes to be proposed here. However, the CEA staff study provides some estimates on which to base decisions. Davis-Bacon covered employment represents about 2.25 percent of the Nation's total private nonagri-

cultural wage bill for production and nonsupervisory employees. Wages of Service contract covered employees are 0.6 percent of the private nonfarm wage bill for production and nonsupervisory employees.

If the proposed changes resulted in 10 percent lower "prevailing" rate determinations, a reasonable expectation, then total Federal dollar savings under the Davis-Bacon Act would be $1 billion ($40 billion total, of which 25 percent is wages, times 10 percent reduction). The aggregate rate of inflation would be reduced by 0.225 percentage points.

A similar 10 percent reduction in Service Contract Act prevailing wage determinations would result in a total Federal dollar savings of $900 million ($10 billion total, of which 90 percent is wages, times 10 percent reduction) and a 0.06 percentage point reduction in the inflation rate.

In rough terms, then, proposed administrative changes which could result in 10 percent reductions in wages paid under both Davis-Bacon and Service Contract Acts could reduce Federal expenditures on the order of $1.9 billion and the inflation rate by 0.285 percentage point. In addition, there would be indirect inflation-reducing effects of unknown magnitude operating through wage-price-wage feedbacks.

The PRESIDING OFFICER. Who seeks recognition?

Mr. THURMOND. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. DANFORTH). Without objection, it is so ordered.

BUDGET RECONCILIATION CONFEREES—H.R. 3982

Mr. BAKER. Mr. President, before the distinguished minority leader is recognized under the special order granted to him on last evening, I ask his indulgence long enough to put this unanimous-consent request.

Mr. President, I ask unanimous consent that Senator MATSUNAGA replace Senator RANDOLPH as a conferee on the reconciliation conference strictly for the class II dental benefits, section 1302 in the Senate amendment and section 14003 in H.R. 3982.

REPEALING THE WINDFALL PROFIT TAX

Mr. ROBERT C. BYRD. Mr. President, we should have no pretense about the consequences of the amendment proposed by the distinguished Senator from Kansas (Mr. DOLE) and the distinguished Senator from New Mexico (Mr. DOMENICI).

This combined measure will effectively repeal the windfall profit tax. By 1985, the overwhelming proportion of domestic oil production will fall within the classification of new oil and, under these amendments, would no longer be subject to taxation. The addition of the Domenici amendment, which would provide similar treatment for heavy oil and oil recovered by tertiary methods, would leave the windfall tax an empty shell. Through fiscal year 1986, almost $11 billion in revenue would be lost to the Federal Treasury. Wrapped in the flag of supply-side rhetoric and free market forces, this amendment would do nothing other than send an $11 billion windfall to the oil companies. In the meantime, the Republican majority in the Senate, following the directives of the Reagan administration, has voted to strip the elderly of their social security benefits, to cut health care for veterans and the poor, and to deny schoolchildren the right to a hot lunch. This is a message the American people should hear—and hear well.

There is much talk of unleashing the oil companies to explore and develop new energy reserves. But instead, the major oil companies seem intent on acquiring each other. Just last week, it was unveiled that Mobil Oil has offered $7.8 billion in an attempt to take over Conoco. Today, the news indicates that Gulf Oil is raising $5 billion in preparation for a takeover bid of another U.S. oil company, perhaps Cities Service. This is hardly the kind of investment in new energy resources which was promised as a consequence of decontrol. This is hardly the kind of economic activity which will fuel a resurgence of American productive capacity.

The windfall profit tax was the negotiated price for decontrol. The revenues from this tax were originally pledged to finance the creation of a viable synthetic fuels industry, to enhance mass transit systems, and to protect the poor and elderly from skyrocketing energy prices, But the Reagan budget has dispensed with those programs with the wave of a hand. Synfuels are now to be developed by private industry, mass transit construction has been curtailed, and the poor and the elderly are left to their own devices. The promise to the American people—who have borne the backbreaking burden of higher oil prices—has already been broken. And now, instead of investing the profits of decontrol for the common good, we are told we must return them to the oil companies for the benefit of the rich.

Mr. President, let us be clear as to what is behind this measure. The Republican platform pronounced that party's support for the repeal of the windfall profit tax. President Reagan advocated the repeal of the tax during his campaign. This amendment represents the essence of Reaganomics. It should affirm the growing public suspicion that the Republican administration is not committed to equity and fairness, but instead is committed to helping those who need help the least.

I intend to vote against this amendment. There is no economic justification for it, and there is no argument based on equity which can sustain support of it. I shall vote to table it, and I hope that other Senators will do likewise. The repeal of the windfall profit tax, in any form, would be a perversion of our national priorities and would only accentuate the budget deficits which threaten any program of economic recovery. It also would be a breaking of the promise that Congress made to the American people on the enactment of the tax as a quid pro quo for decontrol.

Mr. President, I yield the remainder of my time to Mr. DOLE and Mr. METZENBAUM.

Mr. METZENBAUM. Mr. President, I just wish to commend the excellent statement of the Senator from West Virginia, who has very appropriately and accurately and totally enunciated the issue as it is. For those of us who feel strong concerns about this matter, I wish to express our gratitude to the Senator from West Virginia for his continued leadership in matters of this nature.

Mr. ROBERT C. BYRD. I thank the Senator.

DOLE AMENDMENT NO. 509 PROVIDING TAX RATES ON NEWLY DISCOVERED OIL

Mr. DOLE. Mr. President, as I understand it, without debate, there will be a vote on the motion to table the amendment I have offered. I wish to make it clear that I hope everybody will vote for that motion, because it will give us some idea of how much support there is for this approach to bring about a production response which I believe has much more merit than the amendment we discussed yesterday, the so-called 1,000-barrel exemption.

If, in fact, we want to provide some incentive in an appropriate way, it is by phasing down the tax. I find great support for this concept. In fact, I included in the RECORD yesterday a letter from the domestic producers, made up of 20 different independent oil companies, indicating their support for this concept rather than the so-called exemption in the amendment yesterday, under which only approximately 50 percent would be returned to the producers. So we would not have the same incentive for more production.

Beyond that, I believe it is fair to state that this amendment is less expensive than the amendment which was offered yesterday. I hope that will be kept in mind.

No one really knows what the House did by 2:30 this morning, but apparently there is a 500-barrel exemption for new oil, a 100-barrel exemption for old oil, and tax cut up to $4,300. That is a rather rich package, and I think the computers are still trying to add up the total cost of that Democratic package, so far as big oil is concerned, on the House side. It may dwarf this little attempt by the Senator from Kansas, on the Senate side.

I hope that those Democrats who are against any private sector improvements or any incentive for the oil industry will take a look at what their colleagues may have done on the House side, before we pass judgment on the final version of what we are doing here.

I thank the distinguished Senator from West Virginia for permitting me to speak briefly on this motion.

It is just about 11 o'clock.

(By request of Mr. ROBERT C. BYRD the following statement was ordered to be printed in the RECORD.)

● Mr. BENTSEN. Mr. President, I rise in support of the Dole-Domenici substitute to provide for a phase-out of the so-called windfall profits tax on newly dis-

covered, incremental tertiary, and heavy oil. Although I would have preferred that my 1,000 barrel exemption amendment would have been adopted, I strongly believe that we need to provide some kind of substantial relief to our domestic oil industry in order to ease the oppressive burdens place on them by the so-called windfall profits tax.

I am convinced that we need to give additional incentives to our domestic oil industry in order to insure that we will be able to reduce America's dependence on unstable foreign petroleum supplies. We can no longer afford to drain the American economy of billions of dollars each year to buy foreign oil when we are failing to provide the necessary incentives for the production of our domestic energy resources.

I urge my colleagues to join me in support of the Dole-Domenici substitute, and I am hopeful for its early adoption.●

ECONOMIC RECOVERY TAX ACT OF 1981

The PRESIDING OFFICER. The pending business will be stated.

The legislative clerk read as follows:

A joint resolution (H.J. Res. 266) to provide for a temporary increase in the public debt limit.

MOTION TO TABLE AMENDMENT NO. 509

The PRESIDING OFFICER. Under the previous order, the hour of 11 a.m. having arrived, the Senate will now proceed to vote on the motion to table amendment No. 509, offered by the Senator from Kansas.

Mr. KENNEDY. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. SPECTER). Without objection, it is so ordered.

The question is on agreeing to the motion to lay on the table the amendment of the Senator from Kansas.

On this question the yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Alabama (Mr. DENTON) and the Senator from Maryland (Mr. MATHIAS) are necessarily absent.

I further announce that, if present and voting, the Senator from Alabama (Mr. DENTON) would vote "nay."

Mr. CRANSTON. I announce that the Senator from Texas (Mr. BENTSEN) is necessarily absent.

I also announce that the Senator from Nevada (Mr. CANNON) is absent attending a funeral.

On this vote, the Senator from Nevada (Mr. CANNON) is paired with the Senator from Texas (Mr. BENTSEN).

If present and voting, the Senator from Nevada would vote "yea" and the Senator from Texas would vote "nay."

The PRESIDING OFFICER. Is there any other Senator in the Chamber wishing to vote?

The result was announced—yeas 47, nays 49, as follows:

[Rollcall Vote No. 210 Leg.]

YEAS—47

Baucus	Eagleton	Nunn
Biden	Exon	Packwood
Bradley	Ford	Pell
Bumpers	Glenn	Proxmire
Byrd, Harry F., Jr.	Gorton	Randolph
Byrd, Robert C.	Hatfield	Riegle
Chafee	Hollings	Roth
Chiles	Huddleston	Rudman
Cohen	Inouye	Sarbanes
Cranston	Jackson	Sasser
Danforth	Kennedy	Specter
DeConcini	Leahy	Stafford
Dixon	Levin	Stennis
Dodd	Metzenbaum	Tsongas
Durenberger	Mitchell	Weicker
	Moynihan	Williams

NAYS—49

Abdnor	Hawkins	Murkowski
Andrews	Hayakawa	Nickles
Armstrong	Heflin	Percy
Baker	Heinz	Pressler
Boren	Helms	Pryor
Boschwitz	Humphrey	Quayle
Burdick	Jepsen	Schmitt
Cochran	Johnston	Simpson
D'Amato	Kassebaum	Stevens
Dole	Kasten	Symms
Domenici	Lavalt	Thurmond
East	Long	Tower
Garn	Lugar	Wallop
Goldwater	Matsunaga	Warner
Grassley	Mattingly	Zorinsky
Hart	McClure	
Hatch	Melcher	

NOT VOTING—4

Bentsen	Denton	Mathias
Cannon		

So the motion to lay on the table Mr. DOLE's amendment (No. 509) was rejected.

Mr. BAKER addressed the Chair.

The PRESIDING OFFICER. The Senator from Tennessee.

Mr. BAKER. Mr. President, will the Chair state the result of the vote once more?

The PRESIDING OFFICER. Forty-seven yeas and forty-nine nays. The motion to table is not agreed to.

Mr. BAKER. Mr. President, as I understand it——

Mr. ROBERT C. BYRD. Mr. President, may we have order in the Senate so we may hear the majority leader?

The PRESIDING OFFICER. The Senate will be in order. The Senate will be in order. Will the Senators clear the well so the majority leader may address the Senate?

Mr. ROBERT C. BYRD. Mr. President, Senators are not listening to the Chair. Could the Chair get order in the Senate?

The PRESIDING OFFICER. Will the Senators clear the well?

The Chair recognizes the majority leader. I think we now have order.

Mr. BAKER. Mr. President, I thank the Chair. I think the Chair acted very efficiently.

REMAINING AMENDMENTS

Mr. BAKER. Mr. President, the Senate was closely divided on this issue. I would not presume to advise the adversaries on this measure how they should proceed next. I simply reiterate what I have said before: We have to finish this bill and we have to find a way to do it.

Mr. President, I assume for the moment that debate will continue on the second-degree Domenici amendment to the Dole amendment. I would urge that Senators consider every hour that goes by and every day that goes by reduces the prospect that we can finish this bill in time to get it through conference and to obtain our recess goal of July 31.

I wish to repeat to the Members of the Senate that, notwithstanding statements from the White House and the Speaker of the House, I have never subscribed to the idea that we must go until August 7. I continue to believe we can finish our work by August 1, or by the evening of July 31.

Unless we get on with the business of the Senate—and the business of the Senate at the moment is the completion of the tax bill—then I have to confess that commitment is receding in prospect.

Mr. President, what I hope we can do at this point is to continue the debate, if that is the wish of Senators, on the pending question. I would like to explore with my counterpart, the distinguished minority leader, the prospect for ordering and arranging amendments in time for the consideration of the remaining amendments on this bill. If we do that, then I think we will make good progress. If we cannot, we will be stuck on this for the moment.

So, I shall not make any further effort at this time to end debate on this amendment. I would expect that, within the next little while, we could have some further statements made, or at least I hope so. But, for the moment, Mr. President, I have no further recommendation to make.

Mr. ROBERT C. BYRD addressed the Chair.

The PRESIDING OFFICER. The minority leader, the Senator from West Virginia.

Mr. ROBERT C. BYRD. Mr. President. I join with the majority leader in stating the belief, the hope, and the determination that this debate can be completed and the tax bill can be enacted by August 1. I believe that can be done. It will depend, in considerable measure, on what the other body does. I think this matter is being expedited there.

I would hope that we here would continue toward our goal of enacting the measure and allowing Senators to go back and listen to the people in our respective States. But first let me say, Mr. President, that, with all due respect to the majority leader and those who are supporting this amendment, we will not finish our work on this tax bill by August 1, or even by August 15, if the pending amendment stays before the Senate.

I will not argue the merits or demerits of the amendment at this point. But I hope that the proponents of the amendment will decide to take it down, because this is not the way to expedite the work of the Senate on this tax bill.

There will be a prolonged debate on this amendment. And if, perchance, we were to come to a vote on the amendment after several days of debate, there would also be a considerable debate on the House bill when the opportunity

comes later to substitute the Senate bill for the House language, and there would be further extended debate on the conference report when it comes to the Senate.

So I suggest that this battle be delayed until another time and that we get on with action on the tax bill and forget about this amendment for the time being.

Mr. President, it is my intention to submit to the majority leader the amendments that Senators have on this side of the aisle. I am going to propose—and I want my colleagues on this side of the aisle to hear this: the distinguished majority leader and I have discussed this, so I think we pretty well agree that this might be a good approach—I am going to propose to my colleagues here that I give to the majority leader a list of our amendments. He will then indicate the identity of the amendments and the authors of such amendments on that side of the aisle so that there will be no surprises. We will say that those are all of the amendments that will be voted on, no second-degree amendments, so that everybody knows what is coming. We will vote up or down or on tabling motions.

Then, knowing what each side has, knowing there will be no surprises, no second-degree amendments, we then could say that a final vote on advancing the bill to third reading will occur at, say, the close of business on Wednesday next, or some such date.

This will enable the Senate to complete its action before the House measure gets over to the Senate, and the majority leader will be assured of our completing our business. He is entitled to that assurance. I, for one, want to see action completed on this bill.

It seems to me if we do that, we can, I hope, avoid a Saturday session and be assured that the bill will be acted upon. With everybody knowing what is coming by way of amendments, everybody will be prepared. We can sequence the amendments, and we will then proceed in an orderly way.

If I do not hear objection from my side of the aisle, this will be my proposal to the majority leader.

I yield the floor.

The PRESIDING OFFICER. The majority leader is recognized.

Mr. BAKER. Mr. President, there are a number of items now to be considered by the minority leader and by me, such as the limitation of the number of amendments to be proposed, such as an agreement that there will be no second-degree amendments, such as the possibility of a time certain to finish this bill. I am willing to engage in good faith negotiations with the minority leader on all of those items. I will say now that I favor each one of those proposals and I hope that our mutual effort in this respect will produce an agreement that can be cleared by the Senate within a short time. I am sure the minority leader will enter into those negotiations with the same spirit of optimism as I would.

Mr. President, I cannot say that I am put off with the idea that we may have a filibuster on this amendment or that passage of this amendment may jeopardize our recess time. I am not so wedded to July 31 or August 1 that I would not stand here as a matter of principle. I am prepared to say that if that has to be, that has to be. But I do not wish it.

In the meantime, Mr. President, we will continue with the debate on this amendment. I will retire now with the minority leader, if he will agree, and we will consider these several elements of the matters we have discussed. Perhaps we can even find a way to liquidate the pending amendment while we agree on the other issues as part of that larger package.

Mr. President, if we cannot, we may be here witnessing the termination of our expectation of a recess after July 31.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. METZENBAUM. Mr. President, the Senate should understand full well what the situation is. The Finance Committee came before this body with amendments having to do with the windfall profit tax amounting to about $20 billion in cuts over the next 10 years.

The Senator from Kansas, the chairman of the Finance Committee, then came before the Senate with an additional amendment to immediately phase out, within the next 4 years, the windfall profit tax with respect to new oil.

The next thing that occurred was that the Senator from New Mexico brought to the Senate an amendment which would phase out the windfall profit tax entirely within 4 years in connection with new oil, secondary oil, and tertiary oil as well.

So what we have before us is an effort on the part of the majority party to totally reverse the clock in connection with the matter of the windfall profit tax that in and of itself was negotiated ad infinitum this past session. It was not a victory for those who took the administration's position as to the amount of the windfall profit tax.

Quite the contrary, those who were opposed to it pretty much had their own way. The windfall profit tax that was finally enacted was a very cut back version of the original proposal of the Carter administration.

But some people are never satisfied. What we have here is an effort to take $40 billion in cuts and put them directly into the pockets of the oil companies at this time.

The real question is, How much? How far do we go? Just yesterday Members of the majority party refused to go along with the Members of the minority in indicating that we wanted to provide minimums for social security benefits.

How can you be so heartless, cruel, inhumane, and unfair to be willing to give the oil companies another $40 billion and turn your backs upon the senior citizens of this country, turn your backs upon the kids who want to go to college, turn your backs upon people who are in food stamp programs and school lunch programs, turn your backs on Vietnam veterans who have counseling services, and the host of other cutbacks that have occurred in the past several weeks in the budget process, and then have the audacity to come to the U.S. Senate and say you want to cut back $40 million within the next 10 years for the oil companies of this country?

I yield to the Senator from Delaware.

The PRESIDING OFFICER. Does the Senator yield for a question?

Mr. BIDEN. I seek recognition.

The PRESIDING OFFICER. The Senator from Delaware.

Mr. BIDEN. I will be very brief, Mr. President. Without arguing the merits of this bill, I think we should put one thing squarely before the body and before the American people through the press. That is that we Democrats have been listening for the past month to the President of the United States telling us that we are holding up the critical business of the Nation by worrying about whether we are going to get the tax package through by the beginning of the August recess.

The President told us the budget cuts are essential, that we have to move on the total package, that the Democrats have to move. He spent a good deal of time castigating, I believe unfairly, the Speaker of the House of Representatives. All the press have been asking us for the last month, "Are you fellows going to slow up the President's tax bill?"

We have been told that America had a referendum on this issue in the last election and, therefore, we, the Democrats, on this side, even though we objected to much of what the President was doing, were expected to not stand in the way.

We have all on this side caucused in a Democratic caucus and talked and talked about that problem and concluded that the President has the chance and should be given the opportunity to have his tax bill and we should vote up or down on it. We would take exception where we would, but not attempt to slow it up.

Now here we are on the floor of the United States Senate with the prospect that the President will not get his bill on August 1, which was the time he needed. We were told, and every press report in America talked about, the critical date of August 1. "I have to have that on my desk." He beat the political life out of us over August 1.

Now we have the Republicans keeping the President from getting his bill. The President has not asked for the Dole amendment. He has not asked for the Domenici amendment. That was not part of the package.

Now we have a strange occurrence of the Republican Party, the Republican leadership, stopping the Republican President from having what the Republican President said is in the national interest, and in an immediate sense, of the United States of America.

So, Mr. President, I hope that no one in the press, no one in the public, and no one in this body makes any mistake about what we are debating. The Senator from Ohio and the Senator from Massachusetts are not going after the President's program. They are not going into the tax bill and saying, "Mr. President, what you said you need, you cannot have."

We are talking about the people. It is

a strange anomaly. The Senator from Ohio and the Senator from Massachusetts and others are here on this floor keeping out of the bill something the President says he does not want.

Mr. TSONGAS. Mr. President, will the Senator yield?

Mr. BIDEN. I will yield the floor after this point.

Mr. DOLE. What was the first point, Mr. President? I missed the first point.

Mr. BIDEN. The point is that "you-all" are doing your President a bad service. That is the point.

The point of the matter, Mr. President, is that Senators DOLE, DOMENICI, and others, are here on the floor of the U.S. Senate asking for something the President has not asked for, the result of which will be, I suspect, if I sense the resolve on this side of the aisle, that the President will not get what he says he needs as a matter of life and death; that is, his bill on August 1.

We want to give the President his shot. We will give him his tax bill. We will vote the portions we agree with and the portions we disagree with, and we will get it to him on August 1. But let it be known that it is the Republican Party that is keeping the President from having what he says he needs badly. He is not asking for Dole and Domenici. It is not part of his package. So it is the Republicans who are holding it up. I want that, as another famous Republican President said, made perfectly clear to everybody in this body. [Laughter.]

Mr. TSONGAS. Will the Senator yield for a question?

Mr. BIDEN. I yield.

Mr. DOLE. Mr. President.

The PRESIDING OFFICER. The Senator from Kansas has the floor.

Mr. TSONGAS. I thought the Senator from Delaware yielded to me, Mr. President.

Mr. DOLE. I will be glad to yield for a question, Mr. President. I am going to enjoy this, anyway. They can go ahead.

The PRESIDING OFFICER. Did the Senator from Delaware yield for a question?

Mr. TSONGAS. Yes, Mr. President.

The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. TSONGAS. Mr. President, I wonder if the Senator from Delaware would join me in calling upon the President to take a position on this amendment. Obviously, it was not part of the package he requested. Obviously, it flies in the face of the statement that we do not have the money for all these programs. Since this issue is going to be a bottleneck, I think it would be quite appropriate for the President, given his statements of the past couple of weeks, to take a stand and let us see what his position is on this amendment.

Mr. BIDEN. I would be delighted to join the Senator, Mr. President, and I think the President could bring this to a screeching halt and get the bill by letting us know one way of another what he wants. My impression is that he does not want this, but I shall join and do join with the Senator from Massachusetts or anybody else in asking the President what his position is.

Mr. TSONGAS. Mr. President, I formally request of the President that he let this body know what his position is on the pending amendment.

I thank the Senator.

Mr. KENNEDY. Mr. President.

The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. KENNEDY. Mr. President, we have had an opportunity to debate and discuss this issue briefly, but I think, after the vote of the United States Senate, we ought to call this amendment what it is. It is basically an example of the greed of the major oil companies in this country.

If we look at the vote yesterday afternoon, when the distinguished Senator from Texas (Mr. BENTSEN) put out a proposal, one that I did not support for the reasons that I referred to yesterday—because all the indications are that the independents have had an extremely profitable year and the oil business is the most lucrative and successful business in the United States of America at this time—that amendment was hammered down. It was hammered down by many of those who are supporting this amendment. They knocked down the amendment which was even for the independents of the industry in order to come up with this amendment that is going to help the big boys, the major elements in the oil industry. There is only one word for it, and that is greed.

The major oil companies must have understood that there is something left in the Federal Treasury which they can get a handle on and they are trying to get a handle on it with this particular amendment. That is what we are faced with here on the floor of the U.S. Senate today. Mr. President, they must have understood that somewhere in this tax bill, there are some $40 billion left which they can get a handle on.

It is amazing to me, as has been pointed out by my colleagues this morning and again as we all pointed out yesterday at the start of this debate and discussion, that we find ourselves in this position at a time when we are in the process of reconciliation. I have been sitting in on the committees that have been meeting with the House of Representatives on some very basic and fundamental questions and issues.

Granted, we were defeated on the Riegle amendment yesterday, which would have cost somewhat in excess of $1 billion a year, because there was not money in the Federal Treasury; it was not sound economics; we would not be able to balance the budget; it was going to add to inflation. The President, in his letter to the Members of the Congress, said that such a result would jeopardize our economic recovery program so vital to the well-being of the Nation—on social security. Then we find that those who have been pointing that out to us in the Senate of the United States are prepared to support an amendment of $40 billion for the major oil companies in this country.

This, Mr. President, at a time during the reconciliation process when we are cutting back on the education of young people in the student loan program; we are cutting back on assisting those young people in this country who have felt the scourge of addiction to drugs or alcohol; we are cutting back on legal services to bring the Constitution of the United States to people who have been denied it because of limited financial resources; we are cutting back on programs for the young and for the old alike—but we are prepared to provide $40 billion to the major oil companies.

Mr. President, this is going to be an issue which will be debated and, clearly, from the vote on the tabling motion, it is the will of the Senate to debate this further, and we shall have an opportunity to do so. It does seem to me, Mr. President, that those who support this amendment would be wise to heed the advice of the minority leader and say that this debate on this issue ought to be resolved on another day.

Much has been spoken about whether we are going to meet the President's time schedule. I think it is important to point out at this time that those who are risking the delay are those who are the proponents of this amendment, not those who will be speaking on it and debating it over a period of time.

Mr. President, I commend the advice of the Democratic leader (Mr. ROBERT C. BYRD) to our colleagues, and hope that we can see this amendment withdrawn so that we can move expeditiously onto the others matters that remain before the Senate on the tax bill. That seems to be the wisest course. It is obviously the fairest and the most just course, and that way the President will be able to get his tax measure.

Mr. DOLE. Mr. President, I appreciate the willingness of the Senator from Massachusetts to hasten the passage of the bill after 6 days here. That is welcome news from that side of the aisle. We have spent most of our time debating issues that come from that side, amendments that have come from that side. The Senator from Kansas is certainly in no hurry on this amendment. I just checked. Fourteen Democrats voted one way yesterday, another way today. They prefer the more expensive oil amendment. Maybe ours is too small.

Perhaps we should beef ours up a little, add $2 or $3 billion a year. We could encourage those 14 Senators who supported the big oil amendment yesterday to vote for the responsible, moderate amendment today. We are going to look at that possibility.

Maybe we should have done more. Maybe we should have gone far enough to satisfy those 14 Senators on that side. We will take a look at it. Maybe we should go as far as the Senators did on the House Ways and Means Committee—a 500-barrel exemption for new oil, a 100-barrel exemption for old oil, and four or five other things that they have not figured out yet what they did at 2:30 this morning.

It seems to me that when we get back to reality, we realize we are talking about tax policy and energy policy. If you view it in that light rather than listen to the tired rhetoric we have heard here for years and years, which has the country on the verge of bankruptcy, we should know which option we should follow.

Should we follow the old, tired slogans and programs of all those who have been sitting on that side, that brought us the highest inflation in history, the highest interest rates in history, almost the highest unemployment rates in history, and more regulations than ever known in this country? I hope not. This Senator is concerned about that kind of leadership, because that is what we have had for too long.

Now, for 6 months, we have had a new President and, thankfully, a Republican majority in the Senate for the first time in 26 years, and we are going in a different direction. Obviously, those who do not want to go in a different direction, who want to hew to the left and stay on the left, are somewhat troubled by the change. I believe that, given an opportunity, they will find that the President of the United States, with his economic recovery package, has a proposal that will benefit all Americans.

If we could focus on that aspect of debate, I believe that those 14 Democrats who suddenly decided that this amendment, apparently, was not big enough or did not do enough for their special interests might be supporting what I consider to be a very reasonable amendment.

So I assume those on the other side will want to talk at length about this matter. We are prepared to debate or to let those on that side talk about the amendment.

Do you want to accept the amendment?

Mr. KENNEDY. I have a little speech I want to make.

Mr. DOLE. I have heard that. It was very good.

Is the Senator from Ohio ready to move forward?

Mr. METZENBAUM. I am. I suggest the absence of a quorum.

Mr. DOLE. That is not moving forward. [Laughter.]

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. GRASSLEY). Without objection, it is so ordered.

Mr. BAKER. I understand, Mr. President, after consulting with the distinguished managers of the bill on both sides and the minority leader that it is agreed that the best course to pursue at this moment would be to temporarily lay aside the pending amendment and proceed to the consideration of the so-called Hollings-Bradley amendment.

I ask unanimous consent, Mr. President, that the pending amendment be temporarily laid aside and that the Senator from South Carolina be recognized to call up his amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from South Carolina is recognized.

UP AMENDMENT NO. 259

(Purpose: Providing a 1-year targeted rate cut, and for other purposes)

Mr. HOLLINGS. Mr. President, I thank the distinguished majority leader.

I call up my amendment and ask the clerk to report it.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from South Carolina (Mr. HOLLINGS), for himself, Mr. BRADLEY, Mr. DODD, Mr. LEAHY, Mr. FORD, Mr. BIDEN, Mr. BUMPERS, Mr. KENNEDY, Mr. HART, Mr. CRANSTON, and Mr. GLENN proposes an unprinted amendment numbered 259.

Mr. HOLLINGS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 4, beginning with line 10, strike out all through page 29, line 20, and insert in lieu thereof the following:

SEC. 101. DECREASE IN MAXMIUM RATE TO 50 PERCENT IN 1982.

(a) IN GENERAL.—Section 1 (relating to tax imposed) is amended—

(1) by striking out in the table in subsection (a) all that follows the item relating to taxable income in excess of $47,200 but less than $55,200 and inserting in lieu thereof the following:

"Over $47,200	$14,060, Plus 50% of excess over $47,200.";

(2) by striking out in the table in subsection (b) all that follows the item relating to taxable income in excess of $40,200 but less than $42,200 and inserting in lieu thereof the following:

"Over $40,200	$12,240, Plus 50% of excess over $40,200.";

(3) by striking out in the table in subsection (c) all that follows the item relating to taxable income in excess of $34,200 but not over $40,200 and inserting in lieu thereof the following:

"Over $34,200	$10,290, Plus 50% of excess over $34,200.";

(4) by striking out in the table in subsection (d) all that follows the item relating to taxable income in excess of $23,600 but less than $27,600 and inserting in lieu thereof the following:

"Over $23,600	$7,030, Plus 50% of excess over $23,600."; and

(5) by striking out in the table in subsection (e) all that follows the item relating to taxable income in excess of $22,000 but less than $26,000 and inserting in lieu thereof the following:

"Over $22,000	$7,030, Plus 50% of excess over $22,000.".

(b) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning in 1982.

SEC. 102. RATE CUTS FOR 1983 AND AFTER; INCREASE IN ZERO BRACKET AMOUNTS.

(a) RATE REDUCTION.—Section 1 (relating to tax imposed) is amended to read as follows:

"SECTION 1. TAX IMPOSED.

"(a) MARRIED INDIVIDUALS FILING JOINT RETURNS AND SURVIVING SPOUSES.—There is hereby imposed on the taxable income of—

"(1) every married individual (as defined in section 143) who makes a single return jointly with his spouse under section 6013, and

"(2) every surviving spouse (as defined in section 2(a)),

a tax determined in accordance with the following table:

"If taxable income is:	The tax is:
Not over $3,800	No tax.
Over $3,800 but not over $5,900	13% of excess over $3,800.
Over $5,900 but not over $8,000	$273, plus 14% of excess over $5,900.
Over $8,000 but not over $12,300.	$567, plus 15% of excess over $8,000.
Over $12,300 but not over $16,400.	$1,212, plus 19% of excess over $12,300.
Over $16,400 but not over $20,600.	$1,991, plus 21% of excess over $16,400.
Over $20,600 but not over $25,000.	$2,873, plus 22% of excess over $20,600.
Over $25,000 but not over $30,300.	$3,841, plus 30% of excess over $25,000.
Over $30,300 but not over $35,600.	$5,431, plus 35% of excess over $30,300.
Over $35,600 but not over $46,200.	$7,286, plus 42% of excess over $35,600.
Over $46,200 but not over $60,400.	$11,738, plus 48% of excess over $46,200.
Over $60,400	$18,554, plus 50% of excess over $60,400.

"(b) HEADS OF HOUSEHOLDS.—There is hereby imposed on the taxable income of every individual who is the head of a household (as defined in section 2 (b)) a tax determined in accordance with the following table:

"If taxable income is:	The tax is:
Not over $2,500	No tax.
Over $2,500 but not over $4,600	13% of excess over $2,500.
Over $4,600 but not over $6,700	$273, plus 14% of excess over $4,600.
Over $6,700 but not over $8,900	$567, plus 15% of excess over $6,700.
Over $8,900 but not over $15,200.	$897, plus 21% of excess over $8,900.
Over $15,200 but not over $18,400.	$2,220, plus 22% of excess over $15,200.
Over $18,400 but not over $23,700.	$2,924, plus 29% of excess over $18,400.
Over $23,700 but not over $29,000.	$4,461, plus 34% of excess over $23,700.
Over $29,000 but not over $34,300.	$6,263, plus 40% of excess over $29,000.
Over $34,300 but not over $44,900.	$8,383, plus 45% of excess over $34,300.
Over $44,900	$13,153, plus 50% of excess over $44,900.

"(c) UNMARRIED INDIVIDUALS (OTHER THAN SURVIVING SPOUSES AND HEADS OF HOUSEHOLDS).—There is hereby imposed on the taxable income of every individual (other than a surviving spouse as defined in section 2(a) or the head of a household as defined in section 2(b)) who is not a married individual (as defined in section 143) a tax determined in accordance with the following table:

"If taxable income is:	The tax is:
Not over $2,500	No tax.
Over $2,500 but not over $3,600	13% of excess over $2,500.
Over $3,600 but not over $4,600.	$143, plus 14% of excess over $3,600.
Over $4,600 but not over $6,700.	$283, plus 15% of excess over $4,600.
Over $6,700 but not over $8,700	$598, plus 18% of excess over $6,700.
Over $8,700 but not over $11,000.	$958, plus 19% of excess over $8,700.
Over $11,000 but not over $15,200.	$1,395, plus 21% of excess over $11,000.
Over $15,200 but not over $19,000.	$2,277, plus 26% of excess over $15,200.
Over $19,000 but not over $23,700.	$3,265, plus 32% of excess over $19,000.
Over $23,700 but not over $29,000.	$4,769, plus 37% of excess over $23,700.
Over $29,000 but not over $34,300.	$6,730, plus 42% of excess over $29,000.
Over $34,300 but not over $41,700.	$8,956, plus 48% of excess over $34,300.
Over $41,700	$12,508, plus 50% of excess over $41,700.

"(d) MARRIED INDIVIDUALS FILING SEPARATE RETURNS.—There is hereby imposed on the taxable income of every married individual (as defined in section 143) who does not make a single return jointly with his spouse under section 6013 a tax determined in accordance with the following table:

"If taxable income is:	The tax is:
Not over $1,900	No tax.
Over $1,900 but not over $2,950	13% of excess over $1,900
Over $2,950 but not over $4,000	$136, plus 14% of excess over $2,950.
Over $4,000 but not over $6,150	$283, plus 15% of excess over $4,000.
Over $6,150 but not over $8,200	$606, plus 19% of excess over $6,150.
Over $8,200 but not over $10,300	$995, plus 21% of excess over $8,200.
Over $10,300 but not over $12,500	$1,436, plus 22% of excess over $10,300.
Over $12,500 but not over $15,150	$1,920, plus 30% of excess over $12,500.
Over $15,150 but not over $17,800	$2,715, plus 35% of excess over $15,150.
Over $17,800 but not over $23,100	$3,643, plus 42% of excess over $17,800.
Over $23,100 but not over $30,200	$5,869, plus 48% of excess over $23,100.
Over $30,200	$9,277, plus 50% of excess over $30,200.

"(e) ESTATES AND TRUSTS.—There is hereby imposed on the taxable income of every estate and trust taxable under this subsection a tax determined in accordance with the following table:

"If taxable income is:	The tax is:
Not over $1,050	13% of taxable income.
Over $1,050 but not over $2,100	$136, plus 14% of excess over $1,050.
Over $2,100 but not over $4,250	$283, plus 15% of excess over $2,100.
Over $4,250 but not over $6,300	$606, plus 19% of excess over $4,250.
Over $6,300 but not over $8,400	$995, plus 21% of excess over $6,300.
Over $8,400 but not over $10,600	$1,436, plus 22% of excess over $8,400.
Over $10,600 but not over $13,250	$1,920, plus 30% of excess over $10,600.
Over $13,250 but not over $15,900	$2,715, plus 35% of excess over $13,250.
Over $15,900 but not over $21,200	$3,643, plus 42% of excess over $15,900.
Over $21,200 but not over $28,300	$5,869, plus 48% of excess over $21,200.
Over $28,300	$9,277, plus 50% of excess over $28,300.".

(b) INCREASE IN ZERO BRACKET AMOUNT.—Subsection (d) of section 63 (defining zero bracket amount) is amended—

(1) by striking out "$3,400" and inserting in lieu thereof "$3,800",

(2) by striking out "$2,300" and inserting in lieu thereof "$2,500", and

(3) by striking out "$1,700" and inserting in lieu thereof "$1,900".

(c) FILING REQUIREMENTS.—Paragraph (1) of section 6012(a) (relating to person required to make returns of income) is amended—

(1) by striking out "$3,300" and inserting in lieu thereof "$3,500",

(2) by striking out "$4,400" and inserting in lieu thereof "$4,800", and

(3) by striking out "$5,400" and inserting in lieu thereof "$5,800".

(d) CONFORMING AMENDMENTS.—

(1) LUMP SUM DISTRIBUTIONS TAX.—Subparagraph (C) of section 402(e)(1) (relating to tax on lump sum distributions) is amended by striking out "$2,300" and inserting in lieu thereof "$2,500".

(2) PERSONAL HOLDING COMPANY TAX.—Section 541 (relating to personal holding company tax) is amended by striking out "70 percent" and inserting in lieu thereof "50 percent".

(e) WITHHOLDING TABLES.—

(1) DETERMINATION OF WITHHOLDING.—Section 3402(a) (relating to requirement of withholding income tax at source) is amended to read as follows:

"(a) REQUIREMENT OF WITHHOLDING.—

"(1) IN GENERAL.—Except as otherwise provided in this section, every employer making payment of wages shall deduct and withhold upon such wages a tax determined in accordance with tables of computational procedures prescribed by the Secretary. Any tables or procedures prescribed under this paragraph shall—

"(A) apply with respect to the amount of wages paid during such periods as the Secretary may prescribe, and

"(B) be in such form, and provide for such amounts to be deducted and withheld, as the Secretary determines to be most appropriate to carry out the purposes of this chapter and to reflect the provisions of chapter 1 applicable to such periods.

"(2) AMOUNT OF WAGES.—For purposes of applying tables or procedures prescribed under paragraph (1), the term 'the amount of wages' means the amount by which the wages exceed the number of withholding exemptions claimed multiplied by the amount of one such exemption. The amount of each withholding exemption shall be equal to the amount of one personal exemption provided in section 151(b), prorated to the payroll period. The maximum number of withholding exemptions permitted shall be calculated in accordance with regulations prescribed by the Secretary under this section, taking into account any reduction in withholding to which an employee is entitled under this section.".

(2) WAGES PAID FOR PERIOD LESS THAN 1 WEEK.—Section 3402(b) (relating to the percentage method of withholding) is amended—

(A) by striking out paragraph (1), and redesignating paragraphs (2) through (5) as paragraphs (1) through (4), respectively; and

(B) by striking out paragraph (3), as redesignated by subparagraph (A), and inserting in lieu thereof the following:

"(3) In any case in which the period, or the time described in paragraph (2), in respect of any wages is less than one week, the Secretary, under regulations prescribed by him, may authorize an employer to compute the tax to be deducted and withheld as if the aggregate of the wages paid to the employee during the calendar week were paid for a weekly payroll period.".

(3) ZERO BRACKET AMOUNT.—Paragraph (1)(G) of section 3402(f) (relating to withholding exemptions) is amended by inserting "(or more than one exemption if so prescribed by the Secretary)" after "one exemption".

(4) CHANGES IN WITHHOLDING.—Section 3402(i) (relating to additional withholding) is amended to read as follows:

"(i) CHANGES IN WITHHOLDING.—

"(1) IN GENERAL.—The Secretary may by regulations provide for increases or decreases in the amount of withholding otherwise required under this section in cases where the employee requests such changes.

"(2) TREATMENT AS TAX.—Any increased withholding under paragraph (1) shall for all purposes be considered tax required to be deducted and withheld under this chapter.".

(5) WITHHOLDING ALLOWANCES.—

(A) IN GENERAL.—Paragraph (1) of section 3402(m) (relating to withholding allowances based on itemized deductions) is amended to read as follows:

"(1) GENERAL RULE.—Under regulations prescribed by the Secretary, an employee shall be entitled to additional withholding allowances or additional reductions in withholding under this subsection. In determining the number of additional withholding allowances or the amount of additional reductions in withholding under this subsection, the employee may take into account—

"(A) the excess of his estimated itemized deductions or other estimated deductions (as prescribed by the Secretary) over his zero bracket amount (as defined in section section 63(d)),

"(B) such tax credits to which he is entitled as specified in the regulations prescribed by the Secretary, and

"(C) such additional items as specified in the regulations prescribed by the Secretary.".

(B) TABLES.—Paragraph (4) of section 3402(m) is amended to read as follows:

"(4) AUTHORITY TO PRESCRIBE TABLES.—The Secretary may prescribe tables or computational procedures pursuant to which employees shall determine the number of withholding allowances or the amount of reduced withholding to which the employees are entitled under this subsection.".

(f) REPEAL OF MAXIMUM TAX.—

(1) IN GENERAL.—Part VI of subchapter Q of chapter 1 (relating to maximum rate on personal service income) is repealed.

(2) CONFORMING AMENDMENTS.—

(A) Paragraph (1) of section 3 (b) (relating to tax tables for individuals) is amended to read as follows:

"(1) an individual to whom section 1301 (relating to income averaging) applies for the taxable year,".

(B) Subsection (b) of section 1304 (relating to special rules for income averaging) is amended—

(i) by inserting "and" at the end of paragraph (1),

(ii) by striking out ", and" at the end of paragraph (2) and inserting in lieu thereof a period, and

(iii) by striking out paragraph (3).

(C) The table of parts for subchapter Q of chapter 1 is amended by striking out the item relating to part VI.

(g) ALTERNATIVE MINIMUM TAX.—Paragraph (1) of section 55 (a) (relating to alternative minimum tax) is amended—

(1) by striking out all that follows "$60,000" in subparagraph (B) and inserting in lieu thereof ", exceeds", and

(2) by striking out subparagraph (C).

(h) Effective Dates.—

(1) IN GENERAL.—The amendments made by subsections (a), (b), (c), and (d)(1) shall apply to taxable years beginning after December 31, 1982.

(2) AMENDMENTS RELATING TO 50 PERCENT MAXIMUM TAX.—The amendments made by subsections (d)(2), (f), and (g) shall apply to taxable years beginning after December 31, 1981.

(3) WITHHOLDING AMENDMENTS.—The amendments made by subsection (e) shall apply to remuneration paid after December 31, 1981.

SEC. 103. 20-PERCENT MAXIMUM RATE ON NET CAPITAL GAIN FOR PORTION OF 1981.

(a) IN GENERAL.—If for any taxable year ending after June 10, 1981, and beginning before January 1, 1982, a taxpayer other than a corporation has qualified net capital gain, then the tax imposed under section 1 of the Internal Revenue Code of 1954 for such taxable year shall be equal to the lesser of—

(1) the tax imposed under such section determined without regard to this subsection, or

(2) the sum of—

(A) the tax imposed under such section on the excess of—

(i) the taxable income of the taxpayer, over

(ii) 40 percent of the qualified net capital gain of the taxpayer, and

(B) 20 percent of the qualified net capital gain.

(b) APPLICATION WITH ALTERNATIVE MINIMUM TAX.—

(1) IN GENERAL.—If subsection (a) applies to any taxpayer for any taxable year, then the amount determined under section 55(a)(1) of the Internal Revenue Code of 1954 for such taxable year shall be equal to the lesser of—

(A) the amount determined under such section 55(a)(1) determined without regard to this subsection, or

(B) the sum of—

(i) the amount which would be determined under such section 55(a)(1) if the alternative minimum taxable income was the excess of—

(I) the alternative minimum taxable income (within the meaning of section 55(b)(1) of such Code) of the taxpayer, over

(II) the qualified net capital gain of the taxpayer, and

(ii) 20 percent of the qualified net capital gain.

(2) NO CREDITS ALLOWABLE.—For purposes of section 55(c) of such Code, no credit allowable under subpart A of part IV of subchapter A of chapter 1 of such Code (other than section 33(a) of such Code) shall be allowable against the amount described in paragraph (1)(B)(ii).

(c) QUALIFIED NET CAPITAL GAIN.—

(1) IN GENERAL.—For purposes of this section, the term "qualified net capital gain" means the lesser of—

(A) the net capital gain for the taxable year, or

(B) the net capital gain for the taxable year taking into account only gain or loss from sales or exchanges occurring after June 10, 1981

(2) NET CAPITAL GAIN.—For purposes of this subsection, the term "net capital gain" has the meaning given such term by section 1222(11) of the Internal Revenue Code of 1954.

SEC. 104. INCREASE IN THE EARNED INCOME TAX CREDIT.

(a) INCREASE IN CREDIT.—Subsection (a) of section 43 (relating to earned income credit) is amended by striking out "10 percent" and inserting in lieu thereof "11 percent".

(b) REVISION OF LIMITATION.—Subsection (b) of section 43 (relating to limitation) is amended to read as follows:

"(b) LIMITATION.—The amount of the credit allowable to a taxpayer under subsection (a) for any taxable year shall not exceed the excess (if any) of—

"(1) $550, over

"(2) 13.75 percent of so much of the adjusted gross income (or, if greater, the earned income) of the taxpayer for the taxable year as exceeds $8,000.".

(c) CONFORMING AMENDMENTS.—

(1) Subsection (f)(2) of section 43 is amended—

(A) by striking out "$10,000" each place it appears and inserting in lieu thereof "$12,000", and

(B) by striking out "$6,000" and inserting in lieu thereof "$8,000".

(2) Paragraph (2) of section 3507(c) (relating to earned income advance amount tables) is amended—

(A) by striking out "10 percent" each place it appears and inserting in lieu thereof "11 percent",

(B) by striking out "$6,000 and $10,000" and inserting in lieu thereof "$8,000 and $12,000", and

(C) by striking out "$3,000 and $5,000" and inserting in lieu thereof "$4,000 and $6,000".

(d) EFFECTIVE DATES.—

(1) IN GENERAL.—Except as provided in paragraph (2), the amendments made by this section shall apply to taxable years beginning after December 31, 1981.

(2) AMENDMENTS OF SECTION 3507.—The amendments made by subsection (c)(2) shall apply to remuneration paid after December 31, 1981.

SEC. 105. DEDUCTION FOR TWO-EARNER MARRIED COUPLES.

(a) IN GENERAL.—Part VII of subchapter B of chapter 1 (relating to additional itemized deductions for individuals) is amended by redesignating section 221 as section 222 and by inserting after section 220 the following new section:

"SEC. 221. DEDUCTION FOR TWO-EARNER MARRIED COUPLES.

"(a) DEDUCTION ALLOWED.—

"(1) IN GENERAL.—In the case of a joint return under section 6013 for the taxable year, there shall be allowed as a deduction an amount equal to 10 percent of the lesser of—

"(A) $30,000, or

"(B) the qualified earned income of the spouse with the lower qualified earned income for such taxable year.

"(2) SPECIAL RULE FOR 1982.—In the case of a taxable year beginning during 1982, paragraph (1) shall be applied by substituting '5 percent' for '10 percent'.

"(b) QUALIFIED EARNED INCOME DEFINED.—

"(1) IN GENERAL.—For purposes of this section, the term 'qualified earned income' means an amount equal to the excess of—

"(A) the earned income of the spouse for the taxable year, over

"(B) an amount equal to the sum of the deductions described in paragraphs (1), (2), (7), (9), (10), and (15) of section 62 to the extent such deductions are properly allocable to or chargeable against earned income described in subparagraph (A). The amount of qualified earned income shall be determined without regard to any community property laws.

"(2) EARNED INCOME.—For purposes of paragraph (1), the term 'earned income' means income which is earned income within the meaning of section 911(d)(2) or 401(c)(2)(C), except that—

"(A) such term shall not include any amount—

"(i) not includible in gross income,

"(ii) received as a pension or annuity,

"(iii) paid or distributed out of an individual retirement plan (within the meaning of section 7701(a)(37)),

"(iv) received as deferred compensation, or

"(v) received for services performed by an individual in the employ of his spouse (within the meaning of section 3121(b)(3)(A)), and

"(B) section 911(d)(2)(B) shall be applied without regard to the phrase 'not in excess of 30 percent of his share of net profits of such trade or business'.

"(c) DEDUCTION DISALLOWED FOR INDIVIDUAL CLAIMING BENEFITS OF SECTION 911 OR 931.—No deduction shall be allowed under this section for any taxable year if either spouse claims the benefits of section 911 or 931 for such taxable year.".

(b) DEDUCTION ALLOWED IN COMPUTING ADJUSTED GROSS INCOME.—Section 62 (defining adjusted gross income), as amended by section 112(b)(2) of this Act, is amended by inserting after paragraph (15) the following new paragraph:

"(16) DEDUCTION FOR TWO-EARNER MARRIED COUPLES.—The deduction allowed by section 221.".

(c) CONFORMING AMENDMENT TO WITHHOLDING.—Subparagraph (A) of section 3402(m)(2) (defining estimated itemized deductions) is amended by striking out "paragraph (13)" and inserting in lieu thereof "paragraphs (13) and (16)".

(d) OTHER CONFORMING AMENDMENTS.—

(1) Subsection (a) of section 85 (relating to unemployment compensation) is amended by striking out "and without regard to section 105(d)" and inserting in lieu thereof ", section 105(d) and section 221".

(2) Subsection (d)(3) of section 105 (relating to amounts received under accident and health plans) is amended by inserting "and section 221" after "subsection" the first place it appears.

(3) The table of sections for such part VII is amended by striking out the item relating to section 221 and inserting in lieu thereof the following new items:

"Sec. 221. Deduction for two-earner married couples.

"Sec. 222. Cross references.".

(e) EFFECTIVE DATES.—

(1) IN GENERAL.—Except as provided in paragraph (2), the amendments made by this section shall apply to taxable years beginning after December 31, 1981.

(2) WITHHOLDING.—The amendment made by subsection (c) shall apply to remuneration paid after December 31, 1981.

SEC. 106. REPEAL OF WINDFALL PROFIT PROVISIONS.

(a) ROYALTY CREDIT.—Notwithstanding the provisions of section 6429 of the Internal Revenue Code of 1954, as amended by section 241, the amount which may be treated as an overpayment of tax under such section for calendar years 1982 and following is zero.

(b) RATE OF TAX ON NEWLY DISCOVERED OIL.—Notwithstanding the provisions of section 4987(b)(3)(B) of such Code, as added by section 242(a), the applicable percentage for newly discovered oil for purposes of determining the amount of tax imposed by section 4986 of such Code for periods after December 31, 1981, shall be 30 percent.

Mr. HOLLINGS. Mr. President, the tax bill that is before us is a watershed. It is as crucial to our economic recovery as are the spending cuts contained in the reconciliation bill now in conference with the House.

It should not be hard to understand why this is so. Federal fiscal policy is the lynchpin in our efforts to improve our economic plight. The spending and taxing policies of the Federal Government affect inflation, interest rates, growth, unemployment, productivity, and a host of other factors. None of these indicators is in great shape today and some look downright dismal.

Inflation is running at near double digit levels. Interest rates have been hovering at such high levels, around 20 percent, for so long that hundreds of savings and loans are in severe danger of failing. Our productivity has declined for 3 consecutive years and our growth rate is now among the lowest in the industrialized world.

And if these ills were not enough, our national debt will soon reach the astronomical figure of $1 trillion. That is a 1 followed by 12 zeroes. It is an amount of money so large that a stack of 1 trillion $1 bills would reach nearly 68,000 miles high.

Despite our efforts, we have been unsuccessful in getting our economy out of the doldrums. There are many causes but one is certainly that the Federal Government has not set a good economic example. We could take no single more

powerful action than to set in place a responsible fiscal policy in which spending and revenues work in concert to produce a balanced budget.

A balanced budget is the key that can help make our economic recovery a reality. Without it, we can only continue the ruinous stagflation, with all its attendant evils, that is sapping the country's economic vitality.

Achieving a balanced budget is not an easy task, nor can it be done overnight. When I was chairman of the Budget Committee last year, we produced a balanced budget in the spring only to see it disappear in a worsening economy. In fact, in the past 30 years, we have succeeded only five times in actually reaching that goal, the last time being in 1969.

Mr. President, I ask unanimous consent that a table showing the revenues, outlays and deficits of the Federal budget since 1951 be printed in the RECORD at this point.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

BUDGET RECEIPTS AND OUTLAYS, 1951–80
[In millions of dollars]

Fiscal year	Budget receipts	Budget outlays	Budget surplus or deficit (—)
1951	51,646	45,546	+6,100
1952	66,204	67,721	—1,517
1953	69,574	76,107	—6,533
1954	69,719	70,890	—1,170
1955	65,469	68,509	—3,041
1956	74,547	70,460	+4,087
1957	79,990	76,741	+3,249
1958	79,636	82,575	—2,939
1959	79,249	92,104	—12,855
1960	92,492	92,223	+269
1961	94,389	97,795	—3,406
1962	99,667	106,813	—7,137
1963	106,560	111,311	—4,751

Mr. HOLLINGS. As this table shows, a deficit or surplus is the result of two factors—outlays and receipts. Each is equally important in attaining a budget that is in balance.

On the spending side, we have already made outstanding progress. On May 21, the Congress adopted a budget resolution, House Concurrent Resolution 115, that significantly changed our spending priorities. It limited the increase in overall spending for fiscal year 1982 to 5.2 percent above the projected level for fiscal year 1981.

But more importantly, the resolution required 14 committees of the Senate and 15 committees of the House to report legislation that would cut spending by $36.5 billion in fiscal year 1982 and by a total of $141.6 billion through fiscal year 1984.

I ask unanimous consent to submit for the RECORD a table showing the instructions to each Senate committee.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

SUMMARY OF RECONCILIATION INSTRUCTIONS BY SENATE COMMITTEE

[In millions of dollars]

Mr. HOLLINGS. Mr. President, I am especially heartened to see Republicans following in the Democratic footsteps by endorsing the reconciliation process. This year's reconciliation bill, while unprecedented in magnitude, builds on the pioneering action last year when 9 Senate and 10 House committees were instructed to report savings of $6.4 billion in fiscal year 1981 outlays. Eventually, after a conference of over 100 Members, the reconciliation bill and related spending reduction measures cut outlays by a total of $4.6 billion.

Let there be no doubt that reconciliation is a bipartisan effort, one that Democrats as well as Republicans support. Last year's precedent-setting action was initiated by Democrats and supported by Republicans. This year, a bipartisan group of Senators started the ball rolling on reconciliation with the introduction of Senate Concurrent Resolution 9, which I cosponsored. When the final results were in, 28 Democrats voted in favor of the spending cuts contained in the reconciliation bill that passed the Senate on June 25.

I ask unanimous consent that a summary of the spending reductions achieved by each committee in the Senate-passed reconciliation, S. 1377, be included in the RECORD at this point.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

Mr. HOLLINGS. Mr. President, the reconciliation bill, which went to conference with the House on Tuesday, is the clearest possible sign of the commitment the Congress has to cut Federal spending in order to achieve a balanced budget.

But as I said earlier, there are two sides to a balanced budget. You cannot achieve it merely by cutting outlays. You have to pay attention to the revenue side. And that is where my present concern lies.

We cannot hope to ever achieve a balanced budget if for every dollar we cut in spending, we cut taxes by a similar amount. The arithmetic just does not allow it. We may reduce the overall level of Federal spending, but the deficit will remain the same.

To make any progress toward a balanced budget, we must cut taxes by less than we cut spending. To do otherwise jeopardizes not only a balanced budget but spending for some of our priority programs as well, such as national defense and social security.

To show the impact of tax cuts on the deficit, we need only look at the past decade. Since 1969, there have been seven major tax reductions. The effect of those reductions was that, in 1980 alone, if the tax laws had remained unchanged, Federal receipts from personal and corporate taxes would have been $154.7 billion higher than they were. That is nearly three times the level of our deficit that year.

In fact, we could have essentially balanced the budget or been in substantial surplus in each year during the 1970's if it were not for the tax cuts. In the past decade, the cumulative deficit was about $400 billion while the cumulative revenue loss from the tax cuts was over $700 billion.

Of course, I know just as well as the next person that everyone likes a tax cut. We like voting for them as much as our constituents like receiving them. But let us not fool ourselves and get carried away. What do the American people really want the Congress to do?

Well, in a poll taken shortly after the President's inauguration in January, 64 percent of those interviewed about Federal budget priorities ranked a balanced budget as more important than a tax cut. The people were not deceived by some of the claims made for a large tax cut. They clearly stated their preference for a balanced budget by over 2 to 1.

Mr. President, I ask unanimous consent that the results of that poll be printed in the RECORD.

There being no objection, the poll was ordered to be printed in the RECORD, as follows:

REAGAN BUDGET PRIORITIES

(NBC Poll, released January 28, 1981)

DEFENSE SPENDING

Do you think the federal government's spending next year on defense and the military should be increased, decreased, or kept about the same?

	1/81	10/80b
Increased	65	62
Decreased	6	6
Kept about the same	23	25
Not sure	6	6

INCREASED DEFENSE SPENDING VS. BALANCED FEDERAL BUDGET

If you had to choose between increasing spending on defense and balancing the federal budget, which would you choose?

[In percent]

Increase spending on defense	52
Balance federal budget	40
Not sure	8

BALANCED FEDERAL BUDGET VS. INCOME TAX CUT

If you had to choose between balancing the federal budget and cutting your federal income taxes, which would you choose?

[In percent]

	1/81	8/80a	7/80a
Balance Federal budget	64	49	57
Cut Federal income taxes	29	37	33
Not sure	7	14	10

FUTURE OF THE ECONOMY

During the next year, do you think the economy will get better, get worse or stay about the same?

[In percent]

	1/81	10/80a	5/80	1/80
Get better	38	30	30	15
Get worse	17	25	38	51
Stay about the same	40	38	27	30

	1/81	10/80b	9/80	7/80a
Better off	29	23	25	20
Worse off	14	17	16	29
About the same	51	52	55	46
Not sure	6	8	4	5

REAGAN BUDGET PRIORITIES

Both before and after his election, President Reagan has emphasized three goals in the area of federal finance: an increase in federal outlays for defense and defense-related programs, progress toward a balanced federal budget and a reduction in federal income tax rates.

Of these three proposals, the public is most clearly attracted to the prospect of higher defense spending. Two thirds of the people interviewed in this survey—65 percent—favor higher defense outlays, while 23 percent want spending kept at current levels and only 6 percent favor less money for defense.

By a relatively narrow 12-point margin—52 percent to 40 percent—Americans would choose higher defense spending over a balanced budget, if the policy choice ultimately came to that.

Tax-cutting seems to be the least important of the three Reagan Administration policy goals, in the minds of the public. By more than two-to-one—64 percent to 29 percent—Americans say they would balance the budget rather than cut income taxes if those actions became the policy choices.

Mr. HOLLINGS. To get to that balanced budget—which the people want and the economy needs—requires not only substantial spending cuts but a responsible, prudent, timely tax cut.

The Finance Committee bill now before us has a number of provisions which I support. The committee's proposals are considerably improved over those sent to the Congress by the new administration last spring. As the distinguished chairman of the Finance Committee knows, I testified before his committee about a number of concerns that I had over the administration's original proposals.

I appeared before that committee specifically to argue three points:

That the large personal tax rate reductions be pared back to allow for specific incentives for saving,

That the business tax cuts be put in place immediately rather than phased-in over 5 years as the administration proposed, and

That the committee deliver to the American people a tax bill that could help produce a balanced Federal budget by fiscal year 1984.

In some respects the committee has done its work well. But in other respects it has failed. It failed by not keeping faith with the people who asked for a balanced budget.

We know how dramatic the reductions in spending will be—over $38 billion in fiscal year 1982 to over $57 billion in 1984. These will not be painless cuts.

But to achieve a balanced budget, this tax bill would require ever greater, substantial reductions in spending, the kind of cuts that even fiscal conservatives would not likely support; thus, with this bill, the prospects for a balanced budget fade farther and farther from sight.

Mr. President, it is for this reason primarily that we offer my tax amendment.

Our economy has suffered mightily during the past decade, through both Republican and Democratic administrations. Inflation has risen from a 2-percent rate during the 1950's and early 1960's to between 9 and 10 percent currently. The unemployment rate is near 7½ percent now and rising. Economic growth during the past few years has been very small, and our standard of living rose by only two-tenths of 1 percent last year.

The problem is that real income grows only when productivity grows—and productivity growth in this Nation has slipped badly during the past decade. Between 1950 and the mid-1960's, productivity, that is, output per hour worked, rose at an annual rate of about 3 percent. This growth accounted for over two-thirds of the annual growth in our capacity to produce goods and services, but during 1978, 1979, and 1980, productivity actually declined.

The lack of productivity growth has a dramatic impact on our Nation and on the Federal budget. If people cannot produce more, there is no way for them to consume more or for business to invest more. These facts are well known. What is less well known is the impact that slow productivity growth can have on the Federal budget.

Slow growth in productivity increases inflation and thus leads to higher Federal outlays. Slow productivity growth also implies slow economic growth over the long term. If this continues, our tax base will not rise rapidly enough to pay for the "graying" of the population and the necessary increase in defense readiness.

In this case, either tax rates will have to rise, or else we will have to accept further spending reductions or a large Federal deficit. This is a rather sober view of our economic prospects and one which we in Congress have been reluctant to face.

How can we improve our economic situation? We can begin by being more realistic about our economic prospects and adjust Federal programs accordingly. For example, we can alter the method by which social security, and civilian and military retirement programs are indexed for inflation.

But in addition, we can keep our eye on productivity and enact a tax program which will improve on that most fundamental fact of economic life. The economy needs a tax cut which accomplishes five things:

It must provide business with incentives to invest.

It must provide savings incentives to finance the additional investment.

It must provide individual tax cuts sufficient only to insure that economic growth will continue.

It must reduce the Federal deficit and reach a balance in 1984.

It must provide for sharp declines in interest rates later this year.

Our tax proposal would do all these things. It adopts many of the provisions included in the committee bill.

The business tax cuts provide specific incentives for capital investment and, in my view, are the centerpiece of the committee proposals and my amendment. The fact that the administration has focused on individual rate cuts, I think, gives an indication of its misplaced priorities.

The business tax cuts provide for substantially shortened and simplified depreciation schedules. Assets are placed into four categories and depreciated over 3, 5, 10, or 15 years. In addition, the investment tax credit has been increased, further stimplating investment.

Since the source of our economic difficulties—inflation, budget deficits, and the lack of increases in the standard of living—can be tied to productivity growth, it makes the most sense to attack the problem directly. The only tried and true way to increase productivity is to invest.

There has been some concern that the investment incentives may go too far, that they provide incentives greater than current year expensing, especially if interest rates decline as much as the administration thinks they will.

I share that concern. However, if interest rates do come down as predicted, subsequent measures could correct the tax inequities. Because so much of our future depends on raising the growth of productivity, we should not be stingy with investment incentives.

I, therefore, support this aspect of the committee's tax proposals.

The second important feature of our amendment provides savings incentives necessary to finance the additional investment spending in a noninflationary manner. The incentives to save in this bill through retirement accounts and stock ownership plans are worthwhile.

There can be no greater testimony to the need for these incentives than the current low rate of personal savings. In 1980, we saved only 5½ percent of our after tax income. During the 1960's, however, the savings rate was 6½ percent. If we had maintained the higher savings rate, we would now have an additional $20 billion to finance investment purchases.

The "all-savers certificate" also should be supported. But I have some question whether this proposal will do much to increase overall savings. Much of the funds attracted by the certificates will likely come from within the savings and loan institutions themselves. In addition, we should not delude ourselves that these certificates are for all savers. Rather, they will benefit only those taxpayers above the 30-percent tax bracket.

However, the savings and loan institutions have been sheltered for some time, by design, to support the housing market. We cannot afford to let these institutions fail only because they are unable to adjust quickly enough to high interest rates. We owe these institutions a short transition period. I hope that this so-called all-savers certificate will accomplish that purpose.

One option for helping savings and loans and other thrift institutions that has apparently been overlooked is a tax program which would rapidly lower interest rates. This is a major flaw in the committee bill.

The third part of our amendment concerns individual tax reductions. In my view, we need tax reductions. Inflation has substantially increased tax burdens during the past few years and this has impaired the growth of the economy.

But, I have a major disagreement with the proposals embodied in the bill. The proposals give tax reductions which are both too large and too soon. They run the risk of undermining the very incentives for investment and savings that have been so carefully crafted by the Finance Committee. Apparently the committee is oblivious to these dangers.

What we need are individual tax cuts to insure that economic growth will not falter during the next few years. We need individual tax cuts to insure that when the capital investments are made, there will be a rising demand for those goods and services produced.

What we do not need are extraordinarily large personal tax cuts that will steal this country's scarce resources, resources that otherwise would have produced capital investment and added to productivity growth.

We do not need large tax cuts that will generate runaway demand pressures, thereby adding to inflation and keeping interest rates high. Large cuts will undermine the very supply-side investment incentives needed to sustain long-run economic growth.

Many leading economists and the financial markets are distressed by the prospects of a large personal tax cut. Indeed, the administration's own economists are "puzzled and confused" as to why their plan is not bringing down interest rates.

Mr. President, I ask unanimous consent that two articles commenting on the effect of a deficit-financed tax cut be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Wall Street Journal, June 17, 1981]

DOUBTS OVER REAGAN'S DEFICITS

(By Charles L. Schultze)

Last February and March, administration spokesmen confidently predicted that as their tax and budget program began to move through Congress, financial markets would anticipate the soon-to-be realized economic improvements by bidding up bond prices.

Since then the Congress has indeed moved rapidly to adopt the President's spending program, and the prospects for enactment of something close to the President's tax program strengthen daily. But as these developments took place interest rates fluctuated more or less in line with short-term developments in the economy and the money supply. Financial markets, however, have not acted as if they expected the next several years to be marked by sharply lower inflation and increased national saving.

The President complained, with some acerbity, about the unreliability of the financial markets as an indicator of the economy's health. It is not hard to sympathize with the President. Financial markets are far from infallible predictors of the future; what would please the financial markets is not always what is good for the nation. (Nothing would drive up bond prices faster than the prospect of a solid depression.)

Whether or not the substance of President Reagan's economic program warrants the market's bearish reaction, I do not propose to argue. But I believe it is true that the rhetoric and the unorthodox economic analysis that have sometimes accompanied the presentation of the administration's program have exacerbated the market's skepticism.

Some of the more avid supporters of the administration's large multi-year tax reduction have developed an economic theory that asserts that any deficits from "supply-side" tax cuts will not affect inflation or interest rates. The additional income put into the pockets of taxpayers through cuts in marginal tax rates, they argue, has the felicitous anti-inflationary property not only of bringing forth increases in supply but of failing to raise demand.

For financial markets, this is a dangerous doctrine. Its acceptance would mean that whenever there was a choice between reducing budget deficits and making further tax cuts, priority would always go to the latter. The extent to which the administration has accepted this "hard-line" version of supply-side economics is not clear.

TARGET FOR 1984

On one hand the administration has labored to get major spending cuts enacted. Its budget estimates show a balanced budget target for 1984. It has recently reduced the size of its proposed tax cut in fiscal 1982. On this basis it would appear not to have bought the new theory.

But some of the administration's appointees are closely associated with the new doctrine. Moreover, the administration still insists on enactment of a 1984 tax cut virtually as large as its original recommendation ($147 billion vs. $152 billion), despite not being able to identify some $29 billion in spending cuts needed to balance the 1984 budget, despite the vanishing chances of getting $16 billion in Social Security cuts and despite a consensus of private forecasters that the optimistic economic assumptions on which it counts to balance the budget are unlikely to be realized.

Economists of virtually all persuasions have recognized three major consequences of deficit increase caused by a tax cut not accompanied by an increase in money supply.

First, the tax cut would increase taxpayers' after-tax income and hence their demand for goods and services. Second, in the face of constant money growth, some, but not all, of the increased spending on the part of taxpayers would be offset as the fiscal stimulus raised interest rates and "crowded out" some interest-sensitive private spending. Third, depending on economic circumstances, the remaining increase in demand would result partly in higher national output and partly in higher prices.

Economists who lean to monetarism emphasize interest rates and the crowding-out effect, and downplay the size of the remaining increase in aggregate demand.

Keynesians emphasize the increase in demand that remains even after interest rates have risen. And economists differ among themselves about how the remaining increase in aggregate demand would be split between higher production and higher prices. Whatever their disagreements, most believe that with stable money-supply growth, an expanded federal deficit resulting from a tax cut would result in some combination of increased aggregate demand and increased interest rates.

The economic theory of the ardent devotees of supply-side tax cuts has been set forth in a number of places, most comprehensively in a 100-page document, "The Classical Economic Case for Cutting Marginal Tax Rates." It circulated on Capitol Hill with a cover letter from the top Republican leadership in the House (Bob Michel, Trent Lott and Jack Kemp) describing it as an explanation of the reasoning behind the President's tax proposals.

There are two versions of the new doctrine in "The Classical Case." The first and most naive is:

"If we ignore the effects of tax-rate reductions on supply as the Keynesians insist, for every $1 increase in disposable taxpayer income from a tax cut there will initially be either $1 less for recipients of federal spending (if spending is also reduced) or $1 less in disposable income for the buyer of federal bonds sold to finance the federal deficit (if spending is not reduced). Aggregate income and demand are unchanged by a change in the tax rates."

And again: "The disposable income of the taxpayers increases by the amount of the tax cut. But the disposable income of the purchasers of federal bonds sold to finance the deficit is reduced by the amount of the tax cut."

According to this view, an investor who buys a $10,000 government bond to finance the deficit, and exchanges one asset (cash) for another asset (a bond), has suffered a $10,000 loss in income just as if his taxes had increased by $10,000. An asset exchange is treated as equal to a loss in income. As a consequence the income, and the demand for goods and services on the part of bond purchasers, are allegedly reduced by the same amount as income and demand are increased on the part of taxpayers. Neither aggregate demand nor interest rates rise because of the deficit. The entire economic effect of a tax cut is concentrated on the supply side.

Presumably in recognition that this incredible view of economic behavior wouldn't stand close scrutiny, the "Classical Case" later advances a more complex argument. When the Treasury borrows to finance a deficit there could indeed be a problem as private investment is crowded out, creating upward pressure on interest rates. But the problem will not occur if the deficit is caused by a cut in marginal tax rates.

"A cut in marginal tax rates can offset part or all of any increase in the deficit by crowding in additional saving and raising the returns on effort and investment. . . . Deficits caused by cutting marginal income tax rates add to the supply of funds in the financial market as well as to the demand for funds." Lo and behold, once again the deficit will not put upward pressure on interest rates.

There is no pea left under this particular set of shells. So long as the Federal Reserve maintains its monetary constraint, taxpayers must save 100% of any deficit-creating tax cut if the added deficit is to be financed at no rise in interest rates. Even in that unlikely event, if all the additional savings goes to finance the deficit, what is left to finance increases in private investment? The major point of supply-side tax cuts has been lost in this dialectical shuffle.

EASING FINANCIAL PRESSURES

The "Classical Case" goes on to observe that the larger economy resulting from cuts in marginal tax rates would also generate increases in corporate revenues and reductions in state and local borrowing, thereby easing pressures in financial markets.

This "bootstrap" theory of finance—an economic expansion generates its own financing at constant interest rates—is ironically reminiscent of an early, very naive and quickly discredited version of Keynesianism. It simply ignores the interest rate consequences of the increased demand for money that accompanies an expanded growth in nominal GNP.

A few economists have recently resurrected a highly esoteric argument which purports by tax cuts) will add neither to aggregate to show why deficits (including those created demand nor to interest rates. In this argument, when a tax cut is financed by a budget deficit, super-rational taxpayers will save all their tax cut to be able to pay the higher taxes which they forsee will be levied on them in the future to cover the interest on the newly created public debt. Neither aggregate demand nor interest rates will rise.

Empirical evidence and common sense

persuasively contradict this view of the world. In any event, adherents of a supply-side tax cut can scarcely afford to accept this approach to deficits. In the long run, according to this view, a deficit-financed tax cut cannot stimulate greater investment and work effort, since lower taxes today are expected to be offset by higher taxes tomorrow.

Recognition that deficits stemming from tax cuts have demand and interest-rate effects by no means implies that deficits are always "bad." In periods of economic weakness we may want to increase demand through tax cuts not matched by spending cuts. Recognizing that deficits have macroeconomic effects does not justify a policy of perpetually balanced budgets at any cost. Nevertheless, in a world of high, stubborn inflation, with inflationary expectations easily kindled and with interest rates already high, fiscal policy cannot ignore the danger that would come from high, persistent budget deficits. Financial markets will not react well to any suspicion that fiscal policy is governed by an economic doctrine that ignores its impact on demand. The administration could probably help its case with the market by making clear that it is indeed aware of such dangers in today's climate, even those created by cutting marginal tax rates.

[From the New York Times, May 27, 1981]

GEORGE, KEYNES, REAGAN, RABBIT AND HAT

(By William G. Tucker)

In the 1870's, a young newspaper editor named Henry George walked the streets of San Francisco lamenting the paradoxical economic mayhem that lay all around him. Why should people starve for lack of work in the very shadows of industries that were closing because people didn't have enough money to buy their goods? In 1879, he published his classic, "Progress and Poverty," to try to supply an answer.

George argued that panics occurred because the wealthy withdrew their money from productive enterprise to invest in a nonproductive good—specifically, land. Whenever rich investors started worrying about the future of the economy, he argued, they withdrew their business investments and started chasing speculative land ventures. Panic and poverty resulted. The solution, he argued, was for government to tax away all the economic "rent" earned from land ownership in order to channel investment back into more-productive business enterprises.

The system has worked occasionally in revitalizing cities. Pittsburgh's downtown renaissance is partly attributable to a Georgian taxing policy, whereby land is assessed at five times the rate of buildings on it. But as an overall strategy to stimulate the economy, it probably wouldn't work. Without land to speculate in, worried investors would just turn to something else. Art, antiques, yachts—anything would do as long as it promised to increase in value while the returns from business enterprises stagnated.

John Maynard Keynes attacked the same dilemma in the midst of the Depression and came up with another original answer. People couldn't invest, he argued, because there wasn't enough money. In a time of failing enterprises—technically called a "deflation"—money becomes more valuable, while goods become cheaper. Therefore, people want to hang onto money. But, as with land, there is only so much money available in the system. If people won't part with it, Keynes argued, business can't function. "Unemployment develops," he wrote, "because people want the moon." His solution was even more novel. If people want the moon, he argued, then give it to them. The Government should print more money and pump it into the economy to give people the illusion, at least, that they are again prosperous. They will start spending, and the economy will begin to hum. By the time the inflation is felt, the economy will be producing fast enough to absorb its effects.

For better or for worse, the gimmick worked. Keynesian "demand-side" economics became a double-barreled approach to altruistic social policies. Congress ran up even-larger deficits on programs to help the poor. But, it was argued, these programs benefited everyone by keeping employment and production high. It all seemed too good to be true.

It was. The problem, as Milton Friedman has expressed it, lay in the maxim "You can't fool all of the people all of the time." Gradually, people began to anticipate that money would continue losing its value, and to look for safer havens. Like 19th century plutocrats, they began to speculate in art, antiques, gold—anything that promised not to lose its value. In the 1970's, suburban homeowners' property often appreciated $3,000 to $4,000 a month. But when was the last time you heard of someone getting rich on the stock market?

The solution, then, should be to stabilize the currency, restore people's faith in the value of money, and try to nurse them back into investing in productive enterprise.

But what has the business-oriented Reagan Administration decided to do? Instead, it is going to try a new way of fooling people. The gimmick is now called "supply-side" economics. This time, we will give people newly printed money in the form of tax reductions. Thinking they are rich, they will go out and invest (but not spend) the money to get the economy rolling again. As Keynes proposed, by the time the inflationary effects have caught up, the economy will be running fast enough to absorb all the new currency. That way stagflation will end.

It may work. Keynes's plan, arguably, kept people fooled for almost 40 years. Perhaps this new suit of clothes for the emperor will wear for another 40. But the difficulty will be that once it succeeds it will be tried again and again until once more people catch on. Then it will be up to another new economic theorist to pull the same rabbit out of a different hat.

The one thing that would work in the long run—stabilizing the currency and controlling inflation so that business investment will once again become attractive—apparently isn't on the agenda.

After 40 years of being fooled by Keynes's demand-side inflation, how long will the public be fooled by the new supply-side inflation? On that question hinges the fate of the entire Republican economic program.

Mr. HOLLINGS. The reason that the administration's personal tax plan, the one in this bill, is not working is that it is wrong.

Our amendment would correct the bill's errors. Our individual tax cut proposal includes the following provisions:

A reduction in the maximum tax rate to 50 percent in January 1982. The current maximum rate is 70 percent. The maximum rate on capital gains is lowered to 20 percent effective June 10, 1981.

An increase in the zero bracket amount—formerly the standard deduction—to $2,500 for singles and heads of households and to $3,800 for joint returns beginning in January 1983.

An increase in earned income credit to 11 percent for the first $5,000 of earnings. The credit would not apply to those earning more than $12,000 and would be effective in January 1982.

A deduction for two-earner married couples of 10 percent—5 percent in 1982—of the first $30,000 of income of the lower earning spouse. The effective date is January 1982.

An average 10-percent reduction in personal tax rates beginning in January 1983.

The reductions have been designed to insure that persons in the $15,000 to $50,000 income bracket are treated fairly by compensating for the effects of inflation. In addition, the proposal provides for a reduction in the "marriage penalty." This provides a more equitable tax treatment for the secondary earner in a family.

Our tax proposals also include reductions in estate and gift taxes, tax cuts for U.S. citizens working abroad, tightened provisions to insure that persons engaging in commodity tax straddles pay their fair share of taxes, and various small business tax provisions.

While our tax proposals are directed toward improving incentives to work, save, and invest—the supply-side—there are demand-side effects as well. Anytime people receive tax reductions, their after-tax incomes rise and they will spend more, thus adding to demand. There are no supply-side tax proposals where the effects on supply are larger than the effects on demand. Thus, we need to be mindful of the total size of the tax cut.

The individual rate cuts in our proposal are phased in slowly. Thus, insuring that the Federal deficit does not get out of control in 1982 and in subsequent years. An immediate across-the-board tax cut at this time is a luxury this Nation cannot afford.

The Senate Finance Committee bill would cost the Treasury $37 billion in fiscal year 1982, $93 billion in fiscal year 1983, and nearly $150 billion in fiscal year 1984. By contrast, our proposal will cost only $12.4 billion in fiscal year 1982, and reach $97.8 billion in fiscal year 1984, a reduction of over $50 billion in fiscal year 1984 alone.

Many of our tax proposals will increase savings. However, they are not, by themselves, sufficient to finance the amount of investment needed to generate long-run, stable growth.

Under the committee bill, the Federal Government will remain in substantial deficit even in 1984, thus absorbing savings that would otherwise be available for investment. This is wrong. The Government must contribute its fair share to national savings. Reducing the deficit will dramatically increase the amount of savings.

The committee bill will not, even under the most optimistic economic assumptions, cure our deficit problems. In fact, if this bill is enacted, along with the spending cuts now being considered, we will still have a deficit of about $60 billion in 1982 and 1983 and $50 to $60 billion in 1984. This includes the expected, but as yet, unspecified additional cuts of $20 billion in 1983 and $28 billion in 1984.

Under our tax cut plan, the deficit will be reduced dramatically in 1982 to $35 billion and will reach a balance in 1984.

Our proposal will also lower interest rates. A major danger that I see—and the reason why our proposal provides for a smaller tax cut in 1982—is the poten-

tial for a dramatic collision between fiscal and monetary policy. The Federal Reserve is committed to restraining the growth in money supply to fight inflation.

So far, the Federal Reserve has been the only anti-inflation game in town. But, the Fed cannot do the job alone. Tax, spending, and monetary policies must be equal partners in the fight against inflation. This requires substantial spending cuts, a small tax cut, and a commitment to an honestly balanced budget.

The large tax cut in the committee bill will present the Federal Reserve with a huge increase in Treasury borrowing. The problem is that if the Fed buys too much of this extra Government debt, it risks an inflationary surge in the money supply. But, if the Fed does not buy part of the extra debt, then interest rates will rise dramatically to entice private citizens to finance this Government debt. Thus, this tax bill will decide whether the economy gets tax relief or interest rate relief.

We all have seen in recent months the plight of our thrift institutions. The cause of those problems is largely high interest rates. Lower interest rates would go a long way toward correcting the financial difficulties of the savings and loans.

Furthermore, substantially lower interest rates would reduce Federal outlays. In the first budget resolution, interest paid on the national debt was projected to be around $110 billion in fiscal year 1984. The lower interest rates resulting from our tax proposals could easily reduce interest outlays by around $10 billion in 1984, thus, holding out the prospect of a surplus in that year.

Mr. President, interest rates are also critical because they affect the amount of investment and capital formation. While improved tax incentives will stimulate investment spending, higher interest rates will choke off that spending.

The higher interest rates that would occur with a large individual tax cut could totally offset the beneficial effects of the new investment incentives. The Government would then be left with a large Federal deficit and no extra investment to show for it. It is vital that the individual tax cuts be small enough to enhance, not undermine, the supply-side incentives needed to restore economic growth and prosperity.

There has been much talk about how the administration tax proposals are modeled after the very successful Kennedy tax cuts in the early 1960's. It is true those tax cuts were successful in promoting strong economic growth during much of the 1960's.

However, the Kennedy tax cuts were phased in as ours would be. The business tax cuts, accelerated depreciation and an increased investment tax credit, began in 1962. Only in 1964 were large cuts in individual tax rates, combined with further cuts in corporate taxes, made effective. It was not just the amount of the tax cut but its timing that contributed to the program's success. That is the lesson to be gained from the Kennedy tax cuts.

Mr. President, our economy is in too precarious a state to start inflicting irresponsible tax policies on it. Some of the proposals that have been suggested so far, including the personal rate cuts in the Finance Committee bill, would burden the economy to such an extent that recovery from our current plight would be an impossible dream. Now is not the time to sacrifice our economic recovery for the sake of fulfilling campaign rhetoric.

We can ill afford an inconsistent fiscal policy in which spending restraint is nullified by excessive tax cuts. The reconciliation bill has proved that Congress is on the right track to a balanced budget by cutting Federal spending.

But there is a significant danger that we are about to undo that effort if we pass the tax bill as reported from the Finance Committee. Our amendment would rectify the major problems with the bill.

Adlai Stevenson was once asked whether he was conservative or liberal. He replied that that was not the important question. The important question is, "Am I headed in the right direction?"

Our amendment will head us in the right direction and insure that our spending and tax policies work together to achieve a balanced budget and economic recovery.

I urge my colleagues to support it.

Mr. President, I have a lot of material, but I am more anxious that those few Senators who will support us be heard on this particular score.

What this particular amendment does is to take from the Finance Committee's bill that is presently before the body the tax incentives for business and savings; we take the depreciation allowance, the marriage tax penalty, the foreign earnings tax credit, the saver's certificate, the various provisions to bring about investment, savings, and increased productivity and other provisions with the exception of the windfall profit tax. That costs $1 billion per year, you can see how the Congress is split right down the middle as a result of the setaside of the Dole amendment, which allows mine to be considered at this time. That windfall profit tax provision is not included in this amendment. Other measures take effect at the very beginning of 1982 as the President's does.

We withhold the across-the-board personal income tax cut until January 1, 1983, and at that point give a 10-percent tax cut there for that year and the ensuing years.

We can dismiss this matter. I think my colleagues have heard me many times. I believe in spending cuts. I cosponsored the original reconciliation bill with Senator DOMENICI.

It is the Domenici-Hollings reconciliation bill. I cosponsored it at the very first of the year without hesitation. We tried as Democrats last year, many of us, to cut spending, and we succeeded in saving some $8 billion in the first reconciliation bill. So I do not come now as a result of the recent popular wave of our distinguished President and jump on board, but rather we started in that direction last year, and I joined willingly this year.

I agree on tax cuts. The fact of the matter is we had quite a debate on tax cuts last year.

We had quite a discussion in the recent campaign. When we were all campaigning we understood what the feeling of the American people was. The feeling obviously was that we had to first get on the top of the inflation, the economy, and the high interest rates.

Very interestingly, if you look at the November issue just after the election of the U.S. News & World Report, there are some 12,782 voters just coming out of the polling booths—we had heard from all the analysts, the political writers, and the pollsters.

But here were people being polled at that moment. It was almost like what we in the law call the res gestae, the facts speaking to the persons themselves, and the question was "Why did you vote for President Reagan?" And out of the polling booths, the No. 1 answer was overwhelmingly inflation; No. 2 was a balanced budget; No. 3 was unemployment; No. 4 was defense and national security; and the fifth reason given by those numerous voters at that time was a tax cut. But what percentage? Thirteen percent, 13 percent of the Reagan voters.

I had to remind Secretary Regan of that because he is constantly talking about the President's commitment. The President had numerous commitments and all are understood by the overwhelming majority of the Reagan supporters.

I was in that campaign. My State went for Reagan. I saw how they were responding. They were not interested particularly in tax cuts. They had seven tax cuts in the past 10 years. They knew Democratic Congresses were not hesitant, reluctant or bashful about passing tax cuts. But what they were interested in is getting the Government in the black and lowering inflation and interest rates.

And so it is very interesting, that the Germond-Witcover column should at this timely moment review the history and tell how we have really gotten into a political box here now, by the auction for votes, by playing Santa Claus, and by developing a Christmas tree tax bill. We are a far, far cry from the original intent as I described it in last year's second concurrent budget resolution.

We called for a tax cut. But we, the majority of Democrats, envisioned at that time that it was a business tax cut restricted solely to the supply-side. We heard all the economists and all the witnesses. Most of them have lockjaw now. It is a remarkable thing. The remarkable thing, I say to the Senator from Kansas, is the almost uniform discipline, not just over on his side of the aisle in support of the President's program, but also within the business community, you can hardly find a member of the business roundtable, a corporate head, a member of the chamber of commerce, or the American Enterprise Institute or any other expert come forward and label this particular measure, as it is phased in, as the danger that it

really is. They will tell you quietly on the side. They will call you aside and say, "You ought to keep working to reduce the tax cuts."

And to the great credit of the distinguished chairman of the Finance Committee, I think he has been working in that direction, genuinely and sincerely so. When this thing started off it was a $54 billion measure in 1982, and a 10 percent personal tax cut in 1982, 1983, and 1984. We have got it down to $38 to $40 billion. So I think the Finance Committee, in its work, particularly its chairman and its ranking member, our Senator from Louisiana, should be credited with trying to aim it in the right direction.

But it still is not phased-in properly. To phase it in properly we need to first, have the business incentives, second, then, to balance the budget, and third, once the Government is in the black, then to lose the revenues, and cut down on the size of Government. Put Washington on a diet. I agree with that. But it has got to be done in that order, or else you have what the headlines showed this morning—higher interest rates.

Now, I say to the Senator, since I have his kind attention, Secretary Regan, for example, in a conference at the White House, when we proposed a balanced budget by 1984, he said, "Look, Wall Street is not worried about 1984. They don't even know how to pronounce it."

I did not make that up and I am confident I would be supported in that general report of what he stated.

"Wall Street," he says, "is not worried about 1984. They don't even know how to pronounce it."

Well, within a matter of a couple of weeks, we met with the brains of Wall Street. We had the economists; we had four to five former chairmen of the Council of Economic Advisers on both sides of the aisles for Republican Presidents and for Democratic Presidents; we had the mortgage loan guarantee advisers of the large banks; we had the executive vice presidents of the large banks; we had the wage and price experts, we had the scholars from the campuses; we had Nobel Prize winners, and they were worried about one thing—and this is just a little over 2 weeks ago—1984.

And while they stayed in session in the morning in an off-the-record session, criticizing constructively—that is what they were called to do—criticizing the tentative projections for growth rate, inflation rate, interest rate, GNP deflator, nominal growth rate, the Consumer Price Index, unemployment, and other indicators of economic activity that the Congressional Budget Office had prepared. Now that they have the July 15 submission of President Reagan and his administration, they will in testimony then give those projections.

So they met in a very, very constructive session. After having been there all morning, there were still about 18 left around 3 o'clock, after a quick lunch. They voted. They voted about 1984. And they were asked if any believe that there would be a deficit below $30 billion. None; zero. They were unanimous in their belief that the deficit would at least be in excess of $30 billion.

Then eight believed the deficit would be between $30 and $50 billion, there were eight of them who believed it would be between $50 and $60 billion, and there were two believed that the deficit would be nearer $70 to $80 billion.

What they were considering was the bill as proposed here by the Finance Committee, generally the President's program, a $40 billion tax cut in fiscal year 1982. They were taking the President's assumptions of unidentified additional spending cuts of $21 billion in 1983 and $28 billion in 1984. And looking at that growth rate that they could project, they came to the conclusion, in round figures, that there would be a $60 billion deficit in 1984.

This is what my amendment addresses, I really resist this middle class, upper class, lower class, 2 years, 3 years syndrome and the perpetual nonsene going on. The truth of the matter is inflation hurts the poor, it hurts the rich, it hurts the middle class, and it is killing everybody. We need to get on top of this inflation and these high interest rates. That is what the people really were looking for President Reagan, when they voted for him last year, to do. Unless we do that we are going to be in deep, deep trouble.

I have seen no proposal in either the House or the Senate this year, other than this particular one, which I continue to modify, that would bring this Government back into the black by 1984.

President Reagan, I like his politics. He says, "Either take my program or submit an alternative." That is the kind of politics I understand. I appreciate that kind of politics.

So in February and then in March and later in debate on the floor of the Senate, I tried to address that issue within a proposal that had general support. My wish has been to leave the flexibility. But I am not granted that particular luxury now.

I lost decisively all along the line. I am trying to attract support by taking those measures at the cost of $12 billion of the Finance Committee that go to savings, that go to investment, that go to depreciation allowance, that go to increased productivity, and say, "Let's do that as they did it back in 1962." President Reagan and his advisers are constantly reminding us of the Kennedy program.

President Kennedy first put in his investment tax credit and liberalized depreciation schedules in 1962 and thereupon, 2 years later, put in his across-the-board income tax cut. We have a precedent. We are using the very same precedent that the administration uses, only we are using it more accurately, more advisedly.

I would plead with my colleagues to give this proposal their earnest consideration.

If we do not do something along this line, then do not be mystified by high interest rates.

The President's advisers said last week that they were puzzled, dismayed, by the continued high interest rates. I know that they never understood the mammoth task before them. I think perhaps President Reagan has overpromised. I do not think he realized that he came to office on the biggest surge of red ink, the biggest Federal Government deficits, in the history of the Republic.

He and his advisers have been caught up in the litany of political rhetoric of the campaign about 25 years of Democratic bureaucracy. On the contrary, Government here at the Federal level has been responsible. There have been balanced budgets by Harry Truman and balanced budgets by President Johnson. Our last budget for fiscal 1969 was balanced with President Johnson.

When Richard Nixon came to office, he was given Government in the black.

In the 1950's there was a cumulative deficit of about $17.7 billion, and between 1960 and 1970 of $57 billion, for a total 20-year cumulative deficit of $74.7 billion.

In contrast to that for the last 10 years, we have run up deficits cumulatively in excess of $400 billion.

So the President and his administration came to town 6 or 7 months ago. No President could turn it around in 6 months' time. We cannot fault President Reagan for that. On the contrary, he has been very successful in cutting spending. There were 15 Democrats that did not vote for it, but at least 28 Democrats, almost a 2-to-1 majority, voted a couple of weeks ago for $38 billion in spending cuts. They voted that way, over 2 to 1, when they passed a resolution by over 80 votes in this Chamber.

That is quite a change and President Reagan deserves part of the credit. But when he comes with increased spending programs, particularly defense and otherwise, to the tune of some $37 billion, his $37 billion in spending cuts is immediately offset. The only way for the economy and the Federal Reserve to look and find any relief is to look at the tax program. When they and the financial minds of this land come and learn that there will be a $60 billion deficit in 1982, under this program: $60 billion in 1983, and $50–$60 billion in 1984, then the message goes back to the investment houses, the stockbrokers, the big banks, the financiers of the land that we have the same act with different players, the same old fiscal policy of deficit spending.

They beat up on Paul Volcker yesterday, Republicans and Democrats. Pick up the morning news. "Banking panel attacks Volcker on tight money." Republicans and Democrats jumped all over him. One proposed that he be impeached.

Well, they could impeach the gentleman, but they cannot impeach the economic facts of life. The economic facts of life give the Federal Reserve two options: They can take these large deficits from these same people who are being so critical. This is not partisan comment. Republicans and Democrats have joined together overwhelmingly in the Finance Committee bill. They are also joining together under the Ways and Means version. The bottom line is about a $40 billion tax cut in the light of a $60 billion deficit this year, with high inflation and interest rates. Interest on the national

debt is costing the Government $90 billion a year.

Those who are beating up on Volcker should realize that option one is to take that deficit next year and monetize it, to buy the debt and say to Chairman Volcker, "Go ahead and ease the money. Let it flow."

Everybody around here, including this speaker, is engaged in the polemics of savings and investment. We have to create more savings by the small saver.

One way to gut him is to give him a big deficit. That is what will happen if they succeed.

The Federal Reserve has that option to monetize the debt and to reduce the value of every dollar in that savings account.

The Fed can print more money, as they say in Washington. Or the Fed can allow interest rates to rise to a level where private capital buys that particular debt.

Of course, with the history of 10 years of ever deeper deficits, this is possibly the one last chance the Federal Reserve has of holding down on the money supply and permanently reducing inflation.

The only criticism I would have, and I do it lightly, is I wish Mr. Paul Volcker and all those connected with finance in this land would speak out and tell it like it is. We know the budget calls for those deficits, but it is very, very difficult to get those particular witnesses, like Mr. Volcker, to be critical of the administration's approach.

They talk in some vague language. You cannot get them, unless you cross-examine them sharply, to talk about continued Federal deficits. Why do they not come out and say this program is not working? They are saying it with their dollars, with their investments, with their banking houses, with their brokerage houses. They are saying it in the board meetings. But they will not come to the Congress and say it.

The Business Advisory Council, the Chamber of Commerce, and others have lockjaw. We have a very, very difficult time building a consensus and an understanding.

There is no mystery. We are here in this tax cut bill asking for more of the same deficit spending, Government in the red. Somewhere, somehow, some attempt should be made to get it into the black—admittedly, not in 1 year. That would be too traumatic. That would really cause a recession, higher unemployment, loss of revenues, and even a higher deficit. So I agree that it should be phased in. Three years does not bother me, 5 years does not bother me. The yearly approach, the comprehensive approach, is the desired approach. But I do think that what we first have to do is get Government in the black. We, on our side hiding behind President Reagan, say "Oh, we will just let it go and give him his chance. Everybody said he ought to have his chance, so we will give him his chance." Then if he fails, we can say, "Well, we gave you your chance," and wait for the collapse.

There has been no good evidence—they have given us a bookwriter, George Gilder. They have given us Dave Stockman.

I asked Dave Stockman when he came before us, just to see if he understood the economics. The distinguished Presiding Officer was there—before the Committee on the Budget. I said, "Mr. Stockman, does the Government make money out of inflation or does it lose money?" He looked at me amazed that I would even ask the question. Then, after hesitating, he talked about the ratchet effect on personal taxes and said we have these additional billions of dollars of inflation, ratcheting everybody up into the higher tax brackets, the Government and the politicians sitting around this table with this huge pile of money to divvy around. Absolutely incorrect.

Yes, we do get $70 billion from bringing those people into the income tax system who are paying income taxes for the first time, and the ratchet effect of $70 billion. But look at social security. Look at unemployment compensation, look at the veterans, look at civil service, look at food stamps, look at all the different Government programs, defense costs, and how they are increased by inflation.

This present fiscal year—1981—inflation has cost the Government $83.1 billion. So the first task of the budgeteer is to cut back on programs, as we tried to do last year with the first reconciliation bill and this year, with this reconciliation bill. We either cut back or leave a large deficit.

We do not make money. Stockman has not understood that. Those who are voting for indexing of personal tax rates have not understood that. There has been no reluctance, Mr. President, on the part of any Congress, Republican or Democratic, to cut taxes as a result of that ratchet effect. We have had seven cuts in a 10-year period with a loss of $731 billion in revenues. If we had those revenues, then we would have been way in the black. Instead of a $1 trillion debt limit that is going to come right after we get back from the August recess, we would be paying the debt. But that has not occurred.

Let me, at this point, Mr. President, yield to my distinguished colleagues in support of this amendment. I believe the Senator from New Jersey wishes to speak.

The PRESIDING OFFICER. The Chair recognizes the Senator from New Jersey.

Mr. BRADLEY. Mr. President, I thank my distinguished colleague from South Carolina for his presentation of a very serious issue, one that we in Congress have not focused on clearly enough.

The issue here, Mr. President, is not which side of this debate wants economic growth. Both sides want economic growth. Both sides realize that unless this economy is growing, there will not be the revenues to keep past commitments to the poor or the elderly or the handicapped, and there will not be the room in our economy for the rising expectations that most people have felt are a birthright in this country. So the issue is not economic growth. The issue is, How do we promote the greatest economic growth in the shortest period of time and sustain it over the longest period of time?

Let me say, Mr. President, it is pretty hard to have economic growth when interest rates are 20 percent. There is not a Senator in this body who cannot describe for us the telephone calls that he has received in the last several months from auto dealers, from farmers, from people in the housing business, people in the savings and loans business—anybody who has inventories that he has to finance out of bank loans, who has been used to planning his profit margin with an interest rate at the upper level of 10 to 12 percent and is now faced with 20-percent interest rates.

All of us have heard those personal stories. All of us know that interest rates are sending this economy into a real spiral and, more important, interest rates are eating away at the optimism that still is a very real part of every American's view of his or her future. But high interest rates not only have a profound and pernicious effect on individuals. They also affect our Nation and our national security, in the following ways:

With interest rates above 10 percent, we find an unprecedented drawdown in oil stocks in this country. A year ago, oil stocks were at an all-time high. Now the oil industry, acting rationally in an economic sense when it sees interest rates at 20 percent, chooses to deplete its existing stockpile rather than pay the interest rates to finance that stockpile and to insure that it continues to grow. That means these higher interest rates are making us more and more vulnerable to an oil supply disruption, removing that cushion, small though it has been, that we have had against the economic losses we would suffer from an oil supply disruption.

Mr. President, interest rates also affect our national security in a very real and tangible way in the international context. We are the dominant economy in the world.

The old joke was when we sneeze, Europe gets a cold, or Japan gets a cold. And right now, with these interest rates at 20 percent, three things will happen: The first thing is in West Germany, Mr. President, where we shall be going to them in the next year asking them to increase their defense expenditures, to share a greater burden of NATO. Probably that is important to do. But, Mr. President, when over 60 percent of West Germany's deficit comes from interest rates, financing their internal deficit, it is unlikely that they are then going to spend more money for defense because they are having to spend more money for interest rates.

Mr. President, in that sense, it affects very directly the national security of this country and our ability to share the burden of defending the free world.

Second, one in five jobs in this country is tied to the export business. Twenty-five percent of our GNP is involved in trade.

When the West German Central Bank or the French Central Bank has to raise its interest rates, the same thing is going to happen there that will happen here: The economy is going into a recession, which means that they will not be able to buy enough of our exports.

Third, in the Third World, the less-developed countries that currently purchase 38 percent of all those exports, with interest rates going up worldwide, will be shackled with higher and higher payments and will be unable to generate revenues to buy our exports. Specifically, for every 1 percent increase in the international banking rate for 12 key less-developed countries, their debt service payments go up $8 billion.

Mr. President, that is precisely at the time when their oil costs are relatively stable. So just when they have a chance to get a breath from rising oil prices and have more revenues to buy our exports, we are going to be forcing them to pay higher interest rates and therefore not have the money to buy our exports.

So, for all these reasons, interest rates at the levels we presently find them pose a serious threat not only to individuals in this country, not only to our national security, but also to the stability of the international financial system.

The question arises, how do we get those interest rates down? If you ask most people, they will say that what we have to do to get these interest rates down is to get inflation down. Yet, if you look at the latest figure on the CPI and check the short-term interest rates, you find a spread of 5 to 6 points. If inflation is coming down, those interest rates should come down.

So, maybe the answer is that what we have to do to get interest rates down is not to get inflation down alone, but maybe what we need is a credible Government policy—not just the CPI, which bobs up and down with things we cannot predict, such as harvests or oil supply disruptions; but maybe what we need is a credible Government policy that gives all segments of our country the prospect that we are going to have sustained, real economic growth without inflation.

Of course, the administration's policy is an across-the-board tax cut, cutting nondefense spending, increasing defense programs, and reducing the growth in the money supply by one-half in the next 3 years. What is our country saying to this economic policy?

Wall Street is clearly saying, "No." Look at the interest rates. The banks are saying, "No." Look at the interest rates. Interest rates and monetary policy respond to fiscal policy, as the distinguished former chairman of the Budget Committee clearly stated.

Those who look at that mix say, "No, it is not credible. The economic policy is not credible."

Even today, in the Banking Committee, Paul Volcker, the head of the Federal Reserve said something specific on this subject for the first time. He said he thought that this policy would be more credible if the third year tax cut was triggered. This means that even the Chairman of the Federal Reserve realizes this is an experimental program that plays with the only economy we have and that jeopardizes our entire economic system, and he wants a safety valve.

So, clearly, the money markets say, "No, this is not a credible policy." But wage earners also say, "No." The administration's argument is that as soon as wage earners see high interest rates and cuts in nondefense spending and increases in defense spending, and across-the-board tax cuts, they will believe that inflation is coming down and will go to the bargaining table and I ask for less. That has not happened.

I suppose one could say that if unemployment went up to 12 percent and stayed there for a year, inflationary expectations would be broken. But if that happened, you could forget the balanced budget in 1984 or a few years after, because this budget, the midyear review right here, says that in 1982, unemployment is going to be 7.3 percent.

This morning, I talked with at least two economists who say it will be more like 8.3 percent, which in budgetary terms means $29 billion more on the deficit—$29 billion with just 1 percent more unemployment. So I guess we could convince wage earners not to go to the bargaining table for higher wage increases if there were increased unemployment; but that would result in enormous human problems as well as budgetary problems. So wage earners are also saying, "No" to this economic policy.

What are citizens going to do with their tax cut? They are going to spend it. They are not going to save it, as the theory of the so-called supply-side school says. They are going to spend it, and the result will be higher inflation and higher interest rates.

So, Mr. President, the money markets say, "No," the wage earners say, "No," and the citizens of this country say, "No" to this economic policy.

This is where the real irony comes in, and the former chairman of the Budget Committee called attention to it very clearly. The knock on Democrats for the past 15 years has been that we spend money on nondefense programs and we give irresponsible tax cuts to the American people. Yet, if you look at this program in a macroeconomic sense, it has the same impact as the former chairman said. The only difference is that this budget spends money on defense programs and gives irresponsible tax cuts.

In fact, Mr. President, if one side of the ledger you put fiscal restraint and nondefense budget cuts and on the other side you put fiscal stimulus tax cuts and defense increases, you find that fiscal stimulus exceeds fiscal restraint by $197 billion in the next 3 years. So the argument just does not hold water.

When confronted with these facts, the administration says, "Supply-side miracle, supply-side miracle." Let us be clear about what the supply-side miracle is and is not. The supply-side miracle is not giving incentives for business to rebuild plant and equipment, nor giving incentives for capital formation or risk taking. We have been doing that for decades.

The former chairman of the Budget Committee recognizes that such incentives are critical to getting us back on the path of economic growth, and he also recognizes in this amendment that this is not a revolutionary, new economic theory. It has been followed by virtually every country in the world that has progressed in the last 15 or 20 years. It was following in this country from time to time in the past. It is not new.

That is what the supply-side miracle is all about. The supply-side miracle, as I said before, is the belief that the average citizen out there who gets back $8 a week in a tax cut is going to save it and is not going to spend it.

Everywhere I go I ask my constituents in the State of New Jersey, "Are you going to save that $8 or spend it," the message I get back is that "We have a lot of things that we have foregone in the recent past and we intend to spend it."

So, Mr. President, that is the supply-side miracle. But underlying it is the belief that the economy will perform unlike it has ever performed in the past, that Americans will not save between 4 and 7 percent of their income which is what they have saved in good times and bad times and in inflation and in recession, over the last 30 years, but somehow or another this time they will save 15 percent. It is not what the historical record shows.

Never mind that productivity has been on the decline over the last 5 to 10 years and the last 3 years it has been negative. The supply-side miracles say that in the next year or two it will be 3 percent even though nothing in the historical record says that can happen.

Mr. President, almost all of the econometric models project growth, inflation and unemployment, far, far different from the administration's projections.

That is where this issue is really joined because when you confront David Stockman, as I have, and I am sure as the Senator from South Carolina, the distinguished former chairman of the Budget Committee, has, and the Senator from Connecticut has, on the Banking Committee, the Finance Committee, or the Budget Committee, with the fact that no one agrees, no econometric model agrees, with the administration's projections, Mr. Stockman responded: "You see, Senator, those econometric models only look at the past to predict the future."

Mr. President, I have never heard as succinct a definition of the scientific method in my life. "We only look at the past to predict the future."

Mr. President, that is what the supply-side miracle is all about. It is the contention that science, empirical argument using the past to predict the future, clearing away the cobwebs, reorganizing things and making a rational judgment, is out and that belief, blind belief, is in.

I suggest that this is too great a risk to take with the only economy we have.

Just as Wall Street has said "No", as wage earners have said "No," as citizens have said "No", as anyone who believes in science and looks at the administration's program with a great deal of skepticism has said "No", so the result of this economic program will be continued high interest rates. People are not going to invest with interest rates at 20 percent, they are going to postpone their investment and productivity will not respond as quickly as the administration has said but we will continue in a very dangerous period of stagflation.

Mr. President, I think what the Senator from South Carolina has done is to offer an amendment which is a prudent, cautious amendment, in very dangerous times, dangerous times not only for our auto dealers and housing builders, but also for our national security and, indeed, the stability of our international financial system. He has come forward with a prudent, cautious amendment, an amendment which says we recognize the Finance Committee has done some good things for business, we are going to keep them there to try to promote investment.

He has also said that the amendment that was offered last week on the individual side by the Senator from New Jersey was a good amendment, and we will spread it over 2 years, so that we have some chance of breaking those inflationary expectations and sending the right message to the money markets, to the wage earners, and to the citizens of this country that, indeed, we have a Government policy that is credible and that is aimed at the long term and is aimed to generate real economic growth.

So I am pleased to cosponsor the amendment of the Senator from South Carolina, to join in this debate, and to ask my colleagues at a time when it might be diffcult, when it might not be the politically easiest course to take, to act cautiously and act for the long term.

The PRESIDING OFFICER (Mr. HUMPHREY). The Senator from South Carolina.

Mr. HOLLINGS. Mr. President, I thank the distinguished Senator from New Jersey.

Mr. President, the Senator from New Jersey has been working all year long heading up a task force within the minority side trying to look critically at the economy. We have looked for alternatives and the Senator from New Jersey has tried to head up the minority effort.

And one of the great contributions that he has made, amongst many, in that particular endeavor is to target the tax cut for the $50,000 income level and less.

I just cannot commend him enough, nor can I, on the other hand—and I will yield to the distinguished Senator from Connecticut—not give vent to a frustration that how in heavens name would we ever have any credibility—we in the Congress worry about our credibility—how could we expect in the middle of all the bankruptcies and financial hardships of honest hard working people around the clock? We take cognizance of it in the marriage tax penalty. For the young couple we are trying to do things so they can own a home. Now we say let us do not penalize them. The only way they can adequately provide for their family is both get out and work. We do not advocate breaking up the family, but the economic factors of life are that if the couple is going to have that home to raise that family that they are going to have to work together, and in this amendment we take cognizance of it.

And then we come forward here on the floor as we have in the past 24 hours for a $40 billion tax cut for whom? For oil. Heavens above, for the richest crowd in the land. They are wrecking us.

I am telling the Senator from Kansas, he is in real trouble not just on social security, if he does not rein in that oil crowd of his. They are going to destroy the President himself and the entire Republican Party. They come running around here for more money. For what—incentive. Incentive they call it.

Try to get a meal for an expectant mother so the little child's brain can develop so we can get them off the breadline so they will be alert, attentive, educable, can concentrate and respond, be productive, and that is welfare. And we cut back on this—the WIC program—in order to get Government in the black, they say, on the one hand, and they get out here for the past 24 hours just beating down the Capitol walls to get another $40 billion for the crowd who is destroying us.

Here we struggled in the Finance Committee all last year, under the able leadership of the Senator from Louisiana, and all this year. The Ways and Means Committee has finally come out to try to find $12 billion for business, and business has found $40 billion overnight. The land is awash with dollars, for all earning $50,000 and above. There is no question about that. I have never seen such a thing in my life. The oil interests are gobbling up each other.

We cannot find revenue for a homeowner, who has a little savings. All of a sudden the banks zero in, send us these letters, and we are allocating credit, we are destroying private enterprise. We will not have anything for small business.

Of course, that is not accurate. It is pure nonsense. What is hurting small business is this oil activity where they had so much incentive that the biggest of all the chemical companies—and I have got four of them in my backyard of South Carolina—Du Pont said, "The heck with chemicals. Let us get in here and acquire this oil company."

No additional machines are needed, no business expansion undertaken, we do not have a round table on that one about productivity. The Chamber of Commerce, where art thou with the new jobs? Not a single new job, not a single new machine. Where has all that Reagan crowd gone anyway? They are busy buying each other up, merging, acquiring.

Gulf has a commitment for $5 billion; and this one has got one for $5 billion; everybody has $5 billion. Pennzoil has $2.5 billion.

We Senators sit around here praising each other, "the distinguished Senator who works so hard," peanuts. They have not gotten anywhere. The Finance Committee comes forth with a $12 billion benefit package. That oil crowd found an additional $40 billion. I had better watch my comments on that one because I know that the Senator from Louisiana represents oil, like I represent textiles. That is the interest of the State of Louisiana and that is the interest of the State of South Carolina, so we have got to represent our States' interests.

But when I see them come now with all of this wealth, it just shocks me. The Senator from New Jersey saw it, and he put an amendment out here to target the tax cuts. When you pay that interest rate, the distinguished Senator from Iowa, if you are over that $50,000 and you are up into that 50-percent bracket that 20-percent interest rate is only 10 percent interest to you. That keeps it snowballing.

The oil companies are gobbling each other up, keeping up the high interest rates. The municipalities are waiting. The savings and loan for short-term financing, they want the interest rates to go down; all hanging on, holding on, every small business in America. So for that rich crowd that is only 10 percent, and everybody knows that.

They do not need any more incentive. They come on around here and give us that Gildersleeve, George Gildersleeve, who says that is the crowd we ought to take care of because they will save and invest. Instead of buying three Rolls Royces and four country club or yacht club memberships, they will put it into the productive economy.

Mr. BRADLEY. Mr. President, will the Senator yield for a question?

Mr. HOLLINGS. Yes.

Mr. BRADLEY. The exact size of the amendment that is proposed by the distinguished Senator from Kansas has fluctuated in the debate here on the floor, and I am not certain whether it is $5, $10, $40, or $50 billion, but whatever it is, it is a sizable sum of money.

Mr. HOLLINGS. A total of $333 billion over the next 3 years. Our amendment is about $173 billion, so it is $160 billion less than the Finance Committee proposal.

Mr. BRADLEY. I am referring to the amendment.

Mr. HOLLINGS. On the oil amendment, oh, yes.

Mr. BRADLEY. If we provided this additional money for oil exploration——

Mr. HOLLINGS. Incentives, they need incentives.

Mr. BRADLEY (continuing). That would increase the deficit unless we cut somewhere. Does the Senator think it is likely the Senate is going to cut more deeply than it already has in nondefense programs in the next couple of years?

Mr. HOLLINGS. No; we have been trying to do that. It is a hard message to get over to the American public. When we sit around that table and look at the overall budget, whether we did it under President Ford, whether we did it under President Carter, and now under President Reagan, this inflation has been costing us more than we have been getting from the ratchet effect, and that is hard to get over for those who are running around here with tax index proposals.

You have paid out a 14.5-percent increase for social security last July amounting to $16.5 billion. You paid out 11.2 percent this July, which is another $15.5 billion. You have given out $32 billion. That is $32 billion in indexing. Nobody in his right mind says we ought to cut that.

I and several others have suggested that indexing be done, the wage rather

than the price index whichever rises less. But there are $32 billion that have gone out, and the tax we put in at the beginning of the year got $7 billion or $8 billion, so we have fallen behind.

So what they are trying to do, and it should be understood, when they are talking about future tax cuts, they are listening to that political rhetoric about Government, the 25 years of Democratic profligacy. Just cut it all out, cut it all out. Democrats want social security, Republicans want social security, and we are getting down to the bare bones now. Everybody can pick out a particular program. Some people do not like legal services, you and I happen to like it.

They are minimal, they are minuscule. Get to the veterans and the real programs in this Government, they are not going to be cut, and so they march down the road talking about unspecified cuts. These cuts are not going to be easy at all.

Mr. BRADLEY. The Senator would agree it has not been easy to cut the nondefense portion?

Mr. HOLLINGS. Right.

Mr. BRADLEY. And it will be increasingly more difficult, so the choice with the amendment on oil is whether we give it to oil, and if we did have to do one of two things if you agree we are not going to cut nondefense spending more. We will either have a bigger deficit——

Mr. HOLLINGS. Right.

Mr. BRADLEY (continuing). Or there is only one other area that will be cut; is that right?

Mr. HOLLINGS. Exactly.

Mr. BRADLEY. What does the Senator from South Carolina think about cutting back on defense spending?

Mr. HOLLINGS. Well, I know where they have not even taken care of—they are all up in the miasma of whether we should have the MX or one bomber or two bombers, and how many ships, and whether the carriers ought to be big or small. We have 30 years of neglect. They are in mud. Do you know where they are going to put the Pershing missiles? In a mud pile.

After the war we had Servan-Schreiber running around this Senate saying, "Get all the Americans out," the French were saying "Get out." You could not have a man walking around in a uniform. They would bomb him, so you had to take all your soldiers out of uniform.

Then we had the Mansfield amendment to withdraw them. You could not get money for housing, so right on down the line after 30 years, it is a disgrace.

Go talk to the commander in Heidelberg. What will he say if the Russians started over the line tomorrow? Do you know what the first request Congress would have? Housing, housing, and it is a disgrace, and it is not even in the bill.

We had not gotten around to certain real defense needs to take care of our troops. So there is no question in my mind, let us get on to that defense budget. We can make some economies there. We will have to. We cannot afford two bombers, we just cannot afford it. I would like to have three, you know me, but you cannot afford but one.

Mr. BRADLEY. If I understand the distinguished Senator, if you had to choose between providing greater incentives for oil or greater deficits or cutting the defense budget, if you had to choose which one of those you would not do, you would not provide these incentives for the oil industry; is that correct?

Mr. HOLLINGS. There is no question about it. It is even outrageous to put it in the tax program because you would not take a fat hog and give him more slop.

[Laughter.]

Mr. HOLLINGS. Look at Herblock's cartoon. Gee whiz, anybody who has any money is in oil. Du Pont in chemicals is trying to jump in oil; all smart money is trying to get into it, everybody. Seagram with liquor is trying to jump into oil. Everybody is trying to get into oil.

They do not need any further incentives. There is no equity in oil now—a hell of a lot of money but no equity.

Mr. BRADLEY. So the Senator's amendment recognizes you do not want to give more to oil but you want to have more for defense, and you do not want to have a bigger deficit.

Mr. HOLLINGS. That is exactly right.

I am willing—we have not gotten down to the economies in defense, and we have been trying to work with Secretary Weinberger. I would withhold some of the defense increases this year in order to get us into the black. I think we can get more in the outyears if we reduce inflation, if we get the Government in the black, because it not only helps us not only with respect to this particular program but with all Government programs.

I see many here. The Senator from Virginia has been a leader in trying to bolster our national defense and security and our distinguished Senator and friend from Ohio spent his life in national defense. There is no question in my mind that we have to improve our defense. But I believe that those who believe in national defense feel so keenly about trying to get this Government in the black, rather than have, say, a $25 billion increase in the defense budget this year as a result of inflation and other real program increases, we could withhold $5 billion or $10 billion of that to give a signal that we are not going to continue to have more of the same deficits.

That is what this bill is about. That is why we have an amendment. You are saying in this Finance Committee bill, "More of the same," a $60 billion deficit in 1982, a $60 billion deficit in 1983, and $60 billion or more in 1984. That is the message you are giving to America.

Mr. BRADLEY. Will the Senator yield for one more question?

Mr. HOLLINGS. Yes.

Mr. BRADLEY. As I understand it, the greatest deficit that has ever been sustained in 1 year by the U.S. Government was in 1975, when it was $66 billion. Is that correct?

Mr. HOLLINGS. That is right. Unless we outdistance it this year.

Mr. BRADLEY. Does the Senator not think that with this economic program, high interest rates, across-the-board tax cuts, if he were a betting man would he wager that we might, in the next 3 years, have a bigger deficit than in 1975?

Mr. HOLLINGS. Definitely, I believe it. I listened to those economists that watch the budget very closely, and I talked about the meeting of those economists. I am going to quote some of them who have testified in their testimony before our Budget Committee. It really concerns them now that we will have a higher deficit than we have ever had; namely, the $66 billion in 1975 by 1984 under this particular approach.

Mr. BRADLEY. This administration will have the record?

Mr. HOLLINGS. They are going to really break the record. The truth is, we go down with them. We are in Government and we are responsible. Now is the time to look and see if there is, as President Reagan says, an alternative.

Look at last evening. I think it is prophetic that it would appear. I did not invent it. I did not invent the expression "voodoo economics." The Republicans did that; our distinguished Vice President. This is in last night's Washington Star. I know my conservative friends like this paper:

> This was the conventional wisdom among Democrats and, for that matter, many Republicans. The government doesn't reduce taxes in times of high inflation and rising deficits. It is just the opposite of what is needed.
>
> So the most the Democrats would endorse would be cuts "targeted" to businesses to stimulate productivity and lower inflation. General tax reduction would be, as someone said before a vice presidential nomination changed his mind, "voodoo economics."
>
> That idea was, of course, a clean break with the dogma of the Republican Party—

Now, this is the President's proposal, the President's program:

> That idea was, of course, a clean break with the dogma of the Republican Party that held deficits were almost as pernicious as godless communism. And some leading Republican experts, including Rep. Barber B. Conable Jr., their ranking man on Ways and Means, did have serious doubts about whether it would work.

So we have credible, responsible, serious-minded Members on both sides of the aisle worried. And with all of this concern, it seems like we would try to cut back the tax cut or at least phase it in more slowly so that it has some chance of working to increase the productivity. You cannot have all the productivity without demand, so you can come in in 2 years with a tax cut come forth with a demand tax cut and balance the budget.

It is not easy. I readily admit that. But the way we are now approaching it in the Finance Committee version that is before us, unless we take this as a substitute, is more of the same—the fiscal policy of deficit spending. Do not come running around here jumping on Paul Volcker and the Federal Reserve. Like Pogo, you have met the enemy and it is us.

I yield to the distinguished Senator from Connecticut.

Mr. DODD. I thank my distinguished colleague from South Carolina for yielding.

Mr. President, I want to compliment the Senator and thank him for introducing this amendment, along with Senator BRADLEY, of New Jersey. I think that this amendment may be the single most

important amendment to be offered during this entire debate on tax policy.

I regret that it is not getting as much attention as it deserves, because I think the Senator from South Carolina has identified with his amendment the best hope we have for dealing with the No. 1 economic issue we face. Whether you live in Connecticut or South Carolina, Louisiana, Kansas, or Ohio, our constituents across this country wisely are telling us over and over again in every forum available that inflation—inflation—is the No. 1 problem we have to deal with. And this amendment, more than any other single amendment that has been offered, focuses its attention most directly on that problem.

I would like to also point out—and the distinguished Senator from South Carolina may have already made this point before I entered the Chamber—that for the last several years, while I was serving in the other body, I have heard the comparison between the so-called Kemp-Roth proposal—which is basically what we are getting with what has come out of the Finance Committee and what is being supported by the administration—and the so-called Kennedy-type tax cuts of two decades ago.

Well, nothing could be further from the truth. In fact, it was the tax cut—as described by both Mr. KEMP and Senator ROTH—that comes least close to dealing with the matter of inflation. In fact, it is the Hollings-Bradley amendment that most appropriately should be identified with the Kennedy-type tax cuts of the early 1960's, for the simple reason that it focuses the attention on the need to increase productivity and in these years recognizes that high inflation and high-interest rates come hand in hand, and unless we do lower our budget deficits, we are not going to have a significant impact on those interest rates and ultimately, on inflation.

The distinguished Senator from New Jersey and the distinguished Senator from South Carolina have described well the importance of this amendment. But I would like to add, if I could Mr. President, just a few words as to why I have joined as cosponsor of this amendment and why I hope that our colleagues in this body will support it when it comes up for a vote.

I suspect, quite honestly, that if we could have a secret ballot—and I am not an advocate of secret ballots—if on the Hollings-Bradley amendment we would pass this amendment overwhelmingly, because I believe in my heart and mind that the overwhelming majority of my colleagues in this Chamber recognize that this amendment and this approach is the sound, correct, and proper approach for dealing with our economic woes.

There are basically four reasons why I was attracted to this approach and this amendment. First of all, this amendment does not lock us into a multi-year policy that I believe will exacerabate the rates of inflation.

Second, it is clearly going to have a more profound impact immediately on our budget deficits. The Senator from South Carolina can correct me, but I believe the deficit would be reduced by around $30 billion or $35 billion and that in the near future we would have the real opportunity to balance the budget.

Third, there is a far more equitable distribution. And the Senator from South Carolina could not have been more correct when talking about the contortions we go through to provide those that already have so much with even more, and within the same time frame we reduce minimum benefits to social security recipients, turn our backs on even trying to provide assistance for middle-income families trying to educate their children, transportation, economic development and housing. Seventeen percent, Mr. President, of all the budget cuts proposed and adopted, 17 percent of those cuts come in the area of housing alone, a depressed industry in this country.

Fourth, Mr. President, was the reason identified just briefly by the distinguished Senator from South Carolina. That is that it is better structured and allows for better timing to accommodate the increased demand that this proposal will create.

I have been told that an average family of four in this country will receive a $400 tax break. That is about $10 a week, or a little less.

I am not an economist. I am not a financial expert. But if anyone honestly believes the average citizen of this country is going to take less than $10 a week in these times of high inflation and invest that in some securities or some blue chip stock, they are living in a never-never land, like Alice in Wonderland.

Those are the four basic reasons why I believe this amendment makes sense. Certainly all of us, whether we are Democrats or Republicans, recognize that significant change in our tax policy, including tax reductions in several important areas, is an absolutely necessary component of any strategy geared toward a stable, productive, and full employment economy. Over the last decade and a half we have witnessed the adverse impact, Mr. President, of high inflation, high interest rates, and high unemployment in our domestic, economic, and social fabric. American families, workers, and consumers have watched their standard of living drop as their paychecks lost value. Business management finds the cost of financing and operations continually rising at a staggering rate. Business is forced, obviously, to pass those costs on to consumers in the overwhelming majority of cases.

Competition is significantly affected and reduced because small businesses, which are more heavily dependent on debt financing, find it harder and harder to acquire capital to compete with larger, more established and financially secure industries. Investors' confidence in the future and the marketability of securities, particularly long-term securities, is continually undermined by unchecked inflation and high interest rates. As the distinguished Senator from New Jersey has pointed out, the international economy, which must require stable money markets, is undermined when other nations are forced to hike their interest rates in order to maintain the value and stability of their own currencies.

In the absence of rapid action our society will continue to face these problems, and economic recovery will remain a future dim hope rather than even a slight realistic possibility. Yet many of our most promising industries are those which are most severely affected. Small business, spurred by a continual push to gain the advantage in a relatively free and competitive marketplace, constitutes our primary source of innovation and new jobs. Yet small business suffers most heavily from interest rates hovering around 20 percent.

The construction industry, another area mentioned by both my colleagues, is indispensable to the supply of adequate housing for each American family. Yet, again, high interest rates have been a major factor in keeping annual housing starts at roughly half the levels required to meet that need.

In fact, in my own home State of Connecticut in the month of May we had 900 housing starts in the entire State. You have to go back to periods prior to World War II to find figures that low. Of course, the people who work in the construction trades are on the unemployment rolls. Small construction firms are going out of business every single day. Again, it is related to this same problem. High technology venture industries are turning out to be a major potential source of strength in international markets. Yet they cannot live up to their full potential under present economic conditions.

These, Mr. President, are just a few of the examples of how we are neglecting our most promising options for economic growth and competitiveness by failing to reduce inflation and interest rates substantially. Yet we cannot realistically expect interest rates to fall significantly if we insist on adopting a tax policy which will end up costing the Treasury almost $150 billion in 1984 and if the monetary policies advocated by the administration are adhered to. We cannot expect so-called supply side policies to reduce inflation if we insist on a massive, immediate infusion of new demand as part of the first stage of our economic recovery. We cannot hope to be able to respond to the rapid, unexpected changes in the economy, whether prompted by OPEC or the weather—and if we are being honest, those are the only two reasons why we are enjoying our present temporary respite—if we lock ourselves into a tax reduction of this magnitude over the next several years.

Not only does this bill call for rate reductions of 25 percent over 3 years, but now it indexes the tax tables thereafter. With all the talk about supply side economics and balanced budgets coming out of this administration, it has proposed a tax package which will have exactly the opposite effect, massive demand stimulus and unprecedented budget deficits. I do not believe the American people deserve or want either. As much as Americans like tax cuts, they are intelligent enough to realize that fighting inflation and restoring our productive capacity are far more important, and it is with this thought in mind, Mr. President, that this amendment has been offered.

Mr. President, it is not easy for anyone to stand up at a time when inflation is hurting so many people and talk about not providing some tax cuts for individuals over the next couple of years. But I think we have to be honest with our constituents. You cannot be all things to all people. We have to make some hard choices.

What is unique about this time, I believe, is that both the politics and the substance coincide. The politics tell us that people want us to reduce the rate of inflation, and they want that far more than whatever small tax break they may get by this particular bill. It seems to me when you have the substance and the politics on the same track, you ought to take advantage of it. Here we have an opportunity now to provide some real relief, to lift the burden of inflation off the shoulders of people who are being decimated by it, and also do what is in the long-term economic interest of this country.

I again commend the distinguished Senator from South Carolina. He is right so often on so many issues.

He may not think so initially. Others may think he is not right initially. But time has proven that he has some vision. He was talking about this approach, and I would like the RECORD to reflect it, weeks ago. I will be candid enough to say to him and others I was skeptical about it. I did not think it made that much sense. I certainly thought that the overwhelming majority of people in this country would want that tax cut and a few extra dollars to come into their pockets.

But I have learned from talking to people in Connecticut and listening to other people around the country, that their major concern is the rate of inflation. They recognize that unless we have better control over our Federal budget, unless we are able to reduce interest rates, this problem is going to not only continue but get worse and be exacerbated, I feel, by what is being proposed in this bill.

I would hope, Mr. President, that my colleagues will listen carefully to the words of the Senator from South Carolina and others who will speak on behalf of this very sound and necessary amendment to this bill.

Mr. HOLLINGS. I thank the Senator from Connecticut. He has been very generous to me in his support.

Many people perhaps felt, just as the Senator from Connecticut, that this was some of a half-baked idea, not presented in any sincere form, but just trying to go to the extreme to draw the lines of division with respect to the President's program.

The contrary is true. I really believe that President Reagan has had success so far, but I believe his present course is a disaster.

I do appreciate the comments of the Senator from Connecticut.

Mr. GLENN. Mr. President, I rise to support the amendment. These ideas are not recently arrived at. In March of this year I did a short article for the New York Times called "Alternate Tax Proposals." Embodied in the ideas expressed in that article are some of the same things that Senator HOLLINGS has very properly taken the initiative on in proposing an alternative to the direction in which we are headed.

I would like to comment today on this proposal by Senator HOLLINGS with a few introductory remarks leading up to a discussion of the amendment itself.

First, Mr. President, I do commend the Reagan administration for focusing national attention on the need to attack inflation and unemployment and do it through expanded business investment and research and innovation. Far too many American jobs have already been lost to well-financed foreign competition. Unless we dramatically improve our own competitiveness, we are certain to lose hundreds of thousands more.

That is why I have become increasingly concerned about the President's tax cut proposals. Theoretical explanations notwithstanding, the only thing we know for certain about the proposed cuts is that they are overwhelmingly weighted more toward demand than supply. Whatever happened to supply side economics?

My intention, Mr. President, is not to fuel the increasingly sterile debate over what label should be attached to the President's proposals. The truly important question is whether they will do the job for which they are intended. I frankly doubt that they will. Moreover, I submit that there is a less circuitous, less risky, and more economical way of achieving the results we all desire.

The problem is clear and beyond dispute. This Nation today faces an acute shortage of investment capital; a shortage that may well be the greatest single inhibitor of industrial productivity, modernization, and new job creation. The best illustration of these immense capital requirements is found in our most productive industry, agriculture. Some 600,000 commercial farmers today produce three to four times as much as the 6 million commercial farmers of 1940. The capital investment per commercial farmer in 1940 was less than $35,000 in 1981 dollars. Today, it is close to $250,000 and this does not include the capital invested in education or in the extension, market, and credit services currently available.

For the mature industries that comprise the heart of America's industrial economy, a massive capital infusion also is mandatory. In order to modernize and regain its competitiveness in world markets, the American steel industry needs $30 billion in investment over the next 5 years; the auto industry requires an eye-popping $80 billion over a similar 5-year period. Similar needs are mirrored in industry after industry. In fact, the prestigious conference board recently reported that the creation of an average U.S. industrial job now requires an investment of between $55,000 and $60,000.

In our high technology, knowledge-producing industries, even greater investment will soon be required simply to maintain existing employment levels, let alone increase the number of new jobs available. In information processing, for example, the office secretary today works with about $3,000 in equipment. The information specialist in the office of the future will require a capital investment of close to $25,000.

Although the cost of these investments will be high, so will be the productivity gains we reap from them. But whatever the investments cost, we really have no choice but to make them. Our labor supply will increasingly consist of people who are qualified for knowledge work—and will be productive only if supported by the appropriate capital investment. Moreover, international competition is certain to increase in the future, challenging us not only in the areas of steel and autos, but also in the advanced industries of electronics and chemicals.

In fact, we are already seeing that competition in the international market.

In short, we cannot hope to be productive, competitive, or to have full employment without a tax program that truly addresses the supply side needs of the American economy.

But if our problems reside largely on the supply side, why has the administration proposed an economic recovery program wherein the annual Federal budget deficit will balloon to an average of $60 billion in 1982, $60 billion in 1983, and $60 billion in 1984, and in which only 20 percent of the total tax cut is earmarked for direct supply side support?

Only 20 percent earmarked for what is supposed to be the major purpose of the tax cut.

Although conceding that its proposals favor personal over business tax cuts by a 4-to-1 ratio, the White House argues that since the cuts, unlike those of previous administrations, are skewed in favor of taxpayers in the upper income brackets, more money will go into investment than into consumption. Indeed, the administration spokesman—I believe David Stockman—testifying before Congress has said that he assumes 50 to 70 percent of the individual tax cuts will wind up being invested.

And if they do not wind up in that order of 50 to 70 percent, then they add to inflation instead of curing it. That is a mighty big assumption, 50 to 70 percent of those tax cuts winding up being invested, particularly since only 20 to 30 percent of all previous personal tax cuts were transformed into investment dollars. But history aside, is it not likely that many of the upper income people depended upon to invest their tax savings will instead divert potential investment dollars into gold, antiques or other speculative ventures?

Those in the upper-income bracket may be tempted to take a long-delayed vacation or buy a new carpet or whatever. If so, the efficacy of the President's package is correspondingly diminished. And for those in middle-income brackets, increased social security taxes will all but neutralize the benefit of decreased marginal income tax rates.

So what happens if we fall short of the administration's 50 to 70 percent investment targets? What if, as many economists predict, a 10-percent tax cut

for individuals results in a $60 billion increase in aggregate demand—a sum larger than the proposed budget cuts and business tax reductions combined? Quite simply, our economy could easily be in far worse shape than it is today. In the President's words, "too many dollars chasing too few goods" would ignite an explosive new round of inflation. Insufficient capital investment would leave our industries uncompetitive, create fewer new jobs, and provide lower tax revenues with which to balance the Federal budget.

This is not just me talking, Mr. President. This scenario is not merely the skeptical view of the senior Democratic Senator from Ohio. Indeed, a broad assortment of economic experts—including the Joint Economic Committee, the Congressional Budget Office, Charles Schultze, Henry Kaufman, Walter Heller, and even Herbert Stein—have cast doubts on both the structure and the assumptions of the administration's economic recovery program. Let us examine some of the reasons for their misgivings.

Assuming all the monetary, tax and budget initiatives proposed by President Reagan, the Joint Economic Committee projects "a weak recovery from the slump in 1980 and increasingly higher Federal deficits"—exceeding $100 billion in 1984. According to the Congressional Budget Office, interest spending costs on the Federal debt will average nearly $100 billion for each of the next 3 years with budget deficits averaging $60 billion a year.

Just compare that. It was only in the Lyndon Johnson days that we were having an entire Federal budget of $100 billion, and now we are talking about that as the interest on the national debt.

A day or so ago, we voted to index all the income taxes for this country. We have not learned from all our entitlement programs and all the indexing we did there, which got us into this problem. Now, instead of undoing some of these entitlements and rethinking indexing, we are going to make it worse. We are going to make the whole project expanded instead of contracted.

Whereas the administration projects investment growing from 10.5 percent to 14.5 percent of GNP while inflation drops from 11 percent to 5 percent a year and interest rates decline from 14 percent to 6 percent, less partisan analysts remain unconvinced. While the administration projects an inflation rate of 6.2 percent in 1982, Chase Econometrics, Wharton and Data Resources forecast inflation rates for 1982 above 8 percent. These pessimistic inflation forecasts, which lie at the heart of our financial markets' refusal to mark interest rates down, reflect the conviction of many private economists that Federal deficits will be substantially higher than the administration now predicts. The widespread expectation that persistent deficits will sooner or later force the Federal Reserve to relax its monetary restraint in order to finance the public debt or to avoid driving rates so high as to hurt domestic industries, economic growth and other western economies, has led the financial markets to cast a clear and resounding vote of "no confidence" in the Reagan tax plan.

Lest I be accused of being partisan in my comments, I point out that, similarly, Herbert Stein, chairman of the Council of Economic Advisers under Presidents Ford and Nixon—and certainly no huge admirer of Democratic proposals in the past—describes the Reagan administration's economic projection as "inconsistent with past experience."

In his view, the most likely result if steady, significant reductions of money growth and the budget and tax cuts are carried out, is that there would not be a strong boom in investments; that the increase of production would be less than projected; that unemployment would rise and remain high; and that the budget would not come into balance.

In Mr. Stein's words, "This is not the worst of possible outcomes. In fact, it may be close to the best available."

This latter observation should be stressed—for none of the already dismal projections I have mentioned include factors that could make the next 4 years even worse than historical experience would suggest. Such unexpected events as poor weather, political unrest in areas containing critical energy and materials supplies, or any number of other adverse events could further jeopardize the administration's fragile economic projections.

In view of these dangerous possibilities, why must we gamble that personal cuts will eventually "spill over" into investment? Why attempt to stimulate private saving through deep tax cuts for individuals when any such savings will be more than offset by increased Federal deficits? Rather than risking all on a "hope" that there will be enough spillover from personal tax cuts to provide desperately needed capital, I believe that we should provide a more modest tax cut for individuals and target what is truly required immediately to the supply side. Rather than frighten the financial markets and our allies with the prospect of big deficits and high interest rates, we should phase in the individual cuts while quickly and directly providing for our investment needs.

Mr. President, we need a tax cut that will stimulate investment and savings without fueling inflation and deficit spending. We need a tax cut that addresses the problems of big Federal deficits, high interest rates and inflation. But in my opinion—and apparently in the opinion of the Wall Street money men—the Reagan administration's proposal does not address these problems.

Fortunately, under Senator HOLLINGS' able leadership, there is a Democratic alternative that addresses our economy's immediate investment needs in a way that: First, diminishes the inflationary and deficit spending impact of the bill and second, provides for individual rate cuts that are, in sharp contrast to the rhetoric of the administration's proposal, truly "across-the-board" in effect.

Senator HOLLINGS' proposal accomplishes this by endorsing immediate implementation of the Senate Finance Committee's provisions on depreciation, capital gains, overseas earnings, the marriage tax penalty and the all-savers plan. Enactment of these provisions will provide substantial incentives for plant modernization and job creation—incentives that are much needed and long overdue.

While increasing supply side incentives for investment and savings, Senator HOLLINGS' proposal reduces deficit spending—and will thereby halt the upward spiral of interest rates. It does this by postponing implementation of across-the-board individual rate cuts until January 1983 when a 10-percent cut in individual income tax rates would become effective.

In sharp contrast to the administration's proposal, Senator HOLLINGS' plan provides an equitable offset to bracket creep and rising social security taxes for the majority of all Americans. The Reagan plan simply does not deliver tax cuts to those who will be facing tax increases. In the next 5 years, the income on which social security taxes are calculated will rise from approximately $30,000 to $50,000. Hence, more people in the $10,000 to $50,000 range will be paying more and more in social security taxes. Because the maximum tax rate will be held to 50 percent, only those now paying below that rate will be affected by bracket creep. Thus, while the administration's proposal would protect those above the 50-percent rate from both rising social security taxes and bracket creep, those below that lofty income level—which is 94 percent of the American people—would see their tax cuts sacrificed to rising social security taxes and bracket creep.

In short, while the Reagan tax cut is "across-the-board" in theory, it favors the rich in practice, in the hope that 50 percent to 70 percent of the money going to those people will come back in investment. If not—I repeat, by Mr. Stockman's own statements—if the money does not come back in investments on the order of 50 percent to 70 percent, then it adds to inflation instead of helping to stop inflation.

While the administration claims to oppose any redistributive tax cut, it advances a tax proposal that will do just that. But there is a catch. By a kind of reverse Robin Hood logic, the Republicans would shift the burden of taxes from those who can most afford them to those who can least afford them—the poor and the middle classes.

Even worse, this proposed shift in tax burdens comes at a time when the post-depression movement toward greater equality in income distribution has been arrested. The Reagan economic package will accelerate the reversal of this historical trend and may, through slow economic growth and high unemployment, heighten the tensions that often lead to social unrest.

Senator HOLLINGS' proposal addresses these inequities. It targets the reduction in individual tax rates to middle income taxpayers ($15,000–$50,000) and increases the zero bracket amount by $200 for single returns and by $400 for joint returns. In addition, it provides for an

increase in the earned income tax credit to 11 percent, effective January 1982. This provision is noteworthy because it highlights a curious contradiction in the administration's fiscal program. Whereas the President insists that marginal rate cuts for middle and upper bracket taxpayers are an incentive for greater market-oriented work effort, his tax plan fails to provide similar incentives for the working poor. In fact, for these Americans, incentives would actually be reduced. Take the earned income credit, for example. A year from now under the administration's tax plan, the working poor will begin losing their earned income credits to bracket creep. But that is not all. On top of losing the credit, they will be asked to start paying income taxes to the Federal Treasury. Far from being better off than they are today, the working poor will find themselves in an even more hopeless and frustrated condition. Before we accede to a rising tide that will assuredly sink some boats, let us understand where that kind of "new beginning" can lead us. When huge numbers of our countrymen are methodically denied an opportunity to share in the American dream, then you can bet your bottom dollar that none of us will rest very well.

Mr. President, the choices before us are very clear: Will we choose a real, honest demand side tax cut which ignores the needs of those that suffer most from inflation and rising taxes; which will increase deficits, interest rates and inflation; and which will delay, rather than hasten, investment and productivity gains? Or will we choose a true supply side tax cut that provides equitable relief from inflation and rising taxes for all taxpayers; that reverses growing deficits, soaring inflation and rising interest rates; and that provides direct and immediate incentives for investment and savings.

The Hollings amendment addresses our Nation's economic recovery needs in a fiscally responsible and even-handed manner. I urge my colleagues to vote in support of this proposal.

Mr. President, I also add that in today's Star there is an article by my colleague from Ohio over in the House of Representatives, Congressman DON PEASE, and it is entitled "Deficits Sure To Flow From 3-Year Tax Cut."

After some opening remarks about the situation in which we are in in that article, Congressman PEASE writes that, "If those two factors—assumed spending cuts and optimistic economic assumptions—are removed, what then?

And he says that he asked three independent sources to estimate the likely fiscal 1984 budget deficit under those circumstances. The answers he received were remarkably similar.

First, CBO, the Congressional Budget Office, put the fiscal 1984 budget deficit at $80 billion, by the latest estimate.

Then he talked to economist Joseph Pechman, of the Brookings Institution, and he put the fiscal 1984 deficit at $79 billion, just $1 billion off of the estimate of the CBO.

And Rudolph Penner, economist with the American Enterprise Institute and a general supporter of the Reagan economic recovery plan, estimates the fiscal 1984 budget deficit will be $87 billion.

So from one economist to another, they are coming out very close to this $80 billion figure, and this makes them very tough choices for Congress, for both Houses of Congress, as Congressman PEASE points out.

He also points out that the budget figures that would give us a balanced deficit as identified by the administration has yet to be spelled out. They have not even been identified yet for the future.

So he and 35 other congressional colleagues have signed a letter to President Reagan asking him to spell out where those cuts for 1983 and 1984 would be made so we will know what we are committing ourselves to, because the Reagan budget strategy assumes further spending cuts not yet specified of $20 to $30 billion in fiscal 1983. Will Congress make those spending cuts in the summer of 1982, in an election year, plus another $28 billion in spending cuts in the summer of 1983?

Rudolph Penner, the one I quoted a moment ago, of the American Enterprise Institute, does not think so. He assumes that any spending cuts will be offset by a few new programs and we will probably reverse some of the cuts that we are making right now and the next result is that no progress is made on balance toward finding the $28 billion in unspecified outlay cuts listed for fiscal year 1984 in the first concurrent budget resolution.

The 3-year tax cut, Congressman PEASE asked? The issue is not tax relief for Americans. To repeat, the issue is the Federal budget deficit and spending cuts.

Large deficits—an expansionary fiscal policy—must inevitably increase pressure for a very tight monetary policy with its certain concomitance: high interest rates, a depressed bond market, bulky GNP growth rates, and business bankruptcies by the score.

Mr. President, I think this article that just came to my attention a few moments ago certainly backs up the general thrust of my earlier remarks, and I ask unanimous consent to have printed in the RECORD this article in the Star of this afternoon by Congressman DON PEASE.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Star, July 22, 1981]

DEFICITS SURE TO FLOW FROM 3-YEAR TAX CUT

(By DON J. PEASE)

While any tax cut debate obviously involves the kind and amount of tax reductions, the Great Tax Debate of 1981 is mainly about federal budget deficits and spending cuts.

To illustrate, the First Concurrent Budget Resolution (adopted by Congress on May 20) envisions an FY 1982 tax cut of $54 billion, spending cuts of $35 billion and a deficit of $38 billion.

Clearly, using the Reagan administration's economic assumptions, no tax cut would mean no deficit.

A look at budget projections for FY 1984 underscores the point even more vividly:

The Reagan-backed First Concurrent Budget Resolution assumes an FY 1984 tax cut of $48 billion, additional, as-yet-unspecified spending cuts of $28 billion, and a small surplus of $1 billion.

But the 1984 "surplus" not only assumes that Congress will indeed make the $28 billion in unspecified cuts. It also requires acceptance of the extremely optimistic economic assumptions of the Reagan administration regarding inflation, interest rates, unemployment and GNP growth.

SIMILAR CONCLUSIONS

If those two factors—assumed spending cuts and optimistic economic assumptions—are removed, what then? I asked three independent sources to estimate the likely FY 1984 budget deficit under those circumstances. The answers are remarkably similar.

The Congressional Budget Office put the FY 1984 budget deficit at $80 billion.

Economist Joseph Pechman of the Brookings Institution put the FY 1984 deficit at $79 billion.

Rudolph Penner, economist with the American Enterprise Institute and a general supporter of the Reagan economic recovery plan, estimates the FY 1984 budget deficit at $87 billion.

From economist to economist, and from month to month, the projections for FY 1984 will vary slightly, but not much. If Congress adopts the Reagan economic recovery package this summer, it will face two years from now an FY 1984 budget which is also $80 billion in the red.

The tough choice for Congress in 1983 will be to make massive additional cuts on federal spending or to endure a huge budget deficit, the largest in U.S. history. The likely result: large, painful but insufficient cuts coupled with a large but not record-breaking deficit. Is Reagan budget strategist David Stockman aware of this probable scenario? I suspect so. The object is to force the Hobson's choice upon Congress as a way of getting otherwise unacceptable budget cuts adopted in 1983. How else, with Reagan off his peak of popularity, will the administration induce Congress to cut programs, like Social Security and veterans benefits?

Thirty-five congressional colleagues have joined me in signing a letter to President Reagan asking that the planned cuts for FY 1983 and FY 1984 be identified so that, at the very least, congressmen will know what they are committing themselves to if they vote for a three-year tax package.

Congress has struggled hard this year to come up with $37 billion in spending cuts. The Reagan budget strategy assumes further spending cuts (not yet specified) of $20 to $30 billion in FY 1983. Will Congress make those spending cuts in the summer of 1982, an election year, plus another $28 billion in spending cuts in the summer of 1983? Rudolph Penner doesn't think so. He assumes that any spending cuts will be offset by a few new programs and by cut reversals, and "the net result is that no progress is made on balance toward finding the $28 billion in unspecified outlay cuts listed for FY 1984 in the (first concurrent budget) resolution."

BUILT-IN DEFICIT

If Penner is right, and I believe he is, then the $48 billion tax cut which Reagan has scheduled for FY 1984 will contribute the bulk of a budget deficit that tops $80 billion.

The three-year tax cut? The issue is not tax relief for Americans. To repeat, the issue is the federal budget deficits and spending cuts.

Large deficits—an expansionary fiscal policy—must inevitably increase pressure for a very tight monetary policy with its certain concomitants: high interest rates, a depressed bond market, balky GNP growth rates, and business bankruptcies by the score.

Considering his great prowess in lobbying Congress, President Reagan will probably get his three-year tax reduction package in late July—unless responsible business and financial leaders speak out to help stave off disaster.

Mr. GLENN. Mr. President, I say once again I urge my colleagues to support Senator HOLLINGS.

I think we do have a golden opportunity here to pass this alternative that will target money where it is most needed. We do not have the kind of money that we need for capital investment in this country, the $80 billion over the next 5 years for autos, $30 billion for steel, the major item that was brought up by the White House Conference on Small Business last year, and I will add small business employs 55 percent of the people in this country. Small business lists adequate capital as its number one need if they are to provide the new jobs, the employment that they can provide for this country, and yet we are going a different route. The administration proposes only 20 percent of the tax cut money going directly to provide that capital. We are going 80 percent on the personal side hoping against hope that this will come back on the order of 50 to 70 percent and be reinvested. If it does not, we have added to inflation instead of curing it.

I think the Hollings proposal on this, which I support fully, gives us an alternate way out of this to have a less tax cut, better chance of a balanced budget, and target this money over to the capital market of this country where it is needed for small business and big business if we are to get this economy under control.

I yield the floor.

The PRESIDING OFFICER (Mr. ANDREWS). The Senator from South Carolina.

Mr. HOLLINGS. Mr. President, I will yield in just a second to the distinguished chairman of the Finance Committee.

But in thanking the Senator from Ohio, I think the record should show that a Senator like him within the party has been seriously concerned with this particular economic program and he has met the challenge given by our distinguished President. Back on March 24 he presented an article in the New York Times entitled "Alternate Tax Proposals," outlining just exactly what he has touched upon here, about the need for the expansion of our technology, the capital investment necessary for the fundamental and basic industries of the economy.

In thanking him for his support and guidance on this particular proposal that we now have in our substitute amendment, I ask unanimous consent that an article by the Senator from Ohio in the New York Times, Tuesday, March 24, be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

ALTERNATE TAX PROPOSALS

(By JOHN GLENN)

WASHINGTON.—Although I share President Reagan's determination to resuscitate our economy, I am increasingly doubtful that his tax proposals will do the job.

America faces an acute shortage of investment capital—a shortage that may well be the greatest single inhibitor of industrial productivity, modernization, and new-job creation. Generating an average industrial job now requires a $55,000 to $60,000 investment. In high-technology industries, even greater investment soon will be required simply to maintain existing employment levels, let alone increase the number of new jobs available. In more-mature industries, a large-scale capital infusion is mandatory. To modernize and regain its competitiveness in world markets, the steel industry needs $30 billion in investments over the next five years; the auto industry requires an eye-popping $80 billion. Small business, which provides 55 percent of all private-sector employment, is faced with imminent capital starvation.

If our problems are largely on the supply side, it is puzzling why the Administration has proposed an economic program in which the Federal budget deficit will remain in excess of $50 billion in fiscal 1981 (thus continuing to crowd an already tight money market) and in which only 20 percent of the total tax cut is earmarked for direct supply-side support. The White House argues that since its cuts, unlike previous Administrations', are skewed in favor of taxpayers in middle- and upper-income brackets, more money will go into investment than consumption. Indeed, Administration spokesmen have said that they assume that 50 to 70 percent of the individual tax cuts will wind up being invested.

That is a mighty big assumption, particularly since only 20 to 30 percent of all previous personal tax cuts were transformed into investment dollars. Moreover, except for the wealthy, increased Social Security taxes will all but neutralize the benefits of decreased marginal tax rates: After the new withholdings are factored into the equation, a family of four earning $25,000 comes out ahead by $23. The same family earning $50,000 will save $91. How many industrial bonds or stock certificates will $91 buy?

What happens if we fall short of the Administration's 50 to 70 percent investment target? What if, as many economists predict, a 10 percent tax cut for individuals results in a $60 billion increase in aggregate demand—a sum larger than the proposed budget cuts and business tax reductions combined? Quite simply, our economy could easily be in far worse shape than it is today. In the President's words "too many dollars chasing too few goods" would ignite an explosive new round of inflation. Insufficient capital investment would leave our industries uncompetitive, create fewer new jobs, and provide lower tax revenues with which to balance the Federal budget.

Why must we gamble that personal cuts will eventually spill over into investment? Why not provide a more modest tax cut for individuals, and target what is truly required directly to the supply side? Assuming that we can formulate adequate safeguards to ensure that businesses use the extra capital for productive, job-promoting investment (rather than for, say, the acquisition of other companies), we might consider the following:

Amending the proposed 10-year, 5-year, 3-year depreciation schedule to 10-5-3-1, adding a one-year write-off for expenses incurred for pollution control.

Providing greater tax incentives for industrial research and development, perhaps even a bottom-line tax credit for certain kinds of research.

Structuring even-faster depreciation schedules for high-technology industries that must be given the opportunity to write off their equipment in less than five years.

Offering investment tax credits, or even refundable tax credits, for industries willing to invest on-site in economically distressed areas. Such inducements might prevent further deterioration and community dislocation in major urban areas.

Giving more immediate effect to the proposed cuts in capital-gains taxes. Such cuts would be particularly helpful to small business.

Reducing the rate at which interest income is taxed. To encourage small savers as well as large, we could even exclude from taxation the first several thousand dollars of such income.

These suggestions are not comprehensive but they do provide a foundation for discussion, and clearly address the problems of capital formation and job creation head-on. Obviously, the ogres of inflation and unemployment cannot be slain through tax cuts alone. Budgetary restraint, regulatory reform, reduced dependence on foreign energy sources, and greater cooperation among industry, labor, and government must all be part of our long-term economic program. But for now, whatever happened to supply-side economics?

Mr. DOLE. Mr. President, I wonder if we could ask for the yeas and nays on the amendment? Have they been ordered? I am willing to have an up or down vote.

I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

Mr. DOLE. Mr. President, I might just inquire of the distinguished Senator from South Carolina how many other Senators will speak on this antipeople amendment?

Mr. HOLLINGS. Antipeople?

I think in responding to the distinguished Senator—I know of a couple of other Senators and myself—it should not take long.

I do not know at what length the distinguished Senator from Delaware and the distinguished Senator from Arkansas wish to be heard.

But how does the distinguished Senator from Kansas call my amendment "antipeople"?

Mr. DOLE. It was not planned. It just sort of came out.

Mr. BUMPERS. If the distinguished Senator from Kansas is talking about antipeople amendments, I heard an interesting story last night. Somebody said what can President Reagan give a man who has everything? He said "More."

Mr. DOLE. That is what this amendment gives. Maybe some will be pleased to hear it.

I have looked the amendment over and it does a lot for big business and not much for the taxpayer. Maybe that will be clarified later on.

Mr. LONG. Mr. President, will the Senator yield? Is it possible to get agreement on a time limitation so that we can reach a conclusion sometime before the day is out?

Mr. HOLLINGS. That is not necessary. I have other things to do this afternoon. Let us move on and see what happens.

Mr. DOLE. Mr. President, I will just take a minute.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. DOLE. I will just take a minute. I know there will be important things said, and I am sorry I will not be able to hear them. I will be off.

[Laughter.]

I do read the RECORD daily, the index.

I would just say very seriously to my distinguished colleague from South Carolina, as I have said before, both the Senator from South Carolina and the Senator from New Mexico have had a very salutary impact on what we have done in the Finance Committee, by their

guidance in the budget process. I think you indicated earlier that there had been some reduction of the cost in the Senate Finance Committee's resolution, and there were some concerns over the remaining cost. There were bipartisan concerns, as you accurately stated, among Republicans and Democrats about whether or not we could go full tilt on the so-called Roth-Kemp proposal. I think I expressed those concerns publicly, and so there were some changes made.

I will at the appropriate time, maybe after the distinguished Senator from Delaware and the distinguished Senator from Arkansas have spoken, just take a minute or two to summarize why I believe the present proposal before the Senate, which is more or less the Reagan proposal, President Reagan's proposal, is superior to this fine product that is before us at this moment.

Mr. BIDEN. Mr. President, I have a fairly lengthy statement.

Mr. President, the elimination of Federal deficit spending should be the single most important element in a program to achieve an economically sound future for this country. The national debt will exceed $1 trillion this year. Yet we are still making little progress toward balancing the budget. If this tax reduction is passed in the form recommended by the administration and the Finance Committee, it is reasonable to expect a Federal deficit in fiscal year 1984 of $60 billion. Remember, 1984 is the year when the budget was to be in balance.

Already we are paying a heavy price for Federal deficits. In order to slow inflation in the face of continued Federal deficits, the Federal Reserve Board has been following a highly restrictive monetary policy.

This policy has forced up interest rates with devastating effects on our economy. The prime rate is up around 20 percent. Our economic activity is stagnating and might turn down sharply if put under greater pressure. Productivity has declined 3 years in a row.

Unemployment has been in the 7-percent range for an intolerable length of time, and now it threatens to rise further. High interest rates have devastated the housing industry—in June housing starts were down to an annual rate of 1,032,000 units and predicted to fall further. The thrift industry, experiencing great difficulties in securing funds at reasonable rates, faces an uncertain future. And with all of this, inflation is still barely under 10 percent, and certainly not under control.

Mr. President, the road to a balanced budget has not proved to be easy. It has been particularly difficult under the economic conditions of the past few years—high inflation, high unemployment and relatively low economic growth. The budget has only been in balance five times in the past 30 years. It was last balanced in 1969. In the past decade alone we have piled up $400 billion in debt.

Ever since the congressional budget process was established our goal has been a balanced budget. Yet each time that we have looked ahead 2 or 3 years and thought we saw budget balance, the economy has acted up and the budget balance has disappeared. Then last year we were sure we had reached the goal of a balanced budget. We prepared one that was in balance, cutting $8 billion, but then the economy took an unexpected nose-dive and the goal still was elusive.

This year we started with a new President who was pushing for a balanced budget in 1984—a President who apparently was willing to propose strong measures to achieve a growing economy and a balanced budget fiscal year 1984. Congress has now virtually finished the first stage of that program—it has voted to cut about $38 billion in spending from existing Federal programs. An unheard of achievement.

Coming on top of the $8 billion achieved in 1980, the savings are substantial. Yet budget balance is still elusive. Even if we cut the budget by another $20 billion in 1983 and $28 billion in 1984, we still may not balance the budget.

Why is this so?

The reason is the tax bill before us on the Senate floor right now. This tax bill will cut Federal revenues by $37 billion in fiscal year 1982; by $93 billion in fiscal year 1983; and $150 billion in fiscal year 1984. The economy cannot grow rapidly enough to replace that revenue to the extent necessary to meet even the drastically pruned spending proposals of the administration.

Using reasonable economic assumptions, the budget will be in deficit by up to $60 billion in each of the next 3 years—an addition to the national debt of as much as $180 billion. That threatens to outdo the last decade.

The fact of the matter is that we cannot eliminate deficits until we cut revenues less than we cut spending. That is the mathematics of the situation in which we find ourselves after years of deficit financing. No one would be happier than I if there were a way to cut taxes as much or more than we cut spending and still cut the deficit. But it will not work. Just saying it will work, as so many are saying these days, does not make it so.

What is it, then, that the distinguished Senator from South Carolina and I propose to do in this amendment that will aid this deficit problem? We still propose tax reductions for individuals and for businesses. But we propose to target those tax cuts more carefully on the job that needs to be done.

First we propose early tax cuts to insure that there will be vigorous economic growth during at least the first half of this decade. These tax reductions will be aimed to stimulate savings. Yet the total tax reduction will not be so large that the increased Federal deficit will offset all the benefits achieved.

We also propose business tax reductions—primarily through increased depreciation allowances—that will target increased savings toward investment in assets that can increase our industrial productivity.

Then, after we have acted to rejuvinate the economy, but only then will we provide an individual income tax reduction which will ease the tax burden under which so many Americans are staggering today. That tax reduction, effective in 1983, will also promote rising demand for the goods produced through increased investment.

If we do otherwise—if we try to give tax cuts immediately to everyone—two things threaten. First, demand will grow before the increased investment and productivity is there to meet it. That can only mean greater and greater inflation.

Second, because we will of necessity be borrowing the money to make the tax refunds, the deficit will rob the tax cuts of their efficacy. There is a real danger that the tax program in this bill, and the deficits it will create, will cause inflation sufficient to raise taxpayers into yet higher brackets—virtually nullifying any benefits from tax reduction.

What will be the effect of our proposal on Federal deficits? They will begin to disappear. The movement may be slow, but it will be clearly visible. Our proposal will cost $12 billion in fiscal year 1982; and only $98 billion by fiscal year 1984.

These are much more modest figures than those in the Finance Committee bill—$37 billion in fiscal year 1982; $93 billion in fiscal year 1983; and $150 billion in fiscal year 1984. But our dollar figures are high enough to encourage saving, stimulate investment and provide tax relief. This will still be the biggest tax cut in history.

But, Mr. President, our deficit figures will be more modest than those of the Finance Committee bill. And it will be a declining deficit, not a level deficit as in the case of the bill before us. In place of the nearly $60 billion deficit a year for 3 years that the Finance Committee bill provides, our proposal will lower the deficit to $35 billion in fiscal year 1982 and reach balance in 1984.

Mr. President, this is the direction in which we should be moving.

Let me now outline the provisions in our tax reduction amendment for just a few moments.

I ask unanimous consent that a detailed listing of the contents of the proposal be printed at the end of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. BIDEN. Our tax cut proposal adopts many of the provisions already in the Finance Committee bill as it has been amended here on the floor.

Among these are proposals designed to stimulate increased savings. In 1980 Americans saved under 6 percent of their after-tax income. In earlier years our rate of savings has been higher, although we have never reached the levels found in many other countries.

We depend on these savings to finance additional investment. For that reason provisions in the committee bill to increase contributions to IRA and Keogh retirement savings accounts have been retained.

We have also kept the proposal to exempt from taxation 15 percent of net interest income up to $3,000 ($6,000 per couple). Employee stock ownership plans

and the new tax exempt all savers certificates should also help to increase savings levels.

The second major area of tax reduction is the committee proposal for investment incentives in the form of accelerated depreciation of assets.

These cuts provide for substantially shortened and simplified depreciation schedules in periods of 3, 5, 10 or 15 years. In addition there are increases in the investment tax credit. These incentives will help us to attack our productivity problems head on.

The third element in this program is individual income tax reduction.

These are not reductions of a size to cause rapid stimulation of demand, and thus of inflation.

They will be adequate, however, to assure demand for increased manufacturing capacity. And they will provide a good beginning on tax relief for the overburdened taxpayer.

In fact, because this tax proposal is truly anti-inflationary, our more modest tax cuts may be worth more to the taxpayer than larger ones, because they will not be eaten up by inflation.

Specifically, our proposal would provide:

A reduction in the maximum tax rate to 50 percent in January 1982. The current maximum rate is 70 percent. The maximum rate on capital gains is lowered to 20 percent effective June 10, 1981.

An increase in the zero bracket amount—formerly the standard deduction—to $2,500 for singles and heads of households and to $3,800 for joint returns beginning in January 1983.

An increase in earned income credit to 11 percent for the first $5,000 of earnings. The credit would not apply to those earning more than $12,000 and would be effective in January 1982.

A deduction for two-earner married couples of 10 percent (5 percent in 1982) of the first $30,000 of income of the lower earning spouse. The effective date is January 1982.

An average 10-percent reduction in personal tax rates beginning in January 1983.

The reductions have been designed to insure that persons in the $15,000 to $50,000 income bracket are treated fairly by compensating for the effects of inflation. In addition, the proposal provides for a reduction in the marriage penalty. This provides a more equitable tax treatment for the secondary earner in a family.

Our tax proposal also includes reductions in estate and gift taxes, tax cuts for U.S. citizens working abroad, tightened provisions to insure that persons engaging in commodity tax straddles pay their fair share of taxes, and various small business tax provisions.

Mr. President, for just a moment I would like to pause and review a case history which I believe is instructive for those who want to see where this Finance Committee bill is taking us.

We have known for some time now that our thrift institutions and their close relations, the housing industry, were in serious trouble.

In 1980, 119 savings and loan associations were merged out of existence.

In the first 5 months of 1981 the number is 80, an annual rate of 200.

In the first 4 months of this year the savings and loans had net deposit withdrawals of $5.3 billion.

Their losses so far this year are about $1 billion and are expected to total between $5 and $6 billion at yearend.

The plight of the housing industry, staggering under the 17-percent mortgage rates that the savings and loans must charge, is similar to that of savings and loans.

New housing starts in June were down 11 percent to just over 1 million units and were estimated to decline further.

New building permits issued were down 16 percent to 976,000.

Now, briefly, what accounts for all this?

The answer is high interest rates.

High interest rates throughout the economy have forced S. & L.'s to borrow at high interest to finance outstanding low-interest mortgages. But even so, deposits are drained away by more favorable interest elsewhere.

The resultant high interest rates for new mortgages have cast a pall over housing.

And why do we have high interest rates?

There are, of course, a number of reasons. But one critical element is the restrictive monetary policy necessary to prevent our continued high deficits from being inflationary. So I believe the Federal Government must accept some responsibility for the problems that have arisen.

It is because of that responsibility that we have had to add to this bill, and to our proposal, what is known as the all savers proposal.

That proposal would allow financial institutions that are active in lending for housing or agriculture to issue special certificates, the interest from which would be tax exempt within certain limits; 75 percent of the funds derived through these certificates by financial institutions would have to be used for housing or agricultural purposes.

There would be a maximum on tax free interest to depositors of $1,750 per person, $3,500 for a couple.

The interest rate would be pegged at 70 percent of the 1 year Treasury bill rate.

It is our hope that this will provide adequate funds to the thrift industry to tide it over the next couple of years. It may also help the housing industry by bringing down mortgage rates.

I do not like having to include such a provision in this tax bill.

I wish interest rates were low and these two industries were healthy. So I am even more concerned that, in the committee bill, there is nothing to bring interest rates down in the long term. Only that can provide a permanent solution for housing and the thrifts.

The problem is deficits. Deficits put pressure on credit markets and force interest rates up. Deficits force further restrictiveness in monetary policy, pushing interest rates up. Yet this bill before us does nothing to help deficits. It holds forth only 3 years of deficits totaling almost $200 billion.

Our amendment will reach the balanced budget goal in 1984. We have heard a lot about that goal. But few seem willing to take the hard steps to realize it.

In summary, Mr. President, I believe that this tax reduction proposal will achieve the following beneficial goals:

It will provide additional savings incentives.

It will provide business with the incentive to invest increased savings in productive assets.

It will provide individual income tax reduction that will relieve the staggering tax burden without proving inflationary.

It will make possible a balanced budget by 1984.

The choice that we must make here today is between a balanced budget in 1984 or a continuation of Federal deficit financing at higher levels than ever before.

The choice is between lower interest rates resulting from lower deficits or continued high interest rates that may push our economy ever closer to the brink of recession.

The choice is between a tax cut designed to moderate inflationary pressures or a tax cut so poorly designed that it will feed inflation. The choice is between prosperous home building and thrift industries or those same industries perched on the edge of disaster.

Mr. President, I believe that we are at a turning point in our economic future.

I am sure that the American people want us to choose the road that leads to long term economic stability and prosperity. I am convinced that our proposal can show us the way. I hope the Senate will adopt it.

EXHIBIT 1

[Summary]

HOLLINGS-BIDEN AMENDMENT TO H.J. RES. 266

INDIVIDUAL TAX REDUCTION

Reduction in the top rate on investment income from 70 percent to 50 percent (effective date January 1982). For capital gains the effective date is June 10, 1981.

A new deduction for married couples equal to 10 percent (5 percent in 1982) of the first $30,000 in earnings of the lesser earning spouse.

An increase in the zero bracket amount of $200 for single returns and $400 for joint returns.

An increased earned income tax credit of 11 percent.

Individual rate reductions averaging approximately 10 percent, effective January 1983, weighted more heavily to middle income groups.

SAVINGS INCENTIVES

Provides for a tax exempt savings certificate to be issued by depository institutions having a yield 70 percent of the yield on a 1-year Treasury bill.

The current temporary provision for $200 interest and dividend exclusion for single returns and $400 for joint returns will revert to prior law on January 1, 1982.

Increased incentives for retirement accounts and employee stock ownership plans.

CAPITAL FORMATION TAX INCENTIVES

Depreciation and investment tax credit revisions.

Tax credit for rehabilitation expenditures.

Tax credit for research and experimental wage expenditures.

ESTATE AND GIFT TAXES

Increased credits on estate taxes.
Unlimited marital deduction for estate and gift taxes.
Increased gift tax exclusion to $10,000.

INCOME EARNED ABROAD

Provides for an increased exclusion for income earned abroad.

COMMODITY TAX STRADDLES

Provisions to ensure proper taxation of commodity straddles.

SMALL BUSINESS PROVISIONS

Incentive stock options.
Subchapter S corporations.
Accumulated earnings credit.
Investment credit for used property.

OTHER PROVISIONS

Deduction for motor carrier operating rights.
Corporate contributions of research equipment to colleges.

Mr. BIDEN. Mr. President, the elimination of Federal deficit spending, it would seem to me, should be the issue that we are focusing on here. It is the single most important element in a program to achieve an economically sound future for this country. I know everyone here is painfully aware of the fact that very shortly we are going to be voting on extending the national debt to $1 trillion, a landmark level, yet we are making very little progress toward a balanced budget.

If this tax reduction bill is passed in the form recommended by the administration and the Finance Committee, I think it is reasonable for us to expect that we will have a minimum of $60 billion and, possibly, as high as a $80 billion deficit coming up, and it will average out somewhere around $60 billion a year through 1984, and we will be talking about adding $180 billion to $200 billion to what will be a $1 trillion deficit to work from.

I am sincerely perplexed. Not long ago I had the privilege of cosponsoring an amendment with the Senator from South Carolina to a budget resolution where we essentially did this, what we are doing now, in a slightly less structured form because of the budget format we had to work with. We were talking about the budget cuts, and I raised the point then that I will raise again now.

I have been made a believer over the last 9 years in the Senate. I must acknowledge that when I first came to the U.S. Senate at age 29, not too long out of college, many economists had been telling me about why deficit spending was not all that bad and all the things that could be good about it and how it would accomplish certain things. So I was not very convinced of the arguments made by my friends here who, I must acknowledge, were mostly on the Republican side of the aisle, telling me that deficit spending was really bad, and that it caused inflation and high interest rates.

As I listened over the years in this body I became more and more a believer in balanced budgets. When we formed the Budget Committee, I was one, as they call us, of the charter members, like the Senator from South Carolina and the Senator from New Mexico, and I had to sit down there every year and actually, in effect prepare the Federal budget.

I became a believer pretty quickly. Notwithstanding the fact that I would probably be characterized in this body on social issues and civil rights and civil liberties as being left of center, I would think my record on the Budget Committee over the past year proves at a minimum that I would be fiscally moderate if not conservative in the way I voted on that committee because I have been made a believer. I arrived at that conclusion maybe for different reasons from some of my more conservative friends, but the fact of the matter is I became a believer. They convinced me that deficits caused inflation, and inflation hurt little folks and old folks and poor folks more than it did rich folks, more than it did powerful folks.

So I began to focus on that. From 1976 on we tried chasing the elusive goal of a balanced budget. A couple of times we seriously thought we had it. We thought we had it by the neck, and then the economy—for a whole range of reasons I will not go into right now in the interest of time—fooled us, and we ended up with a deficit again, and my friends on the philosophical and physical right of this Chamber said, "Aha, those Democrats, those bad old Democrats, are at it again, big spending, deficit-making Democrats."

I said "my goodness," and I spent my whole time in 1978 going back, running for reelection, saying "mea culpa," "mea maxima culpa," "not me. I am a believer. Look at my record." They said, "You are a Democrat, aren't you?" I said, "I am a Democrat." They said, "Well, we have been hearing on these paid advertisements all over the country that the Democrats cause deficits, deficits cause inflation," and then we went through the whole thing.

Well, it was a very difficult thing to get out from under. Do you know what happened? The national Republican Party, the national Republican leadership in the Senate and in the House, the Republican candidate for President, and now President of the United States, were incredibly convincing, and they convinced everybody. They not only made a believer of me early on, they convinced my folks at home that to be a Republican was to be for balanced budgets. They were inseparable.

The American public, understandably somewhat frustrated—and it is somewhat presumptuous for guys like me to stand on the Chamber floor when the galleries are filled with the American public and say what the American public thinks—but what I think the American public thinks is that we are in pretty sad shape; that the Democratic Party did not do a whole lot to clear up the economy in the last 6 or 7 years; that they are not sure the Republican Party is going to do much but, basically, there was a referendum held in 1980 which said "Give those Republicans a chance."

It was not a referendum on El Salvador or on the CIA wanting to go back to the good old days, and it was not a referendum on wanting to do away with civil rights; it was not a referendum on a moral majority. It was not about those things.

It was about the economy. They said, "Hey, you Democrats are not doing too good. And so we got a President who says, 'I'm fiscally responsible and to be fiscally responsible means you must balance the budget.' "

How many times did the American public hear our President stand up and say—I wish I could imitate his voice well because it would make the impact that needs to be made here—"What we need to do here is understand that Government is like running your household." And he would look out to the American people and say, "Now, could you run your household if you spent more than you took in? You couldn't do that for very long, could you, my fellow Americans?"

And we all sat there and said, "That is right. We couldn't do that. No way."

And then he said, "And the one question I want to ask you all is: Are you better off today than you were yesterday?"

And even I sat there in front of the tube saying, "No, I'm not. I will tell you, things are bad." And, you know, it worked.

Mr. DOLE. Will the Senator yield?

Mr. BIDEN. Yes.

Mr. DOLE. Did the Senator vote for Reagan?

Mr. BIDEN. I beg the Senator's pardon?

Mr. DOLE. Who did the Senator vote for?

Mr. BIDEN. I voted for Carter because I did not believe Reagan and I will tell you why I did not believe him—I think this is proof of why you should not have voted for him—because he did not mean what he said. And I will tell you why he did not mean what he said.

We got down to the point where I sat there and listened and listened and listened on this floor. Without going into detail, which you have heard and which has been much more fully articulated than I could do it by the sponsor of this amendment, on what our amendment does, and the Senator from Arkansas whom I am sure will speak, also, and others, let me tell you what worries me most about what is happening now.

What worries me more than the effect of the deficit on our economy—and I am convinced, I pray to God I am wrong, but I am convinced that the effect of the Reagan program will be economically disastrous for most of us in this country, the 99 percent that do not have an oil well in their backyard. I think there will be trouble. And I think, in the long run, it will also be trouble for the folks who have an oil well in their backyard.

But this economy is so strong, this country is so resilient, notwithstanding the trouble we are in, that even Ronald Reagan and our Republican friends, with this economic plan, are not likely to be able to do long term, complete damage to it.

Mr. DOLE. Will the Senator yield?

Mr. BIDEN. Yes.

Mr. DOLE. Does the Senator really believe that you have confidence that we can clean up the mess you left us in? Is that what the Senator is saying?

Mr. BIDEN. Well, I am not sure. I admit we did leave part of a mess. I admit that Gerald Ford gave us a $65 billion budget deficit. I admit that Richard

Nixon left us a country in shambles that prevented us from focusing on the economy. I admit that the Republican leadership in the Senate did nothing constructive during the past 4 years, other than come up with simple solutions that obviously they knew would not work and throw hand grenades. But, as someone once said on this floor, it is much better to throw hand grenades than to catch them. So we were over here catching them and you were throwing them. We were everything from immoral to unenlightened to whatever.

But, at this time, that is not the thing that worries me.

Mr. DOLE. Will the Senator yield?

Mr. BIDEN. After I tell you what worries me and then I will be happy to yield and you can tell me why it does or does not worry you.

Mr. DOLE. I just have one thing to say and I am being called for another matter.

Mr. BIDEN. I yield.

Mr. DOLE. I do not know what worries the Senator, because then we would both be worried.

Mr. BIDEN. We should be.

Mr. DOLE. But I would hope that, in the final analysis—I understand all the rhetoric. I even made speeches like that.

Mr. BIDEN. Did you?

Mr. DOLE. Privately. I never wanted to go public with a speech like that. [Laughter.]

But, in the final analysis, it may be that you will vote for our package.

Mr. BIDEN. Well, I doubt whether I will be able to have the same incentive to vote for it as you do, because there is obviously not an incentive based on the merits of the economic package. There must be others. I will get back to that later.

But the thing that worries me is—and for the sake of argument I will admit that the Democrats were bad; that the Democrats did a horrible job; that the Democrats got us in all of this trouble; that the Democrats were the people the American people turned their backs on and that everything the Republicans said about us was true. Let us assume all of that for the sake of argument.

The thing that worries me is the American public turned to a fellow they believed was going to do at least one thing: they believed that he was going to balance the budget. They believed he was going to get the fiscal house in order. And they believed, especially after the first round of budget cuts, that he really meant what he said.

So he came along and even I supported 98 percent of all of the cuts on the floor that he offered, because I believed that if the goal was to balance the budget I would swallow hard and vote against things I supported philosophically and emotionally. So I voted for those cuts.

Now, where are we? The American people, who already lack confidence in the ability of their political institutions to function, are about to get another jolt, which is going to do more damage to us institutionally than anything we could do now. Because you are going to see the chambers of commerce of America, who are telling us to vote for this package, when they find out next year that there is a $60-billion deficit and another one coming up, they are going to say, "Oh, God bless the Democrats for pointing it out to us" or "Those awful Republicans for doing it to us." They are going to say, "You know what? Government does not work. Nobody can make it work. There isn't any way we can do it."

And we are going to further erode that little, tiny bit of reservoir of confidence that remains.

We spent the last 15 years—both political parties—in everything from Watergate to Abscam to stupid politics, convincing the American public that we do not know what we are doing; that we are not to be trusted; that we do not have any answers.

Mark my words, when they figure out or they conclude that the guy they really believed in did not deliver what they thought they were getting, they are going to be prepared to look to more radical answers. I cannot tell you what those radical answers will be, but they will look to more radical answers. And it will not be within the institutional framework we are talking about now.

We are talking about the free enterprise system helping us fight our way out of this. And I am all for unleashing it. That is what our bill does.

But you know what they are going to start saying—and remember I said it here—when we have unemployment above 7.5 percent, when we have a deficit of $60 billion, when we have interest rates still at 16, 17, 18, 20 percent, when we have an inflation rate at 12 or 13 percent after we have made all of these cuts, after we have brought on all of this misery, after we have wrung the country through this issue? They are going to say, "You know what? Maybe we should start planning the economy the other way. Maybe what we should do is have the Federal Reserve elected. Maybe what we should do is turn around and control all credit. Maybe what we should do is"—it will go on down the line. And nobody talks about that.

Let me conclude by asking a question of all who are going to read this in the RECORD, as Senator DOLE does, because he does not have much better to do in the morning than read the RECORD, apparently. Anybody who would spend the time reading the RECORD, I question.

But if he reads the RECORD, I hope he reads this tomorrow morning. I want him to go back home to his home State, or any of you who are hearing this in your offices or will read it tomorrow or your staffs tell you about it, go back to your home State and find your basic conservative Republican businessperson at the Rotary Club or the Chamber of Commerce meeting, wherever you go and where we all go to speak.

Pull him aside over the August recess and say to him, "Charlie, you know we are giving you this economic program that the National Chamber wants to have. By the way, Charlie, you do know, don't you, that there is going to be a $60 billion deficit next year? Don't you? And you do know, Charlie, that there will be another $60 billion the following year? You are aware of that, aren't you, Charlie?"

I will lay you 8 to 5 Charlie will look at you and say, "No, no, that is not right. Reagan is going to balance the budget for us."

And then say, "No, Charlie. Reagan's budget sets up a $45 billion deficit even with his figures. You know that, don't you, Charlie?"

You will not be able to convince Charlie, because this President has done such an incredibly good job, and I compliment him, of convincing the American public that he is for fiscal austerity, which is synonymous with balancing the budget, that he will not believe you.

I am not exaggerating. Try it on them. I do not mean to go talk to the economists for the big corporations in your State. I mean talk to the local businessman or woman, who runs a pet store, an apparel shop, whatever.

I am telling you, Mr. President, I do not know why we insist on this. I do not know why, since we went through the pain of cutting these programs, we do not do what we all know is what needs be done. That is to put the fiscal house in order.

It is a strange thing for the Democrats to be making this argument, if all we heard about them in the last 10 years is correct. I only ask that rhetorical question, Why do they want to have the 3-year big tax cut all at once knowing that the deficits will be catastrophic? Why is that?

I will leave you with a possible suggested answer. It is because this is all about social priorities in America. This is all about whether or not Government has responsibility. Not about inflation rates, not about interest rates. Whether or not Government has the social responsibility to take care of folks who need help.

They are right about one thing: If the revenue loss occurs, if the deficits are as high as we anticipate them to be, not only are "they going to be in trouble," but all of those other programs are going to be in trouble, too. It will be very hard to convince the American public that we should be funding social security, food stamps, or any other program.

I suggest that is what it is about. I suggest to you, Mr. President, that we can ill afford to further undermine the confidence of the American people.

I would suggest this is a good amendment and at a minimum we should be thinking about whether or not we try this thing to see whether or not it works.

I apologize to the Senator from South Carolina for going on so long about this. As I said, just be thankful I did not do my whole statement. I appreciate his leadership in this effort. I sincerely mean it when I say I do not see any other good reason, economic reason, why anyone would be against moving toward a balanced budget after we have cut the programs, when we are skewing this toward business, we are skewing it toward the supply side, we are skewing it toward people who are going to invest. Why would you not go with this other than the longer range reason of reordering the responsibility of Government in this country?

I thank the Senator.

The PRESIDING OFFICER. The Senator from South Carolina.

Mr. HOLLINGS. Mr. President, the distinguished Senator from Delaware has made more than a speech in support of a particular amendment. He made a formidable statement about a fundamental. He has described, really, what is the issue in this land of ours, and particularly in the Nation's Capitol, as we discuss the economic program.

I know I get side glances from my colleagues on this side of the aisle when I say I support President Reagan. I do it genuinely and have done it genuinely because, in part, of the very important point made by the Senator from Delaware.

In this regard, I ask unanimous consent that the article appearing in the Washington Star last night by Messrs. Germond and Witcover be printed in the RECORD at this particular point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

OLD RULES STILL PROVE VALUABLE FOR POLITICIANS

(By Jack W. Germond and Jules Witcover)

Playing tax-cut politics is walking in quicksand. That is clear in what has happened to Republicans and Democrats alike in the endless wrangling over the tax bill of 1981.

A year ago the Democrats were deriding the Republican priority for tax reduction at a time of runaway inflation. Speaker Thomas P. O'Neill Jr. told his party's national convention, "Let me assure the American taxpayer that the Democratic Party respects your intelligence and—unlike the Republican Party—will not insult you by proposing a massive tax cut of some $200 billion over the next five years while promising it will stimulate demand, balance the budget and reduce inflation all at the same time."

"The Republican alternative," said President Jimmy Carter, "is the biggest tax giveaway in history. They call it 'Reagan-Kemp-Roth.' I call it a free lunch Americans cannot afford." The Reagan-supported tax cut, said Vice President Walter F. Mondale, "is obviously murderously inflationary."

This was the conventional wisdom among Democrats and, for that matter, many Republicans. The government doesn't reduce taxes in times of high inflation and rising deficits. It is just the opposite of what is needed.

So the most the Democrats would endorse would be cuts "targeted" to businesses to stimulate productivity and lower inflation. General tax reduction would be, as someone said before a vice presidential nomination changed his mind, "voodoo economics."

But today all that seems to have been forgotten by the Democrats in Congress or at least most of them. Although they are giving lip service to their traditions and principles as a party by trying to skew the income tax cuts to those who earn under $50,000 a year, it is clear they are in a bidding war with the Republicans. Who can do the most for independent oil producers? Who has the most generous plan for minimizing the marriage penalty or reducing inheritance taxes or providing more shelter for interest and dividends?

Nor have the Republicans been any less susceptible to the political attraction of giving away the store. A year ago Ronald Reagan and his supporters were advocating tax reduction as a great experiment with the theory of "supply-side economics." Simply cut the rates, they said, and watch the economy boom.

That idea was, of course, a clean break with the dogma of the Republican Party that held deficits were almost as pernicious as godless communism. And some leading Republican experts, including Rep. Barber B. Conable Jr., their ranking man on Ways and Means, did have serious doubts about whether it would work.

But Kemp-Roth did have the virtue, in some eyes at least, of being an attempt to try something new. Heaven knows the conventional government attempts to influence the economy had been exposed as failures.

But now, as the negotiating drones on in both houses of Congress, it is clear that the economic questions have been put aside in favor of the political imperative. The White House that insisted a few months ago on nothing beyond the great experiment is now buying not only elimination of the marriage penalty and reduction of top rates on unearned income but relief for those independent oil producers and maybe indexing and perhaps deductions of charitable contributions on the short form.

What has happened is what always happens with tax legislation, although it is happening a little earlier in the year than usual. The tax bill has become a Christmas tree bill, just as they always do.

The Democrats may calim they are helping the little man as always. And it is clear the bill they are pushing in the House is different from Ronald Reagan's in that respect. But, let's not kid the troops, it is equally clear they have been stampeded by the White House and Reagan's political muscle into legislation they otherwise never would have been proposing at all—or at least not this year with these inflation rates.

Similarly, the Republicans may insist they are full of noble purpose. But it is also obvious that many of them, still harboring doubts about Kemp-Roth, have been swept up in the usual competition for political credit.

The result, almost inevitably, is going to be a tax bill that satisfies neither longstanding Democratic economic theory nor the new Republican commitment to economic innovation.

The lesson in this is that there are limits to the Reagan revolution and the new politics of the new conservative ma'ority. The old rules still apply, and one of the most basic is they don't shoot Santa Claus.

Mr. HOLLINGS. That will be a good memory jogger.

People forget the desperate circumstances we as Democrats were in last year, when, after our President had submitted his economic program and his state of the Union message, we were put to the task of saying, "Mr. President, go back and resubmit that message. It is just not an austere budget. It is not going to fly. We are in deep, deep trouble."

So the President had to resubmit, cutting billions of dollars. As Senator BIDEN has pointed out, we thought we had that June a very illusive goal; namely, the balanced budget. But we did follow on with reconciliation and cut spending. We set that dramatic record in that Congress because we felt it very keenly.

That gives somewhat of a perspective and panoramic background to the economic difficulty that we have and, necessarily, since it has persisted for a good 10-year period now, the difficulties that we have as public servants, the difficulty that Government has, and the difficulty that people have with respect to confidence in Government.

I think Senator BIDEN has made one of the most important statements made on the floor this year, if not the most important. I hope people are listening back in their offices, and I hope those covering this may momentarily forget about this amendment because it is not going to carry, obviously. Really get to the point that we are trying to make with the amendment and which the Senator from Delaware has made so colorfully.

Incidentally, when you are that attractive, dynamic and colorful, as the Senator from Delaware is—he is just still too young for some to give careful attention to. Not in my case I assure you. Around here, they do not believe. All too often, you must have age before your message will be given the attention it deserves.

It is unfortunate that you have to have snowy, gray hair or everything else like that and everybody saying, "Sir?" before you will be heard. They ought to listen to the meat of the message that the Senator from Delaware has here given.

This is not a partisan thing. This is a matter of having it work. If it does not work under President Reagan, then I do not know how we can get it to work. I would have hoped we could have gotten through to the President.

He has many, many concerns on his mind.

I would have hoped we could have gotten through by getting through to Secretary Regan, who we have not gotten through to. He is selling us. He has an impediment. He cannot listen.

Otherwise, our good friend, David Stockman, who is brilliant, who has done much, listens too much to the news reports and does not have it all together. That is David Stockman.

The Senator from Delaware responded exactly to the point he was making. David Stockman came on TV and sobered me up one evening. He said the Government had no responsibility to the American people for any service.

Now, you have come to the real meat in the coconut here. I am almost tempted to get a live quorum and get a record. Unfortunately we do not have this thing on radio yet so we could play it back to make them listen.

Touching on that issue, if the administration's economic recovery plan does not work, then we are not going to be accredited as a body—the Senate. The Senator is right. We have been in public service and are realists enough to know that that record will not be examined—people will not have time for that, they will be so angry, distraught and disillusioned.

Why is it that in 1976 they did not take a single one for President from the Democratic Party? They took an outsider. We had Muskie, KENNEDY, Humphrey, or UDALL, or Bayh—we had a whole stableful of them come out. We lost that confidence then. The body politic said, "We'll give you this fellow down in Plains, Ga. He says he wants a government as good as the people, and he will straighten that Washington crowd out."

We got the exact same message last November. They had their whole stable:

The Senator from Tennessee, the Senator from Kansas, the Senator from Connecticut, and others. They were all candidates. And the people said, "No, we have already lost confidence."

The Senator's point is well taken. They said, "We don't want to hear that Washington crowd anymore. We will take this fellow, Reagan."

You can joke about his being a movie star, but he was sincere in what he said about a balanced budget. Then after the election, we get Gildersleeve and Stockman and they come in with this, just economic trash, about incentives, like this oil thing the Senator from Kansas is talking about; he labels it the people's amendment.

We shall get to that in just a while. But let me hold up just a second.

The point is that we lost that confidence as Democrats, they lost it as Republicans, here, in Washington. We have had two of them come from without and they are both very sincere, Jimmy Carter and now Ronald Reagan. If it does not work under this one, the people will say, "A curse on both your Houses. There is no way for Government to work."

That is what Senator BIDEN said and no one is listening That is the real test that we have here: Can we get by this political dichotomy of what the pledge was and Kemp-Roth-Reagan and all that nonsense about going to give all that incentive and everything like that, when nobody really believes it? We are creating expectations that simply cannot be met.

And not believing it—if they had believed it that strongly, they would have given it in January. If they believe in it that strongly in July, they would have given it in July. After they backed off it in January, they would have given it in July. If they believed in it that strongly, they would have held to 10 percent, if 10 percent was necessary.

They really are worried themselves. Dr. Arthur Burns said so. But they are holding to the social goals.

I shall yield in just one second to the Senators from Arkansas, because he has been very patient with us. I shall read this statement of Dr. Arthur Burns in the RECORD. Dr. Burns is no other than the President's appointee as Ambassador to the Federal Republic of West Germany. He said:

> Skepticism concerning the underpinnings of the Reagan program is not confined to traditional liberals. It is also felt to some degree by economists, businessmen, and others, who are entirely sympathetic to the president's philosophy that the restoration of a healthy economy requires much more reliance on the free market and less on government.
>
> The basic question about the Reagan program is whether a declining rate of inflation is likely to accompany the consistently high rate of growth in the physical volume of overall production that the program projects for the five-year stretch from 1982 through 1986.

Mind you me, this is Dr. Burns that the distinguished Presiding Officer heard as a colleague on the Budget Committee. I asked Dr. Burns would he give an across-the-board tax cut this years. He said "No." He said "No."

Let me read one other little portion of Dr. Burns' treatise.

> In the third place, it is more useful to view the Reagan program as a plan that is still undergone evolution rather than as a finished, final blueprint for action. As such, it merits neither acceptance of every detail nor criticism that stops short of providing a practical alternative. There is considerable evidence that the president himself views his economic program in just that way.

I wonder about those around him, because they are moving on and politically have advised that there is no compromise. Before any mention is made, you immediately get a statement. I do not know how they find the gentlemen that fast. There is immediately a statement from the White House staff, no compromise because of the social goals the Senator is talking about. They are pell-mell for hell now. They are making spending cuts and, like the sheepdog, they are going to gobble up the flock.

Mr. BIDEN. Will the Senator yield on that point?

Mr. HOLLINGS. Yes.

Mr. BIDEN. Mr. President, there is one point the Senator from South Carolina has underscored, and I want to underscore again. It seems to me this is beyond partisan consideration. The Democrats have had to do it and President Reagan has to have the guts to take on interest groups. The Senator from South Carolina and I have stood on the floor, as the Senator from Arkansas and I did, and had to vote against traditional interest groups in the Democratic Party that we thought were wrong in what they are asking for.

I wish the President would follow his basic instincts and have the guts to vote against, by his statement, the interest groups that are insisting upon this whole plate that they are asking for. The majority of the American people do not belong to any interest group on either side of the table. I think that is what they are offended by. We on this side, under the leadership, I admit, of President Reagan giving us the opportunity to do so, stood up on the floor with some little cost and voted against traditional Democratic interest groups, because it was right to do.

They should do the same thing. They have the budget cuts. Do not be afraid to take on the rich folks, do not be afraid to take on the big guy. You will find the American people will be there. Just as I do not believe we are going to be hurt by the interest groups, because in their hearts, as one other famous Republican said, "You know we are right."

Mr. HOLLINGS. Mr. President, I shall take 1 minute to complete that thought after I listen to the Senator from Arkansas.

The PRESIDING OFFICER. The Senator from Arkansas.

Mr. BUMPERS. I thank the Chair and I thank Senators HOLLINGS and BIDEN.

Let me commence, Mr. President, with a story that really is not relevant to the bill and the amendment that we are arguing here. The Senator from Delaware alluded to President Reagan's debate with President Carter, when he looked into the camera and said, "How many of you people out there think you are better off than you were 4 years ago?" It is very easy in this day of cynicism, distrust, and apprehension, to say "I am certainly not." I think perhaps most people genuinely believe that, and maybe it is true.

It is not true for me, although people demean the Government or the programs of this country, such as those that kept my father from going bankrupt during the depression. For exampie, Rural Electrification Administration, fought every step of the way by the public power companies, saved my father from bankruptcy.

After World War II, it was the GI bill that enabled me to get an education to make a living with and also which allowed me to be Governor of my State and a U.S. Senator.

So when people ask me, "Are you better off?" I am grateful for every day I have. I feel I am the luckiest man alive. I grew up about as poor as you could get.

I sometimes wonder why I am not more mean spirited than I am. It seems that you have to be mean when you grow up poor.

We had an expression in the Marine Corps: "Pull up the ladder, Jack; I'm on board." It occurs to me that that is what life can be.

People are willing to provide this $333 billion tax cut, with most of it for the very wealthiest people in the country because they are supposedly the only ones who have enough sense to save it and invest it. As strongly as I want to cooperate with the President, I cannot support that.

Getting back to the earlier point: How soon we forget. You never appreciate peace until you have war. You never appreciate good health until you lose it. You do not appreciate anything until you lose it.

I know I am lucky. My 4-year-old brother died of acute indigestion. You would hardly have to take a child to the doctor's office to cure that today.

My wife's father used to heat a rock and put a quilt around it so her feet could stay warm in the wintertime while she rode the bus to school.

People talk to me about the good old days. I am not willing to go back to the good old days. I have had them.

That is not to demean for one moment the people in this country who are struggling and having a tough time, and nobody is more sympathetic to that than I am. I am speaking only for myself and a benevolent Government which has allowed me to get a good education, and I am grateful to it for allowing me to serve in the U.S. Senate.

In World War II. 120,000 Japanese were interned in this country in concentration camps. Senator INOUYE was not one of those because he was in Hawaii. He was native born. We called them Nisei.

Many Japanese volunteered to serve in World War II if they were native born, and, eventually, they were taken out of those camps. We had about 15,000 Japanese in two camps in Arkansas, and some of them were allowed to volunteer. They

were taken from behind barbed wire fences and were put in American uniforms.

But Senator INOUYE was one of the first people to enlist in World War II. We all know that he now has one arm because he lost the other during the Italian campaign. He came home with a row of ribbons across his chest like nobody you ever saw. He walked into a barber shop in San Francisco, California, and the barber said, "What are you?"

Senator INOUYE said, "Well, I'm an American."

"No," the barber said. "I mean, what are you?"

Senator INOUYE said "Well, I'm Japanese."

The barber said, "We don't cut Jap hair here."

Well, Senator INOUYE got even with that barber, because he is a U.S. Senator today.

Nobody would question how deplorable that is; but, by the same token, nobody would condemn a Government in which native-born Japanese can serve in the U.S. Senate to make sure things like that do not happen anymore.

So when the President asks if I am better off, I could think that I do not have quite as much money in the bank. My farm is not worth as much as I thought it was going to be. I could go through a litany of things, if I wanted to do so. The truth of the matter is that I paid more in income tax last year than I ever dreamed I would make when I got out of law school, and I am grateful for that fact.

The President later said something else on national television. The President said, "If you don't like my plan, come up with a better one." That was when the Democrats were still a party in disarray. It is going to take us a while to recover from 1980 and get our act together.

The President said, "If you don't like our plan, come up with a better one." All the Democrats started trembling and said, "You can't beat something with nothing, and that's all we have."

So we scurried around to come up with something we could all agree on. Finally, in the last few days, both in the House and in the Senate, we have come up with plans we honestly believe are better than his.

But almost every day, you hear the news reports: This is not acceptable to the President. That is not acceptable to the President. This plan is not acceptable to the President.

He says, "If you will just buy this plan, we will balance the budget; we will reduce inflation; we will reduce interest rates; we will do all those great things."

Both, an amendment in the House and one soon to be offered by the Senator from New Jersey in this body, would at least hold off the third year of this tax plan until the President's own goals have been met.

Why, in the name of all that is good and holy, would that not be acceptable to the President? He says that the inflation rate is going to be down in 1983, that the deficit will be a certain figure, and that interest rates, the thing that is absolutely dissolving this country, will be down.

The amendment of the good Senator from New Jersey and the amendment in the House would require that the third-year tax cut not go into effect until we see whether those goals are met or not. That seems to me to be the most reasonable thing in the world. However, as I drove to work this morning, I heard that the President said that is not acceptable.

The Senator from Delaware has already alluded to a thing that I want to repeat, because it is unique in the history of this country. It was the Democrats who got the message last fall. It is the Democrats, on this side of the aisle, who are bleeding for fiscal responsibility and a reduced deficit.

I do not care whether you believe that deficits are the cause of inflation or whether you believe deficits are the cause of high interest rates. It is good sense not to have deficits.

As the Senator said, he and I have to live within our means. Everybody has to live within his or her means, except the Government. So, let us do it, because if we do not carry out that one expectation of the American people, we will dissolve the small thread of confidence still remaining.

Therefore, we are pleading on behalf of the amendment of the Senator from South Carolina. I am not wild about it, but compared to Kemp-Roth, it looks like the New Testament. It is an amendment that cuts deficit spending by $173 billion over the next 3 years.

It is the Democrats who have always been for jobs. It is the Democrats who have always been for cutting taxes. It is also the Democrats, I presume, who got the message fully last fall that the American people want to do business differently. It is the Democrats who are trying to honor that mandate, if there was one, to balance the budget and to stop deficit spending.

The President has also said that we should not tinker with social security. He told the American people that the safety net is going to be kept sacrosanct: "You people on social security, don't worry, because we are not going to tinker with that."

Although he has not said it, every poll I have seen has said, "Don't give this country away to the oil industry." Yet, yesterday, in the middle of July 1981, the U.S. Senate did the most amazing thing I have ever seen. It voted to cut the minimum social security payments to 3.5 million people, $122 each month, many of whom depend on that almost totally. The Senate decided to take that $122 check away from them, and, within 1 hour, we were considering an amendment to give $40 billion to the American oil companies, who are busy buying up each other and everything else they can find to buy because they do not know what to do with the money. It is all over the floor.

I say to the Senator that he is going to live a long time before he sees that happen. I hope he lives a long time before he sees that happen again.

Concerning capital gains, I heard all the arguments made in 1978 when we cut out the capital gains rate from 49 to 28 percent. You cannot find one thing that has been said since the debate on this measure started that was not said since 1978. Cut the capital gains rate, and people will invest. We will improve our technology, become more productive, compete with Japan, and everything will come up roses. That was 3 years ago. What happened to that promise?

Now the argument is 28 percent was not low enough; let us go to 20 percent. Is that one of the promises they are going to meet?

That is not an antibusiness argument. That is a rhetorical economic question.

This amendment, of which I am a cosponsor, is infinitely preferable to those supposedly fair across-the-board cuts which the Senator from South Carolina and I both know are about as unfair as anything we can be as these charts show.

These figures are far more compelling, than the arguments that we have to give the oil companies more money as an incentive to explore.

That argument has been so totally devastated in this Chamber so many times since I have been here that one cannot believe anyone would have the courage to continue to make it. Yet it is still made.

Twenty billion dollars of credit is lined up by four companies in this country waiting to see who is going to gobble up Conoco. Tell me how much extra oil the United States is going to get when Gulf or Mobil succeed in buying Conoco. Where is that great American adventurism to go out and risk their money? They know that they do not have to risk anything; they can buy it. It is already found. They will just buy Conoco.

I tell the Senate that of the 27 top oil companies in this country, 20 of them are shivering in their boots right now. They know the other seven are probably going to gobble them up.

By comparison, what does the Kemp-Roth bill do for the people who make less than $20,000 a year, and that is half the people in America? The median income in this country for a family of four is $21,000. That means half the people of this country are making less than $20,000. What will their situation be at the end of 3 years?

These charts show it. In 1984 the peopeople who make between $5,000 and $10,000 a year will be 126 percent worse off, using a 9-percent inflation factor. The people who make between $10,000 and $15,000 in 1984 will be 13.1 percent worse off than they are today. And the people who make between $15,000 to $20,000 a year will be six-tenths of 1 percent worse off.

Unless they make over $20,000 they are going to be worse off, and that means half of the American people will be worse off under Kemp-Roth than they are right now.

The Senator from South Carolina has very wisely made sure that his tax cut will protect those people from inflation and protect them against the increased cost of social security. Why does this argument not penetrate? It is so simple. Talk about simple solutions we have been

listening to all these years. Here is one that really is simple.

The President said he was going to protect the truly needy. No one has ever said who the truly needy are. A man and his wife making $20,000 a year with a couple of children and with a $200 electric bill last month surely feels that he is truly needy. Try to tell the man who is making $30,000 a year and has two children to educate that he cannot get a student loan because he makes too much money.

Does the Senator from South Carolina know what is the take-home pay for a man with a wife and two children and an income of $30,000. It is about $18,000 a year. By the time he pays for his medical insurance, which admittedly is a cost of living, and by the time he pays his social security tax, his State income tax and his Federal income tax, he gets about $18,000 a year. If he is paying 20 percent of his income for housing, he is paying about $400 of his $1,500 a month for housing. So tell him how he is going to educate his children. He is going to tell you you are crazy.

A lot of people have called me and said give the President what he wants, and, as did the Senator from Delaware, I also cooperated with him. I voted for some budget cuts that I did not really want to vote for and did not believe in those budget cuts, but I swallowed hard in the interest of cooperation and voted for them.

I was always told as a parent that I should not give my children everything they want; it will really spoil them.

I do not think we are going to spoil the President, but I am also not convinced I should send my commonsense on vacation because we have a new President. So I am not going to do that.

Finally, does the Senator know who is not convinced about these figures? It is the people who play hard ball. It is the people who put their money where their minds are and not where their mouths are. Those are the fellows on Wall Street. If there is any crowd in this country that is unimpressed with the President's promise to balance the budget, it is the analysts on Wall Street.

Henry Kaufman, who is about as good a guru as one will find on Wall Street, is with Salomon Brothers, and he has said that there is not any way to balance the budget and there is not any way for interest rates to come down, given these kinds of tax expenditures. If we add to this $333 billion not just $100 billion increase over the next 3 years in defense spending but $100 billion over what President Carter had recommended and that was a colossal increase, that is $433 billion.

If Arthur Laffer could convince me that by cutting taxes by $333 billion, we are going to recoup $334 billion, then I would vote for Kemp-Roth. But in my opinion that is economic nonsense. It is not going to happen.

It does not please me to stand here and to take issue with the President, who still rides high in the popularity polls. But I fundamentally disagree on the economics of this particular joint resolution. It is wrong. It skews the benefits toward the very wealthiest and does nothing to protect those people in the lower income category, and it guarantees more deficit spending and, therefore, more inflation and higher interest rates.

I thank the Senator from South Carolina for proposing this amendment and allowing me to speak on it.

The PRESIDING OFFICER (Mr. MURKOWSKI). The Senator from South Carolina is recognized.

Mr. HOLLINGS. Mr. President, I thank the distinguished Senator from Arkansas. He brings the issue so cogently and forcefully to this body.

As he has emphasized, he is not enthralled with this particular amendment. The author himself is not enthralled with it. It is a realistic approach and it shows that when the Senator from Kansas, the chairman of our Finance Committee, would immediately characterize it as antipeople, when realistically we are trying to offer that alternative.

Take the Finance Committee. The Finance Committee provided for the marriage tax penalty. The Finance Committee provided for the investment tax credit. The Finance Committee provided for the depreciation allowance. The Finance Committee provided for the foreign earnings tax credit. The Finance Committee provided for the maximum tax schedule on investment income, reduced the tax rate to 20 percent on capital gains, and from 70 to 50 percent on investment income. The Finance Committee provided for all these things, including individual income tax cuts. When we phase them in in a deliberate, responsible economic way all of a sudden we become antipeople.

I think this goes to the heart of what the Senator from Delaware was trying to emphasize with respect to the confidence that they have and that will be lacking if some alternative is not passed whereby President Reagan can generally succeed. Why does he not accept this? Immediately his advisers are saying it is antipeople.

I really believe that the advisers have never understood or appreciated or the President himself, for example, the tax cuts that we have had.

If you live out on the political stump and away from Washington you get an anti-Washington bias, there is no question about it. As a former public servant at the State level, I will never forget at one time dealing with President Kennedy on the textile problem. We had submitted a paper, really which was what we called a white paper at that time, a plan that was adopted later by both the Northern and the Southern textile industries for an approach to getting an agreement with respect to one-price cotton, the quotas, and we were ready and prepared to announce this, and it was suggested that maybe some Congressmen and Senators would be called in.

In a casual way I said, "Oh, they really don't know too much about this."

It was later when I came to the National Congress that I learned that the Senator from Rhode Island, Senator Pastore, knew way more about it than I did, and that the Senator from Georgia, Senator Talmadge, knew way more about it than I did, and a lot of the others.

The service in the National Congress is an education, a continuing education. That is why we can speak with some sense of history and some experience because we were part and parcel of it.

Let me list these different tax reduction bills: The Tax Reform Act of 1969, the Revenue Act of 1971, the Tax Reduction Act of 1975, the Revenue Adjustment Act of 1975—you see there were two in 1975; the Tax Reform Act of 1976, the Tax Reduction and Simplification Act of 1977, and the Revenue Act of 1978.

Just look at the debate, Mr. President, on that Revenue Act when we were reducing capital gains from 49 to 28 percent, and if you read that record we were going to reindustrialize America; we were going to reindustrialize.

Here we are 3 years later, and we have not reindustrialized the automobile industry, which is going broke; the housing industry is going broke; the steel industry is asking for consideration; textiles, shoes, right on down the list, they are not reindustrialized.

But when you hear these arguments now that we are going to reindustrialize and we are going to all of a sudden rejuvenate the economy and there is going to be this tremendous growth rate, we say, "Well, we have heard that before."

Mr. President, I ask unanimous consent that a list of tax reductions from 1970 to 1980, both personal and corporate, be printed in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

TAX REDUCTIONS

[Billions of dollars, calendar year]

	Total	Personal	Corporate
1970	12.0	11.2	.8
1971	23.4	20.9	2.5
1972	22.3	17.1	5.2
1973	40.6	31.7	8.9
1974	44.3	32.5	11.8
1975	64.2	52.8	11.4
1976	70.2	55.6	14.6
1977	80.9	62.4	18.5
1978	97.9	76.2	21.7
1979	121.1	89.5	31.6
1980	154.7	122.8	31.9

Mr. HOLLINGS. The tax reductions are cumulative and are $731 billion.

We heard about governmental profligacy, waste, fraud, and abuse, and all of the cute little examples of the silly research projects, and all the single-issue groups which have been spawned and nurtured and have flourished on not having any defense, on having all this Government waste.

So coming to Washington I am convinced that this particular President did not realize that we have had all of those tax cuts and all of that tax reduction and all of that lost revenue. He proclaims to the joint Congress, "We don't want to have more of the same. We want to have something different." However, what we are getting is more of the same.

Equally, Mr. President, when we get to the matter of making money from inflation or losing money, I want to put in here the schedule of tax increases from inflation, the increased revenues of individuals of $35.6 billion, corporate $2.1

billion, social insurance $14.4 billion, and "other" $17.9 billion, for a total of $70 billion in increased revenues. That is right.

But then there are increased costs.

With respect to the matter of social security, national defense, medicare, medicaid, railroad retirement, food stamps, child nutrition, veterans' retirement, those expenditure increases as a result of inflation, are about $83.1 billion.

I ask unanimous consent to have printed the estimated effects of inflation in the fiscal year 1981 budget.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

Estimated effects of inflation in FY 1981 budget

(In billions of dollars)

Tax increases from inflation	70.0
Individual	35.6
Corporate	2.1
Social insurance	14.4
Other	17.9
Expenditure increases from inflation	83.1
National defense	16.3
Payments for individuals:	
Medicare	3.5
Medicaid	1.4
Social security	16.4
Supplemental security income	.9
Railroad retirement	.6
Civil service retirement	1.9
Black lung	.1
Unemployment compensation	1.5
Food stamps	.8
Child nutrition	.4
Veterans retirement	.5
Other	4.9
Other grants	4.6
Net interest	24.3
All other	5.0
Change in deficit	13.1

Mr. HOLLINGS. Well, Mr. President, then in a letter to my colleagues I have tried to analyze the body politic to show why at this particular time the economists say that it cannot work and why good business judgment says it cannot work, and why good commonsense says it cannot work, why any housewife who would look at this particular problem would analyze it immediately as inflationary. It is because over the years we have been running these high deficits to the tune of the last 10 years really, a surge in red ink, of over $400 billion.

In essence, we have become diabetic on Federal deficits and alcoholic on these tax cuts. Congress has not been lethargic, they have not been politically inattentive, they have not been unaware. They knew there was some money around, so when we would be working over on the Budget Committee the distinguished chairman of the Finance Committee, the chairman himself, would be working on the theory that it was a footrace. We were trying to get the budget into balance, and knowing they had this extra kitty or pile they were trying to cut taxes and, frankly, in that footrace the Finance Committee has been winning out.

So with all of that loss of revenue, yes, to the body politic, you can give a beer to a man suffering from malnutrition. I know many ill in hospitals over a month's period of time are encouraged to drink a beer to get back, to recover from weight loss. But give an alcoholic a beer and you have given him poison.

At this particular time an across-the-board tax cut amounts to economic poison, more of the same.

We need the vitamins, the minerals, the revenues at this particular point so that we can get this body upright again and then, once recovered, surely go on a diet, cut it back across the board. The very size of Government has become oppressive. But unless it is addressed in that particular fashion, Mr. President, it cannot work. Who said so? Mr. President, Otto Eckstein came before the committee, and where I referred to the quiet lockjaw of the business community and leadership in this country, there have been some economists and leaders who have spoken out.

Otto Eckstein said:

But on the President's schedule there will always be an increment of fiscal stimulus to boost nominal demand and that factor will make the inflation worse. On a net basis, one cannot escape the conclusion, if one believes in the relationships that have governed our economy in the past, that the net effect of the President's program on the President's schedule is to make the inflation rate worse.

And that is what we are reading every day in the morning headlines.

The answer to the problem is simple enough. The Congress must stretch out the tax cuts to a schedule that will take the stimulus out of the fiscal policy.

He speaks of budget deficits. I can go quickly, because I understand now that my colleagues want to terminate the debate and go to a vote.

Mr. Chimerine, the chief economist for Chase Econometrics said:

First, I do not believe that a full implementation of all the recommendations would lead to a reduction in inflation and acceleration of real economic activity to the degree forecast by the administration. Second, the budget is not likely to be balanced at any time during the next several years and extremely large deficits are very probable.

Finally, Mr. President—and I have many others—but due to the press of time, I will quote from Herbert Stein, the Chairman of the Council of Economic Advisers for both President Nixon and President Ford.

My judgment is that if we are to balance the budget by 1984, the amount of tax cuts cannot exceed the amounts by which nondefense expenditures are actually cut below the Carter budget.

Now this is what we are doing. We are exceeding it. There is no plan to take care of it. There is no alternative on the floor.

We sincerely present this one in the light of trying not to thwart, frustrate or eliminate President Reagan's economic recovery, but, on the contrary, to have it succeed.

Mr. President, I ask unanimous consent to have printed in the RECORD a "Dear Colleague" letter signed by me and dated July 20, 1981, and also an editorial form the Washington Post today entitled "Cutting Loose on Taxes."

There being no objection, the material was ordered to be printed in the RECORD, as follows:

COMMITTEE ON THE BUDGET,
Washington, D.C., July 20, 1981.

DEAR COLLEAGUE: When does a tax cut amount to a tax increase? When the system is so saturated with deficits and high inflation that another revenue loss means a bigger deficit, more inflation. This causes the racheting effect that puts people into higher tax brackets and brings millions on the tax-paying rolls for the first time. Taxes are not being increased by a new law. Taxes are being increased by a fiscal policy of deficit spending caused by tax cuts.

Ordinarily, a cool beer in this 95-degree heat would be refreshing. But give a beer to an alcoholic and you are giving him poison. A sweet to an ordinary individual is considered a dessert, but to a diabetic it is poison. The American body politic has grown fat. It suffers from the diabetes of deficit spending; it is drunk from tax cuts. Through the '50's and '60's, the body stayed relatively healthy. For the entire twenty-year period, there was only a $74.7 billion deficit. But for the last ten years, the cumulative deficit exceeds $400 billion. We had a balanced budget and surplus in Fiscal 1969, but there have been seven tax cuts since that time and a loss of revenue of $731 billion. These deficits have required government to be constantly in the financial markets borrowing money to pay for the deficit—thereby increasing inflation and increasing the rate of interest. While inflation will give the government a windfall of $70 billion in additional tax revenues this year, federal programs indexed for inflation and higher interest costs will cost the government $83.1 billion. Instead of becoming refreshed from the cool beer of inflation, we are getting drunker. It is actually costing us more money. We try to adjust programs for inflation, but we keep running bigger deficits. The Congress is caught up. More inflation, higher taxes, bigger deficits, more inflation, higher taxes, bigger deficits.

The only way to reduce taxes in this vicious cycle is first to reduce spending and the deficits. Tax revenue is to the body politic as food is to the human body. You can't cut it below the basic necessity level and expect to maintain your health. With deficits it has been cut below basic health needs for ten years and the first order of business is to stop the deficits. The tax bill before the Senate guarantees a $30 billion deficit in '82, a $60 billion deficit in '83 and a $60 billion deficit in '84. The body politic needs drying out for a couple of years before it takes another drink of across-the-board tax cuts. It needs now the vitamins and minerals necessary to stimulate productivity and savings. The Finance Committee's provisions on depreciation allowance, capital gains, overseas earnings, marriage tax penalty and a savings certificate will do just that, at a cost of $12 billion in 1982 rather than $40 billion. Then, beginning in January of 1983, a 10 percent individual income tax cut across-the-board targeted to those below the $50,000 income level can be provided. This phased-in approach will produce a $35 billion deficit in '82 and a balanced budget by 1984. President Reagan says adopt his program or submit an alternative. This is the only alternative presented that guarantees productivity, savings, a balanced budget, and lower interest rates.

Sincerely,

ERNEST F. HOLLINGS.

CUTTING LOOSE ON TAXES

Of all the congressional decisions being made in haste this historic July, none is likely to be more regretted in the leisure of future years than a decision to build automatic inflation-linked cuts into the income tax system. The Senate has already voted to adopt such provisions, and sentiment is building in the House for a similar measure.

Experience over the past several years has provided ample evidence of the dangers of building self-triggering inflation adjust-

ments into anything—social insurance programs, wage settlements or, specifically, tax systems. Some of the problems are technical—which index to use, for example. The Consumer Price Index is a useful statistical standard, but it was not designed to provide a measure of the actual cost-of-living for the purposes of any particular government policy. The CPI has been justly criticized for exaggerating the effect of inflation on Social Security and other indexed programs. Yet this is the index the Senate now proposes to use in adjusting tax brackets and other features of the system to keep inflation from increasing tax burdens.

Choosing the right index is just one of many technical difficulties. Mistakes made in 1972 when inflation adjustments were built into Social Security have added substantially to that program's financial troubles and are still not fully corrected. Yet indexing the Social Security system seems simple compared with the task of correctly adjusting all the dimensions of the tax system—and foreseeing all the consequences of these adjustments.

Still more serious is the loss of fiscal control that tax indexing entails. The notion that Congress has been fanning inflation to generate revenues for a spending spree is sheer nonsense. As Sen. Ernest Hollings pointed out on the opposite page last Sunday, inflation-driven increases in taxes have lagged well behind the corresponding increases in those parts of the budget that are explicitly or implicitly linked to the price level. Congress has shown itself fully capable over the last decades of legislating tax cuts sufficient to offset "bracket creep." What recent Congresses have not mustered the courage for is voting income tax increases when they are needed to cover unanticipated surges in government requirements.

Several states already have some inflation-proofing built into their income taxes, though not, typically, a full CPI adjustment. Colorado, where the economy has remained relatively strong, is enthusiastic. Other states, like Minnesota, however, have come to realize that there is no guarantee that the price of essential government services will move in lockstep with the CPI. The federal government, with its heavy commitment to defense, an expenditure that consistently outpaces the general price level and its large indexed social programs, is still more vulnerable. Suppose, for example, that an OPEC oil price rise jerks the CPI upward, pushes the cost of military obligations still higher and triggers a cut in taxes—all of this becoming apparent in the fall of the one out of two years with an election. What would happen? Further cuts in the non-indexed parts of the budget might be rushed through, but a bigger deficit is a much better bet.

Legislating a massive three-year tax cut in an economy as uncertain as the present one is folly enough. Sharply limiting the freedom of future Congresses to deal with whatever failures of current policy or unforeseen shifts may emerge is mid-summer madness.

Mr. DOLE. Mr. President, I thank the distinguished Senator from South Carolina. I know his proposal is presented in the utmost good faith. I am certain the Senator from South Carolina believes that he has a better plan.

The only problem is that we are supporting the President's plan and the President believes he has a better plan. But the Senator prefers his alternative to that reported by the Senate Finance Committee.

As I indicated earlier, the Senator from South Carolina, Senator HOLLINGS, and the Senator from New Mexico, Senator DOMENICI, have had an impact on the shape of the bill reported by the Senate Finance Committee. We did not do as much, or as little, I guess, depending on your point of view, as the Senator from South Carolina. He would pare back our bill, the cost of it, by eliminating provisions for a credit for royalty owners and to phase down the tax on new oil.

I think there is a lot of misunderstanding about royalty owners. Maybe in States where there is not too much production, there is an even greater misunderstanding. But I would only suggest that when we passed the windfall profit tax, few royalty owners in this country knew they were going to be involved, because President Carter always used to talk about big oil and the ripoff by big oil.

Naturally, somebody out there in the State of Kansas or the State of Louisiana or the State of Montana, or wherever, who was getting a little check for $100 or $200 a month, did not think the President was talking about them. Suddenly they were hit with a tax of about 36 percent.

The Senator from Kansas went to Oklahoma with the Senator from Oklahoma, Senator BOREN. We had a public hearing and about 1,800 people showed up. We asked in that audience that day how many were retired and how many were landowners and how many were royalty owners. We found, much to our surprise, that a great many in that audience were retired. They depended on these small royalty checks for their livelihood.

We also had hearings in Kansas. Senator BENTSEN had a hearing in Texas. I am certain there were hearings in other States that I may not be aware of.

We believe the royalty owner credit is a good provision. Because of the concern expressed by royalty owners, we did, as a part of the reconciliation bill last year—and I might add, with the support of President Carter and also candidate Reagan—provide for a $1,000 credit for royalty owners. We have increased that to $2,500, which means, in effect, that somebody with about a $7,500 royalty income, which is not big oil and a great deal of money, would not pay a tax. Above that, they would pay the normal windfall profit tax. So that may be one small part of it. There are only 2 million royalty owners in America. But, for the most part, we believe they deserve our consideration.

We have had debates on new oil. The provision in the Senate Finance Committee bill is a very modest one. It phases out the new oil rate from 30 percent to 15 percent over a period of 4 years, commencing in 1983. So it is not a big provision, not a very costly provision. We believe it provides some incentive for more production and that there would be a production response.

But, beyond that, as I understand the Senator's amendment, it provides rate cuts for only 1 year, as far as individuals are concerned, and that is in the amount of 10 percent in 1983. These would not be across-the-board rate cuts. So there are major differences between the Hollings proposal and the proposal that the Senate Finance Committee reported, a proposal also supported by the President.

Finally, I would say the debate for the most part has been helpful. This Senator cannot support this rather radical modification. It would take care of business taxes. We have taken care of lowering the rate from 70 to 50 percent of the unearned rate in the Senator's amendment. But somewhere along the line we forgot about the individual taxpayer who is being boosted into higher brackets right down the line.

As the Senator properly indicated, there have been several tax cuts since 1972. That has just kept most Americans up with inflation, although not all of them. It is our belief that the 5–10–10 proposal of the President is, in this case, a better proposal.

Now, history will judge whether or not the President was correct and those of us who supported his view were justified or whether the Senator from South Carolina and others who have spoken for his approach were correct.

But I believe we are on the right track. I doubt that this amendment will be adopted. That does not mean it does not have a great deal of merit. I just hope it does not have enough merit to be adopted.

I am happy to yield to the Senator from Louisiana.

The PRESIDING OFFICER. The Senator from Louisiana.

Mr. LONG. Will the Senator tell me what this amendment would do as far as an ordinary family is concerned—the salt of the Earth kind of family, where a man is the breadwinner for the family and the wife stays home and does the housework and looks after the children? Let us say for an ordinary family making anywhere from $15,000 to $25,000 a year, what would the significance of this amendment mean as far as that ordinary, middle-income family is concerned? How would they make out under the amendment of the Senator from South Carolina? What difference would it make as far as they are concerned?

Mr. DOLE. In the bill we have for individuals there is about $26.6 billion in revenue in 1981. In Senator HOLLINGS' package, the figures I have, as far as individuals are concerned, there would not be any tax relief, so it would not be very difficult to compute.

Mr. LONG. Mr. President, may I say to the Senator from Kansas. I recall how, after we passed the windfall profit tax. I went back to Louisiana and I did not have any complaints from the big oil companies; they all understood about it. But, as the Senator from Kansas himself has predicted. I had all kinds of problems explaining this matter to old people, widowed women, and goodness knows how many other small landowners, about the windfall profit tax on their little bit of oil royalty.

So much so, that I will say here that if the Senator from Louisiana had known how that windfall profit tax had affected these small royalty owners. I would certainly have tried to prevent the

problem from happening. I am not talking facetiously. I am talking about widows and the small royalty owners affected by the windfall profit tax bill. We did not have them in mind when we enacted that. I came back here anxiously seeking to find some way to find relief for those worthy people, the small landowners, farmers or aged people, widows who had children to support.

As much as I was distressed about that, I know I would be even more distressed if this Senator went back to Louisiana and talked about the biggest tax cut in history for which I had voted and found that we left out all the middle-income people, these families making $15,000, $20,000, or $25,000, a man, his wife and two children.

The Senator might be able to go somewhere and explain to those people that this was a productivity bill and there was no place in it for them. I think it would be hard to explain. I would hate to have the job of going to a union hall and explain to the union members that we thought it was a good job to cut the taxes for those who are doing well from 70 percent to 50 percent that we thought it was good to cut the taxes for corporations, giving them enormous savings. But someone would ask, "What about me? Why did you leave me out?"

How does the Senator feel the average labor union member would feel about it when you explained, "We thought it better that you not get the tax cut."

I would hate to have to explain the consequences of an amendment that would leave out middle America.

I say to the Senator from Kansas that the Senator from Louisiana has had the privilege of managing a big tax cut bill on occasion, but I cannot recall when we left out the working man and woman, when we cut the taxes for big business and wealthy people. I say it would be very difficult to explain and I would not want to explain it to the rank and file of people.

A rich man might go along with that, but I say it would be difficult for the ordinary working man, who gets out and earns his money by the sweat of his brow, to understand why we kept him out and provided the tax cut for the corporations and wealthy people.

Can the Senator answer as to how he could explain how that would be a good idea?

Mr. DOLE. I cannot answer that. I only have 5 years left in my term. It would take nearly all of my time to explain that, particularly not to just the middle-income taxpayer but all taxpayers in the first year.

I understand the motive of the Senator from South Carolina in balancing the budget. I do not disagree with that. That is why the Senator from South Carolina knows we tried to hold down the first year and did it rather successfully.

It just seems to me that the Senator from South Carolina and those who support this proposal would be in a better position if they would provide more tax relief to the taxpayers. Big business is going to make out all right. They have a lot of lobbyists in the other room. I do not care to walk out in that direction They are going to be all right, but there is nobody here lobbying for the taxpayers except me, I guess, and the Senator from Louisiana.

Mr. LONG. How are we on Capitol Hill to react if the President should veto the bill, sending it back to us? He could say he would object that we did not do anything for middle America. How are we supposed to react to that?

Mr. DOLE. It would be pretty hard to figure that out. I would have to work on that for a while, particularly something like this. But I think we can successfully defeat this effort.

Again, I do not denigrate the effort. I think it is based on the conviction of the Senator from South Carolina that unless we cut the amount of revenue loss we will be in great difficulty. That is his view and the view of many who have spoken.

Many who have spoken are running around with little special-interest amendments they want me to take. I do not know how we can take care of all those people and not the taxpayers. What about the taxpayers, the people who are working for wages? I have not seen them running around saying "Take care of these taxpayers." They want to cut them out in 1982 and make room for more special amendments.

That is not the view of the Senator from South Carolina. Do not misunderstand me.

I have listened to some stand up with these great speeches about the taxpayer. I am reminded of what they have been telling me about their little amendments, to take care of this, to shelter this or shelter that. It is difficult to understand.

Mr. LONG. Will the Senator yield further?

Mr. DOLE. Yes, I am happy to yield.

Mr. LONG. I can understand how the Senator from South Carolina can make an attack on the people in the oil business. It sounds good, I am sure, to a lot of people in South Carolina. But Louisiana has a lot of people who produce oil and gas. The Senator from Louisiana has no apologies to make. He voted for what he thought was the prevailing view in the State of Louisiana. He did vote to give the oil and gas producers a reduction in the windfall profit tax.

Having done that, can the Senator explain to me how those of us who voted to give the oil and gas fraternity a break in this tax can go back and say, "Yes, we did help the oil and gas people get more of a tax break than proposed by the committee and we also voted to take out of here what there was to give a break to the middle-income people."

Mr. DOLE. I can give the Senator an answer but maybe not an explanation. I have not had this job very long and I understand there are only 90 amendments left. We just counted them. If they are all like this one, we will be all right, because this will be defeated. But there may be one or two which will creep through.

Possibly this amendment would save a lot of money. If we adopted this, we could take the other 90 and that would shorten the time. Instead of voting next Tuesday on this bill maybe we could vote on it tonight.

I was here when Senator BIDEN was speaking. I cannot recall what he said, but it was fairly partisan. I cannot believe that coming from Senator BIDEN, but it had sort of a partisan overtone, indicating how this country has gone to the dogs in just 6 months with Reagan in the White House. That is pretty fast. There are a lot of people in this country. To pull them all down that quickly I think may be a tribute to the President.

I do not know where Senator BIDEN was the past 4 years. I would just say that I cannot recall in history a previous time when a President has come to this town and said to the Congress, "You have to cut spending."

Some of us have voted for that policy, including the Senator from South Carolina, I might add.

The President also says, "We have to cut taxes. People are paying too much taxes."

If that is bad policy, to cut Federal spending, cut taxes, cut regulations, and try to do something with the economy to bring down inflation, then the President is on the wrong track. But I have to believe that the American people by and large support the President. They know he cannot turn this economy around overnight. But they know he could do it a lot quicker if we could get on with our business and pass this tax reduction legislation and pass the spending reductions and get out of here in August.

The best news for the taxpayers that I can think of would be to approve the tax reduction, pass the spending reduction, and not meet during the month of August. If Congress was not here for 30 days, that would be good news for the American taxpayer. When we are not here, we cannot do anything except make speeches and they do not cost as much as some of the other things we do.

I salute the Senator from South Carolina, but I want to share the views expressed by my distinguished friend from Louisiana. I am not ashamed to stand up here and represent the people of my State. Some of them are in the oil business. If it were up to the Senators from South Carolina and Connecticut, we might freeze, but we would put the oil industry out of business. "Throw me down a blanket. It is getting cold in here."

That might be all right, to go after the oil industry, particularly the small producers, the independents, the little royalty owners.

Maybe we have not looked at timber enough in this bill. Maybe there ought to be a windfall profit tax on timber or minerals.

By and large, we are moving ahead. I do not want to delay and clutter up the debate with facts. I am prepared to vote.

Mr. HOLLINGS. Mr. President, I am also prepared to vote. I wish we did have time to hear the Senator from Louisiana and the Senator from Kansas describe their handiwork. We took it from the Finance Committee. I am sure it is copied very carefully. When we take care of the marriage penalty, overseas earnings all-savers certificates, the very same depre-

ciation allowance, the same investment credit, then they say we cut out the individuals to take care of special interests.

Now we have the principal portion of the incentive—they describe it as incentive—but when it appears in my bill it is special interests. They say we just gave it to the wealthy people. All of a sudden it is just wealthy people and special interests, but only when it appears in the amendment of the Senator from South Carolina.

It is remarkable to hear them palaver along about the ordinary family, the salt-of-the-earth family, the wife that stays home and looks after the children. What would we tell them? We would tell them to stop picking their pockets with inflation and deficit financing; we are going to get the Government in the black; we are going to pay the bills like the ordinary family, the salt of the earth.

We are going to do like you, ordinary family. That is what this amendment is intended to do.

They have heard all that other political talk with all those other tax bills, about the little people. The little people are tired of being taken care of. They are being taken to the cleaner. This is an approach that even that ordinary family can understand and they are willing to forgo.

You can take any poll of the ordinary family. The wealthy, it is said, we got the wealthy in here. I thought I left out the wealthy when I left out the windfall profit tax provisions.

That was intentional, to leave out the wealthy. I thought when we got married couples, it meant just that: ordinary married couples that needed to work.

Mr. DOLE. Mr. President, I think we have had enough good debate on this amendment. Whatever happens, maybe it can be offered again next year, if it does not succeed this year. If it succeeds, I shall offer the President's proposal next year.

Again, Mr. President, I want to make certain that the record reflects my respect for the Senator from South Carolina. We have a different view on this proposal. I know that both the Senator and the Senator from New Mexico (Mr. DOMENICI) have been cautioning us as leading members of the Budget Committee that more or less controls whatever else the rest of us do. I mean sincerely that it has had an impact on some of the things we have not done.

That is why we kept that royalty credit small; that is why we did not do much in other areas that may be more than some would like. But there are a number of good provisions in the Senator's proposal. Reducing that top rate from 70 to 50 percent, I think, is good. The so-called marriage penalty reduction is good. That was done in our bill. There are a number of other areas that I think we see pretty much alike on.

I think the one big difference is that we would not make the average taxpayer wait a year for a little relief. I think it is going to be difficult to explain why you are going to give business a pretty substantial cut and not the working people. On that basis, I hope the amendment will be defeated.

Mr. LONG. Mr. President, the Senator from South Carolina says that he would keep the part the committee recommended with regard to the marriage penalty. That would help with regard to middle-income families, where both the husband and wife are working, or upper-income families where both the husband and wife are working. But his amendment would strike out of the bill the provisions for all these other married couples where only one of the two is working and earning income for the family. They would get no relief.

Mr. President, I have supported this bill and I shall vote for it. I have supported other bills that did a great deal for business. I suspect this bill will do as much to help big business and business in general as any bill that has ever passed in the U.S. Senate or through the Congress. But I would be embarrassed, Mr. President, to go back and report that even though the Republican Party and a Republican President strongly recommended that we do something for middle America, I participated with a group that proceeded to strike from the bill that which would benefit the rank-and-file working people in this country.

Some have contended that they do not receive enough benefit, they do not get enough of a break out of this bill. I would hate to think, Mr. President, if Senators feel that way, that they would proceed to strike out of this bill what the working people would get. I think this is a good bill, a well-balanced bill. It will benefit the economy, and I hope it will benefit every taxpayer. I hope the amendment will not carry. I think the many people of middle America are disadvantaged by this.

Mr. HOLLINGS. Mr. President, what we give middle America is what we give all America. That is low-interest rates under this amendment.

● Mr. LEVIN. Mr. President, I support the amendment offered by Senator HOLLINGS. This amendment is fiscally responsible. It recognizes the fiscal limits before us and the pressing need to reduce interest rates.

If the Senate adopts the individual rate cuts approved by the Finance Committee, we embark on an economic journey in a boat without rudder. Unproven theories underlie the tremendous cut in taxes that will occur under the Finance Committee bill. I believe they will result in more budget cuts, deeper than those already enacted.

Most importantly, this amendment recognizes the devastating impact of interest rates on the economy. We can expect $60 billion in the 1984 deficit if we do not adopt this amendment. We cannot possibly expect a drop in interest rates if the Federal Government continues to run up deficits of that magnitude. Economic recovery will continue to be elusive, housing construction and auto production will continue to fall prey to tight monetary policy.

I urge my colleagues to support this amendment. It is fiscally responsible and just the tonic for interest rates.●

Mr. METZENBAUM. Vote!

The PRESIDING OFFICER. The question is on agreeing to the amendment. The yeas and nays have been ordered. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. BAKER. I announce that the Senator from Maryland (Mr. MATHIAS) and the Senator from Alaska (Mr. STEVENS) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Texas (Mr. BENTSEN) is necessarily absent.

I further announce that if present and voting, the Senator from Texas (Mr. BENTSEN) would vote "nay."

The PRESIDING OFFICER (Mr. HAYAKAWA). Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 26, nays 71, as follows:

[Rollcall Vote No. 211 Leg.]

YEAS—26

Biden	Ford	Levin
Bradley	Glenn	Matsunaga
Bumpers	Hart	Metzenbaum
Byrd, Robert C.	Hollings	Nunn
Chiles	Huddleston	Pell
Cranston	Inouye	Randolph
Dodd	Jackson	Tsongas
Eagleton	Kennedy	Williams
Exon	Leahy	

NAYS—71

Abdnor	Goldwater	Nickles
Andrews	Gorton	Packwood
Armstrong	Grassley	Percy
Baker	Hatch	Pressler
Baucus	Hatfield	Proxmire
Boren	Hawkins	Pryor
Boschwitz	Hayakawa	Quayle
Burdick	Heflin	Riegle
Byrd, Harry F., Jr.	Heinz	Roth
	Helms	Rudman
Cannon	Humphrey	Sarbanes
Chafee	Jepsen	Sasser
Cochran	Johnston	Schmitt
Cohen	Kassebaum	Simpson
D'Amato	Kasten	Specter
Danforth	Laxalt	Stafford
DeConcini	Long	Stennis
Denton	Lugar	Symms
Dixon	Mattingly	Thurmond
Dole	McClure	Tower
Domenici	Melcher	Wallop
Durenberger	Mitchell	Warner
East	Moynihan	Weicker
Garn	Murkowski	Zorinsky

NOT VOTING—3

Bentsen	Mathias	Stevens

So the amendment of the Senator from South Carolina (UP 259) was rejected.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. DOMENICI. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HARRY F. BYRD, JR. Mr. President, I wish to send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. I wish to remind the Senator from Virginia that amendment No. 509 and amendment No. 510 are the pending questions. It will take unanimous consent to take up another amendment on top of that.

Mr. DOLE. Mr. President, what is the pending business?

The PRESIDING OFFICER. The pending question is Senator DOLE's amendment No. 509.

Mr. DOLE. Mr. President, I ask unanimous consent that it be temporarily laid

aside so we may take up a technical amendment which I think has been cleared on both sides. The distinguished Senator from Virginia has cleared it with Senator LONG, myself, and Senator METZENBAUM. There is no revenue loss.

The PRESIDING OFFICER. Is there objection?

Mr. KENNEDY. I object.

The PRESIDING OFFICER. Objection is heard.

Mr. KENNEDY. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. HAYAKAWA). Without objection, it is so ordered.

Mr. DOLE. Mr. President, the pending business is the Dole amendment?

The PRESIDING OFFICER. Is the Dole amendment No. 509?

Mr. DOLE. Mr. President, may we have order?

The PRESIDING OFFICER. The Senate will be in order.

Following that is amendment No. 510.

Mr. DOLE. Mr. President, there is a technical amendment I think we can dispose of, and on that basis I ask unanimous consent that we temporarily lay aside the pending amendment and permit Senator BYRD of Virginia to bring up his amendment which has been cleared by both sides and the "special administrator" Senator METZENBAUM.

The PRESIDING OFFICER. Without objection, it is so ordered .

UP AMENDMENT NO. 260

(Purpose: To permit successive income beneficiaries in a qualified Subchapter S trust)

Mr. HARRY F. BYRD, JR. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Virginia (Mr. HARRY F. BYRD, Jr.) proposes an unprinted amendment numbered 260.

Mr. HARRY F. BYRD, JR. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 147, line 25, strike the word "and".

On page 148, before line 1, insert the following new subsection:

"(ii) separately with respect to each successive income beneficiary of the trust, and".

On page 148, line 1, renumber subsection (ii) to be subsection (iii).

On page 148, beginning with line 14, strike through page 149, line 4, and insert the following in lieu thereof:

"(B) all of the income of which is distributed currently to one individual who is a citizen or resident of the United States, and

"(C) the terms of which require that—

"(i) at any time, there shall be only one income beneficiary of the trust,

"(ii) any corpus distributed during the term of the trust may be distributed only to the current income beneficiary thereof,

"(iii) each income interest in the trust shall terminate on the earlier of the death of the income beneficiary or the termination of the trust, and

"(iv) upon the termination of an income interest in the trust during the life of an income beneficiary, the trust shall distribute all of its assets to such income beneficiary."

On page 149, line 5, strike the words "(4) Special Rules. —"

On page 149, line 6, renumber subparagraph (A) to be paragraph (4).

On page 149, beginning with line 12, strike through page 149, line 17.

Mr. HARRY F. BYRD, JR. Mr. President, so far as I know there is no opposition to this amendment. It is a technical amendment.

Currently, only in very limited circumstances can a trust hold subchapter S stock without terminating the corporation's subchapter S status.

These requirements are unduly restrictive in view of the fact that trusts may hold other corporate stock or a partnership interest. And, a partnership is very similar, for tax purposes, to a subchapter S corporation.

The Finance Committee recognized this problem and agreed that certain simple trusts should be permitted to hold subchapter S stock.

In attempting to convert the Finance Committee decision into specific statutory language, the language did not cover the full intent of the committee. This amendment would better implement the objective of permitting simple trusts to qualify. To qualify for subchapter S status, a trust can have only one beneficiary at a time, but could have a succeeding beneficiary or beneficiaries, following the death of the earlier one or ones. It would require, too, that where there is a succeeding beneficiary each successive beneficiary would be required to make the election specified in the committee bill.

The amendment permits a trust which, in fact, distributes income currently to a single income beneficiary to be qualified to hold subchapter S stock, even if it was not technically a simple trust.

The amendment and the decisions of the Senate Finance Committee are intended to facilitate trust ownership of subchapter S stock and provide more flexibility in the use of the stock.

In this regard, a trust which qualified for a current income beneficiary would not lose its qualification, as to the current income beneficiary, if, for subsequent beneficiaries, it ceases to qualify. In dealing with trusts which terminate at the death of the beneficiary, it is not intended that the subchapter S qualification will be defeated by the temporary continuation of the trust during the time reasonably necessary to complete the distribution of the trust assets.

This amendment does not change the basic subchapter S rules.

The Department of the Treasury does not oppose the amendment and the amendment was developed in close consultation with the Department of the Treasury.

There is negligible revenue loss associated with the amendment.

I have discussed this with the Senator from Ohio (Mr. METZENBAUM) and he has no objection.

Mr. KENNEDY. Mr. President, if the Senator will yield for a question——

Mr. HARRY F. BYRD, JR. Yes, I yield.

Mr. KENNEDY. Do I understand correctly that there is no revenue loss?

Mr. HARRY F. BYRD, JR. It is described as being negligible, minimal.

Mr. KENNEDY. Negligible? Is there any approximation of what it is?

Mr. HARRY F. BYRD, JR. Less than $5 million.

Mr. KENNEDY. I see.

Are there any particular individuals who would benefit, or is it just a general purpose——

Mr. HARRY F. BYRD, JR. It is general purpose.

Mr. KENNEDY. I thank the Senator.

Mr. DOLE. Mr. President, I might say, in response to the question of the Senator from Massachusetts, the Joint Tax Committee advises me it is too small to estimate the loss, so it is negligible.

We are prepared to accept the amendment. I think the distinguished Senator from Louisiana is willing to accept the amendment.

Mr. HARRY F. BYRD, JR. I move the adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Virginia (putting the question).

Mr. HARRY F. BYRD, JR.'s amendment (UP No. 260) was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. HARRY F. BYRD, JR. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER addressed the Chair.

The PRESIDING OFFICER. The Senator from Tennessee.

Mr. BAKER. Mr. President, will the distinguished manager of the bill permit me to make a brief statement at this point?

Mr. DOLE. Yes, I will yield to the majority leader.

Mr. BAKER. Mr. President, during much of the day today there has been an effort to negotiate arrangements for the final disposition of the measure before the Senate. I think we are very close to a time when I can propound a unanimous-consent request. We are not quite there yet. We are going over final details.

I wish to advise Senators that we are preparing to do that and hope to be able to make such a request within the next 10 minutes or so.

Mr. President, for the moment, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

UNANIMOUS-CONSENT AGREEMENT

Mr. BAKER. Mr. President, if I may have the attention of the Senators. I intend in a moment to offer a unanimous-consent request that has been worked

out by many Senators, and it will provide for final disposition of this measure. I ask Senators to give me their attention while I propound this request.

Before I do so, Mr. President, let me say that if this request is granted, two things will occur that the Senate should be aware of as it considers the request.

The first is that the pending amendment by the distinguished Senator from Kansas and the second-degree amendment to it by the distinguished Senator from New Mexico will be withdrawn, assuming that the unanimous-consent request is granted.

Mr. STENNIS. Mr. President, will the Chair maintain order? This is a serious and grave matter, and we cannot hear.

The PRESIDING OFFICER. The Senate will be in order.

Mr. BAKER. Mr. President, I repeat: If the request I am about to make is granted, it is my understanding that the Senator from Kansas will ask unanimous consent to withdraw his underlying first-degree amendment, which will take with it the second-degree amendment of the Senator from New Mexico. Since the request I am about to make provides for a time certain for reaching third reading of this measure, I will propose, after the granting of this request, to vitiate the order for the Senate to convene on Saturday.

With those two matters, I should like to make this request:

Mr. President. I ask unanimous consent that the following time limitations be ordered with respect to certain amendments to the committee amendment on House Joint Resolution 266: 30 minutes on each amendment, equally divided, to be controlled as to time in the usual form, except for those amendments contained in the attached list, consisting of 92 amendments.

I may say, parenthetically, that on that list are a number of amendments on which there are 1-hour limitations, equally divided; 30-minute limitations, equally divided; and in some cases, notations that no time is requested at all or no rollcall will be required.

I further ask unanimous consent that a time limitation of 6 hours be imposed on the bill, that this agreement be in the usual form as to the division of time.

Parenthetically, once more, the 6 hours will be under the control, under this formulation, of the distinguished chairman of the committee and the distinguished ranking minority member. They would have 3 hours each. They could yield time on any other amendment from the bill, by this provision. They will have the time under their control for whatever purpose they wish.

I further ask unanimous consent that these first-degree amendments which are listed and the committee substitute as amended be the only amendments in order on this bill; that following the disposition thereof, the bill be taken through the stage of third reading, with third reading to occur no later than 4 p.m. on Wednesday, July 29, 1981, to the exclusion of further debate, but not to the consideration of these amendments; that no further debate, point of order, or appeal in regard to the joint resolution be in order thereafter; that the joint resolution then be returned to the calendar, and that no motion in respect thereto be in order except for a nondebatable motion to proceed to its consideration.

Mr. President, before the Chair puts the request, let me say that the net effect of this is as follows:

First, we will now know what amendments are to be dealt with to the exclusion of every other amendment.

Second, there will be no second-degree amendments, only first-degree amendments, as shown on the list attached to the request, which I will supply to the clerk.

Third, time limitations will be imposed according to the list, and in the absence of a notation on the list, a time limitation of 30 minutes, to be equally divided, shall apply.

Next, that we will reach third reading on this joint resolution not later than 4 p.m. on Wednesday, July 29; that at that time, if we have not disposed of the amendments which are listed under this formulation, Senators will be entitled to call up those amendments for votes, notwithstanding the 4 p.m. time, as has been the case and the practice of the Senate in previous situations.

Mr. President, it also means that we would not proceed to final passage of this joint resolution but, rather, to third reading. It is fully anticipated that if we do this and if the House acts as I expect it to and sends us a House-passed measure, we will meet that bill in the usual form and move to amend or accept that bill, as the Senate has done previously under the rules, and perhaps ask for a conference and appoint conferees.

Mr. LONG. Mr. President, reserving the right to object, does the Senator have my name on the list? I have an amendment at the desk. Am I included in the list?

Mr. BAKER. That is off to a bad start, Mr. President, because I have the Democratic list here, and I do not observe the name of the distinguished Senator from Louisiana.

Mr. LONG. Please add my name. I have an amendment at the desk. It is about depreciation. It is an amendment relating to expense and depreciation. It is at the desk.

Mr. BAKER. I add that to the list, Mr. President.

Mr. KENNEDY. Mr. President, reserving the right to object, as I understand it, the Dole and Domenici amendments would be withdrawn. Second, that no further amendments would be offered to reduce the windfall profit tax, and no further amendments would be offered providing any other tax relief for the oil industry; that none of the other amendments on the list deals with proposed lower taxes for oil; or, if they do, then the amendments would be out of order.

Mr. DOLE. That is with the understanding—before I agree to any unanimous-consent request—that we change the effective date on the action taken by the Finance Committee to make it effective in 1982 and phase down the tax on new oil from 25 to 15 percent in 1984.

Mr. KENNEDY. With that exception, it is my understanding.

Mr. DOLE. That is my understanding, unless somebody misspelled "oil" in the lists.

Mr. KENNEDY. It comes in various forms and shapes.

May I have confirmation from the leader? Is my understanding correct?

Mr. BAKER. Yes. That is my understanding.

Mr. DOLE. There is an excise tax to be offered by the other side.

Mr. KENNEDY. That will raise taxes. I have no objection.

Mr. HEINZ. Mr. President, reserving the right to object.

The PRESIDING OFFICER. The Senator from Louisiana.

Mr. JOHNSTON. Mr. President, reserving the right to object, the pending business prior to going to the tax joint resolution was the Department of Justice authorization bill. There was pending to that the so-called Johnston-Helms amendment and a cloture motion had been filed on that.

As I understand it, under the rules of the Senate, a vote will occur automatically or should I say the call for the live quorum will occur automatically upon the disposition of the tax joint resolution and that would follow immediately.

I ask the majority leader under this unanimous consent request at what point will he proceed to the live quorum and the vote on the cloture motion?

Mr. BAKER. Mr. President, I have to confess to my friend from Louisiana I have not focused on that. I assume that we will reach the Department of Justice authorization bill sometime shortly after we dispose of this measure.

I point out to my friend from Louisiana, however, that we are going to third reading and I assume as well that the House of Representatives will send us a bill which will complete action. After that, there is no doubt that absent unanimous consent we will proceed again to DOJ and his cloture motion will be eligible.

I do not want to mislead the Senator. By going to third reading, if the House of Representatives for some reason does not send us the bill and we take up this joint resolution once more from the calendar and act on it, we will not have completed action on it.

Mr. JOHNSTON. As I understand it, under the present situation, once we dispose of the tax joint resolution, then we go immediately back to the cloture vote.

Mr. BAKER. Yes, that is my understanding also.

Mr. JOHNSTON. What happens under the unanimous-consent? We go to third reading and then do we immediately at that point go into the 6 hours of debate, or just what do we do?

Mr. BAKER. The 6 hours is on the joint resolution itself and it would be in advance of the time for third reading. At the time we reach third reading we will vote on any amendment that is then pending, or any amendments that have not been disposed of, and then the joint resolution will automatically go to the calendar under the formulation and remain there until it is motioned up on a

nondebatable motion as provided for in this request.

Mr. JOHNSTON. Under the assumption, and I ask the Parliamentarian, under the present rules immediately when we lay the tax joint resolution aside we would go to that cloture vote. Can I then assume or if I cannot assume will the majority leader ask as part of the unanimous-consent request that we go to that cloture vote immediately upon laying aside this joint resolution?

Mr. BAKER. Mr. President, I am not trying to pull any fast and fancy footwork on this. I really do not think that is necessary. I think that when we reach third reading on this joint resolution on Wednesday, the 29th, there is a good likelihood that that day or the day following the House of Representatives will send us a message embodying their tax bill and that we will immediately motion up the Senate-passed joint resolution for final passage, probably to strike all after the enacting clause of the House-passed bill and insert the Senate language, request a conference, and appoint conferees.

That is my expectation. At that point, it seems to me that there will be no doubt that the DOJ authorization bill will recur and that the vote on cloture which was postponed by the generous consent of the Senator from Louisiana will proceed.

I really have not had a chance to think that through beyond what I just described. But I suggest to the Senator from Louisiana that I do not know of anything else that would interfere.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield?

Mr. BAKER. Let me yield to the distinquished minority leader, if I may.

Mr. ROBERT C. BYRD. May I suggest to the distinguished majority leader to put a request that will allow for the interruption in the event that there is cloture invoked, put a request that will allow for the interruption of further action under cloture until such time as time or action is taken on this joint resolution or the House bill, as amended, not including conference reports.

Mr. BAKER. The minority leader defines what I am concerned about. I do not want to get into the cloture proceedings and get cloture and be locked out of the final passage on the tax joint resolution.

Mr. JOHNSTON. I obviously do not want that result. I may tell the majority leader the result that I want is a vote at a time when everyone is here and not after everyone has gone home and with a pro forma session of the Senate.

Mr. BAKER. Mr. President, let me put this inquiry to the Chair.

Mr. President, assuming that this request is granted and we proceed to third reading and the joint resolution goes to the calendar as provided in the request, what would then be the pending business before the Senate?

The PRESIDING OFFICER (Mr. LAXALT). That would not be final disposition of the tax joint resolution.

Mr. BAKER. Yes. And final disposition would not occur then until final passage of the tax joint resolution; is that correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. BAKER. Do I understand, then, it is the request of the Senator from Louisiana that we alter the regular order and provide that after we have third reading that we proceed to the DOJ bill?

Mr. JOHNSTON. That is correct, with the condition it be laid aside at any time to come back to the tax joint resolution.

Mr. BAKER. Let me make a counterproposal. That request that was granted earlier with the consent of the Senator from Louisiana and all Senators embraced not only the tax joint resolution but the reconciliation conference report and the tax bill conference report.

If I were to make that request at this time, would the Senator from Louisiana have any objection to me providing that DOJ could be laid aside again on my motion after consulting with the minority leader, without debate, that it can be laid aside at any time at my request after consulting with the minority leader either for the purpose of proceeding to final consideration of the tax joint resolution, the conference report on the tax bill, or the conference report on the reconciliation bill?

Mr. JOHNSTON. I would be perfectly willing, I tell the majority leader, to do that. I ask only that he allow the vote to occur, the vote on cloture, immediately after third reading, which would insure a vote when everyone is here. Then if he wants to lay it aside that is perfectly agreeable.

Mr. MATSUNAGA. Mr. President, reserving the right to object.

Mr. BAKER. Yes.

Mr. MATSUNAGA. May I propound this question to the majority leader?

Of course, according to my calculations here of 92 amendments on the average of 30 minutes each, that would be 2,760 minutes, and then we have at least rollcall votes on 45 of them. That means 245 minutes added. And then we have some with 40 minutes and an hour. Add it up, and it is up to a minimum of 60 hours.

If we were to work 10 hours a day we have 5 days remaining. We will not make it at 4 p.m. Wednesday.

Mr. BAKER. Mr. President, the Senator from Hawaii is, of course, correct and underlying the request is the implication and suggestion that if we are going to finish and still have time to debate these amendments, some of these amendments are going to have to be withdrawn and not offered.

It is my personal estimate that a great number of the 92 amendments will never see the light of day. They will not be called up and offered.

I obviously cannot say how many, but I know of several that will not be offered.

I expect there will be a great number that will not be called up as we proceed with debate on this joint resolution.

Mr. MATSUNAGA. Mr. President, further reserving the right to object, assume that there are still amendments pending at 4 p.m. on Wednesday with time allotted, 30 minutes or 40 minutes. What happens then?

Mr. BAKER. Mr. President, I reply to my friend from Hawaii that at that time under the form of unanimous-consent request that I have now put we would proceed to vote on all the remaining amendments but without any further debate.

Mr. MATSUNAGA. Despite the fact that we will have an allotted time by this unanimous-consent request?

Mr. BAKER. Yes. That will be correct because otherwise the alternative formulation would be to have a time certain to vote and not provide for any disposition of the amendments, which seems to be an undesirable way to treat it. So I assure the Senator from Hawaii that I will make every effort not only to eliminate amendments that may be offered but to reduce time as well.

I think our prospects are good on both counts. I believe this will work. It certainly will mean that we will have to be in late this evening and other evenings, Monday, and Tuesday, in order to reach third reading with remaining time for debate, but I think it is doable. This has been the subject of conversation and negotiation between literally dozens of Senators during the course of this day, and I think all of us recognize, as does the distinguished Senator from Hawaii, that mathematically and theoretically we are building a trap for ourselves, but I do not believe we are and I think it will work as a practical matter.

Mr. LONG. Mr. President, will the Senator yield at that point?

Mr. MATSUNAGA. I take it that the chairman of the committee will have the power of determining which amendments come first.

Mr. BAKER. Let me say to the Senator from Hawaii that the original draft of this request tried to sequence a number of amendments and then difficulties developed in that respect.

We did not attempt to sequence amendments in this unanimous-consent request. But it is my full intention and, I am sure, the intention of the distinguished managers of the bill and the minority leader to try to accommodate the convenience of Members on both sides by arranging a sequence of amendments to be considered from time to time.

I hope we can always have a backlog of a half-dozen amendments that we know in advance would be dealt with next. So in answer to the Senator from Hawaii I expect that will be taken care of as we reach that point and deal with the bill in an orderely way.

Mr. MATSUNAGA. I withdraw my reservation.

Mr. HEINZ. Mr. President, reserving the right to object, would my understanding be correct that all the amendments on this list, the 92-odd amendments, would be considered germane, and that none of them would be considered vulnerable to a point of order; is that correct?

Mr. DOLE. So far as this Senator is concerned, if they are on the list——

Mr. ROBERT C. BYRD. There is no rule of germaneness invoked.

Mr. BAKER. I do not think that is a problem.

I think only the amendments on the list would be in order. But absent cloture or an agreement that provided for only germane amendments, we would not

have to face that dilemma, and I am not now requesting a germaneness provision.

That was discussed in the several conferences and was not included in this agreement and, perhaps, for the reason implied by the Senator from Pennsylvania.

Mr. HEINZ. I thank the Senator.

Mr. BAKER. Mr. President, let me put another inquiry to the Chair, if I may. We have two conference reports that I trust we will deal with before very long, the reconciliation conference report and presumably a tax bill conference report. The tax bill conference report is self-explanatory. But in the event we receive from the conference a conference report on reconciliation, is my understanding correct that it is a privileged matter and could displace the tax bill for consideration by the Senate at any time?

The PRESIDING OFFICER. The Senator is correct.

Mr. BAKER. Nothing in this proposed request would abrogate any aspect of the privileged character of that conference report?

The PRESIDING OFFICER. That is correct.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield?

Mr. BAKER. Yes.

Mr. ROBERT C. BYRD. It would only temporarily displace the tax bill.

Mr. BAKER. Yes.

The PRESIDING OFFICER. The Senator is correct.

Mr. BAKER. Now, Mr. President, let me say to the distinguished Senator from Louisiana that one of the many blessings of electronic legislation is that people listen when they are in their offices and away from the floor.

Since we began this colloquy I have had at least one Senator and, perhaps, others by now, who have indicated they would not be willing to agree to a consent order that we proceed to the consideration of DOJ after third reading and final disposition.

Let me urge the Senator from Louisiana, however, to consider not objecting to this request, and I will reiterate the assurance I gave him before, and that is after we do the tax bill and the reconciliation conference report or between those two, if there is time available for that, DOJ will recur, and I will make my best efforts to see that it does recur. But to change this agreement at this time to say it will recur after third reading, before final passage, at least would be objected to by at least one Senator, and I would not be prepared to agree to it at this time.

Mr. JOHNSTON. Mr. President, a point of order. Under the unanimous-consent agreement is it not true that as soon as the tax bill is laid aside, unless the reconciliation bill is brought up, that the vote on the cloture motion occurs immediately after the call for a live quorum?

The PRESIDING OFFICER. The answer is no. The order was final disposition of the tax bill.

Mr. JOHNSTON. Mr. President, a further parliamentary inquiry. Would it be in order to bring up any other matter other than the tax bill, reconciliation, the Department of Justice authorization after third reading, if the tax bill is laid aside?

The PRESIDING OFFICER. The Chair is advised it does not preclude another matter being brought up.

Mr. BAKER. Mr. President, let me say to the Senator from Louisiana I now have information that the Senator who objected to the order that we are committed to proceed to the cloture vote to occur has withdrawn his objection provided we proceed only to the cloture vote, and provided as well that we do nothing to circumvent our ability to go back to the tax bill or the reconciliation conference report, and also provided that after the cloture vote that we would not be—and that as well, of course, if the conference were to break down on reconciliation that we proceed to the consideration of the House-passed bill, if necessary.

But if the Senator will give me just a moment to decipher the suggestion I received from the Senator, I will see if I can put together language that will do that. It would appear though there will be no objection to going to the cloture vote after we do third reading. There would be objection to proceeding to debate.

Mr. JOHNSTON. That is perfectly suitable to me, and I think the majority leader.

Mr. MATSUNAGA. Mr. President, reserving the right to object, would the Senator be amenable to an amendment to his request which would allow a time limitation of 5 minutes equally divided for those amendments now on the list which will not have been considered at 4 o'clock Wednesday? I think that is a fair request, and that at least the amendment will have been explained to the Members. Otherwise those who vote without any explanation——

Mr. BAKER. Mr. President, let me make a countersuggestion for the consideration of Senators, and particularly with the minority leader with whom I have not discussed this. Did the Senator suggest 5 minutes equally divided?

Mr. MATSUNAGA. That is correct.

Mr. BAKER. Five minutes equally divided, but move the time back from 2 o'clock to 1 o'clock for third reading—I am sorry, it is at 4 o'clock, move it back to 3 o'clock.

Mr. MATSUNAGA. There may not be amendments, but assume from that list there are amendments, because of priority being given to other amendments, which could not be considered. Then those amendments would be put to a vote, perhaps a voice vote or a direct vote, after 5 minutes. Maybe 5 minutes will not be taken up. I do not know, but in fairness to those who will not be able to get their amendments up before 4 o'clock we would have had at least an explanation of the amendment which should be given.

Mr. BAKER. Mr. President, the Senator, as always, is making a worthwhile suggestion.

Would the Senator consider—and once again I repeat I have not consulted with the minority leader on this point—then providing 5 minutes equally divided for debate on amendments which have not been disposed of by 3 o'clock on the 29th, and that we would simply provide that third reading would be reached at 3 o'clock instead of 4 o'clock, and any amendment that remained would be voted on after 5 minutes of debate, under equal time?

Mr. ROBERT C. BYRD. On each.

Mr. BAKER. Let me make one more suggestion. If we are going to do that I suggest as well that the first vote in such a sequence, if there is such a sequence there, be a 15-minute rollcall and that each succeeding vote be a 10-minute rollcall.

Mr. MATSUNAGA. That would help.

Mr. ROBERT C. BYRD. Mr. President, I think the distinguished Senator from Hawaii has made a good suggestion. I would hope that the majority leader comes in early enough and stays late enough, if it is agreeable to the managers of the bill, so that when we reach that point we will not face that situation, but conceivably we could. I think the suggestion is a good one and I think the request the Senator has proposed protects Senators against that situation, and I would think that the hour by which the final vote on third reading would be moved up would also be a good suggestion.

Mr. BAKER. I thank the Senator.

Mr. KENNEDY. Mr. President, I would just ask whether the Senator from Connecticut has been consulted before any unanimous-consent request relative to the cloture motion.

Mr. BAKER. Mr. President, I can say to the Senator from Massachusetts that I have indeed consulted with the Senator from Connecticut.

Let me now amend my unanimous-consent request, Mr. President. I will restate the request with these revisions:

First, that we proceed to third reading on July 29 at 3 p.m., instead of 4 p.m. Next, that at 3 p.m. on the 29th of July next, any amendments that have not been disposed of would be called up and the time for debate on those amendments would be limited to 5 minutes, equally divided and controlled, and the control will be in the usual form.

I also ask unanimous consent, Mr. President, that after third reading and the bill is returned to the Calendar, that the Senate resume consideration of the Department of Justice authorization bill solely for the purpose of the cloture vote and that after the disposition of the cloture vote the Department of Justice authorization bill will be laid aside temporarily once more; and that nothing in this agreement would jeopardize the consideration of the reconciliation conference report or the tax bill conference report.

Mr. JOHNSTON. Is the Senator asking that it be automatically laid aside or that it is to be laid aside on the motion of the majority leader for the purpose of taking up one of those other matters?

Mr. BAKER. I would be happy to do it that way.

Mr. PACKWOOD addressed the Chair.

The PRESIDING OFFICER. The Senator from Oregon.

Mr. PACKWOOD. Mr. President, I make a request on behalf of Senator ROTH. He had hoped to have on this list a railroad rolling stock amendment upon

which we would have a 5-minute-to-a side time limitation. It has to do with the investment tax credit on railroads that lease railroad cars.

Mr. BAKER. Mr. President, that is with the 5-minute-time limitation.

Mr. DOLE. Mr. President, I have one late return from Senator BOSCHWITZ, who says he has worked out an amendment with Treasury on the Federal Home Loan Bank Board. I think we can talk him out of this other amendment.

Mr. BAKER. I am prepared now, Mr. President, to add those two amendments to the list.

Is there a time limitation on the Boschwitz amendment?

Mr. DOLE. Let us make it 10 minutes. He is not here.

Mr. BAKER. Ten minutes equally divided.

Mr. President, I also ask unanimous consent that a call for regular order would not bring back the DOJ bill, notwithstanding the provision of this agreement.

Mr. JOHNSTON. Will the Senator repeat that?

Mr. BAKER. Yes. What I have said is, on the DOJ bill, that after we get the third reading and return this bill to the calendar, that the DOJ bill is going to recur as the pending business. We are going to have a cloture vote and, at any time, the majority leader, after consulting with the minority leader, can move to some other measure and displace that and a call for regular order would not then bring back the DOJ bill.

Mr. ROBERT C. BYRD. Mr. President, when the distinguished majority leader says "some other measure," would he confine such measure to reconciliation of the tax bill so it will not embrace anything and everything?

Mr. BAKER. Either of those two measures or House-passed measures in respect to those?

Mr. ROBERT C. BYRD. Yes.

Mr. BAKER. I am happy to do that.

Mr JOHNSTON. And limit it to those?

Mr. BAKER. Yes, and limit it to those.

Mr. PACKWOOD. Mr. President, is there on the Democratic list an amendment of the Senator from Ohio, Senator METZENBAUM, relating to day care?

The PRESIDING OFFICER We do not have the list.

Mr. ROBERT C. BYRD. It is on the list.

Mr. PACKWOOD. Could I ask unanimous consent to allow a second-degree amendment to that, if he offers it?

Mr. BAKER. Mr. President, let me urge the Senator from Oregon not to offer a second-degree amendment. We have no second-degree amendments on this list. I am sure he could formulate a first-degree amendment.

Mr. PACKWOOD. Yes. But it would be a first-degree amendment as an alternative to his amendment, as I understand his amendment.

Mr. ROBERT C. BYRD. Mr. President, we have the same problem on our side. We convinced the Senator not to press his request. We also convinced him to fashion a first-degree amendment which he can craft.

Mr. BAKER. Mr. President, let me ask the Senator if he would request an addition on the list of a 10-minute time limitation for a first-degree amendment?

Mr. PACKWOOD. I ask for that request relating to day care.

Mr. DOLE. Mr. President, I hope this is a final reservation. As I understand it, if this request is agreed to, then the Senator from Kansas would withdraw the pending amendment and then I would be permitted to send an amendment to the desk which would, as I have indicated to the distinguished Senator from Massachusetts, start the phase in in 1982 at 25 percent, 20 percent in 1983, 15 percent in 1984 and would end in 1984.

Mr. KENNEDY. Mr. President, I understood that the amendment would be to change and alter the time. Outside of that, there is no change in the percentages. Am I correct that you accelerate the time when this measure will be phased in? It starts in 1983 and, as I understand it, you are just moving the time up to 1982. Am I correct? There was no objection to that, although there is, as I understand it, a revenue loss of approximately $200 million.

Mr. DOLE. Under the present provision in the Senate Finance Committee bill, the taxable rate in 1982 is 30 percent; in 1983, 25 percent; in 1984, 25 percent; in 1985, 20 percent; and in 1986 and thereafter, 15 percent.

It would be my hope that the Senator from Massachusetts would permit us to make the rate at 25 percent in 1982, 20 percent in 1983, and 15 percent in 1984.

Mr. KENNEDY. What is the revenue loss of the bill?

Mr. DOLE. The revenue loss is $151 million in 1982, $291 million in 1983, and $658 million in 1984.

Mr. KENNEDY. That was not my understanding of the conversations. I do not want to interfere with the majority leader's request. I would like to consult briefly with the Senator from Kansas.

Mr. DOLE. Let me say that I have been talking to the Senator from Oklahoma, Senator BOREN. I thought that was the understanding. Maybe I misunderstood it.

Mr. BOREN. If the chairman would yield, I will advise the Senator from Massachusetts that the amendment as it is now drawn in the bill reduces the tax from the present rate of 30 percent down to the rate of 15 percent. It cuts it in half, in other words. But the phase-in period was spread over 5 years and did not begin until January 1983.

What the Senator from Kansas, the chairman of the Finance Committee, is suggesting is that we begin the phaseout in 1982; that it would still be moving the 30 percent down to 15 percent and it would not go lower than 15 percent. But it would be doing so beginning January 1, 1982, as opposed to beginning January 1, 1983.

Mr. SARBANES. Will the Senator yield for a question?

Mr. BOREN. Yes.

Mr. SARBANES. As I understand that explanation, what the amendment should do is simply move the phaseout 1 year forward, but then maintain it over a period of time and at the rates that were already contained in the committee proposal. Is that correct?

Mr. BOREN. I want to be clear. In the committee proposal, I agreed to modify my original amendment to spread out the phasing. It did not begin until 1983. So the rate did not drop from 30 to 25 percent until January 1, 1983. Then it proceeded to drop on down 5 percent, to 20 and 15 percent and stay at 15 percent thereafter.

What we are suggesting here is that we begin the phaseout as of January 1, 1982, so that the rate, instead of saying 30–30 and then dropping to 25 in 1983, it would be 30 this year, 25 next year, 20 the following year, and then 15, and then stay at 15. It would simply escalate the phaseout, moving it forward by 1 year.

As I recall, and I would ask the chairman of the committee, I believe at one point, the way the committee amendment was drafted, it retained it at 25 percent for 2 years, did it not?

Mr. DOLE. Right.

Mr. BOREN. So, actually, I think that took about 5 years instead of 3 years to phase it out.

Mr. SARBANES. In other words, the Senator is not only moving the phaseout 1 year forward but also changing the schedule that was established. Is that correct?

Mr. BOREN. That is correct. The schedule established was 30, 25, 25, 20, 15. What is being suggested here is 30, 25, 20, and 15. It does not change the 15 once that is reached. It does move forward to 1982 the drop to 25, and it then goes on to 20 and then 15 rather than establishing it at 25 for 2 years.

Mr. SARBANES. So this is changing the rates of the phase in, in addition to moving them forward?

Mr. BOREN. This is compressing a 5-year phase down from 30 to 15 into a 3-year phase down from 30 to 15, beginning on January 1, 1982.

Mr. KENNEDY. Mr. President, I would have no objection to the changing of the date with the understanding that it was not going to accelerate the date, if the other figures and percentages were skewed in such a way that there was not going to be a revenue loss. But this proposal now is about a $2 billion revenue loss. That is different from the way I had understood the earlier conversation in which I had been led to believe that all we were doing was changing the date for the eligibility but that there was not going to be a revenue loss. I had no objection to that.

But this is a change not only in the date but also in the percentages. This is a $2 billion revenue loss. That would be objectionable, as far as I am concerned.

Mr. BAKER addressed the Chair.

The PRESIDING OFFICER. The Senator from Tennessee.

Mr. BAKER. Mr. President, a great deal of work and effort has gone into this request. I really hope that it will not founder on this element. This is not even a part of the unanimous-consent request. The request was predicated on a statement by me that if it is granted the Sen-

ator from Kansas would withdraw his amendment.

I have to say I do not know anything about the substance of this. I have not discussed it with anyone. But I would hope we could go ahead with this request; that the Senator from Kansas would withdraw his amendment. Then, of course, the Senator can offer an amendment, as the list provides.

Mr. DOLE. I do not have the right to offer an oil amendment, according to the list.

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, I wonder if I might engage in a discussion and colloquy with the distinguished Senator from Massachusetts. As I understand, we can now agree on the following, so far as withdrawal of the pending amending amendment, and then follow that with an amendment that would do the following: phase the rate, move it up to 1982 at 25 percent; 1983 at 25 percent; 1984 at 20 percent; and 1985 at 15 percent.

Will the Senator tell us what the revenue loss is for that period, 1982 to 1986?

Mr. DOLE. Total? In 1982, it is about $200 million, Mr. President.

Mr. KENNEDY. Can he give us just the cumulative total from 1982 to 1986?

Mr. DOLE. I am advised that the Joint Tax Committee does not have a run on that, but it is about $800 million.

Mr. KENNEDY. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. PERCY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PERCY. Mr. President, I and several of my colleagues may propose an amendment to the tax bill on the subject of commodity tax straddles. I should like, for the benefit of my colleagues, to confirm the arrangement that has been made with the majority leader and the distinguished manager of the bill, the chairman of the Committee on Finance (Mr. DOLE). Senators DIXON, SYMMS, HELMS, TOWER, HAYAKAWA, JEPSEN, HUDDLESTON, D'AMATO, BURDICK, and I have been extremely concerned about the Finance Committee bill, which leaves the impression that the commodity straddle is some sort of tax gimmick used only by tax dodgers. This impression is incorrect and there is a need to put the record straight.

We are supportive, Mr. President, of the committee's effort to end abuses in the trading of commodities. There is no question or debate over the propriety of taking this action. One of our concerns centers on the means the Finance Committee has chosen.

We feel the use of the market-to-market approach, as used by the Finance Committee, is fraught with dangers to the commodity markets themselves, to their liquidity and to their smooth operation. There are ways to close these tax loopholes without throwing the baby out with the bath water. The Ways and Means Committee bill is one such approach.

Yesterday, Mr. President, I had a conversation with a distinguished economist and former Chairman of the President's Council of Economic Advisers, Alan Greenspan. Mr. Greenspan made the following comments about the Finance Committee bill and about the commodity tax straddle. I urge my colleagues to read his words of caution.

Mr. President, I ask unanimous consent that Alan Greenspan's comments be printed at this point in the RECORD.

There being no objection, the comments were ordered to be printed in the RECORD, as follows:

Market-to-market will force an artificial restructuring of positions in the futures market during the month of December as tax considerations become critical. This will reduce the efficiency of the commodity markets which are generally our most efficient markets.

Market-to-market is technically difficult when year end closings are split; that is, where there is more than one price or in inactive markets where few trades occur.

The principle behind commodity market-to-market is not distinguishable from other capital assets. What is the principle that distinguishes commodities from stocks, land or for that matter homes?

I conclude that this is a tax move which requires considerably more evaluation of its economic impact than has been given.

Mr. PERCY. Mr. President, our second concern is that at this time the Senate bill does not contain an all-important transition rule. I urge the Finance Committee to at least incorporate such an amendment in the bill so that, at a minimum, we will diminish the side effects this legislation will have on legitimate commodity traders and the liquidity of the commodity markets.

Let us put together a good provision that will clean up abuses without inflicting damage on the commodity markets.

Mr. President, I plan to join before final passage of this momentous Economic Recovery Tax Act, with several of my Senate colleagues to discuss the commodity markets, the role they play in our free enterprise agricultural economy and our questions relating to the Finance Committee provision on commodity tax straddles.

Mr. President, the Finance Committee bill properly addresses the question of commodity tax straddles. Abuses of this tax mechanism have been pointed out and some taxpayers in this country are avoiding their fair share of the tax burden by employing these tax provisions. Let me state at the outset that I do not take issue with the committee for attacking these problems. It is their responsibility to keep a close eye on the tax system and keep it from being abused.

The commodity trading industry supports the thrust of the committee's effort, too. At a Finance Committee hearing on April 30 of this year, Robert Wilmouth, president of the Chicago Board of Trade—the oldest and largest commodity futures exchange in the country—stated the following:

In the past few years, there has been a proliferation—and unabashed promotion—of tax shelter devices involving commodity spreads. Their sole purpose is to facilitate tax avoidance on income from activities having absolutely nothing to do with commodity trading.

As for the enactment of legislation directed specifically at commodity transactions entered into for the sole purpose of sheltering unrelated income, I can state our position quite simply: No problem.

I will return later to the areas that have caused me some concern. At this time, I would simply like to reiterate the point that there is a tax problem here. Let us just not throw out the baby with the bath water.

THE ORIGIN AND PURPOSE OF COMMODITY MARKETS

In grappling with taxation of commodity futures, the Finance Committee has taken on a very complicated area, indeed. Few Americans adequately understand the role the commodity markets play in our economy and in affecting the prices we all pay for food at the grocery store.

I believe it would be helpful to place the tax question in the perspective of the role the commodity markets play in our economy.

First, let me say that this is a major American institution. It is as important to the economy as the stock and bond markets are to commerce and trade. If we did not have the commodity futures markets, we would have to invent them. They are indispensible.

A look back into the history shows that we have had the markets—in one form or another—with us for centuries. Their origins trace back to medieval trade fairs in Europe where only "cash" commodities were traded. With the growth of trade, however, the complexities of commodity trading also grew and an active futures market developed.

On this side of the Atlantic, commodity trading followed the same course as that in Europe. That is, as our colonial markets began to grow and trade links developed between the British colonies, so too did the operation of a commodity market that can balance supply and demand in an organized and predictable fashion.

Mr. President, the Senate Agriculture Committee, which is steeped in the lore of our agricultural economy, prepared a very useful summary of the development of futures markets 3 years ago. At that time, the Senate had under consideration a reauthorization of the Commodity Futures Trading Commission.

I should like to quote two paragraphs from the Senate Agriculture Committee's report on that legislation, that so aptly describe the importance of the commodity markets:

As farmers brought grain and livestock to regional markets at essentially the same time each year, they often found that the supply of meats and grain far exceeded the immediate, short-term needs of packers and

millers. These processors, in turn, seeing more than adequate supplies at particular times, would bid at the lowest possible price. Often, the short-term demand could not absorb the glut of commodities at any price, and goods were dumped in the street for lack of buyers. The problem was often aggravated by lack of adequate storage facilities and road and water transportation. Through much of the year, snow and rain made the dirt roads from country farmlands to the city impassable, and once the commodities reached the exchange area, there was a continual problem of inadequate storage. Standards of quality and weight were often nonexistent and complicated a marketing system that also was victim of inadequate and underdeveloped harbor facilities.

Yet several months after the fall harvest and marketing of grain and livestock, prices would soar and people often went hungry. Businesses faced bankruptcy through lack of raw materials and inability to meet financing of their businesses. The rural population was unable to pay for needed manufactured products from the city—tools, building materials and textiles.

After the Civil War, again as commerce expanded westward, the pressure for a better system to deal with agricultural commodities became ever more apparent. Chicago became a center for grain marketing and New York for cotton. As the Senate Agriculture Committee report continues:

Futures trading projects demand and price into the future, and provides a means of appraising supply-and-demand conditions, and dealing with price risks, over time and distance. Trading in futures provides not only the market of today, but of months ahead, and affords guidance to buyers and sellers of agricultural commodities in planning ahead, and in financing and marketing commodities from one season to another.

TODAY'S COMMODITY MARKETS

Our commodity markets are continuing to evolve today and are no longer the purely agricultural markets of 100 years ago. Now, over 140 contracts are traded on 11 U.S. commodity exchanges. Approximately 50 percent of the trading is in farm products such as corn, sugar, orange juice, soybeans and cotton. The remainder is in metals, industrial products—such as lumber—and financial securities and currencies.

We all know that the stock market can be swayed by various events in an industry or even far away from the markets themselves. So it is with commodities. All major U.S. newspapers carry daily accounts of futures prices and commodity movements. A recent Wall Street Journal account on commodities was headlined: "Grain Prices Decline as Soviets Avoid U.S. for Major Purchases."

Mr. President, I ask unanimous consent that this article of July 17 be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Wall Street Journal, July 15, 1981]

GRAIN PRICES DECLINE AS SOVIETS AVOID U.S. FOR MAJOR PURCHASE

Canada agreed to sell the Soviet Union 2.3 million metric tons of wheat and barley by the end of the year.

The news sent grain prices sharply lower on the Chicago Board of Trade, where traders noted that Brazil is expected to sign a grain-supply agreement with the Soviets this week.

Taken together, the developments indicate the Soviets won't hurry to resume buying grain from the U.S. in large quantities, now that the embargo against Soviet sales has been lifted, analysts said. "Clearly they think of us as residual suppliers, and they're rubbing our face in it a little," said Dale Gustafson, a grain analyst with Drexel Burnham Lambert Inc.

Wheat's price on the Board of Trade fell 6¼ cents a bushel for July delivery to $3.8325. Corn, with which barley competes as a feed grain, erased most of Monday's gains in a 7½-cent decline to $3.48 a bushel for July delivery. July soybeans skidded 21 cents to $7.3425 a bushel. (A metric ton is 39.4 bushels of wheat, 45.9 bushels of barley or 36.7 bushels of soybeans.)

Before former President Carter declared an embargo on most grain sales to the Soviet Union in January 1980, the U.S. had contracted to sell Moscow 25 million metric tons of the 35 million metric tons it was to import last year. Since then, the Soviets have moved to line up supplies from other major grain-producing nations, including Canada.

Yesterday's sale by Canada was the first under a recent agreement that calls for the sale of at least 25 million metric tons of Canadian wheat and feed grains to the Soviet Union over the next five years.

The just-announced sale, valued at about $375 million (U.S.), calls for shipment of slightly more than 1.4 million metric tons, or 51.4 million bushels of wheat between August and the end of the year, including 300,000 metric tons, or 11 million bushels, of durum wheat, the kind used to make pasta. It also calls for shipment between August and October of 910,000 metric tons, or 41.8 million bushels, of barley.

Shipments are to be made from ports on the St. Lawrence River, the West Coast and Hudson's Bay.

Separately, in Moscow, the Associated Press reported that the Soviet Union and Brazil are expected to sign an oil and grain agreement there today. One source said Brazil would sell the Soviets 700,000 metric tons of soybeans and soybean meal each year from 1982 to 1986, plus an unspecified amount of corn from 1983 to 1986, the AP reported. The Soviets would sell Brazil 20,000 barrels of crude oil a day for five months, the AP added. Brazil is a major competitor for the U.S. in the world market for soybeans.

In other commodity markets yesterday:

Livestock and meat: Hog and porkbelly prices rose, the latter by as much as the daily limit of two cents a pound. Analysts noted that the daily slaughter of hogs continues low, resulting in sharp declines in the amount of frozen pork bellies in storage. A report yesterday showed the pork-belly inventory was reduced 7.7 million pounds this week, compared with an average drawdown for the past month of 4.5 million pounds a week. Cattle prices fell despite tighter meat supplies, as livestock traders remain pessimistic about high interest rates, which hurt the operations of the cattle breeding and feeding industry.

Sugar: Prices dropped on reports of a sale of 140,000 metric tons of Brazilian raw sugar, analysts said. September-delivery sugar sank 0.52 cent to 17 cents a pound. Increasingly tight supplies of sugar available for immediate purchase had driven prices higher in the previous three days of trading, one analyst noted. News of the sugar coming onto the market eased fears of short supplies, he added. A metric ton is 2.205 pounds.

Orange juice: Juice for delivery this month fell 2.05 cents a pound to $1.26. Traders decided that last week's worries about the Mediterranean fruit fly hurting orange juice supplies were unwarranted. Oranges processed into frozen concentrate are grown chiefly in Florida, and the fruit fly infestation is in California, where eating oranges are grown. Moreover, the infestation doesn't seem to have spread beyond California, analysts noted. "People just realized there wasn't much to the story," one analyst said.

Mr. PERCY. Mr. President, in addition to analyzing the drop in grain prices, the article also touches on other commodities, including the impact the Mediterranean fruitfly epidemic would have on frozen orange juice supplies.

Trading in futures can be a puzzle to outsiders to be sure. The New York Times may have recognized that commodity trading is not universally understood and includes at the top of its futures prices column each day a brief description of what commodity futures contracts are.

Mr. President, I ask unanimous consent that the New York Times' description be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the New York Times, July 17, 1981]

FUTURES PRICES

Commodity futures contracts are commitments to buy or sell commodities at a specified time and place in the future. The price is established when the contract is made in open auction on a futures exchange. Only a small percentage of futures trading actually leads to delivery of a commodity, for a contract may change hands or be liquidated before the delivery date. Participants comprise commercial hedgers who use futures to minimize price risks inherent in their marketing operations and speculators who, employing venture capital, seek profits through price changes. Both purchase contracts on margin, or partial payment. Futures prices indicate the direction of prices based on current market conditions.

Mr. PERCY. Mr. President, my colleagues will note that the New York Times states that—

Participants comprise commercial hedgers who use futures to minimize price risks inherent in their marketing operations and speculators who, employing venture capital, seek profits through price changes.

I believe the Times does a great service in printing this small explanation, because it dispells the notion that there is something covert about commodity trading. Nothing could be further from the truth.

An excellent economics reference book entitled the Economic Way of Thinking and authored by Paul T. Heyne of Southern Methodist University, touches on the role of speculation in our market system. He points out in his book, on page 90, that speculators—

Even out the flow of commodities into consumption and diminish price fluctuations over time. Since price fluctuations create risks for those who grow or use corn, speculators are actually reducing risks to others. More accurately, they are purchasing risk (in hope of a profit) from others less willing to take risk (and willing to pay something in the form of reduced expected returns to avoid it).

Mr. President, I ask unanimous consent that this excerpt from the Economic

Way of Thinking be printed at this point in the RECORD.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

EXCERPT FROM THE ECONOMIC WAY OF THINKING

SPECULATORS

All of this is rather abstract. To make it more concrete we can examine a type of trading that probably suffers most from public misunderstanding: speculation.

The dictionary defines speculation as "trading in the hope of profit from changes in the market price." That's good enough for our purposes. The most celebrated (or, more accurately, the most execrated) speculator is probably the Wall Street "bear." He "sells short," that is, sells for future delivery to a buyer shares of stock he does not currently own. He believes that the stock will go down in price, so that when the time comes for him to deliver, he can purchase the shares at a low price and sell them at the previously agreed-upon higher price.

A more important speculator is probably the commodity speculator, who may trade in such items as wheat, soybeans, hogs, lumber, sugar, cocoa, or copper. He buys and sells "futures." These are agreements to deliver, at some specified date in the future, amounts of a commodity at a price determined now.

These are the spectacular speculators whose feats make the financial pages. A less publicized speculator is you yourself. You are buying education now for sale in the future at some price that you hope will be high, but which could conceivably be too low to justify your present investment. As these words are being written, many aerospace engineers are wishing they had invested in training to be environmental engineers.

Another familiar speculator is the housewife who reads that the price of sugar is expected to rise and responds by loading her pantry with a two-year supply. If the price of sugar rises far enough, she gains. If it does not, she loses. She has tied up her wealth in sugar, thereby cluttering her shelves and depriving herself of the opportunity to purchase more valuable assets—an interest-bearing savings account, for example.

The motorist who fills his tank when he sees a sign advertising gasoline at two cents a gallon less than he's accustomed to pay is speculating; the price may be four cents lower two blocks ahead. And the motorist who drives on an almost empty tank in hope of lower prices up ahead is a notorious speculator.

But many people overlook the pervasiveness of speculation in order to heap blame on the "profiteers" who allegedly "take advantage" of special situations and innocent people in pursuit of their own unprincipled profit. Is the speculator really the enemy of the people he is so often alleged to be?

CONSEQUENCES OF SPECULATION

"Speculators exploit natural disasters," it is often said, "by driving up prices before the disaster occurs. And sometimes the expected disaster never even materializes." That is true. But it is only one small and misleading part of the truth. Suppose evidence begins to accumulate in early summer that the fungus called corn leaf blight is spreading to major corn-producing areas of the Midwest. A significant percentage of the year's corn crop could be wiped out as a result. People who think this is likely to occur will consequently expect a higher price for corn next year. This expectation will induce some people to hold some corn out of current consumption in order to carry it over into the next crop period when, they believe, the price will be higher. That is speculation.

Notice how many different parties engage in such speculation: farmers who substitute other livestock feed for corn in order to maintain their corn stocks at a higher level, either to avoid having to buy corn next year at a higher price or in order to sell then at the higher price; industrial users who increase their inventories now while the price is relatively low; plus people who might not know a bushel of corn from a peck of soybeans but who hope to make a profit from buying cheap now and selling dear later. There are well-organized commodity markets to facilitate this kind of transaction. The effect of all these activities is to reduce the currently marketed supply of corn; the price consequently rises. And just as the critic protested, it rises before the disaster occurs.

But that is only a part of the picture. These speculative activities cause corn to be transported over time from a period of relative abundance to one of greater scarcity. The price next year, when the blight is expected to have its effects, will therefore be lower than it otherwise would be. Speculators thus even out the flow of commodities into consumption and diminish price fluctuations over time. Since price fluctuations create risks for those who grow or use corn, speculators are actually reducing risk to others. More accurately, they are purchasing risk (in hope of a profit) from others less willing to take risk (and willing to pay something in the form of reduced expected returns to avoid it).

Mr. PERCY. Mr. President, since the early 1960's, the size and scope of commodity trading has increased substantially. In 1963, for example, the total number of contracts traded on the exchange was 6.9 million, for a value of $68.6 billion. Ten years later, by 1973, the total number of trades had increased by a factor of eight, to 23.5 million contracts valued at nearly $400 billion. This growth has continued into the 1980's. For example, last year, 92 million contracts were traded, a quadrupling of the contracts traded just 8 years ago.

This industry, like many others, has a complexity and terminology all its own. The Senate Agriculture Committee, which is familiar with the structure of the markets through its periodic authorizations of the Commodity Futures Trading Commission, even published a "Glossary of Trade Terms" a few years ago so that we would know what some of these unique words meant in the context of commodity trading. These were not legal definitions, but prepared for use of Senators who were dealing with the Commission reauthorization legislation.

One look at this Glossary is enough to convince one of the uniqueness of the commodity markets. Here are some of the words that would baffle the layman: Backwardation—market situation in which futures prices are progressively lower in the distant delivery months; contango—not a dance, but a market situation in which prices are progressively higher in the future delivery months than in the nearest delivery month; hardening—describes a price which is gradually stabilizing; inverted market—a futures market in which the nearer months are selling at prices higher than the more distant months hence a market displaying "inverse carrying charges," characteristic of markets in which supplies are currently in shortage; MIT (market-if-touched) or board order—an order that becomes a market order when a particular price is reached. A sell MIT is placed above the market; a buy MIT is placed below the market; nearbys—the nearest delivery months of a commodity futures market; running bales—a term used in the cotton trade to designate the number of bales of cotton as they come from the gin in varying weights; spread (or straddle)—the purchase of one futures delivery month against the sale of another futures delivery month of the same commodity, the purchase of one delivery month of one commodity against the sale of that same delivery month of a different commodity, or the purchase of one commodity in one market against the sale of that commodity in another market, to take advantage of and profit from a change in price relationships. The term "spread" is also used to refer to the difference between the price of one futures month and the price of another month of the same commodity.

There you have a few selections from the Agriculture Committee report. These are only a few of the phrases. Let me reiterate that. The committee printed 20 pages of these special definitions. They sound odd to those not in the trading business but they are describing business practices that are essential components of the commodity futures industry.

Let me highlight one other definition in this Glossary that may indicate to my colleagues on the floor the interrelatedness of trading in commodities. I am referring to a "switch," defined in the Agriculture Committee booklet as "the liquidation of a position in one delivery month of a commodity and simultaneous initiation of a similar position in another delivery month of the same commodity. When used by hedgers, this tactic is referred to as 'rolling forward' the hedge. See Spread."

Mr. President, I want to highlight this one particular term because it indicates that there is a close relationship between hedgers—who are in the commodity markets to minimize price risks—and professional speculators who enter the market for profit and provide an important part of its liquidity for price discovery.

I am concerned that the Senate may not fully appreciate the uniqueness of the commodity markets, which have a different terminology and mode of operation than either the stock or bond markets, with which most of us are more familiar.

Moreover, as I mentioned earlier, I hope Congress will not move ahead and throw the baby out with the bath in this legislation. A "switch" is a legitimate market function that is employed by hedgers. The authors of this provision in our bill have stated that their language will not affect hedging transactions. But a form of the "switch" is also apparently used by others than hedgers, as implied in the definition I mentioned earlier. The markets are important enough to our economy that we should not enact a law without careful consid-

eration of the impact that law will have on the legitimate traders themselves.

REGULATION OF FUTURES TRADING INDUSTRY

Mr. President, before I continue with my discussion of the matter at hand, I should like to remind my colleagues that the commodity futures industry is presently regulated by the Commodity Futures Trading Commission, an entity established by Congress in 1974.

According to an analysis of commodity industry regulation written by David Stockman when he was executive director of the House Republican Conference in 1974, Congress first enacted commodity industry regulation in 1921. Mr. Stockman wrote that—

The Futures Trading Act was subsequently enacted in 1921, but because it adopted the taxation approach that had been proposed nearly 40 years earlier, it was ruled unconstitutional by the Supreme Court.

Mr. Stockman's 1974 analysis continues:

Congress quickly responded to this decision by adopting essentially the same legislation in 1922, but this time providing for a direct Federal regulatory agency, the Grain Futures Administration, under the aegis of the newly expanded commerce clause. . . .

An amendment in 1936 changed the title to the Commodities Exchange Act and retained the basic provisions of the 1922 Act. This New Deal legislation expanded regulatory authority to encompass six additional commodities. . . . During the next 30 years the Act was frequently amended to include additional commodities. . . .

In 1974, Congress enacted legislation establishing the Commodities Futures Trading Commission, thereby replacing the Commodities Exchange Commission in the Department of Agriculture. The present Commission has had chief regulatory purview over commodities trading since 1974 and was reauthorized by Congress in 1978.

In its 1978 report on the reauthorization, the Senate Agriculture Committee commented on the decision to establish a Commission:

Recent experience also supports the wisdom of Congress' decision in 1974 to expand the scope of commodities that could become the subject of regulated futures trading. Futures contracts based on these new commodities have enjoyed a rapid expansion. In fact, futures contracts on financial instrument—short-term commercial paper, mortgage-backed certificates guaranteed by the Government National Mortgage Association (GNMA), Treasury bonds and Treasury bills—are among the most active new contracts currently traded.

Many hedgers, including banks, businessmen, and home builders are attracted to these futures contracts as a method of planning their enterprises by ensuring against sudden and expensive decreases in value of the instruments used to finance their commercial operations. This experience establishes that the substantive economic value of futures trading is the same for a farmer, a manufacturer, or a financial institution. Participants in the futures markets utilize the hedging or risk-shifting element of futures contracts, whether the contracts involve soybeans or GNMA's. The comprehensive framework for exchange-traded futures contracts on an ever-expanding number of commodities established in the Commodity Futures Trading Commission Act of 1974 has worked well.

THE STRADDLE

Mr. President, as I stated at the outset of my remarks today, I am fully supportive of the committee's intention to close a loophole in the law that allows nonprofessionals from abusing the commodity markets. I quote Board of Trade president Robert Wilmouth who voiced a similar support for ending abuses.

"My concern is that this legislation may stray from this intent."

Earlier this year the Senate considered this issue in a different context. Senator METZENBAUM offered an amendment to the budget reconciliation instructions that would have required the Finance Committee to close certain tax shelter items as part of its reconciliation package.

During debate on this amendment, my good friend from New York, Senator MOYNIHAN, said:

The commodities tax straddle is a very simple device for putting off paying taxes for an extended period of time or reducing income from the regular income tax rates to capital gains tax rates.

It has been carried out by people who are not in the commodities market for any economic purpose of any kind. They are there very solely for the purpose of avoiding taxes or minimizing taxes, and they are doing this with the help of elaborate arrangements that professionals in this field have developed. . . . The tax straddle serves no economic purpose. It has no redeeming social value.

Later in his remarks, Senator MOYNIHAN notes that "I am not suggesting anything illegal has taken place, but the presumption is that these taxes are owed and should be paid."

Mr. President, I hope my good colleague from New York is sure of the distinction between the tax straddle and the commodity straddle, for the commodity straddle, as I have pointed out in my earlier remarks, is a legitimate, economic, trading device. It does serve an economic purpose when it is used by commodity traders in their normal line of business.

Let me reiterate the types of individuals Senator MOYNIHAN said he was interested in closing the loophole on: "people not in the commodities market for any economic purpose of any kind. They are there solely for the purpose of avoiding taxes and minimizing taxes."

Certainly this definition does not fit the commodity broker whose sole business is trading in commodity contracts and who is regulated by the regulations of the Commodity Futures Trading Commission. Certainly the Finance Committee should close the loophole on those who are not in the commodities market for any economic purpose whatsoever.

But this proposal goes beyond that and applies to anyone who is involved in commodity trading—whether they be speculators, brokers, or dentists looking for a tax dodge.

As I mentioned earlier today, a straddle is another name for a "spread." The spread is actually just one form of speculation practiced in the commodity markets. Speculators and hedgers are the two essential components of futures markets. They have different motives for being in the market, but they complement each other. Moreover, it is the speculators—that is professional speculative traders—who supply most of the risk capital for futures trading. It is this capital that forms the bulk of the liquidity of the futures markets.

The spreaders—those professional speculators who use straddles—are among some of the most important traders in the futures market. Without the spreaders, hedgers would be handicapped in their efforts to hedge cash purchases and sales. The key to the spreaders' trade is an attempt to profit by profit relationships—compared with other traders who try to profit from the direction of price movements. Spreads are of particular importance for transactions in distant months, when there are few takers among other types of traders. It is especially in the distant months that spreaders create market liquidity.

MARK TO MARKET

The Finance Committee legislation relies to a great extent on the mark-to-market approach. The Joint Committee on Taxation has prepared a pamphlet on this mechanism, which is used by the commodity traders to account for their daily positions.

At issue here is whether taxing the paper gains market to mark on December 31 each year will harm the liquidity of the markets. A related question is whether this approach will set a precedent in U.S. tax laws for taxing unrealized gains.

On the first point—regarding market liquidity—even the Treasury acknowledges there will be some impact. During his testimony before the Finance Committee, Assistant Secretary for Tax Policy John Chapoton said:

While our proposals will certainly have some effect on the quantity of transactions in the futures markets, we believe that, in the final analysis, they will improve, rather than detract from the efficiency of these markets.

The key part of his remarks that I would like to focus my colleagues' attention on is—

our proposals will certainly have some effect on the quantity of transactions in the futures markets.

Although the Treasury believes markets will improve with this tax change, others disagree. The editors of Barron's, for example, presented an editorial on this subject on July 20.

Mr. PERCY. Mr. President, the Barron's editors note—

The possible financial consequences of this crusade, in any case, strike us as horrific. If futures markets alone were taxed on paper profits, capital would fly elsewhere. Gold is an example. If futures contracts were liable to tax on unrealized gains, but mining shares and coins were not, capital would sensibly shift to shares and bullion. As New Year's Eve drew near, moreover, speculators would distractedly trade with an eye to taxes as much as to supply and demand. Prices would tend to become untrue.

Mr. President, I do not think enough thought has gone into considering the total economic ramifications of this tax change. There is good reason to approach this subject carefully because we are dealing with a mechanism that is key to our food-pricing system. If the pres-

ent provision in this legislation should backfire and dry up a substantial amount of liquidity as Barron's asserts—instead of just some as the Treasury asserts—we are in trouble.

On the second point, regarding this tax change setting a precedent, I have turned to an objective third party: the Library of Congress.

Mr. President, I ask unanimous consent that a memorandum prepared for my use by the Library of Congress on July 14, 1981 be printed in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

THE LIBRARY OF CONGRESS,
Washington, D.C., July 14, 1981.

To Senator Charles H. Percy, Attention: Bill Canis, Legislative Assistant.

From Harry G. Gourevitch, Senior Specialist in Taxation and Fiscal Policy.

Subject The Senate Finance Committee's Marking-to-Market Provision for the Taxation of Commodity Futures Contracts.

Under the Senate Finance Committee's bill, gain or loss on regulated commodity futures contracts must be reported on an annual basis. (section 503 of the bill) A taxpayer holding a regulated futures contract is treated for tax purposes as if he sold the contract on the last day of the year at its fair market value.

You have asked whether this provision is consistent with established Federal income tax principles.

THE SENATE FINANCE COMMITTEE'S POSITION

The Senate Finance Committee and Senator Robert J. Dole contend the provision is consistent with the established tax doctrine of constructive receipt. Under the doctrine of constructive receipt a cash basis taxpayer must include in his taxable income an item of income which he has not reduced to possession but as to which he has an unconditional right of possession. The Treasury regulations state,

"Income although not actually reduced to a taxpayer's possession is constructively received by him in the taxable year during which it is credited to his account, set apart for him, or otherwise made available so that he may draw upon it at any time, or so that he could have drawn upon it during the taxable year if notice of intention to withdraw had never been given. However, income is not constructively received if the taxpayer's control of its receipt is subject to substantial limitations or restrictions. Reg. sec. 1.451–2(a)."

For example, interest which has accrued in a savings account during the year must be reported by the depositor as income on his tax return even if he leaves the interest in the account rather than withdrawing it. It is contended that the Senate provision is analogous to the constructive receipt of interest in this situation because under the marking-to-market system of the commodity exchanges a customer is entitled to withdraw his gains, or is required to deposit additional margin because of losses in the account, at the close of every business day.

The Senate Finance Committee's report states the Committee's position as follows:

"The Committee bill adopts a mark-to-market system for the taxation of commodity futures contracts. This rule applies the doctrine of constructive receipt to gains in a futures trading account at year-end. The application of this rule in present law means, for example, that taxpayers must include in their income any interest which has accrued during the year, even though they may nto [sic] have withdrawn the interest from their savings accounts. Because a taxpayer who trades futures contracts receives profits as a matter of right or must pay losses in cash daily, the committee believes it appropriate to measure the taxpayer's futures' income on the same basis for tax purposes. Report No. 97–144, p. 157, on H.J. Res. 266."

THE INDUSTRY'S POSITION

The commodity futures industry apparently contends that the bill's approach of taxing unrealized gains is unprecedented and that such taxation would represent a radical departure from established Federal income tax principles. Under current tax law unrealized appreciation in the value of property is not subject to tax. As stated in a basic textbook on Federal income taxation, "The United States tax system does not tax unrealized but accrued gain represented by annual increases in the value of property."* Realization events which do trigger taxation of accrued gain are a sale or exchange of the property. Thus, the industry may argue that to tax the appreciation in value of a commodity futures contract absent a sale or exchange of the contract would be unprecedented under the U.S. tax system. The bill's approach, according to the industry, would be like taxing a homeowner on the appreciation in value of his home, assuming its value during the year goes up, even though he does not sell or otherwise dispose of it.**

DISCUSSION

Which of these positions is the right one? Both are defensible, and how one comes out on the issue depends on whether one favors the interest-income analogy or the homeowner analogy.

As to the interest-analogy, it may be argued that it is inapposite, as a commodity futures contracts, unlike interest income, is a capital asset and appreciation in value of a capital asset is subject to tax only upon a sale or exchange.

As to the homeowner analogy, it may be argued that the homeowner's situation is different from that of the customer holding a commodity futures account, as the homeowner can reduce to cash the appreciation in value of his house only by selling the entire house, whereas the commodities customer is entitled on any day to withdraw the balance in his account without any sale or other act on his part.

The Senate Finance Committee clearly places a great deal of weight on the marketing-to-market system of the exchanges in seeking to reconcile its provision with the constructive receipt doctrine. At the same time, it should be noted that the Committee's approach of taxing unrealized gains could in the future be used as a precedent to justify the taxation of unrealized gains in other areas of the tax law where the underlying transactions will not have the benefit of a marking-to-market system.

Mr. PERCY. Mr. President, the Congressional Research Service analyst—Mr. Harry Gourevitch, a senior specialist in taxation and fiscal policy—carefully reviews both sides of the coin. He puts forth the Senate Finance Committee's position on taxing of unrealized gains and quotes from the report of the committee sustaining their view that this provision will not set a precedent.

Mr. Gourevitch also sketches the industry position. He notes that the industry has said this precedent could be used to justify taxing the unpaid equity on a person's home.

Mr. Gourevitch acknowledges in conclusion that both views "are defensible." The final paragraph of his memorandum is helpful, I believe, and I quote:

The Senate Finance Committee clearly places a great deal of weight on the marking-to-market system of the exchanges in seeking to reconcile its provision with the constructive receipt doctrine. At the same time, it should be noted that the Committee's approach of taxing unrealized gains could in the future be used as a precedent to justify the taxation of unrealized gains in other areas of the tax law where the underlying transactions will not have the benefit of a marking-to-market system.

In short, Mr. President, I believe there is adequate reason to be concerned over this approach in the Committee bill. I believe the Ways and Means Committee has hit upon a means of closing a tax loophole without posing these two important questions of liquidity and precedent.

I do not intend to offer an amendment to the Finance Committee bill, but it is clear to me that there are potential problems of a serious nature relating to title 5. I urge my colleagues on the Senate Finance Committee to carefully consider the Ways and Means Committee language when conferees meet as it may be the best approach given these concerns.

TRANSITION RULE

Mr. President, market liquidity will certainly be damaged if the Senate does not enact a transition rule for the provisions in the committee bill. We know there could be a massive cash drain from the market if we do not provide a mechanism for spreading out the tax liability deferred from previous years.

Immediate taxation of these deferred amounts would impact on more than just the commodity traders. It would indirectly affect hedgers, ranchers, and farmers. In other words, it would impact on all of those individuals who rely on highly liquid commodity markets to hedge and reduce risk. Ultimately, of course, the loser in this game would be the consumer, who could face much more volatile prices without the proper liquidity.

I would like to point out that even the Treasury Department, which supports the Finance Committee legislation, has spoken in favor of a transition rule and has stated that "as part of our proposal, a transitional rule might have to be provided to deal with gains and losses accrued to the effective date."

Yet, no amendment has been forthcoming.

This is not a special request for the commodity futures industry. That should be made clear from the outset. Congress has traditionally provided a transitional rule when it closed what it deemed to be "tax shelters." Although I do not believe that the tax straddle is a tax shelter as far as it concerns commodity traders, if the Senate is going to pass on this legislation, it would be shortsighted of us not to include a transitional rule.

What we are discussing here is the

*Surrey, S., Warren, W., McDaniel, P., and Ault, H., *Federal Income Taxation*, p. 821, Vol. 1, (1972 ed.).

**This summary of industry views is based on second-hand reports; I have not myself seen any industry memorandum on this question or talked to any industry representative.

timing for paying tax—not whether the tax should be paid at all.

The Tax Code is peppered with transitional rules for various instances. These rules range from 3 years to 10 years in duration, to spread out the tax liability in cases where Congress has changed the rules.

Mr. President, I ask unanimous consent that an analysis of present transition rules now in the Tax Code be included in the RECORD at the close of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. PERCY. Mr. President, I might just highlight a few of these for my colleagues. In the Revenue Act of 1978, Congress included a 10-year transitional rule relating to a change in the taxation of corporate farming and a 5-year transitional rule for taxpayers who sell or distribute magazines. The 1976 Tax Reform Act also included a transition rule—in this case relating to the taxation of real property—for a 10-year amortization period. We could go back further, there are many such provisions in the tax code.

My purpose in mentioning these is to point out to my colleagues on the Finance Committee that it is incumbent on the Senate to write the best legislation possible. Without a transition rule, the Senate would be neglecting its responsibilities to write a responsible new law.

REACTION TO FINANCE COMMITTEE VERSION

The Finance Committee legislation was reported in June. I have received a number of comments on title 5, dealing with commodity straddles, and I wanted to share those with my colleagues.

First, the Governor of Illinois, Jim Thompson, sent Secretary of Agriculture Jack Block a hand-written note on June 22 about this matter.

Mr. President, I ask unanimous consent that this letter be printed in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

STATE OF ILLINOIS,
Springfield, Ill., June 22, 1981.

JAMES R. THOMPSON,
Governor.

DEAR JACK: I am adding my voice to those which have been raised in the farm community across the nation, with a special plea from the Chicago and Illinois economy, to equitably resolve the "tax straddle" issue now pending in the Congress. While we agree with the need for reform, we believe it cannot come at the expense of long time and legitimate practices at the Board of Trade and Chicago Mercantile Exchange, whose activities have consistently lent stability to the cause of American agriculture.

I hope you can help us with the Treasury and Congress on this very difficult issue and I look forward to discussing it with you in person.

Best regards,

JIM THOMPSON,
Governor.

Mr. PERCY. Mr. President, Governor Thompson states in his letter:

While we agree with the need for reform, we believe it cannot come at the expense of long time and legitimate practices at the Board of Trade and Chicago Mercantile Exchange, whose activities have consistently lent stability to the cause of American agriculture.

On July 10, William Lesher, Assistant Secretary for Economics at the Department of Agriculture, wrote Mr. Chapoton at the Treasury Department about this. The Agriculture Department has several concerns with the present legislation and points out that the Department of Agriculture "has expressed concern that any changes in the rules recognize the need to maintain incentives to speculators in futures markets."

The letter concludes:

In addition, we have one other concern. Traders who have been rolling over capital gains from one year to the next may now face very large one-time tax liabilities under the proposed legislation. The payment on those accumulated gains may cause some short-term cash flow difficulties for traders and trading firms and some short-term liquidity problems in the market. We believe it would not be unreasonable to recognize the difficulties that may be created by such heavy one-time tax liabilities and to accommodate those difficulties in some way, such as spreading those payments over a five-year period.

Mr. President, I ask unanimous consent that Mr. Lesher's letter be included in full in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF AGRICULTURE,
Washington, D.C., July 10, 1981.

HON. JOHN E. CHAPOTON,
Assistant Secretary for Tax Policy,
U.S. Department of Treasury,
Washington, D.C.

DEAR MR. CHAPOTON: As you know, the Department of Agriculture favors the closing of tax loopholes which allows large amounts of unrelated income to escape taxation through transactions in futures markets. However, the Department of Agriculture has expressed concern that any changes in the rules recognize the need to maintain incentives to speculators in futures markets. That need has been demonstrated through research papers prepared by Houthaker, Breeden, Peck and others. What is less clear is the linkage between the tax avoidance opportunities and incentives to speculators in futures markets. While there are no conclusive empirical analyses, economic logic suggests that the opportunity to reduce taxes is a strong incentive to speculators.

We have studied the legislation recently considered by the Senate Finance Committee. As we understand it, gains on speculative transactions in regulated futures markets would be treated as ordinary income and taxed at a 32 percent maximum marginal rate.

The potential impact of this proposal on the volume of speculative trading is not clear. On the one hand, the more favorable tax rate on ordinary gains could be sufficiently attractive when compared to ordinary gains from other sources to attract new speculative trading to futures markets. On the other hand, the proposed lowering of the capital gains rate to 20 percent increases the incentive to shift ordinary gains to capital gains. That means that some potential speculators may be lured to other forms of business activity where that opportunity exists rather than pay the 32 percent rate. Thus, while the 32 percent rate is a step in the direction of accommodating the needs of futures markets, it is difficult to determine in advance the net impacts on the volume of speculative transactions from the forces described above. For this reason, it would be desirable to find some way to make gradual adjustments from existing law. That would make it possible to monitor impacts on the volume of speculative transactions. The Department stands ready to assist in the analysis of data generated during such a phase-in.

In addition, we have one other concern. Traders who have been rolling over capital gains from one year to the next may now face very large one-time tax liabilities under the proposed legislation. The payment on those accumulated gains may cause some short-term cash flow difficulties for traders and trading firms and some short-term liquidity problems in the market. We believe it would not be unreasonable to recognize the difficulties that may be created by such heavy one-time tax liabilities and to accommodate those difficulties in some way, such as spreading those payments over a 5-year period.

We appreciate your willingness to work with the Department of Agriculture on this important issue and look forward to continued close cooperation.

Sincerely,

WILLIAM G. LESHER,
Assistant Secretary for Economics.

Mr. PERCY. Mr. President, the last quotation I read speaks directly to the need for a transition rule in the Senate bill and I am pleased that the Department of Agriculture shares our concern over the lack of an adequate transition rule, which I described earlier in my remarks.

On June 22, H. J. Maidenberg of the New York Times business section, wrote a very comprehensive and fair article on the Finance Committee proposal. The New York Times analysis states at its outset:

The commodity futures industry is bracing this week for what could be the most damaging attack on its markets since the early days of the New Deal, when popularist reformers sought to abolish futures trading entirely.

While the latest assaults being readied in Congress are not aimed at eliminating futures trading, they are widely expected to drive many hedgers and speculators out of the markets because they would sharply restrict the use of commodity futures tax straddles.

Mr. President, I ask unanimous consent that the full New York Times article be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

COMMODITIES—CURBING WRITE-OFFS ON TAXES

(By H. J. Maidenberg)

The commodity futures industry is bracing this week for what could be the most damaging attack on its markets since the early days of the New Deal, when popularist reformers sought to abolish futures trading entirely.

While the latest assaults being readied in Congress are not aimed at eliminating futures trading, they are widely expected to drive many hedgers and speculators out of the markets because they would sharply restrict the use of commodity futures tax straddles.

The classic futures tax straddle works like this:

A person who expects to pay taxes on, say, $100,000 this year could select a commodity whose price is declining.

This investor would buy enough futures contracts in this commodity so that he or she might expect a loss, on paper, of $100,000 during calendar 1981.

At the same time, the investor would sell short a similar volume of futures in the selected commodity maturing in 1982, reasoning that if the value of the contract for this year declines, so will the contract for next year, so that the loss in this tax year would be balanced by the gain on the 1982 contract that he had sold short.

In this way, the loss this year would be offset by the profit on the 1982 contract. But the loss this year would also be used to offset the original tax liability of $100,000.

This procedure can be repeated: To offset next year's profit on the short sale, another money-losing deal (on paper) could be set up in late 1982, balanced by a 1983 future contract, and so on.

But not all straddles are used for rolling over tax liabilities. They are one of the most common everyday trading methods used by hedgers and speculators. The hedgers use them to protect inventory and forward sales commitments and other ordinary business operations. Speculators use them because of the lower cash margins and commissions required by brokers for straddles, as well as the fact that they represent a conservative way to trade futures.

"It is the most frightening prospect facing our industry today," declared Robert K. Wilmouth, chairman of the Chicago Board of Trade, in an interview in his office last Friday. "And while it initially affects our business, the anti-tax-straddle bills represent time bombs for the securities and other markets as well." His exchange handles roughly half the futures contracts traded on the nation's 11 commodity markets.

The two-pronged attacks on futures tax straddles are embodied in bills scheduled to be introduced early this week by Senator Daniel P. Moynihan, Democrat of New York, and Representative William M. Brodhead, Democrat of Michigan. Both are supported by the Treasury Department and the Internal Revenue Service.

Mr. Brodhead summed up his view of futures tax straddles, which was echoed by Mr. Moynihan, in an interview:

"Tax straddles do more than permit people to avoid paying taxes. They foul up the commodity markets because the tax straddles cause grave distortions in prices upon which legitimate trade hedgers and traders depend. They serve no economic purpose. Worse, many people who are encouraged to use these ploys by their brokers don't understand them at all. They are led to believe that they won't have to pay taxes on any gains. Some operators have built large tax shelters around these straddles."

Oddly, commodity industry leaders agree with many of the positions taken by Senator Moynihan, Representative Brodhead and their supporters in Government and have put forth a simple solution to the abuses of futures tax straddles: Rather than outlaw or sharply curb them, the industry would restrict their use to bona fide commodity hedgers and speculators.

Leo Melamed, special counsel to the Chicago Mercantile Exchange, one of the industry leaders fighting the proposed laws, discussed the problem during a phone interview from Chicago yesterday, noting:

"What we have been telling them in Washington all last week is that commodity hedgers and speculators have always been taxed at the highest rates, now 70 percent, because few keep positions long enough to qualify for long-term tax treatment. As a result, these traders try to average their gains by using tax straddles, in effect, putting some of their tax liabilities over into the next tax year. Until recently, the I.R.S. saw nothing wrong with this procedure."

But as inflation has thrust more people into higher tax brackets, many accountants have found futures tax straddles a convenient way to roll over the tax liabilities of their clients as well as providing simple tax shelters. "Suddenly we got doctors, dentists, real estate operators, even rock singers using futures tax straddles," Mr. Melamed said. "And the I.R.S. didn't like that. Nor did we in the industry, because we could see trouble coming."

The former chairman of the Chicago Mercantile, which handles a quarter of all futures business, and the acknowledged "father of financial futures," went on:

"One obvious solution would be to restrict futures tax straddles to bona fide hedgers and speculators. We believe this would eliminate 95 percent of the abuses. In other words, only those with gains made in commodity trading would be permitted to use futures tax straddles."

But the Moynihan-Brodhead bills offer another approach. Their bills would have all futures traders "mark to the market" on the last trading day of the year. Any gains shown on that day would be taxable as such for the calendar year.

The industry finds this the most alarming aspect of the bills being prepared. Both Mr. Wilmouth and Mr. Melamed noted that it would mean taxing unrealized gains in still open positions that could change dramatically into losses overnight.

If this precedent were established by law, they emphasized, it could eventually be the basis for taxing portfolios of securities, real estate, mutual funds and other holdings showing profits on a certain day. It would also be the first time in this nation that unrealized gains would be subject to taxation, both men pointed out.

"Everyone in the commodity market knows how a $100,000 profit one day can turn into a $100,000 loss the next," Mr. Melamed said. "Can you imagine the futures markets as Dec. 31 approaches. It would be chaos. Nobody would dare risk making a profit. The markets would come to a standstill long before each Dec. 31. The thought of marking to market for tax purposes on any given day is terrifying."

Why then does the Moynihan-Brodhead bills propose this procedure? Mr. Wilmouth and Mr. Melamed and other industry leaders who have been commuting to Washington in recent weeks think they have the answer. As Mr. Melamed observed:

"Unlike the securities and other markets, the futures market has traditionally marked to the market every business day in order to guarantee the fiscal integrity of every trade. This means that we establish and transfer gains and losses at the end of every session, even though both parties may still hold their positions. Apparently, the legislators think this system can thus be easily used to fix tax liabilities for the full year. We don't."

Mr. PERCY. Mr. President, as a result of these adverse comments about the Finance Committee's tax straddle provision, I put together a letter on July 13 with nine of my Republican colleagues. Our letter to Chairman DOLE stated our concern over the operation of the commodity markets, particularly the mark-to-market approach in the committee bill.

Mr. President, I ask unanimous consent that our letter of July 13 to Senator DOLE be printed in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington D.C., July 13, 1981.

HON. ROBERT DOLE,
Chairman, Finance Committee,
U.S. Senate, Washington, D.C.

DEAR BOB: We have been reviewing the tax reduction provisions of H.J. Res. 266 and commend you for moving this important legislation through Committee so quickly. Its passage will be a landmark in stimulating capital investment and savings in the United States and in putting our economy back on the track.

One aspect of this legislation troubles us, however, and in its present form, seems to run at crosscurrents to the investment orientation of the bill. We are referring to the commodity tax straddle provision and believe that the existing language is unintentionally—but seriously—flawed. Although there is a clear need to reform certain abuses of this tax mechanism, we find that this provision could have unintended adverse effects on the economy.

As you know, the commodity markets provides an invaluable service for the economy by stabilizing price fluctuations and transferring risk from seller to buyer. Without properly-functioning commodity markets, our agricultural economy would be much less efficient and we could not deliver the quantities of food throughout our own country and the world at predictable prices.

We are particularly concerned that the Committee proposal may tax unrealized gains. Senate Republicans have worked for many years to lower the taxation on capital gains and speed investment in new plants and equipment. By their definition, these are risk ventures and our legislative proposals have sought to nurture this type of activity in the economy.

Taxation of unrealized gains in the commodity markets would actually inhibit risk-taking in that market. Removal of the present built-in incentives to trade could make legitimate commodity trading more costly and could result in wider price fluctuations in the markets. Secretary of Agriculture Jack Block voiced similar concerns on June 6th when he noted that the proposal could adversely affect market liquidity and make it more difficult for some farmers and elevator operators to hedge in the market.

We would like to work with you to fashion a tax straddle provision that would end shelter abuses without seriously affecting the operation of legitimate commodity markets. We would like to reach agreement with you on this so that a floor amendment is unnecessary.

Warm personal regards,

Charles H. Percy, Steven D. Symms, Mark Andrews, Larry Pressler, Jim Abdnor, Jesse Helms, Roger W. Jepsen, Sam Hayakawa, John Tower, Bob Kasten.

Mr. PERCY. Mr. President, the Chicago newspapers have reviewed this tax change and found it to be wanting. The Chicago Sun-Times editorialized on the subject on July 10 and noted that—

This door would be slammed shut on traders as well as tax dodgers under a bill already approved by the Senate Finance Committee.

Five days later, the Sun-Times spoke out on this in another editorial, pointing out that the Ways and Means Committee bill—

Voted to bar abuse of the futures market tax shelters called "straddles" and it did so wisely without imperiling operations of Chicago's commodity exchanges.

Our other major Chicago paper, the Chicago Tribune ran an article on the commodity straddle on July 14, relating to the letter I sent Senator DOLE.

Mr. President, I ask unanimous consent that these three articles from the Chicago press be printed in the RECORD at this point.

There being no objection, the articles

were ordered to be printed in the RECORD, as follows:

[From the Chicago Sun-Times, July 10, 1981]

AN ANTI-CHICAGO TAX

New York has a lock on trading in securities. Chicago exchanges, however, do 80 percent of the nation's business in futures trading, including commodities contracts and financial instruments.

It is no surprise, then, that two New Yorkers—Sen. Daniel P. Moynihan and Rep. Benjamin Rosenthal, both Democrats—are among the three prime movers of legislation now on track in Congress that would inflict severe damage on our futures markets.

The asserted aim of the legislation is a worthy one: to prevent those who make financial killings in entertainment, real estate, the professions or otherwise from sheltering their earnings against taxes by investing them in futures contracts.

Its proponents propose to do this by making unrealized gains—paper profits—carried on the books as of Dec. 31 subject to normal income taxes.

The problem, however, is that this dragnet would also sweep in bona fide futures traders—hedgers and speculators—who serve a very useful function in the economy. By their willingness to take risks on what future prices might be, these traders take risk off the backs of those who can't afford it: farmers, ranchers, food processors, businesses and financial institutions.

To fulfill this function the risk-taker must be able to average profits and losses over an extended period and be assured of capital-gain tax treatment on his earnings.

This door would be slammed shut on traders as well as tax dodgers under a bill already approved by the Senate Finance Committee. And it's causing no end of worry at futures exchanges, including the Chicago Board of Trade and the Chicago Mercantile Exchange, and among agricultural organizations, starting with the American Farm Bureau Federation.

All of these organizations support legislation to shut off the tax shelter to outsiders, but they insist that the legislation can be and should be written to exempt bona fide futures traders. We concur.

If this is not done, some go so far as to say the bill "could literally destroy U.S. futures markets as they exist today."

The blow would be especially devastating in Chicago.

We alert Illinois' two senators, Charles H. Percy (R) and Alan J. Dixon (D), to the danger. And in the House, we look to Rep. Dan Rostenkowski (D-Ill.) to stand firmly against the bill in the Ways and Means Committee, which he chairs.

[From the Chicago Sun-Times, July 15, 1981]

A PLUS FOR CHICAGO'S TRADERS

The House Ways and Means Committee has voted to bar abuse of the futures market tax shelters called "straddles," and it did so wisely—without imperiling essential operations of Chicago's commodity exchanges.

As originally written, the legislation would have applied to professional traders as well as those who shelter incomes earned elsewhere by investing in futures contracts. This "would have closed the doors of the commodity exchanges," in the dire judgment of Leslie Rosenthal, chairman of the Chicago Board of Trade, and others in the business. And it would have been a severe blow to Chicago, where 80 percent of futures are traded.

Rep. Marty Russo (D-Ill.) proposed an amendment we had endorsed exempting the traders. With the support of the committee chairman, Rep. Dan Rostenkowski (D-Ill.), the amendment prevailed, 25–8.

The battle isn't over. The all-inclusive language is still in a bill cleared by the Senate Finance Committee. On that side of the Capitol, we are pleased that Sen. Charles H. Percy (R-Ill.) is mobilizing support for the position of Chicago's exchanges.

[From the Chicago Tribune, July 14, 1981]

DOLE URGED TO EASE COMMODITY TAX

(By Laurie Cohen)

Sen. Percy (R., Ill.) and nine other Republican Senators are urging Robert Dole (R., Kan.) Senate Finance Committee chairman, to support a less restrictive tax on commodity futures transactions than the one approved by the committee three weeks ago.

The 10 Senators, including Jesse Helms of North Carolina, head of the Senate Agriculture Committee, signed a letter that was sent to Dole late Monday. An aide to Percy said the group plans to submit a "package of proposals" to amend the bill passed by the committee.

A floor vote on the senate bill is expected this week.

The committee's plan would effectively close the tax straddle loophole, which the Treasury estimates costs the government $1.3 billion a year in revenues.

A straddle consists of the simultaneous purchase and sale of commodities for delivery in different months. The possible tax consequences include a deferral of gains into the next tax year and holding the gain for six months to qualify for long-term capital gains treatment at favorable tax rates.

"Although there is a clear need to reform certain abuses of this tax mechanism, we find that this provision could have unintended adverse effects on the economy," the letter states.

Industry leaders have been waging a vigorous lobbying campaign, claiming that the Finance Committee approach, which is supported by the Reagan administration, would substantially restrict the flow of speculative cash to the futures market. The Percy aide said that Robert Wilmouth, president of the Chicago Board of Trade, met with Percy in early May.

On Friday the House Ways and Means Committee approved an industry-backed bill introduced by Rep. Marty Russo (D., South Holland) that would produce $400 million less in revenues to the Treasury; according to Ways and Means Committee estimates.

The Percy aide said the Republican Senators are "attempting to move it more toward the House approach."

The letter says: "We are particularly concerned that the committee's proposal may tax unrealized gains. Senate Republicans have worked for many years to lower the taxation, on capital gains and speed investment on new plant and equipment."

Mr. PERCY. Mr. President, on July 20—Monday of this week—Barron's editorialized on the matter of the commodity straddle, highlighting their editorial with the title that the Finance Committee proposal was "Fraught with risk" to the smooth functioning of the commodity markets.

Speaking to the matter of taxing unrealized gains, the Barron's editorial notes:

Why not tax unrealized gains in stocks and bonds? By closing one such "loophole," the Administration, by force of logic, must close more, until it draws a loop tight around the neck of all risk capital.

The editorial continues:

The possible financial consequences of this crusade, in any case, strike us as horrific. If futures markets alone were taxed on paper profits, capital would fly elsewhere. Gold is an example. If futures contracts were liable to tax on unrealized gains, but mining shares and coins were not, capital would sensibly shift to shares and bullion.

And then the Barron's editorial makes an excellent point about this legislation:

As New Year's Eve drew near, moreover, speculators would distractedly trade with an eye to taxes as much as to supply and demand. Prices would tend to become untrue. The business of futures exchanges—to shift market risk from hedgers to speculators—would be impaired.

Mr. President, this is a valuable piece to the debate over this legislation and I ask unanimous consent that it be printed in the RECORD at this point.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

BAD SPECULATION: PROPOSAL TO TAX COMMODITY STRADDLES IS FRAUGHT WITH RISK

To the layman, the subject of taxes on commodity straddles beckons like a dark alley. Just the thing to know nothing about, the sensible man might say. Exactly the thing to be left to the experts. Perhaps, but in the past few weeks that dusty subject has captured the imagination of the Fourth Estate. Even as the House and Senate made ready to vote on such portentous fiscal matters as indexed marginal brackets and the All Savers' Certificate, stories kept surfacing about commodity straddles and taxes. In an investigative vein, for example, The Wall Street Journal disclosed from Washington that lobbyists for commodity speculators had been seen aboard yachts as well as on dry land in the act of buttonholing legislators. Dispatches have traced the progress of alternate bills, in the House Ways and Means Committee and the Senate Finance Committee, that would close the straddle "loophole." Then, on Wednesday, a coincidence: The New York Times and Washington Post, in separate editorials, endorsed the Senate bill, which is the Administration s. Even casual observers began to gather that (a) Donald T. Regan, the Treasury Secretary and former chief of Merrill Lynch, believes that "2,500 wealthy commodity speculators" are getting away with something; (b) the Administration means to do something drastic about it; because (c) the cost in forgone revenues runs (by the government's estimate) to $1.3 billion a year.

Yet one small detail largely escaped comment: if the Administration gets its way, commodity positions would be marked to market value at the end of each year and taxed on the basis of profits, whether realized or not. Speculators, that is, would be taxed on paper profits.

The best place to start this peculiar story is at the beginning. A commodity straddle, or spread, is a trading technique. It is invidiously defined as a "tax gimmick." By the same token, a fork might be defined as a "bean spear." Some people spear beans with forks; some speculators use spreads, or straddles (the terms are synonymous) to defer taxes. The definition is wrong because it is incomplete. A spread is a technique that involves the purchase of one futures contract and the sale of another. The second contract, the one (in this example) that is sold, may be in a different commodity. For example, a man might buy beans and sell silver. Or, the second contract might be in the same commodity but in a different delivery month. Thus, a speculator might buy October gold and sell December gold.

Spreads have many uses. The first is to reduce risk. It is obviously safer to stake out a long position in beans if one were also short a bit of them (or some wheat or corn). A second use is to profit by an expected

change in price relationships, for example, between bills and bonds or between beans and silver. A good reason to put on spreads is to put on taxes which is the cause of the row in Washington and all that ink in the papers.

Anyone with income to shelter can set up a commodity spread on which a profit (it is hoped) will be largely offset by a loss. He, or she, can buy gold futures for delivery in one contract month and simultaneously sell in another contract month. The chances are that, no matter which way gold goes, one "leg" of the spread will show a profit and the other leg a loss. The tax angle is to realize the loss but to postpone the gain. If the gold price rises, the short leg yields the loss. Thus the short sale is closed out and the long leg is protected with another spread. The profit isn't realized until the following year, or perhaps the year after that. Perpetual postponement is unlikely, however, because market risk tends to outweigh the benefit of tax postponement. The idea is to push a gain forward until it becomes a long-term gain, then to sell and pay taxes at the reduced rate.

All of which has elicited considerable indignation and one exceptionally bad piece of legislation. The bill (by number, S. 626) would close the straddle loophole by requiring that speculators mark their positions to market at the end of the year. Real and paper profits alike would be taxed at at rate of 32 percent or so (income would also be offset by past losses). This way, say proponents, profits would be captured in the year in which they were earned.

Obviously nothing of the kind has been done before. In no market are paper gains subject to tax. A precedent to the contrary would open vast possibilities for mischief in financial markets and real estate. If unrealized gain in gold contracts and T-bond futures are to be taxed, then why not in bullion and bonds, or in houses and common stocks?

Equity in a house can be borrowed and spent but it isn't taxed as income until the place is sold. Why not mark houses to market? At yearend, an investor with a profit in stock can sell short "against the box," or against his long position. He thus can "cash out" his gain but pays no tax until he delivers the stock to close out the transaction next year. Why not tax unrealized gains in stocks and bonds? By closing one such "loophole," the Administration, by force of logic, must close more, until it draws a loop tight around the neck of all risk capital.

What consequences might spring from this essay in "reform" are anybody's guess. The nature of tax reform is that everyone wants it but nobody has time to read the legislation, or, finding the time, can't make heads or tails of it. A case in point is the bill at hand, S. 626, to wit: "In general—In the case of any offsetting position in personal property—(1) that portion of any loss—(A) which is incurred in connection with the sale or exchange of any position held as part of such offsetting position, and (B) which exceeds any gain recognized in connection with the sale or exchange of any other position held as part of such offsetting position, shall be treated as incurred as of the close of the balanced period; and (2) the holding period (as determined under section 1223) of any position held as part of any offsetting position shall not include any portion of the balanced period with respect to the position." The words make sense separately but somehow not en masse.

The possible financial consequences of this crusade, in any case, strike us a horrific. If futures markets alone were taxed on paper profits, capital would fly elsewhere. Gold is an example. If futures contracts were liable to tax on unrealized gains, but mining shares and coins were not, capital would sensibly shift to shares and bullion. As New Year's Eve drew near, moreover, speculators would distractedly trade with an eye to taxes as much as to supply and demand. Prices would tend to become untrue. The business of futures exchanges—to shift market risk from hedgers to speculators—would be impaired. A futures industry handout raises an interesting point. "Should mark-to-market legislation adversely affect [financial futures] markets—as we believe it would—the cost would far exceed the benefits. Only a very slight widening of bid-ask spreads will add millions of dollars to the Treasury's costs in a new debt issue. We close a $1.3 billion dollar straddle loophole . . . and in the process increase the cost of Treasury financing by many times that amount." Yet the Treasury, unhedged, wants to make just that speculation.

This disaster in the making, oddly, isn't born of ignorance. The Treasury Secretary, Donald T. Regan, knows that if paper profits were profits, many would be the rich man at the bar at Harry's. (Merrill Lynch, which under Regan's stewardship helped to develop a type of straddle that was subsequently challenged by the IRS, now is helpfully advising clients on "alternate income sheltering strategies.") Moreover, a friend of S. 626, Sen. Daniel Patrick Moynihan (D., N.Y.) knows a thing or two about the commodity pits. The Senator's financial statements seem to show that a trading profit of roughly $60,000 was pushed into 1980 from 1979 as the result of some pork-belly spreads designed by his broker, Maduff & Sons. (An aide of Moynihan's was asked for comment on the Senator's apparent first-hand experience with the object of the ire of S. 626; but no comment was forthcoming.) In fairness to Moynihan, his was a managed account and the spread was far from risk-less. But then, most spreads involve risk. When the Administration argues the opposite, it is misinformed.

Thus the Treasury's honorable course is surrender, S. 626 should be given up for dead. In the House, the Ways and Means Committee has passed a bill that would limit the tax benefit of spending to income earned in commodity futures trading. It would impose no mark-to-market rule. If a bill must be passed, let it be that one.

The timeless lesson in this political dustup is that the tax law is far too complicated. The only known tangible result of the parade of "tax reforms" from 1954 to date is the burgeoning fees of lawyers and accountants. A while ago, Alvin Rabushka, senior fellow at the Hoover Institution at Stanford University, proposed a simple flat-rate system. If everybody paid 11 percent, he said, the Treasury would take in as much as it does today under the current gimmick-ridden regime. Nothing against lawyers and accountants, but the more we think of that reform, the better we like it.—JAMES GRANT.

Mr. PERCY. Mr. President, I have also received a number of letters in recent days from farm groups that are strongly concerned about this tax provision and I ask unanimous consent that a few of these be printed in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

NATIONAL BROILER COUNCIL,
Washington, D.C., July 17, 1981.

Hon. CHARLES PERCY,
U.S. Senate, Dirksen Office Building, Washington, D.C.

DEAR SENATOR PERCY: The National Broiler Council represents the majority of the nation's broiler producer/processors. Because the broiler industry receives no government price support and because we rely entirely upon the free market for the price we receive for our product, we are particularly interested in looking for ways to reduce the risks of a very volatile business. Our producers use the futures markets of the country both to hedge the price of corn and soybean feedstuffs and to hedge the price they receive for their broilers.

Because there is a huge volume of trading in the corn and soybean futures markets, broiler producers have always been able to hedge very successfully the price of their feedstuffs. Unfortunately, we have not had the same success in our attempt to hedge the price of broilers. There has been a broiler contract for several years on the Chicago Board of Trade that has never had proper volume and liquidity. Therefore, we encouraged the Chicago Mercantile Exchange to establish a broiler contract, which they did in late 1979. This broiler contract on the Chicago Mercantile Exchange has not yet achieved a volume that will provide the necessary liquidity for a vital and efficient futures market. However, we are hopeful that increased gains in volume and liquidity in this market will give us the kind of hedging tool that we want.

Because of our experience in the futures markets, we in the broiler industry have looked with interest at the current deliberations by the Congress to close the so-called commodity "tax straddle loophole." Certainly we do not feel that people should be able to take income gained in other areas and create an artificial and offsetting loss in the futures markets by using spreads or straddles or any other device. However, we are concerned about the possible impact of the mark to market approach that has been adopted by the Senate Finance Committee. We are concerned that by imposing a tax on unrealized gains at the end of each year, the government might possibly dissuade traders from investing in long-term positions. We fear that traders will be much less interested in taking long-term positions in the futures market if they are completely denied the benefit of transferring gains and losses forward into future years.

We appreciate and applaud the Senate Finance Committee's action in exempting hedgers from taxation on unrealized gains; however, we realize that there must be sufficient interest on the part of speculators in order to create a viable futures market. The futures market in broilers is a good example of a market that has sufficient hedger interest, but lacks adequate speculative interest. Therefore, we fear that any tax approach which diminishes the interest of speculative capital in the futures market will greatly impair our attempts to establish a viable broiler contract which will provide a satisfactory hedging medium for our producers. We hope that it will be possible for the Senate to find satisfactory ways to eliminate any tax abuses without having a negative impact on the futures market.

Sincerely,

GEORGE B. WATTS,
President.

ASA WASHINGTON OFFICE,
Washington, D.C., July 20, 1981.

Hon. CHARLES PERCY,
U.S. Senate,
Washington, D.C.

DEAR SENATOR PERCY: I understand that during Senate consideration of the tax bill that you intend to seek less restrictive tax treatment of commodity straddles income than was approved by the Senate Committee on Finance. The American Soybean Association shares your concern with the future straddles provisions approved by the Finance Committee and urges approval of legislation similar to that approved in the House Committee on Ways and Means.

I enclose a copy of a letter ASA filed with the Committee on Finance on June 1 ex-

pressing concern that in the effort to eliminate the use of futures straddles as a method of tax avoidance that the Congress not cause a flight of speculator capital out of the futures markets. Futures markets are essential to American agriculture since they provide a way for farmers, processors, and merchandisers to reduce their risks from price fluctuations. Commercial hedgers are able to transfer their risk to the speculators who seek such risk in the hope of making a profit. If the profits from futures speculation are all taxed at the highest unearned income level one can expect a decline in speculator activity and a loss in market liquidity.

Soybean producers are especially aware of the importance of futures markets. Almost twenty percent of the total volume on futures exchanges is comprised of contracts for soybeans, soybean meal, and soybean oil. A decline in market liquidity would have an enormous effect on our industry.

Therefore, Mr. Chairman, we offer our support for your effort to gain fair treatment for income received from futures straddles.

While tax abuses through futures straddles should be stopped, the Congress should not disrupt our futures markets.

Sincerely,

JOHN BAIZE,
Washington Program Manager.

ASA WASHINGTON OFFICE,
Washington, D.C., June 1, 1981.

Hon. ROBERT DOLE,
Chairman, U.S. Senate Finance Committee, Dirksen Senate Office Building, Washington, D.C.

DEAR SENATOR DOLE: The Finance Subcommittee on Taxation and Debt Management and Subcommittee on Energy and Agricultural Taxation have scheduled hearings on June 12 on S. 626 and other bills affecting tax treatment of commodity straddles. The American Soybean Association takes this opportunity to offer comments on those bills. We ask that our comments be made part of the hearing record.

The American Soybean Association is a national, non-profit, volunteer, single-commodity association organized to assure the opportunity for a profitable soybean industry. ASA has approximately 20,000 dues-paying members and ASA is supported by over 460,000 soybean producers who voluntarily invest in ASA programs through 23 separate statewide soybean checkoff programs. ASA seeks to maintain soybean profitability through its foreign market development, research, producer and public information, and government relations programs.

ASA does not condone the use of futures straddles as a means of avoiding federal incomes taxes. However, we are concerned that the Congress not unintentionally reduce overall speculation in futures in its attempt to curtail the use of commodity straddles. The futures markets are essential to the marketing of soybeans and soybean products both within the United States and in the international market. Speculators are essential to the proper functions of the futures markets.

Producers, merchandisers, processors and users of soybeans and soybean products use the futures markets both as a mechanism of price discovery and as a means of reducing the risk of price fluctuations. Farmers use the futures markets to "lock in" a future price for delivery of their production. By doing so they are better able to plan cash flow and project potential profits. Merchandisers, processors, and end-users use the futures market to "lock in" a future delivery price for such commodities. The ability to assure future prices and delivery of soybeans and soybean products greatly reduces the risk of doing business and allows substantially reduced trading margins to the benefit of both producers and consumers.

The futures markets allow hedgers to reduce their risk only because speculators seek out such risk in the futures markets. The capital infusion into the markets by speculators is essential to their liquidity. When one considers that the value of the 1980 soybean crop was approximately $16 billion, only a small portion of which was consumed directly on the farm, it is apparent how much speculator capital is needed to maintain soybean market liquidity. The overall value of the commodities traded on futures exchanges, not including financial futures, in 1980 was in excess of $100 billion.

We agree that tax abuse in the use of commodity futures should not be permitted. However, we are opposed to any legislation that would, as some have suggested, result in all profits from commodity futures transactions being considered unearned income and, thus, taxable at up to 70 percent. Also, we oppose a speculator being unable to balance out profits and losses from one year to the next. Such tax statutes would have the effect of forcing many speculators to turn to other investments where they would be eligible for taxation of the profits at the lower capital gains rates. The result could be a general reduction in market liquidity with higher risks for commercial hedgers. Faced with greater risk, the commercial hedgers would most likely increase their margins to the producers and consumers. Since over $8.6 billion of U.S. soybeans and soybean products were exported in 1980 any decrease in U.S. export competitiveness resulting from higher margins could impact the entire U.S. economy.

In conclusion, ASA urges extreme caution by the Congress in attempting to eliminate the use of futures markets as a means of tax avoidance. Futures markets are essential to farmers, processors, merchandisers, and end-users. They should not be needlessly interrupted. Soybean farmers need a strong and viable futures market to help assure their profit opportunity. The continued profitability of our nation's 630,000 soybean producers will help assure a stronger U.S. economy.

Sincerely,

FRANK RAY,
President.

GULF, GREAT-LAKES GRAIN LTD.,
Chicago, Ill., June 22, 1981.

Hon. CHARLES H. PERCY,
U.S. Senate, Dirksen Senate Office Building, Washington, D.C.

DEAR SENATOR PERCY: While you are undoubtedly aware of proposed tax legislation pending before your committee affecting the commodities' future market, you may not be aware of the destructive impact on the entire grain marketing system embodied at the Chicago Board of Trade if such legislation were passed.

While the legislation purports to address tax "abuses" related to commodity spread transactions, it constitutes a radical departure from the underlying concept of the tax code which is to tax only realized gains. Further, such legislation would constitute a discriminatory (in fact single instance) of an effort under the tax law to capitalize interest without amortization.

We at the Chicago Board of Trade are proud of the fact that our grain marketing system plays a vital and growing role in the world economy. A firm foundation to such system is the incentive for entrepreneurial participation by investors, many of whom are small investors and who rely upon existing legislation for their participation. To enact the proposed legislation would, in this company's opinion, "dry up" this entire source of investment and create illiquidity in a market demanding complete liquidity for successful continuation.

In substance not only is the proposed legislation entirely discriminatory and without priority, but it would seriously impair the continued vitality of an industry fundamental to this country's entire grain marketing system.

If you believe I overstate the impact of such legislation, I ask you only to read the same in the light of this letter.

Thank you for your consideration.

ROBERT H. WILLIAMS,
General Partner.
EDWARD D. MCGREW,
Limited Partner.
JOHN J. GRIFFITH,
Limited Partner.
RUTH HOMER,
Manager.

ILLINOIS COOPERATIVE FUTURES CO.,
Chicago, Ill., July 21, 1981.

Hon. CHARLES H. PERCY,
U.S. Senate,
Dirksen Senate Office Building,
Washington, D.C.

DEAR SENATOR PERCY: The Senate Finance Committee's recent action changing the method of taxing commodity straddles could deprive farm cooperatives and many other agribusiness firms of a mechanism of shifting risks of handling large inventories throughout the marketing year.

If left unchanged in floor debate or in conference, the new tax bill will drive professional speculators out of the markets. This would severely restrict the markets' liquidity and thus its capability to withstand commercial hedge pressure. The risk capital of professional speculators is necessary to absorb that risk of ownership which a farmer or agribusiness firm cannot afford to take.

Our scope of operations cover the entire United States. We represent some 45 Regional farm cooperatives and some 55 smaller cooperatives. Each of these cooperatives shift the risk of farmer owned grain to market professionals. Your understanding of the necessity to insure market liquidity will greatly help the U.S. Agricultural system and in turn the American Consumer. While I would not ask for special consideration for any group, I would ask that you continue your efforts not to unduly penalize an industry so vital to the U.S. economy.

Sincerely,

F. MCCOY COAN,
Executive Vice President.

TRANSITION RULE PRECEDENTS

Adjustments required by changes in method of accounting—current law:

Changes in a taxpayer's accounting methods can often change his tax liability. Section 481 of the Internal Revenue Code of 1954 (26 U.S.C. § 481) generally provides that, where a taxpayer changes his method of accounting, whether voluntarily or involuntarily, he must take into account in computing taxable income in the year of the change all adjustments which are necessary, solely because of the change in accounting method, to prevent duplication or omission of income or deduction items.

Since income for several years might be lumped into one year due to inclusion of all adjustments in the year of the change, § 481 provides two alternative limitations on the tax due for the year of the change. Under one method of limiting the tax, the net amount of the adjustments is allocated ratably over a three-year period (the year of the change and the two preceding tax years) (26 U.S.C. § 481(b)(1)). Under the alternative method, if the taxpayer can establish his taxable income under the new method of accounting for prior years, and can allocate the adjustments due to the new method back to these prior years, the increase in tax is limited to the net increase that would result from the inclusion of the adjustments in the prior years to which the allocations are made (26 U.S.C. § 481(b)(2)).

Adjustments required by changes in method of accounting—prior law:

The above-described provisions were first adopted as part of the Internal Revenue Code of 1954. Prior to that time (under the 1939 Code) a number of inequities existed. Some taxpayers who voluntarily changed accounting methods were required by IRS to make adjustments in the year of the change, thus experiencing "bunching" of income and an especially heavy tax burden for that year. Finally, taxpayers who were required by the IRS to change their method of accounting often obtained relief in the courts from making any adjustments.

However, Congress' action in 1954 to correct these inequities gave rise to several additional problems, relating primarily to adjustments for years prior to 1954. To remedy these problems, the Technical Amendments Act of 1958 (P.L. 85–866) adopted a special rule to give relief to taxpayers "where the adjustment results in an increase in income of the taxpayer of more than $3,000" (S. Rept. No. 1983, 85th Cong., 2d Sess. (1958)). Under this rule:

"One-tenth of the net amount of the adjustments . . . shall . . . be taken into account in each of the 10 taxable years beginning with the year of the change." (P.L. 85–866, § 29, amending 26 U.S.C. § 481(b))

Since this 1958 amendment was intended to take into account adjustments for pre-1954 Code years over a ten-year period, the amendment became obsolete for taxable years after 1963. Therefore, the above-quoted language was deleted as part of the "deadwood" amendments included in Title XIX of the Tax Reform Act of 1976 (See: P.L. 94–455, § 1911(a)(68)). The deletion of this language in 1976 did not, however, change the basic principle of allowing taxpayers to spread the increased tax liability resulting from a change in accounting methods over a ten-year period.

Other provisions allowing proration of adjustments in taxes due to changes in accounting methods:

For example, the Revenue Act of 1978 (P.L. 95–600) added a new provision to the tax laws allowing certain issuers of "qualified discount coupons" to elect to deduct for any taxable year the cost of redeeming coupons that are (1) outstanding at the end of the taxable year, and (2) redeemed within six months after the end of the taxable year. The amendment which made this change also included the following provision:

"(f) 10-Year Spread of Any Net Increase in Taxable Income Under Section 481(a)(2).—In the case of any election under this section which results in a net increase in taxable income under section 481(a)(2) . . . such net increase shall . . . be taken into account by the taxpayer in computing taxable income in each of the 10 taxable years beginning with year for which the election is made." (26 U.S.C. § 466(f))

The Revenue Act of 1978 also included a provision requiring that the taxable income of corporate farming ". . . shall be computed on an accrual method of accounting and with the capitalization of preproductive period expenses . . ." (26 U.S.C. § 477(a)).

In order to ease the tax burden imposed under this change, the same revision included an additional amendment providing that "the net amount of adjustments required . . . to be taken into account by the taxpayer in computing taxable income shall be taken into account in each of the 10 taxable years . . . beginning with the year of change" (26 U.S.C. § 447(f)(3)).

Similar relief was granted under the 1978 Act for taxpayers who sell or distribute magazines. Under prior law, accrual method sellers of magazines had been required to include sales proceeds in income for the year when the merchandise was shipped and could reduce income for returns of unsold merchandise only in the year the items were returned. Changes in the 1978 Act allowed magazine publishers to elect to exclude from income amounts attributable to items returned within a two and one-half month "merchandise return period" after the end of the taxable year.

The same provision included an amendment entitled, "5-Year Spread of Transitional Adjustments for Magazines" whereby ". . . the period for taking into account any decrease in taxable income . . . shall be the taxable year for which the election is made and the 4 succeeding taxable years" (26 U.S.C. § 458(d)). It is significant that the Conference Report on the 1978 Act characterized this 5-year adjustment period as an exception to the normal practice:

"Also under present law, when a taxpayer changes a method of accounting, certain adjustments (called transitional adjustments) are often required to prevent the duplication or omission of an item of income or deduction. These transitional adjustments are subject to *special rules that generally prescribe that the amount of adjustment is to be taken into income (or claimed as a deduction) ratably over 10 years,* beginning with the year in which the change in method of accounting occurs." [Emphasis supplied.] (Standard Federal Tax Reports, 1981, CCH, ¶ 2899N.)

Amortization of real property construction period interest and taxes:

Prior to 1976, amounts paid for interest and taxes attributable to the construction of real property were generally allowable as a current deduction (unless the taxpayer elected to capitalize them as carrying charges). Congress regarded this as an undesirable tax shelter:

"The present tax provisions relating to real estate are used by taxpayers in high marginal income tax brackets to avoid payment of income tax on substantial portions of their economic income. This is principally achieved by allowing current deductions for costs which many feel are attributable to later years. For example, during the construction period the interest paid on the construction loan and the real estate taxes are immediately deducted even though there is no income from the property. . . . These deductions combine to generate losses which can be used to offset income from other sources . . ." (H.R. Rep. No. 94–658, 94th Cong., 2d Sess., 30–30 (1976)).

Therefore, the Tax Reform Act of 1976 (P.L. 94–455) added a new section to the Code stating that "Except as otherwise provided in this section . . . no deduction shall be allowed for real property construction period interest and taxes" (26 U.S.C. § 189(a)). The section went on to provide that such charges are to be capitalized in the year in which they are paid or incurred and amortized over a ten-year period (26 U.S.C. § 189(b)).

However, the ten-year amortization rule did not take effect immediately. In order to ease the transition to the new system, § 189(b) provided that amounts paid or accrued, which would otherwise have been allowable as a deduction for the taxable year, would be allowable in accordance with a table set out in § 189(b). Thus, for nonresidential real property (for example):

(1) For taxable years beginning in 1976 (the year the amendment took effect) taxpayers were allowed to deduct 50 percent of construction period interest and taxes, and then to deduct one-third of the remaining 50 percent in each of the next three years;

(2) Beginning in taxable year 1977, taxpayers could deduct one-fifth of the interest and taxes per year over a five-year period;

(3) Beginning in 1978 they were allowed to deduct one-sixth of these amounts over a six-year period, and so forth, through 1981, when they could deduct one-ninth of these amounts over a nine-year period.

In years after 1981, the provision takes full effect and taxpayers will be allowed to deduct only ten percent of these charges per year over ten years (26 U.S.C. § 189(b)).

Investment credit for qualified progress expenditures:

Prior to adoption of the Tax Reduction Act of 1975 (P.L. 94–12), an investment tax credit could be taken for an investment in "qualified property" only at the time the property was placed in service. Congress believed that this provision was inequitable.

". . . In cases where taxpayers pay for long lead time property as it is being constructed and substantially before the property can be placed in service, to wait for the allowance of the investment credit until the property is placed in service represented too long a delay in the claiming of the credit." (Standard Federal Tax Reports, 1981, CCH, ¶ 531 quoting the Conference Report on P.L. 94–12.)

To remedy this, the 1975 Act added new § 46(d) to the Code whereby a taxpayer, at his election, would be permitted to treat "qualified progress expenditures" for new property as a part of the base for which he could claim an investment credit. To minimize the possible "doubling up effect" of this change, new § 46(d) also included a "transitional rule" providing for a five-year phase-in of the new system.

Under the transitional rule, 20 percent of a taxpayer's 1975 progress expenditures could be treated as part of his qualified investment for 1975. The remaining 80 percent of those payments would be taken into account ratably over the next four years (20 percent a year). Forty percent of the progress expenditures made in 1976 could be taken into account in that year with the remaining 60 percent taken into account in the remaining three years of the phase-in period, and so forth. Thus, by 1979 the phase-in period would be complete and all progress expenditures made in that year and later years could be treated as qualified investments. (See: 26 U.S.C. § 46(d)(7)).

Other transitional rules:

Transition rules have also been adopted in connection with amendments to the tax laws involving:

(1) Rollover contributions to employee trusts or annuities (26 U.S.C. § 402(a)(5)(A));

(2) Employee pension plans (26 U.S.C.A. §§ 410 note, 415 note);

(3) Accounting methods for installment sales of property (26 U.S.C.A. § 453(a)(1) note);

(4) Prepaid dues income of membership organizations (26 U.S.C. § 456(d));

(5) Deferred compensation plans for State and local government employees (26 U.S.C.A. § 457 note);

(6) Bad debt losses and gains with respect to securities held by banks (26 U.S.C. § 582(c)(4));

(7) Interest on accumulation distributions from foreign trusts (26 U.S.C. § 668(c)(2));

(8) Credit limitations on income from outside the U.S. (26 U.S.C. § 904(e));

(9) Capital loss carryovers (26 U.S.C. § 1212(b)(3)); and

(10) The definition of averagable income (26 U.S.C. § 1302(b)(3)).

Mr. PERCY. Mr. President, the understanding that has been worked out with the majority leader is that a colloquy on the commodity straddle will occur at an appropriate time and 60 minutes will be reserved for the 10 Senators whose names I have mentioned, including my distinguished colleague from Illinois, Senator DIXON, to present the case in this matter.

It is my understanding that the able manager of the bill, Senator DOLE, will take out of the bill itself whatever time

he requires to respond to that colloquy.

Mr. DOLE. That is correct.

Mr. PERCY. If it is possible to work out a satisfactory transition rule, then there will be no further need for an amendment. But if that is not possible, then it is the understanding of the Senator from Illinois that time has been reserved so that, on behalf of the 10 Senators, I may offer an amendment; that there will be 30 minutes then provided for that amendment; that that amendment will be considered and voted upon prior to final passage of the measure.

Is that understanding correct?

Mr. DOLE. That is correct.

Mr. PERCY. I thank my distinguished colleague.

I should like to ask one other question of the distinguished Senator, because most of the Senators who are concerned about this matter are on the Agriculture Committee. The Agriculture Committee will be meeting tomorrow on the reconciliation conference.

If we could have adequate notice—an hour's advance notice—as to when the colloquy would be appropriate, it would be appreciated, so that all Members who have indicated a desire to be on the floor and to speak on this issue can be on the floor. If that is satisfactory, I express my appreciation to the distinguished floor manager of the measure, the chairman of the Finance Committee, for his consideration in this matter.

Mr. DOLE. That is satisfactory with the Senator from Kansas. It is something on which we have spent a great deal of time.

I hope the Senator does not want to exempt the traders from any tax. They have a pretty good deal.

Mr. PERCY. As the distinguished Senator knows, he earlier today requested that the 3 o'clock colloquy we were to have be deferred so that, as I understood it, he could consider the matter further and possibly discuss it with the Treasury Department—I believe when he hears the way we are approaching the problem, he will see that we support the premise that everyone should pay taxes.

What we are concerned with—as I have discussed—is the destruction of highly sensitive markets, the futures markets. When he hears that colloquy, we trust that we can work out a transition rule that will preserve the integrity of what Alan Greenspan said to me yesterday is one of the most sensitive markets. Mr. Greenspan said that if we act improperly in this matter, we could affect many other markets in this country. We simply need to know what we are doing, and I know that is consistent with the philosophy of the distinguished Senator from Kansas.

Mr. DOLE. I thank the distinguished Senator from Illinois.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, I think there has been a resolution now of this matter and let me say to the distinguished Senator from Massachusetts to make certain we have an understanding. Under the latest proposal in 1982 the rate would be 27½ percent; in 1983 the rate would be 25 percent; in 1984, 22½ percent; in 1985, 20 percent; and in 1986 it would be 15 percent.

And as I understand the revenue loss on that, according to the joint committee, it is in the neighborhood of $250 million and that is the best estimate I can make to the Senator from Massachusetts.

Mr. KENNEDY. I thank the Senator from Kansas.

I do think we quite frankly could find more deserving beneficiaries for this $250 million but I look at it that we have hopefully saved the American taxpayers about $25 billion today. Maybe others are going to object, but I appreciate the good faith of the Senator from Kansas. This is a 5-year loss and it is basically within margin of error. The way I see those figures, expressed over the period of time, $30 to $40 million a year, is within the basic margin of error.

I have no objection.

Mr. DOLE. Let me make clear to the Senator from Massachusetts those are estimates not made by this Senator.

Mr. KENNEDY. I understand that.

The Joint Committee has been always very fair with this Senator and I have no reason to question their estimates at this time.

Mr. DOLE. As I understand, that is satisfactory to both Senators from Oklahoma and the Senator from New Mexico.

The PRESIDING OFFICER. Is there objection?

Mr. BAKER. Mr. President, is the Chair putting the overall question?

The PRESIDING OFFICER. The Senator is correct.

Mr. BAKER. Just to make sure we have not dropped a stitch, let me make sure I have included everything.

RESTATEMENT OF UNANIMOUS CONSENT AGREEMENT

Mr. President, the intent of this request is to provide that only certain amendments will be in order. They are all first-degree amendments and they are all listed.

It is that there be time limitations on those amendments as noted on the list, except in the case where there is no time noted in which case there will be 30 minutes to be equally divided and the control of time will be in the usual form.

There will be a time limitation on the joint resolution of 6 hours to be equally divided between the distinguished manager of the joint resolution, the chairman of the committee and the distinguished ranking minority member, the Senator from Louisiana.

It is understood that time may be used as the managers wish including to yield time off the joint resolution to supplement the time provided for amendments.

No amendment other than those amendments listed and the committee substitute, as amended, will be in order.

Following the final disposition of these amendments the joint resolution will be taken through the stage of third reading, with third reading to occur not later than 3 p.m. on Wednesday, July 29, 1981.

At 3 p.m. on Wednesday, July 29, any amendments remaining will have a time limitation of 5 minutes equally divided.

There will be no further debate beyond the 5 minutes so provided. And no point of order or appeal in regard to the joint resolution will be in order after third reading, and following third reading the joint resolution will be returned to the calendar and no motion in respect thereto will be in order except for nondebatable motion to proceed to its consideration.

In addition, Mr. President, my request provides that after third reading of the joint resolution the Senate will proceed to take up the Department of Justice authorization bill at which time a vote on cloture filed against the Johnston amendment will occur. After the disposition of the cloture motion the majority leader may on motion and after consulation with the minority leader proceed to one of five items, the House or Senate tax bills, the tax conference report, the reconciliation conference report, the House budget bill, or one appropriation bill if such is available, it being understood that nothing in this request will waive any rights nor affect the status of the appropriation bill in respect to any other rule or precedent of the Senate.

Mr. President, I believe that is the summary of the request that has been put and I have taken the liberty of restating it since it has occurred now in stages and installments rather than a single presentation.

I inquire of the minority leader if he has any demurrer to that formulation or any corrections that he wishes to make?

Mr. ROBERT C. BYRD. I thank the distinguished majority leader.

First of all, what is the understanding with respect to the pending amendment by Mr. DOLE and Mr. DOMENICI?

Mr. BAKER. Yes. Mr. President, let me yield to the Senator from Kansas so he may explain that.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. DOLE. Mr. President, it is my intention to withdraw the amendment and then offer an amendment which would comport with the agreement or at least the understanding we have just had with interested Senators and have a vote on that. And I am prepared to proceed whenever I get the word.

Mr. ROBERT C. BYRD. When will the amendment by Mr. DOLE come down?

Mr. DOLE. I will take it down ahead of time. My word is good.

Mr. ROBERT C. BYRD. The only reason I ask is under the agreement it would not have to come down until third reading unless we have an understanding. My understanding is that it will come down immediately after this agreement is entered into.

Mr. BAKER. Mr. President, if the Senator will yield to me, it is my understanding it will come down immediately

after this agreement is entered into, but it is also my understanding as a result of the negotiation between the Senator from Kansas and the Senator from Massachusetts, the Senator from Kansas will offer an amendment which will comport with the agreement which I understand the two Senators have made.

Mr. DOLE. I might add further it may be disposed of on a voice vote. I am not certain anyone will demand the yeas and nays.

Mr. ROBERT C. BYRD. Further, Mr. President, what assurance can the majority leader give to the Senate? I will only state this for the record. I know what the intent of the majority leader is. But for the record, what assurance does the majority leader give that this measure will remain before the Senate until final action after third reading next Wednesday, that it will not be set aside, not be disposed of by motioning up another amendment?

Mr. BAKER. Mr. President, I give my assurance to the minority leader in that respect. I would be happy to amend the order if he wishes me to do so. But I give him my personal assurance that it is my intention to proceed to third reading on this measure and not displace it with another measure except by unanimous consent as it might appear desirable to both sides.

Mr. ROBERT C. BYRD. Mr. President, the majority leader's word is good enough for me.

I just want to make sure every opportunity is given to Senators whose amendments are enumerated to call up those amendments before the hour of 3 o'clock is reached next Wednesday.

Mr. President, can the majority leader and the two managers of the measure assure the Senate that sessions will be fairly lengthy during the interim?

Mr. BAKER. Yes, Mr. President, I would hope the managers of this joint resolution on both sides will take account of the fact that we have more than 90 amendments to this joint resolution. While I have expressed the hope that many of them will not be called up and time on debate of the measures will be severely reduced, it is still going to be a major job to take all of these amendments up and consider them in coherent way.

So I hope the managers of the joint resolution will stay late tonight and will, since Thursday night is the regular evening in any event, a late evening. I expect tomorrow evening to be very late, stay as late as necessary on Friday, Monday, and Tuesday in order to provide for the orderly disposition of this measure and all the amendments to it.

Mr. President, while I am on the floor and responding to the minority leader, let me cover one other point.

ORDER VITIATING CONVENING TIME ON SATURDAY

Mr. President, I ask unanimous consent that conditioned on the granting of this order, that the order to convene the Senate on Saturday at 10 o'clock be vitiated.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, if the majority leader will further yield, I hope that Senators whose amendments are enumerated in the request will call them up in timely fashion. I have seen situations like this occur so often in which Senators want to put their amendments off until the next day or the last day and, as a result, we have a glut of amendments on the last day.

I hope that—and I am attempting to protect Members who have amendments, certainly those on my side of the aisle—they will be prepared to call those amendments up in timely fashion so that they will be able to get the time that is allotted to include them under the order.

Mr. BAKER. Mr. President, will the minority leader permit me to join him in that statement? I think the only way this can turn out to be a real debacle would be if Members do not take heed of the fact that they must offer their amendments as soon as possible.

It is absolutely essential that we stay in late in order to accommodate Senators who now have indicated they wish to offer 90 amendments.

Mr. PERCY. Mr. President, will the minority leader yield for just a comment on that point? The colloquy I had with the floor manager of the bill, Senator DOLE, is one wherein we have an amendment being offered by 10 Senators on commodity straddles, a colloquy for which 1 hour has been reserved which, if satisfactory, then the amendment would not have to be offered. But I would want to be certain, because most of the Members are on the Agriculture Committee and will be in reconciliation tomorrow. We were ready at 3 o'clock today for that colloquy. We could have completed it, but at the request of the floor managers we did not do it. I do want to be certain that we can do it. We will be ready at any time except during the reconciliation conference, but we will be ready to do it immediately tomorrow afternoon.

Mr. BAKER. Mr. President, I thank the Senator and I am very grateful to him.

Mr. DODD. Mr. President, will the minority leader yield?

Mr. BAKER. Mr. President, I yield the floor.

Mr. DODD. Mr. President, I do not object, but I have a question based on the comment made by the distinguished Senator from Kansas.

As I understand this agreement does not have included in it the further agreement that the Dole amendment, not the pending Dole amendment, but the second Dole amendment, would not necessarily be subject to a voice vote. That was not part of the agreement, as I understand it, but merely a desire of the Senator from Kansas.

Mr. BAKER. Mr. President, as I understood the Senator from Kansas, he merely ventured the opinion that it might not be necessary to have a rollcall. There was no provision made one way or the other.

Mr. DODD. That was not part of the agreement?

Mr. BAKER. No, it was not.

Mr. DODD. I thank the Senator.

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object, I think there is only one question I would like to have clarified. The request as propounded by the distinguished majority leader gives the leader one right that he does not, he would not, have otherwise, and I believe that this should be clarified.

He included in the request that in the event cloture is invoked on the Johnston amendment that following the vote on cloture the majority leader would have the right to move to proceed to take up the House or Senate tax bills, certain conference reports, and one appropriation bill.

Ordinarily, Mr. President, he would not automatically have that right to move to take up the House tax bill. That is not a privileged measure, and I take it that his request was for the purpose of assuring Mr. JOHNSTON that in the event cloture is invoked, the majority leader would only move to take up one of those bills or conference reports that he specified.

I would not want to accede to the request here that the majority leader proceed to the House tax bill in the event cloture is invoked. I have no intention at the moment of interposing any objection to a unanimous-consent request to go to that bill or obstructing, if I could—and in some circumstances I could—it is not my intention to obstruct the making of a motion to proceed to the House tax bill. But I would not want by this request to waive the right on the part of the minority or on the part of any Senator.

Mr. BAKER. Mr. President, if I can say to the distinguished minority leader, the purpose of the listing of the five items was to, as he correctly infers, reassure the Senator from Louisiana that I would only attempt to go to one of those five. I do not attempt to create any new right beyond that which has been stated, nor waive any right the minority leader would have or any Senator would have in an attempt to prevent the Senate's proceeding to those measures.

I would point out, as I did to the Senator from Louisiana, that under the response to the parliamentary inquiry put by the Senator from Louisiana on the status of the DOJ bill, the cloture vote after third reading, we are also creating a right for that vote to occur. Otherwise it would not occur after third reading. So it really is a question of accommodating the wishes of the Senator from Louisiana, and then giving certain rights to the majority leader to do other things that appear necessary and desirable.

Mr. ROBERT C. BYRD. Mr. President, I know that was the intent of the majority leader. I ask that he include in his request that any motion to proceed to the House tax bill or to one appropriation bill not waive any rule or right that any Senator presently has.

Mr. BAKER. Mr. President, I include that in the request.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, that completes my summary of the request, and if there are no further questions by other Senators, I am prepared for the Senate——

Mr. DOLE. Mr. President, I raise one other question as manager of the bill.

As I understand the agreement, there will be some effort to schedule major amendments at the earliest possible time. I do not want to get into all the sequences, but I hope the managers of the bill will have an opportunity to try to negotiate some of these amendments. It puts the manager under a certain handicap if he is locked into a time agreement. So, I hope we are not in effect, getting ready to raid the Treasury here with time agreements, because I think many of these amendments might be negotiated.

Mr. BAKER. Mr. President, I would say to the distinguished Senator from Kansas that I think it is issential that we try to schedule these bills and do the major bills soon. I would hope that he and the distinguished Senator from Louisiana (Mr. LONG), would take the responsibility for trying to arrange that schedule so that we have a reasonable number of amendments on tap and ready to go, maybe six of them at a time, so that we have some expectation of what is before us at any given time.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

The text of the agreement is as follows:

UNANIMOUS CONSENT AGREEMENT

Ordered, That during the consideration of H.J. Res. 266, a joint resolution to provide for a temporary increase in the public debt limit, debate on any amendment in the first degree shall be limited to 30 minutes, to be equally divided and controlled by the mover of such and the manager of the bill, unless the amendment has a special time limit contained in the following list:

Sponsor, subject, time (30 minutes equally divided unless otherwise specified.).

Baucus—Increase write-off allowed certain small businesses for purchases of limited amounts of new equipment.

Baucus—Exclude from double taxation the first $100,000 of undistributed dividends.

Baucus—Index cap used to value land for estate taxes to the GNP deflator.

Baucus—Restore depreciation back to 175 percent.

Bentsen—Stock option.

Bentsen—Qualified progress expenditures.

Biden—Day care tax credit.

Bradley—Research and development.

Bradley—Eliminate tax on savings.

Bradley—3-year tax cut aimed at those under $50,000, 2 hours.

Bumpers/Kennedy—3-year tax cut redistribution to protect from inflation and social security, 2 hours.

Bumpers—Change definition of capital assets to elimnate luxury items.

Bumpers—Strike portion of the bill that reduces minimum tax on capital gains.

Byrd, R. C.—Depreciation schedule for generating equipment in coal-powered utilities and for pollution control equipment in coal-powered utilities.

Chiles—Resolution on small business, financial institutions and farms.

Cranston—Treatment of public utility property for "normalization".

DeConcini—Earnings limitations.

DeConcini—ESOP.

Dixon—Bank forward contracts.

Dixon—Individual retirement accounts.

Dodd/Heinz—Expensing option for construction of all residential rental housing, 40 minutes.

Eagleton—Social Security—de-couple from unified budget.

Exon/Bradley—Trigger for third year of tax cut, 2 hours.

Ford—Reduce tax on taxable income of principal campaign committees.

Glenn—Expand tax credit for incremental research and development, 1 hour.

Glenn—Exclude domestically performed R&D from Sec. 861 of Internal Revenue Code, 1 hour.

Hart—Commission on taxation.

Hart—Substitute individual tax cuts for indexing, 2 hours.

Hart—Tax on imported oil.

Heflin—Social Security interest rates.

Heflin—Tax credit on pecans.

Huddleston—Horse depreciation.

Huddleston—Earned income tax credit.

Kennedy—Retirement income tax credit for elderly.

Kennedy—Tax credit for home heating.

Kennedy—Deny business tax cuts to businesses that raise prices.

Kennedy/Wallop—Energy conservation.

Kennedy—Estate and gift tax.

Kennedy—Increase limit on corporate charitable contributions from 5% to 10%.

Kennedy—Cap on 10-5-3.

Kennedy—Reduce tax expenditures in proportion to direct spending cuts.

Kennedy—Reduce the tax deductions for business meals and first class airfare.

Kennedy—Phase in the 70% to 50% cut over two years.

Kennedy—Allow the investment credit to be carried back for a longer period and/or make the investment credit transferrable.

Leahy—Extend capital gains one-time exclusion for sale of home to handicapped.

Levin—Adoption and foster care tax credit—40 minutes.

Levin—Exclusion for first $100 of interest income.

Long—Expense and depreciation.

Matsunaga—Exempt energy investment tax credit from the "at risk" provision.

Melcher—IRS regulations on imputed interest rate.

Melcher—Refundable tax credit for nonferrous metal smelting.

Metzenbaum—Increase tax credit for day care.

Metzenbaum—Adoption and foster care tax credit.

Mitchell—Tax relief for small businesses by simplifying inventory accounting for tax purposes.

Moynihan—Thor power.

Chafee—Credit for Rehabilitaiton in Historic Districts.

Roth—Depreciation on Structures.

Provided, That in the event the manager of the resolution is in favor of any such amendment, the time in opposition thereto shall be controlled by the Minority Leader or his designee.

Ordered further, That a time limitation of 6 hours be imposed on the resolution, to be equally divided and controlled, respectively, by the Senator from Kansas (Mr. Dole) and the Senator from Louisiana (Mr. Long): *Provided*, That the said Senators, or either of them, may, from the time under their control on the passage of the said resolution, allot additional time to any Senator during the consideration of any amendment: *Provided further*, That the listed amendments be the only amendments in order, and that at no later than 3:00 p.m. July 29, 1981 the bill be advanced to third reading: *Provided further*, That if any of the listed amendments have not been called up by that time, there be 5 minutes, equally divided and controlled, on each such amendment: *Provided further*, That following third reading of the resolution, it be returned to the Calendar and that the motion to resume consideration of the joint resolution not be debatable: *Provided further*, That immediately after the joint resolution is returned to the Calendar, the Senate proceed to vote on the cloture motion presented by the Senator from Louisiana (Mr. Johnston): *Provided further*, That if cloture is invoked, the Majority Leader, inspite of the prohibitions of Rule XXII, can move to the consideration of the House or Senate tax bill, the conference report dealing with a tax bill, the conference report dealing with the reconciliation bill, the House reconciliation bill, or one appropriation bill: *Provided further*, That any motion to proceed to either the House tax bill or an appropriation bill not be permitted to waive any present right of any Senator: *Provided further*, That no call for the regular order during the consideration of any of these measures be permitted to return the Senate to the unfinished business.

Mr. BAKER. Mr. President, I thank all Senators. I especially thank the distinguished manager of the bill, the Senator from Kansas, the ranking minority member, the Senator from Louisiana, and, most especially, the minority leader who was most helpful.

Mr. President, I yield the floor.

The PRESIDING OFFICER. The Senator from Kansas.

WITHDRAWAL OF AMENDMENT NO. 509

Mr. DOLE. Mr. President, under the agreement, I now withdraw the amendment.

The PRESIDING OFFICER. Without objection, the amendment is withdrawn.

UP AMENDMENT NO. 261

(Purpose: Relating to the rate of tax on newly discovered oil)

Mr. DOLE. Mr. President, I think it is in order to send an amendment to the desk. I ask for its immediate consideration.

The PRESIDING OFFICER. The Senator has an amendment numbered 508 dealing with stock options.

Mr. DOLE. Mr. President, I ask unanimous consent that that be temporarily laid aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report.

The legislative clerk read as follows:

The Senator from Kansas (Mr. DOLE), for himself, Mr. DOMENICI, Mr. NICKLES, Mr. SCHMITT, Mr. BOREN, Mr. WALLOP, Mr. TOWER, and Mr. BENTSEN, proposes an unprinted amendment numbered 261.

Mr. DOLE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 160, strike out the matter following line 22 and insert in lieu thereof the following:

"For taxable periods beginning in:	The applicable percentage is:
1982	27½
1983	25
1984	22½
1985	20
1986 and thereafter	15 "

Mr. DOLE. Mr. President, this is an amendment offered by myself and the distinguished Senator from Oklahoma, Senator BOREN; the Senator from New Mexico, Senator DOMENICI; the Senator from Oklahoma, Senator NICKLES; the Senator from New Mexico, Senator SCHMITT; and the Senators from Texas, Senator BENTSEN and Senator TOWER, and perhaps others. I believe it conforms with the agreement. I have shown it to the Senator from Massachusetts. It is 27½ percent in 1982, 25 percent in 1983, 22½ percent in 1984, 20 percent in 1985, and 15 percent in 1986.

I believe, as indicated by the Joint Committee on Taxation, this would cost an additional $250 million. As far as I know, there is no reason for lengthy debate on the amendment, but if anybody wants to speak, they may.

Mr. DODD addressed the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. DODD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. On whose time?

Mr. LONG. Mr. President, I yield time to the Senator from Connecticut.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Who yields time? Do the Senators yield back their time?

Mr. DOLE. I yield back my time.

Mr. BOREN. All time is yielded back on this side.

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The question is on agreeing to the amendment of the Senator from Kansas (Mr. DOLE).

The amendment (UP No. 261) was agreed to.

Mr. BOREN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DOLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HEINZ. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. BOSCHWITZ). Without objection, it is so ordered.

ORDER OF BUSINESS

(The remarks of Mr. HEINZ at this point in connection with the introduction of legislation are printed under statements on introduced bills and joint resolutions. During the remarks of Mr. HEINZ, the following occurred:)

Mr. HEINZ. Mr. President, I ask unanimous consent that any further time I may consume be charged against morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HEINZ. I thank the Chair.

ECONOMIC RECOVERY TAX ACT OF 1981

WINDFALL PROFIT TAX

Mr. HART. Mr. President, this morning I joined many of my colleagues in support of an amendment to phase out the windfall profit tax on new oil. That amendment, by improving the incentive to search for new domestic supplies, promised to increase our domestic oil supplies and thereby lessen our continued dangerous dependence on foreign oil.

A windfall profit tax should not be imposed on new oil. We need to provide a simple, prompt, and obvious incentive for new domestic production to protect the Nation's security. The price for oil yet to be discovered in this country should be the same as the price we pay OPEC for its oil, and the same as the price received for oil discovered in foreign countries. Only by equating domestic prices with world prices can we maximize the incentive to search for new oil reserves in the United States.

However, old oil presents a different case. Old oil should be priced in relation to its costs of production. Revenue from old oil should provide reasonable and adequate profits in relation to the investment, but it should not be whatever today's market demands. Today's market is not a free market; it is an OPEC cartel market, and thus we must discriminate between old oil and new oil.

For the past 2 years, I have argued in support of this approach as one which is fair to both consumers and producers. Under this approach, there would be no cartel-induced profits for producers from the sale of previously discovered oil that is already providing investors a fair return on their capital invested to discover it in the first place. Yet, there would be no shortage of profits to be earned from the successful search for new domestic oil supplies.

Two years ago, I introduced legislation using this approach as an alternative to the windfall profit tax bill proposed by the Carter administration. That bill placed no tax on new oil and put a 100-percent tax on the profit captured by domestic producers on old oil resulting from arbitrary cartel price-fixing.

However, last year, this approach was passed over in favor of the administration's proposal, a bill which I eventually opposed. I opposed the administration's proposal because it established substantial disincentives for new domestic oil production at a point when we faced the real possibility of being drawn into a war in the Middle East because of our reliance on foreign Gulf oil.

We face the same situation today.

In the past, we have placed the wrong tax on the wrong oil. By taxing new oil we have discouraged the development of new oil supplies. Meanwhile, we have not put a high enough tax on old oil.

If the Senate ultimately adopts this amendment to phase out the windfall profit tax on new oil. I plan to introduce legislation to increase the windfall tax on old oil to 100 percent. This proposal would provide a responsible windfall profit policy which will make incentives as strong as possible to insure maximum search efforts for new oil and oil which is expensive to produce. It will also insure that domestic producers do not receive undeserved and excessive profits from old oil.

MORTGAGE SUBSIDY BONDS

● Mr. BAUCUS. Mr. President, it is with great regret that I note the inability of the Congress to deal effectively with the problems we have with mortgage subsidy bonds. None of these have been issued
